Louisville in September, 1889, set up in case No. 270 against the companies forming the "Santa Fé System," does not appear to have been in consequence of a violation of any of the provisions of the Act. He testifies that the goods were received by him "in a badly smashed condition, the repairs on part of which cost him over \$600.00," and that the transit was seven days longer than on the original shipment of the goods west. The damage to the goods shipped January 12, 1889, to Los Angeles, mentioned in case No. 271, against the Louisville & Nashville and Southern Pacific Companies, appears to have resulted from "rotting and other causes" of the perishable part of the shipment during its detention by the Southern Pacific Company after its arrival at destination. The detention was because of the failure and refusal of the complainant to pay as freight on the goods so detained, a sum in addition to the amount specified in the bill of lading and in a contract made by complainant with the initial carrier, the Louisville & Nashville Company, for the entire shipment, embracing household furniture as well as the detained articles. The demand of this additional sum is charged by the complainant to have been a "discrimination against him in violation of the Act to Regulate Commerce." As will be seen from our discussion of the matter *infra*, this charge cannot, in our opinion, be sustained. Therefore, in this case, also, the damage complained of cannot be made the basis of an order of reparation as being "in consequence of any violation of the Act." The remedy of a party for injury to goods shipped resulting from delay in transit, detention, loss, breakage, rotting or other deterioration or damage not attributable to a violation of any provision of the Act, is by proper action in the courts. *Loud v. South Carolina R. Co.* 4 Inters. Com. Rep. 205, 5 L. C. C. Rep. 529. The complainant, it is proper to say, does not ask for orders of reparation from this Commission, and has instituted suits in court for the recovery of his alleged damage in both cases.

We will now consider the contention of complainant (to which we have just adverted), that the demand by the Southern Pacific Company of the additional freight charge on what we have denominated the perishable part of the shipment "was a discrimination against him in violation of the Act to Regulate Commerce." The Louisville & Nashville R. R. Company by its agent contracted with the complainant to ship a carload, not to exceed 20,000 lbs. in weight, of household furniture and goods as "emigrants' movables" from Louisville *via* New Orleans to Los Angeles, over its own road and that of the Southern Pacific Company, for \$263.00, with permission to embrace in said carload apples, bacon, lard,

etc. The rate designated as a commodity rate on "emigrants' movables" from St. Louis and New Orleans (Mississippi river points) to Los Angeles under the west bound tariff of the Trans-Continental Association was \$215.00 per carload of 20,000 lbs. The rate of \$263.00 which the Louisville & Nashville R. R. Co. agreed to charge complainant was a combination of the local rate from Louisville to St. Louis with the \$215.00 rate from the latter point on. This rate was the lowest possible on any combination of rates by any route from Louisville to Los Angeles, the combination on New Orleans (*via* which the goods were shipped) being \$288.00, or \$25.00 more. The Southern Pacific Company, after making out an original bill for \$288.00 based on the combination on New Orleans, reduced it to \$263.00, which the complainant paid. The furniture and household goods were delivered, but the apples, bacon, lard, etc., were detained as not being "emigrants' movables," and a separate bill of \$122.10 was made out therefor, which the complainant refused to pay. Thereupon a correspondence was had between the Southern Pacific and the Louisville & Nashville which resulted in an order from the Louisville & Nashville Company directing the Southern Pacific to charge up the \$122.10 against the Louisville & Nashville Company. The Southern Pacific Company then delivered the goods to complainant (except the apples, which had been sold as perishable and accounted for) in, as he alleges, a damaged condition resulting from the detention. The rate of \$263.00 given complainant by the Louisville & Nashville Company was the west bound rate on "emigrants' movables," and it appears that the articles detained by the Southern Pacific Company did not belong to that class of goods as defined in the current western classification. The charge for those goods of \$122.10 appears to have been in accordance with the regular published tariff, and the Louisville & Nashville Company recognized this by having that amount charged to it in its settlement with the Southern Pacific. From these facts it does not appear that the Southern Pacific Company discriminated against the complainant in making the additional charge, but only demanded (as the law required) the regular published tariff rates on such shipments, and which were, or should have been, charged all shippers alike. If this rate was in itself reasonable (as to which there is no evidence *pro* or *con*) its exaction was no violation of the Act to Regulate Commerce. On the contrary, the Louisville & Nashville Company would seem to have violated the Act both by a discrimination in favor of complainant in charging him less than the established tariff rates charged shippers in general and by a deviation from those rates. The complainant would, also, have been

chargeable with a violation of law if he "knowingly and willfully" obtained the transportation of his goods "at a less than the regular rates then established and in force on the line of transportation." (Sec. 10, Act to Regulate Commerce). It is proper to say in this connection that, while the demand of the full legal rate and detention of the goods for its enforcement by a carrier cannot be held to be a violation of any provision of the Act to Regulate Commerce, the question of the lawfulness of such detention, where the shipper is an innocent party to the contract and not *in pari delicto* with the contracting carrier, will arise in a suit at law for the recovery of the goods and damages for their detention and is one for the determination of the courts and not within the cognizance of this Commission.

Demand by the terminal or delivering carrier, in cases of through shipments over lines composed of two or more roads, of a greater amount of freight charges than is specified by the initial carrier in the bill of lading or contract of shipment, appears to be of common occurrence and is a matter of almost constant complaint to this Commission. It seems to be the rule on the part of carriers in such cases to detain the goods, if payment be not made. The consignee is thus left the option of paying the extra charge, no matter how unlawful or unreasonable, or of being deprived for an indefinite period of the goods, which he often urgently needs in his business or for other purposes. If payment be made and the amount paid prove to be an "overcharge," the consignee is then compelled to seek re-payment from the carrier and this is generally found to be a matter of great difficulty, involving much correspondence and many references, back and forth, from one railroad official or department to another, lasting ordinarily for months and sometimes for years. The trouble and delay incident to such claims are so great and vexatious as to preclude the consignee from attempting to obtain satisfaction where, as is generally the case, small amounts are in question. While for the most part the sum in each case may be small, the instances are so numerous, that in the aggregate they involve a large and material amount. The shipment is made on the faith of the rate named by the initial carrier and in cases of merchandise shipments the extra charge always lowers the margin of profit on the goods and doubtless frequently causes the transaction to result in actual loss. The practice (as it may be termed from its frequency) of "overcharging" is a wide spread evil, which calls for a remedy. Where the demand by the delivering carrier is for an amount other than the regular published rate filed with this Commission, it is made unlawful by sec. 6 of the Act to Regulate Commerce,

and, if done "willfully," is declared in sec. 10 to be a misdemeanor punishable "upon conviction thereof in any district court of the United States within the jurisdiction of which such offense was committed by a fine of not to exceed \$5000.00." The time, expense and trouble which are required in prosecutions under this clause of the Statute and the difficulty in making proof of the criminal intent, are so great in comparison with the amount which may be involved in any one overcharge as to render such prosecution as a general rule impracticable. Moreover, it is not to be believed, that overcharges are resorted to by railway companies "willfully" and systematically as a means of evading the law. The remedy, in our opinion, lies in the hands of the carriers and consists largely in adopting measures to prevent mistakes in the rate named to the shipper.

It is difficult to understand why mistakes in through rates should be of such frequent occurrence and why, by the exercise of ordinary diligence, they may not be avoided. If the tariffs, classifications and rules of the railway companies or associations are so uncertain or complex and confusing, that even a railroad agent, whose special duty it is to know them accurately, cannot advise shippers with certainty what the rates are, then either a simpler, more certain and less perplexing system should be adopted, or else agents of a higher order of intelligence should be employed. If the agents of the roads cannot readily understand the tariffs and classifications, how can a shipper be expected to do so? A system of tariffs and classifications unintelligible to shippers defeats the end and object of the provisions of the interstate commerce law and rules of this Commission thereunder requiring the posting and publication of rates for the information of the public.

If the contract for shipment be for a greater than the authorized rate, it is manifestly not only a violation of law by the carrier, but also an imposition upon the shipper, who, it is to be assumed, would not knowingly agree to pay such rate. In a case of that kind there is no ground, legal or equitable, for the enforcement of the contract. Where the rate specified in the contract is less than the established legal rate, and the shipper "knowingly and willfully" obtains the transportation of his property at this illegal rate, he can of course acquire no rights under the contract; but, where the shipper has not, or is not chargeable with, this guilty knowledge and intent, a different rule has been laid down in the case of the *Mobile & O. R. Co. v. Dismukes*, decided by the Supreme Court of Ala., Dec. 27, 1891 (4 Inters. Com. Rep. 200). The shipment involved in that case was from Cairo, Ill. via Mobile, Ala. over the through line formed by

the roads of the Mobile & Ohio and Mobile & Birmingham R. R. Companies, to Sunny South, a station on the latter road. The value of the goods was about \$40.00 and the freight charge named in the bill of lading delivered to the shipper was \$5.44. The charge under the tariff of rates filed with this Commission, it is stated in the opinion, would have been \$29.30. On the arrival of the goods at Sunny South, the consignee, Dismukes, tendered \$5.44, the amount specified in the bill of lading, and demanded delivery. This demand was denied, the agent of the Company claiming the established rate of \$29.30. The consignee brought suit before a justice of the peace for the value of the goods and recovered judgment. On appeal by the company, the judgment was sustained in the circuit court and finally affirmed by the supreme court of the state. The illegality of the contract appears to have been relied on as a defense by the company. The following is an extract from the opinion of the supreme court in the case:

"The Mobile & Ohio Company agreed and bound itself to carry this consignment to Sunny South, Ala., and there deliver it to Dismukes, for a certain compensation. That company has no right, under the law and its tariff of rates adopted, approved, and promulgated as by law provided, to enter into any such contract; and so far as the company is beneficially concerned in it, so far as the contract might otherwise be relied on by the carrier against the consignee, it is void, as being in the teeth of the law of Congress, as the same has been put into practical operation, upon the carrying business of the company. But it by no means follows that the consignee has no rights under it, or, indeed any less or other right than would have been his had the rate set down in the bill of lading been the approved rate for the transportation. It nowhere appears that either the consignor or consignee knew that the stipulated rate was different from the approved rate. It is not in the contemplation of the Interstate Commerce Law that persons dealing with common carriers should be held to a knowledge of what their published schedules of rates contain. These schedules are not part of the law which all men are held to know. . . . It is only when the shipper knowingly contracts for a rate differing from that therein prescribed that his act is denounced as unlawful and punished as a crime. The motive of this legislation, moreover, is the protection of persons dealing with common carriers. Its primary purpose is to prevent a resort on the part of carriers to the undue advantages which accrue to them from the circumstances of their relations to persons having need for their services. . . . To allow the carrier to draw the shipper, entirely ignorant of the schedule of rates ap-

proved by the commission, into a contract of affreightment, upon which the goods are delivered and carried, at a stipulated rate which the shipper can afford to pay,—as in this instance, about 12½ per cent of the value of the property,—and then refuse to deliver the shipment to the consignee, except upon payment of a rate which he cannot afford to pay,—in this instance, 75 per cent of the value,—and upon which the property would not have been shipped at all, would be to put a construction on the law of Congress which its terms do not require or justify, and which would defeat the purposes which actuated its enactment. True it is that the contract here is one which the Mobile & Ohio Company had no right to make. True it is that its execution on their part involved a crime. But the act of the shipper in entering into it is not, in the absence of knowledge on his part of the schedule rate, tainted with criminality, or violative of any provision of the interstate commerce acts. He is not *in pari delicto* with the contracting carrier; and he is entitled to the protection of that principle of law which enforces such a contract in behalf of the innocent party to it,—a principle which we conceive to be logically sound, and thoroughly settled upon authority. See *Tracy v. Talmadge*, 14 N. Y. 162, and numerous later cases, which are cited and discussed in a note to that case as reported in 67 Am. Dec. 153.”

(See also authorities cited in foot note, 4 Inters. Com. Rep. 200, 201.)

In cases of through shipments at through rates over lines operated by several carriers, each successive carrier knows that the transportation over its road is under a contract with, or at a rate named by, the initial carrier, and it would seem that a system may be adopted (if it does not already exist) by which each carrier, before forwarding the shipment, may know what that rate is, and that the payment of overcharges as a condition precedent to the delivery of the goods might be avoided. What we have said in this connection is intended as suggestion and for the purpose of invoking the serious consideration and prompt action of carriers in reference to a matter of general and almost constant complaint.

As appears from our statement of the allegations of the complaints, it is claimed in substance in both the cases that the charge by defendants of \$350.00 for the transportation over their respective lines of a carload of “household goods” from Los Angeles east to Louisville, while only \$268.00 is charged on a carload of goods of the same kind and classification from Louisville over said lines west to Los Angeles, is in violation of section 8 of the Act to Regulate Commerce, which forbids the giving of undue or unreasonable preferences or advantages as between persons, particular descriptions of traffic and localities. In case 4 INTER S.

No. 270 against the “Santa Fé” line, this complaint is confined to complainant’s shipment of household goods from Louisville to Los Angeles in January, 1889, and their shipment back in September of that year, and in case No. 271 against the Louisville & Nashville and Southern Pacific Companies, it relates to shipments in 1889 of “household goods” in general. Under the Western Classification (which is applied to this traffic) “household goods” and what are termed “Emigrants’ movables” (which embrace “household goods” and other articles hereinafter named) in carloads are classed ‘B’ and the class rate on them from Louisville to Los Angeles and from Los Angeles to Louisville is the same both ways, \$350.00. On complainant’s shipments from Los Angeles to Louisville, he was charged this rate, it being the only east bound rate between those points applicable to his shipments. On shipments west, however, from Louisville to Los Angeles, there is also what is called a “commodity” rate on “emigrants’ movables” and this rate, as heretofore shown, amounted to \$268.00 per carload. The complainant’s goods were shipped west under this rate on “emigrants’ movables.” The difference between the two rates is \$87.00, and the goods shipped by complainant west were of the same kind and would come under the same classification as those shipped by him east.

“Emigrants’ Movables” are defined in the Western Classification as the “property of *intending settlers only*,” and the terms apply (according to that classification from which we quote) to “Household goods; second hand farm machinery and vehicles; livestock, not exceeding ten (10) head; trees and shubbery; lumber and shingles (not to exceed in the aggregate the equivalent of 2500 ft. of lumber); fence posts (not to exceed 250 in number); or a portable house; and property *included in the outfit of intending settlers*, but does not include doors, sash, blinds, provisions, grains (unless intended for seed or for feeding animals while in transit) general merchandise, nor any articles intended for sale or speculation.” The testimony is that the commodity rate on “Emigrants’ Movables” west bound was adopted for the purpose of assisting and stimulating *emigration* westward to the Pacific coast and territories and thus increasing the business of defendants. While this rate was, doubtless, primarily made for the use of “intending settlers” or emigrants only, in practice (according to the evidence) it is given to shippers indiscriminately, without inquiry as to whether or not they are emigrants and without reference to the intent with which the shipment is to be made. The complainant was allowed this rate, although, as he testifies, he was not an emigrant or “intending settler.” It is, therefore, practically a rate open to shippers in gen-

eral. There are, then, two rates open to shippers generally on "Emigrants' Movables" west-bound—the class rate of \$350.00 per carload and this commodity rate of \$268.00 per carload. There is in the tariff in connection with both rates a limitation as to valuation in case of loss or damage—as to the former \$5.00 per 100 lbs. and as to the latter, \$1000.00 per car. The carload being 20,000 lbs., \$1000.00 per car would be at the rate of \$5.00 per 100 lbs., on a full carload. There being no apparent substantial advantage in taking the class rate of \$350.00, it seems evident that the commodity rate of \$268.00 will (if made known to them) be the only rate used by shippers and that practically there will be but one rate on "emigrants' movables" west bound.

Commodity rates on "emigrants' movables," lower than the class rates, appear to have been in force on these west bound shipments from as far back as our records extend, 1887—how much farther we are not advised—to the present time, with the exception of the period from January 16 to October 23, 1888, and Mr. Smurr, General Freight Agent of the Southern Pacific Company's Pacific System, states that the "result desired to be brought about by these special rates" was "the maximum movement of emigrants' moveables and emigrants' things to the Pacific coast states and territories" and "that under said modified rates, the west bound movement is, as compared with east bound, as two to one—in other words, double the east-bound movement." From this it may be inferred that in his opinion these rates have accomplished, to some extent at least, the desired result and have been beneficial to the roads. The rate of \$268.00 is about 26 per cent of the valuation of \$1000 per car stipulated for by the roads in case of loss or damage, and, on the basis of the distance from Louisville to Los Angeles *via* St. Louis (about 2397 miles over the Louisville, Evansville and St. Louis road and the Atchison, Topeka & Santa Fé System,) it yields a rate of over a cent per ton per mile. It is also in evidence that "the class of goods that go west under the term 'Emigrants' Movables' on the average are of materially lower value than are those shipped from the Pacific Coast and the insurance risk is consequently less."

In view of the foregoing facts, which tend to show that the commodity rate of \$268.00 is not unreasonable in itself and is satisfactory to the roads, and also in view, particularly, of the practice of giving this rate to shippers indiscriminately (which is testified to by the officials of defendants) we can see no necessity for, or propriety in, retaining in the tariff and classification the class rate of \$350.00 west-bound or the statement that the commodity rate is for "intending settlers only." It can only serve to mislead those who consult the

tariff and classification and afford opportunity for the practice of favoritism or unjust discrimination as between shippers.

Unless within the authorized exceptions to the general rule of the statute, discriminations in charges upon like shipments of the same commodities based solely upon the purpose or "business motive" of the shipper, are unlawful whether affected directly, or indirectly by methods of classification.

The rate designated as a "commodity" rate has been in force a large number of years; it amounts to about 26 per cent of the limit of valuation of a carload in case of loss or damage; it yields a rate per ton per mile of *over a cent* for the long distance of 2397 miles; and the action of the roads in practically opening it to shippers in general would seem to indicate their approval of it as a reasonable general rate. Our conclusion is that there should be but one rate (which must be open to all and so published) on the classes of goods designated as "Emigrants' Movables" (which include "Household Goods") from Louisville westward to Los Angeles, and that that rate should not be in excess of the commodity rate of \$215.00 per carload from Mississippi river points, which added to the rate from Louisville to St. Louis amounts to the \$268.00 rate, which was given the complainant on his shipments west.

The complainant was not discriminated against in being allowed on his shipments west to Los Angeles the lowest available rate and there was no discrimination against him on his shipments east to Louisville, as he was charged the general rate exacted of all shippers. His complaint in reference to the disparity between the rates charged him on his east and west-bound shipments, respectively, is not properly one of unjust discrimination under the third section of the Act to Regulate Commerce, but rather calls in question the reasonableness of the higher rate. The claim is in substance, that the rate of \$350 eastward is unreasonable in view of the fact that the rate over the same line and between the same points westward is only \$268. This fact alone is relied upon to support the charge. The two rates have no necessary connection or relation, and the fact that a rate over a road or line in one direction is materially higher than the rate on the same class of traffic over the same road or line and between the same points in the opposite direction does not, as in case of hauls over the same line in the same direction, establish *prima facie* the unreasonableness of the higher rate. This would appear to be especially true where the hauls are of as great length as those now under consideration. It is moreover in evidence, as remarked above, that the "west bound movement of the traffic termed 'Emigrants' Movables' is double the east bound movement," and the goods shipped west

as "Emigrants' Movables" are "materially lower in value" than those shipped east. It may be conceded that the much greater volume of the traffic moved west than east is to some extent attributable to the lower rate west, but the tide of emigration is naturally from a comparatively old and thickly populated country like the east to a new and sparsely settled country like the west. No evidence as to the unreasonableness of this rate in itself has been offered.

In connection with the commodity rate on "emigrants' movables," as before remarked, it is specified in the tariff that "the valuation shall not exceed \$1000 per car," and the class rate on "household goods" (embraced in "emigrants' movables") is given upon condition of release by the shipper "to a valuation of \$5 per 100 lbs., in case of loss or damage." If the release be not made to these valuations, a higher rate is charged. The complainant contends that this is unreasonable and a violation of the Act to Regulate Commerce. The defendants in the case against the "Santa Fé" line in reply say that one purpose of this provision for limitation of their liability in case of loss or damage was the "protection of the carrier against overvaluation of property lost or injured, in cases where the carrier has not and cannot obtain knowledge or information as to the real value of the property and is placed at the mercy of shippers" in this respect. According to the weight of authority, a common carrier can make no contract protecting itself against liability for its own or its servants' negligence, but may, by special contract with the shipper, *reasonably* restrict its common law liability in *other respects*. Accordingly it is held that "a carrier may state a *reasonable* limit to the sum for which he shall be held accountable in case of loss, but cannot where this sum is understood to be an undervaluation of the goods thereby evade his full accountability as an ordinary bailee." *Schouler, Bailments & Carriers*, § 457; *South & North Ala. R. Co. v. Henlein*, 52 Ala. 606, 23 Am. Rep. 578; *Chitty*, Cont. 692; *Hart v. Pennsylvania R. Co.* 112 U. S. 381, 28 L. ed. 717; 2 Redf. Railways, 108, note a. In *Hart v. Pennsylvania R. Co.* cited above, it is held that such a contract will be upheld "as a proper and lawful mode of securing a *due proportion* between the amount for which the carrier is responsible and the freight he receives, and of protecting himself against extravagant and fanciful valuations," and in *South & North Ala. R. Co. v. Henlein*, that if the limit of liability fixed in the contract "be greatly disproportionate to the real value" of the goods shipped and "*the amount of freight received*, it would be unjust and unreasonable," but "if the limit was intended to adjust the measure of liability to the *reduced rate of freight charged* and to protect the carrier against exaggerated

or fanciful valuations," it will be sustained "as the measure of the carrier's liability." As stated at the outset of this opinion the remedy of a shipper for loss or damage is by appropriate action in the courts. In such action, the validity of a contract limiting the carrier's liability must be determined by the application of the law to the *facts in each case*. A contract unreasonable in view of the value of the shipment and the rate charged for its transportation would not be upheld, and the shipper would not be stopped by such contract from claiming and recovering his actual damage. The question presented for our consideration, however, relates, not to the validity of the limitation as to value, but to the reasonableness of the rate charged in view of that limitation. While the value of the service of transportation and the extent of the carrier's risk are measured by, among other things, the value of the property transported, and this is an important factor in rate making, it is to be noted that as shipments of goods of the same kind or class vary greatly in value, for the same weight, some being many times more valuable than others, a uniform rate per hundred weight for any commodity or class of traffic cannot bear the same proportion to the value of each shipment of such goods. The carrier can only be expected in establishing uniform class or commodity rates to take into account the estimated average value of shipments of the class or commodity to which the rates are applied. There is no proof whatever showing or tending to show that the limitation of value complained of is below the average value of shipments of "household goods," or that the rates in question are unreasonable in view of that valuation. Moreover, while the value of the property transported is an important element in rate making, there are others, such as the cost of service, net revenue of the carriers from the traffic involved, character of the goods as being perishable and liable to breakage, and other matters. We do not feel warranted to declare the rates under consideration unlawful on the mere fact of the release as to value required by the defendants.

The charge in both complaints as to the disparity between the carload and less than carload rates is confined to those rates as applied to "household goods" shipped from Louisville to Los Angeles. The less than carload rate is compared with the carload rate of \$263.00, which, as we have seen, is the commodity rate on "emigrants' movables" west bound. No less than carload rate is specified in the classification and tariff in connection with either the class rate of \$350.00 on "Emigrants' Movables" or the west bound commodity rate thereon of \$263.00. The less than carload rate is stated only on "household goods" and it is a class rate. It was in January, 1889, \$8.95 per 100 lbs., and the carload rate was

\$350.00, on the minimum carload of 20,000 lbs., or \$1.75 per hundred pounds. Under these rates the less than carload rate was about 125 per cent higher per 100 lbs. than the carload rate, and at the former rate the charge on 9000 lbs. would amount to \$355.00, a little more than the carload rate of \$350.00 on 20,000 lbs. These rates appear to have been maintained until April 11, 1893, when there was established per hundred pounds on shipments of "household goods" from Louisville *via* St. Louis to Los Angeles a carload rate of \$1.82 and a less than carload rate of \$3.60, and on such shipments *via* Memphis, a carload rate of \$1.73, and a less than carload rate of \$3.55. Under the latter rates, which are the lowest combination, the aggregate carload rate on a carload of 20,000 lbs., is \$346 and at the less than carload rate a weight of 9750 lbs., would be charged as much as such carload. In applying the carload and less than carload rates, the rule has been and is that, if a less weight than 20,000 lbs. yields at the less than carload rate a sum smaller than the aggregate carload rate, the shipper is given the benefit of the lower figure, but if the amount which would be so realized be larger than the aggregate carload rate, then the shipper is given the carload rate. Where also more than a carload of 20,000 lbs. is shipped, the carload rate is given on the excess although it may not amount to a full carload. Under these rules and the present rates *via* Memphis, shipments of from 9750 lbs. to 20,000 lbs. take the aggregate carload rate of \$346.00. On 9750 lbs. the carload rate amounts to about \$3.54 per 100 lbs., and on shipments over that weight up to 20,000 lbs. it grows continually less per 100 lbs. until, when 20,000 lbs. is reached, it is \$1.73. The shipper whose "household goods" weigh 9750 lbs. is charged \$346.00, and another shipper by the same train between the same points,

whose goods of the same kind weigh 20,000 lbs., pays the same amount.

The three leading classifications now practically governing the freight traffic of the United States are the "Official," which is applied east of the Mississippi river and Chicago, and north of the Ohio and Potomac rivers to the Atlantic Seaboard; the "Southern," which is applied south of the Potomac and Ohio rivers and east of the Mississippi river, and the "Western," which is applied west of the Mississippi and Chicago. Under these classifications household goods in carloads and less than carloads are classed as follows:

Classification.	Class.		Number of classes the less than car load is higher than the carload.
	C. L.	L. C. L.	
Official	2	1	One.
Southern	6	4	Two.
Western	B	1	Six.

It appears from the above that under the Western Classification, which is applied from Mississippi river points to the traffic now under consideration, household goods in less than carloads are placed six classes higher than when shipped in carloads, while under the Official and Southern Classifications there is a difference of only one and two classes. The rates stated above as now in force on carloads and less than carloads of household goods from Louisville to Los Angeles are governed by the Official Classification from Louisville to St. Louis, and by the Southern Classification from Louisville to Memphis, and by the Western Classification from those cities on to Los Angeles, and they illustrate the difference in the proportions between carloads and less than carloads resulting from the differences in classifications, as will be seen from the following tables giving the rates to St. Louis and Memphis under the Official and Southern Classifications, and thence on under the Western:

Louisville to Los Angeles via St. Louis.

	Classification.	C. L.		L. C. L.		Percentage of excess of less than carload over carload rates.
		Class.	Rate.	Class.	Rate.	
Louisville to St. Louis.	Official.	2	34	1	40	About 17%.
St. Louis to Los Angeles.	Western.	B	148	1	320	About 116%.
Through rate.			182		360	

Louisville to Los Angeles via Memphis.

	Classification.	C. L.		L. C. L.		Percentage of excess of less than carload over carload rates.
		Class.	Rate.	Class.	Rate.	
Louisville to Memphis.	Southern.	6	25	4	35	40%.
Memphis to Los Angeles.	Western.	B	148	1	320	About 116%.
Through rate.			178		355	

While there may be reasons for higher rates in the territory subject to the Western than in that subject to other classifications, it is not apparent why the disparity between the carload and less than carload rates on "household goods" should be so much greater.

We have been considering above the less than carload *class* rate as compared with the carload *class* rate on "household goods." As there is no less than carload rate corresponding, or given in connection with the commodity rate of \$263.00 on "emigrants' movables" west-bound, it would seem to follow that when shipped in less than carloads they take the regular less than carload rate. If that be so, and the less than carload rate on "Emigrants' Movables" (which embrace other articles beside "household goods") be the same as on "household goods," the disparity between the two rates on "Emigrants' Movables" west-bound will be greater than that above shown in connection with the rates on "Household goods." The commodity rate of \$263.00 on a carload of 20,000 lbs. amounts to \$1.31½ cts. per 100 lbs., which is only about 37 per cent of the less than carload rate per 100 lbs. of \$3.55 on household goods. Under these rates, the shipper whose "emigrants' movables" weigh 7400 lbs. would be charged about the same amount as one whose goods of the same kind weigh 20,000 lbs. It is also to be noted that not only the weight but the value of shipments is to be considered in determining the reasonableness of rates, and the aggregate value of 20,000 lbs. of goods will, except in rare cases, be much greater than that of 7400 lbs. or 9750 lbs. of goods of the same class or kind.

In the case of *Thurber v. New York Cent. & H. R. R. Co.* 3 Inters. Com. Rep. 742, 3 I. C. C. Rep. 473, it was held that the transportation of freight at a lower rate in carloads than in less than carloads is not in contravention of the Act to Regulate Commerce and that the circumstances and conditions of the transport-

tation in respect to the work done by the carrier and the revenue earned are dissimilar and may justify a *reasonable* difference in such rates. The differences between the rates for carloads and less than carloads on the grocery articles in question in that case were under the facts established by the testimony declared to be unreasonable. That testimony was voluminous and related, among other things, to the average cost of handling and loading the freight in carloads and less than carloads, respectively, and of its transportation, unloading and delivery; to the relative earnings from carloads and less than carloads; to the relative number and tonnage of carloads and less than carloads; to the movement of empty cars over the lines of the carriers complained against, and to the cost of many of the articles in question to the seaboard jobbers and the profit arising from the business. In the present cases there is no proof except as to the difference between the carload and less than carload rates. It is questionable whether the difference in cost of service and other conditions incident to the two modes of shipment is so great as to justify a rate on less than carloads more than twice as high as that on carloads. "Household goods," it is specified in the Western Classification, are not to be shipped "for sale or speculation," but even if this be carried out in practice, an unreasonable disparity between the carload and less than the carload rates on those goods in favor of the former would be none the less an unjust discrimination against the shipper under the latter. It is manifest, if they be shipped as articles of merchandise, that the small dealer would be absolutely precluded by the existing disparity in rates between small and large shipments from engaging in the business, and the field would be left to the exclusive occupancy of the large dealer. The importance of maintaining a reasonable relation between carload and less than carload rates on the same commodity is seen from the fact that any material difference be-

tween them in favor of the larger shipments must result in altogether debarring small dealers from participation in the trade. It may conduce to the convenience and interest of the carrier that shipments of certain kinds of traffic be made in carload lots, but as is said by the Commission in the Second Annual Report, "carriers in making rates cannot arrange them from an exclusive regard to their own interests, but must respect the interests of those who may have occasion to employ their services, and subordinate their own interests to the *rules of relative equality and justice which the Act prescribes.*"

An examination, however, of the entire Western Classification and tariff of rates thereunder discloses the fact, that the difference between the carload and less than carload rates on many other articles (most of them articles of merchandise) is as great or greater than that between those rates on "household goods;" and not only the defendants in the cases under consideration but many other carriers not before us as parties defendant are interested in all these rates. In view of these facts, and especially the further fact above adverted to that no proof has been made on which a definite conclusion can be reached as to what difference between the rates in question will be reasonable, we deem it advisable to leave this matter open for future consideration and determination, when all the parties in interest may be heard and the whole subject thoroughly investigated.

There remains to be considered the charge made in both cases, that the defendants, as members of the Trans-Continental Traffic Association, are in a "combination with other carriers" under the rules of that association "to pool and divide earnings effectively by upholding the prices of freights among different and competing railroads." The complainant contends that this alleged "combination is violative of sec. 5 of the Act to Regulate Commerce." That section of the statute makes unlawful "the pooling of freights of different and competing railroads," or the division "between them of the aggregate or net proceeds of the earnings of said railroads or any part thereof." As we understand the above allegation of the complainant, it is not intended to charge that there is an *actual* pooling or division of earnings between the defendants or other members of the Trans-Continental Association, but that the same result is accomplished "by upholding the prices of freights among different and competing railroads" as would be brought about by such pooling and division.

4 INTER 8.

In the agreement of the Trans-Continental Association on file with the Commission, its object is stated to be "to promote harmony of action between the carriers parties to it, to the end that reasonable rates of charge for their respective services may be jointly made and maintained." By Sections 1 and 2 of Article V. of the agreement, it is provided "that the General Freight and Passenger Agents of the parties thereto shall constitute Rate Committees," which shall "make all rates and divisions and rules pertaining thereto," and that those "rates, divisions, rules and regulations shall be promulgated by the Chairman for the guidance of the parties in interest and no deviation shall be allowed therefrom except" in certain specified cases. The "division" referred to, we understand to be that of through rates between the members of a through line. There is no provision in the agreement for an actual "pooling of freights" or "division of earnings" between the parties to the agreement. What was the practice under the agreement while in operation was not made to appear, but the witness examined on the subject testified, that "no such condition existed as pooling rates or allotments." It has not been shown by the agreement itself or other evidence that the object of the Association as stated in the agreement and the measures provided therein for fixing and maintaining rates constitute it a "contract, agreement or combination" in violation of section 5 of the Act to Regulate Commerce, or that those measures, if carried out in good faith for the purpose named, indirectly lead to the same result as the actual "pooling of freights" and "division of earnings" forbidden by the statute. In this connection it is proper to state, that on Dec. 31, 1892, notice was issued by the Chairman of the Trans-Continental Association that the Association had ceased operations except in the winding up of past business, and its existence appears to have then terminated.

It is directed that an order, issue requiring the defendants to forthwith alter or amend their classification and tariff in conformity with our conclusion herein, so that there shall *not* be two west bound rates on "household goods" and "Emigrants' Movables" including "Household Goods," and that one rate, *open to all shippers and so published*, be put in force on "household goods" and "Emigrants' Movables" including "Household Goods," from Louisville westward to Los Angeles, and that said rate be not in excess of the present commodity rate on "Emigrants' Movables" of \$263.00 per carload.

THOS. V. CATOR

v.

THE SOUTHERN PACIFIC COMPANY and THE UNION PACIFIC RAILWAY COMPANY.

1. Under the statute the defendants had a legal right to withhold or put into effect an open excursion rate to Omaha, and such right was not affected by the fact that open excursion rates, lower than regular rates of fare, had been in force over their connecting roads during the month previous. Comparison of the rates charged to complainant and others in July for transportation from

San Francisco to Omaha and return with reduced excursion rates charged for the transportation of persons from San Francisco to Chicago and Minneapolis in June of the same year, does not of itself present a discrimination or preference which the Act to Regulate Commerce empowers this Commission to correct.

Complaint filed October 3, 1892.—Answer filed October 22 and October 24, 1892.—Agreed statement of facts filed May 10, 1893.—Briefs filed May 10, 1893 and October 20, 1893.—Decided November 10, 1893.

DISCRIMINATION in special excursion rates.

Mr. Thomas V. Cator, for complainant in person.

Mr. James C. Martin, for Southern Pacific Co.; John M. Thurston, for Union Pac. R. Co.

REPORT AND OPINION OF THE COMMISSION.

McDill, Commissioner:

The complainant alleges that he is an attorney at law, residing and having his place of business at the city of San Francisco, California; that the defendants are common carriers subject to the Act to Regulate Commerce; that said defendants have been guilty of unjust discrimination and have given undue and unreasonable preference in this, to wit: That in June, 1892, the Republican and Democratic parties held national nominating conventions at Minneapolis and Chicago, respectively, each being composed of delegates from the several states and territories; that to each of these conventions delegates from California were carried over the roads of the defendants at greatly reduced rates; that thereafter in July, 1892, the People's party held a national nominating convention at Omaha, which was also composed of delegates from the several states and territories, and that the delegates from California thereto, thirty-six in number, including this complainant, applied to defendants for the same reduced rates as had been given to the delegates from California to the first above mentioned conventions, but such application was refused, and they were compelled to pay the usual and full rates to Omaha.

The defendant, the Southern Pacific Company, admits that special excursion rates were in force from California points to Chicago and Minneapolis in June, 1892, and that said re-

duced rates were not in effect at the time the national convention of the People's party was held at Omaha. This defendant further says that the special excursion rates made in the month of June to Minneapolis and Chicago were not limited to delegates, but were open to the public at large; that they were put in force strictly according to the provisions of the Act to Regulate Commerce; that under said Act it would not have been lawful or proper to give complainant or the 36 delegates to the Omaha convention special reduced rates which were not open to the general public; that the said special excursion rates from San Francisco to Minneapolis ranged, according to the route selected by the person desiring the transportation, from \$67.90 to \$82.90, and that tickets were issued at said rates, good only for continuous passage going on trains to arrive at Minneapolis on June 5th and 6th, 1892, and limited on return to 80 days from date of sale; that the said special excursion rates from San Francisco to Chicago ranged according to the route selected by the person desiring transportation, from \$70 to \$85, and that tickets were issued at said rates, good only for a continuous passage going on trains to arrive at Chicago on June 19th and 20th, 1892, and limited on return to 80 days from date of sale; that nothing in the Act to Regulate Commerce prevents carriers from making and issuing excursion rates and tickets as they may deem advisable, pro-

vided such rates and tickets are open to the public at large. The defendant, the Union Pacific Railway Company, filed a similar answer. It admits that the rates charged to complainant and others in July were about double the special excursion rates charged from San Francisco to Minneapolis and Chicago in June; but says that the said special excursion rates to Minneapolis and Chicago were made upon a cash guarantee that not less than 150 tickets should be purchased at the reduced rate, whereas no guarantee for a greater number than 86 passengers was offered by the applicants for reduced rates to Omaha.

Agreed facts.

Counsel for the respective parties have agreed upon the facts in this case. The stipulation reads as follows:

It is hereby stipulated that the following shall constitute the agreed facts in this case in lieu of other evidence, to wit:

A state convention of the People's party was held at Stockton, California, June 1, 1892, at which 86 delegates were elected to attend the national convention of the People's party to be held at Omaha, Nebraska, on July 2, 1892. James J. Morrison was secretary of the state convention; Jesse Poundstone was secretary of the delegates elected to the national convention. It was desired to secure reduced rates for the delegates and such other persons from California as might desire to attend the national convention, and the matter of securing such rates was taken up by Mr. Poundstone and Mr. Morrison. The following correspondence on the subject was subsequently had by letters, copies of which are hereunto attached, viz:

1. Letter from Mr. Jesse Poundstone to Mr. A. N. Towne, General Manager of the Southern Pacific Company, dated June 4, 1892.

2. Letter from Mr. A. N. Towne, to Mr. Jesse Poundstone, dated June 6, 1892.

3. Letter from Mr. Jesse Poundstone to Mr. James J. Morrison, dated June 4, 1892.

4. Letter from Mr. James J. Morrison to Mr. Jesse Poundstone, dated June 6, 1892.

5. Letter from Mr. James J. Morrison to Mr. T. H. Goodman, General Passenger Agent of the Southern Pacific Company, dated June 6, 1892.

6. Letter from Mr. T. H. Goodman to Mr. Jesse Poundstone, dated June 7, 1892.

7. Letter from Mr. Poundstone to Mr. R. Gray, General Traffic Manager, Southern Pacific Company, dated June 7, 1892.

8. Letter from Mr. T. H. Goodman to Mr. J. J. Morrison, dated June 8, 1892.

9. Letter from Mr. T. H. Goodman to Mr. Jesse Poundstone, dated June 9, 1892.

10. Letter from Mr. Jesse Poundstone to Mr. T. H. Goodman, dated June 10, 1892.

4 INTER 8.

11. Letter from Mr. T. H. Goodman to Mr. Jesse Poundstone, dated June 11, 1892.

12. Letter from Mr. E. A. Holbrook, General Traffic Agent of the C. & N. W. Ry. Co., to Mr. Jesse Poundstone, dated June 7, 1892.

13. Letter from Mr. W. D. Hitchcock, General Agent, Union Pacific Railway Company, to Mr. Jesse Poundstone, dated June 11, 1892.

14. Letter from E. P. Vining, Chairman, T. C. A., to Mr. Jesse Poundstone, dated June 14, 1892.

There were no other negotiations or requests for reduced rates in addition to the letters above referred to. If the annexed letters amount to a sufficient request for reduced rates, such request was made. The officers of the railroad companies, defendant in the case, did not consider that there was such a number of passengers likely to attend the national convention as would justify making reduced rates for the occasion. The defendants did grant a reduced rate to the delegates and all persons attending the Republican and Democratic national conventions mentioned in the pleadings.

The substance of the letters referred to is that the Southern Pacific Company and the Union Pacific Railway Company were requested by Messrs. Morrison and Poundstone, representing the delegates from California to the Omaha Convention, to issue special rates from California points to Omaha upon the holding of the said People's party convention. In reply to such request, the General Agent of the U. P. Co. advised Mr. Poundstone to take the matter up with the Southern Pacific Railway Company, the initial carrier from San Francisco. The Southern Pacific Railway Company in reply to Messrs. Morrison and Poundstone stated that as the proposition related to interstate transportation it would be unnecessary to have the request for special rate taken up by all members of the Trans-continental Association for action thereon.

Conclusions.

This complaint, filed on behalf of a class of persons carried under defendants' published passenger rate in July, 1892, alleges unlawful preference and discrimination in favor of another class of persons transported under a lower rate in June of that year. This allegation is based upon the fact that both classes purchased transportation over defendants' connecting railways for a similar purpose, that of attending national political conventions, and that the class charged the higher rate was refused the reduced rate allowed to the other class.

Passenger tickets of any kind must be offered impartially to all who accept the conditions on which they are issued, and the rates at which they are sold must be published. *Larrison v.*

Chicago & G. T. R. Co. 1 Inters Com. Rep. 869, 1 I. C. C. Rep. 147; *Re Passenger Tariffs*, 2 Inters Com. Rep. 445, 2 I. C. C. Rep. 649. The lower rate above mentioned was a special excursion rate, and the higher charge was the ordinary and regular rate of fare in force over the defendants' roads. There is no showing that the special excursion rates mentioned were not open to the public generally and sold impartially to all who chose to accept the conditions under which they were issued, or that the special rates were not put into effect and discontinued in the manner prescribed by law; and it must be assumed in this report that the defendants did, as averred in their answers, comply with the statute in these particulars.

Section 22 of the Act to Regulate Commerce as amended provides: "That nothing in this Act shall prevent . . . the issuance of mileage, excursion, or commutation passenger tickets." To rule in this case that complainant and his associates were subjected to unjust discrimination or undue prejudice by the issuance of excursion tickets in June and the refusal to issue such tickets for a similar occasion in July, would be a notice to carriers that if they do issue excursion tickets for a given purpose, they lay themselves under obligation to issue them for a similar purpose whenever occasion offers or application is made. Congress intended by the provision in the 22nd section to leave the issuance of these tickets free from such restriction. The special excursion rates in June were not limited to convention delegates or to any portion of the public, and the fact that they had been in force did not make it compulsory upon the carriers to establish a similar reduced rate in July upon application of persons desiring to attend another convention. Under the statute, the defendants had a legal right to withhold or put into effect an open excursion rate to Omaha, and such right was not affected by the fact that open excursion rates had been in force over their connecting roads during the previous month. The complaint does not attack the legality of rates charged in July from San Francisco to Omaha and return, except by comparing them with the lower special and limited excursion rates in prior effect from San Francisco to Chicago and Minneapolis. This does not constitute a discrimination or preference which the Act to Regulate Commerce empowers this Commission to correct. The complaint must, therefore, be dismissed.

In what has been said we have endeavored to state the law governing this case. Nevertheless the question raised by the complaint is unique and merits more extended notice. As a matter of equity there seems to be considerable justice in the proposition, which results from the claim advanced by the complainant, that if a carrier establishes an excursion rate

on account of a particular occasion, it ought also to allow reduced rates when, soon afterwards, a similar event takes place, unless it appears that the first excursion rate was unprofitable. Take this case as an example. The national conventions of the Republican and Democratic parties were held in June, 1892, and the national convention of the People's party assembled in the following month. Each of these conventions was composed of a large number of delegates chosen from the several states and territories, and was also largely attended by party leaders and spectators. The defendants made low excursion rates on account of the conventions of the first named parties but declined to make a special rate for the People's convention, and this naturally resulted in a belief on the part of the Populists that they had been subjected to unjust discrimination and undue prejudice. The fact that the distinction was made between political parties also served to increase the bitterness of feeling. Special excursion rates are made by carriers with a view of increasing travel at particular times. The occasion may be a convention, a fair, a military or civic demonstration, a general election, a picnic, a prize fight, a journey to points of interest or resort, or through a section of country noted for its scenery. Whatever the reason which impels a carrier to put reduced rate tickets on sale for a limited period may be, so long as the tickets are open to all who desire to purchase them, the law does not question the propriety of making the reduced rates; on the contrary, the statute says in terms that this right of carriers shall be preserved. But in specially excepting excursion, mileage and commutation tickets from any operation of the law, which, without such exception, might prevent their being issued, Congress sought as a prime object to protect the public interest. The exceptive phrase in the twenty-second section does not, however, provide against discrimination by the issuance of excursion tickets for one occasion and refusal to issue them on account of a similar event. It was supposed that the right to issue them would in itself be a sufficient safeguard against discrimination of this kind, and as a general rule this is true. This case is the first that has been instituted before the Commission wherein wrong is alleged to result from the issuance of special excursion tickets at one time and refusal to issue them at another. The general similarity of the three conventions, the large attendance at each of them, the absence of any proper desire on the part of the carriers to limit attendance at the Omaha convention, and their known and proper interest in stimulating business over their lines, make the reason for denial of the reduced rates in July somewhat obscure. The facts show that a guarantee of the sale of at

least 150 tickets was given for the June conventions, and that complainant and his associates furnished no guarantee that more than 36 passengers would travel under a reduced rate to Omaha in July. Ordinarily, it is important that carriers should have some definite idea of the number of persons likely to travel in case the excursion rate is established, but when there is to be a recurrence of great gatherings carriers frequently and safely rely upon the fact that travel to such assemblies has been considerable, and are guided in making reduced excursion rates by former experience. The refusal of defendants to issue reduced rate excursion tickets to the public on account of the Omaha convention may therefore have been a mistake which in their own interest these carriers will not repeat in the future. The fact remains, however, that as the law stands it gives the Commission no authority to order a carrier to cease and desist from discriminating between bodies of persons traveling at different times for a similar object by establishing a special excursion rate for one occasion and refusing to make any reduction whatever for the other. Whether the law

should be amended in this respect is a question for Congress to consider.

While we are satisfied that there is no authority under the law for an order from the Commission, yet we feel compelled to express our belief that the importance of national conventions for the nomination of candidates for President and Vice President of the United States, the fact that they are called but once in four years, and although held at different places yet generally occur about the same time in the year, all point to the conclusion that a proper observance of the spirit of the law to regulate commerce, which seeks equality and condemns undue preferences and prejudices, and unjust and invidious discriminations, would grant excursion rates to each national convention for such purposes.

As these conventions are only held at stated periods, and usually about four years apart, such equal action upon the part of carriers of passengers would not likely result in any serious embarrassment or loss of revenues, and therefore would seem to us to be subject in equity and justice to the rule above outlined.

UNITED STATES CIRCUIT COURT, NORTHERN DISTRICT OF FLORIDA.

FLORIDA FRUIT EXCHANGE

v.

SAVANNAH, FLORIDA & WESTERN R. CO. ET AL.

1. The increase of rates for the transportation of oranges from Florida points to northeastern cities over the line of the Savannah, Florida & Western Railway and its connections, which was made November 23, 1890, and amounted to $3\frac{3}{4}\%$ upon rates previously in effect, is unjust, unreasonable, excessive, and in violation of the Interstate Commerce Act; and it is not justified by the increased facilities which have been afforded by the carriers for handling and preserving the fruit.
2. The reasonableness of a carrier's rate on fruit is not necessarily to be determined by the question of the profit or loss which the producer receives upon his product.
3. The division among themselves which a number of connecting carriers make of a through rate should not affect the question of the reasonableness or unreasonableness of the rate as an entirety.
4. Decree enjoining violation of an order of the Interstate Commerce Commission passed October 29, 1891, which prohibited the exaction of a rate for the transportation of oranges from Florida to northeastern cities which should exceed the rates in force prior to November 23, 1890, by more than 5 cents per box,—allowing complainant a counsel fee of \$5000,—and directing defendant to pay costs of the suit, including the Master's charges of \$870.50.

December 1, 1892.

SUIT to enforce an order of the Interstate Commerce Commission passed October 29, 1891.
8 Inters. Com. Rep. 688. *Decree in favor of complainant.*
The facts sufficiently appear in the Master's Report.

Report of **Joseph H. Durkee**, *Special Master* (filed September 16, 1892):

This case arises on petition of complainant
4 INTER S.

asking this court to enforce by its order, decree, injunction, or other proper process, mandatory or otherwise, the decisions and orders

made by the Interstate Commerce Commission on the 20th day of October, A. D. 1891, upon the complaint of the Railroad Commission of Florida against the Savannah, Florida & Western Railway Company, and the Ocean Steamship Company of Savannah, and other named in said proceedings, in so far as said orders and decisions relate to the Savannah, Florida & Western Railway Company and The Ocean Steamship Company of Savannah.

The petitioner, the Florida Fruit Exchange, alleges that it is a corporation duly incorporated under the laws of the state of Florida, with its principal office at Jacksonville, in the northern district of Florida, and that the defendant, the Savannah, Florida & Western Railway Company, is a corporation by that name under the laws of the state of Florida and the state of Georgia, having business offices and agents at various places in said district; and that the defendant, the Ocean Steamship Company of Savannah, is incorporated under the laws of the state of Georgia, with a business office and agent in said northern district.

That the said defendants are common carriers and constitute a line under a common control or arrangement for continuous carriage or shipment over said lines, of freight, partly by railroad and partly by water, from Jacksonville, Callahan, Gainesville, Lake City, and Live Oak, and other places in the state of Florida, *via* said named places, to the city of New York, in the state of New York, the city of Philadelphia, in the state of Pennsylvania, the city of Boston in the state of Massachusetts, and by connecting lines to other eastern cities, and as such common carriers, are subject to the Act to Regulate Commerce and all statutes of the United States applicable in the premises and were so on and before the 30th day of December, A. D. 1890, and at all times since.

That Jacksonville, Callahan, Gainesville, Lake City, and Live Oak are base points in determining rates on shipments of oranges and lemons from points within the state of Florida to points without the limits of said state.

That during the season of 1885 and 1886, and for each season since, the defendant corporations established and maintained rates for the transportation of oranges and lemons from said base points in Florida to said points of destination, with but few changes until the season of 1889 and 1890, during which seasons said rates were to New York and Philadelphia by said lines, 30 cents per standard box, and to Boston, 35 cents, and proportionately to other eastern cities; that each of said defendants received, by agreement between them, a certain agreed proportion of said through rates, as set forth in Exhibit "A," filed with said petition.

That afterwards, to wit, in November, A. D. 1890, said defendants did agree together to advance and did, to wit, on the 28d day of November, A. D. 1890, actually advance said previously prevailing rates ten cents per standard box, and they have been, and are now, on all shipments from said base points to said points of destination charging, demanding, collecting, and receiving said advanced rates.

That afterwards, to wit, on the 30th day of December, A. D. 1890, the Railroad Commis-

sion of Florida filed a complaint with the Interstate Commerce Commission of the United States against the defendants herein, and others; alleging said advanced rates to be unlawful and in violation of the Act to Regulate Commerce and unjust, unreasonable and excessive and materially injurious to a large class of shippers.

That said complaint was answered by said defendants, and evidence taken thereon before said Commission and arguments submitted, and a decision rendered by said Commission on the 29th day of October, A. D. 1891.

That by said report, findings, decision and orders of the Interstate Commerce Commission it was ascertained, found, ordered, and adjudged that the said advance made in said rates on the 28d day of November, A. D. 1890, should not have exceeded 5 cents per box, and so far as it was in excess of that amount was unreasonable and contrary to law, and the said defendants were required to forthwith cease and desist from charging or collecting for the transportation of oranges and lemons any greater sum than an addition of 5 cents per box to the rates in force prior to the advance on November 28, 1890.

That said defendants have wholly failed and refused to observe, obey, or conform to said order of said Interstate Commerce Commission, and continue to charge and collect said excessive rates established by said advance of November 28, 1890, in the northern district of Florida.

The petitioner alleges that the Florida Fruit Exchange is engaged in the business of shipping and selling oranges and lemons, and is a large shipper of oranges, and also ships lemons from Jacksonville and Gainesville aforesaid by and over said line of defendants to said cities of New York, Philadelphia, and Boston on which the freight charges by defendants have to be paid, and is thereby interested in the observance by said defendants of said order of said Interstate Commerce Commission.

That since said order was made and said defendants have had notice of the same the petitioner has tendered to defendants to be carried over their line, from a base point in Florida, to wit: Jacksonville, to the cities of New York, Boston, and Philadelphia aforesaid, boxes of oranges of the usual or standard kind customarily used in the Florida trade, and has shipped over defendant's said line, and has offered to pay defendants for the transportation thereof of the rates fixed and ordered to be observed as aforesaid by said Interstate Commerce Commission, to wit, 35 cents to New York and Philadelphia, and 40 cents a box to Boston, and has demanded of them the said rates and the observance and performance of said order, and has made tender of payment to defendants in advance, of said lawful rates fixed by said order, but said defendants have refused to carry said oranges for the rates fixed by said order, but have exacted, charged, and collected, and continued to exact, charge, and collect of petitioner and its agents, the said rates established by defendants by said advance of November 28, 1890.

Petitioner alleges said rates to be unjust, unreasonable, excessive, contrary to law, and in disobedience of the said report, opinion, find-

ings, requirements, and orders of said Interstate Commerce Commission.

The petitioner prays that the said defendants and each of them, be restrained by the order, decree, injunction, or other proper process, mandatory or otherwise, of this honorable court from further violating, disobeying, or in any way refusing to observe, obey, conform to and perform said order of said Interstate Commerce Commission, and from refusing, failing, or neglecting to receive, transport, and deliver properly and promptly oranges and lemons of or from petitioner from said base points in Florida by and over said defendants' line to said points of destination, at rates of charges not in excess of those designated in said order of said Interstate Commerce Commission, to wit, an advance of 5 cents per standard Florida box on rates in effect next preceding November 23, 1890.

Petitioner further asks that the defendants be decreed to pay the costs and counsel fees herein and for such further relief as to the court may seem meet.

To this petition the Savannah, Florida & Western Railway answers and admits that it is a corporation under the laws of the state of Florida and a common carrier, and as such subject to the acts to regulate commerce; it admits that it has established and maintained rates as stated in the petition from the base points named, and that in November, 1890, said rates were to New York and Philadelphia by said line, 30 cents per standard box, and to Boston 25 cents, and that each of the defendants received by agreement between them the proportion of said rates as stated in Exhibit "A," filed with said petition.

It admits that on or about the 23d day of November, 1890, the defendants did advance the rates 10 cents per standard box, and that they have been and are now on all shipments from said base points to said points of destination, charging, demanding, collecting, and receiving said advanced rates.

It admits that the Railroad Commission of Florida filed its complaint with the Interstate Commerce Commission as alleged, but denies that the averments of said complaint, alleging said advanced rates to be unlawful and in violation of the Act to Regulate Commerce, are true.

It admits that proceedings were had before the Interstate Commerce Commission, but denies that the Interstate Commerce Commission, as organized and constituted by and under the Act to Regulate Commerce, as amended, rendered a decision and made orders on the complaint filed, while admitting that the so-called orders and decisions, appearing in Exhibit "A," to the petition, are true copies of their originals.

It admits that the defendants continued to charge the rates from said basing points on oranges and lemons put in effect November 23, 1890, but denies that said rates were excessive.

It admits that the petitioner is engaged in business as stated, and is a large shipper of oranges and lemons from and to the points named in the petition, and is interested in the rates charged thereon, and in any order which might be made by the Interstate Commerce

Commission as to said rates, and that the petitioner has tendered boxes of oranges as stated to be carried from and to the places named, and offered to pay for the transportation thereof, 35 cents per box to New York and Philadelphia, and 40 cents to Boston, and has demanded that such boxes of oranges be carried for said sums, and has made tender in advance of said sums.

It also admits that it has charged and collected and continues to charge and collect of petitioner the said rates established November 23, 1890, but expressly denies that said last mentioned are unjust, unreasonable, excessive, and contrary to law, while admitting that said rates are 5 cents per box higher than the amounts mentioned in the so-called order attached as Exhibit "A," to the petition in this case.

The answer further says that the complaint of the Railroad Commission of Florida against defendants was filed on the 30th day of December, 1890, and hearing had before the Interstate Commerce Commission at Jacksonville, Florida, on March 30 and 31, 1891, at which three members of said Commission were present, viz: Hon. Thomas M. Cooley, Hon. Martin A. Knapp, and Hon. Walter M. Bragg, and that before the 29th day of October, 1891, when a decision was rendered, Hon. Thomas M. Cooley had resigned as a member of said Commission, and the Hon. Walter M. Bragg had died, and that, therefore, the so-called order and decision of said Interstate Commerce Commission made on the 29th of October, 1891, is not the lawful order and decision of the Commission as created by the Act of Congress, and the amendments thereto, and that in refusing, neglecting, or failing to obey or perform said order it is not violating any order or requirement of said Commission made as a legally constituted Commission, or in a legal or authorized way, and that said order is not binding or of any force so far as this defendant is concerned, and asks that said petition may be dismissed.

It further recites that it filed its application for a rehearing before the said Interstate Commerce Commission on December 22, A. D. 1891, upon the grounds above stated, which was denied.

It avers that if the findings, decisions, and orders of the Interstate Commerce Commission were legal and valid they are but findings of fact and cannot be enforced except by the courts, and asks the court to hear and determine the cause anew upon proper pleadings and proofs, not only including the report of said Commission but all such other and further testimony as either party may introduce bearing upon the matters in controversy.

It avers that the rates in effect prior to November 23, 1890, did not afford a just and reasonable compensation for the services rendered, and that the rates put into effect on November 23, 1890, and which have been since charged, are just and reasonable, and denies every allegation in the petition which alleges that the rates now charged are unjust, unreasonable, or excessive.

Petition filed December 14, A. D. 1891.

Same date court directed defendants to file answers on December 21, A. D. 1891.

December 21, A. D. 1891, time extended to January 4, A. D. 1892.

Savannah, Florida & Western Railway filed answers March 8, A. D. 1892.

March 23, A. D. 1892, case referred to Special Master to take testimony and report with his findings.

Hearing begun March 26, A. D. 1892; closing testimony filed with Master, August 29, A. D. 1892.

Brief filed by petitioner September 1, 1892.

Brief filed by defendant August 31, 1892.

Charles M. Cooper, solicitor for petitioner, the Florida Fruit Exchange, and John E. Partridge, solicitor for defendant, the Savannah, Florida & Western Railway, were present at all hearings before the Special Master.

The admissions, made in the answer of the defendants to the allegations set forth in the petition, have brought down the questions to be considered here as to whether the increased rates put in effect on the 23d day of November, 1890, over the defendants' lines, upon standard boxes of oranges and lemons from Jacksonville, Callahan, Gainesville, Lake City and Live Oak, base points upon defendants' line of railroad, to the cities of New York, Philadelphia and Boston, and by connecting lines to other eastern cities, were unjust, unreasonable, excessive, and unlawful and in violation of the Act to Regulate Commerce, or were just and reasonable and not in violation of said Act.

The question raised by defendant as to the legality and validity of the proceedings had before the Interstate Commerce Commission, and the opinion, findings, decisions and orders thereon, as set forth in Exhibit "A" herein, is a matter of law which will be determined by the court.

The rates established and enforced upon oranges from Jacksonville, Florida, *via* Savannah, Florida & Western Railway and Ocean Steamship Company, to the cities of Baltimore, Philadelphia, New York and Boston, during different seasons from October 3, 1881, to the present time, are as follows, viz:

TABLE.

Rates on oranges from Jacksonville, Florida, to points named, *via* Savannah and steamer.

To Baltimore, Md.		Philadelphia, Pa.		New York, N. Y.		Boston, Mass.		Taking effect.

The rates from the other base points in Florida, Gainesville, Callahan, Lake City, and Live Oak to the points above named are the same as from Jacksonville, and it is presumed they

have been since those places were fixed upon as base points.

The Savannah, Florida & Western Railway is a gathering or initial road to only a limited extent and the total rate to points of destination is made up of the rates before named, together with the local rate from place of original shipment to said base points, though bills of lading are given from initial points to points of destination.

Prior to November 23, 1890, the orange rate to New York was, by the Clyde Line, the Mallory Line, and the line composed of the S. F. & W. R. Co. and the Ocean Steamship Co., 30 cents per standard box of 80 pounds; by the Atlantic Coast Line, 37½ cents per standard box, and by the Atlantic Coast Despatch Line (all rail) 43 cents per standard box; that rate had been maintained by the defendants since November 18, 1886.

By agreement between the several lines interested this rate was increased in November, 1890, 10 cents per standard box, and said increased rate was put in effect on November 23, 1890, and continues to the present time; this is an increase in freight rates of 33¼ per cent from said base points to the cities of New York, Philadelphia and Baltimore.

It is the contention of the defendants that the rate of 30 cents per standard box, in effect up to November 23, 1890, from November 18, 1886, a period of four years, was not a remunerative rate, and was originally made as a war rate when the Clyde Line "decided to put on a steamer at Jacksonville, and put on the Charleston rates into Jacksonville," and that it was continued afterwards on account of the freeze in 1886, and the yellow fever in 1887 and 1888, which caused general depression in business in Florida, and it was not thought good policy to raise the rate then; the traffic men did not finally recommend the increased rate, but it was made by agreement between the presidents of the lines interested to increase revenue.

The facilities afforded by the defendants in transporting oranges to market are superior to those used in forwarding other freights.

A train known as No. 208 is run between Jacksonville and Savannah, daily, leaving Jacksonville at 3:25 P. M., and arriving in Savannah at 8:35 A. M., during the orange season, which is practically a "perishable" freight train; it is claimed that this train is run at a speed of about 18 miles an hour; if the time of departure and arriving is correctly given by the assistant master of transportation of the Savannah, Florida & Western Railway the speed would be but 12½ miles an hour between Jacksonville and Savannah, by that train, counting the distance as given at 172 miles. To this train extra care and attention is given in the kind of cars given, in prompt forwarding of freight, terminal arrangements and handling at junctional points; ventilated cars are almost universally used, except, occasionally, owing to overcrowding of freight, a tight box car may be used. Improvements are being made from time to time in these ventilated cars, and those more recently constructed have the most approved brakes and couplers, with side and end ventilation to the cars. Such cars can be and are used in transporting

other classes of freight, but are especially adapted to and built for carrying "perishables." Right of way is given to train 208 over all others. If passenger trains are delayed this train has the right of way over it. A better paid class of conductors is employed on this train than average freight trains. More fuel is used. Running at a greater rate of speed the wear to the track is greater because of the heavier pounding of the wheel upon the rails. The train is made up at Jacksonville, and there is an extra cost for rebilling. Fewer cars are carried on train 208 than on ordinary freight trains. Many of the returning cars come empty, and the cars are seldom loaded to their maximum capacity.

The Ocean Steamship Company reserves the best part of its steamers, and that most completely ventilated, for the orange freights, and has furnished at New York a pier largely devoted to this class of freight, protected in the winter by warm storage, without extra charge to the shipper. The rental value of this pier is from \$40,000 to \$45,000 per annum. It gives special attention to prompt forwarding and speedy transit, the steamers making extra speed to meet the requirements of the market. Recognizing the necessity of giving quick transportation to the markets for oranges, that company in building its last ship, the *Kansas City*, built it with special reference to speed, and it makes 16 knots an hour.

There has been a persistent and increasing demand from orange shippers upon transportation companies for prompt and speedy transit of oranges from the packing house to the commission merchant, and better methods of shipment with increased facilities for handling, storing and caring for the fruit at terminals have been demanded. In furnishing these the transportation companies have acted intelligently and with a view of securing business. The importance of rapid transit is set forth by one orange grower (Rev. Lyman Phelps) by the statement that he considers the difference between an eight day delivery and a five days delivery from place of shipment, Sanford, Florida, to northeastern cities, at 10 cents per box. He also states that lying over en route for three hours might do more damage to the fruit, from want of oxygen, than continuous movement for forty-eight hours. The Florida orange is considered more tender and delicate than the California or Mediterranean, with less tissue and fibre and more juice, and does not stand shipment as well, ordinarily, its tissues breaking down and fermentation beginning quicker, unless special and intelligent care is taken in cultivating and preparing the orange for the market. The Florida orange is a perishable fruit, but bears transportation fairly well if picked when dry, carefully handled in packing, and shipped in dry weather. It is not as perishable as the strawberry, tomato, ripe peaches, or the banana. Promptness in handling, speed in movement, without delay en route, are essential requisites upon the part of common carriers to ensure the best results from the orange to the shipper. To meet these requirements seems to be the aim and purpose of the defendants, by continually furnishing increased facility for handling, transporting, and storing this fruit.

4 INTER S.

The orange industry is steadily and continuously increasing in volume and importance. It has become a fixed factor in the calculation of the defendants upon which to rely for sure, regular, and large freights.

It is estimated (Fairbanks, President Florida Fruit Exchange) that the number of orange growers in Florida is from 10,000 to 15,000, and that there are upwards of 70,000 acres of bearing groves, and from 20,000 to 30,000 acres not yet come into bearing. The value of bearing groves is considered to be \$300 per acre, or a total of \$21,000,000 for 70,000 acres of bearing groves. The non-bearing groves are estimated to be worth \$10,000,000 more. The orange crop in round numbers for the year 1884 and 1885 was 600,000 boxes, 1885 and 1886, 900,000 boxes, 1886 and 1887, 1,200,000 boxes, 1887 and 1888, 1,500,000 boxes, 1888 and 1889, 1,950,000 boxes, 1889 and 1890, 2,150,000 boxes, 1890 and 1891, 2,600,000 boxes, 1891 and 1892, 3,500,000 boxes. The net return to the grower is put down for 1888 and 1889 at \$1.72 per box; for 1889 and 1890, \$1.52; 1890 and 1891, \$1.54; 1891 and 1892, \$1.05. These figures represent the actual return to the orange grower at the point of shipment, and do not include the cost of production, packing and boxing. These items of cost are variously estimated. At a yield of 100 boxes to the acre it is stated that the expense of cultivation would be \$15 per acre, fertilizing \$15 per acre, boxing, picking, etc., 100 boxes at 40 cents per box, \$40; interest on value of grove \$300, \$24; total \$44. Net returns for 1891 and 1892, \$1.05 per box, leaving \$11 profit per acre after paying interest on investment. For the preceding years the profit would be greater per acre, taking the figures above quoted as the net return for oranges each year.

About one third of the orange crop goes to western points, and two thirds to eastern and northeastern points, upon which the increased rate of 10 cents per box, put in effect November 23, 1890, has been paid.

In the season of 1890 and 1891 there was shipped over the S. F. & W. Ry., via Savannah and steamships, including what went by Merchants & Union Line to Baltimore, to northeastern cities: from Jacksonville, 470,918 boxes; from Callahan, 82,254 boxes; and from Gainesville, 187,024 boxes; a total of 690,196 boxes. For the season 1891 and 1892, up to March 22, 1892, the shipments by same lines to northeastern cities were, from Jacksonville, 626,108 boxes; from Callahan, 160,922 boxes; from Gainesville, 292,782 boxes; a total of 1,079,782 boxes, or an increase over the former year of 389,566 boxes.

Taking the weight of the standard box of oranges at 80 pounds, the increase of tonnage from oranges over the S. F. & W. Ry., in the season of 1891 and 1892 in excess of that of 1890 and 1891 to northeastern cities amounts to 1558 cars loaded with 20,000 pounds each.

The orange crop is considered an uncertain one by orange growers, on account of the liability of severe frosts injuring or killing the trees. Such frosts have occurred six or seven times since 1866, each time doing much damage both to young and bearing trees. There have been but one or two severe cold spells,

notably in January, 1886, which were general and inflicted damage in all the orange growing portion of the state. At times many trees have been killed by the cold, and at times the growing branches would be killed back, taking a year or two of fresh growth to place the tree in a bearing condition again. The orange groves are also liable to much damage by insects, especially the red spider. In spite of these drawbacks the orange crop is increasing year by year, as new trees are being planted, young ones come into bearing, and old ones reach full bearing. This increase from the season of 1884 and 1885 to 1885 and 1886 amounted to 50 per cent; from 1885 and 1886 to 1886 and 1887, to 40 per cent; from 1886 and 1887 to 1887 and 1888, about 20 per cent; from 1887 and 1888 to 1888 and 1889, over 28 per cent; from 1888 and 1889, to 1889 and 1890 over 10 per cent; from 1889 and 1890 to 1890 and 1891, over 20 per cent, and from 1890 and 1891 to 1891 and 1892, nearly 35 per cent. There are no indications to show that the crop will grow less in the near future.

The amount of business for the defendants' line in handling the orange crop can be year by year quite accurately and safely estimated. It has been before shown that its line carried, in the season of 1891 and 1892, up to March 22, to Savannah for northeastern cities, an increase of one third more tonnage in oranges than during the season of 1890 and 1891. The orange rate of 40 cents per standard box *via* Savannah, Florida & Western Railway, and the Ocean Steamship Co., from Florida base points to the cities of New York, Philadelphia, and Boston, is divided, giving 18 cents to the S. F. & W. Ry., 18 cents to the Ocean Steamship Co., and 4 cents for the transfer at Savannah, one cent of which goes to the S. F. & W. Ry. Co. This road then received 19 cents per box for 172 miles carriage, Jacksonville to Savannah, and terminal service. Calculating the standard box of oranges at 80 pounds, twenty-five would make one ton. The compensation then is \$4.75 per ton, or a little more than 2 7-10 cents per ton per mile.

The division of the through rate over these lines was made originally when the route to Savannah, *via* S. F. & W. Ry., was by Live Oak and Dupont, and the distance was 259 miles. The distance from Savannah to New York *via* Ocean Steamship Co. line, was computed at about 750 miles. One rail mile was considered equivalent to three water miles in making up the rate. After the rate was established upon this basis the Short line from Way Cross to Jacksonville was built reducing the distance between Jacksonville and Savannah to 172 miles.

In recasting rates the Ocean Steamship still allowed the S. F. & W. Ry. Co. 50 per cent of the through rate, as before, for reasons sufficient to the contracting parties. If this basis of fixing rates between land and water transportation companies is the correct one, the all water route from Jacksonville to New York is equivalent to 800 rail miles.

The manager of the steamship line from Savannah, estimates that compress cotton occupies about twice as many cubic feet per ton as a ton of oranges, but while cotton may be carried anywhere, the best ventilated part of

the ship must be reserved for oranges. The same authority states that the revenue per ton to his line on oranges and cotton is about the same. The gross revenue from cotton is \$5 or \$6 per ton, out of which comes cost of compressing; for marine transportation, actual cost not stated. The gross revenue upon oranges is \$4.25 per ton. The cost of handling oranges in New York is put at 75 cents per ton, of cotton 20 cents per ton. Lumber is carried still cheaper at \$3.10 to \$3.20 per ton.

The rate on cotton from Callahan, Jacksonville, Lake City and Live Oak, Florida, *via* the S. F. & W. Ry., and Ocean Steamship to New York by traffic in effect Sept. 12, 1891, is only about 20 per cent higher than the 40 cent rate on oranges.

The Savannah, Florida & Western Railway "under its proportion of the old rate received 1.88 cents per ton per mile, and according to its report, the estimated cost of carrying a ton of freight per mile in general over its line, was, for the year ending June 30, 1890, .965 of a cent. Deducting the latter from the former there is left .915 of a cent as the excess of the rate per ton per mile under the old rate over the estimated cost of its general transportation. Making the same deduction from the rate per ton per mile 2.7 cents received under the advanced rate, there is left 1.745 cents as the excess of the present rate over the cost of transportation in general."

It is not necessary for the purpose of this inquiry to consider the cost of transporting freight per ton per mile, or the average receipts per ton per mile of the railroads making up the all rail route from Savannah to New York, as they are not parties herein.

The division of through rates between the Savannah, Florida & Western Railway and the Ocean Steamer Co., on oranges, grew up naturally. Prior to 1881, oranges from East Florida were carried on steamers out of the St. Johns river to Savannah and Charleston en route to New York. Most of them went by steamers from Charleston to New York, and the through rate was divided with the line from Charleston to Palatka, making 50 per cent each. The Ocean Steamship Co. received a part of these oranges, and divided the through rate in the same way. The orange business rapidly increasing, the Savannah, Florida & Western Railway, then the Atlantic & Gulf Railroad, wanted some of it, and consented to the same equal division of the through rate.

Its route was then *via* Live Oak and Dupont, 259 miles from Jacksonville to Savannah, and the division was a natural one, taking three water miles as the equivalent of one rail mile; when the Savannah, Florida & Western Railway built the short line from Jacksonville, *via* Way Cross, to Savannah, decreasing the distance between the two points to 172 miles, that company and the Ocean Steamship Co., in recasting rates, again agreed to make an equal division of the through rate.

By what percentages the through rate is divided between the defendants can be of no importance to the complainant, unless such an unequal division was made as to render the entire rate an unreasonable one.

The orange freight business has grown up and attained proportions giving it importance

in transportation circles in the last fifteen or twenty years. From insignificance fifteen years ago, the orange crop of 1891 and 1892 had reached 8,500,000 standard boxes. To convey this number to market would require 11,666 cars carrying 800 boxes each. Taking the estimate of cars making up a train on No. 208, as 32, it would take 364 solid trains to move last season's crop. It only establishes the credit of the transportation lines for business intelligence and sagacity that they have furnished as rapidly as possible improved facilities for handling, forwarding and storing such a large, sure and yearly increasing volume of freight. Experience taught both shipper and carrier that the orange must have ventilation in transit, to protect it from decay, and so ventilated cars were built and put upon the rails. It was found that better results were obtained by having air spaces in packing at the tops of the cars and space for ventilation at the side doors of the cars, and that oranges went forward in better condition if packed not to exceed 300 boxes in a car. Continuous and accelerated speed was found important, as thereby oxygen was furnished the orange in movement. Facilities for warm storage at terminals became necessary to protect the fruit from the cold weather in northern cities. These increased facilities have been added as experience showed their necessity, and were mainly in use before the advance complained of. They were made as an inducement to the producer as the natural competition existing for the carrying trade would lead him to ship by those lines offering best ventilation, continuous and rapid transit and improved terminal facilities for storing.

The former rates were in effect from November 18, 1886, to November 23, 1890. It is claimed that it was originally established as a war rate, and continued in subsequent seasons by the reason of the freeze of 1856, and the yellow fever of 1887 and 1888. This rate was not objected to during all this time as unremunerative, and when increased was not recommended by the traffic manager of the S. F. & W. Ry. Co. The increase is claimed to be justified on account of large expenditures for increased facilities for handling the crop. The increased expense consists of an addition to the cost of ventilated freight cars over the common box car, which is used also in the transportation of vegetables and ordinary merchandise, the extra expense for service and speed in running train No. 208, and the cost of furnishing warm storage in New York. These increased expenses would have been necessary had the rate remained to enable the transportation companies to handle rapidly and to the satisfaction of the shippers such heavy freights. The rate cannot be determined and fixed with a view necessarily of affording a balance of profit to the producer and shipper. The carrier will doubtless endeavor to establish rates so as to encourage and foster the cultivation of the orange. It is his interest to do so. It is manifestly improper, however, to so make rates as to at all times afford a profit to the shipper. An attempt to do this would cause rates to fluctuate with the markets, upon supply and demand.

The defendant company's through line from

base points in Florida to New York is made up of taking the average of distances from the base points, Jacksonville, Callahan, Gainesville, Lake City and Live Oak to Savannah of about 200 miles rail and about 750 miles water transportation. There is a competitive all water route from Jacksonville to New York, and a competitive route from Jacksonville, Gainesville, Lake City and Live Oak to New York *via* Fernandina, partly rail and partly water transportation. One of these lines, the Clyde, seems to have been instrumental in the reduction of the rates in 1886 to 80 cents. Upon the basis named by one witness (Sorrel) in fixing rates, this route to New York is equivalent to but little more than 300 miles of rail transportation. It is stated that oranges are delivered, on an average, as quickly by this route as by Ocean Steamship Company, or all rail. The strategic advantage occupied by this line should not operate to cause other lines to carry freights without proper compensation and profit. The actual cost of carrying oranges over the Savannah, Florida & Western Railway cannot be arrived at from any evidence furnished. It is shown that the average receipts per ton per mile in 1890, was 1.378 cents per mile, and the average cost of a ton per mile was .955 of a cent, a difference of .413 of a cent of the cost of transportation. Under the present rate on oranges this company receives about 2.7 cents per ton per mile, including terminal charges. If the cost of transporting a ton per mile remains the same as in 1890, this company receives 1.745 cents upon oranges over the average cost of transportation per ton per mile.

The orange crop does not supply a continuous freight throughout the year. Shipments begin in October, and continue steadily until April. For fully one half of the year no important movement of this crop is made. Many extra cars are required during the shipping season, and the terminal facilities in New York are not all required for other freight the remaining part of the year. An additional burden is thereby imposed upon orange freights.

The fact that claims are interposed by shippers and paid for loss, breakage and theft of oranges en route, is of no more significance than similar claims upon other classes of freights. It appears that oranges are shipped released and that no contract is made for delivery within a specified time at point of destination. Deterioration by delays in transportation are not considered. This loss falls upon the shipper.

The orange is a staple product in Florida, and its annual increase has been steady since it first assumed proportions of sufficient magnitude to engage the attention of transportation lines. The crop can be depended upon not to decrease in amount from year to year in the near future. It is handled easily and cheaply, packs closely, and is of sufficient weight to give fair tonnage to cars. Its transportation to market is a regular daily business during the season, and can be calculated upon with certainty. The volume of orange freights offered to defendants is increasing each season, and the cost to the carrier is decreasing.

The rate which was formerly in effect was continued for four years, and was not com-

plained of as unremunerative during that time.

The increase was much greater than required to compensate for increased facilities furnished by the carrier, admitting that these were made solely for the benefit of the shipper and not the intelligent and business like improvements which a first class railroad would supply as fast as found necessary to enable it to control a large and increasing proportion of these freights.

This increase was an advance of 83½ per cent upon the rates previously in effect to New York, Philadelphia and Baltimore, and was made without previous notice to a large class of shippers extending over a wide territory, whose interests were materially affected thereby. No such increase was made upon other products of similar volume and value. The decision and findings of the Interstate Commerce Commission have not been shown as erroneous by the proofs submitted before the master. If the court determines that said findings and decision were made by a legally constituted body, I recommend that the prayer of the petitioner be granted and the orders made by the Commission be enforced.

The evidence on file, as to the value of the services of the solicitor for complainants consisting of the sworn statements of two of the leading solicitors in the district, indicate a proper compensation to be from \$3000 to \$5000. The weight of evidence is in favor of the latter sum, and I recommend an allowance of \$5000 as compensation for the services of said solicitor in this cause.

Defendant's exceptions:

Exceptions taken by the defendant, Savannah, Florida & Western Railway Company, to the report of Joseph H. Durkee, Special Master in Chancery, to whom this case was referred to take the testimony and report same, with his findings, by an order made herein on the 23d day of March, A. D. 1892, the report bearing date the 16th day of September, 1892, and which was filed on the 17th day of September, 1892.

1st. For whereas there was but one question before the master, viz: whether the increased rates on oranges and lemons put in effect on the 23d day of November, A. D. 1890, over the line of the Savannah, Florida & Western Railway Company from Jacksonville, Callahan, Gainesville, Lake City and Live Oak, basing points, to New York, Philadelphia and Boston, and by connecting lines to other eastern cities, were unjust, unreasonable, excessive and unlawful and in violation of the Act to Regulate Commerce, who finds that said increase of rate was unjust, unreasonable and excessive, that said finding is erroneous, and petitioner cites and relies upon the entire testimony taken in this case to support same.

2d. For that said master finds, as a conclusion of fact on the testimony introduced in this

case, that all of the contentions of the defendant are established by the proof, viz: that the rate prior to the increased rate complained of in this suit, was not remunerative and that it was reduced originally as a war rate and retained afterwards on account of the freeze, the yellow fever epidemic, and the depression of business; that the facilities afforded by the defendant for transporting oranges and lemons are superior; that they run a special freight train for this purpose, called "A Perishable Freight Train;" that they give extra care and attention and terminal arrangements to handle these shipments at junctional points that are exceptional; that the cars are of superior character, having the most approved air brakes, couplers and ventilation; that they run at a greater speed; that there is extra expense for re-billing the freight; that many of the cars return empty, and that they go without being loaded to their maximum capacity; that the Florida orange is more perishable than other oranges grown in this country; that quick and continued transportation, by reason of the oxygen generated by motion, preserves the orange; that the expedition is worth at least 10 per cent over a movement that would be two or three days slower; and then he errs in finding in conclusion as a matter of fact, that the increased rate was unjust, unreasonable and excessive and unlawful and in violation of the Act to Regulate Commerce.

3d. For that the master, while finding that the orange is perishable, but will bear transportation "if packed when dry and carefully handled in packing," errs in the general conclusion which holds the transportation companies responsible for their being "packed when dry and carefully handled in packing" by saying that the rate is unreasonable, and to this extent basing it upon fruit that will bear transportation.

4th. For that the master erred in finding that the rate was unreasonable in its increase, because his own finding of fact shows that the grower receives \$11 per acre after deducting interest upon his investment, thereby demonstrating by his own finding that the increased rate was not unreasonable.

5th. For that the master erred in finding that the crop could be accurately counted upon for freightage during a stipulated period of the year, and defendant refers to the testimony of Geo. R. Fairbanks, Mr. Bishop and Rev. Lyman Phelps, and the master's own finding of fact, that the orange is liable to freezes and destruction by insects, in support thereof.

6th. For that the master while finding that the division of the through rate should not affect the reasonableness or unreasonableness of the rate as an entirety, is erroneously influenced by the division that is made of said rate between the carriers by basing in part his opinion upon the difference in miles allowed for sea voyage as against transportation by rail.

7th. For that the master, in basing his conclusion as to the reasonableness of the rate upon his computation that the defendant, the Savannah, Florida and Western Railway Company, receives 2.7 cents per ton per mile for hauling oranges against a much smaller percentage per ton on dead freights, erred by

reason of the fact that the increased tonnage that can be carried in a car of dead freight over perishable freight is not considered, and the fact that the perishable cannot wait, but must move, while the dead freight is a waiting freight.

8th. For that the master erred in part basing his finding that the rate was unreasonable on the estimated cost of .965 cents per ton per mile, by reason of the fact that the profit that a carrier may make on a perishable as against a dead freight cannot properly be a factor as to the reasonableness of the rate, and because there is no evidence to show what the cost per ton of carriage was at the time of this hearing.

9th. For that the master erred in refusing to take into consideration the claim for damages made on shipments of fruit as against similar losses upon dead freights.

10th. For that the master erred in finding that the increased rate was greater than the facilities furnished required.

11th. For that the master erred in basing his findings largely upon the fact that the increased rate was 83 1-3%, and was a larger increase than had been made at any one time upon any other character of shipment, instead of basing his findings upon the testimony, and defendant cites all of the testimony in this case to show the reasonableness of the rate and the unreasonableness of the master's findings.

12th. For that the master erred in placing the value of services of complainant's solicitor at five thousand dollars (\$5000), and defendant cites the testimony of Horatio Bisbee and A. W. Cockrell, and proffert of the record in this case in support of said ground.

13th. For that the bill of costs charged by the master in this case are excessive and onerous and unreasonable. And defendant cites the number of sittings had, as shown in the record, and the fact that the testimony was taken stenographically and charged for, independently, in support of this ground.

John E. Hartridge,
Sol. for S. F. & W. Ry.

DECREE.

Swayne, J., delivered the opinion of the court:

The above entitled cause having been heard and considered on the petition of said com-

plainant, the answers of said defendants, the evidence therein, the report of the master therein, and the exceptions of said defendants to said report, and the arguments of counsel for the respective parties complainant and defendant, it is considered, ordered, adjudged, and decreed that the said exceptions of complainants to said master's report be and the same are hereby overruled, and that the said report of the master filed herein be and the same is hereby sustained and confirmed. And, further, that said defendants, The Savannah, Florida & Western Railway Company and the Ocean Steamship Company of Savannah, and each of them and their and each of their agents, servants and employees and every of them, be and are hereby enjoined and restrained from further violating, disobeying, or in any way refusing to observe, obey, conform to and perform, the requirements of the order of the Interstate Commerce Commission of the United States, made, to wit: on the 29th day of October, 1891, requiring said defendants and each of them to forthwith cease and desist from charging or collecting for the transportation of oranges and lemons any greater sum than an addition of 5 cents per box to the rates in force prior to the advance on November 23, 1890; and from refusing, failing or neglecting to receive, transport and deliver properly and promptly, oranges and lemons, or either, of or from said complainant, The Florida Fruit Exchange, from the base points in Florida, to wit: Jacksonville, Callahan, Gainesville, Lake City and Live Oak, and any one of them, by and over said defendants' line or lines of transportation, railroad, or railroads, steamship or steamships, to New York city in the state of New York, and other eastern cities, or any of them, the points of destination of any such shipment or shipments, at and for rates of charges therefor not in excess of those designated as the maximum allowed by said order of said Commission, to wit: an advance of 5 cents per standard Florida box on the rates in effect next preceding November 23, 1890.

And further that said defendants pay to complainant the costs of this suit, including the master's charges as reported by him, and pay to complainant or its solicitor of record the fee of the complainant's solicitor and counsel, Charles M. Cooper, of five thousand dollars, which is hereby allowed herein.

UNITED STATES CIRCUIT COURT OF APPEALS. (Second Circuit.)

INTERSTATE COMMERCE COMMISSION

v.

TEXAS & PACIFIC RAILWAY, *Appt.*

1. A charge of \$3.70 per hundred pounds upon domestic traffic from New Orleans to San Francisco when only 80 cents per hundred between the two points is charged under substantial equality of conditions upon similar goods coming to the port of New Orleans from Liverpool is not justified by the fact that there is competition with

water routes in carrying between Liverpool and San Francisco, since the gross inequality shows that the carrier is either injuring itself by carrying without profit or is receiving an unwarranted return from the domestic traffic for the service rendered.

2. Disobedience of an order of the Interstate

Commerce Commission prohibiting the carriage of traffic from foreign ports upon any other than the published inland tariff rates for similar freight from the port of entry to the point of destination, not permitted by the United States circuit court on the ground of the existence of competing water routes; but the general question whether rates for the inland carriage of foreign and domestic traffic must be the same, without regard to any circumstances which may exist in the foreign country, is not decided.

3. A carrier is not free to make dissimilarities to any extent it may choose in the freight rates on foreign and domestic traffic from the fact of the existence of some dissimilarity of conditions.
4. Where a carrier has an office in one state,

which is that of the executive officers, and where the stockholders' and directors' meetings are held, and the stock certificate books and the records of stockholders and directors meetings are kept, while the administrative offices of the carrier are in another state, the former is its principal office within the meaning of section 16 of the Interstate Commerce Act relating to place of bringing suits to enforce orders of the Commission.

5. All the carriers which united in making a joint rate are not necessary parties in a suit for an injunction against one of them founded on an alleged disobedience of an order of the Interstate Commerce Commission which commanded its abandonment.

Decided October 17, 1893.

APPEAL by defendant from a decree of the the Circuit Court of the United States for the Southern District of New York in favor of complainants in a suit brought to enjoin defendant from further disobedience of an order of the Interstate Commerce Commission, requiring it to desist from making certain excessive charges for the transportation of freight.

Affirmed.

The facts are stated in the opinion.

Messrs. Winslow S. Pierce and David D. Duncan for the appellant.

Messrs. John D. Kernan and Edward Mitchell, U. S. Dist. Atty., for the appellee.

Shipman, Ch. J.:

On March 28, 1889, the Interstate Commerce Commission made, not upon contention of parties, a general order, which, among other things, provided as follows: "Imported traffic transported to any place in the United States from a port of entry, or place of reception, whether in this country or in an adjacent foreign country, is required to be taken on the inland tariff governing other freights." This order was quite generally obeyed by those railroad companies and their connecting lines, which carried imported goods westward from the Northern Atlantic seaboard. At least six railroad companies ceased, after said order, their previous practice of discrimination in favor of imported traffic.

On June 19, 1889, the Commission filed its decision in regard to export rates in the case of *New York Produce Exchange v. New York Cent. & H. R. R. Co.* and eighteen other railroad corporations, 2 Inters. Com. Rep. 533. The opinion shows that the trunk lines, so called, had, "under resolutions of their association, made through export rates of which the inland proportion accepted by them was, at the port of New York, often ten cents or more per hundred pounds less on like traffic than the published tariff rates charged at the same time to the same port." It was held "that the discrepancy between the proportion of the through rate accepted and the established tariffs for seaboard consignments for the same inland carriage, is not shown to have been justified by any circumstances tending to show that it was just or

proper, and that it must therefore be deemed an unjust and unlawful discrimination as against the transportation terminating at that port," and that "the only practicable mode yet devised for making through export rates, as appears by past experience, is to add to the established inland rates from the interior to the seaboard the current ocean rates."

This decision was confined to export rates at the port of New York, but as thus made, was of almost national importance. It is believed that the railroad companies which were parties to the litigation complied with the order of the Commission.

In this state the general railroad policy which has been established by the Commission in regard to rates which discriminated in favor of either import or export traffic against inland traffic, the New York Board of Trade and Transportation filed, before the Interstate Commerce Commission on November 29, 1889, a complaint against the Pennsylvania Railroad Company and its connecting western railroad companies, charging in substance that these corporations were, in violation of the Act to Regulate Commerce, guilty of unjust discrimination in that, for the transportation of property to Chicago and other western points, which was delivered to them at New York or Philadelphia, by vessels or steamship lines from foreign ports, under through bills of lading, they were charging rates fifty per cent lower for the like and contemporaneous service rendered to property delivered at New York or Philadelphia, which did not arrive from foreign ports. Subsequently, the San Francisco

Chamber of Commerce became a party complainant and divers other railroad companies, among them the Texas & Pacific and the Southern Pacific Railroad Companies, were made parties defendant, until twenty-eight companies were defendants. This complaint was apparently brought to compel universal obedience to the order of March, 1889. The Commission dismissed the complaint as to eighteen defendants and found that its averments were true as to ten defendants, among which were the Texas & Pacific and the Southern Pacific companies, and as to said defendants, ordered, on January 29, 1891, that each of them, on and after May 5, 1891, cease from carrying any article of import traffic shipped from any foreign port, through any port of entry of the United States or any port of entry in a foreign country adjacent to the United States, upon through bills of lading and destined to any place within the United States, upon any other than the published inland tariff covering the transportation of other freight of like kind over their respective lines from such port of entry to such place of destination, which order was duly served upon the Texas Pacific Railroad Company.

On or about January 18th, 1892, the Commission brought its petition against said company before the Circuit Court for the Southern District of New York, alleging that it had willfully violated said order, by charging, collecting and receiving freight rates which had been declared to be illegal, and by way of specification, the petition alleged that the offending and also the regular inland rates were shown in a table annexed to the petition, marked "Exhibit 86." The findings of fact by the Commission upon the original complaint were made part of the petition. The prayer of the petition was for an injunction against further disobedience of the order.

The defendants' answer denied that its principal office was in the state of New York. It denied no other allegations of fact but denied that the order was a lawful order. It stated that the rates which were complained of were, so far as they were made for inland carriage, the joint rates over its railway and the Southern Pacific Railway and cover the carriage by the rails of the defendant from New Orleans to El Paso, Texas, and by the rails of the Southern Pacific road from El Paso to San Francisco.

The answer admitted that it charges, demands, collects and receives, and has, since the date of the order, charged, demanded, collected and received rates for the transportation of commodities from Liverpool and London, *via* New Orleans, and said two railways, to San Francisco and also from New Orleans, *via* the same route, to the same destination, substantially as stated in Exhibit 86.

Its reason for a discrimination in inland rates between foreign and domestic merchandise will be stated hereafter.

The answer further said that the order affected its rates from London, Liverpool and other European points to Missouri river points, but that these rates became so low that it had canceled its tariff and was charging on such business as it received, destined from Europe

to the Missouri river, the local rates from New Orleans.

The answer further stated that the order also affected its rates of transportation on articles from Europe to towns in Texas and Colorado.

No testimony was taken before the circuit court. The case was heard upon petition and answer and an injunction was directed against the defendant in accordance with the prayer of the petition. From this decree the defendant has appealed to this court.

Exhibit 86 shows a very marked discrimination in rates from New Orleans to San Francisco between those charged upon merchandise shipped by through bills of lading from Liverpool to San Francisco and those charged upon the same kind of goods delivered to the defendant at New Orleans from places in this country for transportation to San Francisco. For example, the through rates from Liverpool to San Francisco, per hundred pounds, on books, shoes, carpets, cashmeres, cutlery and woolen goods were \$1.07, of which the railroads received, for carriage from New Orleans to San Francisco, eighty cents. While upon the same classes of goods received from points in this country at New Orleans, the rates for carriage from New Orleans to San Francisco, per hundred pounds, were as follows: upon books and carpets \$2.88, upon shoes, cashmeres, cutlery and woolen goods \$8.70.

The finding of facts by the Commission shows that in 1889, the importations of the Texas & Pacific Railway were about five millions of pounds, of which about 2,500,000 pounds went to Missouri river points, about 2,000,000 pounds to the Pacific slope, California terminals and Oregon points and the remainder was distributed mostly in Colorado and Utah, while a little of it went to Texas. As the defendant is charged with a violation of the order only with respect to its rates to California terminals, it is necessary to state no other facts than those which related to that part of its business.

The through rates from Liverpool to San Francisco are controlled by the competition, at Liverpool and London, of steamships connecting with railroads across the Isthmus of Panama and in a small degree, with respect to cheap heavy goods, of sailing vessels around Cape Horn.

The defendant carries import traffic at the reduced rate to California terminals only. To intermediate points the regular inland rates are charged. This traffic is taken at the reduced rate, because, unless so taken, the defendant would, by reason of the competition, lose the business which it is expected will increase. The defendant places the dissimilarity of conditions between the transportation of imported and domestic goods solely upon this ocean competition. There is apparently no other reason why the inland rate should not be applied to all business, both domestic and foreign. No finding was made as to the profit upon the San Francisco business. There was a profit, when the case was heard before the Commission, upon the Missouri river business. It was found that the Southern Pa-

cific proportion of the through rate would not, in the absence of competition, be a full and fair return for the transportation service rendered. It gave the road something more than the actual cost of the movement of the freight.

The Commission contended that upon these facts the defendant had violated the second section of the Act to Regulate Commerce which prohibits unjust discrimination in the compensation charged for like and contemporaneous services in the transportation of a like kind of traffic under substantially similar circumstances and conditions and had also violated the third section which prohibits any undue or unreasonable preference or advantage to any particular description of traffic.

The defendant insisted that the dissimilar conditions growing out of the ocean competition freed its conduct from the prohibition of the statute.

The Commission in deciding the original case, held that this class of dissimilar conditions was not in the contemplation of the statute and was not to be regarded in the regulation of inland tariffs of rates. Its language was as follows:

"These circumstances and conditions are indeed widely different in many respects from the circumstances and conditions surrounding the carriage of domestic interstate traffic between the states of the American Union by rail carriers; but as the regulation provided for by the Act to Regulate Commerce does not undertake to regulate or govern them, they cannot be held to constitute reasons in themselves why imported freight brought to a port of entry of the United States or a port of entry of an adjacent foreign country destined to a place within the United States should be carried at a lower rate than domestic traffic from such ports of entry respectively to the places of destination in the United States over the same line and in the same direction. To hold otherwise would be for the Commission to create exceptions to the operation of the statute not found in the statute; and no other power but Congress can create such exceptions in the exercise of legislative authority."

It further said: "Imported foreign merchandise has all the benefit and advantage of rates thus made in the foreign ports; it also has all the benefit and advantage of the low rates made in the ocean carriage arising from the peculiar circumstances and conditions under which that is done; but when it reaches a port of entry of the United States, or a port of entry of a foreign country adjacent to the United States, in either event upon a through bill of lading, destined to a place in the United States, then its carriage from such port of entry to its place of destination in the United States under the operation of the Act to Regulate Commerce must be under the inland tariff from such port of entry to such place of destination covering other like kind of traffic in the elements of bulk, weight, value, and of carriage, and no unjust preference must be given to it in carriage or facilities of carriage of that freight. In such case all the circumstances and conditions that have surrounded its rates and carriage from the foreign port to the port of entry have had their full weight

and operation, and in its carriage from a port of entry to the place of its destination in the United States, the mere fact that it is foreign merchandise thus brought from a foreign port is not a circumstance or condition under the operation of the Act to Regulate Commerce which entitles it to lower rates or any other preference in facilities and carriage over home merchandise or other traffic of a like kind carried by the inland carrier from the port of entry, to the place of destination in the United States from the same distance and over the same line."

Its conclusion was that foreign and home merchandise "under the operation of the statute, when handled and transferred by interstate carriers, engaged in carriage in the United States, stand exactly upon the same basis of equality as to tolls, charges and treatment for similar services rendered."

This rule, having been founded upon a construction of the statute, is a very broad one; it is applicable to all the foreign circumstances and conditions which affect rates and the question whether it must be universally applied, without regard to any circumstances which may exist in a foreign country, and whether dissimilarities which have a foreign origin are to be excluded from consideration, under the operation of the statute, is an exceedingly important one whose ultimate decision may have a wider influence upon the interstate commerce of the country that we can foresee. This legal question was not discussed in the export rate case, which was treated "as one of practical policy."

We are not disposed to pass authoritatively upon this question, except in a case which demands it and in which the effect of this construction of the statute is naturally the subject of discussion.

This petition presents a question of narrow limits, which relates only to the validity of the order so far forth as it concerns the conduct of the defendant in its joint rates for transportation of imported traffic from New Orleans to San Francisco, and is whether these rates subject domestic traffic between the same points to an undue disadvantage.

The same conditions exist between New Orleans and San Francisco, with reference to each class of goods. There was no "difference in cost, expense, or the exceptional character of the service." The only reason which induces the defendant to take the import business is competition in Great Britain between water routes, which drives it to carry an imported case of cutlery for eighty cents per hundred pounds when it requires a hundred pounds of domestic cutlery to pay \$8.70 for the same carriage. Assuming that ocean competition can create a dissimilar condition, which is to be considered in determining whether discriminations against particular classes of traffic are unjust and is a fact to be taken into account in determining whether a particular traffic is subjected to an unreasonable disadvantage (*Phipps v. London & N. W. R. Co.* [1892] 2 Q. B. 229), does this condition justify the great disparity in rates in this case?

While it is true that under sections 2 and 4 of the statute substantially dissimilar conditions may justify dissimilarity in rates, it does

not follow that any dissimilar condition, of whatever kind it may be, justified any discrepancy in rates.

Gross inequality shows either that the road which makes the inequality is unjust to itself in carrying goods without profit "or else the larger rate gives an unwarranted return for the services rendered." *Board of Trade of Chattanooga v. East Tennessee, V. & G. R. Co. ante*, 213. In this case, it may fairly be presumed that the joint rates gave each road something more than the cost of movement, leaving repairs, interest upon floating debt and all fixed charges to be paid by the rates upon some other traffic. The rates were not entirely unremunerative, and if so, the much larger rates placed upon domestic traffic not only compelled it to bear an undue burden, but gave the company an unwarranted return.

Exhibit 86 cannot be examined, in the light of the admitted facts of equality of conditions from the port of New Orleans, without the conviction that unless the defendant is injuring itself by its rates upon imported goods, it is imposing an exceedingly high rate upon domestic goods. It is true that a person who pays only a fair price for a service cannot justly complain merely because another pays too little for the same service. *Garton v. Bristol & E. R. Co.* 1 Best & S. 112. But this general truth does not meet the conditions of this case, which are of such inequality, that the larger rates must be found to be excessive. It has been justly said by the Commission that rates should not only be reasonable, but be relatively reasonable, and thus not become unjust in their results. *Boards of Trade Union v. Chicago, M. & St. P. R. Co.* 1 Inters. Com. Rep. 608, 1 I. C. C. Rep. 215. It follows that the conduct of the defendant was in violation of sections 2 and 8 of the statute in question, and was properly attempted to be corrected by the order which was disobeyed.

But it will be urged that if it is assumed that ocean competition can create a dissimilar condition, it follows that it is a condition which may rightfully be regarded in establishing rates for import and domestic traffic and that the order of the Commission which directed equality should not be enforced because some inequality might be justifiable.

The accusation against the railroad companies in the original complaint before the Commission was not that they were charging too low rates upon import traffic, but that by their relatively excessive rates upon domestic traffic, they were unjustly discriminating against the latter. The underlying question which arises upon the petition to the circuit court is the same. The defendant's answer before the Commission averred that its "domestic rates are fair and reasonable in themselves." In its answer to the petition, it omits this averment, does not justify its rates upon domestic traffic, and does not state, if a reduction should be made, what excess of rates could properly be placed upon that kind of traffic, but defends the existing difference in rates solely upon the ground that if it charged higher rates upon the import traffic, it would lose that class of business.

The final question before the circuit court was: "Is the order of the Commission, a proper 4 INTER S.

one, and should obedience to it be insisted upon?" In order to decide that question, the answer presented two questions upon the subject of rates. 1st. Can ocean competition be regarded, in any event, as creating a dissimilar condition? 2d. If it can, is the difference in the existing rates justified by that condition? A third question might have been, but was not presented, viz: In the event that the first question is answered in the affirmative, and the second is answered in the negative, does the dissimilar condition justify any, and if so, what dissimilarity in rates? To answer this question the court should have been informed in regard to the reasonableness of existing rates upon domestic traffic.

This court is of opinion that assuming that the first question can be answered in the affirmative, the second must be answered in the negative and that an unfair inequality of rates is plainly manifest.

There is nothing in the record which enables the court to determine that the assumed dissimilar condition justified any substantial dissimilarity in rates, and it ought not to permit disobedience to an order until it can suggest a better one as a substitute.

The defendant's apparent position that inasmuch as substantially dissimilar conditions create dissimilarity in rates, the amount of dissimilarity in rates is not important, cannot be sustained. That some dissimilar conditions justify dissimilarity in rates is true. That remote dissimilarities of condition justify any dissimilarities which the carrier chooses to make, is not true. To set aside the order of the Commission and permit the present excessive inequality of rates, in the absence of any attempt to show the reasonableness of the inequality, would not accord with justice.

Two objections which have been taken by the defendant to the jurisdiction of the court remain to be considered.

Section 16 provides that in case of the disobedience of a common carrier, which is subject to the provisions of the Act, to a lawful order of the Commission, the latter can apply for an injunction, by petition to the circuit court sitting in equity in the judicial district in which the carrier has its principal office or in which the disobedience of such order has taken place.

This petition was brought in the southern district of New York upon the ground that the principal office of the defendant was in the city of New York, whereas it is said to be in Texas. The charter does not declare where the principal office of the company shall be. In fact, the stockholders' meetings and directors' meetings are held in New York, where also is the office of the President, First Vice President, Secretary and Treasurer of the Company and where the stock certificate books and records of the stockholders' and directors' meetings are kept. The New York office is thus the domicile of the corporation and the principal office, while the general or administrative offices of the heads of departments are in Texas.

It is also contended that inasmuch as the rates upon import traffic were joint rates with the Southern Pacific Railroad Company and as any order of the circuit court requiring the

defendant to desist from carrying business upon such joint rates would abrogate contracts and agreements to which said company is a party, it is a necessary party to the petition.

It is true that in proceedings before the Commission to test the legality of through rates, the Commission, which has the power to make other common carriers parties, irrespective of their places of residences, has insisted upon the necessity of bringing in all the corporations which make the rates, and has said: "They must be brought in, first, because they have a right to be heard, and, second, because an order made and purporting to control their action when they were not parties would be improper on its face and in legal sense ineffectual." *Allen v. Louisville, N. A. & C. R. Co.* 1 Inters. Com. Rep. 621, 1 I. C. C. Rep. 199. In the proceeding before this Commission, the Southern Pacific Company was a party.

The present proceeding is a petition to compel obedience to an order, made upon hearing, and presumably correctly made, which is

brought before a circuit court whose jurisdiction over parties is limited and controlled by statute.

The Circuit Court for the Southern District of New York has no jurisdiction over the Southern Pacific Railway Company whose principal office is not in that district. Neither would a circuit court in any one district in which the violation was committed, in Texas, or Louisiana or California, probably be able to obtain jurisdiction over both the railroad companies which make the rates. The proceeding before the circuit court should not be rendered impossible, in the event of its inability to obtain jurisdiction over all the disobeying companies which have united in making through rates, and inasmuch as the proceeding is to enforce an order already made, after hearing all the parties in interest, the presence of all the parties who have jointly disobeyed is not necessary or indispensable.

The decree of the circuit court is affirmed with costs.

GEORGIA SUPREME COURT.

L. F. HENNINGTON, *Plff. in Err.*, v. STATE OF GEORGIA.

(.....Ga.....)

*The provision of § 4578 of the code making it a misdemeanor to run a freight train upon any railroad in this state on the Sabbath day is a regulation of internal police, and not a regulation of commerce. It is not in conflict with the Consti-

tution of the United States, even as to freight trains passing through the state from and to adjacent states, and laden exclusively with goods and freight received on board before the trains entered this state, and consigned to points beyond its limits.

*Headnote by BLECKLEY, Ch. J.

June 8, 1892.

ERROR to the Superior Court for Dade county to review a judgment convicting defendant of violating the Sunday law. *Affirmed.*

Defendant was indicted under § 4578 of the Code of Georgia. It was admitted that he was master of transportation upon the Alabama Great Southern R. Co., which runs from Chattanooga, in the state of Tennessee, through Dade county, Georgia, in which Hennington was indicted, on through Alabama, to Meridian in the state of Mississippi; that the train was loaded at Chattanooga with freight destined for Meridian and points beyond; and that it never stopped in Dade county to take on or deliver freight but was engaged in carrying interstate freight.

Further facts appear in the opinion.

Messrs. W. U. & J. P. Jacoway and R. J. & J. McCamy, for plaintiff in error.
Mr. A. W. Fite, Sol. Gen., for the state.

Bleckley, Ch. J., delivered the opinion of the court:

If the sanction of time can ever be invoked to justify the exercise of governmental authority over a particular subject-matter, this can certainly be done in respect to setting aside one day in each week for rest and the cessation of all unnecessary labor. A law to this effect prevailed in the earliest times of which we have any authentic record, and the subject was

one of statutory regulation in Georgia during her colonial period, and has so continued throughout the whole term of her existence as a state. At no instance since her independence was declared has she been without such a law on her statute book. It is not only unlawful, but penal, for any person whatsoever to "pursue their business or work of their ordinary calling upon the Lord's day, works of necessity or charity only excepted." Code,

§ 4579. This prohibition upon Sunday labor was already in force when the code was adopted, and dates back to the year 1762. The penalty prescribed by the colonial statute has been changed, but in other respects that statute has been operative continuously since it was enacted. There can be no well-founded doubt of its being a police regulation, considering it merely as ordaining the cessation of ordinary labor and business during one day in every week; for the frequent and total suspension of the tolls, cares, and strain of mind or muscle, incident to pursuing an occupation or common employment, is beneficial to every individual, and incidentally to the community at large,—the general public. Leisure is no less essential than labor to the well-being of man. Short intervals of leisure at stated periods reduce wear and tear, promote health, favor cleanliness, encourage social intercourse, afford opportunity for introspection and retrospection, and tend in a high degree to expand the thoughts and sympathies of people, enlarge their information, and elevate their morals. They learn how to be, and come to realize that being is quite as important as doing. Without frequent leisure, the process of forming character could only be begun. It could never advance or be completed. People would be mere machines of labor or business,—nothing more. If a law which, in essential respects, betters for all the people the conditions, sanitary, social, and individual, under which their daily life is carried on, and which contributes to insure for each, even against his own will, his minimum allowance of leisure, cannot be rightly classed as a police regulation, it would be difficult to imagine any law that could. With respect to the selection of the particular day in each week which has been set apart by our statute as the rest day of the people, religious views and feelings may have had a controlling influence. We doubt not they did have, and it is probable that the same views and feelings had a very powerful influence in dictating the policy of setting apart any day whatever as a day of enforced rest. But neither of these considerations is destructive of the police nature and character of the statute. If good and sufficient police reasons underlie it, and substantial police purposes are involved in its provisions, these reasons and purposes constitute its civil and legal justification, whether they were or not the direct and immediate motives which induced its passage, and have for so long a time kept it in force. Courts are not concerned with the mere beliefs and sentiments of legislators, or with the motives which influence them in enacting laws which are within legislative competency. That which is properly made a civil duty by statute is none the less so because it is also a real or supposed religious obligation; nor is the statute vitiated, or in any wise weakened, by the chance, or even the certainty, that in passing it the legislative mind was swayed by the religious, rather than by the civil, aspect of the measure. Doubtless, it is a religious duty to pay debts, but no one supposes that this is any obstacle to its being enacted as a civil duty. With few exceptions, the same may be said of the whole catalogue of duties specified in the ten commandments. Those of them which

4 INTER. 8.

are purely and exclusively religious in their nature cannot be or be made civil duties, but all the rest of them may be, in so far as they involve conduct as distinguished from mere operations of mind or states of the affections. Opinions may differ, and they really do differ, as to whether abstaining from labor on Sunday is a religious duty; but, whether it is or not, it is certain that the legislature of Georgia has prescribed it as a civil duty. The statute can fairly and rationally be treated as a legitimate police regulation, and, thus treated, it is a valid law. There is a wide difference between keeping a day holy as a religious observance and merely forbearing to labor on that day in one's ordinary vocation or business pursuit. Nor is the statute a regulation of commerce. It applies alike to all business, vocations, and occupations. It concerns the general police of the state and all interests, whether agricultural, mechanical, manufacturing, commercial, professional, or what not. It is universal, and rigidly impartial, making no discrimination whatever for or against commerce or anything else. It puts no obstacle in the way of trade or its operations which is not encountered by every other class of worldly business or employment. Nontrading days are nonbusiness days, generally, and nonworking days for all the people. Trade may go on when anything else can. It stops only when, and so long as, there is a complete suspension of worldly enterprise and activity. It is required to take no rest which is not appointed for everything else to take.

Having now classified the colonial act of 1762, as brought down to us in section 4579 of the code, it is easy to see that the later legislation, embraced in section 4578 of the code, belongs to identically the same class, and seeks only to enforce and render effective, as respects the running of freight trains on Sunday, the scheme of internal police which the former established as universal throughout the state for all industries and vocations. On the assumption that the running of such trains on Sunday, under ordinary circumstances, is not a work of necessity, the running of them on that day was already prohibited by virtue of the prior statute when the later one was passed. The new legislation silently assumes that the running of these trains on Sunday is not a work of necessity; and, in express terms, it renders the superintendent, or other officer having control of the running of trains, answerable penally for any running which may be done on that day. As the person having the right and power to prevent it, he is held responsible for its occurrence whenever it does occur, save when it is done by others in violation of his own orders and rules. The language of the statute, so far as now material, is as follows: "If any freight train shall be run on any railroad in this state on the Sabbath day (known as Sunday) the superintendent of transportation of such railroad company, or the officer having charge of the business of that department of the railroad, shall be liable for indictment for a misdemeanor in each county through which such train shall pass. . . . The defendant may justify himself by proof that such employes acted in direct violation of the

orders and rules of the defendant." Code, § 4578. The section of the code just cited embraces qualifying provisions added by Acts 1873, p. 63, and Acts 1874, p. 97. A still further qualification may be found in Acts 1882, 1883, p. 66. None of these qualifications are directly pertinent to the present inquiry. We hold confidently, and without doubt, that section 4578 is no more a regulation of commerce than is section 4579; that both are to be taken and construed together; and that the former is part and parcel of the police system generalized in the latter, but first drawn out in one of its details by the former, and applied to the specific work or business mentioned, in so far, and in so far only, as superintendents or train managers are concerned. In so far as employes engaged immediately in running freight trains on Sunday are concerned, section 4578 has no direct application. They are still left to be dealt with under the other section. It is almost superfluous to add that we deem it of no consequence that in the case now under consideration the freight train run on Sunday was merely passing through and over some of the territory of this state on its journey from the state of Tennessee into the state of Alabama, and was laden exclusively with goods and freight received on board before it entered this state, and consigned to points in Alabama or beyond. It is no valid objection to a police regulation that it may incidentally affect interstate commerce or persons engaged therein. Almost any broad and comprehensive police regulation may have such a consequence in a greater or less degree. Nothing can be legitimate police which would prohibit, unduly restrict, or unreasonably delay inter-

state commerce; but to call a weekly halt to all business of every kind throughout the length and breadth of the state is to treat interstate commerce as everything else is treated, and surely what is exacted by law to be done, and has been generally done in Georgia for more than one hundred years, is not, in itself, unreasonable. The right of every state to enact a similar law, and the possible chance that one state may select one day of the week for rest, another state another day, and so on, until a wide reach of interstate commerce would find itself unable to move at all, cannot fairly be urged in condemnation of the police system prevailing at present in Georgia. Every system is reasonable or not, according to conditions. When conditions change, it is time enough to change the system; and it may well be assumed that any necessary change will be made in due time. So far as appears, and so far as we are aware, no day of the week except Sunday is anywhere in the United States a day of enforced rest. We are not now practically concerned with what is possible if other days should, in some of the states, be preferred to Sunday. Whether, in that event, Georgia must change, or they must, or no day whatever be protected, need not be anticipated. It is enough that, under present conditions, interstate commerce is subjected to no unreasonable delay by the Sunday law now in force. We have examined the case of *State v. Baltimore & O. R. Co.* 24 W. Va. 788, and that of *Norfolk & W. R. Co. v. Com.* 18 L. R. A. 107, 88 Va. 95. We agree with the former, and disagree with the majority opinion in the latter. *Judgment affirmed.*

ARKANSAS SUPREME COURT.

ARKANSAS & LOUISIANA R. CO. v. SMITH.

1. The shipper can base no right of recovery upon the violation of a contract between connecting railways, as to the apportionment of an agreed rate of freight. If the carrier lays an additional charge on the shipper without sharing it with its connecting line, it would be no injury to him unless the same was unreasonable.
2. Misrepresentation by a carrier as to the rate charged, but without injury, affords no ground of redress in a suit for damages.

Decided May 17, 1890.

A PPEAL from Clark Circuit Court.

The complaint alleges that defendant is a common carrier operating a railroad from Hope in Hempstead county to Nashville in Howard county; that, during the season of 1886-'87, plaintiff shipped from Nashville to St. Louis, Mo., 988 bales of cotton over defendant's road and the connecting line, the St. Louis, Iron Mountain & Southern Railway Company; that appellant falsely represented the freight rate from Nashville to St. Louis, as established by it and the connecting line to be \$3.75 per bale, where in fact it was only \$3.50 and thereby unlawfully collected and extorted from plaintiff twenty-five cents per bale as freight on the cotton.

4 INTER 8.

The answer admitted the charge but denied the misrepresentation. The court charged the jury as follows: "If the jury believe from the evidence that the defendant company through its officers and agents, demanded and collected an excessive rate of freight on the cotton shipped by plaintiff over defendant's road and connecting lines, by falsely and fraudulently representing to plaintiff that the joint rate established by the defendant road and connecting lines from Nashville to St. Louis was \$3.75 per bale, when in truth and in fact the rate so established was only \$3.50 per bale, and that said representations were false and fraudulent,

and known to the defendant to be false and fraudulent, and that, by means of said false and fraudulent representations, plaintiff was induced to contract for the payment of, and did pay to the defendant company, an excessive rate of freight on the cotton so shipped. they may find for the plaintiff the difference between the rate established by the joint act of all the roads, and the rate collected, provided they further find that the rate collected was an excessive rate."

Verdict and judgment for plaintiff. Reversed.

Messrs. A. B. & R. B. Williams, Dan W. Jones and T. B. Martin, for appellant. Messrs. Feazel & Rodgers, for appellee.

Cockrill, Ch. J., delivered the opinion of the court:

Smith, the shipper, was not a party to the contract between the railways, in which they adjusted the through rate for the carriage of cotton: and he did not ship his cotton upon the expectation that it would be carried at the rate which the carriers had agreed should be apportioned between them for the service rendered. He can base no right of recovery, therefore, upon a violation of the contract. It was no concern of his how the carriers apportioned between themselves the amount charged for through freight. *Owen v. St. Louis & S. F. R. Co.* 83 Mo. 454. If one received a greater portion of the charge agreed upon for the carriage than its share, or laid an additional charge upon the shipper without sharing the profit with the connecting line, it would be no injury to the shipper,

unless the charge demanded of him was unreasonable for the service rendered by one or both contracting lines. In that event the suit would be for extortion in demanding unreasonable charges.

But the cause was not tried upon the theory of an unreasonable charge. The gist of the action, argues the appellee, was that the appellant extorted from him 25 cents a bale on all cotton shipped by him, by falsely representing that the rate agreed upon by it and its connecting line of railway was \$3.75 per bale on cotton to St. Louis, when in fact the joint rate was only \$3.50 per bale. But there is no proof tending to show injury by reason of the false representation. Misrepresentation without injury affords no ground of redress in a suit for damages. If the appellant by false representations had led the appellee to believe that the rate had been advanced over the line of the connecting railway, and thereby induced him to ship by its line and pay it more for transportation than the service would have cost him by some other route or means of transportation, he should recover the excess paid to the appellant, whether the charge was great enough to amount technically to extortion or not, because it would have been procured from him by fraud.

The cause was tried, however, upon the theory that the false representation and payment of the higher rate on the strength of it constituted extortion without further proof. That was error.

Reverse the judgment and remand the cause for a new trial.

MISSISSIPPI SUPREME COURT.

POSTAL TELEGRAPH CABLE CO., *Appt.*,

v.

WIRT ADAMS.

A privilege tax on telegraph companies, graduated according to the value of the property of the company measured by its mileage, and imposed

in lieu of all other taxes, although incidentally affecting interstate commerce, is not unconstitutional, as an interference with such commerce.

Decided December 4, 1898

A PPEAL by defendant from a judgment of the circuit court for Hinds county in favor of plaintiff in an action brought to compel the payment by defendant of a privilege tax. *Affirmed.*

The facts are stated in the opinion.

Messrs. Mordecai & Gadsden and Brame & Alexander for appellant. Messrs. Williamson & Potter for appellee.

Woods, J., delivered the opinion of the court:

This action was instituted by the revenue agent of the state for the recovery of a privilege tax alleged to be due by the appellant

for the years 1888 and 1889, under section 585, Code 1880, and the amendment thereto contained in section 1, chap. 3, Acts 1888. Under the statute thus amended, among other provisions, we find this language: "A tax

4 INTER S.

on privileges is levied as follows, to wit: on each telegraph company operating 1000 miles or more which shall be in lieu of other state, county or municipal taxes, \$3000;

on each telegraph company operating less than 1000 miles of wire, for each mile of wire, \$1." The declaration alleges that the appellant operated, in the aggregate, during the years named, 391.28 miles of wire in the state of Mississippi, and was, therefore, under the statute, liable for a tax of \$391.28 for each year named. It will be thus seen at once that this is a tax imposed upon a telegraph company, in lieu of all others, as a privilege tax, and its amount is graduated according to the amount and value of the property measured by miles. It is to be noticed that it is in lieu of all other taxes, state, county, municipal. The reasonableness of the imposition appears in the record as shown by the second count of the declaration and its exhibits, whereby the appellant seems to be burdened in this way with a tax much less than that which would be produced if its property had been subjected to a single ad valorem tax. The pleas bring in question the validity of our statute, and aver its conflict with the interstate commerce clause of the Constitution of the United States. The record presents a Federal question, and we acknowledge ourselves bound to follow the decisions of the court of last resort of the United States, if that court shall be found to have adjudicated it. Our difficulty arises from our inability to say with confidence what the Supreme Court of the United States has finally determined in cases of like character. The reported opinions of that court are so irreconcilable in their variances and seeming conflicts, in our view, that it is with diffidence that the impartial student can affirm what will or will not follow in any given state of case. If the line of decision adopted in *Pensacola Telegr. Co. v. Western U. Telegr. Co.* 96 U. S. 1, 24 L. ed. 708; *Western U. Telegr. Co. v. Texas*, 105 U. S. 460, 26 L. ed. 1067; *Gloucester Ferry Co. v. Pennsylvania*, 114 U. S. 196, 29 L. ed. 158; *Pickard v. Pullman Southern Car Co.* 117 U. S. 84, 29 L. ed. 785; *Robbins v. Shelby County Taxing Dist.* 1 Inters. Com. Rep. 45, 120 U. S. 489, 30 L. ed. 694; *Leloup v. Mobile*, 127 U. S. 640, 32 L. ed. 311; and *Crutcher v. Kentucky*, 141 U. S. 47, 35 L. ed. 649—stood alone, the settlement of the controversy in the case at bar would be made without great difficulty, in accordance with the contention of the appellant. But the numerous other cases decided by the same great tribunal, in which was involved the same or like questions as are to be found in those just named, and in which contrary views seem to have been upheld, involves the controversy in much apparent, and, as we think, some real, difficulty. If we had for our guidance only the other lines of decisions, embracing *Philadelphia & R. R. Co. v. Pennsylvania* ("State Tax on Railway Gross Receipts") 82 U. S. 15 Wall. 284, 21 L. ed. 164; *Osborne v. Mobile*, 83 U. S. 16 Wall. 479, 21 L. ed. 470; *Wiggins Ferry Co. v. East St. Louis*, 107 U. S. 365, 27 L. ed. 419; *Western U. Telegr. Co. v. Atty. Gen.* 125 U. S. 530, 31 L. ed. 790; *Maine v. Grand Trunk R. Co.* 3

Inters. Com. Rep. 807, 142 U. S. 217, 35 L. ed. 994; *Ficklen v. Shelby County Taxing Dist.* 4 Inters. Com. Rep. 79, 145 U. S. 1, 36 L. ed. 601; *St. Louis v. Western U. Telegr. Co.* 148 U. S. 92, 37 L. ed. 380—the right of the revenue agent of the state to maintain this suit successfully would seem to be well established in accordance with the views of counsel for appellee. If from generalization we descend to detail, the confusion that prevails in the decisions of the court whose lead we are bound to follow touching interstate commerce will be seen at once, and their confusion will deepen on protracted examination.

In the case of *Western U. Telegr. Co. v. Texas*, 105 U. S. 460, 26 L. ed. 1067, Mr. Chief Justice Waite, speaking for a unanimous court, said: "The Western Union Telegraph Company, having accepted the restrictions and obligations of this provision by Congress, occupies in Texas the position of an instrument of foreign and interstate commerce and of a government agent for the transmission of messages on public business. Its property in the state is subject to taxation, the same as other property, and it may undoubtedly be taxed in a proper way on account of its occupation and business." This very language of the then chief justice is quoted with approbation in *Western U. Telegr. Co. v. Atty. Gen.* 125 U. S. 530, 31 L. ed. 790, by Mr. Justice Miller, speaking for an undivided court. It is unqualifiedly declared in these two cases that the telegraph company—the agent of the government, and engaged in interstate commerce, as held repeatedly in the court whose decisions we are reviewing—"may undoubtedly be taxed in a proper way on account of its occupation and its business." But in *Leloup v. Mobile* (as well as in other cases) 127 U. S. 640, 32 L. ed. 311, Mr. Justice Bradley, speaking for the same united court, says: "Ordinarily, occupations are taxed in various ways, and, in most cases, legitimately taxed. But we fail to see how a state can tax a business occupation when it cannot tax the business itself."

In *Western U. Telegr. Co. v. Texas*, 105 U. S. 460, 26 L. ed. 1067, we decided that a state cannot lay a tax on the interstate business of a telegraph company, as it is interstate commerce. . . . In the present case, it is true, the tax is not laid on the occupation, or the business of sending such messages. It comes plainly within the principle of the decisions lately made by this court in *Robbins v. Shelby County Taxing Dist.* 1 Inters. Com. Rep. 45, 120 U. S. 489, 30 L. ed. 694, and *Philadelphia & S. M. S. S. Co. v. Pennsylvania*, 122 U. S. 326, 30 L. ed. 1200." And this rule seems to be adopted in one or two later cases. The conflict in the decisions on this point appears to be sharp and irreconcilable.

The case of *Osborne v. Mobile*, 83 U. S. 16 Wall. 479, 21 L. ed. 470, occupies a most unique position. In this case the court held that a privilege tax levied upon an express company having business intraterritorial as well as extraterritorial was not invalid or repugnant to the interstate commerce clause of the Federal Constitution. In *Pickard v. Pullman Southern Car Co.* 117 U. S. 84, 29

L. ed. 785, the case of *Osborne v. Mobile*, was re-examined, and the correctness of its determination reaffirmed; and in *Robbins v. Shelby County Taxing Dist.*, *supra*, Mr. Chief Justice Waite and Mr. Justice Field and Mr. Justice Gray in their dissenting opinion refer to it as unchallenged authority. It has been quoted by Mr. Justice Bradley, in a dissenting opinion, as authority. But the judge last named, in delivering the opinion of the court in another case,—the case of *Leloup v. Mobile*,—indulges the remark that the *Osborne* case would now be decided otherwise.

Again, in the case of *Gloucester Ferry Co. v. Pennsylvania*, 114 U. S. 196, 29 L. ed. 158, it was held that the transportation of passengers and freight for hire by a steam ferry across the Delaware river from New Jersey to Philadelphia by a New Jersey corporation is interstate commerce, and not subject to taxation by the state of Pennsylvania; while in *Wiggins Ferry Co. v. East St. Louis*, 107 U. S. 365, 27 L. ed. 419, the court holds that state has the power to impose a license fee upon ferry keepers living in the state for boats which they own and use in conveying from a landing in the state passengers and goods across a navigable river to a landing in another state. Once more, *Pickard v. Pullman Southern Car Co.* 117 U. S. 84, 29 L. ed. 785; *Leloup v. Mobile*, 127 U. S. 640, 32 L. ed. 811; and *Norfolk & W. R. Co. v. Pennsylvania*, 136 U. S. 114, 34 L. ed. 394, in no doubtful terms deny to the states the right to impose a license tax on any agency employed even partially in interstate commerce; but, on the other hand, *Western U. Teleg. Co. v. Atty. Gen.* 125 U. S. 530, 31 L. ed. 790, and *Maine v. Grand Trunk R. Co.* 3 Inters. Com. Rep. 807, 142 U. S. 217, 35 L. ed. 994, unmistakably uphold a tax imposed upon a railway company engaged partially in interstate commerce, for the privilege of exercising its franchises. It is true the amount of these privilege taxes is arrived at by the ascertainment of the earnings of the railway company within the state, and by the ascertainment of the valuation of the property within the state, in the telegraph company case; but they are by the terms of the statutes of the two states imposing them, in the one case "an annual excise tax for the privilege of exercising its franchises in this state, which, with the tax provided for in section 1, shall be in lieu of all taxes upon such railroad, its property and stock," and, in the other, "a tax upon its corporate franchises at a valuation thereof equal to the aggregate value of the shares in its capital stock." In the case of *Western U. Teleg. Co. v. Atty. Gen.* 125 U. S. 530, 31 L. ed. 790, it is to be observed that the tax was not upon the franchises of a domestic corporation, but upon those of a foreign one,—the Western Union Telegraph Company, a New York corporation,—and one employed in interstate commerce, and employed as a governmental agency also. It is no answer to the contention that they were privilege taxes—taxes upon the exercise of franchises—to assert that they were really taxes levied upon the property of the corporation. They are distinctly declared to be taxes on corporate franchises,

4 INTER S.

taxes for the privilege of exercising corporate franchises, and the mere fact that the state adopted one method or another of fixing the amount of the tax is of no real value in the discussion. The question involved is not that of amount or method of ascertaining amount, but the validity of the tax itself, in any amount, ascertained in any way.

Are we mistaken in declaring that the decisions of the Supreme Court of the United States are not concordant on this most perplexing subject? We support ourselves in our perplexity by quoting the language of Mr. Justice Miller in *Fargo v. Stevens*, 121 U. S. 230, 30 L. ed. 888. Speaking on this very subject, the learned judge said: "With reference to the utterances of this court, until within a very short time past, as to what constitutes commerce among the several states, and as to what enactments by the state legislature are in violation of the constitutional provision on that subject, it may be admitted that the court has not always employed the same language, and that all of the judges of the court who have written opinions for it may not have meant precisely the same thing." It appears to us that it is just and altogether decorous now to say that repeated and careful study of the decisions between 121 and 148 U. S. will warrant us in again asserting that the language employed by the court in the more recent cases of this character has not been the same, and that the judges who have written the later opinions have not meant precisely the same thing. Unable, then, to say certainly what the judgment of the Supreme Court of the United States would be in the case in hand if presented to it, we feel at liberty to decide the controversy according to our own views of what is right on the facts disclosed,—views not unannounced in that tribunal whose final word is law. This is the case of a foreign corporation admitted to the use and enjoyment of its corporate franchises in our state upon terms of perfect equality with all others. It is freely permitted to engage in the vast and various employments connected with its business. It has the use and enjoyment of the country highways of the state and the streets of our villages, towns, and cities, for the planting of its poles and the construction of its lines; and it has the care and protection of our laws and government. In return the state claims the right to treat it as she treats similar corporations chartered by her own authority. She asserts her authority to tax the exercise of its franchises in her midst as she does all others, domestic as well as foreign corporations. The state may tax its property as she does all other property of person or corporation within her limits. She may tax the exercise of its franchises within her borders and under the sheltering protection of her laws and government, and no foreign corporation may arrogantly assume any superiority over her domestic corporations. The privilege tax, the tax on the business, the occupation, the tax on the exercise of franchises, may be incidentally burdensome to interstate commerce. It does affect the business somewhat and inevitably. But so does an ad valorem tax on the prop-

erty employed in such commerce. It subtracts that much from the sum total engaged in the traffic. So does the tax on gross receipts, as in the case of *Philadelphia & R. R. Co. v. Pennsylvania* ("State Tax on Railway Gross Receipts") 82 U. S. 15 Wall. 284, 21 L. ed. 164. So does the tax for the privilege of exercising its franchises by a railroad company in any state, ascertainable and determinable by the amount of its gross transportation receipts, scaled as required in *Maine v. Grand Trunk R. Co.* 3 Inters. Com. Rep. 807, 142 U. S. 217, 35 L. ed. 994. Every tax is a burden, and to the extent imposed is an interference with the pursuit of business upon which it is laid. If the business is partly interstate commerce, then that commerce is incidentally affected and interfered with by every tax of any nature whatever that may be levied on it. In the case at bar there is no direct burden upon interstate commerce. There is no further interference with it than will be found necessarily to result from the imposition of any burden of taxation in any shape. For the use and occupation of the public roads of this state, for protection of its laws and government in the exercise of its franchises, and as its reasonable and proper contribution for the support of the government whose care and shelter it enjoys, the state has imposed a privilege tax ascertainable and determinable by the number of miles of wire in this state, in lieu of all other taxes, and in an amount less than an ad valorem tax on its visible property would yield. The appellant is reasonably required to pay what is called a "privilege tax," but it is a tax in lieu of all ad valorem and other taxes, state, county, and municipal, on property in this state. The state has chosen to impose a smaller burden than she might have done, unquestionably, if the property of the appellant had been subjected to the same rate of taxation as all other property whose situs is within her borders. By the imposition of a certain tax per mile on the lines wholly within her limits the state secures from appellant that which appears certainly not to be a sum in excess of the amount which might have been imposed as an ad valorem tax. It seems to us that this position is supported by the opinions delivered and the results reached in *Osborne v. Mobile*, *Western U. Teleg. Co. v. Atty. Gen.*, *Maine v. Grand Trunk R. Co.*, *Ficklen v. Shelby County Taxing Dist.*, and *St. Louis v. Western U. Teleg. Co. supra*; not to mention others that collaterally yet powerfully tend in the same direction.

In the case at bar there is no taxation of messages, interstate and other. There is no exclusion or attempted exclusion by state law of a governmental agency, or a foreign corporation partially engaged in interstate commerce. There is no taxation which interferes

with, interrupts, or burdens interstate commerce. There is a moderate, reasonable tax, called a "privilege tax," but ascertainable and determinable by the amount, and necessarily by the value, of the appellant's property, lying wholly in this state imposed in lieu of all others; and this tax burdens and interferes with interstate commerce just as a tax on each telegraph pole does, as in the case of *St. Louis v. Western U. Teleg. Co.* 148 U. S. 92, 37 L. ed. 380, or as a tax on corporate franchises whose value is ascertainable and determinable by value of the shares of capital stock proportioned to the length of the telegraph lines in the state, as in *Western U. Teleg. Co. v. Atty. Gen.* 125 U. S. 530, 31 L. ed. 790, or as an annual tax for the privilege of exercising corporate franchises whose amount is to be determined by the gross transportation receipts, measured by the intrastate mileage compared with the total length of the railway within and without the state, as in *Maine v. Grand Trunk R. Co.* 3 Inters. Com. Rep. 807, 142 U. S. 217, 35 L. ed. 994. We adopt the language of *Mr. Justice Miller* in delivering the opinion of the court in *Western U. Teleg. Co. v. Atty. Gen.*: "While the state could not interfere by any specific statute to prevent a corporation from placing its lines along their post roads, or stop the use of them after they were placed there, nevertheless the company receiving the benefit of the laws of the state for the protection of its property and its rights is liable to be taxed upon its real and personal property as any other person would be. It never could have been intended by the Congress of the United States in conferring upon a corporation of one state the authority to enter the territory of another state, and erect its poles and lines therein, to establish the proposition that such a company owed no obedience to the laws of the state into which it thus entered, and was under no obligation to pay its fair proportion of the taxes necessary to its support." And to this enlightened and just observation we unite the equally enlightened and just observation of *Mr. Chief Justice Waite* in *Western U. Teleg. Co. v. Texas*, 105 U. S. 460, 26 L. ed. 1067, quoted with approbation in the long subsequent case of *Western U. Teleg. Co. v. Atty. Gen. supra*. "The Western Union Telegraph Company having accepted the restrictions and obligations of this provision by Congress, occupies in Texas the position of an instrument of foreign and interstate commerce, and of a government agent for the transmission of messages on public business. Its property in the state is subject to taxation the same as other property, and it may undoubtedly be taxed in a proper way on account of its occupation and business."

Affirmed.

UNITED STATES CIRCUIT COURT, NORTHERN DISTRICT OF ALABAMA.

SAMUELS *et al.* v. LOUISVILLE & N. R. CO.

(See S. C. 31 Fed. Rep. 57.)

1. A common carrier has not the right to make a discrimination where the conditions are equal, between two steamboats in delivering freight to them, on the ground that the greater charge is not unreasonable.
2. The burden is on a carrier to justify the fact of discrimination when that is admitted and the service is stated to have been substantially the same, and rendered under substantially the same circumstances and conditions.
3. A charter provision of a railroad granting the power to take "tolls from all persons, property, merchandise, and other commodities transported on their road, provided only the net profits of the road shall never exceed 25 per cent per annum," does not give the company the right to discriminate between connecting steamboats in the matter of freights.

*Decided April Term, 1887.***D**EMURRER to complaint charging discrimination by a railroad between steamboat lines.*Mr. L. W. Day*, for plaintiffs.*Messrs. R. A. McClellan and C. C. Harris*, for defendant.**Bruce, J.**, delivered the opinion of the court:

The plaintiffs allege they were engaged as common carriers for hire by means of steamboats on the Tennessee river, between Decatur and intermediate points, to Bridgeport, in the year 1886; that at the same time, and between the same points on the Tennessee river, the steamboats Chattanooga and Wilder were also running on the river between the same points, as carriers, in competition with the plaintiffs; that the defendant, the Louisville & Nashville Railroad Company, a common carrier by rail, operating its roads south from Louisville, Kentucky, to points on the Tennessee river, discriminated against plaintiffs in the matter of freights delivered to them by plaintiffs for transportation to points of destination, and in favor of the steamboats Chattanooga and Wilder that the discrimination consisted in this: that, for substantially the same service in the carriage of the same class of freight under like circumstances and conditions, and to the same points of destination, the defendant railroad company charged and received from plaintiffs 50 cents more per hundred than it charged and received from the steamboats Chattanooga and Wilder. Plaintiffs say that, by reason of such discrimination and charges for freight against them, they were injured in their business as common carriers on the river, and were put to expense, trouble, and increased risk in carrying their freight long distances on the river, to obtain carriage for it to points of destination, for which alleged injury to them they bring this complaint and suit for damages. The demurrer admits the discrimination in the rates, as stated; and the question at once suggests itself whether a common carrier, under the circumstances stated, has the right to have and maintain two prices, or different prices to different parties, for substantially the same service rendered under like conditions.

The question here is not whether a common carrier must necessarily have one and the

same prices for all, or whether a discrimination in a single case can be made the ground of an action; but here were two lines of steamboats on the Tennessee river, plying between the same points carrying freight for hire, and bearing the same relation to the defendant railroad company, both seeking its service to carry their freight to the same points of destination; and the question is, has the defendant the right to discriminate against one, and in favor of the other, not in a single or isolated case, when different circumstances and conditions might be at once suggested, but systematically, in a course of dealing with the plaintiffs in the transportation of their freight?

The idea that lies at the very base of the law of common carriers is that they are public servants, and serve all alike. The general proposition needs no citation of authority, and, as applied to railroad companies, the doctrine is thus stated by McCrary, *J.*, in the case of *Southern Exp. Co. v. Memphis etc. R. Co.*, 13 Cent. L. J. 68, 8 Fed. Rep. 802.

"(1) A railroad company is a quasi public corporation, and bound by the law regulating the powers and duties of common carriers of persons and property; (2) it is the duty of such a company as a public servant, to receive and carry goods for all persons alike, without injurious discrimination as to rates or terms."

Other cases might be cited to the same purport. In *Hays v. Pennsylvania Co.*, 12 Fed. Rep. 311, Baxter, *J.*, says:

"The defendant is a common carrier by rail. Its road, although owned by a corporation, was nevertheless constructed for public uses, and is, in a qualified sense, a public highway. Hence every body constituting a part of the public, for whose benefit it was authorized, is entitled to an equal and impartial participation in the use of the facilities which it is capable of affording. Its ownership by the corporation is in trust, as well for the public as for the shareholders,

but its first and primary obligation is to the public."

In the light of these authorities, where can this defendant railroad company and public servant base its right to make the discrimination claimed by this demurrer? If a discrimination of 50 cents per hundred can be thus made and sustained, under such circumstances, then any discrimination, however great and oppressive, can be made; and practically the defendant can say who may and who may not serve the public, as common carriers on the Tennessee river one of the great water ways of commerce in the United States.

It is true there is a line of decisions to the effect that railroad companies may make different rates to different persons; and the cases show upon what grounds discrimination in rates may be and are sustained, and upon what grounds they have been held to be vicious, and are condemned by the courts. But it is not necessary here to go into any examination of the cases on this line of decision until advised by plea or otherwise upon what ground, and under what circumstances and conditions, the defendant made the discrimination here complained of. He admits the fact of discrimination; and when the service is stated to have been substantially the same, and rendered under substantially the same circumstances and conditions, the burden is on him to justify it.

The demurrer, however, goes to the point that the mere fact that the defendant charged a higher price to the plaintiffs than to the line of rival steamboats is no ground of complaint, unless it is alleged that the price charged the plaintiffs was unreasonable. In other words, the proposition seems to be that the defendant had the right to make the discrimination up to the point that the charge became unreasonable, and that charging a less price to the rival line of boats is no ground of complaint, unless the larger price is an unreasonable one. It is said that to charge one too little for a service is not to charge another too much for the same service; that the smaller charge does not make the greater charge more than the service is really worth, for that the service may have been worth every penny asked and received for it. Concede that, then it follows that the defendant company was serving the steamboats Wilder and Chattanooga for a less hire and compensation than the service was really worth; and the practical result to these plaintiffs, as carriers on the river, is the same, whether the defendant charged them 50 cents per hundred too much, or charged their rivals 50 cents per hundred too little. In either case, the defendant railroad company makes the discrimination, and the plaintiffs lose and are deprived by the defendant of their equal right and opportunity for business as common carriers on the river. And the question recurs, what right, or upon what ground, can this public servant, owing an equal duty to the entire public, say to one, "I will serve you for less than I will serve your neighbor?" The proposition insisted upon is that a common carrier is bound to carry for a reasonable remuneration, but is not bound to carry for

the same price for all; and the case of *Johnson v. Pensacola & P. R. Co.*, 16 Fla. 623, 26 Am. Rep. 781, is cited, where the supreme court of that state says: "The rule is not that all shall be charged equally but reasonably, because the law is for the reasonable charge and not the equal charge;" and other authorities are cited on the same line.

It would add nothing to the complaint, in its statement of fact, if the word "reasonable" had been used. The word "unlawful" is used; but the use of qualifying words such as these is unimportant. The ultimate test of what is a reasonable or unreasonable charge, a lawful or unlawful charge, in a given case, is a mixed question of law and fact, to be reached by the verdict of a jury, under proper instructions by the court, or perhaps, by the action of what is called sometimes a railroad commission, under statutes, state or national, on that subject.

This is not a case for the recovery of extortionate and unreasonable charges, exacted by the defendant railroad company, where the question as to what is a fair and just charge for a given service might properly arise, and be determined by some accepted rate of charges, or some usage or custom which has acquired the force of law. Nor is it the question as to what is the intrinsic value of the service, in the ascertainment of which there are many elements to be considered, such as the amount of the capital employed, and the difficulty and the expense attendant upon the service rendered, including compensation for services of officers having the administrative capacity required for such service. But, so to speak, on this side of that ultimate question is the question of the legal right of the defendant to make the discrimination here complained of.

When it is said that to charge one too little is not to charge another too much for a given service, we are ready to give assent. Because individuals may serve for hire, or may, without compensation, donate their services, it does not follow that common carriers by rail may do the same thing. The company owns the property, and the capital employed in the construction and operation of its road, but it must not be forgotten that in such operation of its railroad it is also in the enjoyment of a public franchise; and in the control of the property it has not the same measure of power that persons have and exercise over property that is affected by no public use, and operated without the exercise of any public franchise. *Munn v. Illinois*, 94 U. S. 113, 24 L. ed. 77.

There may be, and there is, difficulty in the determination, in given cases, of the line of public and private right, as to this species of property, as is illustrated in the enactment and administration of the recent Act of Congress known as the "Interstate Commerce Law." But the question in this case is to be determined upon the principles of the common law, and in the light of those principles as applied to railroad companies. In a case like the one at bar, can there be a reasonable charge which is not at the same time substantially an equal charge? And is not a charge unreasonable when it is unequal,

and in breach of the obligation and duty of the common carrier to the public?

There is a suggestion in the argument that this is a claim for damages founded upon the refusal of the defendant railroad company to prorate with the plaintiffs, upon through freight, upon the same terms that it did with the rival line of boats; and the case of *Atchison, T. & S. F. R. Co. v. Denver & N. O. R. Co.*, 110 U. S. 667, 28 L. ed. 991, is cited upon this point, and in support of the general proposition insisted upon by the defendant in his demurrer to this complaint. That is not the case made by the complaint, and the Supreme Court of the United States, in the opinion in that case, in so far as it touches the issues involved in this case, is against the views of the demurrant, as is seen from page 684 of the opinion, where the court says:

"The bill does not seek to reduce the local rates, but only to get this company put into the same position as the Denver & Rio Grande, on a division of through rates. This cannot be done until it is shown that the relative situations of the two companies with the Atchison, Topeka & Santa Fé, both as to the kind of service and as to the conditions under which it is to be performed, are substantially the same, so that what is reasonable for one must be reasonable for the other."

Applying this to the case at bar, the implication is certainly very strong that the relative situation of the two rival lines of boats on the river being the same as to the defendant company, both as to the kind of service and the conditions under which it is to be performed, no charge is reasonable for one party that is not also reasonable for the other; and the idea of different prices to dif-

ferent parties, for substantially the same service, performed under like conditions, finds no favor in the authority cited.

Another proposition of the defendant is that there is a charter provision, to the benefit of which the defendant is entitled, by which the legislature granted the power to take "tolls from all persons, property, merchandise, and other commodities, transported on their road, provided only the net profits of the road shall never exceed twenty-five per cent per annum." And within this limitation, which it is said has never been passed, the company was vested with absolute discretion, bounded only by the common law, over the rates of compensation it should have for services rendered. This proposition answers itself, because it admits the bound and limit of the common law; and we have shown that the gravamen of this action is in the alleged violation by this defendant of the obligation and duty under the common law, as applied to common carriers, by rail.

The suggestion of a charter right which gives the defendant an option to discriminate at will, provided only the net profits of the road do not exceed a certain limit, scarcely merits serious consideration.

Upon the question of the remote, indefinite, and speculative character of the damages claimed, the complaint is within the rule on that subject. As to the loss of business, it may be that the proof may show that it is incapable of measure by a pecuniary standard; but the reading of the complaint shows that an objection to the whole complaint, on the ground stated, ought not to be maintained.

The result of these views is that the demurrer is overruled.

UNITED STATES CIRCUIT COURT, EASTERN DISTRICT OF ARKANSAS.

BAIRD v. ST. LOUIS, IRON MOUNTAIN & S. R. CO.

(See S. C. 41 Fed. Rep. 592.)

- *1. The act of the general assembly of the state of Arkansas approved February 27, 1885, prohibiting the collecting of freight in excess of that specified in the bill of lading, was not intended to give validity to stipulations in bills of lading which are the result of fraud or mistake.
2. The material part of a bill of lading on the subject of the freight rate is that which fixes the rate per 100 pounds. Weighing the freight is purely a mechanical process, and may be done at the point of shipment, or at the point of de-

*Headnotes by the court.

livery. Where the weight of the merchandise is uniformly the same, the carrier or the consignee may ask to have the weight verified up to the moment of delivery, and it is the weight disclosed by the scales, and not the weight marked on the bill of lading, that controls.

3. The shipment of merchandise from one state to another is interstate commerce, and any requirement of a state in respect of such commerce in conflict with the requirements of the Interstate Commerce Act is of no validity.

Decided March 18, 1890.

Statement by the court:

This is an action of replevin tried before the court on the following agreed statement of facts: "(1) That the Louisville New

Orleans & Texas Railway Company is a railway corporation of Louisiana doing interstate business, and has a line of railway running from New Orleans, La., to Huntington, Miss.

(2) That the St. Louis, Iron Mountain & Southern Railway Company is a railway corporation of Arkansas doing interstate business, and has a railway running from Arkansas City, Ark., to Little Rock. (8) That Huntington, Miss., is on the east bank of the Mississippi river, and Arkansas City, just opposite, is on the west bank; the two terminal points being connected by a steam railway transfer boat belonging to the St. Louis, Iron Mountain & Southern Railway Company. (4) That on August 28, 1889, the Iven & Son Machinery Company, consignors at New Orleans, La., delivered to the Louisville, New Orleans & Texas Railway Company 6 steam cotton presses for transportation from that point to the plaintiff at Little Rock, Ark. (5) That the consignors made out the bill of lading, and inserted therein the weight of said 6 cotton presses at 20,000 pounds. Exhibit "A." attached. (6) That, without questioning this weight, or weighing the goods, the Louisville, New Orleans & Texas Railway Company executed and delivered the bill of lading, as made out by the consignors, to them. (7) That after said machinery was aboard of its cars the said Louisville, New Orleans & Texas Railway Company weighed the same, and found that, instead of 6 presses weighing 20,000 pounds, they actually and in fact weighed 25,550 pounds. (8) That the charges on said machinery were \$35, and the rate for the through shipment from New Orleans to Little Rock was 45 cents per 100 pounds. (9) That after weighing the said machinery the Louisville, New Orleans & Texas Railway Company shipped the same over its line to Little Rock via Huntington, Miss., under a billing which showed the true weight, to wit, 25,550 pounds, and not the weight as inserted in the bill of lading by the consignors. Exhibit "B." (10) That on its arrival at Huntington, Miss., the said machinery was turned over to the defendant, the St. Louis, Iron Mountain & Southern Railway Company, under said way bill, which covered the weight as 25,550 pounds. (11) That defendant then transported said machinery to Little Rock, Ark., over its own road, and, on its arrival, presented its bill for charges and freight at the rate of 45 cents per 100 pounds upon 25,550 pounds, making the entire freight bill amount to \$149.98. (12) That plaintiff, Thomas W. Baird, refused to pay said freight bill and charges, but presented his bill of lading, and offered to pay the charges and freight as shown thereon, according to the weight of 20,000 pounds, at 45 cents per 100 pounds, which equaled the sum of \$125, and demanded that, under the statutes of Arkansas, the defendant should protect said bill of lading. (13) That defendant again weighed said machinery, and found that the same weighed over 25,550 pounds, and so informed plaintiff, and demanded that he should pay the freight according to the true weight. This Thomas W. Baird refused to do, whereupon the defendant refused to protect or honor said bill of lading, upon the ground that the weights of the said machinery had been falsely billed by the consignors at 5550 pounds less than

4 INTER S.

its actual weight; that to deliver the same was in violation of the Interstate Commerce Act, and made the defendant and its agents personally liable to fine and imprisonment for doing so. (14) That thereupon, plaintiff refused to pay according to the true weights, brought this suit, replevied the goods, and now has them in his possession. (15) That the value of said goods is \$2500."

A statute of the state of Arkansas provides: "Section 1. Be it enacted by the general assembly of the state of Arkansas, that it shall be unlawful for any railroad company in this state, its officers, agents, or employes, to charge and collect, or to endeavor to charge and collect, from the owner, agent, or consignee, of any freight, goods, wares, or merchandise, of any kind or character whatever, a greater sum for transporting said freight, goods, wares and merchandise, than is specified in the bill of lading. Section 2. That any railroad company, its officers, agents or employes, having possession of any goods, wares and merchandise, of any kind or character whatever, shall deliver the same to the owner, his agent or consignee, upon payment of the freight charges as shown by the bill of lading. Section 3. That any railroad company, its officers, agents or employes, that shall refuse to deliver to the owner, agent, or consignee, any freight, goods, wares, and merchandise of any kind or character whatever, upon the payment, or tender of payment, of the freight charges due as shown by the bill of lading, the said railroad company shall be liable in damages to the owner of said freight, goods, wares or merchandise to an amount equal to the amount of the freight charges for every day said freight, goods, wares, and merchandise is held after payment, or tender of payment, of the charges due as shown by the bill of lading, to be recovered in any court of competent jurisdiction." Act. Feb. 27, 1885.

Mr. J. M. Rose, for plaintiff.

Messrs. Dodge & Johnson, for defendant.

Caldwell, J., delivered the opinion of the court:

The bill of lading was filled up by the consignors, and signed by the railroad company, on the faith that the consignors had stated truly the weight of the machinery. Either fraudulently or by mistake, the consignors stated the weight of the machinery to be 5550 pounds less than it was. The contention of the plaintiff is that by a statute of this state he is entitled to profit by this fraud or mistake: that, under the statute, a bill of lading, procured by fraud or mistake is as binding and obligatory as one honestly procured. Of course, the statute is not susceptible of such a construction. The statute was passed to prevent fraud, not to promote it; to punish fraud, not to sanction it. If the bill of lading, by the fraud or mistake of the railroad company had stated the weight of the machinery to be twice as great as it was, the attitude of the plaintiff would not be what it now is; and yet, if frauds and mistakes in bills of lading are to stand as

absolute verity, the rule ought to be mutual, and bind the consignee as well as the carrier. This case, probably, furnishes the first example of a party coming into a court of justice and boldly claiming a benefit from a confessed fraud or mistake. The through rate of freight is stated in the bill of lading to be 45 cents per 100 pounds. That is the material part of the bill of lading on the subject of the freight to be paid for transporting the machinery. In the language of the statute, that is the "sum for transporting said freight . . . specified in the bill of lading." About that there was a contract. There was no contract about the weight of the freight. The weight of the freight is settled by the scales, and not by the contract. Bills of lading are frequently issued before the weight of the freight is known. It is not necessary to the issuance of a bill of lading that it should be known. The freight rate is fixed when the rate per 100 pounds is agreed on. Weighing the freight is purely a mechanical process. It may be done at the point of shipment, or at the point of delivery, or both. One hundred pounds in New Orleans is 100 pounds in Little Rock; neither more nor less. Where, as in this case, the weight of the merchandise is uniformly the same, the car-

rier or the consignee may ask to have the weight verified up to the moment of delivery. It is the weight disclosed by the scales, and not the weight marked on the bill of lading, that controls. The machinery weighed 25,550 pounds, and no agreement of the parties could add to or diminish this weight, nor could it be varied, by fraud or mistake.

But, if the act of the legislature would admit of the construction contended for by the plaintiff, it would avail him nothing. The shipment of this freight from New Orleans to Little Rock was interstate commerce, and the Act of Congress is controlling. It is not necessary to quote that Act. It is sufficient to say that if the defendant had delivered, and the plaintiff received, this freight, with knowledge of the facts as they are set out in the agreed statement of facts, the agent of the defendant making the delivery, the plaintiff, and the consignors, if they had knowledge of the facts, would have been guilty of a flagrant violation of the Interstate Commerce Act, and rendered themselves liable to a criminal prosecution.

Let judgment be entered for the defendant for a return of the property or its value, and for costs.

UNITED STATES CIRCUIT COURT, NORTHERN DISTRICT OF FLORIDA.

CUTTING v. FLORIDA R. & NAV. CO.

Re Petition of MALLORY.

(See S. C. 30 Fed. Rep. 663.)

- | | |
|---|---|
| <p>1. All charges made for any service in the transportation of any passengers or property, or for receiving, delivering, storing, or handling property, must under the Interstate Commerce Act be reasonable and just; and no discrimination can be made in rates, charges, or facilities.</p> | <p>2. Instructions to a receiver of defendant under the Interstate Commerce Act, upon petition and answer in respect to discrimination.</p> |
|---|---|

Decided April 12, 1887.

Mr. Horatio Bisbee for petitioners.

Messrs. John A. Henderson and Hartridge & Young for receiver.

Settle, J., delivered the opinion of the court:

This petition was filed on the 21st day of March, 1887, which was before the Interstate Commerce Act went into effect. The answer of the receiver, H. R. Duval, was filed on the 4th day of April, 1887, in which he submits that he has reformed his tariff of rates, and intends to comply in all respects with the provisions of the Interstate Commerce Act.

In view of this answer, I deem it unnecessary and inexpedient at this time to do more than to give to the receiver of the Florida Rail-

way & Navigation Company some general instructions in respect to such of his business with the parties to this petition as falls under the head of interstate commerce. (1) All charges made for any service in the transportation of passengers or property, or for receiving, delivering, storing or handling property must be reasonable and just. (2) He will not discriminate in his rates, charges and facilities for or against the Clyde line or the Mallory line, but will give to both equal rates and facilities for trade and travel, for equal service from all points.

UNITED STATES CIRCUIT COURT, NORTHERN DISTRICT OF IOWA.

STATE OF IOWA v. CHICAGO, M. & ST. P. R. CO.

(See S. C. 33 Fed. Rep. 301.)

1. To give the Federal court jurisdiction on the ground that the matter in dispute arose under the Constitution, laws, or treaties of the United States, it must clearly and unmistakably appear from the record that such Federal question must necessarily be decided before the merits of the case can be disposed of.
2. The Federal court will remand a cause removed to it on the ground that the matter in dispute arose under the Constitution, laws, or treaties of the United States, where the only showing to that effect in the record is that a Federal question may arise if the evidence proves certain facts.
3. The provision of section 3 of the Act of Congress of Feb. 4, 1887, that common carriers shall afford equal facilities for the interchange of traffic between their lines, but need not give the use of their tracks and terminal facilities to other carriers, does not affect a contract made by a railroad upon being given permission to use the streets of a city for its tracks, that it will pass the cars of other railway companies over its tracks when necessary to reach their customers' warehouses, and that it will not exceed a certain rate in its charges for switching.
4. The imposition by a state of a condition, upon giving permission to lay railroad tracks in the streets of a city, that such tracks shall be public and open to the use of citizens; and a regulation by the state of the switching rates to be charged by such railroad in the city,—do not clearly show an unconstitutional interference with or regulation of commerce between the states, although cars engaged in interstate traffic may be switched over such tracks.

Decided Dec. 5, 1887.

MOTION to remand a suit in equity removed from the District Court of Dubuque County, Iowa.

Messrs. A. J. Baker, Atty. Gen., and Fouke & Lyon for complainant.
Messrs. J. W. Carey and W. J. Knight for defendant.

Shiras, J., delivered the opinion of the court:

From the record in this cause it appears that until within a recent period the defendant company owned or controlled all the lines of railway entering the city of Dubuque, and that through the construction of side tracks over and along the public streets and alleys, and by obtaining control of certain tracks built, under an ordinance of the city of Dubuque, by the Lumberman and Manufacturer's Railway Company, the named companies practically controlled the access by railway cars to a large part of the manufactories and warehouses of the city.

Within the past year or two, the Minnesota & Northwestern and Chicago, Burlington & Northern railway companies have built their lines to or through the city, and the question becomes a practical one, whether these companies could have their cars switched over the tracks owned by the defendant company, so as to reach the manufactories or warehouses of persons desiring to patronize them.

The defendant company established a rate to be charged for switching such cars, to which exception was taken, and the result was that the state board of railway commissioners was appealed to; and the board, after considering the subject, rendered an opinion in which it was held that "the sidings of the companies in Dubuque are public highways,

and that the companies are required by law to haul over them the cars of all transportation companies or persons at reasonable rates," and the rate to be charged for such service was fixed by the board. Thereupon, under the provisions of Acts of the 20th General Assembly, Iowa, chap. 133, a proceeding in equity was brought by the state of Iowa against the railway company, in the district court of Dubuque county, Iowa, for the purpose of enforcing the decision of the board, from which court the proceeding has been transferred to this court, and it is now sought to have the cause remanded on the ground of want of jurisdiction.

The motion to remand presents the question whether it is a removable case, and as the state is a party, and jurisdiction in a Federal court cannot be had by reason of diverse citizenship, it follows that to sustain the jurisdiction it must appear that the case is of a civil nature, wherein the matter in dispute exceeds \$2000 in value, exclusive of interest and costs, and arises under the Constitution, laws, or treaties of the United States, the Supreme Court has jurisdiction to review the decision of the highest tribunal of a state, on the ground that it involved the construction of the Constitution, laws, or treaties of the United States, the Supreme Court uniformly held that it must clearly appear from the record that the question arising under the

Federal Constitution, laws or treaties, was in fact passed upon necessarily involved in the conclusion reached.

In *Crowell v. Randell*, 35 U. S. 10 Pet. 368, 9 L. ed. 458, it was said that it was "not sufficient to show that a question might have arisen or been applicable to the case, unless it is further shown, on the record, that it did arise, and was applied by the state court to the case." In *Proprietors of Passaic & H. River Bridges v. Hoboken Land & Imp. Co.*, 68 U. S. 1 Wall. 116, 17 L. ed. 571, the rule is stated to be that "the court must be able to see clearly, from the whole record, that a certain provision of the Constitution or Act of Congress was relied on by the party who brings the writ of error, and that the right thus claimed by him was denied." In *Brown v. Colorado*, 106 U. S. 95, 27 L. ed. 192, it is said: "Certainly, if the judgments of the courts of the states are to be reviewed here for decisions upon such questions, it should be only when it appears unmistakably that the court either knew or ought to have known that such a question was involved in the decision to be made." It certainly will not be claimed that the rule is any less strict, when the question is as to the jurisdiction of the circuit court.

When it is sought to deprive a state court of the right to hear and determine a cause properly and rightfully brought therein by removing the same into the Federal court, on the ground that the controversy involves in its determination a question arising under the Constitution, laws, or treaties of the United States, it must be made to appear, clearly and unmistakably from the record, that the cause or controversy necessarily, in its determination, involves the consideration and determination of such Federal question. It is not sufficient for it to appear that such Federal question may possibly arise. Jurisdiction to wrest the case, if I may use that term from the state court, cannot exist unless a Federal question is certainly involved. If the record simply shows that possibly, during the trial, some Federal question may be presented, that will not confer the jurisdiction, and entitle the defendant to the right of removal. If it were otherwise, and upon the showing that a Federal question might arise, the case could be brought into the circuit court of the United States; the jurisdiction would then exist, not of the Federal question, but of the case; and yet, upon the trial, the decision might be rested upon questions of fact or law not arising under the Federal Constitution or laws, and thus the same court would have been deprived of its jurisdiction wrongfully.

The jurisdiction of this court either by original process, or by removal, in the class of cases under consideration, depends solely upon the fact that the controversy between the parties requires, for its final determination, the construction of some provision of the Constitution, laws, or treaties of the United States and the application thereof to the facts of the particular case, in such sense that the ruling thus made will materially affect the conclusion reached upon the controversy between the adversary parties to the litigation.

Unless from the record it clearly appears that the Federal question must be met and decided, before the issue or issues in the particular cause be finally disposed of, it cannot be said that the matter in dispute arises under the Constitution or laws of the United States, within the meaning of the statute. In such case, no removal can be had, and the cause must be heard and decided in the state court. If during the trial, in fact a Federal question does arise, and is decided adversely to the party claiming the protection of the Federal Constitution or laws, the party aggrieved can, by proper proceedings, carry the question from the court of final resort in the state to the Supreme Court of the United States.

It was suggested on the argument, that as the defendant set forth on the record that it claimed a defense to the proceeding arising under the laws of the United States, this necessarily raised a Federal question, because the court would be required to consider the facts thus averred, in order to determine whether they presented a Federal question, and that this involved taking jurisdiction of the cause. Whenever the jurisdiction of the court is challenged in a given cause, it becomes its duty to examine into and decide the question. It is not bound to retain jurisdiction simply because a party asserts that the same exists. On the contrary, it becomes the duty of the court, as already said, to hear and determine the issue of jurisdiction thus raised; and if in a given case the jurisdiction is based upon the allegation that it presents a question arising under the Constitution or laws of the United States, then it becomes the duty of the court to examine the record, and to ascertain whether, in fact, the controversy requires for its determination the decision of the title, right, privilege, or immunity claimed to arise under the Federal Constitution or laws, and also whether the title, right, privilege, or immunity relied upon actually arises under such Constitution or laws.

If the right to hear and determine a plea to the jurisdiction exists, and this is not questioned, then it must be conceded that the court must have the right to consider and determine all the questions of law and fact that inhere in the jurisdictional question, for in no other way can the court properly discharge the duty imposed upon it. In *Starn v. New York*, 115 U. S. 248, 29 L. ed. 888, it is said "The character of a case is determined by the questions involved. If from the questions it appear that some title, right, privilege, or immunity on which the recovery depends will be defeated by one construction of the Constitution or a law of the United States or sustained by the opposite construction, the case will be one arising under the Constitution or laws of the United States, within the meaning of that term as used in the Act of 1875; otherwise not."

What then are the questions arising in the present controversy? The proceeding itself is one instituted by the state of Iowa under the provisions of an act of the state legislature passed for the purpose of providing a legal method for enforcing the conclusions

or orders of the state board of railroad commissioners. The particular order was one made by the commissioners which in effect holds that certain side and spur tracks, laid down over the streets and the alleys of the city of Dubuque are, under the laws of the state of Iowa and the ordinances of the city of Dubuque, public highways, and not the private property of the defendant company, and that, for the reasons set forth in the commissioners' opinion the defendant company was under legal obligation to pass, over such side and spur tracks, the cars of other companies, when such passage became necessary in order to enable the other companies to reach the factories or warehouses of their customers; and the commissioners also fixed the rates to be charged for the work to be done by the company when thus engaged in performing this switching.

It is clearly apparent, from this brief statement, that the complainant does not base the right asserted and sought to be enforced against the company upon any part of the constitution or laws of the United States; but on the contrary, to establish the right, if any such exists, dependence must be had upon the state laws and the ordinances of the city of Dubuque, coupled perhaps with principles of general jurisprudence, not depending for their existence or authority upon the Federal Constitution or laws.

The Federal question, if any exists, must be sought, then, in the defense or defenses interposed by the defendant, and substantially it is claimed that the action of the commissioners is a violation of the Federal Constitution in that it is a regulation of interstate commerce.

Can it be fairly said that if the state of Iowa, by direct legislative action, or through the power conferred upon the city of Dubuque, has provided that certain railroad tracks laid down in and over the public streets of the city of Dubuque, shall be and remain public highways, open to the use of every railway coming into Dubuque, that it was thereby regulating interstate commerce, and exercising a power prohibited by the Federal Constitution? When the state of Iowa, and the city of Dubuque, under its authority, gave permission to the defendant company to lay down tracks along certain streets, or to use those already laid down, upon condition that such tracks should be public and open to the use of the citizens of Dubuque, how did it regulate interstate commerce, or place any burden, hindrance, or restriction thereon?

But it is said that the state, through the agency of its commissioners, is seeking to fix the rate to be charged for the switching required to be done by the defendant, and that thereby interstate commerce is affected and regulated, because the cars thus switched may be filled with merchandise or other property brought from other states into Iowa, or intended to be carried from Iowa into other states. It will be noted that the operations of the defendant company, when engaged as a common carrier of persons or property either wholly in Iowa, or between Iowa and other states, are not in any manner affected

or regulated, either as to the mode of carriage, or to the price to be paid, by the order of the commissioners. The argument is that the property conveyed by the other railway companies may form part of the commerce between the states, and that in this way fixing the rate to be charged by the defendant company will affect the rate for the entire transportation.

The duty imposed upon the defendant company is that of passing the cars of the other connecting companies over the side and spur tracks in question, all of which are included within the limits of the city of Dubuque, and within the boundaries of the state of Iowa. Certainly it cannot be said that upon the face of it it clearly appears that by imposing this duty upon the defendant company, and providing the reasonable compensation to be paid therefor, the state is interfering with or regulating commerce between the states.

All that is sought to be done is to fix the rate to be charged by the defendant company for certain work which it has assumed to do, not by reason of its character as a common carrier, but as a consideration which the company agreed to do and perform for the privilege of laying down the side tracks in question. The facts averred in the record do not certainly show that the question of interstate commerce is necessarily involved in the case. If, in fact, such a question should arise and be decided, the defendant's rights in this particular will be fully protected by the right of appeal to the Supreme Court of the United States.

It is also urged that the action of the commissioners sought to be enforced in this proceeding is in contravention of the last clause of section 8 of the Act of Congress approved February 4, 1887, and known as the "Interstate Commerce Act." In the named section of the Act, it is provided that any common carrier subject to the provisions of the Act must afford equal facilities for the interchange of traffic between their respective lines, and for the forwarding, receiving, and delivering of passengers and property to and from their several lines, and those connecting therewith; and then comes the clause relied on, as follows:

"But this shall not be construed as requiring any such common carrier to give the use of its tracks or terminal facilities to another carrier engaged in like business."

The meaning of this clause is clear. It simply declares that the preceding provision of the section shall not be deemed to give the right to one carrier to use the tracks or terminal facilities of another carrier in the like business. It has reference to the effect of the Act of Congress and nothing else. If the defendant company, by a contract with the city of Dubuque, has bound itself to allow other companies to use part of its tracks or terminal facilities, this clause of the Act of Congress does not affect such a contract or the enforcement thereof. So, also, if the state of Iowa has provided by proper statute that different companies may have a joint or common use of certain terminal facilities, the rights of the several companies to such joint use are

not affected by the provisions of the Interstate Commerce Act, but the same must be measured and determined by the statutes of the state.

So far as it certainly appears from the record in this cause the questions necessarily involved in the controversy between the parties grow out of the provisions of the statutes of the state, of the ordinances of the city of Dubuque, and of the contract alleged to exist on part of the company in regard to the use of the side tracks in question, including the power of the railroad commissioners to fix the rates to be paid the defendant for switching the cars of the other connecting companies over the side tracks in question.

It does not certainly appear that in decid-

ing the issues, it will be necessary to construe or apply any provision of the Federal Constitution or laws. The utmost that can be fairly said is that in the trial of the case, if certain conditions of fact are made to appear by the evidence, a Federal question or questions may arise. If so, and if the protection or defense claimed by defendant under Federal law is adjudged against the contention of the company, it has secured to it the right of appeal to the Supreme Court of the United States.

As the record now stands, it does not appear that a Federal question is necessarily involved, and hence the record fails to show jurisdiction in this court, and the cause must be remanded to the state court.

UNITED STATES CIRCUIT COURT, EASTERN DISTRICT OF LOUISIANA.

MISSOURI PAC. R. CO. *v.* TEXAS & P. R. CO. [No. 1.]

(See S. C. 80 Fed. Rep. 2.)

1. As a general proposition, where a railroad company is not restricted or inhibited by its charter or the law of the land, it is not unlawful for it to make an arrangement of rates for special purposes, on a sufficient consideration and for the legitimate increase of its business.
2. It is illegal for a railroad company to enter a "pool" whereby a parallel railroad has preference over it in rates, where its charter, granted by Congress, forbids discrimination against any connecting or intersecting road, and a state land grant to the railroad forbids it to enter into any combination with any parallel road in the state that will allow the latter to control rates on it.
3. A Federal court will not refuse to abrogate an illegal pooling contract of a railroad in the hands of its receiver upon the prayer of the representatives of other lines connected with it because the receiver is willing to enter into such combination with such objecting lines, and they may also be willing.

Decided Jan. 14, 1887.

INTERVENING petition charging discrimination by a receiver of a railroad.

Mr. Frank G. Stubbs, for petitioner.

Mr. W. W. Howe, for respondent.

Pardee, J., delivered the opinion of the court:

In the matter of the intervening petition of the Vicksburg, Shreveport & Pacific Railroad Company, and of Frank S. Bond, receiver of the Vicksburg & Meridian Railroad Company, the petitioners allege that they are operating a connecting railway line of the Texas & Pacific Railway lines, and the gist of their complaint, as a basis of relief, is that the receivers of the Texas & Pacific Railway Company, appointed by this court in the above entitled suit, to operate and manage the lines of the said company, have been and are discriminating against the lines operated by petitioners, "by requiring and receiving from them a much higher rate for

the carriage of all classes of freight, both east and west bound, over said lines of which they are and have been receivers, than said receivers have required or received of other railroad companies and transportation lines, particularly the said Missouri Pacific Railway Company, and the said The St. Louis, Iron Mountain & Southern Railroad Company, for similar service and similar carriage of like freight." The receivers answer at length as follows:

ANSWER.

First. Respondents submit to this honorable court that none of the matters in the said intervening petition mentioned and complained of are matters in respect of which

the petitioners therein are entitled to relief in this proceeding, and in a court of equity; and they ask to have the same benefit of defense thereto as if they had demurred to said petition.

Second. These respondents admit the adoption and existence of the various statutes and constitutional provisions set forth in the said intervening petition, but for greater certainty as to the specific language of said organic and statutory laws, they pray leave to refer to the same, as the same have been from time to time duly promulgated. But they specially deny that the provisions quoted from the constitution and statutes of the state of Texas have any application to the issue now existing between these respondents and the petitioners in the said intervening petition, or can take away any right conferred by the acts of Congress with reference to the Texas & Pacific Railway Company. They do not admit the allegations of said petitioners with respect to the spirit and intent of the acts of Congress and various other statutes and constitutional provisions quoted in said petition, but so far as the same may apply to this controversy, they pray the court to interpret the same.

Third. Respondents admit that the Texas & Pacific Railway operates its lines to Shreveport where it connects with petitioners' lines, and that the Vicksburg, Shreveport & Pacific Railroad was opened for general traffic about August, 1884. They admit that the same person is president of the Missouri, Kansas & Texas Railway Company and of the Texas & Pacific Railway Company, but they submit that this fact has no relevancy to the issues in this proceeding, since the Texas & Pacific Railway is being managed by respondents under the orders of the court. They aver that since their appointment as receivers the transportation department of the Texas & Pacific Railway has been distinct from that of any Missouri Pacific line; and since July, 1886, the freight traffic department has been under the sole charge of your respondent's general freight agent.

Fourth. They respectfully submit that it is unnecessary and would be irrelevant to inquire in such a proceeding as this into the details of the freight business of the Texas & Pacific Railway Company prior to the appointment of respondents as receivers. They admit their appointment and qualification but they specially deny that in managing the lines of railway under their charge, they have as charged in said intervening petition, at all times or at any time, in violation of law and their duty, discriminated against said petitioners as set forth in said petition, and that they are still so discriminating and will so continue unless prevented by this honorable court. They admit that certain correspondence was had, set forth as Exhibits - A, "B," "C" and "D" of said petition; but submit that said letters must be considered in connection with the other facts of this case. They do not admit the correctness of the memorandum "E," annexed as an exhibit of said petition, and they submit that its date, in June, 1884, shows that it has no relevancy to the issues herein, but if it should

be decreed relevant by the court, they leave the petitioners to make such proof of its correctness as they may be advised.

Fifth. They aver that in March, 1886, they made with the lines represented by petitioners, through respective traffic agents, such traffic arrangements as would enable petitioner's said lines to complete on equal terms with all other lines for freight business to points on the Texas & Pacific Railway. Said arrangement was amended or modified from time to time, and finally on the 28th of September, 1886, was put in the form of the memorandum hereto annexed as Exhibit "RA" of this answer. This was still further modified October 2, 1886, by the latter made part hereof as Exhibit "RB." They aver that the arrangements set forth in said Exhibits "RA" and "RB" were acceptable to the traffic agents of petitioner's lines, and has been and is now in operation without prejudice however to the hearing and decision of the issues in this matter. They aver that through rates from Cincinnati and from other points tributary to petitioner's lines, to points on the Texas & Pacific Railway, are the same by petitioner's lines as by any other line and nothing done by respondents has ever operated to divert traffic from petitioner's lines, or to discriminate against them. They specially deny that they have ever charged petitioners to or from Shreveport for freight any more than they charge for freight over their (respondent's) own line, and they show that since March, 1886, such charges as a rule have been less than those made on their (respondent's) own line, and less than justified by the letter of the law.

Sixth. Respondents aver that from the time they took possession of the Texas & Pacific Railway until September 1, 1886, the division of revenue on business interchanged between the roads of the Missouri Pacific system, intersecting the Texas & Pacific Railway, including the St. Louis, Iron Mountain & Southern and the Missouri, Kansas & Texas railroads was made on the basis of what was known as the "Gault-Tucker award" made by two expert traffic managers, viz: John C. Gault, now general manager of the petitioner's lines and Joseph F. Tucker, then traffic manager of the Illinois Central system and now assistant general manager of the Chicago, Milwaukee & St. Paul Railway. On the first of September, 1886, a new agreement for division of revenue on business interchanged between the said roads of the Missouri Pacific system and the Texas & Pacific Railway was duly made and executed which has been in operation and duly acted upon by the parties thereto since said 1st of September, 1886. A copy of the same is made part hereof as Exhibit "RC" of this answer.

The petition and order to answer in this proceeding were served on the receivers through Lionel A. Sheldon, one of your respondents on the 9th of September, 1886. They show that at the time of such service, and since they have as above been acting in the premises under such agreement of September 1, 1886.

Seventh. Your respondents aver that the Missouri Pacific roads intersect the Texas &

Pacific Railway at eight different points, while the Vicksburg, Shreveport & Pacific intersects the same at but one point. The effect is that the Missouri Pacific roads could, in the absence of this agreement of September 1, deliver freight at these eight points without any payments to the Texas & Pacific Railway, and could also deliver freight for local points on the Eastern division of the Texas & Pacific Railway at better revenue to the Missouri Pacific roads than derived under said agreement. In other words, the Missouri Pacific roads pay more in many instances under said agreement than they would in its absence; whereas at Shreveport, petitioner's roads pay nothing in this way but are in sharp local competition. As to the Rio Grande division, its principal business is the transportation of cattle and the principal markets are St. Louis and Chicago. As to this business, petitioners' roads can offer respondents nothing, while the division of revenue therefrom allowed by the Missouri Pacific roads under said agreement is a liberal one. This fact is important in considering the propriety of the agreement of September 1, 1886. They further show that the effect of the said agreement of September 1, 1886, is to give the Texas & Pacific Railway a large business in lumber from the pinneries of Louisiana and Texas and in salt from the mines of Iberia, for the northwest, which it could not do to advantage in the absence of the division of rates established by said agreement.

They show that the same is true of the business in cotton to Mexico and wheat to mills on its lines. They further show that in consequence of the position of the Missouri Pacific lines on both sides of the Texas & Pacific road, the said agreement preserves to the latter a large amount of business which might be diverted by transportation over the Missouri Pacific Railway lines now existing, or easily built. Said agreement also secures to the Texas & Pacific a quantity of business controlled by the Missouri Pacific system, destined to points competitive between the Texas & Pacific and other lines which also directly intersect Missouri Pacific lines. They further show that the amount of business contributed by the Missouri Pacific lines to the Texas & Pacific lines is immensely greater than that to and from the lines of petitioners. From January 1, 1886, to September 3, 1886, the Missouri Pacific system contributed in all, 615,475,809 pounds of freight, the revenue to the Texas & Pacific being \$963,515.01 and from petitioners' lines during the same period there were contributed but 18,448,785 pounds, the revenue to the Texas & Pacific being only \$42,904.31. And respondent's annex as part hereof the statements by W. W. Finley, their general freight agent, which they believe to be correct, of the advantages of the property under their charge of the said agreement of September 1, 1886; said statements being marked "RD" and "RE." And respondents therefore show that the petitioners' lines are not able to furnish any such amount of business or advantageous interchange of traffic as the Missouri Pacific lines.

The amount of business properly going
4 INTER 8.

from respondent's lines to those of petitioners at Shreveport is small, and the business coming to respondent's lines at that point from petitioners has always been tributary to a large extent through other channels. As to the demand for "solid billing" made in the said intervening petition, respondents show that they have expressed to petitioners a willingness to make an arrangement for such solid billing, and are still willing to do so.

Eighth. Your respondents show that they have not in the premises violated any provision of the charter of the Texas & Pacific Railway Company, nor any other provision of law governing their action. They submit that all provisions of the charter and of other laws which may apply, must receive the interpretation which long established usage and the custom of the commercial world have given them. This custom has always taken into consideration the difference between transactions at wholesale and at retail, and the difference between dealing with large shippers and with small ones. They aver that special arrangements with large shippers under proper circumstances, do not amount to inequality, but promote reasonable equality. They submit that in the execution of their duties for the benefit of the property under their charge, they have but exercised a legal discretion in the premises in making such arrangements with the Missouri Pacific roads, and with the lines of petitioners as will, without unjust discrimination, confer the fullest benefit on the trust they represent. They submit that the arrangement made as aforesaid with petitioners gives them lower rates than they are entitled to under the letter of the law. The arrangement made as aforesaid with the Missouri Pacific system of September 1, 1886, does not operate an unjust discrimination or inequality but a reasonable equality, considering the facts above set forth. They submit that any other interpretation of the statutes in question would defeat their object and result in that unreasonable equality which is the most noxious inequality. They aver that whenever the petitioners in this proceeding are ready to tender them the same amount of business and the same advantages of interchange, under the same conditions as the Missouri Pacific system, they believe they will be ready to make with them an arrangement similar to that made with said Missouri Pacific system on said first of September.

SUPPLEMENTAL ANSWER.

In addition to the details given in their original answer hereto, filed November 10, 1886, and reiterating said answer, they aver that respondents have no connection with the important markets of St. Louis and Chicago except over lines of the Missouri Pacific system; that in the important article of coal of which they consume about \$100,000 worth annually, the same is furnished them over Missouri Pacific lines at \$1.25 per ton cheaper, freight included, than by petitioner's lines; that from Texarkana to Longview, a distance of about 100 miles, all the traffic of the Missouri Pacific system in question herein passes

over the Texas & Pacific Railway to the great advantage of the latter; and that from Whitesboro to Fort Worth, a distance of 71 miles, the track is owned by the Texas & Pacific Railway Company, and the agreement with the Missouri Pacific system which took effect September 1, 1886 (dated August —, 1886) and marked herein Exhibit "RC" contains provisions advantageous to the Texas & Pacific Railway for sharing the business of that portion of the latter's line, which the petitioners never have offered, and cannot offer.

The matter is submitted on petition and answer, and although the argument has extended over a wide territory, I feel compelled to restrict my examination of the case to the facts as admitted by the pleadings, the answer being taken as true.

It will be noticed that the answer, while in terms denying all discrimination against petitioners, goes fully into a statement of the previous and present relations, dependency, connections and joint business of the Texas & Pacific Railway, with the Missouri Pacific Railway system, and makes part of the answer the existing traffic contract with the Missouri Pacific Railway Company, and its leased and operated lines, entered into after the petition was filed, but before it was served upon the receivers. That contract covers division of rates, division of traffic and earnings and joint track operation and expenses, and amounts to what is known in railway parlance as a general pooling and traffic arrangement. Section 8 of article 2, division of traffic and earnings of said contract, provides as follows:

"In consideration of the above divisions and the further agreement mutually made between the respective companies to work as heretofore, in so far as they legally can, to the end of sending all the traffic they control over the lines of the system of the other, to or from points reached by the respective systems, in preference to the roads of other companies not parties to this agreement, and a further agreement on the part of each that they will not give other connecting lines equal rates and facilities as herein contained for each, without such connecting lines shall pay an equal consideration therefor, and a further agreement that the business between local stations on the lines of the parties hereto shall be routed in the same general manner as prior to the receivership of the Texas & Pacific Railway, except as hereafter changed by mutual agreement, or by the construction or control of either party hereto of new roads forming shorter routes, the parties hereto agree to divide as hereinafter provided," etc.

It is contended by the petitioners that this contract of itself, but particularly in the light of the above quoted provision, shows a preference in rates, business and facilities to do business on the part of the receivers of the Texas & Pacific in favor of the Missouri Pacific system and against all other connecting lines. This contention seems to be well founded. A preference in rates and business in favor of one connecting line is a discrimination against other connecting lines.

This contention is sought to be met with the propositions that the contract is not un-

lawful—that it operates to the benefit of the trust property; that the present traffic arrangement with petitioner's lines is a fair one, and acceptable to the traffic agents of said lines, and thereunder the charges are less than justified by the letter of the law being less than local charges on the Texas & Pacific lines, and that respondents are ready and willing to make the same arrangement with petitioner's lines, provided the latter will furnish them the same amount of business under the same conditions and advantages of interchange.

That the contract is not unlawful does not so plainly appear. As a general proposition where a railroad company is not restricted or inhibited by its charter or the law of the land, it may be conceded that it is not unlawful for it to make an arrangement for special purposes, on a sufficient consideration, and for the legitimate increase of its business (*Nicholson v. Great Western R. Co.* 4 C. B. N. S. 386) or that carrier may prorate through freight with one, and not with another (*Eclipse Tow Boat Co. v. Pontchartrain R. Co.* 24 La. Ann. 1) or that so far as the common law is concerned the question is whether the rate to the complaining party is reasonable. *Johnson v. Pensacola & P. R. Co.* 16 Fla. 664, 26 Am. Rep. 731; *Fitchburg R. Co. v. Gage*, 12 Gray, 393. Although the authority of all these cases is shaken by the case of *Scotfield v. Lake Shore & M. S. R. Co.* 43 Ohio St. 571, 54 Am. Rep. 846, and the authorities there cited.

The fact is that the Texas & Pacific Railway Company is hampered by its charter, as well as by the laws of Texas, in regard to discrimination for or against connecting lines. Section 15 of the original charter to the Texas Pacific Railroad Company (16 Stat. at L. 578) is as follows:

"That all railroads constructed or that may be hereafter constructed, to intersect said Texas & Pacific Railroad shall have a right to connect with that line; that no discrimination as regards charges for freight or passengers or in any other matter shall be made by said Texas Pacific Railroad Company against any of the said connecting roads, but that the same charges per mile as to passengers and per ton per mile as to freight, passing from said Texas Pacific Railroad over any of said connecting roads, or passing from any of said connecting roads over any part of said Texas Pacific Railroad shall be made by said company as they make for freight and passengers over their own road; provided, also, that said connecting roads shall reciprocate said right of connection and equality of charges with said Texas Pacific Railroad; and provided, further, that the rates charged for carrying passengers and freight per mile shall not exceed the prices that may be fixed by Congress for carrying passengers and freight on the Union Pacific and Central Pacific railroads."

By Act of Congress approved May 2, 1872 (17 Stat. at L. 59) among other provisions, the name, style and title of the Texas Pacific Railroad Company was changed to that of the Texas & Pacific Railway Company, and this provision was made, to wit:

"That all roads terminating at Shreveport shall have the right to make the same running connections, and shall be entitled to the same privileges for the transaction of business in connection with the Texas & Pacific Railway as are granted to roads intersecting therewith.

Congress by the Act of 1871 granted some 15,000,000 acres of the public land to aid in the construction of the Texas Pacific Railroad. On the second of May, 1873, the legislature of the state of Texas passed "An act to adjust and define the rights of the Texas & Pacific Railroad Company within the state of Texas," etc. Under this act, the line of the road was distinctly defined, and certain grants and donations of land (nearly 5,000,000 acres) were made by the state to aid in its construction; these grants and donations being made subject to the conditions named in the last paragraph of section 9 of said act, to wit: "that said Texas & Pacific Railway Company shall be subject to such general laws as may be enacted by the legislature applicable to other railroads constructed within the state." And in section 10, to wit: that "all railroads in this state constructed or that may be hereafter constructed, to intersect said Texas Pacific road, shall have a right to connect with that line; that no discrimination in regard to charges for freight or passengers, or in any other matter shall be made by said Texas Pacific Railroad Company against any of the said connecting roads but that the charges per mile as to passengers and freight passing from the said Texas Pacific Railway over any of the said connecting roads, or passing from any of the said connecting roads over any part of the Texas Pacific Railroad shall be governed and controlled by the laws of this state now or hereafter to be enacted. . . . And said railroad company shall not have the right or power to consolidate with, or sell or rent or lease the same to, any other railroad in this state, or to purchase or lease, nor enter into any combination in the nature of a partnership with, any railroad in this state running parallel with the said Texas & Pacific Railroad, or in the same general direction, that would in any way or manner give the said company the power or right to control the rates of freight and passage on said railroad so purchased or leased, and should the provisions of this section be violated by said company, it shall work a forfeiture of the rights and privileges herein granted." Section 11 of the act requires that "the board of directors shall within fifteen days from the date of approval of this act (May 2, 1873) signify to the governor, by telegraph or otherwise, the acceptance or rejection of the terms and conditions of this act; and within thirty days from the date of approval of this act, shall file a formal acceptance or rejection of the same with the secretary of state of the state of Texas." It appears that such formal acceptance was duly filed. The constitution of the state of Texas, article 10, reads as follows:

"Sec. 1. Any railroad corporation or association organized under the law for the purpose shall have the right to construct and

4 INTER S.

operate a railroad between any points within this state and to connect at the state line with railroads of other states. Every railroad company shall have the right with its road to intersect, connect with, or cross any other railroad, and shall receive and transport each other's passengers, tonnage, and cars, loaded or empty, without delay or discrimination, under such regulations as shall be prescribed by law.

"Sec. 2. Railroads heretofore constructed or that may hereafter be constructed, in this state, are hereby declared public highways, and railroad companies common carriers. The legislature shall pass laws to correct abuses, and prevent unjust discrimination and extortion in the rates of freight and passenger tariffs on the different railroads in this state."

"Sec. 5. No railroad or other corporation, or the lessees, purchasers or managers of any railroad corporation, shall consolidate the stock, property or franchises of, or in any way control, any railroad corporation owning or having under its control, a parallel or competing line; nor shall any officer of such railroad corporation act as an officer of any other railroad corporation owning or having the control of a parallel or competing line."

It is contended in this case that the laws of Texas can have no force, because the connection between petitioner's lines and respondent's lines is not in Texas but in Louisiana; but this view loses sight of the fact that the contract under consideration is made with railway lines in Texas with reference entirely to business interchanged in Texas. It would seem, too, that under the circumstances the regulations of the laws of Texas with regard to the matters here involved, should be binding on the Texas & Pacific Railway Company in morals, if not in law. Of course the provisions of the charter and the supplemental charter are binding on the company, and on the respondents who are operating the railway lines under the franchises and rights granted the company.

Under these provisions of section 15 of the charter, and of the laws of Texas, accepted by the Texas & Pacific Railway Company for a consideration, it is by no means clear that the discrimination stipulated in the contract or agreement with the Missouri Pacific system is lawful. Both the charter and Texas grant provide that, "no discrimination, as regards charges for freight or passengers, or in any other matter, shall be made by said Texas & Pacific Railway Company against any of the connecting or intersecting roads. In the Texas grant as well as in the Texas law is the further provision that said railway company shall not enter into any combination in the nature of a partnership with any railroad in the state running parallel with the said Texas & Pacific, or in the same general direction that would in any way or manner give the said company the power to control the rates of freight and passage on said railroad." That the contract gives the Missouri Pacific lines advantages not granted to other connecting and intersecting lines is apparent from the extract given. That the Missouri Pacific lines are to a considerable

extent in competition with the Texas & Pacific lines appears from the reasons given by respondents for entering into the contract. That the Missouri Pacific system has more than 200 miles of railway in Texas parallel to the lines of the Texas & Pacific lines appears by the record.

If the contract with the Missouri Pacific system be unlawful, as not in consonance with the acts of Congress and the laws of Texas, then the consideration that it operates to the benefit of the trust property can have no weight. Neither is it material that the present arrangements with petitioners' lines are fair and satisfactory to petitioner's agents.

The proposition that the respondents are ready and willing to make the same arrangements with petitioner's lines, provided the latter will tender them the same amount of business under the same conditions is plausible only to the eye. The general tone of the answers of respondents seems to justify a discrimination in favor of connecting lines on the basis of the amount of business furnished, as for instance within a given period the Missouri Pacific system furnished the Texas & Pacific over 615,000,000 pounds of freight, while during the same period the petitioner's lines only furnished about 18,000,000 pounds.

Generally I consider that the case of *Seo-feld v. Lake Shore & M. S. R. Co.* 43 Ohio St. 571, 54 Am. Rep. 846, is the best exposition and furnishes the true rule on this subject; but for the Texas & Pacific Railway the matter is settled by its charter, section 15, *supra*, "but that the same charges per mile as to passengers and per ton per mile as to freight . . . shall be made by said company as they make for freight and passengers over their own road." And in this connection, it may be proper to say that a proper construction of said section 15 does not permit that connecting roads should be charged less or more per ton per mile as to freight or less or more per mile as to passengers than the rates charged on or over the Texas & Pacific lines, but the same. In other words, section 15 is in the interest of and for the protection of shippers local to the Texas & Pacific Railway, as well as in the interest of and for the protection of connecting lines. If respondents are, as they seem to say, charging the petitioner's lines less per ton per mile than the charges made on respondent's lines to other shippers under the same conditions as to distance and shipping points then respondents are discriminating (and probably against shippers who are forced to use their lines) which ought not to be permitted under any circumstances, and particularly on a railroad to the construction of which the general government and the state of Texas contributed so large a portion of the public lands.

For the relief of petitioners an order will be entered directing the receivers to give them the same rates and the same privileges for doing business in all respects as are given to other connecting or intersecting lines, substantially as prayed for in their petition.

In one of the exhibits attached to the petition I notice the statement made by the

general freight agent of the respondents "that the question of through rates into Texas is not absolutely controlled by the Missouri Pacific Railway, or the Texas & Pacific Railway, but by the Texas Traffic Association, of which the Texas and St. Louis, the H. & T. C. the Southern Pacific, and the G. C. & S. F. railways are also members" and again the "basis fixed by the Texas Traffic Association for the division of rates from Louisville and Cincinnati to common points in Texas like Dallas and Fort Worth, *via* New Orleans and all lines is as follows:" Whether these statements imply any power in the Texas Traffic Association to make discriminating rates for or against the Texas & Pacific Railway, or against any railway connecting or intersecting with the Texas & Pacific Railway, as to shipments *via* the Texas & Pacific, does not appear. If any such power is vested in the Texas Traffic Association, then the connection of the receivers of the Texas & Pacific Railway Company with that association is as obnoxious as the hereinbefore referred to contract with the Missouri Pacific Railway system. As these matters have been brought to the attention of the court, and considering that the receivers are operating the lines of the Texas & Pacific Railway under the orders and protection of the court to the end that the duties and obligations devolving upon the Texas & Pacific Railway Company as a public carrier under its charter may be performed, and that the public may not suffer detriment by the non-user of its franchises, as well as to preserve the property of the company for its creditors, and considering that it is the duty of the receivers to adhere to and comply with the charters, and grants to the company by which their franchises and privileges were obtained, and considering further that the aforesaid contract between the said receivers, and the Missouri Pacific Railway Company is in violation of the laws of Texas, and not authorized by the charter of the Texas & Pacific Railway Company, and that the Texas Traffic Association may be likewise obnoxious, . . . an order of the court's own motion will be entered in this cause, directing the receivers to abrogate and annul the said contract with the Missouri Pacific Railway system so far as it contemplates discrimination against intersecting or connecting lines and so far as it constitutes or stipulates any combination in the nature of a partnership with the Missouri Pacific Railway system in Texas; and advising the said receivers to withdraw from all connection with the Texas Traffic Association, unless they are able to report that under the rules of said association, they are not required to discriminate in any manner for or against any connecting or intersecting line of railway, or for or against any shipper or the public.

This opinion and the orders herein directed, are not to be construed as any reflections upon the receivers. They received the property of the Texas & Pacific Railway Company, which is a railway system by itself, in a dilapidated condition, with all the complications and entanglements rising from the fact that for years it formed an integral

part of the Missouri Pacific Railway system, and their management so far has been so wise and judicious that they retain the full confidence of the court, and merit the warmest approval from all financially interested in the prosperity of the railway.

UNITED STATES CIRCUIT COURT, EASTERN DISTRICT OF LOUISIANA.

MISSOURI PAC. R. CO. v. TEXAS & P. R. CO. (No. 2).

RE DAVIS.

(See S. C. 31 Fed. Rep. 864.)

A shipper is not bound by his order for a specified number of cars on a specified day in the absence of an acceptance of the order so as to bind both parties.

Decided May 28, 1887.

REPORT of Master on petition of I. T. Davis for damages.

*Messrs. Sexton & Smith and L. H. Kennard, Jr., for petitioner.
Mr. W. W. Howe, for receivers.*

Pardee, J., delivered the opinion of the court:

This matter has been heard on exceptions to the master's report recommending a dismissal of the claim. The master's report fairly and fully sets forth the facts as shown by the evidence, and his legal conclusions on the facts are supported at every step by the authority of adjudged cases. As the case seems to me, the claimant has failed to establish the basis of his claim for damages, to wit, a contract with the receivers to furnish him a specified number of cattle cars on a specified day. It may be taken as granted that the receiver's station agent had authority, from the general scope of his agency, to bind the receivers in a contract to furnish cars, but it does not appear that he made any contract to that effect. A shipper's order calling for a specific number of cars for a specified day will not, unaccepted by the carriers, constitute a contract binding

on either. A contract of the kind referred to will bind the carrier to furnish the cars, and the shipper to furnish the goods to load the cars.

Under the evidence it is apparent that the claimant did not intend to bind himself to furnish any certain number of cattle for shipment. In fact, he did not know, at the time of the alleged first contract, how many cattle he would have to ship, or when he would be ready to ship them; and, when he sent his order for cars, he ordered 75, when he had cattle for only 43; and at the time of the second alleged contract he again makes application for 75 cars for himself and Beal, but fixes no particular day for shipment and when he brings the cattle in has enough only for about 40 cars.

It is therefore ordered that the exceptions to the master's report be overruled; that the said report be in all respects confirmed; and that the said intervention be dismissed.

MISSOURI PAC. R. CO. v. TEXAS & P. R. CO.

[No. 3.]

(See S. C. 46 Fed. Rep. 862.)

1. Advice and instructions to receivers on application to the court, where *ex parte* are probably binding only upon the receivers; but where there are parties in interest, and they have their day in court, the advice may be decisive.
2. Competition may constitute a circumstance or condition of dissimilarity which will prevent the operation of the long and short haul clause of the Interstate Commerce Act, § 4.

Decided June 21, 1887.

PETITION of Receivers for advice in relation to the construction of the 4th section of the Interstate Commerce Act.

Mr. W. W. Howe for receivers.

Pardee, J., delivered the opinion of the court:

The petition of the receivers of May 23, the evidence and report of the special master, and the arguments have been carefully considered. The nature of the matters presented precludes anything beyond *ex parte* consideration. The receivers of the Texas & Pacific Railway, operating its lines of railway under the general direction of the court, can have general advice and instructions, and, in particular cases, particular advice and instructions on application to the court. The value of such advice depends: If there are parties in interest, and they have their day in court, the advice may be decisive. But, if the matter is *ex parte*, the value of the advice depends largely upon the information and ability of the judge, and is probably binding only on the receivers, for the judge may change his mind on hearing full argument.

Under section 4 of the Interstate Commerce Law, relating to the charges for the long and short haul, it seems that where the circumstances and conditions are dissimilar there is no prohibition; where the circumstances and conditions are similar the prohibition attaches; and that where it is difficult to point out clearly the circumstance or condition which produces dissimilarity, the doubt should go in favor of the object of the law, and the circumstances and conditions should be taken as substantially similar. Where the circumstances and conditions are similar, or substantially similar, and the result to the carrier is injurious, relief can be had only through the Commission.

The bulk of the petition presented, of the evidence, and of the master's report, is an argument against the Interstate Commerce Act, and a rather vivid showing of the disastrous effects of an enforcement of the Act with the popular construction given to the long and short haul clause, so far as the lines of the Texas & Pacific Railway are concerned; and if any specific question is presented for the answer of the court, it is whether competition

between carriers is a circumstance or condition of the carriage in the sense in which these words are used in the 4th section of said law.

The effect of the enforcement of the law upon the particular property in the hands of the receivers need not be considered, when the whole question is one of how to comply with the law. That competition, the life of trade, cuts an important figure in the conditions and circumstances attendant upon transportation of property and passengers, cannot well be overlooked nor denied. Nor can it well be denied that, as between the short and long haul competition may exist to that extent that what would otherwise be similar circumstances and conditions will be dissimilar circumstances and conditions. Whether in any particular case there is that competition on the long haul that will justify a lower charge for the long haul than as charged for the short haul, under otherwise similar circumstances and conditions, must be determined on the facts of the particular case; keeping in mind that, where the matter is not clear, the object and the policy of the law should prevail.

As to the competition and its effects, and generally as to the questions under the said Interstate Commerce Act, the receivers are referred to the late decision of the Commission upon the petition of the Louisville & Nashville and other railroads, rendered June 16, instant. This decision is elaborate and well considered, and answers all the points made by receivers' petition herein specifically as their general nature will permit.

The lights furnished by the Commission, with a disposition to enforce the law (giving the same an enlightened and liberal construction, to the end that the mischiefs at which the law is aimed may be prevented without unnecessary injury to any species of property) ought to be sufficient to guide any railroad traffic manager and to enable him to protect himself and his company against any serious complaint of unjust discrimination or unlawful conduct.

UNITED STATES CIRCUIT COURT, DISTRICT OF NEBRASKA.

LOWRY v. CHICAGO, B. & Q. R. Co.

(See S. C. 46 Fed. Rep. 88.)

1. The fact that a plaintiff rests his case on a common law liability will not deprive defendant of the right to remove it, if he bases his defense on an Act of Congress.
2. A suit to recover damages for acts which constitute a violation of the Interstate Commerce Act, the construction of which is in dispute be-

- tween the parties, presents a Federal question for which it may be removed to a Federal court.
3. On a motion to remand, the court will not anticipate the trial of the case, by deciding a Federal question for which the right of removal is claimed.

Decided May 6, 1891.

MOTION to remand on action removed from a state court.

Messrs. John L. Webster, G. M. Lamberton, and John P. Maule, for plaintiff.
Messrs. Marquette, Dewese & Hall, for defendant.

Caldwell, J., delivered the opinion of the court:

This is a suit at law, brought by the plaintiff against the defendant as an interstate common carrier by rail, upon three separate causes of action. The following is a brief summary of the facts constituting the causes of action: (1) That the defendant unjustly discriminated against the plaintiff in respect to rates and charges on shipments of grain from points in Nebraska to points in other states, by giving other shippers, who made like shipments under similar circumstances and conditions, and from and to the same places and at the same time lower rates and better advantages, in respect to the number of cars, weight, and promptness in dispatch of shipment, than were given to the plaintiff. (2) That from 1884 to 1889 the plaintiff shipped over the defendant's road from Staplehurst and other points in Nebraska, to Chicago and other cities in the United States, large quantities of wheat and other grains, for the carriage of which the defendant "unlawfully demanded, charged, received, and exacted from the plaintiff a rate that was unjust, extortionate and unreasonable." (3) That through the fault and negligence of the defendant, and its connecting lines, agents, and employes, all the grain shipped by the plaintiff was not delivered to the consignees. The aggregate amount of damages claimed by the plaintiff is \$145,000. The suit was brought in the state court, where the defendant appeared, and in apt time filed an answer to the first cause of action, and a petition to remove the suit into this court, upon the ground that it arises under the Act of Congress commonly known as the "Interstate Commerce Act." The suit is not, in express terms, based on that Act, but the statement of the cause of action follows very closely the language of the Act, and the complaint was undoubtedly framed to bring the case within its provisions. The first section of the Act of March 3, 1887, declares:

"That the circuit courts of the United States shall have original cognizance, concurrent with the courts of the several states, of all suits of a civil nature, at common law or in equity, where the matter in dispute exceeds, exclusive of interest and costs, the sum or value of two thousand dollars, and arising under the Constitution or laws of the United States."

And section 2 of the Act provides:

"That any suit of a civil nature, at law or in equity, arising under the Constitution or laws of the United States, or treaties made, or which shall be made, under their authority, of which the circuit courts of the United States are given original jurisdiction by the preceding section, . . . may be removed by the defendant to the circuit court of the United States."

It will be observed that the first section gives the circuit courts original jurisdiction of all

suits arising under the Constitution or laws of the United States, and by the provisions of the second section any suit of which the circuit court is given original jurisdiction by the first section may be removed by the defendant to the circuit court. If, then, this is a suit arising under a law of the United States, it is removable. That it is such a suit cannot be controverted. The Interstate Commerce Act declares all charges for transportation of passengers or property "shall be reasonable and just, and every unjust and unreasonable charge for such service is prohibited and declared to be unlawful." Unjust discrimination is "prohibited and declared to be unlawful;" and the giving of "any undue or unreasonable preference or advantage" to one shipper or locality over another is prohibited. The 8th section of the Act declares:

"That in case any common carrier, subject to the provisions of this Act, shall do, cause to be done, or permit to be done, any act, matter, or thing in this Act prohibited or declared to be unlawful, or shall omit to do any act, matter, or thing in this Act required to be done, such common carrier shall be liable to the person or persons injured thereby for the full amount of damages sustained in consequence of any such violation of the provisions of this Act, together with a reasonable counsel or attorney's fee, to be fixed by the court in every case of recovery, which attorney's fee shall be taxed and collected as part of the costs in the case."

The 9th section of the Act provides:

"That any person or persons claiming to be damaged by any common carrier, subject to the provisions of this Act, may either make complaint to the Commission as hereafter provided for or may bring suit in his or their own behalf for the recovery of the damages for which such common carrier may be liable under the provisions of this Act, in any district or circuit court of the United States of competent jurisdiction."

This suit is brought to recover from the defendant damages for acts which constitute a violation of the provisions of the Interstate Commerce Act. The suit, therefore, arises under that Act, and might have been originally brought in the circuit court. This makes it a removable cause.

Notwithstanding the suit arises under a law of the United States it would not be removable if the parties were at one as to the application and construction of that Act, and the only controversy was over questions of fact or of general law. But the parties in the case are not agreed on the proper construction of the Act. For the purpose of the transfer of a cause, the petition for removal performs the office of pleading. The petition in this case complies with the rule, and sets out with unusual fullness and particularity the facts and

the provisions of the Interstate Commerce Act which are relied upon as constituting a defense. The petition for removal, among other things, alleges that the defendant printed and posted up, for public inspection, schedules, showing the rates and fares and charges for the transportation of passengers and property, which it had established, as required by the sixth section of the Act, and that the rates so established were just and reasonable, and were the rates charged the plaintiff and all others, without any discrimination, and that in a suit or proceeding brought by the Lincoln Board of Trade, of which body the plaintiff was at the time a member, before the Interstate Commerce Commission, against the defendant, to test the justice and reasonableness of the defendant's schedule of rates and charges, that tribunal adjudged that they were just and reasonable. Upon these facts the defendant claims the question whether its schedule rates are reasonable and just is *res judicata*; and that, if that be not so, the Act makes the schedule rates lawful until directly attacked and set aside; and, finally that under the Act the schedule rates are *prima facie* just and reasonable, and that whether they are so or not is a question arising under the Act, and depending largely for its correct decision upon the construction of the various provisions of the statute. A suit is removable when it clearly appears from the record that its determination will necessarily involve the construction of an Act of Congress the meaning of which is in dispute between the parties. All this clearly appears from the record in this case.

The construction of the Act contended for by the defendant is not so fallacious or absurd as to warrant the court in treating it as an idle or false pretense. The court will indulge the presumption that the petition for removal was filed in good faith, and that the defendant, knowing the proverbial uncertainty of the law, is animated by a lively hope that its construction of the Act may prevail. The court will not, on the motion to remand, anticipate the trial of the case, and proceed to construe the Act of Congress and determine the rights of the parties thereunder. It cannot eliminate the Federal question from the case by a premature decision of it, and then remand the suit on the theory that there is no longer a Federal controversy in the case. It is said in argument that the suit cannot certainly be said to arise

under the Act of Congress because the complaint states a good cause of action at the common law. It must be conceded that the complaint would be good at common law. And it is true that the provisions of the Interstate Commerce Act prohibiting unjust and unreasonable charges and unjust discrimination are merely declaratory of the common law. 2 Redf. Railways, 95; Hutchinson, Car. 243, 302; *Brown v. Pool*, 9 L. R. A. 767, 81 Iowa, 455; *Seafeld v. Lake Shore & M. S. R. Co.*, 48 Ohio St. 571, 54 Am. Rep. 846. And the remedies afforded by the Act of Congress for such practices are cumulative, and not exclusive of the remedies existing at common law. The Act declares that "nothing in this Act contained shall in any way abridge or alter the remedies now existing at common law or by statute, but the provisions of this Act are in addition to such remedies." The law would have been the same independently of this provision. The rule is that when a statute gives a remedy in the affirmative (without a negative express or implied) for a matter which was actionable at common law, this does not take away the common law remedy, but the party may still sue at common law as well as upon the statute. Potter, Dwar. Stat. 275, note 5. It is highly probable that in the progress of the case it will be found that, as to some of the plaintiff's causes of action, the statute is in some respects more favorable to the plaintiff than the common law. And the learned counsel for the plaintiff enter no disclaimer of their intention to avail themselves of these statutory advantages on the trial of the cause. But if the plaintiff's case was based, in terms, on the common law alone, that fact would not affect the question of removal. The plaintiff may be content to rest his case on the common law liability of common carriers, but he cannot thereby deprive the defendant as a carrier of interstate commerce of any defense it has under the Act of Congress, which covers the ground of the common law, and much more. It is enough that there is a Federal question in the case, whether it is relied on by the plaintiff or the defendant. A case arises under a law of the United States whenever the law is the basis of the right or privilege, or claim or protection, or defense of the party, in whole or in part, by whom it is set up. *Tennessee v. Davis*, 100 U. S. 257, 25 L. ed. 648.

The motion to remand is overruled.

UNITED STATES CIRCUIT COURT, DISTRICT OF SOUTH CAROLINA.

Re D. M. LANGFORD.

(See S. C. 57 Fed. Rep. 570.)

1. Liquors imported into a state arrive therein so as to be subject to its police power under the Wilson Act providing that all intoxicating liquors shall, upon arrival in a state or territory, be subjected to the operation and effect of its laws enacted in the exercise of its police powers, to the same extent as if produced in such state or territory, when they reach their destination in such

4 INTER 8.

state, although they are not then delivered by the carrier to the consignee.

2. The provision of S. C. act of Dec. 24, 1892, § 25, subd. 2, that any servant, agent, or employee of a railroad or express company or other carrier, who shall remove any intoxicating liquors from any railroad car, vessel or other vehicle of transportation, at any place other than the usual and

established stations or places of business of such carriers within an incorporated city or town where there is a dispensary, shall be punished,—is not a valid exercise of the police power of the state, since it singles out one class of persons from the whole community for prosecution and punishment in contravention of S. C. Const. art. 1, § 12, providing that no person shall be liable to

any other punishment or subjected in law to any other restrictions or disqualifications in regard to any personal rights, than such as are laid on others under like circumstances.

3. A Federal court will not, through principles of comity, hold its hand and leave the determination of the validity of a state statute to the state courts.

Decided August 21, 1898.

PETITION for a writ of habeas corpus to obtain the discharge of petitioner from the custody of the sheriff of Newberry county to which he had been committed for an alleged violation of the State Dispensary Act. *Petitioner discharged.*
The facts are stated in the opinion.

Messrs. Cothran, Cothran & Wells for petitioner.
Mr. D. A. Townsend, Atty. Gen., and *Mr. Ansel* for respondent.

Simonton, D. J., filed the following opinion:

This case comes up upon petition for habeas corpus, the writ, and the return thereto. The petition sets forth that the petitioner, a citizen of the United States and of the state of South Carolina, is the agent of the receivers of the Richmond & Danville Railroad at Prosperity, a town in South Carolina; that on the 14th of July, 1898, as such agent, he received by a regular train, over a railroad of the receivers, a keg of whisky consigned to A. A. Singley, a resident of said town, which keg, as shown by the way bill, was shipped from Pleasant Ridge, in North Carolina, to said town in South Carolina; that he delivered the keg to the consignee, and that soon thereafter he was arrested under a warrant issued by a trial justice of said state, charged with violating the provisions of an act of the legislature of South Carolina entitled "An Act to Prohibit the Manufacture and Sale of Intoxicating Liquors as a Beverage Within this State Except as Herein Provided;" and that he is yet in custody. The petition further shows that the delivery by him of the keg of whisky, as aforesaid, was made by him under and pursuant to the laws regulating commerce between states, and that the act of the legislature of the state under which he has been arrested and is held in custody is in conflict with said Interstate Commerce Law, and is null and void, so that his arrest is illegal. He prays his discharge from arrest. The return of the sheriff having him in custody admits that the petitioner is held for violation of the said act, by reason of the delivery of the keg of whisky as stated, and denies that the act is in conflict with the Interstate Commerce Law, and, on the contrary, avers that it comes within the provisions of the Act of Congress approved August 8, 1890, commonly known as the "Wilson Act." It further avers that the petitioner is in custody for trial in the courts of the state for a crime against the state, and that this court, in comity to the courts of the state, ought not to interfere herein until the said state courts have first passed upon the question involved in the case.

4 INTER S.

In *Cantini v. Tillman*, 54 Fed. Rep. 970, the alleged conflict of the dispensary act with the Constitution and laws of the United States was discussed, and the validity of the act was sustained. The opinion, however, expressly reserved any question as to the validity of this twenty-fifth section. The case at bar raises the issue on this section. The petitioner is in custody under the charge of violating section 25 of the act of the legislature referred to. This section is in these words:

"No person shall knowingly bring into this state, or knowingly transport from place to place within this state, by wagon, cart, or other vehicle, or by any other means or mode of carriage, any intoxicating liquors, with the intent to sell the same in this state in violation of law, or with intent that the same shall be sold by any person, or to aid any other person in such sale, under a penalty of \$500, and costs for each offense, and in addition thereto shall be imprisoned in the county jail for one year. In default of payment of said fine and costs, the party shall suffer an additional imprisonment of one year. Any servant, agent, or employé of any railroad corporation, or of any express company, or of any persons, corporations, or associations doing business in this state as common carriers, who shall remove any intoxicating liquors from any railroad car, vessel, or other vehicle of transportation, at any place other than the usual and established stations, wharves, depots, or places of business of such common carriers within some incorporated city or town, where there is a dispensary, or who shall aid in or consent to such removal, shall be subject to a penalty of \$50, and imprisonment for thirty days for every such offense: provided, that said penalty shall not apply to any liquor in transit, when changed from car to car to facilitate transportation. All such liquor intended for unlawful sale in this state may be seized in transit, and proceeded against as if it were unlawfully kept and deposited in any place. And any steamboat, sailing vessel, railroad, express company, or other corporation, knowingly transporting or bringing such liquor into the

state, shall be punished upon conviction by a fine of five hundred dollars and costs for each offense. Knowledge on the part of any authorized agent of such company shall be deemed knowledge of the company."

There can be no doubt that but for the passage of the Wilson Act the provisions of this section would be in conflict with the Interstate Commerce Law, and void. *Bowman v. Chicago & N. W. R. Co.* 125 U. S. 465, 31 L. ed. 700; *Leisy v. Hardin*, 3 Inters. Com. Rep. 38, 135 U. S. 100, 34 L. ed. 128. This last case induced the passage of the Wilson Act. Caldwell, J., in *Re Van Fleet*, 48 Fed. Rep. 766.

The Wilson Act is as follows:

"An Act to Limit the Effect of the Regulations of Commerce Between the Several States and with Foreign Countries in Certain Cases.

"That all fermented, distilled, or other intoxicating liquors or liquids, transported into any state or territory, or remaining therein for use, consumption, sale, or storage therein shall upon arrival in such state or territory be subject to the operation and effect of the laws of such state or territory enacted in the exercise of its police powers to the same extent and in the same manner as though such liquors or liquids had been produced in such state or territory and shall not be exempt therefrom by reason of being introduced therein in original packages or otherwise."

What were the interstate commerce regulations which were in existence at the passage of this Act, from which intoxicating liquors were by it exempted? This question is answered in the two cases quoted above. The first of these cases had declared that under the interstate commerce regulations the right to import intoxicating liquors into any state existed, and the second case declares that this right of importation involved the right to the importer to sell so long as the liquor remained in the original package; that therefore the police power of the state could not prevent the importation except under restrictions, nor forbid the sale of the importation by the importer so long as it remained in the original package. The Wilson Act put the imported package, whether in its original shape or otherwise, under the police power of the state, upon its arrival in such state, precisely as other intoxicating liquor in the state is subject to such police power.

What is the meaning of the term "upon its arrival?" The respondent insists that by this term is meant its entrance within the borders of the state. Thus it is a prohibition of the importation of intoxicating liquors into this state. That does not seem to be within the scope of the Wilson Act. It provides "for all fermented, distilled or other intoxicating liquors or liquids transported into any state," and declares them not exempt from the operation of the police laws by reason of being introduced therein in original packages or otherwise. It is clear that the Wilson Act deals with liquors after their introduction within the state, and therefore the word "arrival" cannot be construed to be at the border of the state. Goods "arrive" when they reach their destination. In the term is

involved a cessation of the transit. Goods shipped from Virginia to Alabama cannot be said to arrive in North Carolina, South Carolina, or Georgia. They "arrive" when they reach their destination in Alabama.

On the other hand, the petitioner contends that the Wilson Act does not subject the imported package to the operation of the police regulations of the state until the whole duty of the carrier has been performed; that the carrier does not perform his whole duty until the goods are delivered; that when the Act uses the expression, "upon arrival in such state," it means when the delivery by the carrier has been made. This position depends upon the construction to be given to this word "arrival." Words used in a statute, not technical in their character, must be taken in their ordinary signification. Persons and goods arrive when they reach their destination. It is proper to say that, after a man arrives at a city, he goes to his home therein, or to the home of a friend, or to his hotel. So goods, after "arrival" at their destination, are either delivered to the consignee after notice of arrival, or are held until the freight is paid, or C. O. D., or are stored. The money for the freight or the cash delivery cannot be demanded until the goods have arrived, and because of such arrival. If the freight be not paid, or if the cash on delivery be not produced, or the consignee be not known or do not appear, these cannot in any way affect the arrival of the goods, or permit us to say that they have not arrived. The delivery of goods is not an essential element of their arrival at their destination. Compare *Benjamin, Sales*, pp. 759, 760, §§ 878, 874. The same conclusion would appear in using the analogy of stoppage *in transitu*. This right of stoppage ends upon the delivery into possession of the consignor. Says *Benjamin, Sales*, p. 1070, § 1245: "The vendor's right of stoppage in transitu is very frequently not ended on their arrival at their ultimate destination, because of his retention of the property in them."

The package in question, upon its arrival at Prosperity, in South Carolina, came within the exercise of the police power of the state.

The next question is, is this 25th section of the act of assembly, December, 1892, a lawful exercise of the police power? Examining this section we find that it contains four distinct subdivisions: (1) No person shall knowingly bring into this state, or knowingly transport from place to place within the state, by wagon, cart, or other vehicle, or by any other means or mode of carriage, any intoxicating liquors, with intent to sell the same in this state in violation of law, or with intent that the same shall be sold by any other person, or aid any other person in such sale. (2) Any servant, agent, or employé of any railroad corporation, or of any express company, or of any persons, corporations, or associations doing business in this state as common carriers, who shall remove any intoxicating liquors from any railroad car, vessel, or other vehicle for transportation, at any place other than the usual and established stations, wharves, depots, or places of business of such common carriers,

within some incorporated city or town where there is a dispensary, or who shall aid in or consent to such removal, etc. (3) All such liquor intended for unlawful sale in this state may be seized in transit, and proceeded against as if it were deposited in any place. (4) Any steamboat, sailing vessel, railroad, express company, or other corporation knowingly transporting or bringing such liquor into the state, shall be punished, etc. Knowledge on the part of any authorized agent of such company shall be deemed knowledge of the company.

Thus, in every subdivision but the second above set forth, there must exist on the part of the person charged the knowledge that the intoxicating liquors were intended for sale. The liquors to be seized must be intended for sale. No private carrier or other person can offend this section if he does not know that the liquor is brought in for sale. The liquor cannot be seized in transit unless it is intended for sale. The company transporting the liquor into the state is punishable only when its authorized agent knows that it was intended for sale. This is in harmony with all the other parts of the act, the purport and purpose of which is to regulate the sale of intoxicating liquors. This is plainly shown in the first section:

"The manufacture, sale, barter, or exchange, or the keeping or offering for sale of any spirituous, malt, vinous, fermented or other intoxicating liquor or compound or mixtures thereof by whatever name called, which will produce intoxication by any person, business, firm, corporation or association, shall be regulated and conducted as provided in this act."

More than this, no criminality is attached to the person receiving from the common carrier the liquors mentioned in the second subdivision of this 25th section. But this second subdivision makes it a criminal offense for one special class of persons, servants, employes, and agents of a special class of common carriers, to remove from the car, etc., any intoxicating liquor whatever, without any sort of qualification. No knowledge on the part of such servant, agent, or employe that it is intoxicating liquor is required. Nor does it make any difference whether the liquor be intended for sale, personal use, or consumption in any other way. None of the safeguards thrown around every other criminal offense exists. The only qualification is that the city or town in which the package is has no dispensary. This is discrimination,—the separation of a class from the whole community, and singling it out for prosecution and punishment. It is the class on whom interstate commerce largely depends, without whom it cannot be conducted. And if we are permitted to infer from the words of the act the motive for this discrimination, the natural inference would be that it is intended to prevent any possible chance of competition with dispensaries elsewhere

4 INTER 8.

established; and intention sought to be perfected, not by punishing all persons connected with the act,—the importer and the consumer,—but confining the crime and the punishment to this one class; creating for this special class a new crime. If this be assumed to have been done in the exercise of the police power, it will be difficult to sustain it. The Wilson Act created no new power in the states. It professed to do no more than to limit the regulations of interstate commerce. But the most broad and liberal construction of the Act would not permit a state, under the guise of the policy power, to single out and punish the agents of interstate commerce for a crime specially created for them, in the teeth of the 14th Amendment to the Constitution of the United States.

It is extremely difficult, if not impossible, to give an exact definition of, and to describe the limits of, the police power. It is clear, however, the legislature of a state cannot assume the exercise of the police power in a way forbidden by the constitution of the state. The constitution of South Carolina (article 1, § 12) provides "no person shall . . . be liable to any other punishment for any offense, or be subjected in law to any other restraints or disqualifications in regard to any personal rights than such as are laid upon others under like circumstances." This limits the power of the legislature, and prevents this provision of the act of 1892, known as the "Dispensary Act," from being an exercise of the police power. This being so, the provisions of the 25th section under this act contravene the Interstate Commerce Law and the 14th Amendment (*Leeper v. Texas*, 139 U. S. 468, 35 L. ed. 225; *Bowman v. Lewis* ("Missouri v. Lewis") 101 U. S. 22, 25 L. ed. 999) and are null and void. The arrest of the petitioner, based on these provisions, is void.

The return suggests that comity between the courts should induce this court to hold its hand, and leave the determination of the questions involved in this case to the state courts. It is the duty of a judge, when relief is sought before him in a matter within his jurisdiction, speedily to hear the plaintiff, and, if the party is entitled to the relief, to give it. He cannot shift from his shoulders the responsibilities of his judicial function, and impose them upon another. Strong as the temptation is, and agreeable as it would be, to do so, he cannot do it without loss of self respect. Besides this, both parties to this controversy desire a speedy solution of it. The public interest demands that the legal questions arising in, we may say impeding, this grave and interesting experiment of the dispensary act, be shortly settled. An appeal from this court lies directly to the Supreme Court. A final decree of the tribunal of last resort is very near at hand.

It is ordered that the defendant be released from custody.

UNITED STATES CIRCUIT COURT, WESTERN DISTRICT OF TEXAS.

LOLA HOUCK v. SOUTHERN PAC. R. CO.

(See S. C. 38 Fed. Rep. 226.)

*A railway company, in the management of its complicated interests, may be authorized in law, —on showing a proper or sufficient state of facts, to establish in the opinion of the court the reasonableness of the rule,—in setting apart one or more cars for the use exclusively of colored passengers, and a like number, more or less, as the

service may require, for the use exclusively of white passengers; but whenever the company enforces such a rule the company is charged with the duty of furnishing to colored people who pay first class fare cars to ride in that are as safe and comfortable in their conditions and appointments as the cars furnished to white passengers who pay first class fare.

*Head note by the court.

Decided Nov. 16, 1888.

ACTION for personal injuries. Judgment for plaintiff, and defendant moves for new trial. At law. On motion for a new trial.

Messrs. Wheeler & Rhodes and Labatt & Nobles for plaintiff.
Messrs. Waul & Walker for defendant.

Boorman, J., delivered the opinion of the court:

Plaintiff claims damages in the sum of \$7500 against defendant railway company for personal injury to Mrs. Houck. The undisputed evidence in the case shows that Mrs. Houck is a young married woman with some degree of negro blood in her veins; that casually looking at her or her husband it would be difficult to distinguish either of them from white persons; that she is a graduate of one of the high schools in Texas, where colored persons are educated for school teaching, and she and her husband were known at their home, Victoria, Tex., as respectable colored people; that she was, at the time mentioned in her petition, to some extent pregnant, but otherwise in good health; that, having received a telegram stating that her infant child was very sick at the home of her mother in Galveston, she, anxious to see and be with her child, purchased at Victoria a ticket over defendant's line of railway, which entitled her to first class passage from Victoria to Rosenberg—about 90 miles; that the train which she entered at Victoria had but two passenger cars in it; one of them, the rear car, was set apart by the rules of the company for the accommodation, exclusively, of white people; the other, the front car, was known in Texas as the "Jim Crow-Car," and was for the use of colored people, though white people often rode in it. It was a combination, or compartment car, and was divided, unevenly as to length, into two divisions, which were separated by a partition with a doorway connecting the compartments. In one of these compartments, passengers, white or colored, were allowed to smoke; in the other compartment, smoking was forbidden by the rules, though these

rules were often violated. The seats in the smoking division were inferior, uncushioned seats; those in the other division were good seats. Mrs. Houck, having purchased her ticket at Victoria, went upon the platform of the rear car to go inside of it, when the brakeman, meeting her at the door, forbade and denied her entrance thereto. He shut the door in her face, and locked it from the inside, and, holding the keys up against the door glass, told her that he was inside and she was outside, and she could not come in because she was a negro. She remained on the platform, riding several miles, when the conductor came along and took up her ticket. He refused to allow her to go in the rear car, and told her to go into the first car, because the rules did not allow negroes to ride in the rear car, and, fearing she would follow him if he opened the door, passed his punch through a window in to the brakeman, and directed him to take up the tickets, collect fares, etc.; then, going to the front, he left her on the platform. When the train reached the next stopping place the brakeman, keeping the front door locked against Mrs. Houck, took some passengers who wanted to enter the rear car around to the back door, to let them in. She followed them to the back door, thinking she could enter with them; but, on reaching the rear platform and attempting to go in the car, she was again prevented and kept out of it by the brakeman. The train starting before she had time to go back to the front platform of the car, she remained on the rear platform until the train reached the next station, when she went back to the front of the car, and endeavored again in vain to get inside. There were a number of unoccupied seats in the rear car, and she had previously ridden in the rear car of the train, or one

reserved for white people by the company on the defendant's line; and she has since then ridden there without any question. When she went on the platform at Victoria she put a pot of plants or flowers on it, and when she returned from her ride on the rear platform, she asked the brakeman for it, and he said he had thrown it overboard, and spoke roughly to her. She, refusing to go in the "Jim Crow Car," rode on the platform until the train reached Rosenberg. It was an ugly, rainy September day, and she got wet while on the platform. The conductor said she acted "very ladylike" all the time. This summary statement so far makes up the uncontradicted facts. Mrs. Houck, in her own evidence, says the brakeman during the time talked very roughly to her without any provocation; that he several times called the attention of men about the train to the fact that he had a negro riding on the platform; that one or more white people took her part and remonstrated with the brakeman for treating her so rudely; that the front car had a rough lot of white and colored people in it, and some of them were boisterous and drinking; that the attention of those people had been directed to her by the language and acts of the brakeman, and she was afraid to go in among them; that the brakeman, when he kept her from entering the rear door of the rear car, pushed her, and she fell against the wheel of the brake, and but for her holding to the wheel she would have been thrown to the ground; that the brakeman, in pushing her, tore her dress in his effort to push her from the door. The brakeman denies these statements of Mrs. Houck. He said that when she had traveled before with him he did not know she was a negro, and he only knew she was a colored woman after the bootblack on the train told him about her being a colored woman. The statements of Mrs. Houck as to the brakeman calling attention of men about or in the cars to the fact that he had a negro riding on the platform; that her dress was torn; that white passengers remonstrated with the brakeman,—are corroborated by a white passenger on the train with her.

The defendant contends that the evidence shows that the front car, which was set apart by the company for colored people was as safe, and was substantially equal in its conditions to the rear car, to which she was denied entrance. These recitals make up the issues of law and fact. In accordance with the contention of defendant's counsel, the court charged the jury that a common carrier—a railway company—may or might be, under a proper showing of facts, justified and authorized in law, in the management of its complicated interests, in setting apart one or more coaches for the use exclusively of white people, and to set apart other cars for the use exclusively of colored people; but when the management undertakes to carry out such a rule it is charged with the duty of giving or furnishing to the colored passenger who pays first class fare over the line a car to ride in, as safe, and substantially as inviting, to travel in, as it (the management) furnishes to white passengers. The defense having shown some facts in rela-

4 INTER S.

tion to the population along the railway, and as to the kind and character of persons who often become passengers on their trains, which were thought by the court to be sufficient to authorize the management to require by its rules that the rear car, or one of the cars in the train should be kept exclusively for white people, the jury were directed to consider, for the purpose of this case, that the defendant company was justified in law in the enforcement of such a rule, and the plaintiff cannot complain of any injury coming to her because she was denied entrance to the rear car, provided that it was shown satisfactorily to them that the car into which Mrs. Houck was told to go by the conductor was as safe and substantially as comfortable in its conditions as the car to which she was denied admission. Having so advised the jury, the issue of fact disclosed by the evidence as to the relative comfort of the two cars,—the rear and front one,—was submitted to them. They were charged if they found against defendant company on that issue, they should find for the plaintiff in such a sum as will repair the injuries which came to Mrs. Houck in consequence, proximately, of the defendant's wrongful acts.

Counsel for plaintiff contended that the facts showed that the sickness, which confined Mrs. Houck to her bed for some weeks, was caused by the wrongful acts of the company's officers on the train. The court directed the jurors' attention to this contention of plaintiff's counsel, and charged them that they should hold defendant liable only for such injuries sustained by Mrs. Houck as came to her in consequence of the rude and wrongful acts of the brakeman and that they should not charge defendant with any injury or sickness which was caused by her riding or being exposed on the platform for so long a distance, because, if she remained on the platform in the rain, and became sick in consequence thereof, she, by her own negligence in not going to a better place for protection against the rain and weather, was at fault; that if the miscarriage and illness was caused, not by the mental irritation, humiliations, annoyances, and rude acts caused by the faults and wrongs of the brakeman, but by the physical discomforts and fatigue which her ride, unseated, on the platform, gave her, she could not recover for the injury inherent in the illness or the miscarriage.

This presentation of the case shows two issues of fact. The jury by their verdict are shown to have decided both of these issues in favor of plaintiff. They gave plaintiff \$5000 damages—\$2000 for punitive damages, and \$3000 for actual damages. The evidence in the case impressed me with the thought that the car in which Mrs. Houck was directed to ride was in itself nothing like as comfortable to ride in as the car kept exclusively for white people, and that the "Jim Crow Car" was occupied by boisterous passengers, both white and colored, who were smoking and drinking, as is usually the case in such cars, and was in no way as inviting to travel in as the rear car, to which plaintiff was denied entrance,—notwithstanding the ticket agent, knowing her to be a colored

woman, had sold her a first class ticket,—because she was a negro. I thought the evidence unquestionably showed that the brakeman treated plaintiff, who “acted all the time in a lady-like manner,” rudely and wrongfully, and, in some degree, maliciously. But I do not think the jury were warranted by the facts in allowing \$3000 for actual damages, because it was not at all clear that the miscarriage or illness was of a serious nature; nor was it made sufficiently clear that either the miscarriage or illness came to Mrs. Houck proximately in consequence of the acts of the brakeman, or of the conductor, in denying her admission to the rear car. It

was shown by the defendant's testimony that the brakeman was not discharged because of his rude treatment of plaintiff; but, on the contrary, he was promoted by the railway company to a higher place in the service. The company did not deny that the rear car was set apart exclusively for white passengers, and admitted that the brakeman was acting under orders when he excluded Mrs. Houck from the rear car because she was a negro. I shall now refuse a new trial, but will grant one in case the plaintiff within 10 days does not enter a *remittitur* of \$2500 in the item for actual damages.

UNITED STATES CIRCUIT COURT OF APPEALS, EIGHTH CIRCUIT.

UNITED STATES, *Appt.*,

v.

TRANS-MISSOURI FREIGHT ASSOCIATION ET AL.

(58 Fed. Rep. 58.)

1. A statute must be read in the light of all general laws upon the same subject in force at the time of its passage.
2. Words which have acquired a well understood meaning by judicial interpretation must be presumed to be used in that sense in a subsequent statute, unless the contrary clearly appears.
3. Common law terms used in an Act of Congress creating an offense without defining the terms may be interpreted by the common law.
4. Contracts between carriers are not necessarily invalid because they incidentally restrict competition, but this depends upon their reasonableness.
5. An alleged violation of the Anti-Trust Act of Congress must be clearly within its provisions, as the statute is a criminal one.
6. Fraud and illegality in contracts are not to be presumed.
7. An association of railroad companies for mutual protection by establishing and maintaining reasonable rates, rules and regulations is not illegal as a restraint of trade, under the Anti-Trust

Act of Congress, merely because it incidentally tends to restrict competition in some degree, where each member of the association must still compete with other members for business, and while regular monthly meetings are provided for, at which action may be taken, five days' notice of any proposed reduction of rates or change of rules must be given, and members are bound by the decision of the association, unless they give written notice in ten days thereafter to the contrary, and any member may withdraw on thirty days' notice.

8. An association of railroad companies cannot be held to create a monopoly, within the meaning of the Anti-Trust Act of Congress, where it is not intended to have any trade of its own, but to be a mere adviser of its members, who are competitors of each other.
9. A contract between competing railroad companies is not necessarily “in restraint of trade” and illegal, within the meaning of the Anti-Trust Act of Congress, because it in some manner imposes a restriction upon competition.

Decided October 2, 1898.

APPPEAL by plaintiff from a decree of the Circuit Court of the United States for the District of Kansas in favor of defendants in a proceeding to dissolve the Trans-Missouri Freight Association on the ground that it violated the United States Anti-Trust Act. *Affirmed.*

Statement by **Sanborn, C. J.**:

This is an appeal from a decree of the circuit court dismissing a bill brought by the United States, against the Trans-Missouri Freight Association and eighteen railroad companies, under the provisions of the Act of Congress of July 2, 1890, entitled “An Act to Protect Trade and Commerce Against Unlawful Restraints and Monopolies,” commonly known as the “Sherman Anti-Trust Act” (26 Stat. at L. 209, chap. 647; Rev. Stat. Supp. 762) to dissolve the association, and enjoin the railroad companies from fulfilling an agreement with each other to have and maintain joint rules, regulations, and rates for carrying freight between competing points upon their several roads. The case was heard on the bill and the answers of the several defendants.

4 INTER 8.

The bill alleges that the defendant rail-

road companies were corporations and common carriers, and that they owned independent and competing lines of railroad in that part of the United States west of the Mississippi and Missouri rivers; that they were engaged in transporting freight among the states and to and from foreign nations, and that they had been encouraged to construct and maintain these competing lines of railroad independent of each other by subsidies and grants of lands from the United States and the people of the states and territories west of these great rivers. The bill then alleges that, not being content with the rates of freight they were receiving, intending oppressively to augment those rates, to counteract the effect of free competition upon them, to establish and maintain arbitrary rates, and to procure large sums of money from the people of those states and territories engaged in interstate commerce, they entered into an agreement on March 15, 1889, which, as subsequently modified, reads thus:

"Memorandum of agreement, made and entered into this fifteenth day of March, 1889, by and between the following railroad companies, viz: Atchison, Topeka & Santa Fé Railroad, Chicago, Rock Island & Pacific Railway, Chicago, St. Paul, Minneapolis & Omaha Railway, Burlington & Missouri River Railroad in Nebraska, Denver & Rio Grande Railroad, Denver & Rio Grande Western Railway, Fremont, Elkhorn & Missouri Valley Railroad, Kansas City, Ft. Scott & Memphis Railroad, Kansas City, St. Joseph & Council Bluffs Railroad, Missouri Pacific Railway, Sioux City & Pacific Railroad, St. Joseph & Grand Island Railroad, St. Louis & San Francisco Railway, Union Pacific Railway, Utah Central Railway, and such other companies as may hereafter become parties hereto. Witnesseth, for the purpose of mutual protection, by establishing and maintaining reasonable rates, rules, and regulations on all freight traffic, both through and local, the subscribers do hereby form an association, to be known as the Trans-Missouri Freight Association, and agree to be governed by the following provisions:

"Article I.

"The traffic to be included in the Trans-Missouri Freight Association shall be as follows:

"1. All traffic competitive between any two or more members hereof passing between points in the following described territory, commencing at the Gulf of Mexico, on the 95th meridian; thence north to the Red river; thence *via* that river to the eastern boundary line of the Indian territory; thence north by said boundary line and the eastern line of the state of Kansas to the Missouri river, at Kansas City; thence *via* the said Missouri river to the point of intersection of that river with the eastern boundary of Montana; thence *via* the said eastern boundary line to the international line, —the foregoing to be known as the 'Missouri River Line;' thence *via* said international line to the Pacific coast; thence *via* the Pacific coast to the international line between the United States and Mexico; thence

via said international line to the Gulf of Mexico, and thence *via* said Gulf to the point of beginning, including business between points on the boundary line as described.

"2. All freight traffic originating within the territory as defined in the first section when destined to points east of the aforesaid Missouri river line.

"Exceptions.

"(a) The D. & R. G. and the D. & R. G. W., except their business to and from points in Colorado west of the D. & R. G. line between Denver and Trinidad; also business *via* their lines between points in Colorado and points in Utah.

"All local business between Denver and Trinidad and intermediate points; all local business of the A., T. & S. F. between Pueblo and Canon City, Colo.; all stone traffic having both origin and destination within the state of Colorado.

"The jurisdiction of this association, in so far as the business of the Denver & Rio Grande and the Denver & Rio Grande Western railway companies is concerned, covers the following traffic, namely:

"All freight traffic to, from, or through all common or junction points in the states of Nebraska and Kansas and the Indian territory, originating at or destined to Denver, Colorado Springs, Pueblo, or Trinidad.

"All freight traffic between Ogden, Spanish Fork, and intermediate points on the one hand, and to, from, or through points in Kansas or Nebraska upon or east of the 103d meridian, on the other hand.

"Traffic which may be excluded under the application of the above is only such as may be delivered to or received from the Denver & Rio Grande Railroad and Denver & Rio Grande Western Railway.

"(b) Traffic included in the Trans-Continental & International Association.

"(c) Traffic passing between points in Kansas or Nebraska and Mississippi river points, Carondelet and south; also traffic passing between points in Kansas or Nebraska and points in the southern states east of the Mississippi river and south of the south line of Kentucky and Virginia, regardless of the route by which the business crosses the Mississippi or Ohio rivers.

"(d) Traffic passing between Missouri river points and points in the territory east of said river.

"(e) All traffic to points on the Northern Pacific and Manitoba railways.

"(f) Traffic to points in Arkansas.

"(g) Coal, stone and gravel from Colorado, Wyoming and Dakota, to points in Kansas and Nebraska, and to Sioux City, Council Bluffs, or Pacific Junction, Iowa, St. Joseph, Kansas City, or Boswell, Mo.

"(h) The interchange of traffic with the Colorado Midland and South Park Companies, to or from Aspen, Colorado, Glenwood Springs, Colorado, and intermediate points, including coal branches therefrom, and Buena Vista, Colorado, and Leadville, Colorado.

"(i) Business to and from Florence, Colorado, by all lines.

"Article II.

"Sec. 1. The association shall, by unanimous vote, elect a chairman of the organization. The chairman may be removed by a two thirds vote of the members.

"Sec. 2. There shall be regular meetings of the association at Kansas City, unless notice shall be given by the chairman that the business to be transacted does not warrant calling the members together, which notice shall be given not less than four days before the day set for the meeting. When a meeting, regular or special, is convened, it shall be incumbent upon each party hereto to be represented by some officer authorized to act definitely upon any and all questions to be considered. Each road shall designate to the chairman one person who shall be held personally responsible for rates on that road. Such person shall be present at all regular meetings when possible, and shall represent his road, unless a superior officer is present. If unable to attend, he shall send a substitute, with written authority to act upon all questions which may arise, and the vote of such substitute shall be binding upon the company he represents.

"Sec. 3. A committee shall be appointed to establish rates, rules, and regulations on the traffic subject to this association, and to consider changes therein, and make rules for meeting the competition of outside lines. Their conclusions, when unanimous, shall be made effective when they so order; but if they differ the question at issue shall be referred to the managers of the lines parties hereto, and if they disagree it shall be arbitrated in the manner provided in article 7.

"Sec. 4. At least five days' written notice prior to each monthly meeting shall be given the chairman of any proposed reduction in rates, or change in any rule or regulation governing freight traffic; eight days in so far as applicable to the traffic of Colorado or Utah.

"Sec. 5. At each monthly meeting the association shall consider and vote upon all changes proposed of which due notice has been given, and all parties shall be bound by the decision of the association so expressed, unless then and there the parties shall give the association definite written notice that in ten days thereafter they shall make such modification, notwithstanding the vote of the association: provided, that, if the member giving notice of the change shall fail to be represented at the meeting, no action shall be taken on its notice, and the same shall be considered withdrawn. Should any member insist upon a reduction of rate against the views of the majority, or if the majority favor the same, and if, in the judgment of said majority, the rate so made affects seriously the rates upon other traffic, then the association may, by a majority vote upon such other traffic, put into effect corresponding rates, to take effect upon the same day. By unanimous consent any rate, rule, or regulation relating to freight traffic may be modified at any meeting of the association without previous notice.

"Sec. 6. Notwithstanding anything in this

article contained, each member may, at its peril, make at any time, without previous notice, such rate, rule, or regulation as may be necessary to meet the competition of lines not members of the association, giving at the same time notice to the chairman of its action in the premises. If the chairman upon investigation shall decide that such rate is not necessary to meet the direct competition of lines not members of the association, and shall so notify the road making the rate, it shall immediately withdraw such rate. At the next meeting of the association held after the making of such rate it shall be reported to the association, and, if the association shall decide by a two thirds vote that such rate was not made in good faith to meet such competition, the member offending shall be subject to the penalty provided in section 8 of this article. If the association shall decide by a two thirds vote that such rate was made in good faith to meet such competition, it shall be considered as authority for the rate so made.

"Sec. 7. All arrangements with connecting lines for the division of through rates relating to traffic covered by this agreement shall be made by authority of the association: provided, however, that when one road has a proprietary interest in another the divisions between such roads shall be what they may elect, and shall not be the property of the association: provided, further, that, as regards traffic contracts at this date actually existing between lines not having common proprietary interests, the same shall be reported, so far as divisions are concerned, to the association, to the end that divisions with competing lines may, if thought advisable by them, be made on equally favorable terms.

"Sec. 8. It shall be the duty of the chairman to investigate all apparent violations of the agreement, and to report his findings to the managers, who shall determine by a majority vote (the member against whom complaint is made to have no vote) what, if any, penalty shall be assessed, the amount of each fine, not to exceed one hundred dollars, to be paid to the association. If any line party hereto agrees with a shipper, or any one else, to secure a reduction or change in rates, or change in the rules or regulations, and it is shown upon investigation by the chairman that such an arrangement was effected, and traffic thereby secured, such action shall be reported to the managers, who shall determine, as above provided, what, if any, penalty shall be assessed.

"Sec. 9. When a penalty shall have been declared against any member of this association, the chairman shall notify the managing officer of said company that such fine has been assessed, and that within ten days thereafter he will draw for the amount of the fine; and the draft, when presented, shall be honored by the company thus assessed.

"Sec. 10. All fines collected to be used to defray the expenses of the association, the offending party not to be benefited by the amounts it may pay as fines.

"Sec. 11. Any member not present or fully represented at roll call of general or special meetings of the freight association, of which

due and proper notice has been given, shall be fined one dollar, to be assessed against his company, unless he shall have previously filed with the chairman notice of inability to be present or represented.

"Article III.

"The duties and powers of the chairman shall be as follows:

"Section 1. He shall preside at all meetings of the association, and make and keep a record thereof, and promulgate such of said proceedings as may be necessary to inform the parties hereto of the action taken by the association.

"Sec. 2. He shall at all times keep and publish for the use of the members a full record of the rates, rules, and regulations prevailing on all lines parties hereto on business covered by this agreement, and each of the parties hereto agrees to furnish such number of copies of the rates, rules, and regulations issued by it as the chairman may require.

"Sec. 3. He shall construe this agreement and all resolutions adopted thereunder, his construction to be binding until changed by a majority vote of the association.

"Sec. 4. He shall publish in joint form all rates, rules, or regulations which are general in their character and apply throughout the territory of the association, and shall also publish in the manner above such rates, rules, or regulations applying on traffic common to two or more lines as may be agreed upon by the lines in interest.

"Sec. 5. He shall be furnished with copies of all waybills for freight carried under this agreement when called for, and shall furnish such statistics as may be necessary to give members general information as to the traffic moved, subject to the provisions of the Interstate Commerce Railway Association agreement as to lines members thereof.

"Sec. 6. He shall render to each member of the association monthly statements of the expenses of the association, showing the proportions due from each, and shall make drafts on members for the different amounts thus shown to be due.

"Sec. 7. He shall hear and determine all charges of violations of this agreement, and assess, collect, and dispose of the fines for such violations as provided for herein.

"Sec. 8. The chairman shall be empowered to authorize lines in the association to meet the rates of another line or other lines in the association when in his judgment such action is justified by the circumstances; this, however, not to act in any way as an indorsement of an unauthorized rate made by any member.

"Sec. 9. Only parties interested shall vote upon questions arising under the agreement, and in case of doubt the chairman shall decide as to whether any party is so interested or not, subject to appeal, as provided by section 8 of article 8 of the agreement.

"Article IV.

"Any willful under billing in weights or billing of freight at wrong classification shall be considered a violation of this agreement.

ment, and the rules and regulations of any weighing association or inspection bureau as established by it, or as enforced by its officers and agents, shall be considered binding under the provisions of this agreement, and any willful violation of them shall be subject to the penalties provided herein.

"Article V.

"The expenses of the association shall be borne by the several parties in such proportion as may be fixed by the chairman. Any member not satisfied with the allotment so made may appeal to the association, which shall, at its first regular meeting thereafter, determine the matter, which may be done by a two thirds vote of the members.

"Article VI.

"There shall be an executive committee of three members, to be elected by unanimous vote. The committee shall approve the appointment and salaries of necessary employees, except that of the chairman, and authorize all disbursements. All action of this committee shall be unanimous.

"Article VII.

"In case the managers of the lines parties hereto fail to agree upon any question arising under this agreement that shall be brought before the association, it shall be referred to an arbitration board, which shall consist of three members of the executive board of the Interstate Commerce Railway Association: provided, however, that, in case of arbitration in which the members of this association only are interested, they may, by unanimous vote, substitute a special board.

"Article VIII.

"This agreement shall take effect April 1, 1889, subject thereafter to thirty days' notice of a desire on the part of any line to withdraw from or amend the same."

The bill further alleges that this agreement took effect April 15, 1889; that under it rules, regulations, and rates for carrying freight over the railroads of the defendant companies were fixed by the association, and have since been maintained by them; that since that date these railroad companies have declined and refused at all times to fix or give rates for the carriage of freight based upon the cost of constructing and maintaining their several lines of railroad and the cost of carrying freights over the same, and such other elements as should be considered in establishing tariff rates upon each particular road; and that the people engaged in interstate commerce have been compelled to pay the arbitrary rates of freight, and to submit to the arbitrary rules and regulations established and maintained by the association formed under the agreement, and have been and are deprived of the benefits that might be expected to flow from free competition between the several lines of railroad of the defendant companies, and that in this way the defendant companies have combined in restraint of trade and commerce among the states, and have attempted to monopolize, and have monopolized, a part of this commerce.

Three of the railroad companies were not

members of the association, and will not be further noticed. The answers of the 15 companies who were members of the association are substantially the same. The first defense in these answers is that the Interstate Commerce Law of February 4, 1887, entitled "An Act to Regulate Commerce" (24 Stat. at L. 379, chap. 104; Rev. Stat. Supp. 529) and the acts amendatory thereof, constitute a complete code of laws regulating that part of commerce among the states and with foreign nations which relates to transportation, and that the Act of July 2, 1890, is not applicable to, and does not govern, them or their actions.

Coming to the merits of the suit, these defendants admit that they are common carriers; that, with some exceptions not important here, they owned independent and competing lines of railroad in that part of the United States west of the Missouri and Mississippi rivers, and that they were engaged in the transportation of freight among the states and territories, and to and from foreign nations, in that region, but they deny that they owned the only through lines of railroad engaged in that business there; and allege that there were several others, to wit, the Northern Pacific Railroad Company, the Great Northern Railway Company, the Southern Pacific Railroad Company, and the Texas Pacific Railroad Company. They admit that some of them were assisted and encouraged to construct and maintain through competing lines of railroad, independent of each other, by subsidies, land grants, and donations from the United States, and from the people of the various states and territories west of the great rivers. They admit that they entered into the agreement March 15, 1889, and that rules, regulations, and rates of freight have since been fixed and charged by the association thus formed, and that they have complied with and maintained them. They deny, however, that at the time they entered into the agreement they were dissatisfied with the rates of freight they were receiving. They deny that they intended, in connection with the formation of the association or otherwise, to unjustly or oppressively augment such rates, or to counteract the effect of free competition on prices or facilities of transportation, or to establish or to maintain arbitrary rates, or to prevent any one of the defendants from reducing rates, or to procure unreasonably great sums of money from the people of the states and territories west of the great rivers engaged in interstate commerce. They deny that the formation and operations of the association have had any such effects, but aver that they have tended to decrease rates, and to benefit the people and the roads. They deny that they had any intention by the formation of the association to monopolize or attempt to monopolize the freight traffic of the region affected by it, and deny that it has had any such effect. They allege that they were subject to the provisions of the Act of Congress of February 4, 1887, entitled, "An Act to Regulate Commerce," and the acts amendatory thereof. They aver that under that Act they were required to make all charges reasonable and just; that they

were prohibited from making any unjust discriminations, or any undue or unreasonable preferences, or from giving any undue advantages, and that they were required to establish a classification of freight and rates of freight, and to publish and file with the Interstate Commerce Commission schedules showing this classification and these rates, and then to abide by and maintain them; that, in order to comply with this law, consultation between and concerted action of the railroad companies conducting the transportation business west of the great rivers was essential; and that they made this agreement and formed this association in order that they might more effectually comply with the provisions of this law than they could do acting independently. They allege that the rates they have established and maintained have been reasonable and just; that since the organization of the association more than 200 reductions of rates have been made through its action; that their agreement forming the association was filed with the Interstate Commerce Commission under the Act, and that the rules, regulations, and rates they have established and maintained have been in strict conformity to the provisions thereof. They deny that the people have been deprived of the benefits which might be expected to flow from free competition in the business of transportation, and allege that the utmost freedom compatible with obedience to the Interstate Commerce Act and with the preservation of the existing agencies of competition prevails, and they insist that their association and action under this contract constitute no combination or conspiracy in restraint of interstate or international commerce.

The opinion filed by the court below when the bill was dismissed is reported in 53 Fed. Rep. 440.

Argued before **Sanborn**, Circuit Judge, and **Shiras** and **Thayer**, District Judges.

Mr. J. W. Ady for appellant.

Mr. George R. Peck, for appellees:

I. The Act of July 2, 1890, commonly called the Anti-Trust Act, does not include, and was not intended to include, combination or agreements between railway companies. The provisions of the Act operate, and were intended to operate, upon other and different combinations, and have no application to agreements or combinations between railway companies.

The Act itself does not assume to deal with transportation or with the carrying trade of the country.

A comparison of the different provisions of the Act, shows that the idea that railway combinations are included in it, cannot for one moment be entertained.

All statutes are read in the light of history.

Church of Holy Trinity v. United States, 148 U. S. 457, 36 L. ed. 227.

When the Act under which this suit is brought was passed, the public mind was in an agitated and excited state on the subject of trusts. When the Fifty-first Congress met in December, 1889, a great number of trusts ex-

isted, some small and some large, some local and some national,—and even international.

So far as congressional regulation of railways was concerned it was a time of profound peace. The people had already demanded a law upon that subject and had obtained it. The subject of Congressional Railway Legislation had had its day; the Interstate Commerce Act had been passed and all of its provisions were in active operation.

Historically considered, trusts were the evils specially in mind when Congress passed the Act under consideration.

Traffic associations were well known, both when the Interstate Commerce Act was passed and when the Anti-Trust Act was passed.

In the very first annual report of the Interstate Commerce Commission, an elaborately prepared official document, the Commission, with all the facts before it, had spoken in high commendation of traffic associations.

With this report, before Congress, is it possible to believe that they intended by the Anti-Trust Act to prohibit traffic associations—the very instrumentalities upon which the Interstate Commerce Commission relied for assistance in carrying on its great work?

Congress positively refused to include transportation.

An amendment was introduced in the House of Representatives specifically including transportation, and it was rejected, as shown by the Congressional record which the court can examine.

Blake v. National City Bank of New York, 90 U. S. 28 Wall. 307, 23 L. ed. 119. See Cong. Rec. vol. 21, part 1, p. 96; Cong. Rec. vol. 21, part 4, p. 3153; Cong. Rec. vol. 21, part 4, p. 3857; Cong. Rec. vol. 21, part 5, p. 4099; Cong. Rec. vol. 21, part 5, p. 4104; Cong. Rec. vol. 21, part 5, p. 4123; Cong. Rec. vol. 21, part 5, p. 4753; Cong. Rec. vol. 21, part 5, p. 4857; Cong. Rec. vol. 21, part 6, p. 5113; Cong. Rec. vol. 21, part 6, p. 5950; Cong. Rec. vol. 21, part 6, p. 5981; Cong. Rec. vol. 21, part 7, p. 6116; Cong. Rec. vol. 21, part 7, p. 6208; Cong. Rec. vol. 21, part 7, p. 6812.

Taken as a whole, the Interstate Commerce Act is special and regulative, while the Anti-Trust Act is general and prohibitive.

The penalties, the procedure, the entire machinery by which the two acts are enforced is so different as to make it impossible that they were intended to cover the same subject.

Where a statute in general words is compared with a statute which is special or particular, the general gives way to the special and will not be held to embrace the subject contained in the special statute unless the intention that it should be so is clearly manifested.

Endlich, *Interpretation of Statutes*, § 225; Bishop, *Written Laws*, § 126; *Brewer v. Blougher*, 39 U. S. 14 Pet. 178, 10 L. ed. 408; *Atkins v. Fiber Disintegrating Co.* 85 U. S. 18 Wall. 272, 21 L. ed. 841; *United States v. Saunders*, 89 U. S. 22 Wall. 492, 22 L. ed. 786; *Townsend v. Little*, 109 U. S. 504, 27 L. ed. 1012.

II. The agreement of March 15, 1889, between the defendants is neither a "contract, combination in the form of trust or otherwise,

or conspiracy in restraint of trade or commerce among the several states," nor by virtue of it do the defendants "monopolize, or attempt to monopolize, or combine or conspire with any other person or persons to monopolize any part of the trade or commerce among the several states." The agreement, therefore, is not a violation of the Act of July 2, 1890.

Whatever in the way of restraint of trade or commerce, or of monopolizing, is illegal at the common law, is illegal under this statute, and not otherwise.

Patterson, Contracts in Restraint of Trade, 52, 53.

Restraint of trade, at the common law, meant that restriction upon freedom of action which, first, deprived the public of the restricted party's industry, and, secondly, precluded the restricted party from pursuing his occupation, and thus prevented him from supporting himself and family.

Oregon Steam Nav. Co. v. Winsor, 87 U. S. 20 Wall. 64, 22 L. ed. 815.

A monopoly was originally a grant by the crown to certain persons or corporations of the exclusive right to carry on some business, trade or avocation.

The Monopolies, 11 Coke, 84 b.

Monopoly, at the present day, simply means the obtaining, without a grant from the sovereign, of the exclusive power to carry on a certain trade or business.

Is the Trans-Missouri Association an organization in restraint of trade or commerce? An indispensable element of restraint of trade, in its proper legal sense, is that one or more of the parties to the contract must agree to go out of business, and surrender that which before belonged to him or them to the other parties making the agreement.

The contract between the defendants, constituting the Trans-Missouri Freight Association, is clearly not within the section of the Act which prohibits restraint of trade.

Mitchell v. Reynolds, 1 P. Wms. 181, 192. 197; *Oregon Steam Nav. Co. v. Winsor*, 87 U. S. 20 Wall. 64, 22 L. ed. 815.

The Anti-Trust Act does not forbid contracts and combinations merely on the ground that they are against public policy, but only such as are in restraint of trade or which monopolize or attempt to monopolize.

The phrase "public policy" can only mean the settled policy of a state or government which appears in its constitution, laws and judicial decisions.

Richardson v. Mellish, 2 Bing. 229, 252; *Mogul S.S. Co. v. McGregor* [1892] 3 App. Cas. 25, 45, 46; *Vidal v. Philadelphia*, 43 U. S. 20 How. 127, 11 L. ed. 205; *Hadden v. Barney*, 72 U. S. 5 Wall. 107, 18 L. ed. 518.

If the statute has not been violated by the defendants the government can well afford to wait for another opportunity to vindicate public policy.

Contracts in restraint of trade involve a diminution of the number of persons engaged in trade or of the supply furnished the public. If a contract alleged to be in restraint of trade contains one of these elements, then and not until then can public policy come in to determine whether the restraint is of such a char-

acter or goes to such extent as to make it violative of public right.

Patterson, Contracts in Restraint of Trade, 17; *Fowle v. Park*, 181 U. S. 88, 38 L. ed. 67; *Diamond Match Co. v. Roeder*, 106 N. Y. 478, 60 Am. Rep. 464; *Beal v. Chase*, 31 Mich. 490; *Proctor v. Sargent*, 2 Scott, N. R. 289.

The mere fact that a contract places a restriction upon trade or competition is not sufficient to avoid it.

Shrainka v. Scharringhausen, 8 Mo. App. 522; *Central Shade Roller Co. v. Cushman*, 143 Mass. 353; *Roussillon v. Roussillon*, L. R. 14 Ch. Div. 866; *Leather Cloth Co. v. Loraont*, L. R. 9 Eq. 845; *Hubbard v. Miller*, 27 Mich. 15, 15 Am. Rep. 153; *Watertown Thermometer Co. v. Pool*, 51 Hun, 157; *Perkins v. Lyman*, 9 Mass. 522; *Gloucester Isinglass & G. Co. v. Russia Cement Co.* 154 Mass. 92; *Jones v. Fell*, 5 Fla. 510; *Master Stevedores Asso. v. Walsh*, 2 Daly, 1; *Collins v. Locke*, L. R. 4 App. Cas. 674; *Re Greene*, 52 Fed. Rep. 104.

The Anti-Trust Act is not intended, and does not profess, to enforce public duties; it is a general Act applicable to individuals as well as to corporations, and as it makes no distinction in the penalties imposed, it is plain that so far as the Act is concerned, it does not place corporations engaged in public duties on any different footing from individuals or corporations engaged in purely private pursuits.

The rule as to agreements in restraint of trade manifestly ought to be much more stringent in respect to individuals and private corporations than it is in respect to railway corporations, for the reason that individuals and private corporations are not subject to the limitations upon their charges which are imposed upon railway corporations by the law of their existence.

Oregon Steam Nav. Co. v. Winsor, 87 U. S. 20 Wall. 64, 22 L. ed. 315; *Leslie v. Lorillard*, 1 L. R. A. 456, 110 N. Y. 519; *Joe v. Smith*, 19 N. Y. S. R. 556; *Manchester & L. R. Co. v. Concord R. Co.* (N. H.) 8 Inters. Com. Rep. 319, 9 L. R. A. 689; *Shrewsbury & B. R. Co. v. London & N. W. R. Co.* 2 Macn. & G. 324, 17 Q. B. 652; *Hare v. London & N. W. R. Co.* 2 John. & H. 80; *Ex parte Koehler*, 28 Fed. Rep. 529, 21 Am. & Eng. R. Cas. 57.

The agreement between the different companies constituting the Trans-Missouri Freight Association, discloses not a single element of a monopoly at common law.

The purpose of the agreement was not to raise rates, but to establish and maintain just and reasonable rates; and to establish just and reasonable rates is a right which belongs to every railroad company in the United States. It can never be legally wrong to contract for what is legally right.

The public are deprived of no facilities to which they are entitled; all the roads are in full operation, and as shown by the pleadings, the public are served for just and reasonable rates; how, then, can it be claimed that a monopoly has been established, or that the people have been or can be oppressed?

Stewart v. Erie & W. Transp. Co. 17 Minn. 372; *Ontario Salt Co. v. Merchants Salt Co.* 18 Grant, Ch. 540; *Wickens v. Evans*, 3 Younge & J. 318; *Mogul SS. Co. v. McGregor*, L. R. 21 Q. B. Div. 544, 28 Q. B. Div. 598, [1892] 2 App. 4 INTER S.

Cas. 25; Eclipse Tugboat Co. v. Pontchartrain R. Co. 24 La. Ann. 1.

No such legal doctrine as free and unrestricted competition ever existed. Competition was always a legal public right; but free and unrestrained competition, like unregulated liberty of any kind, has always belonged to the literature of doctrinaires and theorists, and never to the sober and sensible jurisprudence of the Anglo-Saxon race.

Kellogg v. Larkin, 8 Pinney, 150; *Manchester & L. R. Co. v. Concord R. Co.* (N. H.) 8 Inters. Com. Rep. 319, 9 L. R. A. 689.

Bargaining to limit competition, when it is kept within the bounds of reasonable protection, is legal, either assumed or expressly affirmed.

Mitchell v. Reynolds, 1 P. Wms. 181; *Perkins v. Lyman*, 11 Mass. 76, 6 Am. Dec. 153; *Pierce v. Fuller*, 8 Mass. 223, 5 Am. Dec. 102; *Bowser v. Bliss*, 7 Blackf. 844, 43 Am. Dec. 98; *Grundy v. Edwards*, 7 J. J. Marsh. 868, 23 Am. Dec. 409; *Morgan v. Perhamus*, 36 Ohio St. 517, 38 Am. Rep. 607; *Pike v. Thomas*, 4 Bibb, 486, 7 Am. Dec. 741; *Morse Twist Drill & M. Co. v. Morse*, 103 Mass. 72, 4 Am. Rep. 513; *Hoyt v. Holly*, 39 Conn. 326, 13 Am. Rep. 890; *Hubbard v. Miller*, 27 Mich. 15, 15 Am. Rep. 153; *Cook v. Johnson*, 47 Conn. 173, 36 Am. Rep. 64.

Our legislative, judicial and commercial history for the past twenty-five years has all been against the doctrine of unrestrained competition.

As executive officers of the government in the control of railways, what the Interstate Commerce Commission has said and done on this subject amounts to an executive construction of the existing laws on the subject, and as such will be followed by the courts, except upon the most clear and conclusive showing that it is erroneous.

Brown v. United States, 113 U. S. 568, 28 L. ed. 1079.

The only criticism upon the associations, to be found anywhere in their reports, is that they have not in all cases lived up to their articles of agreement as closely as they ought, and that they should be strengthened and made more effective in their organization.

The agreement establishing the Trans-Missouri Freight Association was made long before the passage of the Anti-Trust Act. Making the agreement, therefore, was not a violation of this Act, for the Act was not then in existence. Whatever violation is now asserted consists, and must consist, in doing something—in acts that contravene the law. If the question of tendency is before the court, how can that tendency be established except by a consideration of what has actually happened by carrying out the agreement? What will happen can only be determined by a consideration of what has happened.

Stewart v. Erie & W. Transp. Co. 17 Minn. 372; *Mogul SS. Co. v. McGregor*, [1892] 2 App. Cas. 25; *Egerton v. Brownlow*, 4 H. L. Cas. 108.

Freedom to contract is the rule, and all restraints upon it the exception.

Spangler v. Cleveland, 43 Ohio St. 526, 536; *Manhattan Gaslight Co. v. Barker*, 36 How. Pr. 233, 236; 1 High. Inj. 9.

Courts do not enlarge the meaning of statutes for the purpose of affording a doubtful

relief or of embracing an act not clearly and undoubtedly within its meaning.

United States v. Eaton, 144 U. S. 677, 36 L. ed. 591; *Chase v. Curtis*, 113 U. S. 452, 28 L. ed. 1038.

Messrs. B. P. Waggener, Wolcott & Vaile and Wallace Pratt, adopted the foregoing brief on behalf of companies represented by them.

Mr. John M. Thurston with *Messrs. A. L. Williams, N. H. Loomis and R. W. Blair*, for the Union Pacific Railway Co. *et al* appellees:

I. The articles of agreement of the Trans-Missouri Freight Association are justified by the provisions of the Interstate Commerce Act; and the objects sought to be attained by that association, as shown by its articles of agreement, are made necessary by the requirements of that Act.

Congress has left it entirely to the voluntary action of the carriers subject to the Act, to arrange the details for the interchange of traffic between them.

"Where the law commands anything to be done, it authorizes the performance of whatever may be necessary for executing its commands."

Sutherland, Stat. Constr. § 841; *Re Neagle*, 135 U. S. 1-87, 34 L. ed. 55-79; *New York v. Sands*, 105 N. Y. 210; 1 Kent, Com. 464.

II. The Interstate Commerce Act and its amendments form a special code of laws for the regulation of common carriers engaged in interstate traffic.

III. The Anti-Trust Act, under which this suit is brought, is general in its nature, and it is only by a literal construction of the Act, which is broad enough to include contracts of every kind and nature, that it can be said to include the articles of agreement in question.

IV. A statute in general terms, or treating the subject in a general manner, will not repeal the particular provisions of a prior statute, unless the general act indicates a plain intention to do so.

Sutherland, Stat. Constr. § 157; *Ex parte Orow Dog*, 109 U. S. 570, 27 L. ed. 1035; *State v. Archibald*, 43 Minn. 323; *Chew Heong v. United States*, 112 U. S. 536, 28 L. ed. 770; *Robbins v. State*, 8 Ohio St. 131; *Orane v. Reeder*, 22 Mich. 322; *State v. Bishop*, 41 Mo. 16; *State v. Judge of St. Louis Prob. Ct.* 38 Mo. 584; *Rushville v. Rushville*, 32 Ill. App. 320; *Arthur v. Homer*, 96 U. S. 187, 24 L. ed. 811; *Brown v. Philadelphia County Comrs.* 21 Pa. 37.

V. The Interstate Commerce Act is one special in its nature, and with a particular object in view. The Act under which this suit is brought is one of a general nature, disclosing no intent to repeal any of the provisions of the Interstate Commerce Act. It follows, therefore, that none of the provisions of that Act are repealed by the Anti-Trust Act, and that the articles of agreement in question, which are authorized and made necessary by the provisions of the Interstate Commerce Act, are not in conflict with the Anti-Trust Act.

VI. The provisions of the Anti-Trust Act, under which this action is brought, were not intended to and do not relate to the business of common carriers, and therefore the articles

of agreement in question are not in conflict with that Act.

The different portions of a statute are to be construed with reference to each other and in a sense which harmonizes with the subject matter and general purpose of the statute.

Sutherland, Stat. Constr. § 241; 1 Kent, Com. 461; *Breuer v. Blougher*, 39 U. S. 14 Pet. 198, 10 L. ed. 417; *Smith v. People*, 47 N. Y. 336; *Church of Holy Trinity v. United States*, 143 U. S. 457, 36 L. ed. 227.

VII. The articles of agreement of the Trans-Missouri Freight Association are not in restraint of trade and commerce, they do not create, nor attempt to create a monopoly, and are in no wise obnoxious to the provisions of the Anti-Trust Act.

By the common law, contracts in restraint of trade were those which prevented a person from pursuing his trade or from engaging in business either generally, or within a particular locality, or for a certain period of time.

2 Parsons, Cont. §§ 253-259; *Mitchell v. Reynolds*, 1 P. Wms. 181; *Oregon Steam Nav. Co. v. Winsor*, 87 U. S. 20 Wall. 64, 22 L. ed. 315.

In *Ray*, on Contractual Limitations, p. 194, a work frequently quoted in complainant's brief, the modification of the ancient rule is thus referred to:

"The tendency of recent adjudications is to conform to the spirit which induced such modified legislation, and it is now clearly marked in the direction of relaxing the rigor of the doctrine that all contracts in general restraint of trade are void, irrespective of special circumstances. Indeed, it has of late been denied that a hard and unjust rule of that kind has ever been the law of England.

"The law has for centuries permitted contracts in restraint of trade when reasonable, and in *Horner v. Crafts*, 7 Bing. 735, Tindal, *Ch. J.*, considered a true test to be, whether the restraint is such only as to afford a fair protection to the interests of the party in favor of whom it is given, and not so advantageous as to interfere with the interest of the public. When the restraint is general, but at the same time is coextensive only with the interest to be protected and with the benefit meant to be conferred, there seems to be no good reason why, as between the parties, the contract is not as reasonable as when the interest is partial, and there is a corresponding partial restraint. There is no public reason which necessarily condemns the one and not the other.

See also *Diamond Match Co. v. Roeber*, 106 N. Y. 478, 60 Am. Rep. 464; *Whittaker v. Hove*, 3 Beav. 383; *Roussillon v. Roussillon*, L. R. 14 Ch. Div. 315; *Beal v. Chase*, 31 Mich. 490; *Leslie v. Lorillard*, 1 L. R. A. 456, 110 N. Y. 519; *National Benefit Co. v. Union Hospital Co.* 11 L. R. A. 437, 45 Minn. 272.

"In each particular case the surrounding circumstances are to be considered in determining whether the covenant will operate as a restraint, injurious to the public."

Ray, Contractual Limitations, 200; *Gibbs v. Consolidated Gas Co.* 130 U. S. 396, 32 L. ed. 979. See also *Beal v. Chase*, 31 Mich. 490.

The articles of agreement in question are not in restraint of trade, in the sense of being contrary to public policy.

Public policy is defined as "that principle of the law which holds that no one can lawfully do that which has a tendency to be injurious to the public, or against the public good."

19 Am. & Eng. Enc. Law, 565; *Egerton v. Brownlow*, 4 H. L. Cas. 1; *Swann v. Swann*, 21 Fed. Rep. 299; *Davies v. Davies*, L. R. 36 Ch. Div. 364; Ray, Contractual Limitations, p. 187, § 44.

Unlimited competition between railroads is not essential for the protection of the public.

Morawetz, Priv. Corp. § 1131; *Manchester & L. R. Co. v. Concord R. Co.* (N. H.) 3 Inters. Com. Rep. 319, 9 L. R. A. 639. See also, Ray, Contractual Limitations, 260; *Central Shade Roller Co. v. Cushman*, 143 Mass. 353; *Gloucester Iceglass & Glue Co. v. Russia Cement Co.* 13 L. R. A. 563, 154 Mass. 92; *Kellogg v. Larkin*, 8 Pinney, 150.

A definition of the word "monopoly" is given by the Supreme Court of the United States in *Charles River Bridge v. Warren Bridge Props.* 36 U. S. 11 Pet. 607, 9 L. ed. 847.

It is an exclusive right granted to a few, of something which was before of common right.

4 Bl. Com. 159; Bac. Abr. *Prerogative*, F. 4. *Messa. R. M. Spencer, C. A. Mosman, J. D. Strong and W. F. Guthrie* also for appellees.

Sanborn, C. J., delivered the opinion of the court:

Contracts between competing corporations, commonly termed "pooling contracts," to divide their earnings from the transportation of freight in fixed proportions, have long been held void by the courts as against public policy. Such contracts do not simply restrict competition, they tend to destroy it; and, if they do not effect that result, it is only because they do not completely accomplish their main purpose. When acting independently, the spur of self-interest drives each corporation to furnish the people with the best accommodations and the safest and most rapid transportation at the lowest profitable rates, in order that it may attract larger patronage and gather increased gain. But under the operation of a pool this incentive to exertion is withdrawn. Each carrier finds it to its interest to enhance the price of carriage, and finds that its profits are not sensibly diminished by furnishing poor facilities for transportation and inexpensive and mean accommodations. In 1887 Congress recognized and adopted this rule of public policy, and by section 5 of "An Act to Regulate Commerce," commonly called the "Interstate Commerce Act" (24 Stat. at L. 379, chap. 104; Rev. Stat. Supp. 529) prohibited such contracts between common carriers engaged in interstate or international commerce. That Act, however, prohibited contracts for the pooling of freights of different and competing railroads only; it prohibited contracts that thus destroyed competition; it did not prohibit all contracts that in any way restricted or regulated competition. By the Act of July 2, 1890, entitled "An Act to Protect Trade and Commerce Against Unlawful Restraints and Monopolies," commonly called the "Anti-Trust Act" (26 Stat. at L.

209, chap. 647; Rev. Stat. Supp. 762) Congress provided that:

"Section 1. Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several states, or with foreign nations, is hereby declared to be illegal. Every person who shall make any such contract or engage in any such combination or conspiracy, shall be deemed guilty of a misdemeanor.

"Sec. 2. Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize, any part of the trade or commerce among the several states, or with foreign nations, shall be deemed guilty of a misdemeanor."

"Sec. 4. The several circuit courts of the United States are hereby invested with jurisdiction to prevent and restrain violations of this Act."

The government bases this suit on these provisions of the latter Act. It claims that the contract in question, and the association formed under it, are illegal on three grounds: First, because the contract prevents free and unrestricted competition between competing lines of railroad; second, because it tends to create a monopoly; and third, because the railroad corporations have through this contract abandoned the discharge of some of their duties to the public.

The first ground stated is chiefly relied on, and it presents questions of deep interest, the decision of which must have a far-reaching and important influence on the transportation system of the nation. The government does not claim that the contract and association assailed effected a pooling of freights, or that they tend to retard improvement in the facilities afforded for safe, quick, and convenient transportation, or that they are obnoxious to any of the provisions of the Interstate Commerce Act; but it insists that the Anti-Trust Act prohibits all contracts and combinations between competing railroad corporations which in any manner restrict free competition. The argument is, the Anti-Trust Act prohibits any contract between competing railroad companies that restricts competition. This contract restricts competition; therefore it is illegal. Is, then, every contract between competing railroad companies that in any manner imposes a restriction upon competition a "contract in restraint of trade" and illegal within the meaning of the Anti-Trust Act? Is the existence of restriction upon competition the standard by which the legality of these and all other contracts must be measured under that Act? and if not, by what standard shall their legality be determined? These are questions that the position of the government compels us to consider before we can determine whether or not this contract is void. Their determination demands a careful examination and construction of that part of the Anti-Trust Act which declares that "every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several states," is illegal. No definition of these terms is found in this Act,

but the terms are not new. For more than 200 years before it was passed the courts of England and America had from time to time declared that certain classes of contracts in restraint of trade were against public policy, and therefore illegal and void under the common law. The line of demarcation between these illegal contracts and the innumerable valid agreements that are daily made in the business world had been drawn by long lines of decisions, and had been repeatedly pointed out by the Supreme Court of the United States. *Gibbs v. Consolidated Gas Co.* 130 U. S. 396, 409, 32 L. ed. 979, 984; *Fontle v. Park*, 131 U. S. 88, 33 L. ed. 67. Two years before its passage Congress had enacted the Interstate Commerce Law. They had there provided a code of rules and established a commission for the express purpose of regulating that part of interstate and international commerce which relates to transportation. Under these circumstances, three well settled rules of construction must be applied to ascertain the meaning and scope of the Act:

(1) It must be read in the light of all general laws upon the same subject in force at the time of the passage of the Act.

(2) Where words have acquired a well understood meaning by judicial interpretation, it is to be presumed that they are used in that sense in a subsequent statute, unless the contrary clearly appears.

(3) Where Congress creates an offense, and uses common law terms, the courts may properly look to that body of jurisprudence for the true meaning of the terms used, and, if it is a common law offense, for the definition of the offense if it is not clearly defined in the Act adopting or creating it. *United States v. Armstrong*, 2 Curt. 446; *United States v. Coppersmith*, 4 Fed. Rep. 198; *Re Greene*, 52 Fed. Rep. 104, 111; *McCool v. Smith*, 66 U. S. 1 Black, 459, 469, 17 L. ed. 218, 221; *McDonald v. Hovey*, 110 U. S. 619, 628, 28 L. ed. 269, 271.

Thus we are brought to a consideration of the statutes in force and the decisions that had been rendered when this Act was passed to determine what contracts in restraint of trade were then illegal, for it is clear both from the rules to which we have referred and from the title of the Act, viz: "An Act to Protect Trade and Commerce Against Unlawful Restraints and Monopolies," that it was such contracts, and such contracts only, that Congress intended to declare unlawful and criminal in interstate commerce.

Under the common law, the ground on which contracts in restraint of trade were declared unlawful was that they were against public policy. But when it becomes necessary to consider grounds of public policy in the determination of a case, it is well to bear in mind the oft quoted remarks of Justice Burrough in *Richardson v. Mellish*, 2 Bing. 252, that public policy "is a very unruly horse, and when you once get astride of it you never know where it will carry you. It may lead you from the sound law." Public policy changes with the changing conditions of the times. It is hardly to be expected that a people who are transported by steam with a rapidity hardly conceived of a century

ago, who are in constant and instant communication with each other by electricity, and who carry on the most important commercial transactions by the use of the telegraph while separated by thousands of miles, will entertain precisely the same views of what is conducive to the public welfare in commercial and business transactions as the people of the last century, who lived when commerce crept slowly along the coasts, shut out of the interior by the absence of roads, and hampered by an almost impassable ocean. In 1415 a writ of debt was brought on an obligation by one John Dier, in which the defendant alleged the obligation in a certain indenture which he put forth, and on condition that if the defendant did not use his art of a dyer's craft, within the city where the plaintiff, etc., for half a year, the obligation to lose its force, and said that he did not use his art within the time limited. Hull, J., said: "In my opinion, you might have demurred upon him that the obligation is void, inasmuch as the condition is against the common law; and, per Dieu, if the plaintiff were here, he should go to prison till he paid a fine to the king." Y. B., 2 Hen. V. fol. 5, pl. 26. In 1841, Lord Langdale, master of the rolls, held that a contract made by a lawyer not to practice his profession in Great Britain for 20 years was not against public policy, and that it was valid. *Whitaker v. Howe*, 3 Beav. 383. In 1843, the court of exchequer held that an agreement not to practice as a surgeon dentist in London or in any other town where the plaintiffs might have been practicing was reasonable and lawful so far as it related to London, but against public policy and void as to the other towns. *Mallan v. May*, 11 Mees. & W. 652, 667. In 1869, Vice Chancellor James sustained a contract by vendors not to carry on or allow others to carry on in any part of Europe the manufacture or sale of certain kinds of leather so as in any way to interfere with the exclusive enjoyment by the purchasing company of the manufacture and sale thereof, and issued an injunction to enforce it. *Leather Cloth Co. v. Lonsont*, L. R. 9 Eq. 345. In 1889 the supreme court of New York sustained a contract not to manufacture or sell thermometers or storm glasses throughout the United States for ten years. *Watertown Thermometer Co. v. Pool*, 51 Hun, 157, 168. And in 1891 the supreme court held that a contract of a railroad corporation giving the Pullman Southern Car Company the exclusive right to furnish all drawing room and sleeping cars required by that road during a period of fifteen years was not an illegal restraint of trade, and sustained it. *Chicago, St. L. & N. O. R. Co. v. Pullman Southern Car Co.* 139 U. S. 79, 35 L. ed. 97. It is with the public policy of to-day, as illustrated by public statutes and judicial decisions, that we have now to deal. In considering that subject, we are not to be governed by our own views of the interests of the people, or by general considerations tending to show what policy would probably be wise or unwise. Such a standard of determination might be unconsciously varied by the per-

sional views of the judges who constitute the court. The public policy of the nation must be determined by its Constitution, laws, and judicial decisions. So far as they disclose it, it is our province to learn and enforce it, beyond that it is unnecessary and unwise to pursue our inquiries. *Vidal v. Philadelphia*, 43 U. S. 2 How. 127, 197, 11 L. ed. 205, 233; *Swann v. Swann*, 21 Fed. Rep. 299.

Turning first, then, to the decisions, we find that it has long been settled that contracts or combinations of the producers or dealers in staple commodities of prime necessity to the people, to restrict or monopolize their supply or enhance their price, pooling contracts, or combinations between such producers or dealers to divide their profits in certain fixed proportions, and pooling contracts or combinations between competing common carriers, are illegal restraints of trade, and void; while contracts or combinations between employers or workmen to fix and abide by certain prices for labor or services may be valid in their inception, but become illegal restraints of trade whenever the associations formed under them interfere with the freedom of those who are not members to refuse to abide by their prices, or to employ or be employed at other rates, or whenever such associations undertake to prevent nonmembers from using their property or their labor as they see fit. The main purpose of contracts of these classes that are thus held illegal is to suppress, not simply to regulate, competition; and, if suppression is not effected, it is because the contracts fail to accomplish their purpose. It is evident that there is a wide difference between such contracts and those the purpose of which is to so regulate competition that it may be fair, open, and healthy, and whose restriction upon it is slight, and only that which is necessary to accomplish this purpose. It does not necessarily follow that contracts of the latter class constitute illegal restraints of trade because those of the former classes do.

To maintain his proposition that any contract between common carriers that restricts competition in any degree is an illegal restraint of trade, the counsel for the government has cited numerous cases where such expressions as the following are found in the opinions of the courts: "The people have a right to the necessities and conveniences of life at a price determined by the relation of supply and demand, and the law forbids any agreement or combination whereby that price is removed beyond the salutary influence of legitimate competition." *De Witt Wire Cloth Co. v. New Jersey Wire Cloth Co.* 14 N. Y. Supp. 277. "It is against the general policy of the law to destroy or interfere with free competition, or to permit such interference or destruction." *Stewart v. Erie & W. Transp. Co.* 17 Minn. 372. "Combinations and conspiracies to enhance the price of any article of trade and commerce are injurious to the public." *People v. Fisher*, 14 Wend. 9, 28 Am. Dec. 501. "Whatever destroys, or even restricts, competition in trade, is injurious, if not fatal, to it." *Hooker v. Vandewater*, 4 Denio, 349, 353, 47 Am. Dec. 4 INTER 8.

258. A careful and patient examination of the cases cited, however, discloses the fact that the contracts considered in those cases, which are not of doubtful authority, were of one of the classes to which we have referred, or rest upon some other ground than the existence of restriction upon competition. They were cases involving contracts of competing producers or dealers to limit the supply and enhance the price of, or to monopolize, staple commodities, like *Morris Run Coal Co. v. Barclay Coal Co.* 68 Pa. 173, 8 Am. Rep. 159; *India Bagging Assn. v. Kock*, 14 La. Ann. 168; *United States v. Jellico Mountain Coal & C. Co.* 12 L. R. A. 753, 46 Fed. Rep. 432; *Santa Clara Valley Mill & L. Co. v. Hayes*, 76 Cal. 387; *DeWitt Wire Cloth Co. v. New Jersey Wire Cloth Co.* 14 N. Y. Supp. 277; *Central Ohio Salt Co. v. Guthrie*, 35 Ohio St. 666; and *People v. North River Sugar Ref. Co.* 54 Hun, 354; or cases involving pooling contracts, like *Craft v. McConoughy*, 79 Ill. 346, 22 Am. Rep. 171; *Hooker v. Vandewater*, 4 Denio, 349, 47 Am. Dec. 258; *Stanton v. Allen*, 5 Denio, 434, 49 Am. Dec. 282; *Anderson v. Jett*, 6 L. R. A. 390, 89 Ky. 875; *Gibbs v. Consolidated Gas Co.* 130 U. S. 396, 32 L. ed. 979; *Morrill v. Boston & M. R. Co.* 55 N. H. 531; *Denver & N. O. R. Co. v. Atchison, T. & S. F. R. Co.* 15 Fed. Rep. 650; and *Woodruff v. Berry*, 40 Ark. 252; or cases involving combinations of workmen which compelled nonmembers to abide by the prices for labor which they had fixed or to abandon their employment, like *People v. Fisher*, 14 Wend. 9, 28 Am. Dec. 501, and *United States v. Workmen's Amalgamated Council*, 54 Fed. Rep. 994, 1000; or cases where the contracts were *ultra vires* the corporations, and their purpose and effect was to monopolize trade, like *Central R. Co. v. Collins*, 40 Ga. 582; *Hazlehurst v. Savannah, G. & N. A. R. Co.* 43 Ga. 13; and *Western U. Teleg. Co. v. American U. Teleg. Co.* 65 Ga. 160, 38 Am. Rep. 781; or cases of questionable authority, like *Com. v. Cartisle*, Bright. (Pa.) 36, 39. See, *contra*, *Snow v. Wheeler*, 113 Mass. 179, 185; *Bowen v. Matheson*, 14 Allen, 499; *Skrainka v. Scharringhausen*, 8 Mo. App. 522; and *Carew v. Ruthersford*, 106 Mass. 1, 14, 8 Am. Rep. 287. It was natural that in the discussion of contracts of these classes the courts should condemn in unmeasured terms the suppression of competition, but in none of these cases were they required to hold, and in none of them did they hold, as we understand the opinions when read in relation to the facts of the cases respectively, that every restriction of competition by contracts of competing dealers or carriers was illegal. These decisions rest upon broader ground,—on the ground that the main purpose of the obnoxious contracts was to suppress competition, and that they thus tended to effect an unreasonable and unlawful restraint of trade; they rest on the well settled rules, and come within the well defined classes, to which we have above referred.

A more extended view of the authorities strengthens this conclusion, and makes plain the line of demarcation which separates legal contracts that incidentally restrict competi-

tion from illegal contracts in restraint of trade. The decision in the leading case upon this subject (*Mitchell v. Reynolds*, 1 P. Wms. 181, 1 Smith, Lead. Cas. [7th Am. ed.] pt. 2, p. 708) the case which *Chief Justice* Fuller says is the foundation of the rule in relation to the invalidity of contracts in restraint of trade (*Gibbs v. Consolidated Gas Co.* 180 U. S. 409, 32 L. ed. 984) held that a contract that clearly restricted competition was not an illegal restraint of trade. The action was upon a bond the condition of which was that the obligor, who was the assignor of a lease of a bakehouse and messuage in the parish of St. Andrews Holborn, would not exercise his trade of a baker within that parish for three years. The contract was held valid, and the action sustained. This decision was rendered in 1711. *Chief Justice* Parker, in delivering it, declared that contracts in partial restraint of trade were valid if made upon sufficient consideration, but that contracts in general restraint of trade were illegal, because they deprived the party restrained of his livelihood and the subsistence of his family, and the public of a useful member. The point actually decided, that contracts in partial restraint of trade may be sustained, has been uniformly approved, but in the development of the law applicable to this subject there has been added to it the further condition that the restriction imposed must be reasonable in view of all the facts and circumstances of each particular case. The remark of *Chief Justice* Parker that contracts in general restraint of trade are illegal—a remark that was not necessary to the determination of the question before him—has been, to say the least, greatly modified by subsequent decisions. There is a plain tendency in the later authorities to repudiate the proposition that there is any hard and fast rule that contracts in general restraint of trade are illegal, and to apply the test of reasonableness to all contracts, whether the restraint be general or partial. In *Tallis v. Tallis*, 1 El. & Bl. 391, the court of queen's bench held, in 1858, that a covenant restricting competition, which bound the covenantor not to exercise his trade of a canvassing publisher in London or within 150 miles of the general postoffice, or in Dublin or Edinburgh, or within 50 miles of either, or in any other town where the covenantee or his successors had an establishment or might have had one within six months preceding, was not an illegal restraint of trade, and enforced it. In *Mogul SS. Co. v. McGregor*, 21 Q. B. Div. 544, certain shipowners engaged in the carrying trade between London and China had formed an association for the purpose of keeping up the rate of freights in the tea trade, and securing that trade to themselves. They accomplished this purpose by allowing a rebate of 5 per cent on all freights paid by shippers who shipped in their vessels only, and thus partially or entirely excluded the plaintiffs, who were competing shipowners, from the tea carrying trade. The latter brought suit for an injunction and damages, but, notwithstanding the obvious restriction upon free competition, Lord Coleridge held that the association was not an unlawful combination in restraint of 4 INTER 8.

trade, and gave judgment for the defendants. This decision was rendered in 1888. It was sustained on appeal (23 Q. B. Div. 598), and finally affirmed by the house of lords. [1892] App. Cas. 25. In *Perkins v. Lyman*, 9 Mass. 522, the supreme judicial court of Massachusetts held, in 1813, that a contract by a merchant not to be interested in any voyage to the northwest coast of America was not invalid as in restraint of trade. In *Diamond Match Co. v. Roeber*, 106 N. Y. 473, 60 Am. Rep. 464, a contract of a match manufacturer never to manufacture or sell any friction matches in the District of Columbia, or in any part of the United States except Idaho and Montana, was sustained and enforced. In *Oregon Steam Nav. Co. v. Winsor*, 87 U. S. 20 Wall. 64, 22 L. ed. 315, decided in 1873, a contract between two steam navigation companies engaged in the business of transportation on the rivers, bays, and waters of California, and on the Columbia river and its tributaries, respectively, was declared by the Supreme Court not to be in restraint of trade, although it prohibited the use of a certain steamer in the waters of California for ten years. And in 1890 the supreme court of New Hampshire in an exhaustive and persuasive opinion held that contracts by which a railroad corporation leased its road and rolling stock to a competitor for many years were not necessarily against public policy or void at common law, when the purpose of the contracts and combinations did not appear to be to raise the rate of transportation above the standard of fair compensation, or to violate any duty owing to the public by non-competing companies. *Manchester & L. R. Co. v. Concord R. Co.* (N. H.) 3 Inters. Com. Rep. 319, 9 L. R. A. 689. If further authority is wanted for the proposition that it is not the existence of the restriction of competition, but the reasonableness of that restriction, that is the test of the validity of contracts that are claimed to be in restraint of trade, it will be found in *Foule v. Park*, 181 U. S. 88, 97, 33 L. ed. 87, 74; *Gibbs v. Consolidated Gas Co.* 180 U. S. 396, 32 L. ed. 979; *Re Greene*, 52 Fed. Rep. 104, 118; *Horner v. Graves*, 7 Bing. 735, 743; *Hubbard v. Miller*, 27 Mich. 15, 19, 15 Am. Rep. 153; *Rounillon v. Rounillon*, L. R. 14 Ch. Div. 351, 363; *Leather Cloth Co. v. Lonsont*, L. R. 9 Eq. 345, 354; *Wickens v. Evans*, 3 Younge & J. 318; *Ontario Salt Co. v. Merchants Salt Co.* 18 Grant, Ch. 540; *Mallan v. May*, 11 Mees. & W. 652, 657; *Whittaker v. Howe*, 3 Beav. 383; *Kellogg v. Larkin*, 3 Pinney, 123, 150; *Beal v. Chase*, 31 Mich. 490; *Skrainka v. Scharringhausen*, 8 Mo. App. 523, 525; *Wiggins Ferry Co. v. Chicago & A. R. Co.* 73 Mo. 389; *Gloucester Isinglass & G. Co. v. Russia Cement Co.* 154 Mass. 92, 94; *Watertown Thermometer Co. v. Pool*, 51 Hun, 157, 163; *Master Stevedore's Assn. v. Walsh*, 2 Daly, 1; *Hodge v. Sloan*, 107 N. Y. 244; *Brown v. Rounsavell*, 73 Ill. 589; *Jones v. Fell*, 5 Fla. 510, 515.

From a review of these and other authorities, it clearly appears that when the Anti-Trust Act was passed the rule had become firmly established in the jurisprudence of England and the United States that the va-

lidity of contracts restricting competition was to be determined by the reasonableness of the restriction. If the main purpose or natural and inevitable effect of a contract was to suppress competition or create a monopoly, it was illegal. If a contract imposed a restriction that was unreasonably injurious to the public interest, or a restriction that was greater than the interest of the party in whose favor it was imposed demanded, it was illegal. But contracts made for a lawful purpose, which were not unreasonably injurious to the public welfare, and which imposed no heavier restraint upon trade than the interest of the favored party required, had been uniformly sustained, notwithstanding their tendency to some extent to check competition. The public welfare was first considered, and the reasonableness of the restriction determined under these rules in the light of all the facts and circumstances of each particular case.

But it is said that railroad corporations are quasi public corporations, and any restriction upon their competition is against the public policy of the nation. It is not to be denied that there are some expressions to be found in adjudged cases, notably in *Gibbs v. Consolidated Gas Co.* 130 U. S. 396, 409, 32 L. ed. 979, 984; *West Virginia Transp. Co. v. Ohio River Pipe Line Co.* 22 W. Va. 600, 625; *Chicago Gaslight & C. Co. v. Peoples Gaslight & C. Co.* 121 Ill. 530, and *Western U. Tele. Co. v. American U. Tele. Co.* 65 Ga. 160, 38 Am. Rep. 781,—to the effect that where a business is of such character that it cannot be restrained to any extent whatever without prejudice to the public interests, the courts decline to enforce or sustain contracts imposing such restraint, however partial. But the language employed by the courts in these cases should be read in the light of the circumstances under which it was uttered, and with due reference to the point actually adjudicated. Thus in the earliest of these cases (*Western U. Tele. Co. v. American U. Tele. Co.*) it was held that a contract between a railroad company and a telegraph company by which the former granted to the latter the exclusive right to construct a telegraph line along its right of way, necessarily excluded all other telegraph lines from the use of a right of way that by condemnation had been devoted to public uses, and was void, because it was in restraint of trade, and tended to create a monopoly. In *West Virginia Transp. Co. v. Ohio River Pipe Line Co.* it was held that an owner of 2000 acres of oil land could not grant to one pipe line company an exclusive right to lay a pipe line across said lands, because the legislature, by authorizing pipe line companies to condemn lands for the construction of such lines, had thereby declared that the public had an interest in their construction, and that a contract which precluded such companies from laying a line across an extensive tract of land was necessarily opposed to public policy. In *Chicago Gaslight & C. Co. v. Peoples Gaslight & C. Co.* the court held that a gas company, which had accepted a charter authorizing it to lay pipes and to supply gas throughout the entire limits of the city,

could not disable itself from the performance of the public duty it had undertaken by entering into a contract with another company not to lay pipes and supply gas in a large section of said city. And in *Gibbs v. Consolidated Gas Co.* a like contract by one gas company with another to abandon the discharge of public duties which had been devolved upon it by its charter was held, on that account, to be against public policy, and void, and to be void on the further ground that the contract was in open violation of a statute which prevented the company from "entering into a . . . contract with any other gas company whatever."

No doubt can be entertained that the contract involved in each of the cases last referred to was against public policy for its marked tendency to create a monopoly, and to suppress healthy competition. Two of the contracts were also vicious in the respect that the corporation had attempted to disable itself from exercising powers which had been conferred upon it for the public advantage. But we think, in view of the state of facts on which the decisions were predicated, and the points actually adjudicated, it would be unwise to deduce an unbending rule that any and every contract between two railway companies which enjoins or contemplates concert of action in the matter of establishing freight or passenger rates between competitive points is against public policy, and an unlawful restraint of trade. No case, we believe, has yet gone to that extent, or has declared that the business of transporting freight and passengers by rail is of such character that no restraint whatever upon competition therein is permissible. On the contrary, contracts between common carriers which imposed some restrictions upon competition have been frequently sustained by our highest courts, and the rule has been often applied that the test of their validity was not the existence, but the reasonableness, of the restriction imposed. *Oregon Steam Nav. Co. v. Winsor*, 87 U. S. 20 Wall. 64, 32 L. ed. 315; *Chicago, St. L. & N. O. R. Co. v. Pullman Southern Car Co.* 139 U. S. 79, 35 L. ed. 97; *Mogul SS. Co. v. McGregor*, 21 Q. B. Div. 544; *Manchester & L. R. Co. v. Concord R. Co.* (N. H.) 3 Inters. Com. Rep. 319, 9 L. R. A. 689; *Wiggins Ferry Co. v. Chicago & A. R. Co.* 73 Mo. 389, 39 Am. Rep. 519. But even if such an extreme view, as is above indicated, was once tenable, we fail to see how it can well be maintained since the passage of the Interstate Commerce Law, and the action that has been taken thereunder by the government Commission which was created to enforce its provisions. The Interstate Commerce Law imposes several important restrictions upon the right of railway companies to do as they please in the matter of making and altering rates, and Congress has thereby expressed its conviction that unrestrained competition between carriers is not, at the present time, and under existing conditions, most conducive to the public welfare, but that other things are quite as essential to the public good. Mark the difference in public policy towards merchants and railroad companies exhibited by the common law and by the In-

terstate Commerce Act. Merchants may refuse to sell their wares at all, they may refuse to transact any business; but railroad companies are common carriers; they must furnish transportation when requested; they must operate their roads or forfeit their franchises; merchants may charge any price they see fit for their wares, but railroad companies are restricted to reasonable and just charges for transportation (Interstate Commerce Act, § 1); merchants may sell articles of like character and value for as many different prices as they have different customers, but railroad companies are restricted to the same charges to all their customers for like services (Interstate Commerce Act, § 2); merchants may give to any customers or any localities any preference or advantage they choose over other customers or localities, but railroad companies are prohibited from giving any undue preference or advantage to any party or place (Interstate Commerce Act, § 3); merchants may sell articles of inferior value for higher prices than those they charge and receive for those of greater value, but railroad companies are prohibited from charging or receiving a greater compensation for a short haul than for a long haul (Interstate Commerce Act, § 4); merchants may keep their prices secret; railroad companies must publish their rates for transportation, and are prohibited from charging or receiving a greater or less compensation than that specified in the published schedules (Interstate Commerce Act, § 6); merchants may change their prices instantly and without notice, railroad companies are prohibited from increasing their rates except after ten days' public notice or from decreasing them except after three days' public notice (Interstate Commerce Act, § 6); merchants may transact their business free from the supervision or interference of the government; but railroad companies are subject to the supervision of a Commission, established by the government, authorized to take the necessary proceedings for the enforcement of these restrictions (Interstate Commerce Act, § 12). These restrictions relate almost exclusively to rates for the transportation of freight and passengers. They are numerous, radical, and effective. They became operative by an Act of Congress three years before the Anti-Trust Act was passed, and they establish beyond cavil that from that date the public policy of the nation was that competition between railroad companies engaged in interstate commerce should not go wholly unrestricted.

If we turn now to the published reports of the Interstate Commerce Commission, whose opinion on such matters is certainly entitled to great consideration, we find the view even more clearly expressed that it was the purpose of Congress to place important restraints upon competition, that uncontrolled struggles for patronage by railway carriers are frequently detrimental to the public welfare, that rate wars are especially injurious to the business interests of the country and contrary to the spirit of existing laws, that the Interstate Commerce Act invites conferences between railway managers, and that concert of action in certain matters by railway com-

panies is absolutely essential to enable it to accomplish its true purpose.

In the Fourth Annual Report of the Commission, at page 19, we find the following statement:

"It is thus seen at every turn that the regulation of rates on a consideration of the pecuniary or other situation of any single road, and without a survey of the whole field of operations whereby its business may be affected, and under a supposition that what is done in respect to that road may be limited in its consequences, is entirely antagonistic to all principles of railroad transportation. The railroad managers have perceived this from the very first, and it is because they have perceived this that they have been compelled to organize themselves into railroad associations, for the purpose of agreeing upon classifications and rates, and upon a great variety of other matters pertaining to the methods of conducting interlocking and overlapping business, and all business affected by competitive forces." And on page 21 of the same report the following:

"In former reports, the Commission has referred to the undoubted fact that competition for business between railroad companies is often pushed to ruinous extremes, and that the most serious difficulties in the way of securing obedience to the law may be traced to this fact. When competition degenerates to rate wars, they are as unsettling to the business of the country as they are mischievous to the carriers, and the spirit of the existing law is against them."

In the Second Annual Report, on page 25, when speaking of the unity of railroad interests, the Commission uses this language:

"But the voluntary establishment of such extensive responsibility would require such mutual arrangements between the carriers as would establish a common authority, which should be vested with power to make traffic arrangements, to fix rates, and to provide for their steady maintenance, to compel the performance of mutual duties among the members, and to enforce promptly and efficiently such sanctions to their mutual understandings as might be agreed upon."

And in the same report, on page 28, we find the following:

"A short road may sometimes make itself little better than a public nuisance by simply abstaining from all accommodation that could not by law be forced from it. It would not be likely to do this unless for some purpose of extortion from other roads, but the existence of a power to annoy and embarrass is a fact of large importance. The public has an interest in being protected against the probable exercise of any such power. But its interest goes further than this; it goes to the establishment of such relations among the managers of roads as will lead to the extension of their traffic arrangements with mutual responsibilities, just as far as may be possible, so that the public may have, in the services performed, all the benefits and conveniences that might be expected to follow from general federation. There is nothing in the existence of such arrangements which is at all inconsistent with earnest com-

petition. They are of general convenience to the carriers as well as to the public, and their voluntary extension may be looked for until, in the strife between roads, the limits of competition are passed, and warfare is entered upon. But, in order to form them, great mutual concessions are often indispensable, and such concessions are likely to be made when relations are friendly, but are not to be looked for when hostile relations have been inaugurated."

In the First Annual Report, on page 83, the Commission further said:

"To make railroads of the greatest possible service to the country, contract relations would be essential, because there would need to be joint tariffs, joint running arrangements and interchange of cars, and a giving of credit to a large extent, some of which were obviously beyond the reach of compulsory legislation, and, even if they were not, could be best settled, and all the incidents and qualifications fixed, by the voluntary action of the parties in control of the roads respectively. Agreement upon these and kindred matters became, therefore, a settled policy, and short independent lines of road seemed to lose their identity, and to become parts of great trunk lines, and associations were formed which embraced all the managers of roads in a state or section of the country. To these associations were remitted many questions of common interest, including such as are above referred to. Classification was also confided to such associations, it being evident that differences in classification were serious obstacles to a harmonious and satisfactory interchange of traffic. But what perhaps, more than anything else, influenced the formation of such associations, and the conferring upon them of large authority, was the liability, which was constantly imminent, that destructive wars of rates would spring up between competing roads to the serious injury of the parties and the general disturbance of business. Accordingly, one of the chief functions of such associations has been the fixing of rates, and the devising of means whereby their several members can be compelled or induced to observe the rates when fixed."

It would extend this opinion to an unreasonable length if we assumed to state the reasons which probably influenced Congress to impose some restrictions upon competition in the matter of railway transportation, and to place railway carriers under the operation of a law which, for its successful execution, as pointed out by the Interstate Commerce Commission, seems to some extent to invite conference and concert of action. It is likewise unnecessary for us to state the reasons why railroad companies should be accorded the privilege of entering into arrangements with other companies which may, to some extent, regulate competition. Reasons to that effect have been stated with great ability and persuasive force in some of the cases to which we have already referred, notably in *Manchester & L. R. Co. v. Concord R. Co.* (N. H.) 3 Inters. Com. Rep. 319, 9 L. R. A. 669. But, without entering into that discussion, it is sufficient to say that, in our judg-

ment, there was no hard and fast rule in force when the Anti-Trust Act was enacted which made every contract between railroad companies void on grounds of public policy if it in any wise checked competition. In our judgment, the more reasonable doctrine then prevailed, especially in view of the recent passage of the Interstate Commerce Act, that such contracts were void, if, judged in the light of all the circumstances and conditions under which they were made, they unreasonably restricted competition.

In view of the foregoing principles, it remains for us to examine the contract which is alleged to be in violation of the Anti-Trust Act, but before doing so a preliminary observation will not be out of place. The Anti-Trust Act is a criminal statute, and it should not be so construed as to subject persons to the penalties thereby imposed unless the contract complained of is one that is clearly within the provisions of the statute. It is also well to note that the case comes before us simply on bill and answer. The bill alleges that its purpose, and that of the association formed under it, was to suppress competition, enhance rates of freight, and monopolize the traffic. The answers deny these averments, and allege that the purpose of the contract and association was to carry into effect the provisions of the Interstate Commerce Act, and to make rates public and steady. The bill alleges that the effect of the contract and association has been to raise the rates of freight above those which the public might have reasonably expected to obtain from free competition. The answers deny this allegation, and aver that the effect has been to maintain reasonable rates, and that more than 200 reductions of rates have been effected through the association. Upon a hearing on bill and answer the averments of fact contained in the bill are overcome by the denials of the answer, and the averments of fact in the answer stand admitted. *Tainter v. Clark*, 5 Allen, 66; *Brinckerhoff v. Brown*, 7 Johns. Ch. 217; *Perkins v. Nichols*, 11 Allen, 542.

The result is that the government's right to relief here rests upon the contract itself, and the fact that the rates maintained under it have not been unreasonable, and that many reductions have been made under its operation. The ordinary rules of interpretation must then be applied to the language of this contract, and, if it appears that its purpose and tendency were to unreasonably restrict competition, it must be declared illegal. *Dillon v. Barnard*, 88 U. S. 21 Wall. 490, 487, 22 L. ed. 673, 676; *Interstate Land Co. v. Marvell Land Grant Co.* 139 U. S. 569, 577, 35 L. ed. 278, 281.

In construing the contract it must also be remembered that fraud and illegality are not to be presumed, and that the purpose of the contract is that which is clearly manifest by its terms. In *Mitchell v. Reynolds*, 1 P. Wms. 181, the unfortunate remark "that wherever such contract *stat indifferenter*, and for aught appears, may be either good or bad, the law presumes it *prima facie* to be bad," fell from Chief Justice Parker. This seems to be the reverse of the proposition that every man is

presumed to be innocent until he is proved to be guilty. It has long been repudiated by the courts of England and America. The burden is on the party who seeks to put a restraint upon the freedom of contract to make it plainly and obviously clear that the contract is against public policy, and the true rule of construction is that neither fraud nor illegality is to be presumed, but the contract is to be assumed to have been made in good faith for the purpose which appears on the face of it, and not colorably for any other. *Printing & N. Reg. Co. v. Sampson*, L. R. 19 Eq. 463; *Tallis v. Tallis*, 1 El. & Bl. 391; *Rousillon v. Rousillon*, L. R. 14 Ch. Div. 351, 365; *Stewart v. Erie & W. Transp. Co.* 17 Minn. 873, 391; *Marsh v. Russell*, 66 N. Y. 288; *Phippen v. Stickney*, 3 Met. 384, 389.

Proceeding, then, to an examination of the contract, we find it to be substantially as follows: In the preamble there is a declaration that the association is formed for "mutual protection by establishing and maintaining reasonable rates, rules, and regulations, both through and local." Article 1 declares that substantially all traffic competitive between two or more members in that part of the United States between the Mississippi and Missouri rivers and the Pacific ocean shall be governed by the association. It is provided by article 2 that the association shall choose a chairman by unanimous vote; that there shall be regular monthly meetings of the association in which each member must be represented by some responsible officer authorized to act definitely on all questions to be considered; that a committee shall be appointed to establish rates, rules, and regulations for the traffic, and that these shall be put into effect; that any railroad company may give five days' written notice prior to any monthly meeting of any proposed reduction of rates or change of rules, and eight days' notice as to the traffic of Colorado or Utah; that thereupon the reduction or change shall be considered and voted upon by the association at the next monthly meeting, and all members shall be bound by the decision of the association, "unless then and there the parties shall give the association definite written notice that in ten days thereafter they shall make such modification notwithstanding the vote of the association;" that any member may without notice, at its peril, make any rate, rule, or regulation necessary to meet the competition of outside lines, subject to a liability to pay a penalty of \$100 if the association decides by a two thirds vote that the rate, rule, or regulation was not necessary for that purpose; that all arrangements with connecting lines for the division of through rates relating to traffic covered by the agreement shall be made by authority of the association, and that the chairman of the association shall punish violations of the agreement by fines not exceeding \$100 in any case. Article 3 makes the chairman the executive officer of the association, requires him to publish and furnish to the members of the association the rates, rules, and regulations established, and all changes in them, and requires him to enforce the provisions of the contract. Article 4

prohibits under-billing or billing at a wrong classification. Articles 5 and 6 provide for the appointment of the necessary employees and the payment of the necessary expenses of the association. Article 7 provides for arbitration in case the managers of the parties to the agreement fail to agree upon any question arising under it; and article 8 provides that any member may withdraw from the association on 30 days' notice.

It is obvious at a glance that this agreement is not affected by any of the vices of an ordinary pooling contract. The income of each member of the association under the terms of the agreement is still measured by the amount of freight and the number of passengers it carries, and it is still to the interest of each member of the association to make that patronage as great as possible, by affording to the public superior facilities for safe, speedy, and convenient transportation. Under the operation of the agreement, each company must still compete with its associate members in the character of its roadbed, quality of its equipments, length of route, convenience of its terminal facilities, and in the efficiency of its management, for all of these considerations will necessarily have a marked influence upon the amount of its patronage.

In other of its features, also, the contract is not subject to criticism. In these days, when persons engaged in many other callings and avocations are in the habit of meeting at intervals, as associations, for the purpose of cultivating more friendly relations and establishing regulations conducive to the general welfare of the trade, it is difficult to see upon what just grounds representatives of railway companies can be denied the right of forming associations for the purpose of friendly conference and to formulate rules and regulations to govern railway traffic. The fact that the business of railway companies is irretrievably interwoven, that they interchange cars and traffic, that they act as agents for each other in the delivery and receipt of freight and in paying and collecting freight charges, and that commodities received for transportation generally pass through the hands of several carriers, renders it of vital importance to the public that uniform rules and regulations governing railway traffic should be framed by those who have a practical acquaintance with the subject, and that they should be promulgated and faithfully observed. The advisability of establishing such rules and regulations in the mode above indicated, particularly for the uniform classification of freight, has been frequently pointed out in the reports of the Interstate Commerce Commission. Indeed, the benefits that would result from uniform rules and regulations, and from uniformity in the classification of freight, seem to us so obvious that we need not stop to enumerate them.

We are of the opinion, therefore, that the stipulations of this agreement enjoining a monthly conference between representatives of the various members of the association, and the appointment of a committee to formulate rules and regulations governing the

traffic embraced by the agreement are not only not opposed to public policy, but, if faithfully carried out, will tend to promote the public interests. It is also obvious, we think, that the stipulation requiring five days' written notice of a proposed reduction in rates does not, in and of itself, render the contract unlawful. It is certain that a contract not to reduce established rates without a public notice of three days, and not to increase them without a notice of ten days, would not be against public policy, because the Interstate Commerce Act has prohibited such changes with less notice. The plain object of this provision was to prevent competitors from resorting to secret, unfair, and ruinous methods of warfare, to make competition fair and open, and to enable shippers to modify their action to suit the coming changes. There is no purpose of the provision, or of the policy that dictated it, that would not be as well, if not better, served by a notice of fifteen or forty days, as one of three days.

But it is urged that the contract in question restrains competition in rates, and is therefore unlawful. That it does have some tendency to check competition in that respect will not be denied; but that the restraint imposed is slight, that there is abundant room within the terms of the agreement for the play of all the healthy forces of competition, and that it has a pronounced tendency to prevent sudden and violent fluctuations in rates, commonly termed "rate wars," seems to us to be equally manifest. It is not reasonable to suppose that any member of the association which, by virtue of its situation, can really afford to transport freight or passengers between any two competitive points for a substantially less sum than its competitors, will be likely to forego the advantage that its situation gives it, even under the operation of the agreement. It is much more probable that, under the operation of the agreement, as under the influence of free competition, the rates between competitive points will be largely, if not entirely, based upon the rate which the road having the shortest line and best facilities esteems fair and reasonable compensation.

It will be observed that under the terms of the agreement no member of the association has bound itself to be governed by a rate fixed by a vote of the majority for a longer period than ten days after the monthly meeting next succeeding its notification of a proposed change in rates; and for that reason the limitation imposed by the contract upon the right of a member of the association to adopt such a rate as it sees fit is very slight, and the power reposed in the association is correspondingly small. We fail to see, therefore, that the natural or probable effect of this contract will be to sensibly raise either freight or passenger rates above the level which they would attain under the influence of what is termed "unrestricted competition." On the other hand, it seems highly probable that the contract in question will prevent sudden and violent fluctuations in freight rates, such as often upset the business calculations of entire communities, and that this was one of the

main reasons which led to the formation of the association. We are also persuaded that it will have a sensible tendency to induce a more uniform system of classification throughout the great region where the association operates, and also to induce the establishment of a more perfect code of rules and regulations governing freight traffic. It may also tend to prevent stealthy, secret, and unfair methods of warfare, and to make the strife for patronage among the members of the association open, fair, and honorable. All of these are objects that are in line with the true spirit of the Interstate Commerce Act and an intelligent public policy.

The result is that this contract, in view of all the circumstances of the case and the situation of the parties thereto, does not impose such unreasonable restraints on competition as will warrant us in holding that it is one of those contracts or conspiracies in restraint of trade and commerce among the several states which fall within the inhibition of the Anti-Trust Act of July 2, 1890.

Nor is there any monopoly of trade, or any attempt to monopolize trade, within the meaning of that Act, evidenced by this contract. So far as can be learned from it, the association has never intended to have, and never has had or attempted to have, any trade. It has not held or attempted to obtain or hold any property except the moneys necessary for the bare expenses required to pay its officers and employes. It has been and is a mere adviser with its members upon disputed questions submitted by the contract to its consideration. So far as can be learned from the contract, each member of the association is striving with every other in its territory, whether a member of the association or not, to divert from the latter and gather to itself all possible trade. There are provisions in the contract that the chairman may authorize members to meet the rates of competitors who are not members of the association, and that any member may meet the rates of such a competitor at its peril; but these provisions were necessary for the protection of members of the association against the attacks of non-members. Without such provisions unreasonably low rates established by the latter would draw away the business of the members, and deprive them of the opportunity to compete on equal terms. These provisions give no company any higher right or greater power than it had before the contract was made, but simply reserved to each the privilege of exercising its original right to meet competition without giving the fifteen days' notice in case of a warfare upon it by a non-member.

A monopoly of trade embraces two essential elements: (1) The acquisition of an exclusive right to, or the exclusive control of, that trade; and (2) the exclusion of all others from that right and control. There is nothing in this contract indicating any purpose or attempt to obtain such a monopoly. The great transportation systems of the Great Northern Railway Company, the Northern Pacific Railroad Company, the Southern Pacific Railroad Company, and the Texas Pacific Railroad Company were operated in the

region subject to the regulation of this association, but none of these companies were members of it; and, even if they had been, there would still have been no evidence of any attempt to monopolize trade here, because each member is left to compete with every other for its share of the traffic. *Re Greene*, 52 Fed. Rep. 104, 115.

The position that these railroad companies have so far disabled themselves from the performance of their public duties by the execution of this contract as to give ground for the avoidance of the contract, and for a forfeiture of their franchises, cannot be successfully maintained. It is well settled upon principle and authority that, where a corporation by a contract entirely or substantially disables itself from the performance of the duties to the public imposed upon it by the acceptance of its charter, the contract is void, and its franchise may be forfeited. The reasons for this rule, and some of the limitations of it, were stated by this court in *Union Pac. R. Co. v. Chicago, R. I. & P. R. Co.* 10 U. S. App. 98, 51 Fed. Rep. 809, 317-321; and it is unnecessary to repeat them here. It goes without saying that this rule in no way limits the power of a corporation to discharge its duties through agents of its own selection. There is no doubt that each of these corporations could lawfully appoint an expert or a committee of experts upon the subject of classification and rates of freight upon its road, empower him or them to fix the rates, and then maintain them for forty days unchanged. Practically the fifteen representatives of these companies, at a meeting of the association, their chairman, and their committee that originally fixed the rates and rules, together constitute an advisory committee on rates and rules of traffic, composed of men whose intimate knowledge of the needs of the shippers, and of the character and quantities of the commodities transported through the different portions of the wide area traversed by these railroads, and whose wide experience in the effect of various rates upon the accommodation of the public and the business of the companies fit them well to carefully consider and wisely establish just and reasonable rates throughout this territory. Such a committee each company acting independently might have appointed, and it is not perceived that the fact that two or more companies appoint the same men to establish rates and rules for the traffic upon their respective roads in any way invalidates the appointment of either.

Moreover, the power delegated to the association, its committee and chairman, is so limited in extent and so restricted in time that it is hardly worthy of serious consideration as the ground for the avoidance of a contract and the forfeiture of a franchise. The power granted to the committee originally chosen to establish the rates and rules expired by limitation upon a thirty days' notice of withdrawal from the association; the power of the association itself to prevent modifications and changes in the rules and rates established ceases after fifteen days' notice of an intention to make the modifications and changes notwithstanding its ac-

tion. It is true that there is a provision in the second article of the agreement that regular meetings of the association shall be held, "unless notice shall be given by the chairman that the business to be transacted does not warrant calling the members together," but the remark of the counsel for the government that this gives the chairman power to prevent the consideration of proposed changes in rates, and thus to maintain them indefinitely, by preventing a meeting of the association, cannot be seriously considered. The effect of the contract is that, when a company gives notice of a proposed change of any importance, the meeting shall be held. Such a notice presents business to be transacted that does warrant calling the members together. If, under such circumstances, the chairman gives notice that there is no such business, he violates the contract. The presumption is that he will not violate it; and, if he does so, that is no ground for an avoidance of the contract.

The result is that neither this contract nor the association formed under it can be held to be obnoxious to the provisions of the Anti-Trust Act in view of the facts admitted by the pleadings in this suit, and in the absence of other evidence of their consequences and effect.

Many of the considerations to which we have referred are presented upon the argument of the question whether or not the Anti-Trust Act applies to or in any way governs transportation companies that are engaged in that part of interstate and international commerce which consists solely of the transportation of persons and property, in view of the very substantial regulation of this part of commerce provided by the Interstate Commerce Act. The views we have expressed render it unnecessary to determine this question, and we express no opinion upon it. We rest this decision on the ground that, if the Anti-Trust Act applies to and governs interstate and international transportation and its instrumentalities, the contract and association here in question do not appear to be in violation of it.

The decree below is affirmed, without costs.

Thayer, D. J., concurs.

Shiras, D. J., dissenting:

I am unable to concur in the conclusion reached by the majority of the court in this case, and propose to state the reasons for such nonconcurrence.

Assuming that the Anti-Trust Act of July 2, 1890, is applicable to interstate railroad companies and the business transacted by them, it seems to me entirely clear that the contract entered into by the railway companies forming the Trans-Missouri Freight Association is in contravention of the statute, in that it deprives the public of the benefit of free competition between the associated railway companies, and thereby subjects the commerce of the regions tributary to these lines of railway to the possibility, if not the certainty, of paying increased rates for the transportation of freight over the same.

It is doubtless entirely true that at the present time a more liberal rule prevails than in the earlier days in regard to contracts affecting the business carried on by private citizens or corporations, when the same is essentially of a private nature, and only indirectly affects the public at large. As is pointed out in the opinion of the court, the use of steam and electricity in connection with the mercantile and commercial business of the world has so greatly increased the facilities for commercial intercourse that contracts which a century ago would have been in fact an unreasonable restriction upon trade in its then condition would not now produce the same result, and hence would not fall within the condemnation of the principle which declares unlawful all contracts or combinations which work an unreasonable restriction upon trade and commerce. The principle itself, however, remains in force at the common law even in regard to business enterprises which deal only with matters of private interest, and only incidentally affect the community at large. At an early day a distinction was recognized at the common law between the rules applicable to business pursuits of a purely private nature and those connected with matters directly affecting the community at large; as, for instance, the dealing in commodities forming the necessities of life. Contracts or combinations tending to create a monopoly in the latter articles were condemned as contrary to public policy, when like contracts affecting other kinds of property were held to be valid; and the same principle holds good at the present time. Another distinction which is now firmly established and enforced grows out of the nature of the business contracted about, and the relation the contracting parties bear thereto. An individual or a private corporation engaged in a purely private enterprise may lawfully enter into contracts or combinations in regard thereto which would be invalid and illegal if the business was of a public nature, and the corporation was created for the purpose of engaging therein. Thus in *Gibbs v. Consolidated Gas Co.* 130 U. S. 396, 32 L. ed. 779, the Supreme Court, speaking by Mr. Chief Justice Fuller, declared that—

"The supplying of illuminating gas is a business of a public nature to meet a public necessity. It is not a business like that of an ordinary corporation engaged in the manufacture of articles that may be furnished by individual effort. . . . Hence, while it is justly urged that those rules which say that a given contract is against public policy should not be arbitrarily extended so as to interfere with the freedom of contract (*Printing & N. Reg. Co. v. Sampson*, L. R. 19 Eq. 462) yet in the instance of business of such character that it presumably cannot be restrained to any extent whatever without prejudice to the public interest, courts decline to enforce or sustain contracts imposing such restraint, however partial, because in contravention of public policy. This subject is much considered, and the authorities cited in *West Virginia Transp. Co. v. Ohio River Pipe Line Co.* 22 W. Va. 600; *Chicago Gas-*

light & C. Co. v. People's Gaslight & C. Co. 121 Ill. 530; *Western U. Teleg. Co. v. American U. Teleg. Co.* 65 Ga. 160, 38 Am. Rep. 781. . . .

Innumerable cases, however, might be cited to sustain the proposition that combinations among those engaged in business impressed with a public or quasi public character, which are manifestly prejudicial to the public interest, cannot be upheld."

In *West Virginia Transp. Co. v. Ohio River Pipe Line Co.* 22 W. Va. 600, it is said:

"If there be any sort of business which from its peculiar character can be restrained to no extent whatever without prejudice to the public interest, then the courts would be compelled to hold void any contract imposing any restraint, however partial, on this peculiar business, provided, of course, it be shown clearly that the peculiar business thus attempted to be restrained is of such a character that any restraint upon it, however partial, must be regarded by the court as prejudicial to the public interest."

In *Chicago Gaslight & C. Co. v. People's Gaslight & C. Co.* 121 Ill. 530, it is declared that—

"The ordinary rule that contracts in partial restraint of trade are not invalid does not apply to corporations like appellant and appellee, because they were engaged in a public business, and in furnishing that which was a matter of public concern to all the inhabitants of the city."

It is not necessary to extend the citation of authorities upon this general proposition, but it is of vital importance to bear in mind the distinction that exists in this particular between private individuals or corporations engaged in ordinary business avocations and public corporations engaged in the performance of a public or governmental duty, like that of building and operating a public highway in the form of a railway line.

From the earliest days the duty of constructing and maintaining the public roads of a country has been recognized as one incumbent upon the government. To secure the construction of a railway running over the property of many individuals, the right of eminent domain must be called into exercise, and thus the character of a public enterprise is impressed upon it both by reason of the purpose it is intended to subserve and by reason of the governmental power exercised in its creation and maintenance. So, also, corporations created for the purpose of building and operating public highways in the form of railroads are of necessity public, not private corporations, because they are formed for the purpose of engaging in the public work of constructing and operating a highway for the use of the people at large, and because they are authorized to call into exercise the governmental right of eminent domain, a right which cannot be lawfully conferred upon a private corporation engaged solely in enterprises private in their nature. The failure to recognize the distinction existing between private enterprises carried on by individuals or private corporations, and public duties performed through the agency of public corporations, in my judgment has

misled the court in reaching the conclusion announced in the majority opinion.

As applied to private associations, the modern authorities undoubtedly sustain the proposition therein laid down, "that it is not the existence of the restriction of competition, but the reasonableness of that restriction, that is the test of the validity of contracts that are claimed to be in restraint of trade;" but that, in my judgment, is not the test of validity when the action of public corporations relative to public duties is brought in question.

Parties engaged in the manufacture or sale of lumber, dry goods, or other like articles primarily owe no duty to the public in connection therewith. They may limit or enlarge, continue or discontinue the business, as they please, and may charge exorbitant prices or the contrary. In these particulars they owe no special duty to the public, for they are not exercising any sovereign or public powers in carrying on such private enterprises, nor are they charged with the performance of a public duty. Hence they are at liberty to enter into contracts with other private parties engaged in like pursuits which may tend to regulate or restrict the business carried on by them, subject, however, to the rule that restrictions unreasonably affecting the freedom of trade and commerce cannot be sustained, because thereby the public interests are affected. Touching contracts between private parties in regard to pursuits essentially private in their nature, the test of validity we thus find to be the actual effect thereof on the public welfare. In regard to such private enterprises the public has no voice in the management thereof, nor any right of dictating what shall or shall not be done by the owners thereof, nor have the latter become bound to carry on the business in the interest or for the benefit of the public primarily. The contrary is true with regard to public corporations, clothed with the power to fulfill public duties, and engaged in enterprises the purpose of which is to discharge a governmental duty, and which require in their performance the exercise of the sovereign right of eminent domain.

Such public corporations owe primarily a duty to the community, and the relations existing between them and the public are in many particulars radically different from those pertaining to private corporations. Neither extended argument nor the citation of authorities is needed to show that the business of railway transportation is one of a public character, and which reaches and affects the business interests of the entire community. When a highway in the form of a railroad is constructed and put in operation, all parties living in the regions adjacent thereto are dependent upon the railroad for the carrying on of all business which involves the transportation of persons or property in connection therewith. The farmer is compelled to use the railway for the transportation of the products of his farm to market. The merchant must use the same agency in bringing to his place of business the merchandise in which he deals. Practi-

cally the business of the community, whether in connection with articles of prime necessity, like food or fuel, or the other articles which are produced or dealt in by the people at large, becomes of necessity wholly dependent upon the facilities for transportation furnished by the given railway. As to the majority of the community living along its line, each railway company has a monopoly of the business demanding transportation as one of its elements. By reason of this fact the action of the corporation in establishing the rates to be charged largely influences the net profit coming to the farmer, the manufacturer, and the merchant from the sale of the products of the farm, the workshop, and manufactory, and of the merchandise purchased and resold, and also largely influences the price to be paid by every one who consumes any of the property transported over the line of railway. There is no other line of business carried on in our midst which is so intimately connected with the public as that conducted by the railways of the country.

Certainly, if it be true, as held in *Gibbs v. Consolidated Gas Co.* 130 U. S. 396, 32 L. ed. 979, that the supplying of gas for illuminating purposes is a business of a public nature, because it supplies a public necessity, and that it is of such a character that contracts between companies engaged therein, looking to a regulating of competition, cannot be sustained because inimical to the public welfare, then it must also be true that the furnishing facilities for the transportation of the products of the country by means of railways is likewise a public business, and one of such character that contracts or combinations between the corporations engaged therein, intended to limit the effect of free competition upon the rates charged the public, must be held to be prejudicial to the public interests, and therefore to be invalid. It is said in the opinion of the court that—

"We find that it has long been settled that contracts or combinations of producers or dealers in staple commodities of prime necessity to the people, to restrict or monopolize their supply or enhance their price, pooling contracts or combinations between such producers or dealers to divide their profits in certain fixed proportions and pooling contracts or combinations between competing common carriers, are illegal restraints of trade, and void."

Are not railway companies engaged in the transportation of articles of prime necessity to the people? Do they not handle the food products of the country, the fuel, and all the other necessities of life? Do not the rates charged for the transportation of these articles have as much to do with determining the prices paid by the community as the rates charged by those engaged in buying and selling the same upon the open market? If combinations among the dealers in such articles to avoid competition and enhance the cost to the consumer are illegal and void, why are not combinations among common carriers engaged in the transportation of the same articles, tending to enhance the cost to

the consumer by avoiding the effect of competition upon the rates of transportation, equally void?

If I correctly understand the opinion of the majority, it is therein admitted that it is the settled law that contracts or combinations between producers or dealers in staple commodities of prime necessity to the people, tending to monopolize the supply or enhance the price, are contrary to public policy and therefore void; and yet it is maintained that public corporations like railway companies may combine to fix the rates to be charged for the transportation of the like commodities, which, of necessity, affects the cost to the consumer as well as the value to the producer, and that contracts thus arbitrarily establishing the rates to be charged, and avoiding the effect of competition thereon, cannot be held to be invalid, unless it be clearly shown that the rates thus fixed are unreasonable. It seems to me the two propositions are clearly at variance.

The right to freely contract and combine possessed by private parties engaged in private pursuits is limited and denied when they come to deal with staple commodities, because the whole community is interested in these articles of prime necessity, and any contract affecting them affects the public; and clearly public corporations are under a more stringent rule in this particular.

Unlike private parties engaged in private pursuits, which only incidentally, if at all, affect the public welfare, corporations created for the purpose of constructing and operating the modern form of public highways owe primarily a duty to the public. They are created to subserve a public purpose, to wit, to furnish the means for the transportation of the people and property of the country, and they are under constant obligation to use their corporate powers in the interest of and for the benefit of the community from which these powers have been derived.

The right to demand transportation for one's self or property over such highways belongs to every member of the community, and the rate to be paid for such service is a question which affects every one using the highway, and, in addition, every member of the community is affected by the rates charged, for the amount thereof enters into and affects the price of every article that is bought and sold in the community. The duty of transporting persons and property over a line of railway is a public duty, assumed by the corporation operating the particular line, and in the proper performance thereof the public has a direct interest. The proper performance of this duty includes the rate of compensation to be charged for the services rendered, and this is a question in which the public has a direct and most important interest, and all contracts or combinations intended to affect the rate to be charged directly affect the public welfare. Clearly, therefore, railway transportation of persons and property comes within the classes of business, which, in the language of the Supreme Court in *Gibbs v. Consolidated Gas Co.* 190 U. S. 396, 32 L. ed. 979, are of such a public character that presumably they

cannot be restrained to any extent whatever without prejudice to the public interest.

In the opinion of the majority it is practically assumed that the same freedom to contract or combine with others is possessed by the public corporations engaged in railway transportation as belongs to private parties engaged in private pursuits. It does not so seem to me, either upon principle or authority. Private corporations are not created for the primary purpose of furthering the public interests, nor do they assume the performance of a public duty. Conducting private enterprises for private gain, there is no presumption that their acts will affect the public welfare, and hence their freedom of contract and action is not to be limited or denied, unless it clearly appears that the interests of the community will be injuriously affected by the action proposed to be taken. On the other hand, in the case of public corporations engaged in carrying on a public enterprise, it is apparent that every course of action intended to affect the business transacted by the corporation must of necessity affect the public interests.

A railway corporation engaged in the transportation of the persons and property of the community is always carrying on a public business, which at all times directly affects the public welfare. All contracts or combinations entered into between railway corporations, intended to regulate the rates to be charged the public for the service rendered, must of necessity affect the public interests. By reason of this marked distinction existing between enterprises inherently public in their character and those of a private nature, and further, by reason of the difference between private persons and corporations engaged in private pursuits, who owe no direct or primary duty to the public, and public corporations created for the express purpose of carrying on public enterprises, and which, in consideration of the public powers exercised in their behalf, are under obligation to carry on the work intrusted to their management primarily in the interest and for the benefit of the community, it seems clear to me that the same test is not applicable to both classes of business and corporations in determining the validity of contracts and combinations entered into by those engaged therein.

In the case of railway companies engaged in the public business of transporting persons and property from state to state over the highways of the country, it is, in my judgment, clearly contrary to the public welfare, and therefore illegal, for these public corporations to enter into contracts and combinations intended to limit or nullify the effect of free and unrestrained competition upon the rates to be charged the public for the services rendered in the transportation of persons or property over the public highway. So far as the national government has dealt with this question, it has as yet not undertaken to declare by statute what rates shall be charged by the railway companies, nor has it established a fixed maximum or minimum limit. In this particular the public has relied upon the effect of competition in

keeping the rates charged within reasonable bounds. Hence it is that all sections of the country have so eagerly striven to secure the construction of competing lines of railway. There is scarcely a town or city in the community that has not felt the need of securing access to rival lines of transportation, in order that it might enjoy the benefits of competition in reducing the freight and passenger tariffs of the railway companies. If, after a community has by donations or taxation, expended a large sum in securing the construction of a second line of railway for the purpose of thereby enjoying the benefits of competition, it is open to the two railway corporations to combine together, and by contract establish a tariff of rates which neither company is at liberty to depart from, it is clear that the community is thereby deprived of its only protection against unfair charges.

In my judgment, the community is absolutely entitled to the protection against unfair rates which is afforded by free and unrestrained competition between the companies engaged in the transportation business of the country, and any contract or combination which is intended to restrict competition in this particular is inimical to the public welfare, and is therefore illegal.

In the opinion of the majority of the court it is urged, in substance, that it is lawful to place a reasonable restriction upon competition, and that, therefore, the question in each case is whether the restriction placed upon competition results in the imposition of unreasonable rates for the services rendered. This is the rule in regard to private parties engaged in private pursuits, because as to such pursuits a restriction upon competition does not affect the public unless it is unreasonable, and the public has no right of complaint until its interests are unfavorably affected; but, as I have endeavored to maintain, in the case of public railway corporations, the work they are engaged in is inherently of a public nature, and any contract or combination entered into between them, intended to affect the rates to be charged, must of necessity affect the entire community. In view of the public interest in the rates charged for transportation over the public highway, and in the absence of legislation affording other means of protection, the community cannot be deprived of the safeguard secured by free and unrestricted competition between the different lines of railway without placing the welfare of the public in subjection to the interests or supposed interests of those managing these corporations, which certainly cannot be lawfully done.

But it may be argued that due protection in this particular is afforded by holding that reasonable restriction upon competition as to rates will be sustained, and unreasonable restrictions will be held invalid. I apprehend that no other meaning can be given to this proposition than that, if the rates established under a given restriction upon competition are reasonable, then they will be sustained; otherwise not. The reasonable rates which the community is entitled to enjoy are those which result from free and unrestrained com-

petition, and not those which are agreed upon by the railway companies in the absence of competition. In the absence of legislation establishing a standard for reasonable rates, and in the absence of rates fixed by free competition, what practicable criterion is there for determining whether a tariff of rates agreed upon by railway companies is or is not reasonable with reference to the public? If it be the law that railway companies may combine together, and by contract agree upon the schedule of rates to be charged, and bind themselves under penalties not to depart from the schedule thus established, and if the individual citizen can obtain no relief against the exaction of rates thus fixed, unless he can in each instance prove to a court and jury that the rate charged is unreasonable, then he is in fact wholly without remedy. The great cost and other evils of litigation of this character would ordinarily deter the private citizen from the effort to maintain his rights by an appeal to the courts.

But if the citizen should assume these burdens, and should contest the rightfulness of the charges complained of, he would, under the view advanced in the majority opinion, be compelled to establish by competent evidence that the rate complained of was unreasonable. By what criterion is the question of the reasonableness of the rate charged to be determined? The article shipped is perhaps a carload or two of livestock or of wheat or other like products. Is the citizen to be compelled to attempt to prove what it really costs the railway company to transport these cars? Is the inquiry to embrace an investigation into the cost of the construction of the road, of the equipping the same, and of operating the road on the one hand, and into the total amount and character of the business done by the road, and of the amounts received therefrom, so as to ascertain whether a due relation exists between the income and expenditure? It must be apparent to any one that it would be wholly impracticable to enter upon such an investigation, and, if it was entered upon, the citizen would be at such a disadvantage as to amount to a total denial of justice to him. If it be said that the reasonableness of the rate charged is to be ascertained by comparison with the rates charged for like services by other railroads, then the rates accepted as the standard of comparison must be such as are the result of free competition, because it would not do to accept as a standard rates fixed by a combination, for it could not be known that these rates are reasonable, and the proposed standard would be without value as evidence. The difficulties that would of necessity be encountered by any citizen in establishing the unreasonableness of a particular rate charged him are such as to render a remedy by that method of no value, and hence it is that at all times the citizen is entitled to the protection afforded him by absolutely free competition between railway companies. Any contract or combination which tends to deprive the citizen of the protection thus afforded him is contrary to public policy.

In the opinion of the majority a very full and careful analysis is made of the various

provisions of the contract entered into by the defendant companies, and the benefits to be derived therefrom are pointed out. I do not doubt that in many respects the provisions of this contract, if carried out, would operate beneficially for the companies and without injury to the public; but the illegality of the contract, in my judgment, lies in the fact that its main purpose is to protect the companies from the effects of free competition in reducing the rates to be collected for the transportation of freight over the lines of railway operated by the contracting corporations. Certainly the defendants, if they considered themselves bound by this agreement, were no longer at liberty to compete with each other in the matter of rates to be charged the public.

The rates are to be established by a committee, and are to be observed by all the contracting parties, with a liability to a penalty for any breach of the contract. It is clearly evident that the defendants entered into this contract in the expectation that thereby a schedule of rates would be fixed which would differ from those which would prevail in the absence of such concerted action.

The several companies are no longer left free to fix rates based upon considerations pertaining to their own lines of railway, the cost of operating the same, and the facilities possessed for handling the business. If the making and enforcement of this contract would not have the effect of establishing a schedule of rates other and different from what would obtain in the absence of the contract, what induced the companies to enter into it?

I can place no other construction upon this contract than that its main object was to remove the question of rates from the field of competition. In my judgment, it is not necessary to enter upon a minute examination of the averments made in the bill and denied or admitted in the answer. The bill charges and the answer admits that the defendant companies entered into the contract in question, and the main issue in controversy is as to the validity of the contract. As I construe it, the invalidity thereof is apparent upon its face, in that it clearly appears that the purpose of the contract was to establish by agreement a schedule of rates which was to bind all the contracting companies, and which each company was bound to enforce as against its patrons; thus depriving the public of the protection resulting from free and unrestrained competition between these public corporations. It matters not that the particular rates now enforced under this contract may be wholly reasonable. That is not the question. The point to be decided is whether these public corporations, engaged in a public enterprise, have the right to agree that they will cease to compete with each other.

Whether these corporations shall or shall not be relieved from the effects of free and fair competition in the carrying on of the public work they are engaged in is a question to be decided by the people, acting through the proper governmental agency. It is not for the railway companies to decide

when they will compete with each other and when they will not. The public welfare demands that they should remain always subject to the operation of this principle of free competition, unless they are freed therefrom by legislative action, whereby other safeguards are substituted for that afforded the public by the operation of the principle named.

If I correctly apprehend that portion of the majority opinion which deals with the effect of the Interstate Commerce Act, it is therein argued that this Act radically changes the rights of the railway companies and the public in this particular, and that it was intended thereby to free the companies from the effects of free competition. With all due deference to my brethren, I must yet be permitted to say that it seems to me that the opinion always loses sight of the distinction existing at the common law between parties following private pursuits and public corporations engaged in public enterprises.

The Interstate Commerce Act did not materially change the rights pertaining to the public. It created certain machinery for the better enforcement and protection of the public interests, but the rights to be protected were already in existence, and the statute in this respect is only declaratory of common law principles. Before the enactment of that statute, railway companies were recognized to be public corporations, charged with the duties and obligations pertaining thereto. As common carriers they were under legal obligation to deal with the public, and to afford equal facilities to every citizen, and they were only entitled to demand reasonable, and not exorbitant, compensation for the services rendered by them. The purpose of the Interstate Commerce Act was not so much to change the legal rights of the common carriers and of the public as it was to compel a change in the practices of the railway companies, and to enforce compliance on their part with the duties and obligations which rested upon them under the principles of the common law. The line of argument followed by the majority seems to assume that the main purpose of the Interstate Commerce Act is to regulate the relations between the competing lines of railway, and to protect the weaker lines of railway and the capital invested therein from being absorbed by the stronger competitor. That there are evils of this nature of great magnitude is not to be denied, but the Interstate Commerce Act was not enacted for their eradication.

The primary purpose of that Act was to deal with the relations existing between the common carriers and the public, and to enforce the rights of the latter. Experience had shown that railway companies had, in many instances, favored particular localities or particular parties or particular classes of business at the expense of the community at large, and the Act was, in the language used by the Supreme Court in *Union Pac. R. Co. v. Goodridge*, 149 U. S. 680, 37 L. ed. 896, intended "to cut up by the roots the entire system of rebates and discriminations in favor of particular localities, special enterprises, or favored corporations, and to put all ship-

persons on an absolute equality." The uniformity and equality of rates sought to be secured by that Act are not between the schedules of rates charged by the several companies, but between the charges actually made by each railway company to its patrons. The Act does not require the schedule of rates adopted by one company to conform to that of a rival company. What it does demand of each company is that, in dealing with its customers, it shall make no unjust discrimination, but shall, for the like service performed under similar circumstances, charge the same rate to all. The Act provides that all charges for the transportation of persons or property from state to state shall be reasonable and just, but no standard for ascertaining whether a given rate is reasonable or not is established by the Act.

I fail, therefore, to perceive the force of the argument that the adoption of the Interstate Commerce Act worked a radical change in the relations existing between railway companies and the public, and that one effect thereof was to authorize the former to combine together for the purpose of escaping the effect of competition upon the rates to be charged the public for the services rendered. Before the adoption of that Act the community was certainly entitled to the protection derived from free competition between the lines of railway engaged in interstate traffic, and there is nothing in that Act which deprives the public of this safeguard. That Act was intended to secure to the public the enjoyment of the pre-existing right to reasonable rates upon interstate commerce, and to defend the public against the evils resulting from unjust discrimination on behalf of favored parties, localities, or classes of businesses.

In the opinion of the court are found citations from the reports of the Interstate Commission in which are depicted the evils that are occasioned to the railway companies and the public by warfares over rate charges, and the advantages that are gained in many directions by proper conference and concert of action among the competing lines. It may be entirely true that, as we proceed in the development of the policy of public control over railway traffic, methods will be devised and put in operation by legislative enactment whereby railway companies and the public may be protected against the evils arising from unrestricted competition and from rate wars which unsettle the business of the community, but I fail to perceive the force of the argument that, because railway companies, through their own action, cause evils to themselves and the public by sudden changes or reductions in tariff rates, they must be permitted to deprive the community of the benefit of competition in securing reasonable rates for the transportation of the products of the country. Competition, free and unrestricted, is the general rule which governs all the ordinary business pursuits and transactions of life. Evils, as well as benefits, result therefrom. In the fierce heat of competition the stronger competitor may crush out the weaker. Fluctuations in prices may be caused that result in wreck and dis-

aster, yet, balancing the benefits as against the evils, the law of competition remains as a controlling element in the business world. That free and unrestricted competition in the matter of railroad charges may be productive of evils does not militate against the fact that such is the law now governing the subject. No law can be enacted nor system be devised for the control of human affairs that in its enforcement does not produce some evil results, no matter how beneficial its general purpose may be. There are benefits and there are evils which result from the operation of the law of free competition between railway companies. The time may come when the companies will be relieved from the operation of this law, but they cannot, by combination and agreements among themselves, bring about this change. The fact that the provisions of the Interstate Commerce Act may have changed in many respects the conduct of the companies in the carrying on of the public business they are engaged in, does not show that it was the intent of Congress in the enactment of that statute to clothe railway companies with the right to combine together for the purpose of avoiding the effects of competition on the subject of rates.

There are three general methods by which these rates may be established. It may be done by direct legislative enactment (whereby either fixed rates or a maximum or minimum limit are enacted by the statute or by provisions for the adoption of rates by a commission) or the rates may be adopted by the independent action of each company, acting under the spur of self-interest, and controlled by the effect of free competition, or the rates may be fixed by means of agreements or combinations between the rival lines of railway, whereby each contracting company is bound to charge the rate thus fixed and agreed upon. Congress has not yet undertaken to establish a standard of rates, either directly or through the action of a commission or the equivalent. Neither, in my judgment, has Congress, in enacting the interstate commerce statute and the amendments thereto, conferred upon the railways the right to enter into combinations for the purpose of compelling the members to charge the rates fixed by a committee of the association, in whose deliberations the public have no part, and the avowed purpose of which is to evade the operations of the law of competition, which is as yet the only safeguard upon which the public can rely for the securing of the adoption of reasonable charges upon interstate traffic. I had always supposed that the enactment of the interstate commerce statute was the result of a popular demand, which insisted upon relief being given to the community as against the methods pursued by the railway companies which, in some particulars at least, were deemed to be inimical to the public interests. Looking at the causes which brought about the enactment of this statute, and the evils at which it was aimed, it does seem clear that it is wholly wrested from its purpose when it is held that it creates numerous radical and effective changes in the public policy of the nation touching competition

between railroad companies engaged in interstate commerce. For the better protection of the rights of the public, and to sweep away the system of discriminations in favor of localities, individuals, or classes of business which had come into vogue, the Interstate Commerce Act was intended to introduce radical changes in railway methods, but it never was intended to curtail the rights of the public and enlarge those of the railway corporations in any substantial particular. The argument of the majority is that, even if it were admitted that under common law principles all contracts or combinations between public common carriers for the establishment of rates would be held to be contrary to public policy, nevertheless the enactment of the Interstate Commerce Act revolutionized the law in this particular, and authorized railway companies to enter into combinations for the purpose of establishing reasonable restrictions upon the freedom of interstate commerce.

Reading that Act in the light of the causes leading to its enactment, I cannot find in any of its provisions foundation for the theory that it was intended to confer upon railway companies the right to enter into combinations which, under the principles of the common law, would be illegal, because contrary to public policy. The reasoning of the court is to the effect that "the interstate commerce law imposes several important restrictions upon the right of railway companies to do as they please in the matter of making and altering rates, and Congress has thereby expressed its conviction that absolutely free competition between carriers is not at the present time conducive to the public welfare, and that other things are more essential to the public good."

I do not quarrel with the proposition that the Interstate Commerce Act imposes important restrictions (not upon the right, however) but upon the practice of railway companies to do as they please in the matter of making and altering rates. But how does that fact tend to show that the Act places restrictions upon the rights of the public? The Congress of the United States may place restrictions upon the rights of the railway companies and upon the rights of the public, but the fact that Congress may enact laws which are intended to change the methods pursued by the companies in certain particulars does not necessarily restrict the rights of the public. But if it be admitted that by some possible mode of construing the Interstate Commerce Act, and the action of the Commission created thereby, it can be held that under its provisions the railway companies became clothed with the right to combine together, and by mutual agreement to create restrictions upon the freedom of interstate commerce so long as the same are reasonable,—which is the position of the court,—then would it not follow that the right thus created by the Interstate Commerce Act is abrogated by the later enactment found in the Anti-Trust Act, which expressly declares, not that unreasonable contracts, combinations, or restrictions are illegal, but that every contract, combination in the form of

trust or otherwise, or conspiracy in restraint of trade or commerce among the several states is illegal? The statute declares that restraint of interstate commerce, all restraints, every restraint of such trade and commerce brought about by contracts, combinations in the form of trusts or otherwise, or by conspiracy, are illegal. The statutory declaration in effect is that interstate trade and commerce are to remain free from restriction. The declaration of the court is, in effect, that railway companies engaged in interstate commerce may place restrictions upon such commerce; that the right so to do, if not existing under the common law, is conferred upon railway companies by the provisions of the Interstate Commerce Act; that such restrictions cannot be held to be illegal unless it is shown that they are unreasonable, and the presumption is in favor of their reasonableness and consequent legality. I cannot believe that such is the meaning of the Interstate Commerce and the Anti-Trust acts. When the latter Act was adopted, it had been declared by the Supreme Court of the United States to be the law that, with regard to the classes of business that are of a public nature, and are carried on to meet a public necessity, contracts imposing restraints thereon, however partial, cannot be sustained, because in contravention of public policy. It cannot be successfully questioned that railway companies engaged in interstate trade and commerce are carrying on a business of such public character as of necessity places it in the class declared by the Supreme Court to be of such a nature that no restraint thereof, however partial, is permissible. It is a familiar principle that statutes are to be construed with reference to and in the light of the law existing at the date of their enactment. Thus reading the Anti-Trust Act, is not the first section thereof intended to clearly enunciate in statutory form the principle already declared to be the law by the Supreme Court? The Interstate Commerce and Anti-Trust acts were passed for the protection of the interests and enforcement of the rights of the public. The view taken thereof in the opinion of the court results in curtailing the rights of the public and in enlarging the powers of railway companies. If the law be as is therein declared, then these public corporations, engaged in carrying on the public duty of constructing and operating the public highways, over which, of necessity, nearly the entire traffic of the country must be carried, are at liberty to combine together and determine in secret conclave the rates they will demand from the public for the services rendered, and enforce the imposition of the schedules thus fixed by penalties assessed against any party to the combination which may vary from the agreed schedule, and the individual citizen has no relief against rates thus fixed, unless he can satisfy some court or jury that the rate charged is unreasonable.

It is admitted in the opinion of the court that the contract in question has some tendency to check competition in rates, but it is said the restraint is slight, and therefore lawful. If the natural tendency is to check competition in the matter of rates, and to place

a restraint, though but slight, upon the freedom of interstate traffic, what tribunal is to determine when the proper boundary has been passed, and by what standard is the lawfulness of the restraint to be measured? The legal consequence of the position of the court is that railway companies, by combinations between themselves, may fix the schedule of rates to be charged the public, and may bind themselves under penalties not to depart from the rates thus agreed upon, and the citizen is bound to pay the tariff thus established, unless he can satisfy a court that the sum charged is unreasonable. It may sound well to say that the courts are open to the citizen, and that they will afford him protection against the exaction of unreasonable rates, but we know that the supposed remedy would only aggravate the original wrong. It is said in the opinion of the court that there is nothing in the contract described in the bill which indicates any purpose or attempt to obtain a monopoly of the trade of the region traversed by the defendant corporations; that the systems of the Great Northern, the Northern Pacific, the Southern Pacific, and Texas Pacific railway companies are operated in the region subject to the regulations of the defendant association, but they are not members of it, and therefore the defendant companies cannot monopolize the entire traffic of the region. The great majority of the patrons of the several lines of railway represented in the association in question do not live at competitive points. As to each of them the line of railway nearest to them has, of necessity, an absolute monopoly of the carrying trade belonging to the business in which they are engaged. Of what advantage to a farmer, a merchant, or a manufacturer doing business at or adjacent to a station upon a given line of railway is the fact that 20 or 50 or 500 miles from his place of business there is another railway line? The distance is so great, and the cost of reaching the same is so great, that he is practically debarred from making use of the same, and he has no choice in the matter. Parties doing business at competitive points may have free choice, and as to them it may be true that neither competing line has a monopoly of the business transacted at places where competition, being free and unrestricted, may work out its legitimate results, but this is not true of persons engaged in business at noncompetitive points. As to them, the control of the railway company adjacent to them is practically absolute. Of necessity, in such case the railway company has a complete monopoly of the entire transportation traffic of the region in which there is in fact no competing line. Against the evil tendencies of this monopoly, protection is afforded to the citizen by securing free and unrestrained competition between the lines of railway at the several points or localities where they in fact come into active competition, and, reasonable rates having thus been secured at these points, we have a standard established by which it may be determined whether the rates charged from intermediate noncompetitive points are reasonable or not, and the provisions of the Interstate Commerce Act forbidding a greater

charge for a shorter than a longer haul under similar circumstances may be invoked to secure a proper proportionate relation between the rates at competitive and noncompetitive points. If, however, the railway companies may combine together to fix the rates to be charged at competitive points, thus eliminating the effect of free competition, how fares it with the citizen residing at the noncompetitive point? By the very necessities of his location he is debarred from choosing the line of railway he will patronize. He is compelled to avail himself of the facilities afforded by the line nearest him. The railway therefore has the absolute monopoly of the transportation pertaining to the business of the citizen. It likewise has the exclusive control of the rates to be charged; and if the company, by contracts and combinations with the other lines of railway operating in the same region, may free itself from the restrictions afforded by free competition, what is lacking to constitute a complete and absolute monopoly of the transportation business thus dependent upon the given line of railway? The direct and necessary consequence of the contract entered into by the defendant companies is to create and perfect an absolute monopoly in each of the contracting parties over that part of the business carried over their respective lines which comes from that portion of the territory in which there is not in active operation a competing line; and, even as to regions which are so situated that competition might be had in the absence of contracts preventing the effects thereof, a like monopoly is created by the contract entered into by the defendant companies.

In the matter of rates, competitive points are those where the transportation business of the locality is sought by two or more competing lines. In the case of sales of property at public auction, it is the rule that combinations among proposed purchasers, whereby it is agreed that they will not bid against one another, but the property shall be bid off at an agreed price for the common benefit of all the contracting parties, are illegal, and a sale thus made is voidable, because all fair competition is prevented by such combination. If the competitors for the transportation business of a given locality agree that there shall be no competition between them on the subject of rates to be charged, does not the same evil result? In the one case it is sought to deprive the owner of his property, without paying to him the fair value that would probably be bid in case competition was not stifled by the agreement between the purchasers. In the other the citizen is subjected to the payment of charges which are not the result of free competition, but are the result of combinations and mutual agreements, entered into for the express purpose of eliminating competition as an element in the determination of the rate to be charged. Thus points and localities which are competitive so long as there is active rivalry between the railway lines seeking the business of the region cease to be such when the rival lines combine and become, in effect, but one upon the subject of the charges

to be demanded of the citizens. In such event the citizen becomes subject to a monopoly as complete and absolute as though there was but a single line of railway within his reach. Thus is found in the contract and combination entered into by the defendant companies elements which directly tend to the establishment of a monopoly, complete and absolute, over the transportation traffic in the region traversed by the lines of the defendant companies, due to the undeniable fact that the price charged for the transportation of the property of the community exercises a controlling influence over the question of the success or failure of the various business pursuits and avocations upon which the citizens are dependent for a livelihood, and, moreover, it directly affects and controls the cost to the public of all the necessities of life.

The declaration found in article I. of the contract shows upon its face the main purpose of the combination, it being therein recited that "the traffic to be included in the Trans-Missouri Freight Association shall be as follows: (1) All traffic competitive between any two or more members hereof passing between points in the following described territory," etc. Does not this clearly show that the main purpose of the contracting parties is to deal with that traffic which, in the absence of combinations between the railway companies, would be controlled by the results of competition, and to deal with it in such manner that it will cease to be competitive traffic and become the subject of combinations and agreements whereby the rates to be charged—which is the essential element in which the public has a vital interest—is removed from the protection derivable from free and unrestrained competition, and is left to the determination of committees appointed by the railway companies, whose action is binding upon the members of the association, and against which the individual citizen is without adequate remedy, no matter how unjust the rate fixed by the committee may in fact be?

Another feature observable on the face of this contract is that by the exceptions contained in article I. the traffic between many points and in some classes of freight are excepted out from the operation of the agreement, and thus it appears that it is the express purpose of the defendant companies to carry on part of their business subject to the

results flowing from combinations between the carriers, and other portions are not to be affected thereby. Is it not the natural result that the public will be subjected to different burdens, and that differences in rates will be charged, which in effect will result in discriminations for or against particular localities? But I shall not dwell upon this and other points of minor importance. As I view the subject, the inherent and fatal vice existing in the combination and agreement entered into between the defendant railway companies is found in the fact, patent upon the face of the contract, that it is the main purpose of the contracting parties to stifle competition in the matter of rates to be charged the public. The illegality of such purpose is not dependent upon the extent of the restraint placed upon the freedom of the public business, but upon the fact that the avowed intent is to place a restraint, whether slight or great, upon a class of business which is inherently and always of a public nature, and touching which the declaration of the law, both common and statutory, is that it must remain wholly free and unrestricted. If the protection afforded by fair and free competition can be evaded and nullified by means of combinations such as are contemplated and provided for in the contract entered into by the defendants in this case then the only safeguard against unreasonable rates will be stricken down, and thus interstate commerce will be subjected to the restraints and injuries flowing from the imposition of tariff rates agreed upon by the companies, but in the establishment of which the public has no direct control through legislation, nor direct influence through the effect of free competition.

In my judgment, the right to insist upon free competition between railway companies engaged in carrying on interstate commerce is a right which belongs to the public, of which it cannot be deprived except by its own consent, and every contract or combination between these public corporations which tends to remove the business carried on by them from the influence of free competition tends to deprive the public of this right, of necessity tends to subject interstate commerce to burdens which are a restraint thereon, is inimical to the public welfare, is contrary to public policy, and in contravention of both the language and spirit of the Anti-Trust Act of July 2, 1890.

INTERSTATE COMMERCE COMMISSION.

C. O. MORRELL, *Complainant*,

v.

THE UNION PACIFIC RAILWAY COMPANY, THE OREGON SHORT LINE & UTAH NORTHERN RAILWAY COMPANY, THE OREGON RAILWAY & NAVIGATION COMPANY, *Defendants*.

REPORT AND OPINION OF THE COMMISSION.

Morrison, Commissioner:

In this proceeding complaint was made against the Union Pacific Railway Company that it operated a railroad from Pullman, in the state of Washington, to Portland, in the state of Oregon; that its rate of charges, \$6.50 per ton—32½ cents on the hundred pounds—of wheat from Pullman to Portland was “unjust, unreasonable and extortionate,” and that any higher rate than \$4 per ton—20 cents on the hundred pounds—of wheat in carloads from Pullman to Portland was unreasonable. The complainant asked that investigation be made, the reasonable rate ascertained and determined, and that the sum of \$2.50 per ton—\$48.11—should be awarded to him, that being the amount paid in excess of 20 cents per hundred pounds on one carload of wheat shipped by him from Pullman to Portland, January 19, 1891.

The Union Pacific Company for answer denied that it operated any railroad between Pullman and Portland or that it operated any line or lines of railroad in the states of Oregon and Washington, and it appearing that the Oregon Short Line & Utah Northern Railway Company and the Oregon Railway & Navigation Company were proper parties to be named as defendants, they were so named, and a copy of the complaint herein was duly served on them.

The Oregon Railway & Navigation Company, thus made a defendant, answering the complaint says, that prior to August 1st, 1887, it owned and operated a line of railway between Pullman, Washington, and Portland, Oregon; that by agreement or lease dated January 1st, 1887, which became effective August 1st, 1887, all the road owned and operated by this defendant in the states of Washington and Oregon at the date of said agreement had been leased to the Oregon Short Line & Utah Northern Railway Company for a fixed rental in no

way dependent upon the earnings of the leased property; that said Oregon Short Line & Utah Northern Railway Company had, at the time said agreement became effective, entered into the use and possession of all the railway lines owned by this defendant, and was at the time of the commencement of this proceeding, and still is, in the possession and use thereof; and that it, the Oregon Railway & Navigation Company, is not, and has not since August 1st, 1887, been engaged in operating or in making rates for transportation or interested in the profits or earnings of any railway in the states of Oregon or Washington.

The Oregon Short Line & Utah Northern Railway Company, answering in obedience to the order of the Commission, admits that it operates a line of railroad from Pullman, Washington, to Portland, Oregon, by virtue of a lease from the owner, but denies that the rate charged, 32½ cents for the hundred pounds, is unreasonable, and avers that the rate of \$4 per ton—20 cents on the hundred pounds—prayed to be established would be unreasonable and unremunerative.

The questions in controversy being thus presented, the parties were heard and the investigation made at Spokane, state of Washington.

The facts ascertained and deemed to have a bearing on the questions thus presented for determination are:

1. The complainant, C. O. Morrell, is a farmer and grain grower, residing at Pullman, Whitman county, Washington. In 1890 he produced about 18,000 bushels of wheat. Among shipments made by him was one carload of 38,498 pounds, shipped January 19, 1891, at the regularly published rate of 32½ cents per hundred pounds from Pullman, Washington, to Portland, Oregon, a distance of 379 miles, over the lines owned by the Oregon Railway & Navigation Company, operated by the Oregon

Short Line & Utah Northern Railway Company, and is part of the "Union Pacific System."

2. Whitman county is the center of a productive wheat region in southeastern Washington, where wheat production has largely increased in the past few years. The crop of 1890 for that county is estimated at 8,000,000 to 10,000,000 bushels. About 1,000,000 bushels were shipped from Pullman station. Storage on the farms is insufficient, and wheat is largely delivered for immediate shipment or stored in elevators or warehouses at the various railway stations soon after harvest. In the four months from September 15 to January 15 most of the crop is shipped to market, though shipments continue to a later period and to some extent throughout the year. As a rule, farmers do not ship to market, but sell to dealers at the railway stations. The wheat is sold, delivered and shipped in sacks ready for export. In the spring of 1891, after the crop of 1890 had been mostly sold and shipped, the price was as high as 75 cents. In the years 1887, 1888, 1889, and 1890 it was at times as low and lower than 45 cents, but the average was nearly 50 cents per bushel for the three or four years. The sacks cost 4 cents per bushel. The shipper loads and unloads at a cost of about \$1 per ton. The Pullman rate of 82½ cents is a group rate, and prevails over the southeastern Washington wheat-growing territory north of Snake river, from all stations as far west as Connell or Palouse Junction. These rates have not much changed in the last three or four years.

3. The lines of the Northern Pacific Railroad Company, or Northern Pacific System, extend to Pullman, Washington, and Pendleton, Oregon, and other points in the wheat producing districts of southeastern Washington and northeastern Oregon. The two systems make and maintain a joint tariff of rates to Portland from Pullman and other points in such group rate territory, and the same rates to Portland are made and maintained in separate tariffs by each of the two systems from the several stations on their respective lines in such territory.

The Northern Pacific system makes the same rate on wheat from southeastern Washington and northeastern Oregon over its lines to Tacoma and Seattle as are established by such joint or separate tariffs from the same points to Portland. The distance over the Northern Pacific route or lines from Pullman to Portland is 620 miles; to Tacoma 478 miles, and its wheat rate is 82½ cents to both. The distance over its route or lines from Pendleton to Portland, Oregon, is 453 miles; to Tacoma, Washington, 308 miles; to Seattle 329 miles, and its rate, 28½ cents per hundred pounds, is the same to the three places.

4 INTER S.

4. Flour is occasionally carried by the Union Pacific System and connecting lines from Oregon to Galveston, Texas, a distance of 2500 miles, at 75 cents per hundred pounds. Wheat is carried by the Northern Pacific in considerable quantities from points east of the Columbia river in the state of Washington to St. Paul, Minnesota, a distance of 1600 miles, for 50 cents per hundred pounds. In the main, wheat produced in Oregon and Washington is shipped to Portland, Tacoma and Seattle. Previous to 1888 the Northern Pacific did not reach Pullman over its own or leased lines, and wheat from that place and adjacent country was shipped to Portland. This traffic is now divided, and in 1890 nearly one half of it went over the Northern Pacific to Tacoma, from which the ocean rate was for a time 65 cents per ton lower than from Portland.

5. Pullman is a branch line station 19 miles from defendant's line extending from Spokane to Portland, distant from each other about 450 miles. To Portland the rate is the same from Pullman and Spokane. The rate in dispute is over the line or lines of the Union Pacific System from Pullman, by way of Colfax, La Crosse, Walla Walla, and Wallula in Washington, and Umatilla, Oregon, to Portland. On the 135 miles of this route between Pullman and Walla Walla the grades are heavy in both directions, one grade of 150 feet to the mile extending five miles, and another as heavy for a distance of two and a half miles. The remainder of the route, in the main, is down the Columbia river, and the grades are light. In winter the operation of the road is subject to interruption from snow-drifts.

6. This road or line is operated by the Oregon Short Line & Utah Northern Railway Company under a lease from the Oregon Railway & Navigation Company, which became effective August 1st, 1887, for a term of 99 years, and embraces, besides lines of railway, several water lines, ocean and river, including vessels having an aggregate tonnage of 18,000 tons. Under it the Oregon Short Line & Utah Northern Railway Company is in the possession and use and operates all the lines of road owned by the said Oregon Railway & Navigation Company, an aggregate mileage of 1029 miles, situate chiefly in the states of Oregon and Washington. The annual rental for the leased property to be paid by the Oregon Short Line & Utah Northern Railway Company to the Oregon Railway & Navigation Company aggregates \$2,556,593.64, and is the amount of its fixed charges including the interest on \$27,940,000 of bonded indebtedness and a dividend of 6 per cent on its \$24,000,000 of capital stock. The annual payment of this rental is guaranteed by the Union Pacific Railway Company.

7. Besides the lines or road of the Oregon

Railway & Navigation Company operated by the Oregon Short Line & Utah Northern Railway Company, it operates several lines aggregating a mileage of 1400 miles which it owns in the territory of Utah and the states of Wyoming, Montana, Idaho, and Oregon. It owns a majority of the capital stock of the Oregon Railway & Navigation Company, and the Union Pacific Railway Company owns a controlling part or interest of the capital stock of the Oregon Short Line & Utah Northern Railway Company.

8. The annual reports of the directors of the Union Pacific Railway Company contain detailed statements of reported operations of the roads or lines operated by the Oregon Short Line & Utah Northern, including the road of the Oregon Railway & Navigation Company and other leased roads, lines, and property, all of which are stated in said annual reports to be part of the Union Pacific system.

9. For 1886, the year previous to making said lease, the Oregon Railway & Navigation Company reported net earnings of \$3229 per mile on its mileage, then 686 miles; the gross earnings being \$6052, and the operating expenses \$2822, per mile. For the year 1890, with a largely increased mileage, the Union Pacific Railway Company reports decreased gross earnings with increased operating expenses, or \$894,836.79 net earnings on 1029 miles of road in 1890 as compared with \$2,215,686.90 annual net earnings on 686 miles of road reported by said Oregon Railway & Navigation Company for 1886, the year next before its line became part of the Union Pacific system under said lease.

10. The Union Pacific Railway Company also reports the net earnings of the leased railroad and property of the Oregon Railway & Navigation Company as insufficient for the

payment of the agreed rental guaranteed by the Union Pacific. The reported shortage is for 1888, \$349,118.11; for 1889, \$736,205.82, and for 1890, \$1,789,190. For these years the reported net revenue was, for 1888, \$2,228,443.87; for 1889, \$1,542,294.48, and for 1890 \$894,836.79.

11. In explanation of the falling off in net revenue and earning capacity of the Oregon Railway & Navigation Company, the report of the Union Pacific Railway Company for the year 1889, filed as an Exhibit in this proceeding on behalf of the defendants, says:

"This loss in the earning capacity of the Oregon Railway & Navigation Co. was due mainly to deficient crops in eastern Oregon and Washington, caused by the absence of snow during the previous winter, which resulted in a large falling off in earnings from local traffic. The traffic exchanged between the Oregon Railway & Navigation Co. and the lines of the Union Pacific system, the earnings from which appear chiefly in the gross returns of the latter, underwent a large increase during the year."

The appendix to said Union Pacific report contains "part of the report of the Committee of the United States Senate accompanying the Senate bill for the settlement of the Pacific Railroad debts."

In this report of the Senate Committee it says:

"In view of the recent development of the Pacific northwest this alliance of the Oregon Short Line and the Oregon Railway & Navigation Co. has become of the greatest possible value to the Union Pacific, constituting probably to-day one third of the total through business of the Union Pacific Railway."

No evidence was offered in explanation of the falling off in the net earnings for 1890, amounting to nearly one half as compared with the previous year.

The Union Pacific System reports for years ending December 30, 1888, 1889, and 1890, show.

YEAR.	MILEAGE.	GROSS EARNINGS.	OPERATING EXPENSES.	NET EARNINGS.	NET EARNINGS PER ROAD MILE.
1888	5041.86	\$30,195,522.53	\$18,476,428.04	\$10,460,634.74	\$2074.96
1889	7889.55	39,669,600.06	24,516,751.40	18,656,047.41	1848.02
1890	7562.94	48,049,248.36	29,843,961.81	12,288,084.09	1618.16

The gross earnings per mile of road as reported were, for 1888, \$5989.56; 1889, \$5368.34, and for 1890, \$5692.13.

After the hearing and previous to the filing of briefs by counsel for defendants, the rate complained of was, on August 10, 1891, reduced to 28½ cents. On June 7, 1893, a further reduction was made to 28¼ cents, the rate now in force, and the reasonableness of which is now to be determined.

Counsel for defendants insist that 28¼ cents—the rate at the time their brief was filed—was not excessive. It is, they claim, less in proportion to distance than the rate, 28½ cents, 4 INTER 8.

found to be reasonable by the Commission in *Evans v. Oregon R. & Nav. Co.*, 1 Inters. Com. Rep. 641, for carrying wheat from Walla Walla, Washington, 246 miles to Portland, Oregon, in the spring of 1887.

The order of the Commission in that case was:

"That on and after the 15th day of December, 1887, the defendant must cease to charge more than twenty-three and one half cents per hundred pounds, or four dollars and seventy

cents per ton, on wheat transported by it over its railroad lines from Walla Walla, in Washington territory, to Portland, in the state of Oregon, during the present grain season.

"The order is also made in this form as to the present grain season upon the statement in the answer of the defendant that further reductions on wheat rates are intended to be made by defendant as soon as this can be done and upon the general course of dealing of defendant, as shown in the proofs, that the rate for the next season on wheat will doubtless be further modified."

This order provided alone for the wheat season of 1887-1888, which had nearly closed when the order was made; and their counsel overlooked the fact that defendants have not met the reasonable expectation of the Commission that for the then next and subsequent wheat seasons or years the Walla Walla and Portland rate would be further modified.

Previous to the summer of 1887, grain and other freights destined to Portland from points further east, including Pullman, passed over the lines of the Oregon Railway & Navigation Company. In 1887 and 1888 the Northern Pacific Railroad Company extended its lines west to Tacoma, thence to Portland, and east to Pullman and other points in the grain growing region of southeastern Washington, and over its lines so extended the Northern Pacific Company took from Pullman and other points a considerable part of the wheat and other freights which would otherwise have been carried over the road of the Oregon Railway & Navigation Company. The defendants urge this diversion of Pullman and other traffic from their lines in justification of higher transportation charges than would be reasonable if there was no competition for Pullman business.

Competition, or a division of business as the result of building a second road where previously but one existed, should justify lower rather than higher charges.

The falling off in the annual surplus and earnings of the Oregon Railway & Navigation Company, as reported by the Union Pacific Railway Company, is urged as an additional reason for maintaining higher charges from Pullman than might be reasonable with the former rate of reported annual earnings.

The road of the Oregon Railway & Navigation Company is part of the Union Pacific system, and in view of the reported increase in gross earnings of the whole system and the well maintained annual earnings per mile of road, the "large increase" in the interchange of business between this road and the other roads of that system, and the great "value" of the Oregon Railway & Navigation Company to the Union Pacific Railway Company, it may

4 INTER S.

be fairly assumed that the apportionment of earnings as made by the Union Pacific is largely a question of book-keeping.

In support of the allegation that the charges complained of were "unjust, unreasonable and extortionate," complainant's counsel in their brief direct attention to the order of the Commission in the Food Products case, investigated in 1890 (3 Inters. Com. Rep. 98) and to the rate of charges in force over the Northern Pacific lines from Pendleton, Oregon, to Seattle, Washington. The Food Products case involved charges on freight carried from Kansas and Nebraska points to Chicago. The conditions upon which these charges are based are so unlike the conditions affecting transportation in Oregon and Washington that the reasonableness of the grain rate from Kansas or Nebraska to Chicago affords no safe criterion for charges between Pullman, Washington, and Portland, Oregon. Transportation rates in force on lines of rival companies or on different branches or lines of the same company have a bearing upon and are entitled to consideration in connection with the question of reasonable charges for transportation services rendered under like conditions.

From Pendleton to Seattle the distance over the Northern Pacific is 329 miles and the rate was 23½ (now 23) cents. The rate from Pullman to Portland, now reduced to 23½, was 32½ cents when the former rate was referred to as evidence of the unreasonableness of the latter. The latter, or Pullman-Portland rate, is now relatively as low as the Pendleton-Seattle rate. The grades are heavy on both lines and the other conditions of transportation are practically the same over these two routes, except that the Pullman-Portland haul is 50 miles longer and the rate 15 cents per ton higher. This rate is but 3½ cents on the hundred pounds, or 75 cents per ton, in excess of the rate of charges which the complainant asked to have established. Substantial reductions have been made since the case was heard which justify the expectation that further reasonable modifications will follow, and further reductions of the Pullman-Portland rate by order of the Commission are not now deemed justifiable.

On the basis of the reductions made in the rate complained of, it was 8½ cents on the hundred pounds in excess of the reasonable rate which the defendants might lawfully charge complainant on the carload of wheat shipped January 19, 1891. The amount of this overcharge we find to be \$40.51, which amount the Oregon Short Line & Utah Northern Railroad Company should pay to the complainant and it is so ordered.

A. S. NEWLAND, T. W. HAUSCHILD, WALTER REEDER, *Complainants*,
v
THE NORTHERN PACIFIC RAILROAD COMPANY, THE UNION PACIFIC RAILWAY COMPANY, THE OREGON SHORT LINE & UTAH NORTHERN RAILWAY COMPANY, THE OREGON RAILWAY & NAVIGATION COMPANY.

1. It is the right of shippers to have their goods carried, and the duty of common carriers to receive and forward freights by the least expensive routes at reasonable through rates.
2. Where there were two routes from the place of shipment to the place of destination, one much longer and much more expensive to operate than the other, the longer and more expensive being operated by one, while the more direct and less expensive route was over continuous lines operated by more than one common carrier: *Held*, That the rate must be reasonable for the transportation by the shorter and less expensive route.
3. Where the roads and branches of two companies extend to and penetrate a wheat producing district, from which they make a joint rate for distances of 480 miles and each company makes the same rate separately from the same district, one for distances of 450 and the other for distances of 650 miles over their respective lines to the same destination, *Held*, That it may be fairly assumed that the rates so jointly and separately made are reasonably remunerative and profitable. *Held further*, That what is reasonable compensation for this longer and more expensive branch line service is excessive for the shorter distance of 811 miles over a less expensive route from the same district to the same destination.
4. The same rate over a district so extensive denies to the producer nearer the market the advantages of his location, for which he receives no compensation in the fact that such rate was established to enable a railroad company to sell its lands more distant from markets at better prices.
5. The practice of making one rate on the same product over a large district is only justifiable under special and exceptional circumstances and is not to be encouraged when the difference in the transportation expense from the various parts of such district is considerable and substantial.
6. That railroad investments may be as secure as other property, the reasonable rates should be liberal until earnings are sufficiently large for a fair return on actual expenditure.
7. Where the market price yields but a scant return for the labor and expense of production, the cost of transportation needs to be as moderate as may be consistent with justice to the carrier.
8. Where a road or system of roads leased and made the road of another company a part of the system, *Held*, That the agreed rental cannot be accepted as the amount which the leased property must earn and the lessee may retain before any reduction can be made in the rates over the leased lines.
9. Where two companies or railroad systems stipulated for a division of traffic and agreed that when one party carried traffic belonging to the other, but one half of the charges should be retained for the transportation service, *Held*, That in the light of this arrangement in connection with the other facts of the case some reduction was warranted.

Complaint filed March 18, 1891.—Answers filed April 6 to May 18, 1891.—Heard at Spokane Falls, Washington, May 29 and 30, 1891.—Decided January 31, 1894.

R EASONABLE rates on wheat. See Complaint and Answer, 3 Inters. Com. Rep. 648, 649.

Messrs. Jones & Voorhees for complainants.

Mr. J. H. Mitchell for Northern Pacific Railway Company.

Mr. John M. Thurston for Union Pacific Railway Company and the Oregon Short Line & Utah Northern Railway Company.

Mr. W. W. Cotton for Oregon Railway & Navigation Company.

4 INTER S.

REPORT AND OPINION OF THE COMMISSION.

Morrison, Commissioner:

The complainants for themselves and other farmers of Adams county, in the state of Washington, filed their complaint against the Northern Pacific Railroad Company and the Union Pacific Railway Company, alleging that the rate charged by said Northern Pacific and Union Pacific Companies, 82½ cents on the hundred pounds, for the transportation of wheat in carloads from Ritzville, Washington, to Portland, Oregon, was and is "excessive, unjust and unreasonable." That the distance over the lines of the two companies from Ritzville to Portland through their junction point, Wallula, Washington, is 311 miles, or 97 miles over the Northern Pacific from Ritzville to Wallula and 214 miles over the Union Pacific from Wallula to Portland. That they, the petitioners, at Ritzville on January 10, 1891, offered a carload of wheat ready loaded in a car of the Northern Pacific Railroad Company for shipment *via* Wallula Junction to Portland, which the Northern Pacific Company would only ship, and did ship over its own lines, *via* Pasco Junction, thence across the Cascade Mountains *via* Tacoma, Washington, to Portland, a distance of 478 miles over a circuitous route having many heavy grades and curves. That there are but few ascending grades on the route from Ritzville to Portland *via* Wallula Junction, where the lines of the Northern Pacific and Union Pacific Companies connect at grade, and where traffic is exchanged between these companies.

The complainants further aver that 16½ cents is a reasonable rate on the hundred pounds of wheat in carloads from Ritzville through Wallula Junction to Portland, and "claim that they have a just and reasonable right to have the products of their farms carried to market by the shortest and least expensive routes at a reasonable through rate, and that the refusal of either, or both, of the aforesaid defendants to so carry the said products is arbitrary, unjust, unreasonable, injurious to the public weal and a serious obstruction to interstate commerce."

The complainants pray for investigation and an order requiring the Northern Pacific Railroad Company "to cease and desist from refusing to receive and transport grain from the said Ritzville, Washington, by their own and connecting roads by way of the said Wallula Junction and that both the said defendants be commanded further to perform such service at such a through aggregate rate as after due hearing and investigation shall be deemed just and reasonable, and for such other and further order as the Commission may deem necessary in the premises."

4 INTER 8.

Answering separately, the Northern Pacific Railroad Company, one of the defendants, admits that it is engaged in the operation of a railroad between points in the state of Washington and points in the state of Oregon, and denies that the rate charged by it for carrying grain from Ritzville, Washington, to Portland, Oregon, namely 82½ cents per hundred pounds is excessive, unjust, or unreasonable.

It admits that the distance from Ritzville, Washington, to Portland, Oregon, is 478 miles over its own line; that it passes over the Cascade Mountains; has many heavy grades and curves, and avers that its line is expensive to maintain and operate.

It admits that its track connects at grade with the Union Pacific Railway at Wallula Junction in the state of Washington, 97 miles distant from Ritzville. It further alleges that its road terminates at Wallula Junction; that it has no line of railroad or route to Portland, Oregon, from Ritzville, Washington, over its own or a leased line by way of Wallula Junction, and that the only route it has from Ritzville to Portland over its own line and leased lines is by way of Pasco Junction and Tacoma, Washington, and submits that it has been improperly proceeded against.

The Union Pacific Railway Company separately answering, states that it is a corporation engaged in operating a line of railroad, but denies that it operates such railroad between the points stated in the complaint or any of them or that it operates a line of railroad in either of the states of Washington or Oregon. On the coming in of this answer the Oregon Short Line & Utah Northern Railway Company and the Oregon Railway & Navigation Company were made parties to this proceeding and served with a copy of the complaint, together with a notice to satisfy or answer the same.

The Oregon Railway & Navigation Company thus made a defendant, answering the complaint, says that prior to August 1, 1887, it owned and operated a line of railway between Wallula Junction, Washington, and Portland, Oregon; that by agreement or lease dated January 1, 1887, which became effective August 1, 1887, all the road owned and operated by this defendant in the states of Washington and Oregon at the date of said agreement had been leased to the Oregon Short Line & Utah Northern Railway Company for a fixed rental in no way dependent upon the earnings of the leased property, and that said Oregon Short Line & Utah Northern Railway Company had, at the time said agreement became effective, entered into, was at the time of the commencement of this proceeding, and still is, in the use

and possession of all the railway lines owned by this defendant. That this defendant is not, and has not since August 1, 1887, been engaged in operating or in making rates for transportation or interested in the profits or earnings of any railway in the states of Oregon or Washington.

The Oregon Short Line & Utah Northern Railway Company answering the complaint in this proceeding says, that it operates under a lease from the owner of said property a line of railroad extending from Wallula Junction, in the state of Washington, to Portland, in the state of Oregon, and that its line of railroad connects at said Wallula Junction with the line of railroad operated by the Northern Pacific Railroad Company, one of the defendants, and, further answering, alleges that an arrangement is in existence between it and the said Northern Pacific Railroad Company providing for the exchange of traffic between the said Northern Pacific Railroad Company and this defendant at Wallula Junction aforesaid, under and by virtue of which arrangement the agent of said Northern Pacific Railroad Company at Ritzville "was authorized to forward freights destined to Portland, Oregon, over the line of this defendant *via* Wallula Junction and to issue through billing for the same."

This defendant admits that the distance between Ritzville and Portland *via* Wallula and the line of this defendant is about 311 miles and that the rate on wheat between said points is 32½ cents, and denies that this rate is excessive or unjust or more than fair and reasonable compensation for the service performed, and further avers that if the rate prayed in plaintiff's petition, 16½ cents per hundred pounds, were put in effect it would work a hardship on this defendant and practically compel it to go out of business so far as through traffic originating off the line of its own road is concerned.

The matters thus presented and complained of were investigated and the parties heard at Spokane, in the state of Washington, where the facts upon which the conclusions of the Commission in this proceeding are based were ascertained to be:

1. Ritzville is a station on the main line of the Northern Pacific Railroad Company in Adams county, one of the wheat producing counties of southeastern Washington, and excepting 1889, a year of crop failure, considerable quantities of grain have been since 1887 and continue to be annually shipped from Ritzville and the adjacent country to Portland, Oregon, or other tidewater Pacific Coast points.

2. Wheat production has considerably increased in the past few years both in Washington and Oregon. Storage on the farms is insufficient and wheat is largely delivered for

immediate shipment or stored in elevators or warehouses at the various railway stations soon after harvest. In the four months from September 15 to January 15, most of the crop is shipped to market, though shipments continue to a later period and to some extent throughout the year. As a rule, farmers do not ship wheat to market, but sell to dealers at the railway stations, where it is sold, delivered and shipped in sacks ready for export. In the spring of 1891, after the wheat had been mostly sold and shipped, it was as high as 75 cents. In the three or four years, 1887-8-9 and '90, it was at times as low and lower than 45 cents, but the average was nearly 50 cents per bushel for the three or four years. The sacks cost 4 cents per bushel. The shipper loads and unloads at a cost of nearly one dollar per ton.

3. From Ritzville to Portland there are two routes by rail. The rate, 32½ cents per hundred pounds, is the same over both. The shortest, most direct and least expensive to operate of the two is over the line of the Northern Pacific Railroad Company, *via* Pasco Junction to Wallula Junction, a distance of 97 miles, thence 214 miles to Portland over the lines of the Oregon Railway & Navigation Company, operated by the Oregon Short Line & Utah Northern Railway Company. The two last named companies and the lines owned or operated by them are part of the "Union Pacific System." On this route there are but few ascending grades, and these are comparatively light.

The other route is wholly over the lines operated by the Northern Pacific Railroad Company. This route is from Ritzville to Pasco Junction; thence across the Cascade Mountains through a long tunnel to Tacoma, and thence to Portland, a distance of 480 miles, and by 169 miles the longer route. Transportation on both routes is subject to interruption from snow-drifts in winter.

4. The complainants are farmers and producers of grain, residing in the neighborhood of Ritzville. On the 10th of January, 1891, they, or one of them, loaded a car furnished by and belonging to the Northern Pacific Company with wheat and requested the agent of the company at Ritzville to bill and forward the same through to Portland over its own line to Wallula, thence over the line of the Union Pacific System, the shorter route. There was some controversy as to billing and forwarding the car of wheat and whether or not it would go by the shorter route as complainant had requested. On being advised by the agent that by whatever route the grain was forwarded the charges would be 32½ cents, the complainant consented to the routing by the agent over lines of the Northern Pacific Railroad Company.

5. The road, or that part of the shorter and more direct route, between Wallula and Portland belonging to the Union Pacific System, is operated by the Oregon Short Line & Utah Northern Railway Company under a lease from the Oregon Railway & Navigation Company. This lease became effective August 1, 1887, is for a term of 99 years, and embraces besides lines of railway, several water lines, ocean and river, including vessels having an aggregate tonnage of 18000 tons. Under this lease the Oregon Short Line & Utah Northern Railway Company is in the possession and use and operates all the lines of road owned by the said Oregon Railway & Navigation Company, an aggregate mileage of 1,029, situated chiefly in the states of Oregon and Washington. The annual rental for the leased property to be paid by the Oregon Short Line & Utah Northern Railway Company to the Oregon Railway & Navigation Company aggregates \$2,556,598.64, and is the amount of its fixed charges including the interest on \$27,940,000 of bonded indebtedness and a dividend of 6 per cent on its \$24,000,000 of capital stock. The annual payment of this rental is guaranteed by the Union Pacific Railway Company.

6. Besides the lines of road of the Oregon Railway & Navigation Company operated by the Oregon Short Line & Utah Northern Railway Company, it operates several lines, aggregating a mileage of 1400 miles, which it owns in the territory of Utah and the states of Wyoming, Montana, Idaho, and Oregon. It owns a majority of the capital stock of the Oregon Railway & Navigation Company, and the Union Pacific Railway Company owns the controlling part of the capital stock of the Oregon Short Line & Utah Northern Railway Company.

7. The annual reports of the directors of the Union Pacific Railway Company contain detailed statements of reported operations of the roads and lines operated by the Oregon Short Line & Utah Northern, including the road of the Oregon Railway & Navigation Company and other leased roads, lines, and property, all of which are stated in the said annual reports to be part of the Union Pacific System.

For 1886, the year previous to making said lease, the Oregon Railway & Navigation Company reported net earnings of \$3229 per mile on its mileage, then 686 miles, the gross earnings being \$6052 and the operating expenses \$2822 per mile. For the year 1890, with a largely increased mileage, the Union Pacific Railway Company reports decreased gross earnings with increased operating expenses, or \$964,853.95 net earnings on 1029 miles of road in 1890 as compared with \$2,215,686.90 annual net earnings on 686 miles of road reported by said Oregon Railway & Navigation Company in 1886.

4 INTER S.

The Union Pacific Company also reports the net earnings of the leased railroad and property of the Oregon Railway & Navigation Company as insufficient for the payment of the agreed rental guaranteed by the Union Pacific Company. The reported shortage is for 1888, \$349,118.11; for 1889, \$736,205.82; for 1890, \$1,789,190.

8. The Ritzville-Portland rate of 32½ cents is a group rate, and prevails over the southeastern Washington wheat growing territory north of Snake river, including the "Palouse country," and also a small district in Idaho.

The group station nearest to Portland is Connell on the main line of the Northern Pacific Company 266 miles from Portland by the more direct or Wallula route and 435 miles over the Northern Pacific route through Tacoma. The group station farthest from Portland is Julietta in Idaho on the Spokane and Palouse branch of the Northern Pacific 481 miles from Portland over the Wallula route and 650 miles over the Northern Pacific lines through Tacoma.

Besides the "Spokane and Palouse branch" extending from Marshall Junction on its main line 115 miles southeast to Julietta, the Northern Pacific has a branch line, the "Central Washington branch," extending from Cheney on its main line 108 miles northwest to its terminus Coulee City in the group territory and from which terminus the Portland rate is the same as from Connell, Ritzville and Julietta. One rate was first established over this widely extended district by the Northern Pacific Company in 1888 that it might sell its granted lands in every part of the district on equally advantageous terms.

Boiles is 271 miles and the nearest to, while Spokane is 450 miles and the farthest, of the group stations, from Portland reached by lines of the Union Pacific System. On parts of this line or route which is by way of Colfax and near to the Idaho border there are many heavy grades making it comparatively expensive to maintain and operate. The lines of both the Northern Pacific and of the Union Pacific systems extend to various points in the wheat producing district of southeastern Washington, northwestern Idaho and northeastern Oregon. The two systems make and maintain a joint tariff of rates from such group rate territory, and the same rates to Portland are made and maintained in separate tariffs by each of the two systems from the several stations on their lines in such territory. The Northern Pacific System makes the same rate on wheat from northwestern Idaho, southeastern Washington and northeastern Oregon over its lines to Tacoma and Seattle which are established by such joint or separate tariffs from the same points to Portland.

9. Flour is occasionally carried by the Union Pacific System and connecting lines from Oregon to Galveston, Texas, a distance of 2500 miles, at 75 cents per hundred pounds. Wheat is carried by the Northern Pacific in considerable quantities from points east of the Columbia river in the state of Washington to St. Paul, Minnesota, a distance of 1600 miles, for 50 cents per hundred pounds. In the main, wheat and flour produced in Oregon and Washington are shipped to Portland, Tacoma, and Seattle.

10. In explanation of the falling off in net revenue and earning capacity of the Oregon Railway & Navigation Company, the report of the Union Pacific Railway Company for the year 1889, filed as an Exhibit in this proceeding on behalf of the defendants, says:

"This loss in the earning capacity of the Oregon Railway & Navigation Co. was due mainly to deficient crops in eastern Oregon and Washington, caused by the absence of snow during the previous winter, which resulted in a large falling off in earnings from local traffic.

The traffic exchanged between the Oregon Railway & Navigation Co. and the lines of the Union Pacific system, the earnings from which appear chiefly in the gross returns of the latter, underwent a large increase during the year."

The appendix to said Union Pacific report contains "part of the report of the Committee of the United States Senate accompanying the Senate bill for the settlement of the Pacific Railroad debts."

In this report of the Senate Committee it says:

"In view of the recent development of the Pacific northwest this alliance of the Oregon Short Line and the Oregon Railway & Navigation Co. has become of the greatest possible value to the Union Pacific, constituting probably to-day one third of the total through business of the Union Pacific Railway."

No evidence was offered in explanation of the reported falling off in the net earnings for 1890, amounting to nearly one half as compared with the previous year.

The Union Pacific System reports for years ending December 30, 1888, 1889, and 1890 show

YEAR.	MILEAGE.	GROSS EARNINGS.	OPERATING EXPENSES.	NET EARNINGS.	NET EARNINGS PER ROAD MILE.
1888	5041.36	\$30,195,522.53	\$18,476,428.04	\$10,460,694.74	\$2074.96
1889	7389.55	39,669,600.06	24,516,751.40	13,656,047.41	1848.02
1890	7562.94	43,049,248.86	29,843,961.81	12,238,084.09	1618.16

The gross earnings per mile of road as reported were, for 1888, \$5989.56; 1889, \$5368.34, and for 1890, \$5692.18.

Mileage, Earnings, Operating Expenses and Net Earnings of Oregon Railway & Navigation Company, exclusive of water lines.

¹ From Report filed with the Commission for Year ending June 30, 1888.

² Estimated from Report of Directors of Union Pacific Railway, for 1888, operation of water lines deducted.

³ From Report of Directors of Union Pacific Railway, Year ending December 31, 1890.

12. The Northern Pacific R. R. reports for years ending June 30, 1888, 1889, and 1890, show:

YEAR.	MILEAGE.	GROSS EARNINGS.	OPERATING EXPENSES.	NET EARNINGS.	NET EARNINGS PER ROAD MILE.
1888	3219	\$15,846,327.88	\$ 9,025,596.14	\$6,820,731.74	\$2118.70
1889	3439	19,707,467.95	11,868,541.47	7,848,926.48	2280.87
1890	3585	22,610,502.78	13,089,186.88	9,521,365.90	2655.89

The Northern Pacific in its report for the year ending June 30, 1889, says of wheat production and shipments in Washington:—

"Large crops were harvested in the Palouse and Walla Walla districts and the business was handled very satisfactorily *via* Cascade Division, as follows: 3775 carloads to Puget Sound; 675 carloads to local intermediate milling points; and 812 carloads to Portland. In addition to the above about 900 carloads of Washington wheat were transported to eastern terminals.

"The rapidity with which Washington is developing, agriculturally, may be realized from the statement that during the last fiscal year nearly half as much wheat was shipped from that territory as from all points on our lines east of the Missouri river."

13. A traffic contract made before the Act to Regulate Commerce was passed between the Northern Pacific Railroad and the Oregon Railway & Navigation Company, the "Union Pacific System," in force and on file with the Commission provides for an interchange of traffic at Wallula Junction; for a division or method of division and adjustment of rates of charges on traffic interchanged; and for compensation for excess of car mileage. One provision of said contract is that traffic "shall be interchanged at Wallula, from the line of the one party to the line of the other, and so far as shall be reasonably practicable and the convenience of the parties will permit, without change of cars; but in no case shall the cars of either party, without its expressed agreement or consent, be run beyond or off the road or roads of the other party. And in cases where it shall be expedient to make a change of cars, the expenses of making the transfer and change of cars shall be borne by the party receiving, from the line of the other, the traffic so interchanged."

14. Said contract designates divisions of territory and the business thereof which shall belong to the contracting companies, respectively, and for the transportation of which there is to be no competition. As to traffic from points reached by the lines of both companies said contract provides:

"Walla being a point common to the main or trunk line of each party, the business originating at, or destined to, Wallula, to or from points or places west of Wallula reached by the lines of both parties, shall be deemed competitive traffic; and the business of the said

branch of the Pacific Company into and beyond the "Palouse Country," and that of the said branch of the Oregon Company *via* Colfax at, and east of, their junction, to or from Wallula or points west of Wallula, shall also be deemed competitive traffic. All other traffic whatsoever shall be deemed noncompetitive traffic.

Section Second. That all competitive traffic shall be pooled, and the rates shall be settled for and divided between the parties by a tonnage division. The rates of all competitive traffic shall be fixed and determined, from time to time, by the said parties, or their respective successors or assigns. In cases where a tonnage division shall not be reasonably practicable, the party carrying any of the competitive traffic belonging to the other party, shall retain one half of the charges for the transportation thereof over its line, and shall pay the other one half of said charges to the other party."

Joint tariffs or rate sheets made and filed with the Commission by the Northern Pacific Company and the Union Pacific System show that on August 10, 1891, after the hearing and investigation at Spokane, the defendants reduced their charges from said group rate territory, including the Ritzville rate complained of, to 28½ cents, and on July 27, 1893, they further reduced these charges from 28½ to 23½ cents, which is the rate now in force and the reasonableness of which remains to be determined. Separate tariffs taking effect June 7, 1893, made and filed with the Commission show the same reductions made by the defendants, respectively, which were made by their joint rate-sheet which took effect July 27, 1893.

In its separate answer to the complaint the Northern Pacific Company averred its line ended at Wallula Junction, and that it operated no line or lines through Wallula to Portland; that its route or the only line or lines operated by it between Ritzville and Portland was through Pasco Junction to Tacoma, thence to Portland, and this route, it correctly avers, passes over the Cascade Mountains, and is very expensive to maintain and operate.

Through these averments the Northern Pacific sought to excuse itself from any obligation to carry, or to participate in carrying, freights from Ritzville over the direct route through Wallula to Portland in connection with the other defendants. At the time this excuse was offered the Northern Pacific had established in connection with its codefendants a joint tariff

of rates and charges from Ritzville and other points on its line to Portland *via* Wallula over this more direct through route and, as recited in the answer on behalf of the Union Pacific system, a traffic contract or arrangement then in existence provided for the interchange of traffic at Wallula Junction, and authorized the Northern Pacific to forward and bill through over that route. The joint tariffs made since the hearing of this case are in accordance with this arrangement.

The complainants "claim that they have a just and reasonable right to have the products of their farms carried to market by the shortest and least expensive routes at a reasonable through rate."

In this we believe no more is demanded by complainants than is their right under the law, and the rate from Ritzville to Portland which the carrier or carriers may lawfully exact must be reasonable for the transportation by the shorter and less expensive route through Wallula Junction.

This route of 811 miles is down to and along the Columbia river with few up grades and these are light. The facilities for the interchange and transfer of freight at Wallula Junction are adequate and convenient. Neither the maintenance nor the operation of the route is arduous or expensive in comparison with other roads or lines of equal length in the same locality or section of the country.

The route of the Union Pacific system from Spokane to Portland 450 miles is over its branch line to and through Wallula, on parts of which there are many costly grades; transportation over it is necessarily subject to the expense of interchanges and the cost of separate operation incident to branch line service while the charges are no more than from Ritzville.

The facts show that grain and grain products are being carried from Ritzville to Portland at the reduced Ritzville-Portland joint rate by the Northern Pacific Company over its own line by way of the long and expensive route across the Cascade Mountains to and through Tacoma.

This company is also shown to be a carrier of grain and its products over its Ritzville, Cascade Mountain and Tacoma main line route to Portland from all points on its Central Washington and its Marshall Junction and Palouse branches. The distance to Portland over this Northern Pacific route from some of the branch line stations on either branch is more than twice as great as the distance from Ritzville over the direct line through Wallula. Transportation over branch lines requires separate equipment and transfer.

It may be fairly assumed that the rates separately made over their respective routes or lines by the Union Pacific system and the Northern Pacific Company, as well as the rates

made by them jointly from these distant branch line points are reasonably remunerative and profitable; and in view of all the ascertained facts we must believe that reasonable compensation for the transportation of like products over these longer lines embracing the much more costly branch line service is excessive and unreasonable for the less expensive service over the more direct and very much shorter Wallula Junction route from Ritzville to Portland.

It was found on the testimony of its general manager that the Northern Pacific had established the same rate from the grouped stations more than 200 miles apart, including all the stations on two branch lines, as a matter of policy to enable that company to sell its lands more distant from markets, at better prices. Between the company and the purchaser of lands so inconveniently located this might be an equitable arrangement with any assurance that it would be continued after the company had disposed of its lands. But such an arrangement affords to grain growers hundreds of miles nearer to market no compensation for the advantages of their location.

The general manager also testified his belief that when the Union Pacific System constructed its branch line into and through the Palouse country to Spokane it became a competitor for business along this line and made the continuance of one rate by the Northern Pacific necessary throughout the group territory. This belief takes no notice of the maintenance of the same rate on the Northern Pacific Central Washington Branch which extends 100 miles and more northwest of points reached by any line of the Union Pacific System.

The defendants make joint tariffs, agree upon rates from all parts of the group territory reached by the lines of the rival companies, and by contract apportion the traffic or part of business to be taken by them respectively.

The practice of making one rate on the same product over a very large district, and thus equalizing the burdens of transportation to the same market, is only justifiable under special and exceptional circumstances. This practice is not to be encouraged when, as in the case under consideration, the difference in the transportation expense from the various parts of such district is considerable and substantial.

In defense of the rate complained of the defendants put in evidence the reported falling off in the surplus earnings of the road and branches of the Oregon Railway & Navigation Company since they were leased and made a part of the Union Pacific System and the insufficiency of the earnings so reduced to pay the promised rent of the leased property.

That the apportionment of earnings as made and reported by the Union Pacific Company is too largely a question of book-keeping to be

made the basis of reasonable rates is fairly inferred from the annual increase in the earnings of the Union Pacific System, the "large increase" in the interchange of business between the road of the Oregon Railway & Navigation Company and the other roads of the "Union Pacific System, the earnings from which appear chiefly in the gross earnings of the latter," and the great "value" of the Oregon Railway & Navigation Company to the Union Pacific Railway Company, as reported by the latter.

That railroad investment may be as secure as other property, the reasonable rate should be liberal until earnings are sufficiently large for a fair return on actual expenditure. The average annual surplus earnings credited by the Union Pacific Company to the Oregon Railway & Navigation Company for the three years next before the commencement of this proceeding was approximately \$1700 per mile of road, which would be a moderate investment return on a road costing not more than \$42,500 per mile. Whether the surplus earnings of the leased lines would have been greater operated independently of the Union Pacific System than they are reported to have been as a part of it, is matter of conjecture. Whatever the fact as to this might be, the amount which the Union Pacific System undertook to pay for the use of the leased road as a feeder to increase the business of the other roads of the system can hardly be accepted as the amount which the leased property must earn and the lessee retain before any reduction of this grain rate will be lawful.

To justify the reduction petitioned for by the complainants, they offered to prove the relatively high cost of producing wheat in comparison with its market value, and a producer of successive large crops testified that the cost to the grower of wheat, ready for market, at the railway stations was about sixty cents a

bushel. This estimate is too high and extravagant. The average price realized at the railway depots for the three or four years next before the investigation of this complaint was forty-five cents a bushel. With a return so scant for the labor and expense of production the cost of transportation needs to be as moderate as may be consistent with justice to the carrier.

One stipulation of the contract between the Northern Pacific Company and the Union Pacific System provided for a division of business between them and requires the company or system which carries traffic assigned to the other to pay one half the freight charges to the party to which the traffic belonged and to retain the other one half for the transportation service rendered. This stipulation shows that the parties to it, the defendants, considered one half of the rate to be from time to time agreed upon as sufficient compensation for the transportation or movement of freights while the other half, nearly 12 cents of the rate in question, would be surplus or balance remaining after paying operating expenses or expense of transportation. In the light of this arrangement in connection with the other facts, some reduction is warranted in the Portland rate from the less distant and more accessible points of the group district.

The petitioners ask for a reduction in the Ritzville-Portland rate to 16½ cents, practically to one cent per ton per mile, which is thought to be lower than is now justifiable in view of the terminal and transfer charges, though these are light. In consideration of all the facts, it is believed that the reasonable rate on the hundred pounds of wheat in carloads from Ritzville, Washington, to Portland, Oregon, should not be more than twenty cents. A reduction will be ordered accordingly.

VIRGINIA SUPREME COURT OF APPEALS.

WESTERN UNION TELEGRAPH CO., *Plff. in Err.*,

v.

J. O. TYLER.

(.....Va.....)

1. A person to whom a telegram is addressed can maintain an action for a penalty on account of failure to deliver it promptly, under Va. Code, § 1292, expressly providing that the forfeiture shall be to him or to the person sending the despatch.
2. A state statute prescribing a penalty for failure to deliver a telegram, where the regulations of the company itself require the delivery, is not unconstitutional as a regulation of interstate commerce.

November 16, 1898.

IN ERROR to the Circuit Court for Alleghany County to review a judgment in favor of plaintiff in an action brought to recover the statutory penalty for failure to promptly transmit a telegraph message. *Affirmed.*

The facts are stated in the opinion.

Messrs. Stiles & Holladay for plaintiff in error.
Mr. Benjamin Haden for defendant in error.

Lewis, P., delivered the opinion of the court:

This was an action against the Western Union Telegraph Company to recover a statutory penalty of \$100 for the failure of the company to deliver as promptly as practicable a certain dispatch sent from Asheville, in the state of North Carolina, to the plaintiff, at Clifton Forge, in this state. Section 1292 of the Code, under which the action was brought, is as follows: "It shall be the duty of every telegraph or telephone company, upon the arrival of a dispatch at the point to which it is to be transmitted by said company, to deliver it promptly to the person to whom it is addressed, where the regulations of the company require such delivery, or to forward it promptly as directed, where the same is to be forwarded. For every failure to deliver or forward a dispatch as promptly as practicable the company shall forfeit one hundred dollars to the person sending the dispatch, or to the person to whom it was addressed." It is admitted that the dispatch in question was not delivered as promptly as practicable, but the company, nevertheless, denies the plaintiff's right to recover, on two grounds, viz: (1) Because the action, if maintainable at all, ought to have been in the name of the commonwealth; and (2) because section 1292 of the Code is repugnant to that clause of the Constitution of the United States which gives to Congress the power to regulate commerce among the several states.

As to the first point, little need be said. Section 712 of the Code provides that "where any statute imposes a fine, unless it be otherwise expressly provided, or would be inconsistent with the manifest intention of the general assembly, it shall be to the commonwealth," etc.; and by section 745 it is provided that "wherever the word 'fine' is used in this chapter it shall be construed to include a pecuniary forfeiture, penalty, and amercement." But these sections upon which the company relies have no application to a case like the present. Section 1292, which gives a right of action in a case of this sort, expressly provides that the forfeiture shall be "to the person sending the dispatch, or to the person to whom it was addressed;" and it would therefore be manifestly inconsistent with the intention of the legislature to hold that the commonwealth has any interest in the penalty sought to be recovered in the present case, or that the action is not properly in the name of the plaintiff.

The next question, then, is whether section 1292, so far as it relates to a case like the present, is unconstitutional. That the

power of Congress to regulate commerce among the states is unqualified and unlimited, is not disputed. It was so decided in the great case of *Gibbons v. Ogden*, 22 U. S. 9 Wheat. 1, 6 L. ed. 23, and the subsequent decisions to the same effect are very numerous. It must also be conceded that telegraphic communication, like the transportation of passengers and merchandise, is commerce, and that such communication, when had between different states, is interstate commerce. In *Western U. Telegr. Co. v. Texas*, 105 U. S. 460, 26 L. ed. 1067, it was distinctly decided that a telephone company occupies the same relation to commerce, as a carrier of messages, that a railroad company does as a carrier of goods; that both companies are instruments of commerce; and that their business is commerce itself. See, also, *Western U. Telegr. Co. v. Pendleton*, 1 Inters. Com. Rep. 306, 122 U. S. 347, 30 L. ed. 1187; *Leloup v. Mobile*, 2 Inters. Com. Rep. 134, 127 U. S. 640, 32 L. ed. 311. Nor is it denied that those subjects of commerce which are national in their nature, admitting of only one uniform system or plan of regulation, such as the transportation of commodities or the transmission of messages between different states, are subject to the exclusive control of Congress, and consequently that any regulation thereof by state legislation, whether Congress has legislated on the subject or not, is void. *Cooley v. Philadelphia Port Wardens*, 53 U. S. 12 How. 299, 13 L. ed. 996; *Welton v. Missouri*, 91 U. S. 275, 23 L. ed. 347; *Henderson v. Wickham*, 92 U. S. 259, 23 L. ed. 543; *Gloucester Ferry Co. v. Pennsylvania*, 1 Inters. Com. Rep. 332, 114 U. S. 196, 29 L. ed. 158; *Robbins v. Shelby County Taring Dist.* 1 Inters. Com. Rep. 45, 120 U. S. 489, 30 L. ed. 694; *Leisy v. Hardin*, 3 Inters. Com. Rep. 36, 135 U. S. 100, 34 L. ed. 128; *Lehigh Valley R. Co. v. Pennsylvania*, 4 Inters. Com. Rep. 87, 145 U. S. 192, 36 L. ed. 672; *Western U. Telegr. Co. v. Texas*, 105 U. S. 460, 26 L. ed. 1067; *Leloup v. Mobile*, 2 Inters. Com. Rep. 134, 127 U. S. 640, 32 L. ed. 311.

These principles were acted on by this court in *Norfolk & W. R. Co. v. Com.*, 88 Va. 95, and we do not understand them to be controverted in the present case. But does the statute, the validity of which is here drawn in question, amount to a regulation of commerce? In *Western U. Telegr. Co. v. Pendleton*, 1 Inters. Com. Rep. 306, 122 U. S. 347, 30 L. ed. 1187, a statute of Indiana was held to be repugnant to the commerce clause of the Constitution, so far as it attempted to regulate the delivery of dispatches sent from that state into other states, because, as the

court said, conflicting legislation would inevitably follow with reference to telegraphic communications between different states, if each state was vested with power to control them beyond its own limits. But that is not the question arising in the present case, nor does the reasoning in that case apply to this. This is an action for the failure to deliver in this state a dispatch sent from another state and deliverable here, under a statute of this state. There is no question as to the extraterritorial operation of the statute, and it will be time enough to decide that question when it arises.

It has been argued with much earnestness that the statute amounts to a regulation of interstate commerce, but we are unable to come to that conclusion. If it can be said to affect commerce at all, it does so only remotely or incidentally. It prescribes no new rule, and imposes no additional duty, and, so far as the delivery of telegrams is concerned it simply prescribes a penalty for a failure to deliver where the regulations of the company itself require such delivery. That it would be competent, moreover, for the state to afford redress through her courts, according to the common law, for the negligent failure of a telegraph company to deliver a dispatch sent from another state, is unquestionable; and, if this may be done, it is equally competent for the state to seek by legislation, in advance, to prevent such violation of duty. We think the case is within the principle decided in *Sherlock v. Alling*, 93 U. S. 99, 23 L. ed. 819, namely, that "the legislation of a state, not directed against commerce, or any of its regulations, but relating to the rights, duties, and liabilities of citizens, and only indirectly and remotely affecting the operations of commerce, is of obligatory force upon citizens within its territorial jurisdiction, whether on land or water, or engaged in commerce, foreign or interstate, or in any other pursuit." This principle was applied and amplified in *Smith v. Alabama*, 1 Inters. Com. Rep. 804, 124 U. S. 465, 31 L. ed. 508; and again in *Nashville, C. & St. L. R. Co. v. Alabama*, 2 Inters. Com. Rep. 238, 128 U. S. 96, 32 L. ed. 352. In the *Smith* case, the question was whether a statute of Alabama making it unlawful for any locomotive engineer to drive or operate any train of cars without having been first examined and licensed was in contravention of the commercial power of Congress, so far as it applied to engineers employed on interstate trains, and it was held that it was not. After a full consideration of the case, the conclusion announced was (1) that the statute was not, in its nature, a regulation of commerce; (2) that it was properly an act of legislation within the reserved power of the state to regulate the relative rights and duties of persons within the state so as to secure safety of person and property; and (3) that, so far as it affected interstate commerce, it did so only indirectly, and not so as to burden or impede such commerce. In the course of the opinion, it was said, by way of illustration, that a common carrier, although engaged in interstate commerce, is liable according to the local laws of the par-

ticular state in which he may be guilty of any nonfeasance or misfeasance, as, for example, for his failure to deliver goods at the proper time and place, or for injuries to passengers, caused by his negligence, and that in neither case would it be a defense that the law giving the right of redress was void as being an unconstitutional regulation of commerce by the state. These views were repeated in the case in 2 Inters. Com. Rep. 238, 128 U. S. 96, 32 L. ed. 352, above cited, where a statute of Alabama requiring the examination of certain railway employes with respect to their powers of vision was sustained, and held not to be a regulation of commerce. The provisions of the statute like those of the statute upheld in the *Smith* case, were held to be but parts of that local law which governs the relation between carriers of passengers and merchandise, and the public who employ them, which, as respects interstate commerce, are not displaced until they come in conflict with an express enactment of Congress; and, after quoting from the opinion in the *Smith* case, it was added that what the state may punish or afford redress for, when done, it may seek, by proper precautions in advance, to prevent. In *Sherlock v. Alling*, *supra*, the main point was whether a state statute giving a right of action to the personal representative of the deceased, whose death was caused by the wrongful act or omission of another, could be constitutionally applied to the case of a loss of life by a collision between steamboats navigating the Ohio river, engaged in interstate commerce. The defendant's contention was that the statute enlarged the liabilities of parties for such torts, and, if applied to marine torts, would constitute a new burden on commerce. But this view was rejected, and the statute was held a valid addition to and amendment of the general law of the state, which did not, within the meaning of the Constitution place a burden on commerce, or amount to a regulation thereof; and, referring to previous decisions relied on by the defendant, it was said that the legislation adjudged invalid in those cases "created, in the way of tax, license, or condition, a direct burden on commerce, or in some way directly interfered with its freedom."

Tested by these principles, we are of opinion that section 1292 of the Code is not open to the objection that has been urged against it. It is not, in a legal sense, a burden upon, or a regulation of, commerce, nor does it conflict with any Act of Congress. It is simply, as was the legislation involved in the cases just mentioned, an amendment or enlargement of the local law, which is subject to modification by the legislature, and which regulates to the relative rights and duties of telegraph companies, and persons doing business with them, in this state. It is, of course, competent for Congress, in the exercise of its plenary power in the matter, to prescribe specific regulations touching foreign or interstate commerce, which regulations would supersede all conflicting local laws which, even indirectly, affect such commerce; but, until some such action is taken by Congress, we are obliged to hold

that section 1292 is a valid enactment. The following extract from the opinion in *Smith v. Alabama* is, *mutatis mutandis*, no less applicable to this case than to that. There it was said: "But for the provisions on the subject found in the local law of each state, there would be no legal obligation on the part of the carrier, whether *ex contractu* or *ex delicto*, to those who employ him; or, if the local law is held not to apply where the carrier is engaged in foreign or interstate commerce, then, in the absence of laws passed by Congress, or presumed to be adopted by it, there can be no rule of decision based upon rights and duties supposed to grow out of the relation of such carriers to the public

or to individuals. In other words, if the law of the particular state does not govern that relation, and prescribe the rights and duties which it implies, then there is, and can be, no law that does, until Congress expressly supplies it, or is held by implication to have supplied it, in cases within its jurisdiction over foreign and interstate commerce. The failure of Congress to legislate can be construed only as an intention not to disturb what already exists, and is the mode by which it adopts, for cases within the scope of its power, the rule of the state law, which, until displaced, covers the subject." The result of these views is that the judgment complained of must be affirmed.

UNITED STATES CIRCUIT COURT, SOUTHERN DISTRICT OF OHIO.

Re CHARLES WORTHEN.

(See 8. C. 58 Fed. Rep. 467.)

A state statute positively prohibiting the sale of oleomargarine does not apply to original pack-

ages of the article brought from another state.

January 10, 1891.

PETITION for a writ of habeas corpus to procure the discharge of prisoner from the custody of the sheriff of Hamilton county, to which he had been committed for alleged violation of the Oleomargarine Act. *Petitioner discharged.*

The facts sufficiently appear in the opinion.

Mr. John W. Herron for petitioner.

Messrs. Matthews & Cleveland for respondent.

Sage, D. J., delivered the following opinion:

The respondent was convicted under an act of the legislature entitled "An act to prevent deception in the sale of dairy products, and to preserve the public health," passed March 7, 1890.

That act prohibits the manufacture or sale of oleomargarine unless it be manufactured and sold in separate and distinct form, and in such manner as will at once advise the consumer of its real character,—free from any coloring matter, or other ingredients which would cause it to look like butter, etc.

It appears from the testimony that the respondent, as the agent of Friedman & Swift, oleomargarine manufacturers at Chicago, is engaged, at the corner of Front and Main streets, in the city of Cincinnati, in disposing of original packages of oleomargarine, shipped from Chicago by his principals, and disposed of by him in the original packages.

The oleomargarine so shipped is composed of neutral lard, 50 per centum; oleo oil, 35 per centum; natural butter, 10 per centum; and cream and milk, 5 per centum; to which is added a sufficient quantity of salt and coloring matter (an article called "annotto"), which, according to the testimony, is precisely what is used in coloring creamery butter.

This oleomargarine is a compound having the appearance, and almost exactly the taste, of butter; so nearly so that they cannot be distinguished, or that they can be distinguished only upon a careful inspection; and it is an article not deleterious as food.

Now, as I look at the decision of the supreme court in the case of *Bowman v. Chicago & N. W. R. Co.*, 1 Inters. Com. Rep. 823, 125 U. S. 465, 31 L. ed. 700, there is scarcely a question left open for the consideration of this court.

The Ohio statute does not merely regulate or throw a guard about the sale of the pro-

duct shipped by the manufacturers to the respondent, and sold by him; but it positively prohibits the sale.

Counsel for respondent rely upon the following passage from the decision in *Leisy v. Hardin*, 8 Inters. Com. Rep. 46, 135 U. S. 122, 34 L. ed. 137.

"These decisions [with reference to the police power of the states] rest upon the undoubted right of the states of the Union to control their purely internal affairs, in doing which they exercise powers not surrendered to the national government; but whenever the law of the state amounts essentially to a regulation of commerce with foreign nations or among the states, as it does when it inhibits, directly or indirectly, the receipt of an imported commodity, or its disposition, before it has ceased to become an article of trade between one state and another, or another country and this, it comes in conflict with a power which, in this particular, has been exclusively vested in the general government, and is therefore, void."

Near the close of the opinion in this case (135 U. S. 124, 34 L. ed. 138) the Chief Justice says:

"Up to that point of time [when the property would become mingled with the common property within the state] we hold that, in the absence of Congressional permission to do so, the state had no power to interfere by seizure, or any other action, in prohibition of importation and sale by the foreign or nonresident importer. Whatever our individual views may be as to the deleterious or dangerous qualities of particular articles, we cannot hold that any articles which Congress recognizes as subjects of interstate commerce are not such, or that whatever are thus recognized can be controlled by state laws amounting to regulations, while they retain that character; although, at the same time, if directly dangerous in themselves, the state may take appropriate measures to guard against injury before it obtains complete jurisdiction over them."

That is, by way of illustration, if there should be an importation of dynamite, it could not, in defiance of the local law, be stored within the limits of the city of a state. The opinion continues:

"To concede to a state the power to exclude, directly or indirectly, articles so situated, without Congressional permission, is to concede to the majority of the people of the state, represented in the state legislature, the power to regulate commercial intercourse between the states, by determining what shall be its subjects, when that power was distinctly granted to be exercised by the people of the United States, represented in Congress; and its possession by the latter was considered essential to the more perfect Union which the Constitution was adopted to create." Now, by the Act of Congress of August, 1886, oleomargarine was undoubt-

4 INTER S.

edly recognized as an article of commerce, and put under the control of a national law, regulating its sale; following it not only through the course of manufacture, and regulating that, but following it also into the hands of the wholesale dealers; requiring that it should be so branded and marked as to make it impossible to practice upon any one able to read any fraud with reference to its character; and following it further into the hands of the retail dealer, requiring him to take out a license under the authority of the United States, and to brand the packages and mark them so as to prevent the deception of purchasers as to the real character of the article.

It is clear to my mind that it is the duty of this court to assume that this Act will be enforced, and that the provisions which the legislative department have made to prevent fraud will be effective. The oleomargarine brought into the state in the original packages is within the protection of the Constitution of the United States, and it can be sold in the original packages, entirely independently of the provisions of the state statute, and subject only to the provisions of the national statute.

But the instant an original package is opened, and its contents exposed for sale at retail, they thereby, to adopt the language of the supreme court, "become mingled with the property of the state, and subject in every respect to its law."

It would be practically a nullification of the provisions of the Constitution of the United States to hold that the state, while it may not interfere with the importation within its limits of any article of commerce which it deems hurtful to its people, may, immediately upon its importation, throw its prohibition about it, and prevent its sale; and so, by defeating the object of the importation, effectually prevent the importation itself.

I do not say that the state statute is unconstitutional; on the contrary, I think that it is constitutional when applied to sales within the state of all oleomargarine there manufactured, and of the sale of broken packages of oleomargarine imported from other states or from foreign nations. I do not think that the federal constitution interferes in the least with the power of the state of Ohio to regulate or prohibit the manufacture or sale of oleomargarine in this state, or imported into this state, after once the original package has been broken; but the state law does not apply to, and cannot be enforced against, sales in the original packages of oleomargarine imported into the state.

My conclusion, therefore, is that the respondent has not been within the reach of the Ohio statute, and that it does not apply to the case made against him, and that he must be discharged.

SUPERIOR COURT OF BUFFALO, GENERAL TERM.

HOLLIS J. PARKS, *Appt.*,
v.
JACOB DOLD PACKING CO.

(See S. C. 8 Misc. 570.)

Feb. 2, 1894.

1. A contract of employment for the main purpose of getting cut freight rates and rebates from railroad companies, within the Interstate Commerce Act is void, and no recovery can be had for its breach under the provisions prohibiting special rates and rebates and making it a misdemeanor for the shipper or his agent to solicit or induce the violation of its provisions.
2. The court will take judicial notice of the geographical location of Kansas City and Wichita, and that transportation by railroad from these places is over lines outside the state of New York.
3. In determining whether a contract of employment to procure rebates from railroads included railroads within the operation of the Interstate Commerce Act, the conduct of the parties in obtaining rebates from roads outside the state may be resorted to.
4. The rule that the question of the illegality of a contract for breach of which an action is brought is not raised when not alleged in the answer does not apply when from plaintiff's own testimony the contract appears to be illegal.

A PPEAL from a judgment upon a decision directing a nonsuit and dismissing the complaint, and from an order denying a motion for a new trial, made on the minutes of the court. *Affirmed.*

Mr. M. Filmore Brown for appellant.
Mr. Sherman S. Rogers for respondent.

Hatch, J., delivered the opinion of the court:

This action is brought to recover damages for a breach of contract of hiring. The plaintiff was the only witness sworn, and his testimony tended to establish that he entered into a verbal contract with the defendant whereby he agreed to render service for the defendant for the period of one year; that he entered upon said employment January 18, 1892, and continued to work thereunder until the 15th of March, 1893, when, without fault on his part, he was discharged by defendant. The only question presented upon this appeal relates to the validity of the contract of employment, the court below having held it void. The defendant carries on an extensive business in packing and shipping meats, and the services required of plaintiff related to the transportation department. Using plaintiff's language, the material part of the contract is found to be this:

"He [Dold] said that the position that we would create would be the transportation department, something he had never had before. He explained to me what he wanted me to do. He wanted me to handle all railroad matters, and work rebates with the railroad companies, and save him freight money. He said that he had been robbed by the railroad companies for about thirty years. . . . I was to get three thousand dollars for one year. . . . I had entire charge of the transportation department,—a position

known as the 'general manager of the transportation department.' My work was to direct the routing of shipments, and working the different railroads to get the lowest possible rates, either openly or otherwise, and to save all the money in freights I possibly could, both in car lots and less than car lots."

On cross-examination plaintiff stated:

"My first talk with Mr. Dold . . . I told him in a casual way about my capacity to get freight rates below the tariff. I went to Mr. Dold's to handle the transportation department. That was to be my main business. The main feature of that business was getting freight rates properly adjusted, cutting them down low, get a lot of railroad companies, and get the best of them. . . . I was hired to take entire charge of the transportation department, whether it was below the tariff rate, to see that the cars came in promptly and that they went out promptly. Every railroad has a right to carry at schedule rates. I was to use my supposed ability to get special rates from the railroad companies. I knew what the law was on the subject. It has never been proved that it was a felony under the law to be getting cut rates. I knew to a certain extent that the statute made it a felony."

There is nothing left uncertain in the construction of this language or the contract or plaintiff's understanding of it, for he says its main feature was to cut freight rates, and get the best of railroad companies; and in its execution his testimony shows that he made

arrangements with various railroad companies for the shipment of freight; that the defendant paid full tariff rates to the roads, and the latter paid to plaintiff a rebate, which he turned over to defendant, which amounted during the year of his employment to the sum of \$5285.06. Plaintiff seems to have faithfully fulfilled his undertaking, stated at the beginning of his service,—that he would more than save his salary to his employer. It seems unfortunate for him that a somewhat stringent statute hampers the complete exercise of his abilities, and cuts off the pecuniary emoluments derived therefrom. The Interstate Commerce Act, so called, provides, among other things, that every common carrier subject to the provisions of the Act shall make, publish, and print a schedule of tariff charges for the transportation of freight and passengers, between the several states, which shall apply to all persons and corporations under similar conditions and circumstances. Section 2 of said Act provides:

"That if any common carrier subject to the provisions of this Act shall, directly or indirectly, by any special rate, rebate, drawback, or other device charge, demand, collect or receive from any person or persons a greater or less compensation for any service rendered, or to be rendered, in the transportation of passengers or property subject to the provisions of this Act, than it charges, demands, collects or receives from any other person or persons for doing for him or them a like and contemporaneous service in the transportation of a like kind of traffic under substantially similar circumstances and conditions, such common carrier shall be deemed guilty of unjust discrimination, which is hereby prohibited and declared to be unlawful." 1 U. S. Rev. Stat. Supp. 529.

It is argued that these provisions relate only to the common carrier, and not to the shipper; that at common law it was not against public policy to contract for shipment with rebate on freights, so it is now no offense for the shipper or his agent to induce the carrier to violate the law, in consequence of which the present contract is lawful in character and provides for meritorious service. The case relied upon to support this construction (*Root v. Long Island R. Co.*, 2 Inters. Com. Rep. 576, 4 L. R. A. 331, 114 N. Y. 300) discredits it, for in that case the rebates provided for had consideration in the use of a coal pocket and docks, constructed by plaintiff's assignor, and it was held, taking all the circumstances into consideration, a question of fact whether such rebates constituted an unjust discrimination against other individuals to the injury of their business. But the court says:

"Had this provision [for rebates] stood alone, unqualified by other provisions, without the circumstances under which it was executed, explaining the necessity thereof, we should be inclined to the opinion that it did provide for an unjust discrimination."

Whether the contract could be upheld at common law or not is of little consequence, for by section 10 of the Interstate Commerce 4 INTER 8.

Act it is made a misdemeanor for the shipper or his agent to solicit or induce the carrier by any means to violate the provisions of the act by cutting the established tariff rate. 1 U. S. Rev. Stat. Supp. 686, 687. Consequently, by its express terms, the Act is made to apply to to the plaintiff as though he were named in the prohibitive sections. Treating the Act as *malum prohibitum* solely, defendant is not aided, for, as to the forbidden acts, the parties are in *pari delicto*, and each are subject to the penalties of the statute. Under such circumstances there can exist no enforceable contract. *Tracy v. Talmage*, 14 N. Y. 183-190, 67 Am. Dec. 132; *Knowlton v. Congress & E. Spring Co.* 57 N. Y. 518. This contract is an entire one; no part is severable from the other. Its main object was to secure an unlawful preference in procuring freight reductions from established charges. This element was the one of value contemplated by the parties to it; and, as the service contemplated was illegal, and known by both parties to be so, the contract is equally so, and the law will not enforce it, or permit a recovery of damages based upon its violation. *Jackson v. Walker*, 5 Hill. 27; *Foley v. Speir*, 100 N. Y. 552-558; *Parsons, Cont.* (8th ed. 456).

It is further said that there is nothing in the contract showing that it was the intention of the parties to secure rebates from regular schedule tariff rates of railroads carrying freight outside the state of New York. The rule is recognized that it is the duty of the court to give to the contract an innocent interpretation, when possible. Here the evidence excludes the interpretation contended for. The contract was to work railroads by securing a less rate than the schedule charge. In its performance the plaintiff states that on March 5, 1892, he "arranged with the Clover Leaf road (the true name of the road is the Toledo, St. Louis & Kansas City road). They were to pay me four dollars for each single deck of hogs and six dollars for each double deck of hogs from Kansas City to Buffalo. On March 15, 1892, I arranged with the same road to pay me seven and one half cents per hundred pounds on dressed hogs in car lots from Wichita and Kansas City to Buffalo. That would vary from \$15 to \$20 a car." Kansas City and Wichita are large and universally known commercial centers in this country. The court will take judicial notice of their geographical location, and that transportation by railroad from these places is over lines outside the state of New York. *Hunter v. New York, O. & W. R. Co.* 6 L. R. A. 246, 116 N. Y. 615; *Lanfear v. Meestier*, 18 La. Ann. 479, 89 Am. Dec. 658, note 678, 679; *Pearce v. Langfit*, 101 Pa. 507, 47 Am. Rep. 737. *The Peterhoff*, Blatchf. Prize Cas. 521, 522. What was done by the parties under the contract may be resorted to for the purpose of aiding the interpretation; and the evidence in this case shows clearly that the railroads from which rebates were to be obtained were understood to embrace roads outside the state, and, as we have already seen, the contemplated reduction was to be less than the regular tariff

schedule. It is therefore brought within the prohibitive terms of the Interstate Commerce Act.

It is also contended that the answer does not allege that the contract is illegal, and therefore the question is not raised. But this rule does not apply when, from plaintiff's own testimony, the contract appears to be illegal. *Honegger v. Wettstein*, 94 N. Y. 260. It is quite apparent that the parties—

plaintiff, at least—knew the service to be rendered was in violation of the Interstate Commerce Act; that trouble would ensue if the details were known to Federal authorities,—an apprehension which the evidence discloses was well founded. Under such circumstances, a clear case is presented for denying the relief asked for.

The judgment and order appealed from are therefore affirmed, with costs.

PENNSYLVANIA SUPREME COURT.

COMMONWEALTH of Pennsylvania, for Use of Philadelphia County *et al.*, *Appt.*,
v.
George SCHOLLENBERGER.

(156 Pa. 201.)

1. That one having goods for sale is a nonresident manufacturer and sells his goods within the state through an agent does not, under the Federal Constitution, relieve him from the operation of the local police laws, if he keeps in the state a store containing a stock of goods for the inspection of customers from which he makes sales to actual customers.
2. An original package, trade in which is protected by the Federal Constitution, is such form and size of package as is used by producers or shippers for the purpose of securing both convenience in handling and security in transportation of merchandise between dealers in the ordinary course of actual commerce.
3. Showing that a package of material to be used as food was made, stamped, and branded in another state is not sufficient to show that it is an original package, trade in which is protected by the Federal Constitution, without showing further that it was in the form usually adopted in the trade for purposes of transportation.
4. The sale of a package of goods, entire and unbroken as imported from another state, will be protected as interstate commerce only when the form and size of the package is that usually adopted in the trade for purpose of transportation, and not when adopted with a view to unlawful intrastate retail trade.

Decided July 19, 1893.

A PPEAL by complainant from a judgment of the Court of Common Pleas No. 3 for Philadelphia County reversing a judgment of a magistrate's court in favor of plaintiff in an action brought to recover the statutory penalty for an alleged violation of the oleomargarine Act. *Reversed.*

The case was submitted upon an agreed statement of facts, which was as follows:

That the defendant is a resident and citizen of the state of Pennsylvania.

That the defendant is engaged in business at 219 Callowhill street, in the city of Philadelphia, Pa., as the agent of the Oakdale Manufacturing Company, whose principal office and place of business is in the city of Providence and state of Rhode Island; and was acting as such agent from the first day of June, 1891, and on the 30th day of November, 1891.

That the said defendant, on the 21st day of July, 1891, paid to the collector of internal revenue of the first district of Pennsylvania the

NOTE.—The above decision is a very notable one, making a new distinction or test as to original packages of commerce which is of very great importance. That the test adopted based on commercial usage is much less certain in its application than the test of the mere existence of an unbroken package as imported, does not imply that it is or is not the true one although certainty is much to be desired. But another consideration which may perhaps be regarded as more controlling is the question whether or not the shipper and importer of goods from one state into another to be sold in original packages in defiance of state law can be restricted by any custom of the trade as to the form and size of packages which shall be protected. Since the sale in any form or size of package is condemned by the state law and the parties to the business

must intend to do what the state law forbids, it may be questioned whether they have not the right if they are entitled to sell their goods in defiance of state law at all, to put the goods up in the form which will most facilitate their sales; or to put it in another form whether a package which can be readily sold directly to the consumer may not be an article of interstate commerce when transported from another state and sold unbroken. Whatever may be the final decision on this point by the Supreme Court of the United States, the Pennsylvania court has enlarged the law of interstate-commerce in a very important particular.

As to what constitutes original packages, see also *State v. Chapman* (S. Dak.) 10 L. R. A. 432, and *Keith v. State* (Ala.) 10 L. R. A. 430.

sum of four hundred and eighty dollars, as and for a special tax upon the business as agent for the Oakdale Manufacturing Company in oleomargarine, and obtained from said collector a writing in the words following: "Internal revenue store license to defendant as agent."

That on November 30, 1891, in the city of Philadelphia, at his said place of business as aforesaid, said defendant, acting as agent for the said Oakdale Manufacturing Company, sold and delivered to one John H. Berry, carrying on the business of a coffee house, at 606 Lombard street, in the city of Philadelphia, Pa., a package containing eighty pounds of oleomargarine for the sum of \$12.40, which said sum of \$12.40 was paid to the defendant as agent of the Oakdale Manufacturing Company on the said 30th day of November, 1891; which said package of oleomargarine was manufactured in the state of Rhode Island and shipped to their agent, the defendant, the said George Schollenberger, who sold and delivered the said package, unbroken, to the said John H. Berry, and which package was marked, branded, and stamped in the manner prescribed by the commissioner of internal revenue with the approval of the secretary of the treasury.

If, upon this statement of facts, the court is of the opinion that the defendant is liable for the penalty imposed by the act of assembly, entitled, "An Act for the Protection of the Public Health and to Prevent the Adulteration of Dairy Products and Fraud in the Sale thereof," approved May 21, 1885, then judgment to be entered in favor of the commonwealth and against the defendant in the sum of \$100 and costs of this suit; but if the court be of the opinion that for any reason the defendant is not so liable, then judgment be entered for the defendant.

It is hereby agreed by counsel for plaintiff and defendant in the above case, that for the purpose of this case, the word "oleomargarine," when used in the case stated, is intended to mean "an article designed to take the place of butter or cheese produced from pure and unadulterated milk, or cream from the same; and manufactured out of any oleaginous substance or any compound of the same, other than that produced from unadulterated milk or cream from the same."

It is further agreed that the said package was sold as an article of food within the words of the Act of May 21, 1885.

Measrs. Luther S. Kauffman, Charles F. Warwick and Wayne MacVeagh, for appellant:

The Act of May 21, 1885, Pub. Laws, 22, is constitutional.

Powell v. Com. 114 Pa. 292, 60 Am. Rep. 350, 127 U. S. 678, 82 L. ed. 258.

The Act of May 21, 1885, is excepted from the general scope of the decision in *Leisy v. Hardin*, 135 U. S. 100, 34 L. ed. 128; *Com. v. Zell*, 11 L. R. A. 602, 138 Pa. 628.

The Act of May 21, 1885, is a proper exercise of the police power of the state, and is not an interference with or regulation of interstate commerce.

Titusville v. Brennan, 14 L. R. A. 100, 3 Inters. Com. Rep. 785, 143 Pa. 642; *Boston Beer Co. v. Massachusetts*, 97 U. S. 25, 24 L. ed. 989; 4 INTER S.

McAllister v. State, 72 Md. 390; *Pierce v. State*, 63 Md. 596; *Dent v. West Virginia*, 129 U. S. 114, 32 L. ed. 623.

Mr. A. B. Roney, for appellee:

The state of Pennsylvania cannot prohibit the sale of an article manufactured in and imported from another state, and recognized by congress to be an article of interstate commerce, while the same is still in the hands of the importer in the original package.

Leisy v. Hardin, 135 U. S. 100, 34 L. ed. 128; *Gibbons v. Ogden*, 22 U. S. 9 Wheat. 204, 6 L. ed. 72.

Interstate commerce is such commerce as the nation at large shall determine to be interstate.

Gibbons v. Ogden, 22 U. S. 9 Wheat. 189, 6 L. ed. 68; *Welton v. Missouri*, 91 U. S. 275, 23 L. ed. 347; *Mobile County v. Kimball*, 102 U. S. 697, 26 L. ed. 239; *Robbins v. Shelby County Tax. Dist.* 120 U. S. 489, 30 L. ed. 694; *Com. v. Gardner*, 7 L. R. A. 666, 133 Pa. 284; *Bowman v. Chicago & N. W. R. Co.* 125 U. S. 493, 31 L. ed. 709; *Thurlow v. Massachusetts*, 46 U. S. 5 How. 504, 12 L. ed. 256.

It is in the power of congress exclusively to regulate this commerce.

Brown v. Maryland, 25 U. S. 12 Wheat. 441, 6 L. ed. 686; *New York v. Miln*, 36 U. S. 11 Pet. 157, 9 L. ed. 669; *License Cases*, 46 U. S. 5 How. 599, 12 L. ed. 299; *Passenger Cases*, 48 U. S. 7 How. 283, 12 L. ed. 702; *Bowman v. Chicago & N. W. R. Co.* 125 U. S. 478, 31 L. ed. 704; *Welton v. Missouri*, *supra*; *Mobile County v. Kimball*, 102 U. S. 691, 26 L. ed. 238; *Bartemeyer v. Iowa*, 85 U. S. 18 Wall. 129, 21 L. ed. 929; *Boston Beer Co. v. Massachusetts*, 97 U. S. 25, 24 L. ed. 989; *Mugler v. Kansas*, 123 U. S. 623, 31 L. ed. 205; *Powell v. Pennsylvania*, 127 U. S. 678, 32 L. ed. 258.

If a law merely indirectly and remotely affects commerce the action of the state is valid if exercised under a valid state power.

Wilson v. Blackbird Creek Marsh Co. 27 U. S. 2 Pet. 245, 7 L. ed. 412; *Mobile County v. Kimball*, *supra*; *Withers v. Buckley*, 61 U. S. 20 How. 84, 20 L. ed. 816; *Gilman v. Philadelphia*, 70 U. S. 3 Wall. 713, 18 L. ed. 96; *Pound v. Turck*, 95 U. S. 459, 24 L. ed. 525; *Cooley v. Philadelphia Port Wardens*, 53 U. S. 12 How. 299, 13 L. ed. 996; *Turner v. Maryland*, 107 U. S. 88, 27 L. ed. 870; *Morgan's L. & T. R. & SS. Co. v. Louisiana Board of Health*, 118 U. S. 455, 30 L. ed. 237; *Manchester v. Massachusetts*, 139 U. S. 240, 35 L. ed. 159; *Dent v. West Virginia*, 129 U. S. 114, 32 L. ed. 623.

It is a regulation of commerce and void.

(a) If the state law acts in an unreasonable manner or unnecessarily interferes with commerce.

Foster v. New Orleans Port Wardens, 94 U. S. 246, 24 L. ed. 122; *Wabash, St. L. & P. R. Co. v. Illinois*, 118 U. S. 557, 30 L. ed. 244; *Western U. Teleg. Co. v. Pendleton*, 122 U. S. 347, 30 L. ed. 1187; *Hannibal & St. J. R. Co. v. Husen*, 95 U. S. 465, 24 L. ed. 527; *Minnesota v. Barber*, 136 U. S. 813, 34 L. ed. 455; *Brimmer v. Rehman*, 138 U. S. 78, 34 L. ed. 862; *Voight v. Wright*, 141 U. S. 62, 35 L. ed. 638.

(b) Or is a taxation of that commerce.

Gloucester Ferry Co. v. Pennsylvania, 114 U. S. 196, 29 L. ed. 158; *Robbins v. Shelby County*

Tax. Dist. 120 U. S. 489, 30 L. ed. 694; *Asher v. Texas*, 128 U. S. 129, 32 L. ed. 368; *Crutcher v. Kentucky*, 141 U. S. 47, 35 L. ed. 649; *Lyng v. Michigan*, 135 U. S. 161, 34 L. ed. 150; *Norfolk & W. R. Co. v. Pennsylvania*, 136 U. S. 114, 34 L. ed. 394; *Cook v. Pennsylvania*, 97 U. S. 566, 24 L. ed. 1015; *Corson v. Maryland*, 120 U. S. 502, 30 L. ed. 699; *Stoutenburgh v. Hennick*, 129 U. S. 141, 32 L. ed. 637.

(c) Or amounts to a discrimination.

Welton v. Missouri, 91 U. S. 275, 23 L. ed. 347; *Walling v. Michigan*, 116 U. S. 446, 29 L. ed. 691; *Ward v. Maryland*, 79 U. S. 12 Wall. 418, 20 L. ed. 449; *Sprague v. Thompson*, 118 U. S. 90, 30 L. ed. 115; *Webber v. Virginia*, 103 U. S. 344, 26 L. ed. 565; *Sayre v. Phillips*, 16 L. R. A. 49, 148 Pa. 482; *Re Kimmel*, 41 Fed. Rep. 775; *Spelman v. New Orleans*, 45 Fed. Rep. 3.

(d) Or is a prohibition of a traffic or intercourse recognized as interstate commerce.

Crutcher v. Kentucky, *supra*; *Gibbons v. Ogden*, 22 U. S. 9 Wheat. 1, 6 L. ed. 23; *Cooper Mfg. Co. v. Ferguson*, 113 U. S. 727, 28 L. ed. 1137; *Re McAllister*, 51 Fed. Rep. 282; *State v. Gooch*, 44 Fed. Rep. 276.

This exclusive power of congress begins when the journey to another state has actually begun.

Coe v. Errol, 116 U. S. 517, 29 L. ed. 715; *The Daniel Ball v. United States*, 77 U. S. 10 Wall. 557, 19 L. ed. 999.

It continues during the journey.

Hall v. DeCuir, 95 U. S. 485, 24 L. ed. 547; *Louisville, N. O. & T. R. Co. v. Mississippi*, 133 U. S. 587, 33 L. ed. 784; *Gibbons v. Ogden*, 22 U. S. 9 Wheat. 194, 6 L. ed. 69.

While the articles are in the hands of the railroad or common carrier.

Bowman v. Chicago & N. W. R. Co. 125 U. S. 465, 31 L. ed. 700; *Crutcher v. Kentucky*, 141 U. S. 47, 35 L. ed. 649.

In the hands of the consignee.

Unless congress has provided otherwise.

Wilkerson v. Rahrer, 140 U. S. 545, 35 L. ed. 572.

The decision of the lower court is supported by *Con. v. Paul*, 48 Phila. Leg. Int. 4; *State v. Gooch* and *Re McAllister*, *supra*.

Williams, J., delivered the opinion of the court:

This case belongs to an rapidly growing class, that has already become uncomfortably large and troublesome in this state. The profits to be derived from an unlawful traffic are much larger than those that flow from legitimate trade, provided the unlawful traffic may be pursued without serious interference from the officers of the law. Law-abiding citizens will not embark in a business that is forbidden by the laws of the state

in which they live. Timid men are afraid to do so. This kind of operation is left therefore to those who have no respect for law, no interest in the public welfare, and no fear of public opinion. When such men deliberately determine to put money in their pockets by engaging in a business which the state has declared to be injurious to the public morals, the public health, or the public peace, and has therefore forbidden altogether, or placed under strict police regulations, they are morally certain to seek immunity for themselves and their unlawful business by immediate flight to the sanctuary of the national constitution, and there laying hold on the horns of the altar of interstate commerce. The road to this refuge of lawbreakers is well beaten. There are signboards at every crossing on the route, and the intermediate stations for possible rest wear conspicuous signs of invitation. The travelers over it are generally foreigners to the state whose laws they trample upon, and include a motley assortment of traders. Beginning with the peripatetic swindlers whose worthless wares are transported in tin trunks, which they carry in their hands, and who hunt their victims in the secluded villages and along the country roads, with an instinct that rarely fails, and running up or down the scale of lawbreakers to the men whose commercial operations extend to the sale of oleomargarine by the pound, and of intoxicating drinks by the pint, there is no man in the procession who is not a conscious and deliberate law-breaker, and who does not set his possible profits from a forbidden business above his duty to society or the state that protects him. These men seek to pervert a rule of law that has a wide and a beneficial field of operation. They claim to be engaged in interstate commerce, and to be entitled to the protection of the general government, as against the police laws of the individual states, for that reason. In support of their claim they will assert that their "goods," whether consisting of oleomargarine, beer, whiskey, paste diamonds, pinchbeck watches, or the like, were made on the other side of the state line, and imported by or for them; or it may be they will claim to be the agents or factors of the makers, or to have received, and to be engaged in selling, "original packages" consisting of a pound of oleomargarine, or a pocket flask of whisky, put up expressly for their trade at the still or factory, just "over the line." The mischief done and attempted in this manner, under the guise of interstate commerce, is so great, so open, and so difficult to suppress or punish that in many states besides this it has become a matter of general and sincere regret that the interstate commerce clause was ever held applicable to trade in any article recognized throughout the civilized world as a proper subject for police regulation and control. We are embarrassed by the difficulties in the way of the enforcement of our police legislation made in good faith, for the protection of our citizens. The question involved in this case is therefore one of great practical importance. It is nothing less than whether the police power of the states survives at all, or has been ab-

sorbed and extinguished by the interstate commerce clause in the national constitution. We recognize the fact that this is a federal question. It has been the subject of many decisions by the Supreme Court of the United States, and was at one time thought to be well settled in favor of the existence and proper exercise of police powers by the several states. We entertain that opinion still, but the contrary view has been pressed upon us with so much earnestness in the argument that we feel constrained to examine briefly some of the positions taken by the appellant.

It is said the recent case of *Leisy v. Hardin*, 135 U. S. 100, 34 L. ed. 123, justifies the contention that this state is powerless to interfere with the defendant's traffic. But *Leisy v. Hardin*, like all other cases, must be read in the light of its own facts. Leisy was a brewer, who made beer in the state of Illinois. Hardin was an officer of the state of Iowa, where the law forbade the sale, and the keeping for sale, of any form of intoxicating drink except for sacramental, medical, or mechanical purposes. Leisy shipped from his brewers in Illinois to his agent in Iowa about 300 casks and eleven cases of beer, sealed in the ordinary manner. These were sent there for sale, and were in the hands of Leisy's agent or employer in Iowa for that purpose. While the entire consignment of beer was yet in the possession of the maker or his agent, with seals unbroken, it was seized by Hardin, under the law of Iowa, and taken out of the possession of Leisy's agent. An action of replevin was then brought to recover the casks and cases so taken. Two questions were thus raised. First, Did Leisy own the packages taken from the possession of his agent? Second, If he was the owner, has he a right to have them in his possession in the state of Iowa? The first question was not controverted. He was the maker and owner of the packages seized. The second question was one of law, and was disposed of upon the interstate commerce clause. The goods being in original packages, with seals unbroken, no sales having been made therefrom, it was held that they were not liable to seizure under the police laws of the state into which they had been brought. This is the single question involved in that case, and beyond that it is not binding as a precedent upon the court that rendered the judgment, nor upon us. We shall not question the wisdom of that decision, nor abate one jot from its legal force, though we sincerely regret some of its consequences. Standing, therefore, squarely on the case of *Leisy v. Hardin*, let us proceed to an examination of the question presented on this record.

The defendant, Schollenberger, is a citizen and resident of this state. For at least two years he has been living under the protection of its laws, and is bound by all the obligations that such residence and protection impose. He is a merchant, with a store in the city of Philadelphia. He sells his goods to customers as other merchants sell their goods, from his stock in store open to their examination. The commodity, or one of the commodities, in which he deals is oleomargarine, for the sale of which at his store in Phila-

delphia he has obtained a license under the internal revenue laws of the United States during the last two years. He sells, not for shipment in original packages to other countries or other states, but to local customers, and in the case now before us, to an eating-house keeper near by, for consumption upon his table as an article of food. Now, our statute explicitly forbids the sale and keeping and the offering of oleomargarine for sale as an article of food. The identical acts forbidden by the law are thus seen to be the acts which he admits he is engaged in, and which he claims the right to do, notwithstanding his residence in, and the statutes of, the state. This right he claims to derive from the interstate commerce clause in two ways. The first of these rests on the nonresidence of the manufacturer. He asserts that the oleomargarine is made in another state. Because the manufacturer can lawfully made and sell under the laws of the state where the manufactory is located, he contends that the manufacturer can sell his own product anywhere, and for this purpose can establish stores for its sale all over this state, if he chooses to do so. As the manufacturer may do this in person, it is contended that he can do it by an agent, so that he could have as many stores, conducted by as many agents as there are towns in the commonwealth, and conduct the trade in them all, regardless of the police laws of the state. The second line along which he claims to derive immunity is the "original package" doctrine. He says he sells in the packages made up at the factory. He does not divide a roll, a pail, or tub of his "goods," but requires the purchaser to take the entire roll, pail, or tub made, filled, or shaped at the factory. We think neither of these positions should avail the defendant. We do not deny that a nonresident manufacturer may sell his goods, and ship them to a buyer in the usual trade packages employed in good faith by manufacturers, without being amenable to the police laws of this state therefor. He may bring them here, and hold them in bulk without danger. So much is fairly ruled in *Leisy v. Hardin*. He may sell them to the trade or for shipment to the states in the same unbroken trade packages, notwithstanding their unlawful character. This clearly results from the rule in *Leisy v. Hardin*. We might have held, had the question been one for us, that the object of the interstate law commerce clause was quite different from what it seems thought to be. We might have thought it intended to prevent the establishment of state custom-houses and taxation along state lines, and to make for the general purposes of legitimate trade all the states open to the manufacturers and merchants of the several states. But for this the states might have intercepted all goods reaching their borders, and weighed, valued, and taxed them before permitting them to proceed to their destination. The destructive effect upon commerce of such restrictions was clearly foreseen and wisely guarded against by our fathers. But the protection of the lives, the health, and morals of citizens was the chief of the duties of government left to the states when the Union was

formed. The common law rights and remedies are to be sought in the courts of the states. For this reason we would have held that the police regulations of the states stood on impregnable ground, and that, while no state had the right to tax or to burden interstate commerce, each state had the right to exclude from its territory such articles of food or drink as were injurious in their character and effect upon the health or the morals of the public. But, however this may be, it will not be denied that state commerce—that is, business conducted within the lines of a state—was left to state control. It was the intention of the United States to protect the citizens and the productions of one state against unjust discrimination by the other states, but it was and is the duty of the state to protect its citizens against each other.

If, then, the retail of oleomargarine at the defendant's store is to be regarded as in any sense his business, as it would seem to be from the form of the licenses attached to the case stated, and from all the facts, he is clearly liable as an individual to the penalty provided by the law which he has broken. Can the facts that the store is the store of the manufacturer, and that he is their agent, relieve him from liability? The sales are not made from the factory, nor under the right which the fact of making confers on the maker. On the contrary, the sales are made under a store license granted, not to an establishment located in another state, but to a store in this state. When a nonresident of Pennsylvania comes into the state to embark in business here, his situation is like that of any other resident, and his business done at his store is state, not interstate. It does not matter where he obtains his goods. Interstate commerce does not necessarily depend on the origin of goods; or, rather, all men who buy and sell foreign merchandise are not necessarily engaged in interstate commerce. If it was otherwise, all merchants would be superior to state laws, for all deal to some extent in goods made in other states and in other countries. It is not simply or mainly the origin of the goods, therefore, that is to be considered, but the nature of the business done. One who keeps a stock of goods in store for the inspection of customers, and sells from this stock to actual consumers, is a local dealer. His business is intrastate, not interstate. Our act of 1885, under which this case arises, is not a trade regulation. It is a police law. This court has so held repeatedly, and our view of it was expressly affirmed by the Supreme Court of the United States in *Powell v. Pennsylvania*, 127 U. S. 678, 32 L. ed. 253, a case which turned upon that single question. It does not undertake to deal with an importer from another country or state, but with manufacturers, and dealers within the state. It prohibits the manufacture of oleomargarine within the limits of the state. It also prohibits the sale, the offer to sell, and the having in possession with intent to sell, the same "as an article of food." It lays its prohibition on those who are fairly subject to its jurisdiction, and on no others. We have, then, a valid police law, so declared by the highest tribunal in the land, which pro-

hibits the sale of oleomargarine as an article of food within the state. We have the proprietor of a store located and licensed here making sales of the prohibited article to customers for the prohibited purpose. It does not matter that the merchant makes his home in another state, or that he makes his sales by a clerk or agent, rather than in person. He is a local dealer, selling in violation of the local law, and liable to its penalty. If the residence of the dealer could affect the character of his trade, then our police laws, intended to protect our own people, would operate as a discrimination against our citizens, and in favor of citizens of other states, and would commit to those having no interests in common with us a most odious monopoly in every form or kind of traffic which our state should attempt to regulate or to suppress. Intrenched behind the interstate commerce clause so construed, citizens of other states could prey upon our people, trample upon our laws, and make gain out of a traffic forbidden to our citizens, only to be delivered up absolutely and unconditionally to them. It would require only that such citizen of another state should establish a local store in some of our towns or cities, or in all of them; conduct a local business, to meet a local demand; and, when called upon by the officers of the law, make reply that he made the goods in some other state, and, as a manufacturer, supplied himself, as a local dealer, with wares of a foreign origin. Neither the foreign origin of the goods sold, nor of the seller, nor both together, will convert a business that is local and intrastate into one that is general and interstate, within the meaning of the constitution of the United States.

But the defendant's second position is that, admitting the views now stated to be correct, he is, nevertheless, beyond the reach of the state law for another reason, viz. that his sales are made in original packages, and are therefore interstate commerce. We have examined the decisions of the supreme court of the United States for a definition of the term "original package." It does not seem, however, to have received, and perhaps at this time is not capable of, a precise definition, that may be applied to it in all cases. The idea for which it stands is, however, not difficult of apprehension or statement. The methods adopted by manufacturers and importers for packing and preparing goods for transportation by sea or land differ with the differences in the character, bulk, and material of the merchandise itself. The general purpose is to adopt that form and size of package best adapted to the safe and convenient transportation and delivery of the particular class of goods to be moved, because the convenience of the trade will be best subserved thereby. Such packages, put up with a view to the convenience and security of transportation and handling, in the regular course of trade, are the original packages of commerce. If we look at the meaning of the words "employed" we are brought to the same conclusion. "Original" means pertaining to the beginning or origin; the first or primitive form of a thing. "Package"

means a bundle or parcel made up of several smaller parcels, combined or bound together in one bale, box, crate, or other form of package. An "original package" is such form and size of package as is used by producers or shippers for the purpose of securing both convenience in handling and security in transportation of merchandise between dealers in the ordinary course of actual commerce. Such packages are not always made up by putting smaller packages or bundles together, but may include any form of receptacle that shall hold a fixed quantity; as a barrel of sugar or salt, a bag of coffee, a chest of tea, and the like. The package must not be divided or its unity destroyed. When it is received unbroken from the importer through the custom house, or from the manufacturer by the ordinary channels of transportation, it is within the protection of the interstate commerce doctrine, and the state may not subject it to vexatious delays, appraisement, taxation, or trade restriction. But it has never been held that the importer might subdivide his package, and dispose of its several parts in detail. On the contrary, in many cases the United States courts have held that, upon such subdivision or breaking of bulk, the original package ceased to be such; and the goods became mixed with, and indistinguishable from, the merchandise already within the state, and therefore subject to state laws. This assigns to each jurisdiction its proper powers. The general government protects the citizens of the several states in the movement of their commodities across state lines for the purpose of commerce. The state regulates the retail trade conducted within its own borders, and forbids the sale of such articles to its citizens as it finds to be injurious to them. We are asked in this case to go a step further, and hold that any package which a manufacturer may choose to put up and send to himself as a merchant, or to a customer, is necessarily an "original package," because it was put up by a manufacturer outside of the state. We cannot so hold.

This question was brought to our attention recently by the case of *Com. v. Zell*, 138 Pa. 615, 11 L. R. A. 602. In that case a distiller living, or at least making whiskey, just over the state line, established a store or an agency within the state. He put up his "goods" in bottles, ranging in capacity from one quart down to one half pint, and, packing them in unsealed barrels, sent them to the Pennsylvania store. When they reached the agent, the bottles were taken from the barrels, and arranged upon the shelves and in the windows of the store in the manner usual in that trade, and sold to customers. The seller was prosecuted for the sale of intoxicating liquors without a license, such as the laws of the state require. His defense was—the now common one—that he was engaged in interstate commerce. His position was that the bottles sold by him singly to customers had been filled and corked at the distillery, which was in another state, and that they were the "original packages" put up by the maker, and transported across the line to his store for sale. The contention was seriously

and earnestly made that any size or shape of jug or bottle which the distiller might desire to meet the needs of the retail sale of drink became, when filled and shipped by him across a state line, an "original package," within the meaning of that phrase as used by the United States courts in the interstate commerce cases. The character of the package appears to have been submitted to the jury, who convicted the defendant. The defendant appealed to this court, and we said, through Paxson, *Ch. J.*: "Whether a box or a barrel of beer can be separated and sold in single bottles as original packages will be formally decided when the question squarely arises. The jury evidently regarded it as a trick and an evasion of our statute." The judgment was accordingly affirmed. The question which it was not necessary to decide in *Com. v. Zell*, *supra*, is fairly involved in this case, so far as oleomargarine is concerned. The case stated concedes that the package was sold by this defendant for consumption, as "an article of food," but asserts that it was sold in the form in which the maker put it up at his factory. It is not said that it was an "original package" in express words, nor that it was in the form usually adopted in the trade for purposes of transportation. It is reasonable to infer that when the defendant was admitting the sale, and setting up his justification for a violation of the law, he would do this as strongly as the facts would sustain him, had he gone into the proof upon a trial before a jury. What the case stated does tell us is that the defendant sold at his store in Philadelphia, to one John H. Berry, the keeper of a coffee house at 606 Lombard street, Philadelphia, a package of oleomargarine, weighing eighty pounds, made and stamped and branded in Rhode Island, for use as an article of food. This is almost identical with the defense in *Com. v. Zell*, which was that the bottles sold by the defendant were put up and shipped in another state, and sold in the same form in which they were received. This does not go far enough. The defendant in this case, as in *Zell*'s case, was *prima facie* a lawbreaker. It was incumbent on him to show his right to violate the police laws of the state in which he lived or carried on his store affirmatively and clearly. It is not enough to hint or suggest the existence of such a right. It must be set up, and his ability to escape the penalty of the broken law depends on the sufficiency of the justification. The fact alleged as a justification is that the package sold was "made, stamped, and branded" in Rhode Island. To enable the defendant to stand on this statement, it is necessary for us to go with him to his legal conclusion, viz., whatever package is put up at a factory outside the state is an "original package," within the meaning of the interstate commerce doctrine. This we distinctly refuse to do. The United States courts have not so held as we understand the cases, and such a conclusion could not be sustained on principle, as the question presents itself to us. The consequences of such a holding are obvious. In this case the owners of the store in Philadelphia are the owners of the factory in another

state. As merchants they understand the needs of their retail trade, and the forms and sizes of rolls, tubs, or packages that will best suit the wants of their customers. As manufacturers they can put their product in packages of such size and shape as shall meet their own needs as merchants. They have both ends of the traffic in their hands, and may do, as they undoubtedly are in the habit of doing, whatever their profits as retailers require them to do as manufacturers. A jury would be justified in finding in such a case, as the jury found in Zelt's case, that the mode of putting up the packages was not adapted to meet the requirements of actual interstate commerce, but the requirements of an unlawful, intrastate, retail trade. In this case the facts are found for us as by the parties. We are to determine their legal effect. The defendant is found to have made sales of oleo-margarine as an article of food contrary to the provisions of our statute. It is also found that he made these sales for a nonresident employer. But the residence or business of the owner, standing alone, is wholly immaterial. Our law deals with the local trade, regardless of the nationality or residence of the trader. It is further found that the sales are

made in packages put up by the trader at his factory, and sent to his store in this city for sale. This, as we have said, does not amount to an assertion that the sales are made in the "original packages" of commerce. If it shows anything upon the subject, it shows that they are not so made. One who plants his feet squarely upon the police laws of this state, and defies its officers to suppress or to punish his unlawful trade, must show a clear legal right to take and maintain his position as a public enemy, or suffer the penalty of the broken law. To hold otherwise would make it impossible for the people of any state to protect themselves from evils that by common consent throughout the civilized world need to be restrained and removed by suitable legislation. It would also strike a blow of absolutely crushing weight at the existence of the police power in the several states, and render all attempts at its exercise ineffectual and useless.

The judgment of the court below is reversed, and judgment is now entered on the case stated in favor of the plaintiff for the sum of \$100, with the costs of suit. After judgment is properly entered, let the record be remitted for purposes of execution.

NEBRASKA SUPREME COURT.

ST. JOSEPH & GRAND ISLAND R. CO., *Plff. in Err.*,

v.

DE WITT W. PALMER.

- *1. The state courts have not lost their jurisdiction of the subject-matter of actions against carriers because of interstate shipments by reason of the fact that congress has legislated upon the subject.
2. A railroad company, in the carriage of goods, is subject to the liability of a common carrier,

and must answer for all losses not occasioned by the act of God or the public enemy, and cannot, in this state, by special contract, limit or relieve itself from this liability.

3. The fact that the contract was for the carriage of goods from a point in this state to a point in another state does not change the rule.

*Headnotes by IRVINE, C.

Decided November 22, 1893.

ERROR to the District Court for Adams County to review a judgment in favor of plaintiff in an action brought to recover the value of goods lost while in possession of defendant or a connecting carrier for transportation. *Affirmed.*

The facts are stated in the commissioner's opinion.

Messrs. John M. Thurston, W. R. Kelly and E. P. Smith, for plaintiff in error:

It is alleged that the bill of lading was not the contract, that plaintiff did not know of nor

consent to the terms thereof, that defendant's agent asked them to sign a receipt for the goods, and that they did so without reading it, supposing it to have been a receipt. That defendant's agents did not call their attention to the contents thereof, and that he "fraudulently concealed" from them the terms thereof; that the release clause was not called to their attention, and that the insertion thereof was a fraudulent attempt by defendant to limit the contract actually made.

There is absolutely no proof tending to support the allegation of fraudulent concealment,

NOTE.—The above decision seems to add a new point to the law of interstate commerce, in deciding that such commerce is subject to the law of the state as expressed in its constitution and statutes denying the right to limit the liability of carriers. These provisions seem to go somewhat beyond

the common law as held in most states and in the federal courts; but we understand the decision to be that federal statutes or decisions on this question cannot control even in the case of interstate shipments, especially in respect to the liability of a corporation of the state.

or of any act of omission or commission on the part of defendant's agent amounting to or tending to show fraud, or any other thing outside of a proper and fair conduct of the matter in hand.

It conclusively appears that plaintiff knew all about the uses and purposes of such documents, and that in his business he had become familiar with it. They were made out in duplicate in his presence, after he had twice applied for such documents, and after discussion of, at least, some of the conditions thereof, signed in duplicate and mutually delivered. He had ample time and opportunity to and did in fact examine them. After this the defendant entered upon the performance of the contract, and promptly and fully upon its part complied therewith. Under such circumstances plaintiff cannot now be heard to deny that he made it, or to offer as evidence of another contract the verbal negotiations of the parties which resulted in the written contract.

Delaney v. Linder, 22 Neb. 280; *Morrissey v. Schindler*, 18 Neb. 672; *Clarke v. Omaha & S. W. R. Co.* 5 Neb. 322; *Hamilton v. Thrall*, 7 Neb. 210; *Dodge v. Kiene*, 28 Neb. 216.

The facts in law estopping the plaintiff to deny the contract, the court should have enforced it.

Taylor v. Fox, 16 Mo. App. 527; *Mulligan v. Illinois Cent. R. Co.* 36 Iowa, 181, 14 Am. Rep. 514; *St. Louis, K. C. & N. R. Co. v. Cleary*, 77 Mo. 634, 46 Am. Rep. 18; 2 Rorer, Railroads, p. 1319; Wheeler, Modern Law of Carriers, p. 22; 3 Wood, Railway Law, p. 1578, note; Hutchinson, Carr. § 241, p. 240; *Cincinnati, H. & D. R. Co. v. Pontius*, 19 Ohio St. 222, 2 Am. Rep. 391; *St. Louis, K. C. & N. R. Co. v. Cleary*, supra; *Hopkins v. St. Louis, I. M. & S. R. Co.* 29 Kan. 544; *Bank of Kentucky v. Adams Exp. Co.* 93 U. S. 175, 23 L. ed. 872.

It not appearing that any fraud or imposition was practiced, or that any mistake intervened, the plaintiff must be conclusively presumed to have become acquainted with its contents, and if he did not do so the consequences of his folly and negligence must rest upon himself. Courts cannot undertake to relieve parties from the effects of such inattention and want of care. If once they should enter this doubtful domain, it is impossible to foresee to what lengths their interference might be pressed, or of what limits it would finally admit.

Mulligan v. Illinois Cent. R. Co. 36 Iowa, 188, 14 Am. Rep. 514; *Robinson v. Merchants Despatch Transp. Co.* 45 Iowa, 470; *Goetter v. Pickett*, 61 Ala. 387; *Dawson v. Burrus*, 73 Ala. 111; *Western R. Co. v. Harwell*, 91 Ala. 340.

If a bill of lading is delivered to the shipper at the time when the carrier receives the goods all prior negotiations are merged in the writing and the shipper is charged with notice of its contents. The writing becomes the sole evidence of the undertaking.

The service to be rendered was that of transporting the goods from Hastings, Nebraska, to Grants' Pass, Oregon. The contract was one relating to interstate business. The service itself, and the contract in relation thereto, were subject to the terms and conditions of the Act of Congress.

There is no reason why the supposed inhibition of the Nebraska constitution should now be applied to determine the rights of parties who have made a contract relating to the business of interstate commerce.

Hart v. Pennsylvania R. Co. 112 U. S. 331, 28 L. ed. 717; *Wabash, St. L. & P. R. Co. v. Illinois*, 118 U. S. 557, 30 L. ed. 244, 1 Inters. Com. Rep. 31.

The Constitution of the United States having given to the courts the power to regulate commerce, not only with foreign nations but among the several states, that power is necessarily exclusive when the subjects that are national in their character admit only of one uniform system or plan of regulation.

No appearance for defendant in error, *Mr. John M. Ragan* having been of counsel in the lower court.

Irvine, C. filed the following opinion:

The plaintiff in error was a railroad company operating a line of railroad between St. Joseph, Mo., and Grand Island, Neb., and passing through the city of Hastings, Neb. In December, 1889, certain goods were loaded into a car at Hastings for shipment to Grant's Pass, Or. These goods consisted of furniture, wearing apparel, and household goods, belonging partly to one Pardee, and partly to one Hart, and of a stock of drugs and drug-store fixtures belonging to the defendant in error, Palmer. The goods were carried to Grand Island by the plaintiff in error, and there turned over to the Union Pacific Railway Company, on the line of whose road the car was wrecked, and no part of the goods was ever delivered at Grant's Pass. Pardee and Hart assigned their claim to Palmer, who brought suit in the district court of Adams county to recover damages for the loss of the goods. The petition of the plaintiff below, in addition to the foregoing facts, which are undisputed, pleads, among other things, that Palmer, Pardee, and Hart entered into a verbal contract with the defendant to transport said goods and property to Grant's Pass, and there safely deliver them in ten days, in consideration of the sum of \$200, and that after the goods were loaded into the car a paper was presented to Pardee for signature, and he signed it believing it to be a receipt, and in ignorance of certain clauses therein contained; that after the goods were turned over to the railroad company for shipment, and the freight of \$200 paid, the railroad company's agent stated to the owners that the \$200 might not be enough to pay the freight, and extorted from the owners a promise that, in case the freight should exceed \$200, they would pay the excess; that the paper referred to was not the contract of shipment, but that the contract was as first stated, and that the contents and limitations of the paper were fraudulently concealed from the owners of the goods. The paper referred to was in fact a bill of lading, and the clauses in regard to which fraud was alleged were two: The first was that the railroad company assumed no liability beyond the end of its own line; that is, at Grand Island, Neb. The other is as follows: "One

car emigrant outfit O. R. Rel'd val. of \$5. per cwt. in case of total loss S. L. & C."

The answer, so far as it is material, may be analyzed as follows: First. That the railroad was engaged in the business of interstate commerce, and that this was an interstate shipment, and not within the jurisdiction of the state courts. Second. That the bill of lading constituted the contract between the parties, that the first provision quoted exempted the defendant beyond the end of its own line, and that there was no fraud or concealment. Further, that the somewhat cabalistic letters and words quoted from the bill of lading meant, and were understood to mean, owner's risk released to the value of five dollars per hundred-weight in case of total loss, and that the shippers were to load and count the goods. Third. That the contract between the parties contemplated merely the shipment of an emigrant outfit, which was understood to mean household goods alone, and that the stock of drugs was fraudulently loaded into the car—the established rate on a car containing drugs being very much greater than the established rate on an emigrant outfit. Fourth. That, under the interstate commerce law, false representations as to the contents of the package, with the consent and connivance of the carrier or its agent, is constituted a misdemeanor, and bars the plaintiff from relief.

The evidence upon the part of the plaintiff tends to show that Pardee and Hart went to the agent of the company at Hastings, stating to him that they wished to ship their household goods and stock of drugs, and asked him for the rate to Grant's Pass upon the carload; that the agent informed them that the rate would be \$200, and that there would be nothing to pay at the other end of the line; that thereupon the goods were loaded upon a car furnished by the railroad company for that purpose; that, after the loading was complete, Pardee and Palmer went to the agent for the bill of lading; that the agent told them that, inasmuch as the drugs had been loaded upon the car, he was not sure that \$200 would pay the freight, but that he would mark upon the bill of lading a receipt for the \$200, to apply on the freight, and if there was more to pay it must be paid at the other end; that they consented to this because there was no other course left open to them; that the bill of lading was then handed to them, and Pardee signed it, none of the owners reading its conditions, or having his attention called thereto. Upon the part of the railroad company the testimony tends to show that, at the first interview, nothing was said about the stock of drugs, but that, when Pardee came for the bill of lading, the agent told him that he would not give him a clear bill of lading, for he had reason to believe that "there was other stuff in the car besides household goods," but would accept \$200, to be applied, the owners to pay the difference at the other end; that Palmer then handed him \$200, and Pardee signed the bill of lading in duplicate.

The case was submitted to the jury under long instructions, the general effect of which was to submit the question as to whether the

oral agreement pleaded, or the bill of lading, constituted the contract between the parties; further, to instruct the jury that under the laws of this state no limitations upon the liability of a common carrier could be imposed, except upon proof that such limitations had been called to the attention of the shipper, and by him expressly assented to, and submitted to the jury whether or not attention had been called to the limitations and assent obtained. There was a verdict for the plaintiff in the sum of \$5461.58.

1. The question of jurisdiction was first raised by demurrer to the petition, and then by answer. The theory of the railroad company in this regard seems to be that, the shipment being from one state to another, it became subject solely to the laws of the United States. If that were so, it would not oust the court of jurisdiction. It would only determine upon what principles of law the rights of the party would depend. The record shows that an attempt was made to remove the case to the federal court; that the court refused to order the removal. Nevertheless, it would appear that an order of removal must have been obtained from some source, for there is in the record an order of the federal court remanding the case to the district court of Adams county. These proceedings are a part of the law of the case and conclusively determine the question of jurisdiction in favor of the plaintiff.

2. The questions of law in regard to the transaction are discussed in the briefs under a number of heads relating to objections to the evidence, and to the instructions of the court. To state each in its order would consume much space, and a detailed consideration is unnecessary, for the reason that all these exceptions and assignments of error relate to a very few main questions. Great stress is laid upon the point that the bill of lading must be treated as the conclusive evidence of the contract between the parties, and that parol evidence was not admissible to show a prior verbal contract contrary to the terms of the bill of lading. In this connection it is also urged very strenuously that the court erred in submitting the question raised by this evidence to the jury; further, it is urged that the instructions to the court are conflicting; and, still further, that the limitations imposed by the bill of lading upon the carrier's liability are, upon principles of common law, valid obligations, and that they must be enforced, in the absence of actual misrepresentations or concealment, which, it is contended, the evidence does not establish. Numerous authorities are cited upon both sides upon these points. A single consideration disposes of all of these questions. Under the law of Nebraska, whatever the law may be elsewhere, it is beyond the power of a common carrier, by such provisions as appear in the bill of lading,—assuming it to be the contract of the parties,—to so limit its liability. In *Atchison & N. R. Co. v. Washburn*, 5 Neb. 117, it is said: "The common law fixes the degree of care and diligence due from railroad companies as common carriers; and a failure to exercise this care and diligence is negligence, with-

out any legal distinction, as being gross or ordinary." That the better rule of law, sustained by the weight of authority, is that "it is against the policy of the law to allow stipulations which will relieve the company from the exercise of that care and diligence, or which, in other words, will excuse them for negligence in the performance of that duty." This case arose before the Constitution of 1875 went into force. By article 11, section 4, of that Constitution, it is provided that "the liability of railroad corporations as common carriers shall never be limited." While the writer might, if the question were a new one, construe this provision as simply a restriction upon the legislature against the limitation of carriers' liabilities by law, and not as preventing such limitation by special contract, the question is no longer an open one, and has otherwise been determined. In *Missouri Pac. R. Co. v. Vandeventer*, 26 Neb. 222, 8 L. R. A. 129, by contract, the railroad company sought to relieve itself from liability for injury to livestock, unless notice in writing were given before the removal of the stock from its place of delivery. This provision of the constitution was there considered and discussed. The court, speaking through Judge Cobb, says: "So I conclude that the object and intent of the convention in proposing, and of electors in adopting, this provision of the constitution here referred to, was to put it out of the power of railroads, as common carriers, to limit their liability as such by special agreement with shippers, and thus remove from their officers and agents all temptation to effect such exemption from liability, and the loss and damage to property which might, of necessity, follow the release of their responsibility, and that of their agents, therefor. See *Atchison & N. R. Co. v. Washburn*, 5 Neb. 117, a case which arose under the old constitution, but heard in this court under the new."

In addition to this constitutional provision, section 111, chap. 16, Comp. Stat., provides that "any railroad companies receiving freight for transportation shall be entitled to the same rights and be subject to the same liability as common carriers." This is a portion of the general incorporation act, under which the plaintiff in error derives its existence as a corporation. Comp. Stat., chap. 72, art. 1, § 5, provides: "No notice either express or implied shall be held to limit the liabilities of any railroad company as common carriers unless they shall make it appear that such limitation was actually brought to the knowledge of the opposite party and assented to by him or them in express terms before such limitation shall take effect." This section was discussed by the court in *Union Pac. R. Co. v. Marston*, 30 Neb. 241, and held to apply to just such a case as this, where the limitation was contained in a bill of lading which the shipper alleged was given after the making of an oral contract for shipment. Irrespective, then, of the question as to whether there was an oral contract, or whether such oral contract or the bill of lading constituted the final arrangement between the parties, the law of

this state is settled that a common carrier cannot, even by the terms of an express contract, relieve itself of its common-law liability. It is said that at common law the common carrier is not liable for loss, in the absence of special contract, beyond the point at which it delivers the goods to a connecting carrier. To this it should be added that the contract of the shipper was with the carrier first receiving the goods, and if such carrier undertook to deliver the goods at their destination, even though it contemplated doing so through intermediate carriers, it assumed a liability of such character for every part of the route. Many cases hold that receiving goods marked for a point beyond the end of the receiving carrier's route is evidence of a contract to deliver them as marked. In this case the bill of lading was executed in duplicate. In one of the copies the destination was left blank. In the other, the language was: "Received of Palmer and Pardee the following described package, in apparent good order, marked and consigned as noted below, contents and value unknown, to be transported to Grant's Pass, Or., and delivered at the railroad depot at that point." Both copies in writing show that the goods were consigned to Pardee at Grant's Pass, Or. The negotiations as to the freight were, according to the uncontradicted testimony, with a view to prepayment all the way through. Hastings was only twenty-four miles from Grand Island, where the car was delivered to the Union Pacific; and the \$200 received by the railroad company if not intended as a full prepayment of the freight to Oregon, was certainly intended to apply on the freight throughout the whole distance. There is no possible view of the evidence from which it could be inferred that the railroad company had only contracted to deliver the goods to the next carrier.

3. The plaintiff in error seeks to avoid the effect of these constitutional and statutory enactments and judicial construction by pleading and arguing the effect of the Act of Congress known as the "Interstate Commerce Law," and amendments thereto. The particular provision relied upon is from the Act of 1889, as follows: "Any person or any officer or agent of any corporation or company who shall deliver property for transportation to any common carrier, subject to the provisions of this Act, or for whom as consignor or consignee any such carrier shall transport property, who shall knowingly and willfully, by false billing, false classification, false weighing, false representations of the contents of the package, or false report of weight, or by any other device or means, whether with or without the consent or connivance of the carrier, its agent or servant, obtain transportation for such property at less than the regular rates then established and in force on the line of transportation, shall be deemed guilty of fraud, which is hereby declared to be a misdemeanor, and shall, upon conviction thereof, in any court of the United States of competent jurisdiction within the district within which such offense was committed, be subject, for each offense, to a fine of not exceeding \$5000 or imprisonment

4 INTER S.

ment in the penitentiary for a term not exceeding two years or both in the discretion of the court." Conceding that the construction of such acts into misdemeanors should render the contract contrary to public policy, to such an extent as to deprive the shipper of his remedy against the carrier, the evidence wholly fails to make out a case within the section quoted. Whatever false billing there may have been was by the company itself, as all the evidence shows that the agent knew before the car was moved after loading that it contained articles other than household goods. Under the most favorable construction of the evidence on behalf of the railroad company, if there was any false representation as to the contents of the "package," its true contents were known before the railroad company took charge of the car, and an agreement was made for the payment of any additional freight by reason of the introduction of drugs into the car. We cannot see, therefore, how this section, conceding it to have the effect claimed for it by plaintiff in error, could affect the right of recovery. To give it such effect would be to declare that the section quoted absolutely protects a railroad company from liability in any case where the shipper uses general terms in describing the goods to the carrier or agent, and the agent paraphrases such language into a technical phrase, and such phrase does not correctly describe the goods, or where the carrier's agent, of his own volition, makes false statements of the character of the shipment. The section referred to was chiefly designed as a restriction upon the carrier. Its whole aim was to prevent false billing or false representations in order to conceal discriminations in favor of particular shippers. It was not intended, and should not be construed, as a means of relieving a carrier from liability because its own agents have committed an error.

But it is argued that, upon general grounds, the whole subject-matter of interstate transportation was by the constitution placed within the power of Congress, and that Congress, having enacted the Interstate Commerce Act, assumed such jurisdiction, and thereby nullified existing state laws; that not only the acts of Congress must be treated, upon these subjects, as the supreme law of the land, but that the decisions of the Federal court must be accepted as the final statements of the law, prevailing against state statutes and state decisions. Without discussing the question as to whether the Federal decisions are opposed to the constitutional and statutory provisions of this state, referred to, it is sufficient to say that we cannot accept the theory of the railroad company, as above outlined. It is admitted in the pleadings that the company is a corporation organized under the laws of the state of Nebraska. The time of this organization does not appear, but the statutory provisions date from the very earliest period of the state's history. The statute quoted above is a portion of the general incorporation act relating to railroads, the act under which this company derives its right to exist. To say that an Act of Congress—especially, one not, in express

terms, contrary to these provisions—shall be given the effect of nullifying them, would be to say that this state must cease to exercise its sovereign powers of creating corporations for railroad purposes, else it must content itself with creating such corporations absolutely untrammelled by conditions, or permit them to exist subject only to such conditions as the Congress of the United States may see fit to impose. While this state forms a constituent part of the Union, under its present constitution, this court should never yield its consent to such a doctrine. If such be the law, it must be declared by another tribunal; and, in case it should be so declared, the exercise by the state of its sovereign power of creating such corporations should, from every motive of self-preservation, cease.

4. In addition to the general verdict rendered by the jury, there was an attempt to have certain special findings returned. One of the errors assigned is the refusal of the court to mark upon the margin of the submission of those findings the word "given." If the submission of these findings amounted to an instruction, the objection would be purely technical, and the refusal of the court to use the word "given" could not operate to the prejudice of the plaintiff in error. Instead of marking the submission given, the court made a note as follows: "As I have said in the attached submission, I submit these special findings for you to pass upon; and, in the opinion of this court, it would be the grossest kind of error to attempt to control your discretion in passing on these special findings." There also appears to have been indorsed upon the questions submitted a quotation of that portion of the statutes whereby it is permitted to the jury, in their discretion, to return a general or special verdict. Of the special questions submitted, the first related to the value of the goods at Hastings, and was answered. The second related to the value of the goods at Grant's Pass, Or., at the time when they should have been received there. In answer to this, the

jury stated, "We do not know." The other questions related to the freight rates under different circumstances. All these questions were answered, "We do not know." By the instructions, the jury was told that if it should find for the plaintiff the verdict should be for the market value of the goods at Grant's Pass, at the time they should have been there delivered, together with interest. The second question submitted was material to the case. The others were entirely immaterial, and the discharge of the jury without answering them was in no way prejudicial. It is urged, however, that, when the jury answered that they did not know the market value of the goods at Grant's Pass, they, in effect, stated that they were unable to fix the measure of damages, and that the general verdict could not, therefore, have been founded on the evidence, and in obedience to the instructions. But, under the evidence given as to the value of the goods at Grant's Pass, no verdict less than that returned could be sustained. There is evidence tending to show that the value of the goods at Hastings was less than the value marked upon an inventory offered in evidence, and one witness testified that the goods were worth no more at San Francisco than at Hastings, but there is nothing to show that he even had any knowledge of the value at San Francisco. The only competent evidence of the value of the goods at Grant's Pass, Or., fixes it at more than \$7000; so that the verdict rendered could not have been affected by any findings based upon the evidence in answer to the special question submitted.

Some of the instructions do not state the law correctly. Some of them are apparently conflicting, but, in any view of the evidence, for the reasons already stated, no verdict different in character, or less in amount, could be sustained.

The judgment is therefore affirmed.

Ryan, C., concurs. **Ragan, C.**, took no part in the consideration or decision of this case.

UNITED STATES SUPREME COURT.

THE MERCHANTS COTTON PRESS & STORAGE COMPANY, *Plff. in Err.*,
v.
THE INSURANCE COMPANY OF NORTH AMERICA, of Philadelphia, ET AL.

THE MUTUAL FIRE INSURANCE COMPANY OF NEW YORK, *Plff. in Err.*, v. THE INSURANCE COMPANY OF NORTH AMERICA, of Philadelphia, ET AL. THE CONTINENTAL INSURANCE COMPANY OF NEW YORK, *Plff. in Err.*, v. THE INSURANCE COMPANY OF NORTH AMERICA, of Philadelphia, ET AL. THE FIRE ASSOCIATION OF NEW YORK, *Plff. in Err.*, THE INSURANCE COMPANY OF NORTH AMERICA, of Philadelphia, ET AL. THE LIVERPOOL & LONDON & GLOBE INSURANCE COMPANY, of England, *Plff. in Err.*, v. THE INSURANCE COMPANY OF NORTH AMERICA, of Philadelphia, ET AL. THE ROYAL INSURANCE COMPANY OF ENGLAND, *Plff. in Err.*, v. THE INSURANCE COMPANY OF NORTH AMERICA, of Philadelphia, ET AL.

(See S. C. Reporter's ed. 388-389.)

1. In a suit in equity in the nature of a creditor's bill brought by insurance companies against a
4 INTER 8.

railroad company and other companies who are made parties in aid of the relief asked against

- that company, if the suit is in fact a single cause of action against the railroad company with incidental relief against the other companies the railroad company is an indispensable party to the litigation, and there is no separable controversy between the other defendants which will allow a part of them to remove the cause from the state court to a Federal court.
2. The voluntary joinder of the parties has the same effect for purposes of jurisdiction as if they had been compelled to unite.
 3. The right of removal must be determined by the pleadings at the time the petition is filed.
 4. In order to justify a removal of a cause from a state court to the U. S. circuit court, on the ground of a separable controversy, between citizens of different states, the whole subject-

matter of the suit must be capable of being finally determined as between them, and complete relief afforded as to the separate cause of action, without the presence of others originally made parties to the suit.

5. The right to take steps for the removal of a cause to the circuit court of the United States, on the ground of a separable controversy, is confined to the parties actually interested in such controversy.
6. There is nothing in the interstate commerce law which vitiates bills of lading, or which, by reason of an allowance of a rebate to the agents of the owners or consignees of goods, if actually made, would invalidate the contract of affreightment or exempt a railroad company from liability on its bills of lading.

[Nos. 807, 808, 809, 810, 811, 812, 813.]

Submitted Jan. 8, 1894. Decided Jan. 22, 1894.

IN ERROR to the Supreme Court of the State of Tennessee, to review a judgment of that court, affirming a decree of the Chancery Court of Shelby County, of the State of Tennessee, upon the merits, and sustaining the decision of the Chancery Court, denying the petition of several of the plaintiffs in error to remove the cause to the Circuit Court of the United States for the Western District of Tennessee, and holding that certain rebates allowed on cotton shipped on a railroad did not invalidate the bills of lading thereof, in a suit brought by The Insurance Company of North America, of Philadelphia, *et al.*, against The Merchants' Cotton Press & Storage Company, the Cairo, Vincennes & Chicago Line of Illinois *et al.*, defendants, for the relief sought for in the complaint and to charge the railroad company with the loss sustained by shippers and that certain insurances might be collected for the benefit of complainants, etc. On motion to dismiss or affirm. These seven causes were submitted together and present the same Federal questions. *Affirmed.*

The facts are stated in the opinion.

Messrs. S. P. Walker, C. W. Metcalf, Luke E. Wright and T. B. Turley, for plaintiffs in error:

The motion to affirm should not be entertained for the reason that, though it is nominally coupled with a motion to dismiss, such motion to dismiss is colorable only, and manifestly made for the purpose of bringing on the motion to affirm.

Whitney v. Cook, 99 U. S. 607 (25: 446).

The record presented a case for removal to the Federal court, under the Act of Congress in that regard. It showed a separable controversy between citizens of different states, which could be determined without the presence of any of the other parties to the record.

(28: 698); *Ayers v. Watson*, 113 U. S. 594 (28: 1098); *Crumpp v. Thurber*, 115 U. S. 56 (29: 328); *Insurance Co. of N. A. v. Delaware Mut. Ins. Co.* 50 Fed. Rep. 248.

The record establishing that the contracts of affreightment between the C. V. & C. Line and Jones Bros. & Co. were made in violation of the Interstate Commerce Law—such violation making the whole contract illegal under the terms of the statute—no recovery should have been allowed on the bills of lading issued by the C. V. & C. Line to Jones Bros. & Co., and the case of the complainant marine companies depending upon the establishment of the liability of the carriers must therefore fail so far as concerns those bills of lading.

Clarke v. Providence, 1 L. R. A. 725, 16 R. I. 387, 27 Am. & Eng. Corp. Cas. 8; *Petrol Guano Co. v. Jarnette*, 25 Fed. Rep. 675; *Dent v. Ferguson*, 132 U. S. 50 (33: 242); *Hannay v. Eve*, 7 U. S. 3 Cranch, 242 (2: 427); *Gibbs v. Consolidated Gas Co.* 130 U. S. 896 (32: 979); *Miller v. Ammon*, 145 U. S. 421 (36: 759); *St. Louis, V. & T. H. R. Co. v. Terre Haute & I. R. Co.* 145 U. S. 398 (36: 748).

Messrs. John M. Butler, Holmes Cummins and William H. Carroll, for defendants in error:

The denial of the right of removal presents no Federal question.

Sloan Land & C. Co. v. Frank, 148 U. S. 611 (37: 580); *Porter v. Sabín*, 149 U. S. 479 (37: 818).

Denial of the right of transfer raises a Federal question re-examinable upon the assignment of error of the other petitioning defendants.

The domicils of these corporations are not shown by the records.

Jackson v. Ashton, 33 U. S. 8 Pet. 148 (8: 898).

The jurisdiction of the circuit court of the United States depends either upon the existence of a Federal question, or the diverse citizenship of the parties to a suit, where the matter in dispute exceeds the sum of \$2000 exclusive of interests and costs.

Ayers v. McAuley, 149 U. S. 619 (37: 872).

Where the whole controversy is between citizens of different states, all the parties on one

side of that controversy must be citizens of different states from all the parties on the other side.

Strawbridge v. Curtiss, 7 U. S. 8 Cranch, 267 (2: 435); *Smith v. Lyon*, 133 U. S. 818 (83: 636); *Meyer v. Delaware R. Const. Co.* 100 U. S. 457 (25: 593); *Central R. Co. of N. J. v. Mills*, 118 U. S. 256 (28: 951); *Smith v. Akers* ("Akers v. Akers"), 117 U. S. 197 (29: 888); *Susquehanna & W. V. R. & Coal Co. v. Blatchford*, 78 U. S. 11 Wall. 172 (20: 179).

And when in any suit recognizable in the circuit court of the United States, there is a separable controversy, by the settled construction of the third clause of section 2 of the Act of the 8d of March, 1887, as corrected by the Act of the 18th of August, 1888, the whole subject-matter of the separable suit must be capable of being finally determined as between the parties thereto, and complete relief afforded as to the separate cause of action, without the presence of others originally made parties to the suit.

Hyde v. Ruble, 104 U. S. 407 (26: 833); *Corbin v. Van Brunt*, 105 U. S. 576 (26: 1176); *Fraser v. Jennison*, 108 U. S. 191 (28: 181); *Winchester v. Loud*, 108 U. S. 130 (27: 677); *Shainwald v. Lewis*, 108 U. S. 158 (27: 691); *Ayres v. Wiswall*, 112 U. S. 187 (28: 693); *Fidelity Ins. T. & S. D. Co. v. Huntington*, 117 U. S. 280 (29: 898); *Graves v. Corbin*, 132 U. S. 571 (33: 462); *Brown v. Trousdale*, 138 U. S. 389 (34: 987).

The matter in dispute in such distinct and separable controversies must exceed the sum of \$2000 exclusive of interest and costs, and the requisite diverse citizenship must exist before the suit can be transferred upon the petition for removal into the circuit court of the United States by one or more of the defendants actually interested therein.

Ex parte Pennsylvania Co. 137 U. S. 455 (34: 740); *Torrence v. Shedd*, 144 U. S. 527 (36: 528).

It is indispensable, before the state court is required to surrender its jurisdiction of this suit, that the petitioners, or one of them, file in that court a removal petition and give the required security.

Pittsburg, C. & St. L. R. Co. v. Ramsey, 89 U. S. 22 Wall. 328 (22: 824).

If such petition be filed, and it fails to show the citizenship of the parties, it is defective.

Orchore v. Ohio & M. R. Co. 131 U. S. 240 (33: 144).

The jurisdiction of the circuit court of the United States over this suit rests and depends upon the statement made in the petition for its transfer into that court, and verified by the oath of the petitioner.

Virginia v. Paul, 148 U. S. 123 (37: 392); *Ex parte Virginia* ("Virginia v. Rives"), 100 U. S. 813 (25: 667); *Graves v. Corbin*, 132 U. S. 571 (33: 462).

A real and not a fictitious Federal question, is essential to the jurisdiction of this court to re-examine the judgment of the supreme court of Tennessee.

Hamblin v. Western Land Co. 147 U. S. 531 (37: 267).

For the purpose of determining whether a controversy is separable the allegations in the bill must be taken as true, and the combination

charged between these defendants viewed in that light does not present a separable controversy.

East Tennessee, V. & G. R. Co. v. Grayson, 119 U. S. 240 (30: 382); *Central R. Co. of N. J. v. Mills*, 113 U. S. 249 (28: 949).

The test of a right claimed must be determined by the case made by the pleadings at the time the petition is filed; and the test of the sufficiency of the petition is the averments in it.

Graves v. Corbin, 132 U. S. 585 (33: 467).

The bill does not aver facts tending to show any separable controversy between the petitioners or either of them, and any of the other parties to the suit. On the contrary, the bill is an indivisible cause of action as to the petitioners.

Peninsular Iron Co. v. Stone, 121 U. S. 631 (30: 1020); *Bank of Rome v. Haselton*, 15 Lea, 216; *California Ins. Co. v. Union Compress Co.* 133 U. S. 401 (33: 735); *Home Ins. Co. v. Baltimore Warehouse Co.* 93 U. S. 527 (23: 868); *London & N. W. R. Co. v. Glyn*, 1 El. & El. 652; *Hutchinson, Carriers*, § 412 (2d ed.) § 429.

The National Insurance Company filed no petition for the removal of any controversy to be found in the cross-bill of the Phenix Insurance Company.

Rand v. Walker, 117 U. S. 345 (29: 909).

To reach the indebtedness due by the National Insurance Company to these two carriers, or either of them, they are indispensable parties defendant.

United States v. Howland, 17 U. S. 4 Wheat. 108 (4: 526).

And, however this suit be classified, the National Insurance Company is a defendant as garnishee.

Ogilvie v. Knox Ins. Co. 59 U. S. 18 How. 577 (15: 490); *Lewis v. Woodfolk*, 2 Baxt. 25; *Peak v. Buck*, 3 Baxt. 71; *Cook v. Whitney*, 3 Woods, 715; *Weeks v. Billings*, 55 N. H. 371; *Dewey v. West Fairmount Gas Coal Co.* 123 U. S. 333 (31: 181); *Bacon v. Rives*, 106 U. S. 99 (27: 69).

The controversy is an incidental one, and not within the removal acts.

First Nat. Bank of Alexandria v. Turnbull, 83 U. S. 16 Wall. 190 (21: 296); *Barrow v. Hunton*, 99 U. S. 80 (25: 407).

A court of equity will not decree between defendants when neither pleadings nor proof show any controversy or adverse interest between them.

Graham v. La Crosse & M. R. Co. 70 U. S. 3 Wall. 712 (18: 251); *Veach v. Rice*, 131 U. S. 293 (33: 163).

Mr. Justice Jackson delivered the opinion of the court:

The writ of error in each of these seven causes (which were submitted together) presents the same Federal questions, which are, first, whether the supreme court of Tennessee erred in sustaining the action of the chancery court of Shelby county of that state, denying the petition of several of the plaintiffs in error to remove the cause to the Circuit Court of the United States for the Western District of Tennessee; and, secondly, in holding that certain alleged special rates, rebates, or draw-

backs, allowed by Anthony J. Thomas and Charles E. Tracy, receivers of the Cairo, Vincennes & Chicago Railroad Company, through L. L. Fellows, their agent at Memphis, to Jones Brothers & Company, of that place, on cotton shipped over that line to various points in the east, were not in violation of the interstate commerce acts regulating commerce between states of the Union, and did not render the bills of lading issued by the railroad for cotton transported or to be transported so illegal as to invalidate the same and prevent any recovery thereon against the carrier.

The questions thus presented grew out of the following state of facts: On November 17, 1887, about 14,000 bales of cotton in the West Navy Yard Compress of the Merchants' Cotton Press & Storage Company (hereafter called the compress company) were destroyed by fire. The value of the cotton was about the sum of \$700,000. Of the total number of bales thus destroyed about 9608 bales were covered by bills of lading issued by various transportation companies to the owners or consignees of the cotton. The bills of lading issued by the Cairo, Vincennes & Chicago Railroad Company (hereafter called the railroad company) covered 5087 bales of the cotton destroyed, valued at \$245,733.46.

In May, 1887, a contract had been entered into between the railroad company and its receivers, Anthony J. Thomas, and Charles E. Tracy, on the one side, and the compress company on the other, by the terms of which the railroad company and its receivers agreed to give to the compress company all cotton to compress that the railroad company might have to transport out of Memphis in a compressed condition. The compress company, on its part, agreed to properly compress all such cotton, and also to insure the same for the benefit of the railroad company, or owners, for a certain compensation to be paid weekly, which was intended to cover both the service for compressing the cotton and the insurance to be taken out thereon, in good and solvent companies by the compress company. This insurance was to cover any loss while the cotton was under the control of the compress company and until delivered to the railroad company. The contract further provided that the railroad company and its receivers constituted the compress company its agent to receive all cotton intended for transportation over the railroad company's line, and to sign receipts therefor, on the production of which, bills of lading would be issued by the railroad company. This contract was to continue in force until August 31, 1896.

Under and in pursuance of this contract cotton was delivered to the compress company, by the owners or their agents, for transportation over the line of the railroad company from Memphis to points east to the extent of 5087 bales, for which dray tickets or receipts were given by the compress company, and on the production of which the agent of the railroad company issued bills of lading to the several and respective owners or consignees of such cotton.

The railroad company had an all rail line from Memphis, and also a partly water and partly rail line, the water line extending from

Memphis to Cairo, Illinois, at which point the railroad company's rail line commenced and extended by means of its connection eastward. The compress company had a similar arrangement for insuring cotton with other transportation lines, and in pursuance of its undertaking with the carriers it took out insurance on the cotton deposited with it for compression before being transported, aggregating the sum of \$301,750, in forty-four different fire insurance companies, corporations of various states of the Union and of foreign kingdoms. The amount of this insurance fell far short of the value of the cotton deposited with it for compression and which was destroyed by the fire. In all these policies of insurance taken out under and in pursuance of its contract with the carriers, the compress company was named as the assured, but in the body of each of the policies it was set forth and stated that the insurance on the cotton was for the benefit of the railroads, transportation lines, or owners. The insurance was to attach on receipt of the cotton by the compress company, and to terminate when the same was removed for transportation.

The various owners or consignees of the 5087 bales of cotton covered by the bills of lading of the railroad company, with one or two exceptions, insured their interests in their respective lots of cotton in what is called in the litigation marine insurance companies.

There were \$301,750 of insurance thus taken out by the compress company for the benefit of the carriers, and at the same time there was a large amount of insurance taken out by the owners or consignees in the marine insurance companies on the bills of lading issued by the railroad company to the several owners of the cotton.

Soon after the destruction of the cotton various suits were commenced in the state courts by the owners of the cotton destroyed, and the rights of the parties were to some extent settled and adjusted in the cases of the *Lancaster Mills v. Merchants Cotton Press & S. Co.* 89 Tenn. 62, and *Deming v. Merchants Cotton Press & S. Co.* 13 L. R. A. 518, 90 Tenn. 306, 358.

In this last case the supreme court of Tennessee held that the marine insurance companies—most, if not all of whom, had paid the policies issued by them covering the losses of the owners or the consignees of the cotton—were entitled to be subrogated to the rights of such owners or consignees, as against the railroad company under its various bills of lading, if that company was liable on such bills of lading. The supreme court further declared in that case that the compress company held the insurance in the forty-four fire insurance companies taken out by it for the benefit and indemnity of the railroad company or companies which had issued bills of lading on the cotton destroyed, and that to the extent of its proper share or proportion of such fire insurance the railroad company was entitled to have the same collected for its protection and indemnity; but in respect to the liability of the railroad company upon its bills of lading to these marine insurance companies, the court could make no decree, or render any judgment, for the reason that the railroad company was not a party to that cause. It, however, declared

the rights of the marine insurance companies and the liability of the compress company, and of the fire insurance companies, and left the former companies to their remedy by way of subrogation against the railroad company upon its bills of lading to be settled and determined by some new proceeding; and it was ordered that \$210,224.37 of the fire insurance fund be reserved for the indemnity of the railroad company, if that line should be sued and its liability to the marine insurance companies should be established.

Accordingly, on August 7, 1891, after the decision of the supreme court of the state had been rendered in *Deming v. Merchants Cotton Press & S. Co.* 13 L. R. A. 518, 90 Tenn. 306, the Insurance Company of North America, of Philadelphia, a corporation by the laws of the state of Pennsylvania; the Atlantic Mutual Insurance Company, a corporation by the laws of the state of New York; the Providence Washington Insurance Company, a corporation by the laws of the state of Rhode Island, on behalf of themselves and all other marine insurance companies standing in like position, who had paid their insurance to the owners of the cotton, filed their bill in the chancery court of Shelby county, Tennessee, against the Delaware Mutual Safety Insurance Company, a corporation by the laws of the state of Pennsylvania; the Marine Insurance Company, Limited, of London, resident of the United Kingdom of Great Britain and Ireland; the Phenix Insurance Company, a corporation by the laws of the state of New York; R. H. Deming and James H. Foster, partners as R. H. Deming & Co., residents of the state of Rhode Island; The British & Foreign Marine Insurance Company, Limited, of Liverpool, England, resident of the United Kingdom of Great Britain and Ireland; the Cairo, Vincennes & Chicago Line of Illinois; Anthony J. Thomas and Charles E. Tracy, as receiver thereof, citizens of New York; the Merchants' Cotton Press & Storage Company, a corporation of Tennessee; S. R. Montgomery, Napoleon Hill, and Thomas H. Allen, Jr., as trustees, citizens of Tennessee, together with six other alien marine insurance companies, and William Watson and E. R. Wood, aliens; and forty-four fire insurance companies of West Virginia, Pennsylvania, New York, Illinois, Louisiana, Wisconsin, Alabama, Connecticut, Ohio, Texas, Indiana, and of the United Kingdom of Great Britain and Ireland.

The bill, in the nature of a creditor's bill, after reciting the facts already presented, set out the various lots of cotton which the complainants and the other marine insurance companies had insured for the owners or consignees thereof, and which were covered by the bills of lading of the railroad company, which insurance they had paid to the owners upon the destruction of the cotton, and further alleged the contract between the compress company and the railroad company, and that the former was to keep the cotton insured for the benefit of the railroad company. The bill then proceeded to charge that, having paid the owners the insurance on the cotton destroyed, the complainants were entitled to be subrogated to the rights of such owners against the railroad company on its bills of lading, and to have the

rights of the railroad company enforced against the compress company, and the various fire insurance policies which the latter company had taken out on the cotton for the benefit of the railroad company.

The bill stated that the compress company held the fire insurance as trustee or agent for the railroad company; that the railroad company, being liable to the owners of the cotton, to whom it had issued bills of lading for the cotton while in the possession of the compress company, and the marine insurance companies having paid the owners for the loss thereof, were entitled to be substituted to the position of the owners of the cotton as against the railroad company, and as against the compress company, and the fire insurance companies, which had issued policies to the compress company for the benefit of the railroad company.

It was further set out in the bill that after the loss occurred the compress company wrongfully assumed to deal with the fire insurance fund by applying a portion thereof, amounting to \$52,472.26, for the use of such owners of the cotton as had dray tickets from the compress company, and to whom no bills of lading had been issued, and who had no other insurance; and that each defendant fire insurance company had paid on its respective policies to the compress company about 15½ per cent of the amount of its insurance.

It was claimed in the bill that the compress company wrongfully assumed to thus deal with the fire insurance fund, and in disregard or violation of the decision of the supreme court of the state, which had held that the fire insurance collected should be held for the benefit of the transportation lines which had issued bills of lading for the cotton covered therein.

The bill further alleged that the compress company was neglecting its duty to collect the fund, and it and the fire insurance companies were confederating to prevent and avoid the payments by the fire insurance companies of their policies on the cotton represented by the railroad company's bills of lading.

The bill sought to reach and subject, not only the fire insurance taken out by the compress company for the benefit of the railroad company, but also a share or interest of the railroad company in and to certain real estate which the compress company had conveyed after the fire to Napoleon Hill, S. R. Montgomery, and T. H. Allen, Jr., to secure to the persons in contractual relations with it the payment of the contingent liability of the compress company to any or all of them by reason of the failure to fully insure the cotton for which the carriers were liable.

It also claimed that of the \$52,472.26 collected by the compress company and misappropriated to other losses, the sum of \$4394.12 of these collections should have gone to the railroad company on account of cotton covered by its bills of lading. The compress company was sought to be held liable for this amount.

It was further claimed that several of the fire insurance policies were lost by reason of the compress company not collecting the same, and that others were not taken out in good and solvent companies, and for those lost the com-

press company was sought to be made liable in favor of the railroad company.

Among various marine insurance companies which were named as defendants, as standing in like position with the complainants, was the Phenix Insurance Company, a corporation by the laws of the state of New York, which had policies outstanding in favor of the owners of 3600 bales of cotton, of the value of \$179,108. The Phenix Insurance Company, together with Deming & Company, on August 12, 1891, filed their answer and cross-bill against the same defendants, setting out that it had paid the loss on that cotton, and claimed the same rights as were sought to be asserted in the bill of the complainants.

On August 7, 1891, the railroad company and Anthony J. Thomas and Charles E. Tracy, receivers thereof, together with the Delaware Mutual Safety Insurance Company, filed their answer and cross-bill in the case against the compress company and the fire insurance companies, which admitted the liability of the railroad company to the Delaware Mutual Safety Insurance Company to the extent of 500 bales, for which it had issued bills of lading; but denied generally its liability to the marine insurance companies on the bills of lading which it had issued.

The prayer of the original bill was that the questions arising upon the matters and things connected with the loss of the cotton, the insurance thereon, both fire and marine, together with the bills of lading issued by the railroad company to the owners of the cotton which was to be transported by it, and the liabilities of the railroad company on its bills of lading, and of the compress company, might be settled and adjusted, and that the rights of all parties interested therein might be determined in behalf of the complainants and such marine insurance companies as might choose to come in and become parties to the cause; that the railroad company might be declared liable to them, respectively, for the losses in each lot of cotton covered by its bills of lading; that the compress company should be declared as holding the fire insurance policies as indemnity to the railroad company for the benefit of the complainants and other marine insurance companies standing in like position, and that such insurance might be collected for their benefit; "that attachment issue and be levied upon the interest of the Cairo, Vincennes & Chicago Line in the trust fund held by the Merchants' Cotton Press & Storage Company, and by garnishing the defendant fire insurance companies to answer and state what, if anything, they owe upon their respective policies applicable to the liability of the Cairo, Vincennes & Chicago Line, if liability shall be declared herein, or by any court with the parties requisite to the validity of the judgment before such court."

The bill further prayed for publication as to non-resident defendants, "and that upon a final hearing of this cause this court will decree that the C. V. & C. Line is liable to the holders, and through the holders to the plaintiffs, for the value of each of the lots of cotton covered by the plaintiffs' policies and the bills of lading of the C. V. & C. Line, and will apply the insurance effected by the Merchants' Cotton Press & Storage Company uncollected, ren-

dering proper decrees therefor against the Merchants' Cotton Press & Storage Company and the defendant fire insurance companies in exoneration of that liability, giving the proportionate share to the plaintiffs severally, and to such of the defendants as stand in relation to the cotton as the plaintiffs do; that the court will enforce the trust in the Senatobia street shed for the benefit of the plaintiffs and others, to the end that the plaintiffs, and others similarly situated as the plaintiffs, may be fully paid the value of the aforesaid cotton covered under their respective policies of insurance, and distribute the residue, if any there be, to the holders of the certificates issued by the compress company, some of which are held by defendants Napoleon Hill and S. R. Montgomery, who are called upon to produce a specimen of them; and that the said Hill is asked to furnish a list of the holders of such certificates, that they may be parties thereto, they belonging to a numerous class, and their names unknown to the plaintiffs. And the plaintiffs pray for such other relief, general and special, as may be consistent with the facts of the case."

The theory of the bill was that the railroad company and its receivers were liable to the holders of its bills of lading for the value of the cotton burned, and which was covered by them; that the marine insurance companies which had insured the cotton and paid the losses thereon to the owners or consignees thereof, were entitled to be subrogated to the rights of such owners as against the carrier; that the railroad company, through its agent, (the compress company) was entitled to recover against the fire insurance companies under the policies they had issued to the compress company, as its agent, and for its benefit, and that the complainants, and those standing in like position, were entitled to reach the fire insurance fund through the rights of the railroad company, for whose benefit such fire insurance was taken out by the compress company.

On September 5, 1891, the defendants, the Royal Insurance Company, the Continental Insurance Company, the Fire Association, the Home Insurance Company of Louisiana, the Liverpool, London & Globe Insurance Company, and the National Fire Insurance Company presented their petition for removal of the cause from the chancery court of Shelby county to the United States Circuit Court for the Western District of Tennessee. That petition was defective and was not acted upon. Thereafter, on November 21, 1891, the same defendants filed their joint amended petition for the removal of the cause, and, after setting out the nature and character of the original and cross-bills, and the steps taken in the cause up to date, and the relief sought by the original and cross-bills proceeded as follows:

"Petitioners state and show that the Merchants' Cotton Press & Storage Company is a citizen of the state of Tennessee; that the C. V. & C. line is a citizen of the state of Illinois, and that the petitioners are citizens and subjects of foreign states or of states other than the state of Tennessee or Illinois, the said Royal Insurance Company and the said London, Liverpool & Globe Insurance Companies

being citizens and subjects of Great Britain, and the said Continental Insurance Company and said Fire Association being citizens of New York, the said Home Insurance Company being a citizen of Louisiana, and the said National Fire Insurance Company being a citizen of the state of Connecticut, and that the controversy is wholly between citizens of different states or between citizens of one or more of the several states and foreign citizens and subjects, and that the same can be fully determined as between them.

The Merchants' Cotton Press & Storage Company is the assured in the policies issued by said fire insurance companies, and the sole question, so far as concerns said fire insurance companies, is whether said Merchants' Cotton Press & Storage Company, a defendant upon the record, can recover against said fire insurance companies on their respective policies as set out in the bill of complaint in behalf of the plaintiffs and others in like situation or in behalf of the C. V. & C. Line.

"Petitioners further state and show that the amount in the controversy as between the said plaintiffs and each of the petitioners exceeds the sum of two thousand dollars, exclusive of the interest and cost."

The necessary bond was tendered with the petition. The chancery court denied the application for removal, and the cause then proceeded in that court to a final decree, which granted substantially the relief sought for in the bill, and from that decree certain of the defendants appealed to the supreme court of the state of Tennessee. That court affirmed the decree below upon the merits, and sustained the action of the chancery court in denying the application for removal, on the ground that the real controversy in the cause was between the marine insurance companies and the railroad company and its receivers; that the object of the controversy was to charge the railroad company with the loss sustained by shippers and paid by the marine insurance companies, and incidentally to collect from the fire insurance companies such decree as might be obtained against the railroad company and its receivers, to the extent that the railroad company was a beneficiary in the fire policies taken out by the compress company.

The supreme court of the state further held that the fire insurance companies occupied substantially the position of garnishees, and that their indebtedness upon their respective policies might be reached and held subject to such final decree as complainants might obtain against the railroad company, and that the fire insurance companies had no separable controversy in the sense of the judiciary acts which entitled them, or either of them, to remove the cause from the state court to the Circuit Court of the United States for the Western District of Tennessee.

The court further held that if the complainants, and the other marine insurance companies standing in like situation with them, should fail to establish liability against the railroad company, that no controversy would remain as to the other defendants, as the marine insurance companies had no right of action against any of the fire insurance companies, except as incidental to their litigation with the carrier;

that the fire insurance companies were made parties only in aid of the relief which was asked, and that no relief could be granted against them unless the marine insurance companies obtained a judgment against the railroad company. So that the latter was an indispensable party to the litigation, and the suit was in fact a single cause of action against the carrier, with incidental relief against the compress company and the fire insurance companies, and was not removable by the latter companies under the principles laid down in *St. Louis & S. F. R. Co. v. Wilson*, 114 U. S. 62 [29: 677]; *Crumph v. Thurber*, 115 U. S. 56, 61 [29: 328, 329]; *Fidelity Ins. T. & S. D. Co. v. Huntington*, 117 U. S. 280, 282 [29: 898, 899].

In this conclusion of the supreme court of the state of Tennessee we fully concur. The case made by the bill and the relief sought thereunder in behalf of complainants, and those standing in like situation with them, clearly did not present any separable controversy. The plaintiffs in error, who were the petitioners for removal, put their right of removal mainly upon the ground that the case made by the original and cross-bills was virtually a suit by the compress company against the fire insurance companies; that as the compress company was a citizen of Tennessee, and each of said petitioning fire companies was a citizen of another state, or an alien, the latter had a right to remove the cause. This, we think, is a clear misapprehension of the scope of the bill. It admits of no question that the fire insurance policies taken out by the compress company under its contract with the railroad company were, as expressed on the face of the policies, for the benefit of the carrier, and were intended for its protection and indemnity. The compress company had, therefore, no personal interest whatever in the fire insurance policies as against the railroad company by virtue of the contract between the railroad company and the compress company, and by the terms of the fire insurance policies the railroad company was the beneficiary under those policies to the extent necessary to indemnify it against liability for losses incurred directly to itself, or through its liability on its bills of lading. The railroad company had such an insurable interest in the cotton, and was, to that extent, the owner of the insurance standing in the name of the compress company, or held in trust for it. This is settled by *California Ins. Co. v. Union Compress Co.* 133 U. S. 387, 423 [33: 780, 740].

The compress company, aside from the claims which were sought to be asserted against it personally, as trustee of the fire insurance fund, which was sought to be reached to the extent of the railroad company's interest therein, was a necessary and indispensable party to the suit, under the authority of *Thayer v. Life Assn. of America*, 112 U. S. 717 [28: 864], and *Wilson v. Onwego Twp.* ante, p. 70.

It admits of no question that the primary liability, or the right to reach the fire insurance fund, had also to be worked out in favor of the complainants, and other marine insurance companies, through the liability of the railroad company upon its bills of lading. The suit could not have proceeded a step without the

presence of the railroad company, and certainly it presents no separable controversy as between the compress company and the several fire insurance companies.

It is further suggested, as to the right of removal, that each of the marine insurance companies had a distinct and separate cause of action against each of the fire insurance companies on their respective policies. This is a misapprehension, for the marine insurance companies had no right of action against the fire insurance companies. Their cause of action was against the railroad company under its bills of lading issued to the owners of the cotton, who were the assured in the marine companies, and whose loss had been paid by those companies. The right of those companies was directly against the railroad company, by way of subrogation, and to enforce its liability under its bills of lading. They could not have proceeded directly against the fire companies without the presence of the railroad company. The latter was an indispensable party to the relief sought, for it was through only this alleged liability that the fire insurance fund could be reached and subjected to the indemnity of the marine insurance companies. If each of these marine insurance companies had filed a separate bill for the same relief sought by their joint suit there could have still been no right of removal on the part of the fire insurance companies on the ground of a separable controversy, even if the fire insurance companies were not garnishees, as held by the supreme court of Tennessee, for the reason that the railroad company and the compress company would both have been indispensable parties, and could not have been arranged on the same side with the complainants, inasmuch as the liabilities of the railroad company to the marine insurance company was the primary question to be determined. *Louisville & N. R. Co. v. Ide*, 114 U. S. 52 [29: 63]; *Pirie v. Tredt*, 115 U. S. 41 [29: 331].

The complainants had a right to join in enforcing the common liability of the railroad company upon its bills of lading, and, in the language of Chief Justice Marshall, in *New Orleans v. Winter*, 14 U. S. 1 Wheat. 91 [4:44], "having elected to sue jointly the court is incapable of distinguishing their case, so far as respects jurisdiction, from one in which they were compelled to unite." This ruling has been approved in *Peninsular Iron Co. v. Stone*, 121 U. S. 631, 633 [30:1020, 1021].

In the present case, as in *Peninsular Iron Co. v. Stone*, the rights of each of the complainants and of other marine insurance companies occupying the same position, depend, as against the petitioners for removal, on the alleged right of the marine companies to hold the railroad company liable, by way of subrogation, upon its bills of lading, and, as an incident to that liability, to collect the fire insurance fund to the extent of the railroad company's share therein. "Although, as between themselves, they have separate and distinct interests, they joined in a suit to enforce an obligation which is common to all; . . . and while all the complainants need not have joined in enforcing it, they have done so, and this, under the rule, in *New Orleans v. Winter*, 14 U. S. 1 Wheat. 91

[4:44], controls the jurisdiction." The voluntary joinder of the parties has the same effect for purposes of jurisdiction as if they had been compelled to unite.

The right of removal must be determined by the pleadings at the time the petition is filed (*Graves v. Corbin*, 132 U. S. 585 [33: 467]) and testing the application made in the present case by this rule, we had no dispute or controversy set forth in the bill or in the petition for removal between the compress company and the fire insurance companies. On the contrary, these defendants are charged with confederating together for the purpose of relieving the fire insurance companies from liability on their policies.

The bill seeks to charge the railroad company, and then to reach and subject its equitable rights and interests in the fire insurance fund, taken out by the compress company for its benefit. There is not in the bill or in the cross-bills any suggestion or intimation that there is any controversy or dispute between the railroad company and the compress company; or between the compress company and the fire insurance companies. Under such circumstances there is manifestly no separable controversy made by the pleadings, such as entitles the fire companies, or either of them, to remove the cause. There is, in fact, no controversy "which can be fully determined as between them," and as stated by this court in *Torrence v. Shedd*, 144 U. S. 527, 530 [36:528, 531], "by the settled construction of this section (referring to separable controversies) the whole subject-matter of the suit must be capable of being finally determined as between them (the parties seeking removal) and complete relief afforded as to the separate cause of action, without the presence of others originally made parties to the suit."

It may be, under the Judiciary Act of March 3, 1887 (and 1888) as under the Act of March 3, 1875, that the court may disregard the particular position of the parties as complainants or defendants, assigned to them by the pleader, for the purpose of determining the right of removal (*Harter Twp. v. Kernochan*, 108 U. S. 562 [26: 411]) and the matter in dispute may be ascertained by arranging the parties to the suit on opposite sides of the dispute, and if by such an arrangement it appears that those on one side are all citizens of different states from those on the other, the suit may be removed. *Meyer v. Delaware R. Const. Co. (Removal Cases)* 100 U. S. 457 [25: 593]; *Ayers v. Chicago*, 101 U. S. 184 [25: 838].

The plaintiffs in error in the present cases seek to sustain the right of removal by the application of this rule; but it will not avail them, for if the parties are arranged on opposite sides of the primary and controlling matter in dispute, we shall have the three complainants, together with the Phenix Insurance Company, a corporation of the state of New York; the Union Marine Insurance Company, Limited, of London, England; the British & Foreign Insurance Company of Liverpool, England, and the Standard Marine Insurance Company, Limited, of England, on one side, and the railroad company, the compress com-

pany, and the fire insurance companies, together with the other defendants, as parties on the other side.

Now, as thus arranged, we have two alien corporations on the side of the complainants, and two alien fire insurance companies (the London, Liverpool & Globe Insurance Company, and the Royal Insurance Company) on the side of the defendants. Under such position, the alien petitioners would not be entitled to removal; besides it is settled by *King v. Cornell*, 106 U. S. 395 [27: 60] that subdivision two of section 639 of the Revised Statutes was repealed by the Act of 1875, so that an alien sued with a citizen had no right of removal, and this subdivision two of that section was not restored by the Act of March 3, 1887; hence, an alien, in the position of the alien petitioners, in the present case, would have no right to remove the cause on the ground of a separable controversy.

Again, the parties being arranged, as above, according to the matter in dispute, we have the Phenix Insurance Company of New York in the position of plaintiff, with the Mutual Fire Insurance Company of New York (No. 809) the Continental Insurance Company (No. 810) and the Fire Association (No. 811) corporations of the same state, applying for the removal. It is too clear to require the citation of authorities that in this position of the New York corporations, those occupying the position of defendants had no right of removal.

It is further shown by the pleadings that the Phenix Insurance Company in its cross-bill made a defendant of the Newport News & Mississippi Valley Company, a corporation organized under the laws of Connecticut, which was a carrier from Memphis to points east, and had a contract with the compress company like that of the Cairo, Vincennes & Chicago Railroad Company, to insure cotton to be carried over its line, under which arrangement it had issued bills of lading to various parties insured by the Phenix Insurance Company; and that company, after payment of the losses by its cross-bill, sought the same relief against the Newport News & Mississippi Valley Company which was sought against the Cairo, Vincennes & Chicago Railroad Company. So that to the cross-bill of the Phenix Company there were two Connecticut defendants, viz, the National Fire Insurance Company (No. 808) and the Newport News & Mississippi Valley Company, and the relief sought made both of those corporations necessary and indispensable parties. The Connecticut corporations could not in this situation of the parties, if no other objection existed, be entitled to remove the cause.

In respect to the two other plaintiffs in error, the Merchants' Cotton Press & Storage Company (No. 807) and the Mutual Fire Insurance Company (No. 809) it appears that neither of these parties made application to remove the cause from the chancery court of Shelby county. So that neither of them is in position to assign error as to the action of the court in denying the other parties the right of removal. In *Rand v. Walker*, 117 U. S. 340, 345 [29: 907, 909], it was held that the right to take steps for the removal of a cause to the circuit court of the United States, on the

ground of a separable controversy, was confined to the parties actually interested in such controversy. In that case the court said on this subject: "That neither of the parties to the controversy, if it be separable, a question which we do not decide, have petitioned for removal, and the right to remove a suit on the ground of a separable controversy is, by the statute, confined to the parties actually interested in such controversy."

It is, therefore, we think, clear that whether the cause be looked at as a whole, or whether it be considered under any adjustment or arrangement of the parties on opposite sides of the matter in dispute, there was no right of removal on the part of the several plaintiffs in error, or either of them.

The remaining assignment of error based upon the alleged allowance by the local agent of the railroad company of special rates, rebates, or drawbacks to Jones Brothers & Company which, it is claimed, rendered the bills of lading issued by the railroad company to the owners of consignees of the cotton void, so that the marine insurance companies, who had paid the losses, could have no right upon such bills of lading against the railroad company, or the fire insurance companies, needs but little consideration. The supreme court of the state disposed of this question as follows: "This fact of special rate and rebate is denied and it is a matter of controversy and conflict of evidence, and it is also insisted in answer to this by plaintiffs that the interstate commerce law does not apply for the reason that the evidence disproves any 'common contract' over the river and rail rate. We are of opinion, however, and rest our decision upon the ground that if it were assumed that the law was applicable, and the fact of agreement for rebate and special rate proven, it would not prevent liability on the part of the carrier for the freight received and covered by insurance in the hands of the carrier's agent. The law makes such agreements as to rebate, etc., void, but does not make the contract of affreightment otherwise void, and we think there is nothing in the law or the policy of it, which requires a construction that would excuse a carrier from all liability when it made such a contract in connection with that for receipt and transportation of freight. Such a construction would encourage rather than discourage such unlawful agreements for rebates. The carrier might prefer them to liability for the freight. Such a contract for rebate would be void, and could not be enforced; but we think the shipper could nevertheless recover for loss of his freight through the carrier's and insurer's negligence. No different construction has yet been put upon the interstate commerce law so far as we are advised, and we decline to give it any other." We concur in the correctness of this conclusion of the state supreme court.

Jones Bros. & Company were either the agents of the owners or consignees of the cotton, or the sellers thereof to eastern consignees, and the rebates or drawbacks which they claimed to have been allowed, if allowed at all, according to the testimony of one of the members of the firm, was a private benefit which the firm secured, and, so far as appears, with

out the knowledge or consent of the owners or consignees of the cotton. Under such circumstances, if such rebates were paid or allowed to the firm by the agent of the railroad company, it is difficult to understand upon what principle such an allowance would vitiate or render void the bills of lading which the railroad company issued to the owners of the cotton. It is still more difficult to understand how the compress company, or the fire insurance companies, could avail themselves of the arrangement, even regarding it as illegal, between the agent of the railroad company and Jones Brothers & Company. They were not parties to it, and they were not affected by it in any way, shape, or form.

There is nothing in the interstate commerce law which vitiates bills of lading, or which, by reason of such allowance to Jones Brothers & Company, if actually made, would invalidate the contract of affreightment or exempt

the railroad company from liability on its bills of lading.

The principles laid down in *Interstate Commerce Com. v. Baltimore & O. R. Co.* 145 U. S. 268 [36: 699] 4 Inters. Com. Rep. 92, fall far short of establishing that the alleged allowance of rebate to Jones Brothers & Company would render the railroad company's bills of lading invalid and defeat the right of the marine insurance companies, who had paid the losses, to subrogation against the railroad company on bills of lading issued to the owners or consignees of the cotton, who are not shown to have known of, or consented to, the railroad company's agent giving such rebates.

We are, therefore, of opinion that the Federal questions presented by the assignments of error were not well taken and are not sustained, and that the judgment of the supreme court of the state of Tennessee in all of the causes must be affirmed.

UNITED STATES CIRCUIT COURT, SOUTHERN DISTRICT OF GEORGIA.

GEORGIA PACKING CO. *et al.* v. Mayor and Council of MACON.

(.....Fed. Rep.....)

1. A license tax of \$500 per annum imposed on every person selling in a city any meat which is not from animals of his own raising, unless he rents a stall in a public market, while the rent of such stall is \$150 per year and the market regulations are so restricted and burdensome as to preclude the reasonable conduct of a wholesale business there, is unconstitutional in respect to wholesale dealers in meat brought from other states, by reason of the necessarily resulting discrimination against them, although the

ordinances on the subject on their face purport to apply to vendors irrespective of the places from which it comes,—especially where neither sales nor inspection of meat are restricted to the market, and the regulations are clearly made for the purpose of revenue and not merely to prevent the sale of uninspected meat.

2. The enforcement of city ordinances which attempt an unconstitutional interference with interstate commerce may be restrained by injunction from a Federal court.

Decided August 2, 1893.

SUIT to enjoin defendants from enforcing against complainants the provisions of a city ordinance regulating the sale of dressed meats. *Judgment in favor of complainants.*

Statement by **Speer, J.:**

The complainants are wholesale and retail butchers in the city of Macon, in this district. They supply meats to the people of Macon and the surrounding country, dealing exclusively in dressed meats. They do not slaughter. Five sixths of the meats they furnish their customers are cattle reared in western states, killed and dressed there, and shipped in refrigerating cars to Macon. These are of a better quality than the meats obtained in the country contiguous to Macon, and the complainants state for that reason would naturally be regarded with more favor by the public, if the complainants had the

equal protection of the laws; but complainants insist that this is not the case, for that the mayor and council of the city of Macon are depriving them of the equal protection of the laws, and of due process of law, and of the right they have to conduct their business conformably to law. The gravamen of the complaint is that on the second day of June, 1888, certain market regulations were enacted for Macon; market hours were prescribed, as follows: In winter from daylight until ten o'clock. In summer from 3 A. M. to 9 A. M. By the municipal law, winter begins October 1, and summer, April 1; but on Saturdays the market house is open from 3 o'clock P. M. to 8 o'clock P. M. in winter, and 9 o'clock in summer. These regulations further provide that it is unlawful to sell or offer for sale any meats on the streets or elsewhere in the city of Macon during said market hours, and heavy penalties are prescribed for a violation of this rule. Stalls are rented in the market, but none for a sum less than \$150 per annum, but although a butcher may rent a stall, yet his business is

NOTE.—The opinion in the above case very fully presents the subject of license taxes as affecting interstate commerce in meat, and illustrates it by a striking instance of an unlawful attempt to restrict such trade.

practically destroyed for the ordinance provides that no person shall be permitted to buy more at the market than is necessary for the use of his or her family, except during the last hour of the market hours, and further that no person shall sell, or contract to sell, to any one, any article of produce or meat which is to be delivered after market hours, outside of the market building. Not only, therefore, is complainants' business cut off elsewhere during the market hours, but even as renters of stalls they claim they are so hindered and limited as to prevent them from selling meats in any considerable amount to those who are willing to buy. It is further provided by the market ordinances that all persons, not renting a stall at the market for the sale of meat, and who shall sell any kind of meat on the streets of the city of Macon, at any time during the day or night, shall pay a license tax of \$500 per annum, said license to be paid in advance; provided, this section shall not apply to farmers bringing into the city for the purpose of sale the flesh of any animal raised by themselves after market hours. By this last clause we may safely presume it is meant that it shall not apply to farmers bringing into the city for the purpose of sale, after market hours, the flesh of any animal raised by themselves.

It is further provided that after the expiration of market hours every person having any product or article for sale shall remove the same from the market place. On account of this last provision, the complainants complain that they are forced to haul their meats to and from the market at great trouble, expense, and annoyance. That on account of the restrictions and hindrances above mentioned, although the market hours constitute the principal portion of the day when the people have ordinarily been accustomed to make their purchases of meat, yet the sales at the market do not constitute one half of the sales at retail made after market hours at the complainants' respective places of business elsewhere in the town, so that a large part of their capital and time are wasted during market hours. That the ordinance further provides "that a license shall be imposed on butchers or others who have no stall in the market and who shall sell from any shop or wagon (other than nonresidents selling meats of their own raising); and no license shall be issued for less than five hundred dollars." This, it is alleged, is a discrimination in favor of the producers, of meat raised in the country tributary to Macon, and against meat producers who make their products in the western markets, and ship them for sale to Georgia.

The license tax, exclusive of the market ordinance, for the year 1893 upon wholesale dealers in meat, selling to the trade only, is \$25.

Complainants aver that the wholesale meat trade in Macon handles western meats only. There is not enough meat produced in the country around Macon to create a wholesale business, and the tax operates to put a burden upon interstate commerce and to give an undue advantage to dealers in meats raised near Macon. If the complainants should not rent

a stall in the market house under these ordinances, they must pay a license of \$500, even though they sell only after the market hours are over, while farmers from the surrounding country may retain meats brought into the city without any license whatever. The market ordinance, undertaking to prevent the sale of meat on the streets of the city of Macon outside of market hours expressly recognizes such sales. It is not, therefore, an ordinance intended to prevent the selling of meats on any particular street or in any particular locality. Nor does it provide for the inspection of meats elsewhere than at the market, and in point of fact the officials of the city have at no time undertaken to inspect meats elsewhere than in the market house. It is, then, not an ordinance, made for the protection of health, or for the inspection of meats, or for compelling the sale of meats in a particular locality, which might be done under the exercise of the police power; but that under the guise of police regulation, it is an ordinance wholly for the collection of a revenue. That as such it is in violation of the constitution of the state of Georgia and of the United States, in that it prescribes a cheaper license tax for those who sell in the market and at their regular place of business, than for those who sell at their regular place of business, and no tax at all for farmers selling in the city after market hours, while handlers of western meats, not stall holders, must pay a tax of \$500 to sell in the city after market hours. The constitution of the state of Georgia provides that "all taxation shall be uniform upon the same class of subjects." The Constitution of the United States provides that "the citizens of the different states shall be entitled to the equal protection of the laws."

One of the complainants, W. L. Henry, has already been arrested for offering wholesome western meats for sale at his place of business and selling during market hours, and was tried before the recorder of the mayor and council of the city of Macon, on the charge that he had sold meat at his said place of business during the aforesaid market hours, and was fined \$25 and costs. This was appealed to the supreme court of the state which court held that the ordinance was valid. The mayor and council of the city of Macon threaten to continue to arrest and fine complainants every time they undertake to sell, or offer for sale, during market hours, any meats, at their said places of business.

Complainants further aver that they will each be damaged in very large amounts, exceeding the sum or value of \$2000, exclusive of costs.

The bill prays that the court will grant a writ of injunction perpetually enjoining and restraining the defendants, their clerks, attorneys, agents, servants, and employees from enforcing or endeavoring to enforce against complainants any penalty provided in said ordinances for selling or offering for sale any of said meats at their respective places of business or elsewhere in the city of Macon, otherwise than at said market house, or from selling their meats at any time during said market hours; and be further enjoined from

collecting or attempting to collect the license fee fixed by said ordinances for the sale of meats elsewhere than in said market house; and further from interfering with complainants for selling at any time during market hours such meats as they may have to offer for sale, to all persons who may there desire to buy, and that said market ordinances may be decreed to be unconstitutional and void. They ask for a provisional injunction *pendente lite*.

The mayor and council of the city of Macon demur to the bill for want of jurisdiction in this court upon the ground that all the parties are citizens of the state of Georgia, and further, because it does not appear that a question is raised depending upon the violation of any part of the Constitution of the United States; and they answer that they have the right to regulate the selling of meat in the city of Macon, and to confine the sales thereof to the market house in said city during market hours. They further answer that they have the right to fix a license for the sale of meats and other articles in said city. They deny that the effect of the licenses so fixed by them in any way violates the Constitution or the statutes of the United States.

No preliminary injunction was granted, and the facts not being in dispute, the court has taken under advisement the matters presented by the bill, the answer, and the demurrer.

Mr. Marion Erwin for complainants.

Mr. R. W. Patterson for defendants.

Speer, J., delivered the following opinion:

It will be observed from the averments of the bill that there is no attempt to prohibit the sales of meats elsewhere than in the market house of the city. The ordinances in question, therefore, are not directed towards the avoidance of the green grocers and butcher shops. It cannot, we think, be denied that it is within the power of the city to fix one or more localities for the sale of meat. This may be done to facilitate inspection but since by permission of the city a very large amount of the meat is sold at the butcher shops, and places of business, elsewhere than in the market, it is evident that the prohibition of sales during market hours at such places is not intended to prevent sales of uninspected meat. It is true it appears, in point of fact, that the city authorities do not inspect meats except at the market house, yet the ordinance authorizes them so to do. After providing that "no person shall sell any article not wholesome for food," it provides that "the clerk and inspector shall seize any such article he may find in the market and cause it to be destroyed, and the offender shall be punished, etc." The meaning of the word "market" in this sense cannot be market house, but in its broadest sense relates to and embraces all articles of food offered for purchase or sale in the city. The city law, therefore, expressly authorizes the maintenance of butcher shops at any place in the city, and further provides for the inspection of meats at such places. It cannot then be

satisfactorily argued that these regulations are made, either to compel the concentration of the meat business at the market house or to facilitate the inspection of meats. If in order to facilitate inspection, the ordinance had expressly forbidden the sales of meats in the city, elsewhere than at the market house, it might not have been difficult to sustain its constitutionality, even though it might have gravely interfered with interstate commerce. Such an ordinance would seem to be within the legitimate police powers of the city. *Slaughter House Cases*, 83 U. S. 16 Wall. 36, 21 L. ed. 394; *Butchers Union, S. H. & L. S. L. Co. v. Crescent City L. S. L. & S. H. Co.* 111 U. S. 746, 28 L. ed. 585. But the ordinance not being of this character, the argument in its support based upon that theory must logically fail. *Vide* opinion of *Mr. Justice Harlan in Minnesota v. Barber*, 136 U. S. 329, 84 L. ed. 461, 8 Inters. Com. Rep. 185. *Vide also Spellman v. New Orleans*, 45 Fed. Rep. 3; *Ex parte Kieffer*, 40 Fed. Rep. 399.

It is not disputed that the business conducted by the complainants is almost entirely that of selling meats raised in the western states. These meats are transported to Macon and stored and offered for sale by means of refrigerating apparatus. Complainants thus engaged must in obedience to the ordinance rent a stall in the market and pay \$150 therefor. They must, if engaged as wholesale dealers, also pay a license tax of \$25 for the privilege of carrying on their business. From these burdens, one who deals in meats produced in the surrounding country is wholly exempt. Not only is this true, but in the most important hours for that purpose, during the day, the complainants are denied the right of making sales of any amount, for the reason that their places of business elsewhere than in the market house must be closed, and in the market house they are permitted to sell to any one person no more than enough for consumption in one day, while this is true, the producers of meat in this state may sell before and after market hours any amount they please, without the imposition of any tax or license charge whatever. It cannot be denied that the effect of this discrimination operates severely against the sale of meat produced in other states, and whatever may be the power of the city government to discriminate between the producers of meat in the surrounding country, and those who sell the same meat in the city, they have no power to make a regulation which operates in favor of home products and against the production of other states, and such regulations are in contravention of the Constitution of the United States. Nor does it matter how such regulations are denominated or how they are expressed. In the case of *Welton v. Missouri*, 91 U. S. 275, 23 L. ed. 347, it was declared by the Supreme Court that a license tax, required for the sale of goods is in effect a tax upon the goods themselves; and further that the statute of Missouri which required the payment of a license tax from persons who deal in the sale of goods, wares, and merchandise, which are not the growth, produce, or manufacture of the state, by going from place to place to sell

the same in the state and requires no such license tax from persons selling in a similar way goods which are the growth, produce, or manufacture of the state, is in conflict with the power vested in congress to regulate commerce with foreign nations and among the several states. They hold further that this power protects property, "which is transported as an article of commerce from foreign countries, or among the states, from hostile or interfering state legislation until it has mingled with or become a part of the general property of the country, and protects it even after it has entered a state from any burdens imposed by reason of its foreign origin." The decision itself was pronounced by that venerable and illustrious jurist, *Mr. Justice Field*, who for years has devoted his undoubted genius to an unswerving defense of what he has deemed to be the rights of the states against encroachments of the national authority. It will not be denied he declares that that portion of commerce with foreign countries and between the states which consists in the transportation and exchange of commodities is of national importance, and admits and requires uniformity of regulation. The very object of investing this power in the general government was to insure this uniformity against discriminating state legislation. The depressed condition of commerce and the obstacles to its growth previous to the adoption of the constitution, from the want of some single controlling authority, has been frequently referred to by this court in commenting upon the power in question. "It was regulated," says *Chief Justice Marshall*, in delivering the opinion in *Brown v. Maryland*, "by foreign nations, with a single view to their own interests; and our disunited efforts to counteract their restrictions were rendered impotent by want of combination. Congress indeed, possessed the power of making treaties; but the inability of the federal government to enforce them became so apparent as to render that power in a great degree useless. Those who felt the injury arising from this state of things, and those who were capable of estimating the influence of commerce on the prosperity of nations, perceived the necessity of giving the control of this important subject to a single government. It may be doubted whether any of the evils proceeding from the feebleness of the Federal government contributed more to that great revolution which introduced the present system than the deep and general conviction that commerce ought to be regulated by Congress." 25 U. S. 12 Wheat. 446, 6 L. ed. 688. He continues: "The power of the state to exact a license tax of any amount being admitted, no authority would remain in the United States or in this court to control its action, however unreasonable or oppressive. Imposts operating as an absolute exclusion of the goods would be possible, and all the evils of discriminating state legislation, favorable to the interests of one state and injurious to the interests of other states and countries, which existed previous to the adoption of the constitution,

4 INTER 8.

might follow, and the experience of the last fifteen years shows would follow, from the action of some of the states." What a state may not do, it may not authorize a city to do. *Mr. Justice Miller* in his luminous and valuable lectures on the Constitution, upon exhaustive consideration of authority expresses the same conclusions. *Miller, Const. §§ 9, 438-478.*

In the case of *Voight v. Wright*, 141 U. S. 62, 35 L. ed. 638, the Supreme Court passed on this state of facts: The state of Virginia had enacted a statute which provided that all flour brought into the state and offered for sale therein shall be reviewed, and have the Virginia inspection marked thereon, and imposing a penalty for offering such flour for sale without such review or inspection. The court held this to be repugnant to the commerce clause of the constitution, because it is a discriminating law, requiring the inspection of flour brought from other states when it is not required for flour manufactured in Virginia.

In the case of *Brimmer v. Robman*, 188 U. S. 78, 34 L. ed. 862, 3 Inters. Com. Rep. 485, *Mr. Justice Harlan*, delivering the opinion of the court, remarked: "Undoubtedly a state may establish regulations for the protection of its people against the sale of unwholesome meats, provided such regulations do not conflict with the powers conferred by the constitution upon congress, or infringe on those granted and secured by that instrument. But it may not under the guise of exerting its police powers enact inspection laws and make discriminations against the products and industries of some states in favor of the products and industries of its own or other states. The owner of the meats here in question, although they were from animals slaughtered in Illinois, had the right under the constitution to compete in the markets of Virginia upon terms of equality with the owners of like meats from animals slaughtered in Virginia or elsewhere within one hundred miles from the place of sale. Any regulation which, in terms or by its necessary operation denies this equality in the markets of the state is, when applied to the people and the products or industries of other states, a direct burden upon commerce among the states and therefore void." Of this case we may say, in the language of *Justice Bradley*: "The decision in the case is so directly apposite to the present that it is unnecessary to prolong the discussion or to cite further authorities." *Voight v. Wright, supra.*

It is clearly evident that the local regulations of the city of Macon, imposing a tax of \$500, or \$150 and other restrictions on the selling of western meats and nothing of the kind on the sale by producers of their own meats raised in this state, by its necessary operation, denies to the former equality in the markets of his state and is a direct burden upon the commerce among the states and is therefore void. See also *Hannibal & St. J. R. Co. v. Huseen*, 95 U. S. 465, 24 L. ed. 527. The language of the ordinance is: "All persons not renting a stall at the market for the sale of meat, and who shall sell any kind of

meat on the streets of the city of Macon at any time during the day or night, shall pay a license tax of \$500 per annum, such license to be paid in advance: Provided this section shall not supply to farmers bringing into the city for the purpose of sale the flesh of any animal raised by themselves after market hours," and the Tax Ordinance of 1893, as follows: "Be it ordained by the mayor and council of the city of Macon and it is hereby ordained by authority of the same, that the following licenses and special taxes shall be levied and collected in the city of Macon for the year 1893: Butchers and others who have no stall in the market and who shall sell from shop or wagon, other than nonresidents selling meats of their own raising, and no license shall issue for less than five hundred dollars." It is true, the tax ordinance excepts from its verbal operation "nonresidents selling meats of their own raising," but since it is evident that only persons who can avail themselves of this privilege are nonresidents who live in the immediate vicinity of Macon, it effectually excludes meat producers from all the other states.

Nor is this conclusion to be avoided merely because this enactment purports to apply alike to the vendors of meat in this state as well as to meats produced in other states, for "the burden imposed by a state upon interstate commerce is not to be sustained simply because the statute imposing it applies alike to the people of all the states, including the people of the state enacting such statute." *Brimmer v. Rebman*, *supra*.

The case of *Osborne v. Mobile*, 88 U. S. 16 Wall. 479, 21 L. ed. 470, which seems to hold a contrary doctrine, has been overruled in later decisions. See *Leloup v. Mobile*, 127

U. S. 640, 32 L. ed. 311, 2 Inters. Com. Rep. 184; *Asher v. Texas*, 128 U. S. 129, 32 L. ed. 363, 2 Inters. Com. Rep. 241; *Crutcher v. Kentucky*, 141 U. S. 47, 35 L. ed. 649.

It follows also that the wholesale tax for the business of meat selling within the city of Macon is void, the evidence showing that this business depends entirely upon the sale of western meats, there being no pretense of imposing a tax on home-made meats sold in bulk.

For the foregoing reasons the defendants must be enjoined from collecting these taxes. Because their regulations are also unconstitutional as imposing an unlawful restriction upon commerce between the states, they must be restrained from enforcing or endeavoring to enforce the penalties provided in the ordinances for selling or offering for sale their meats at their regular places of business, or elsewhere in the city of Macon, otherwise than at the market house, and from selling their meats at any time during market hours, as prohibited in said ordinances, and from collecting or attempting to collect from complainants the license fee fixed by such ordinances, for the sale of meats elsewhere than in the market house; and must be further enjoined from preventing the complainants, who have rented stalls at the market house, from selling at the market house as much of their meats as they may have the opportunity to sell to any and all persons who may there desire to buy. That in so far as the said market ordinances are intended to support these restrictions they are unconstitutional and void.

Let the demurrer be overruled, and the answer be declared insufficient.

Mr. Samuel Hoar, for Boston & A. R. Co.

MEMORANDUM.

By the Commission :

The controversy in this case relates to rates on empty egg cases from Providence, Rhode Island, to points west of Chicago, where eggs are gathered up and shipped in such cases to Providence. Broadly, the question involved in the specific complaint extends to rates on empty cases between eastern points generally and egg producing points west of Chicago.

It is alleged in the complaint :

1. That each of the three complainants is engaged at Providence, Rhode Island, in the purchase and sale of eggs as well as other commodities and is receiving continuously from points west of Chicago large quantities of eggs throughout the year in boxes or cases, which in the course of their business they have occasion to return empty to points west of Chicago to be refilled and used again in the transportation of eggs.

2. That the defendants above named are common carriers engaged in the transportation of continuous shipments of property between Providence, in the state of Rhode Island and Chicago, in the state of Illinois, over continuous lines or routes formed by the connection of their respective railroads, according to common arrangement between them for continuous carriage and shipment, and are subject to the provisions of the Act to Regulate Commerce.

3. That defendants and other carriers operating railroads east of Chicago and the Mississippi river and north of the Ohio and Potomac rivers did on or about the 2d day of January, 1893, establish and put into effect a classification of freight articles, known as Official Classification No. 11, wherein "Egg Carriers or Cases, new or old," are denominated as articles of the first class. That said classification superseded and canceled the classification of freight articles adopted and put into effect by said defendants and other carriers on or about April 1, 1892, and called and known as Official Classification No. 10, and wherein "Egg Carriers or Cases new," were denominated as articles of the first class, and "Egg Carriers or Cases old,"

were denominated as articles of the third class. That rates of charge established, filed and published by said defendant and other carriers for the continuous shipment of articles enumerated in said first and third classes of the Official Classification from Providence, Rhode Island, to Chicago, Illinois, for several years have been and now are 82 cents per hundred pounds for first class articles, and 55 cents per hundred pounds for third class articles.

4. That by reason of the aforesaid change in classification whereby "Egg Carriers or Cases old," were transferred from the third class in said official classification No. 10 to the first class in said official classification No. 11, the rate of charge for the continuous shipment of egg cases returned to consignors of eggs at Chicago and points westerly thereof, by complainants and other consignees of eggs at Providence, has been made and is unjust and unreasonable and in violation of the provisions of the Act to Regulate Commerce.

5. That said change in the classification of returned egg cases constitutes unjust discrimination against complainants and others, and further violates the provisions of said Act to Regulate Commerce in that a greater charge is exacted by said carriers from complainants and others than they charge or receive from other persons for like service rendered in the transportation of like kind of traffic; and as one among other instances thereof appearing from an inspection of said classification, complainants cite and set forth that while "Egg Carriers or Cases, new or old" are by said Official Classification No. 11 now in the first class, "Crates, N. O. S., new, empty" were placed in the first class of said Official Classification No. 10, and "Crates N. O. S., old, empty," were placed in the third class of said Official Classification No. 10, and that said two kinds of crates are classed in like manner in said Official Classification No. 11, no change of classification having been made in regard thereto.

6. That said change in classification of returned empty egg cases subjects complainants

and other dealers in eggs and the traffic in eggs generally to undue and unreasonable prejudice and disadvantage in violation of the provisions of said Act to Regulate Commerce.

7. That by way of specification under the foregoing allegations complainants show that the distinction between new and old egg carriers or cases for transportation purposes is that the term "new" applies only to those which have not been used in egg transportation, while the phrase "old carriers or cases" applies principally, if not exclusively, to those having contained eggs transported by defendants and other carriers and returned by their lines to the original consignors. That it is only just and reasonable to charge a less sum for returning the empty package to be refilled and reconsigned than is in force for new packages not before used for carrying purposes, that this principle has been generally recognized by carriers, and an exception in the matter of egg cases is wrongfully discriminating and unduly prejudicial to dealers in eggs. That the basis for demanding lower charges for returned, or old, empty egg packages than for new packages lies in the fact that the return of the old package at a reasonable charge for the service is incidental and necessary to the continued profitable shipments of eggs by the same consignor and the purchase thereof by his consignees, the return of the empty package being practically a part of and connected with the shipment of the package when full. That many of the cars going west from eastern points are specially constructed dairy freight cars which have brought dairy products east at high rates and go back empty, and they can be and are profitably utilized by the carriers for the carriage of return empty egg cases. That the present classification and rating of old egg cases are actually much greater than the classification of the more valuable and very fragile article which they are designed to protect in the course of transportation, the cases being in the first class while eggs are in the second class and take a lower rate. That the increase in rate on returned empty egg cases caused by the said change of classification is so great as to practically destroy their value at Atlantic seaboard points.

8. That while this complaint is specifically directed only against the defendants above named, and for convenience the shipments of returned egg cases is described as being from Providence to Chicago, complainants state that many of their said shipments are to western points other than Chicago and the transportation is by other lines than those composed of the roads of the defendants herein. Therefore, to avoid multiplicity of actions, it is suggested to the Commission that

4 INTER S.

notice of the pendency of this proceeding be given to the several carriers, not defendants herein, who are parties to and have adopted said Official Classification No. 11, by service of a copy of this petition upon C. E. Gill, Chairman of the Official Classification Committee whose office is at No. 143 Liberty Street, New York, N. Y., together with an order granting leave to said other carriers to come in as parties and be heard in this proceeding the same as if complaint had been made specifically against said carriers as to the carriage of returned egg cases to points reached by their several roads or lines.

The complainants pray for an order against the defendants and other carriers to whom leave may be granted to intervene herein to cease and desist from such violations of the Act to Regulate Commerce, and to change the classification of "Egg Carriers or Cases" which have been used from the first to the fourth class of said official classification, and to return or repay the complainants so much of the amounts paid by them since the said Official Classification No. 11 was put in force for the transportation of returned "Egg Cases or Carriers" as represent the increased rate upon such as they have forwarded to western points, and for general relief.

Upon the filing of said complaint an order was issued as follows:

It appearing upon an inspection of the petition in this proceeding that the questions raised are such that carriers not named as defendants have an interest therein, that is to say: The New York & New England Railroad Company, the Fitchburg Railroad Company, the Boston & Maine Railroad Company, the Central Vermont Railroad Company, the Grand Trunk Railway Company of Canada, the Chicago & Grand Trunk Railway Company, the New York Central & Hudson River Railroad Company as Lessee of the West Shore Railroad, the Delaware & Hudson Canal Company, and the New York, Lake Erie & Western Railroad Company:

It is Ordered, That each of said carriers be furnished with a copy of said petition and of this order, and that they have leave to intervene as parties by filing notice of desire to do so within twenty days from this date, in which case they will receive notice of hearing and may appear and be heard thereon if they desire.

And it is further Ordered, That any other common carrier upon whose line shipments of freight are carried under the classification of freight articles denominated "The Official Classification" may apply for a copy of said petition and file notice of intervention with the same effect as if specifically mentioned herein; and that a copy of said petition and of this order be also sent to C. E. Gill.

Chairman of the Official Classification Committee, No. 43 Liberty Street, New York, N. Y.

Thereupon, the New York, New Haven & Hartford Railroad Company, one of said defendants made answer, admitting that the statements in the first and second paragraphs of the complaint are substantially correct; the same also as to the third paragraph, except in so far as the rates from Providence, Rhode Island to Chicago, Illinois, are stated to be 82 cents first class and 55 cents third class, and claim they should be stated as 75 cents and 50 cents respectively. As for the fourth article, it admits the changes in classification as stated, but denies that as a result of such change any unjust or unreasonable rate had been established in violation of the Act to Regulate Commerce. This defendant further insists that its share of the through rate is barely sufficient to cover cost of service, and that in the matter of changes in classification it has taken no part other than to accept its proportion under agreed divisions on such freight; that even under the revised classification now in effect the rate is not excessive and that it would be unwilling to continue to handle such traffic on any reduced basis of earnings; that egg cases are more valuable and more fragile than ordinary freights and would therefore justify a higher rating in the classification. It submits that the transportation of cases filled with eggs at second class rates is much more profitable than the transportation of empty cases at first class. This defendant further insists that the transportation of egg cases, new or old, has nothing to do with the question of whether they have been once before transported filled or not; that its tariffs have been arranged to enable it to secure a reasonable income for the service it performs. It denies any participation in any unjust or unreasonable rate as to this traffic or any undue or unreasonable preference or any discrimination.

Answers were also filed by the Lake Shore & Michigan Southern Railway Company, the New York Central & Hudson River Railroad Company, and the Boston & Albany Railroad Company. No other answers were filed. All the answers filed raised substantially the same issues as above set forth as to the New York, New Haven & Hartford Railroad Company.

Facts and Conclusions.

There is no evidence in support of complainants' allegation of unjust discrimination in rates as between egg cases and similar articles of freight, *e. g.* crates. The sole question is whether the change in classification on January 2, 1893, whereby "Egg Carriers or Cases, old" were raised from third

to first class, results in unreasonable charges for the transportation of such carriers or cases when returned to shippers of eggs. The complainants' case rests mainly upon the assertion that the first class rates now in force on egg cases are so high as to prohibit their shipment from Providence to Burlington, Ia., complainants' principal gathering station, and other western points, and that in the hands of the eastern consignee the cases are practically valueless. The change in classification was adopted and put in force by the various lines operating throughout the territory east of the Mississippi and north of the Ohio and Potomac rivers, and it affected the business of egg shippers and dealers generally throughout that section of the country. With the exception of the one now under consideration, no complaint directed against his change in the rating of old or returned egg cases has been filed. Eggs are picked up at producing stations, massed in considerable quantities at gathering or storing stations, and shipped for sale to dealers at market points. These dealers, who are generally commission merchants, naturally prefer not to assume the burden of collecting and returning to shippers the cases used for bringing the eggs to the point of sale. A very large proportion of the shippers have also come to regard the practice of returning the cases as one which should not be followed, if without too great additional expense, it can be avoided. While the testimony does not clearly set forth the reasons which have impelled shippers to join the commission men in this desire, we infer therefrom that the keeping of eggs for considerable periods by the method of "cold storage," which has become very common, has greatly influenced them in this regard, and that many producers and shippers prefer, as a matter of convenience, to send eggs in a "gift case," if such a case, satisfactory to the carriers, can be obtained by them at a cost considerably reduced from that of a more durable returnable case.

By Circular No. 1379, issued February 15, 1892, by the Joint Committee of Carriers having the Official Classification in charge, the following change in the classification applying to the transportation of eggs was notified to take effect April 1, 1892:

"Eggs, in patent cases or carriers, O. R. B. as follows: Cases to be of hard wood of the following dimensions: Covers, sides and bottom, three eighths of an inch in thickness. Partitions, one half inch in thickness. Cleats or cover, one inch in thickness, and one and three eighths inches wide. No. 1 fillers to be used. Excelsior, cut straw or hay to be used in top and bottom of cases. Second class."

"Eggs, in patent cases or carriers:

"If in cases or carriers of material of less dimensions than as above provided, or if differently packed, O. R. B. First Class."

It seems that this circular displeased both the commission men and the shippers; the commission men, because it gave lower rates on eggs packed in a returnable case of the material and dimensions prescribed, thus compelling a return to the practice of using such a package, called a No. 1 case by the trade, which had been largely abandoned by shipping in cheaper free or No. 2 cases; the shippers, because it compelled many of them to purchase a stock of new cases, practically prohibited the use of gift cases, and subjected them to very considerable loss because contracts had already been made by the majority of the shippers for such cases as they intended to use. Protests against the new rule were made by the Philadelphia Produce Exchange, the Boston Fruit and Produce Exchange, a very large number of New York Receivers and Dealers in Eggs, the Ohio and Indiana Butter, Egg and Poultry Association, and the Nebraska Butter and Egg Association. These protests assumed that the proposed change was made in order to prevent the eggs from being damaged in transit and save the carriers from the annoyance of innumerable claims for loss. It was strongly asserted in the protests that the gift, or No. 2 case, is a safe package, and that instances of carelessness on the part of such shippers in permitting freight handlers to do the loading, or in using second-hand No. 2 cases, should not be allowed to bring about a rule prejudicial to careful shippers. The New York dealers recommended the right to use barrels; also a few changes in the dimensions of the case prescribed in the circular as taking second class rates when filled with eggs, and an amendment of the second provision in the circular so as to make it read:

"Eggs in patent cases or carriers:

"If in cases or carriers of material of less dimensions than as above provided, or if differently packed, or if in old or second hand cases of any dimensions, or if in old barrels, O. R. B. First class."

The Philadelphia dealers claimed that the case prescribed in the circular would be too costly to be given free with eggs sold, and the Boston Exchange agreed with them that such a case would have to be returned to shippers. The Ohio and Indiana Association said, "We submit that the transportation companies should, as in their own interest, aid and assist the shippers in carlots, and not as in their contemplated action discriminate against such shippers who are of necessity compelled by the demands of their trade to use the No. 2 (gift) case. They recom-

mended the exemption of a case made of elm, ash, oak, beech, sycamore, gum or cotton wood, and also proposed some changes in the prescribed thickness of the wood in different parts of the case.

The Nebraska Association protested against being forced to use returnable cases, but nevertheless asserted that a good No. 1 case, even though second-hand, should not be discriminated against, and claimed that a shipper "should have the right to use, without favor in classification of freights, any size case as best suits his purpose, provided such case is in good order at the time used."

In the claim just quoted, the Nebraska shippers state a principle which as a general rule, shippers are entitled to insist that carriers shall observe, and we are inclined to think that it should govern in this case. A shipper should not be subjected to unnecessary restrictions as to the kind of case or package he shall use.

After Official Classification No. 10 was issued, but before April 1, 1892, the date on which it took effect, the Classification Committee, by Supplement No. 1 to said Classification No. 10, dated March 8, 1892, cancelled the circular or advance notice of February 15, 1892, thus leaving the classification of eggs as it stood in Classification No. 9, namely, eggs in patent carriers or cases, O. R. B. second class. The circular or advance notice was therefore never put in force, and in this respect the classification has not since been changed. Although the circular against which so many shippers and dealers protested purported to state the classification of eggs, it dealt in reality with the case in which eggs should be shipped. As stated in the protests, and also asserted by the defense in this proceeding, if it had gone into effect the result would have been a general return to the practice of sending back egg cases to gathering points or to producers, and their being re-employed for shipping purposes. If the changes recommended by the New York dealers had been adopted by the carriers, the use of the returnable case would have been as certainly prohibited, even though the classification of returned or old cases had remained at third class, for eggs packed in second-hand or re-used cases would have been charged first class while eggs in the regulation case would have taken second class rates. This difference in a case holding, say 30 dozen eggs, and sent over any considerable distance would exceed the value of the case. The carriers receded from their intention to prescribe the kind of case which should be used, thus leaving the shippers free to exercise their choice, provided only that the case be safe for the purpose of carriage, but they increased the classification of old or used

cases to first class. They did right in thus refraining from prescribing the use of particular cases in egg shipments, for such action would have worked hardship upon shippers who had an interest in sending eggs in the No. 2 or gift package. It would have been a favor in classification to the returnable case. They also did right in not adopting the recommendation of the New York dealers that all eggs sent in second-hand or old cases should pay first instead of second class rates. It would have been a favor in classification to the gift case and have resulted in prohibiting the return of any kind of egg case.

Thus far the carriers seem to have strictly followed the principle stated by the Nebraska Shipping Association that a shipper "should have the right to use, without favor in classification of freight, any size case as best suits his purpose, provided such case is in good order at the time used."

But while the carriers placed no restriction upon the kind of cases to be used in shipping eggs, they, seemingly impressed by the protests against the general use of the returnable case, increased the rating of old or returnable cases from third to first class in Official Classification No. 11, in effect January 2, 1893, and have since continued such increased rating in force in Classifications Nos. 12 and 13. We say seemingly impressed by the protests, because the circular or advance notice above discussed would, as before shown, have had the effect of bringing the returnable case again into general use, while the ultimate action of the carriers was to restore the old classification as to eggs and the cases containing them, and to increase the rating on returned cases. The increase in rates on returned cases was, the defendants say, not only to bring in greater revenue, but also because the lower third class rates tended to encourage the use of unsafe second-hand cases and subject the carriers to many claims for damage. The evidence indicates that some shippers, when they found it advantageous under rates in force, used the No. 2 or gift case as a returnable case, and that eggs shipped the second or third time in such cases were more liable to be damaged in transit. We agree with the complainant that, as a general proposition, carriers are under no obligation to receive freight improperly packed or in otherwise unsafe condition; but upon the point that eggs are invariably carried at owners' risk of breakage, we think that if the carriers choose to disregard such condition of owners' risk and invariably pay claims for breakage upon presentation, as appears to be the fact in this case, that the shippers thereby benefited are in no position to find fault with the practice of carriers in disregarding the rule. On the

other hand, the propriety of retaining the condition of owners' risk of breakage in the classification might, upon such showing, if complained against by a shipper of the same commodity whose breakage claim had been refused, be open to serious question. We also think it doubtful whether carriers are justified in making all egg shippers using returnable cases pay higher rates on returned cases because some careless consignors make a practice of shipping eggs in insecure packages. Whether carriers can properly give weight to such consideration in fixing the rates on returnable egg cases may depend somewhat upon the methods pursued by shippers and consignees in forwarding and receiving eggs. We infer from the protests and some of the other evidence in the case that many, if not most, carload shippers of eggs do their own loading and that their consignees do their own unloading. If, through being relieved of this expense and being put to no additional cost of inspection, the carrier makes a corresponding allowance in the rate for carrying the eggs, this may possibly afford some justification for a rate on returnable cases which, while not subjecting the egg trade to unreasonable disadvantage, will serve to discourage the use of cases not in good repair. But under such circumstances the line of right is difficult to determine, and in this case the question is complicated somewhat by the uncontradicted testimony of a witness for the complainants to the effect that they, using returned cases as often as practicable, hardly ever had a claim on shipments in full carloads. Whether damage to egg shipments can properly be considered by the carriers in fixing rates on returned cases is not determinable from the showing now before us in this proceeding.

The main question for determination is whether, in view of all the facts, the present rating on old or returned cases from Providence to Western points is unreasonable. Its proper solution, however, may depend upon whether the return of egg cases is or is not a service incidental to, and connected with, the transportation of eggs. A rate which may be reasonable when applied to the transportation of egg cases as a disconnected service may be unreasonable if the carriage of returned cases at favorable rates is in fact a special service, the discontinuance of which would unduly burden the business of shipping eggs to points of sale. Before further considering this point it will be necessary to recite the additional facts in this case.

Although the evidence shows that the complainants' principal gathering and shipping point is Burlington, Ia., and that they ship eggs from that point and other places west of Chicago to Providence and return cases

thereto in dairy line cars, which would otherwise go westward from points east of Albany without loading, their complaint is directed against the classification of old egg cases generally and rates resulting therefrom to Chicago and other points west. They do not attack the adjustment of rates to different points under the classification, but the classification itself.

West bound class rates from Boston, Providence, New York and other eastern seaboard points to Chicago are the same: 75, 65, 50, 35, 30 and 25 cents on classes one to six, respectively. Burlington, Ia., on the west bank of the Mississippi river, takes rates from the same points which are 122 per cent of Chicago rates, plus an arbitrary or bridge charge of 5 cents on the first three classes, and 4, 3 and 2 cents on the 4th, 5th and 6th classes, respectively. These class rates from these same points to Burlington are: 97, 84, 66, 47, 40 and 33 cents.

The National Despatch Fast Freight Line, operating over the Central Vermont and Grand Trunk Systems and connections west, has in force certain differentials which result in lower class rates on west bound business. These differentials are in cents per hundred lbs.:

Classes	1	2	3	4	5	6
From Boston or Providence	10	8	6	4	4	3
" New York	15	12	9	6	5	4

Thus while the first class rate by the defendant and other trunk lines from Providence to Chicago is 75 cents and to Burlington 97 cents, the National Despatch line rate is 65 cents to Chicago and 87 cents to Burlington.

The third class rates formerly in force on old egg cases from Providence to Chicago was 50 cents by the direct lines and 44 cents by the National Despatch, and to Burlington it was 66 cents over the direct lines and 80 cents *via* the National Despatch. The change in the classification which took place on January 2, 1893, increased these class rates from Providence to Chicago and Burlington to the present rates of 75 and 97 cents, respectively, by the shorter lines, and to 65 and 87 cents by the National Despatch. But by Special Interstate Freight Tariff No. 126, effective November 25, 1893, the roads comprising the National Despatch Line established a special rate on returned empty egg cases from Providence to Burlington, Ia., of 54 cents per 100 lbs., 6 cents less than the old third class rate by that line, and a reduction from the National Despatch first class rate of 33 cents per 100 lbs. This special rate from Providence to Burlington, complainants' principal shipping point, was put in force about two months subsequent to the filing of 4 INTER 8.

this complaint by the Providence dealers against the New York, New Haven & Hartford and other roads leading west, and on March 3, 1894, about one month after the hearing of testimony in this case, the Central Vermont and other roads composing the National Despatch Line withdrew this special rate of 54 cents, and this action had the effect of restoring the regular National Despatch class rate of 87 cents on returned egg cases by this route from Providence to Burlington which had been in force from January 2, 1893, to November 25, 1893.

As before stated, complainants return their cases in dairy line cars which come east loaded with butter, eggs and other like produce. The evidence indicates that from points east of Albany many of these cars would otherwise return westward without loading. On account of the differential, and also the special rate which was in effect, the complainants have largely patronized the National Despatch Line. They receive 7 or 8 carloads of eggs a week, each carload containing from four to five hundred cases, and the accumulation of empty egg cases at Providence and vicinity is therefore considerable. The complainants do their own gathering at Burlington and therefore are shippers therefrom as well as consignees at Providence. It is understood that they load and unload the cars with filled and empty egg cases, and that this is done without any expense to the carriers. These cases cost complainants at Burlington from 15 to 17 cents each. Complainants estimate their cost of cartage, etc., to be about 3 cents per case, but how they arrive at this figure is not shown. In view of the fact that the same team and labor employed to load, unload and cart full cases can be, and probably is, utilized in unloading, loading and carting empty cases, with but little additional time involved, it may be that this estimate of complainants is placed too high.

The cases are carried under an estimated weight of 10 lbs., and complainants generally load the car full. A carload of 500 cases yields the defendant carriers a revenue per car of \$48.50, or 9.7 cents per case from Providence to Burlington; but the defendants do not concede that the usual carload of returned packages contains more than 400 cases. The revenue on a car of 500 cases by the National Despatch amounts to \$43.50, or 8.7 cents per case. Under the third class rate of 66 cents by the defendant roads the carriers received \$33.00 per car, or 6.6 cents per case, and the National Despatch obtained at its regular third class 60 cent rate \$30.00 per car, or 6 cents per case, and under its special rate of 54 cents, \$27.00 per car, or 5.4 cents per case.

The Chicago 75 cent first class rate on a carload of 500 cases gives a revenue of \$37.50, or 7.5 cents per case, and the National Despatch differential rate of 65 cents amounts to \$32.50 per car, or 6.5 cents per case. Under the old 50 cent third class rate to Chicago, the carload brought \$25.00, or 5 cents per case to the carriers, and by the National Despatch differential it amounted to \$22.00, or 4.4 cents per case.

Thus, under the change from third to first class rates on January 2, 1893, the defendant and other trunk line carriers increased their revenue per car of 500 cases from Providence to Burlington \$15.50, and the National Despatch line increased their carload compensation between the same points \$13.50; but by the special rate of November 25, 1893, they made a reduction of \$16.50 per car, or \$3.00 per car less than they received prior to January 2, 1893, and the difference between the carload rate by the National Despatch and by the defendant and other trunk line carriers from November 25, 1893, to March 3, 1894, was \$21.50. It was testified for complainants at the hearing that since the increase of January 2, 1893, they had not returned half the number of cases which they did when third class rates were in effect; but we are not informed why this should have been so during the time the National Despatch special rate of 54 cents to Burlington was in effect.

About one half of complainants' cases are made of hard wood, and we assume that they are more durable and somewhat more expensive than the case commonly called the gift case. Complainants' cases and the returnable cases now in general use by other shippers are considerably lighter than those formerly known as "heavy returnable cases," which weighed about 25 lbs. each. The number of times a returnable case can be used depends upon the treatment it receives. It may be available for but one journey; it may serve for half a dozen and even a greater number of egg shipments. While the present rate of 9.7 cents per case over the defendant lines from Providence to Burlington, added to complainants' estimated cost of cartage, etc., of 3 cents per case, still leaves them a margin of from 2.8 to 4.3 cents less than the cost of one of their new cases (and using the case for about five shipments would practically make up the cost of such a case, and this margin would be increased by shipments under the National Despatch differential, which is 10 cents per hundred less) this does not take into account the cost of new fillers or the percentage of cases damaged in transit or lost in the course of complainants' distributing trade with towns in the eastern states. The value of gift cases at Burlington

4 INTER 8.

is not shown, and it is probable that complainants also compare the cost of such a case with their cost of cartage and transportation from Providence to Burlington.

It is evident that the foregoing summary of facts does not enable us to determine whether the return of egg cases from Providence to Burlington should be viewed in the light of a special service, incidental and necessary to the shipment of eggs in the contrary direction, and it follows that the lack of evidence necessary to the solution of this preliminary question prevents us from coming to a definite conclusion concerning the propriety of the classification challenged in the complaint.

The action of the National Despatch Line carriers in establishing, after this complaint was brought, a special rate which was still lower than the old third class rating by that line is rather strong indication that the return of egg cases from Providence to Burlington is to be viewed in the light of a special service connected with the eastward transportation of eggs, and casts some doubt upon the reasonableness of the first class rating of old egg cases. Furthermore, their action in cancelling such special rate subsequent to the hearing in this case is calculated to create a presumption of arbitrary and unwarranted action, either on their part as to such rate, or, if the special rate was proper, on the part of all the carriers in increasing the classification in January, 1893. But the National Despatch Line carriers are not parties to this proceeding. These carriers and all others interested were, it is true, given leave at the commencement of this case to intervene and be heard, but instead of intervening the Central Vermont and the other National Despatch carriers practically conceded the justice of the complaint by putting in a special rate of 54 cents. Such action, so far as the traffic by that route is concerned, warrants a belief in the excessive character of the higher rating which is not overcome by the fact that, for reasons not disclosed, they withdrew the special rate before the making of this report. But, as before stated, the National Despatch Line carriers are not actual defendants herein, and their conduct during the pendency of this proceeding, while significant upon the general question of reasonableness, should not be held to conclude carriers over other lines who are parties hereto.

In consideration of the use of both gift and returnable cases in egg shipments, the action of the carriers in attempting to prescribe a particular case for egg shipments in the proposed circular of February 15, 1892, which would have brought about the general use of returnable egg cases, and then not only re-

ceding from this position, but going further in the contrary direction by raising the rating on old or returned cases, the successive increase in the classification of old cases from fourth to third class and then from third to first class, the concession and withdrawal of very favorable rates during the pendency of this controversy by carriers not actually parties hereto, the very limited range which the testimony has taken, and the desirability of having the proper classification of returned egg cases definitely determined, we think that time should be allowed to the defendants and the other carriers concerned to consider whether shippers generally who use returned cases are not unduly prejudiced by the increase to first class rates and take or refrain from taking action accordingly, and that from and after the first day of July, next, the complainants and any other interested shipper or consignee may, if the carriers fail to take satisfactory action, ask to have the case reopened; and thereupon such further direction will be given as will serve to bring in necessary parties defendant by amended or supplemental complaint or otherwise as may appear to be required, and it is so ordered.

Our inclination to treat the case in this way is strengthened somewhat by the fact, not hereinbefore mentioned, that by exceptions filed to Classification No. 11, and also to that which is now in force, shippers lo-

ally over the road of the defendant, the New York, New Haven & Hartford Railroad Company, have been and are able to return cases at fourth class rates. We find among our files a telegram from the General Freight Agent of this company in relation to this exception sheet, which states: "We return egg carriers and cases at fourth class from original consignee to original shipper between our own stations where we get full local tariff or practically so, but we do not do so where we receive a small proportion of some through rate from a western line." We refrain from commenting at this time upon this very material concession to local shipments beyond saying that the explanation in the telegram referred to does not convince us that the difference in the rating of through and local shipments on returned egg cases is just.

While from the imperfect view of the situation which has been afforded we are unable to arrive at a definite conclusion concerning the reasonableness and justice of the classification complained of, there are some significant circumstances which impress us with a present belief that the increase from a third to a first class rating may have been too great an advance. We therefore recommend the carriers to give the question prompt and earnest consideration during the period allowed therefor.

THE MEMPHIS & CHARLESTON RAILROAD COMPANY; THE EAST TENNESSEE, VIRGINIA & GEORGIA RAILWAY COMPANY; THE GEORGIA RAILROAD & BANKING COMPANY; THE SOUTH CAROLINA RAILWAY COMPANY; HENRY FINK and CHARLES M. MCGHEE, as Receivers of THE EAST TENNESSEE, VIRGINIA & GEORGIA RAILWAY COMPANY and THE MEMPHIS & CHARLESTON RAILROAD COMPANY; DANIEL H. CHAMBERLIN, as Receiver of THE SOUTH CAROLINA RAILWAY COMPANY; THE CENTRAL RAILROAD & BANKING CO. OF GEORGIA, and THE LOUISVILLE & NASHVILLE RAILROAD COMPANY, as Lessees of THE GEORGIA RAILROAD; and H. M. COMER, as Receiver of THE CENTRAL RAILROAD & BANKING COMPANY OF GEORGIA.

1. The competition of markets or the competition of carrying lines subject to regulation under the Act to Regulate Commerce does not justify carriers in making greater short haul or lower long haul charges over the same line in the same direction (the shorter being included within the longer distance) in the absence of an order of relief issued by the Commission upon application therefor and after investigation.
2. When a carrier on complaint under the fourth section avers substantial dissimilarity in circumstances and conditions as justifying its greater charge for a shorter haul, it is concluded by its pleading and must affirmatively show that the circumstances and conditions of which it is entitled to judge in the first instance are in fact substantially dissimilar; but upon an application for re-

- lief under the fourth section proviso the carrier is not limited by such a rule of evidence, and may present to the Commission every material reason for an order in its favor.
3. The construction of the fourth section of the Act to Regulate Commerce as laid down in *James & M. Buggy Co. v. Cincinnati, N. O. & T. P. R. Co.* 8 Inters. Com. Rep. 682, 41 C. C. Rep. 744, and *Ga. R. R. Co. v. Clyde SS. Co.* 4 Inters. Com. Rep. 120, 5 I. C. C. Rep. 324, followed in *Chattanooga Board of Trade v. East Tennessee, V. & G. R. Co.* 4 Inters. Com. Rep. 218, 5 I. C. C. Rep. 546, explained in *Gerke Brew. Co. v. Louisville & N. R. Co.* 4 Inters. Com. Rep. 267, 5 I. C. C. Rep. 596, and sustained in *Interstate Commerce Com. v. Cincinnati, N. O. & T. P. R. Co.* (not yet reported), reaffirmed.
4. Defendants ordered to cease and desist

from making higher aggregate charges on hay, and other commodities carried under similar circumstances and conditions, over their connected roads from Memphis, Tenn., to Summerville, S. C., than they charge for carrying said commodities for the longer

distance from Memphis over said connecting line through Summerville to Charleston, S. C., without prejudice to defendants' right to apply to the Commission for relief under the proviso clause of the fourth section.

Decided June 27, 1894.

THE fourth section of the Act to Regulate Commerce.

Mr. Claudian B. Northrop, for Complainant.

Mr. W. A. Henderson, for East Tenn. V. & Ga. R. Co. and Memphis & C. R. Co. and Receivers.

Messrs. Brawley & Barnwell, for South Carolina R. Co. and Receiver.

Messrs. Ed. Baxter and Jos. B. Cumming, for Louisville & N. R. Co. and Central R. & Bkg. Co. of Ga. as Lessees of Georgia Railroad.

REPORT AND OPINION OF THE COMMISSION.

Yeomans, Commissioner:

The complainant alleges on behalf of himself and other merchants and residents of Summerville, S. C., that the defendants charge an unreasonable and excessive rate of 28 cents per 100 lbs. on hay in carload lots from Memphis, to Summerville; that said rate of 28 cents is 9 cents per 100 lbs. greater than the defendants charge and receive for transporting hay in carloads from Memphis through Summerville to Charleston, S. C., and that such greater charge constitutes a violation of the long and short haul clause of the statute; that said rate of 28 cents to Summerville is equal to the rate of 19 cents in force on hay in carloads from Memphis through Summerville to Charleston plus the local rate of 9 cents per 100 lbs. charged over the South Carolina Railway for carrying hay from Charleston back to Summerville, and that said 9 cent local rate which complainant is forced to pay in addition to the through Charleston rate in order to get hay transported by defendants from Memphis to Summerville is also unreasonable and excessive. The shipment of two carloads of hay from Memphis to Summerville in August, 1892, upon which complainant was compelled to pay the 28 cent rate is specified in the complaint. The complainant also alleges generally that the defendants engaged in transportation from Memphis to Charleston are subject to the Act to Regulate Commerce; that all of the roads involved in this proceeding are members of the Southern Railway & Steamship Association, and that the discrimination and excessive rates against Summerville exist not only on hay but on all articles of interstate commerce coming to that place to the detriment and disadvantage

of the town and the business of its merchants. The complaint prays that defendants be ordered to cease and desist from further violating the law as therein alleged and from all similar violations, and for such other and further order as the Commission may deem necessary in the premises.

The joint answer of the receivers of the East Tennessee, Virginia & Georgia Railway Company and the Memphis & Charleston Railroad Company admits that they are subject to the Act to Regulate Commerce and that the shipment of hay took place as specified in the complaint, but they do not admit that the rates set forth in the complaint constitute any violation of the law, and demand proof of the same.

The joint answer of the lessees of the Georgia Railroad and the answer of the receiver of the South Carolina Railway Company are substantially the same. These answers while admitting the rates to be as stated in the complaint and that the shipment specified in the complaint was made over the defendant roads, deny that said rates are in violation of the Act to Regulate Commerce. In relation to complainants allegation of violation of the fourth section these answers contain the following specific averments:

"1. The Georgia Railroad Company and the other carriers complained against have no joint through tariff from Memphis to Summerville and, therefore, they have no 'line' in the sense of said section from Memphis to Summerville, on which said section can operate."

"2. The transportation of two car loads of hay from Memphis to Summerville is not done under substantially similar circumstances and

conditions as the transportation of like property from Memphis to Charleston;"

"For (first) Summerville is a local station on the South Carolina Railway. It is not on any water route, and enterprise and capital have not constructed more than one railroad to it. It has not, therefore, the advantage of competition of carriers. The one railroad, on which it is located, viz: The South Carolina Railway Company, is not compelled by competition to choose between a reasonable rate and a rate which is much below what would be reasonable. On the other hand, at Charleston there exists competition with numerous all rail routes between Memphis and Charleston. Respondents here mention eight of these all rail routes between Memphis and Charleston, to wit:

"Memphis & Charleston Railroad; East Tennessee, Virginia & Georgia Railroad, Savannah, Florida & Western Railway and Charleston & Savannah Railway:

"Memphis & Charleston; Western & Atlantic; Central Railroad & Banking Company of Georgia; Port Royal & Augusta, and Charleston & Savannah:

"Memphis & Charleston; Western & Atlantic; East Tennessee, Virginia & Georgia or Central Railroad & Banking Company of Georgia; Seaboard Air Line; Clinton, Newberry & Laurens, and the Atlantic Coast Line:

"Kansas City, Memphis & Birmingham; Central Railroad & Banking Company of Georgia; Port Royal & Augusta, and Charleston & Savannah:

"Kansas City, Memphis & Birmingham; Georgia Pacific; Richmond & Danville, and Atlantic Coast Line:

"Kansas City, Memphis & Birmingham; Louisville & Nashville; Alabama Midland; Savannah, Florida & Western, and Charleston & Savannah:

"Louisville & Nashville; Nashville, Chattanooga & St. Louis; Western & Atlantic; Georgia Railroad, and South Carolina Railway:

"Louisville & Nashville; Nashville, Chattanooga & St. Louis; Western & Atlantic; Seaboard Air Line, and Atlantic Coast Line—or Port Royal & Western Carolina; Port Royal & Augusta, and Charleston & Savannah Railroads."

"Besides these eight enumerated all rail routes there are others, which could be designated. These lines are not only potential but are actual competitors with these respondents and their co-defendants, for business from Memphis to Charleston."

"(Second) Charleston is a port on the Atlantic coast, accessible and easily reached from the ports of Baltimore, Philadelphia, New York, Boston and other eastern ports, from which hay is shipped by water. If the rail lines from Memphis to Charleston charged

rates to Charleston as high as the rate to Summerville, although the latter rate is in itself reasonable, no hay would be brought from Memphis to Charleston, but Charleston would be supplied with hay from North Atlantic ports—and the railroads would lose the hay business and Memphis would lose a hay market."

"(Third) The rates on Western produce to Charleston and other coast cities, such as Savannah, Port Royal and Brunswick, are made with a view to actual, existing water competition. Western produce, such as grain, hay, etc., distributed from Chicago, can reach Charleston through the ports of New York, Philadelphia or Baltimore, over continuous water routes *via* the lakes and canal, or over combined rail and water routes."

"The all rail lines, seeking to do business between Chicago and Charleston and other coast cities, are compelled to make their rates approximate those which are offered by the continuous water route, or by the combined rail and water routes. The all rail routes make their rates as much higher as the difference in service will permit, and those rates are correspondingly adjusted from all western points, such as Evansville, Cairo, St. Louis, Memphis, etc. At present the all rail rates from Chicago to Charleston on hay, for instance, is 38¢ per 100 lbs.; from St. Louis, 28¢; from Louisville, Evansville and Cairo 23¢ and from Memphis, 19¢—the route through Memphis offering facilities for the transportation of hay, grain and western products generally, from the states of Missouri, Kansas, Nebraska, etc."

"The rate from Memphis to Charleston on hay is, therefore, forced upon the defendant lines by actual, existing water competition, and by other competition beyond the control of defendant."

"The controlling element in said competition is the lake, canal and ocean transportation between Chicago and Charleston; or the Lake transportation from Chicago to Buffalo, or other lake port, thence by rail to New York, thence by ocean to Charleston; or rail transportation from Chicago to Baltimore, Philadelphia or New York, thence by ocean to Charleston."

"(Fourth) As above stated, the Georgia Railroad Company and other carriers complained against have no joint through tariffs from Memphis to Summerville. They do have joint through tariffs from Memphis to Charleston, and the joint through rate from Memphis to Charleston on hay is 19¢ per 100 lbs."

If it shall appear in this case that the defendants violate the long and short haul clause of the law by keeping the higher rate to Summerville in force, it will be unnecessary to consider in this report whether the rate to Sum-

merville is in violation of other provisions of the law. In that event the prohibition in the fourth section will afford all the reduction demanded in the complaint.

Facts and Conclusions.

Transportation from Memphis to Charleston via the connecting and continuous line formed by the defendants' railroads passes through Summerville, a point on the South Carolina road 21 miles west of Charleston, which road is also the delivering carrier for traffic over this line to Charleston. Their rate in force for the carriage of hay in full carloads from Memphis to Summerville, is 28 cents per hundred pounds, and this rate is equal to a combination of the 19 cent rate to Charleston plus a 9 cent local of the South Carolina road back to Summerville. Shipments from Memphis to either Charleston or Summerville are carried through over this line of connecting roads under through bills of lading.

The defendants make a joint tariff rate on hay to Charleston from Memphis, and unless they show substantial dissimilarity in circumstances and conditions under which the transportation to Charleston and Summerville is conducted, they are prohibited by the fourth section of the law from making any greater charge for the shorter distance to Summerville than that which they have in force for carrying over the same line in the same direction for the longer distance to Charleston.

The defendants claim that substantial dissimilarity in such circumstances and conditions is created by:

1. The competition of various markets for the trade of Charleston, such as New York, Boston, Philadelphia, Baltimore, Chicago, and other points which can reach Charleston by all water lines or by all rail or part rail and part water routes.

2. The competition of rail lines between Memphis and Charleston.

The construction of the fourth section of the Act as laid down in the case of *James & M. Buggy Co. v. Cincinnati, N. O. & T. P. R. Co.* 3 Inters. Com. Rep. 682, 4 I. C. C. Rep. 744, and in *Ga. R. R. Co. v. Clyde SS. Co.* 4 Inters. Com. Rep. 120, 5 I. C. C. Rep. 824,—followed and explained in *Gerke Brew. Co. v. Louisville & N. R. Co.* 4 Inters. Com. Rep. 267, 5 I. C. C. Rep. 596—and also reaffirmed by the Commission in *Chattanooga Board of Trade v. East Tennessee, V. & G. R. Co.* 4 Inters. Com. Rep. 213, 5 I. C. C. Rep. 546, has been passed upon by the Federal courts in the proceeding brought by this Commission against the Cincinnati, New Orleans & Texas Pacific Railway Company and others to enforce its order in the first above mentioned case (*James & M. Buggy Co. v. Cincinnati, N. O. & T. P. R. Co.*). The decision of the United States Circuit Court for the Northern District of Georgia reviewed the 4 INTER S.

construction of the fourth section by the Commission, and declared that construction to be altogether unsound. *Interstate Commerce Com. v. Cincinnati, N. O. & T. P. R. Co.* 4 Inters. Com. Rep. 832, 56 Fed. Rep. 925. But the Commission took an appeal to the Circuit Court of Appeals for the Fifth Judicial Circuit, and that court has recently rendered a decision annulling and reversing the decision of the circuit court, and remanding the case with instruction to enforce the long and short haul order of the Commission in that case. *Interstate Commerce Com. v. Cincinnati, N. O. & T. P. R. Co.* Circuit Court of Appeals. (Not yet reported.)

This decision of the circuit court of appeals amounts to an affirmance of the Commission's construction of the meaning of the fourth section as laid down in the cases above mentioned, and under that construction the complaint in this case must be sustained. There is no showing in this proceeding of competition by lines not subject to the Act to Regulate Commerce for the carriage of hay from Memphis to Charleston, and the fact that there may be competition for such traffic by lines which are subject to the Act, or that hay may be carried to Charleston by various rail and water or part rail and part water routes from points other than Memphis, does not justify the defendant carriers in departing from the general rule of the fourth section upon their own motion. Such considerations may constitute reasons for applying to the Commission for relief under the proviso clause of that section, but for reasons stated in our decisions of the cases above cited they do not justify carriers in departing from the rule of the fourth section without such a relieving order. Water competition, to justify lower long haul rates, must exist between the point of shipment and the longer distance point of destination. *James & M. Buggy Co. v. Cincinnati, N. O. & T. P. R. Co. supra.* One transportation line cannot be said to meet the competition of another transportation line for the carrying trade of any particular locality, unless the latter line could and would perform the service alone if the former did not undertake it. *Chattanooga Board of Trade v. East Tennessee, V. & G. R. Co. supra.* The competition of markets or the competition of carrying lines subject to regulation under the Act to Regulate Commerce does not justify carriers in making greater short haul or lower long haul charges over the same line without an order issued by the Commission on application therefor and after investigation. *Ga. R. R. Co. v. Clyde SS. Co.* 4 Inters. Com. Rep. 120, 5 I. C. C. Rep. 824, and *Gerke Brew. Co. v. Louisville & N. R. Co.* 4 Inters. Com. Rep. 267, 5 I. C. C. Rep. 596.

The following rule of practice was laid

down by us in the Georgia Railroad Commission cases: "When a carrier on complaint under the fourth section avers substantial dissimilarity in circumstances and conditions as justifying its greater charge for shorter hauls, it is concluded by its pleading and must affirmatively show that the circumstances and conditions of which it is entitled to judge in the first instance are in fact substantially dissimilar; but upon an application for relief under the fourth section proviso the carrier is not limited by such a rule of evidence, and may present to the Commission every material reason for an order in its favor."

Because Charleston is an important seaport and railroad centre and hay may be and is carried there from various points, is not sufficient reason for a departure from this rule. The just interests of the carriers are fully protected by the proviso clause of the fourth section. The defendants are under no obligation to compete at low rates for the carriage of hay from Memphis to Charleston. They ought not to engage in such competition if the rates obtainable are not remunerative. If they are remunerative the defendants cannot, in the face of the prohibition of the fourth section, and the provision in that section for the issuance of relieving orders, assume to say that such rates though profitable on Charleston traffic are insufficient for the transportation of

carload quantities to a shorter distance point on the same line and in the same direction. That is a question which Congress, by enacting the proviso or saving clause in the fourth section, made it the duty of this Commission to determine. The very reason why the proviso was added to the section was to enable carriers to obtain relief from hardship in special cases if, upon application for relief, they make it appear that hardship actually exists.

Neither of the defendants having applied for relief under the proviso to the fourth section, order will be entered directing them to cease and desist, on or before July 15, 1894, from charging or collecting any greater sum in the aggregate for the transportation from Memphis to Summerville of hay, or other commodities carried by them under circumstances and conditions similar to those appearing in this case, than they do for such transportation for the longer distance to Charleston, but without prejudice to the right of said defendants to apply for relief under the fourth section of the Act to Regulate Commerce. The filing of an application for relief by the defendants or either of them before the time above specified, will, if it refers to transportation over this line to Charleston, operate as a stay upon this order during the pendency of proceedings on such application.

4 INTER 8.

ALANSON S. PAGE, CADWELL B. BENSON and CHARLES TREMAIN, Complainants,
 v.
 THE DELAWARE, LACKAWANNA & WESTERN RAILROAD COMPANY, THE
 NEW YORK CENTRAL & HUDSON RIVER RAILROAD COMPANY, THE MICHIGAN CENTRAL
 RAILROAD COMPANY, Defendants.

1. Where it appears that a complainant has invoked the aid of the law for the purpose of securing what he, with the acquiescence of the carrier, had previously obtained in apparent contravention of the law, such acquiescing carrier will not be held entitled to plead violations of the law by complainant in bar of a decision on the merits, nor will the individual interests of the complainant be taken into consideration; but the Commission will examine the evidence and make such report thereon as, under the provisions of the law, the rights of other shippers and the public generally may require. If, independently of any action or interest of complainants, the conduct of defendants with reference to the transportation which is the subject of the proceeding is shown by the evidence to be unlawful, it is the duty of the Commission to execute and enforce the statutory provisions applicable thereto.
2. Upon consideration of the great reduction which has taken place in the value of window shades, the arbitrary increase of shade classification by the carriers during the progress of this proceeding, and all the other facts and circumstances herein which pertain to the rights of shade shippers and consignees generally, and of purchasers of that article of household necessity, *Held*, That the classification of window shades as first class in the Official Classification has become unjust, and that the legal duty of defendants to so classify traffic and fix charges thereon that the burdens of transportation are reasonably and justly distributed among the articles they carry, requires them to reduce their classification of window shades to the class which, under the Official Classification, is now applied to "window hollandes and shade cloth, plain, uncut and undecorated."

Complaint filed March 3, 1893.—Answers filed March 24 to April 11, 1893.—Depositions filed May 24, 1893.—Heard May 25, 1893.—Briefs filed June 7, to September 8, 1893.—Decided March 23, 1894.

UNJUST classification of window shades.

Mr. John D. Kernan, for Complainants.

Mr. Frank Loomis, for New York Central & Hudson River Railroad Company; Messrs. Henry Russel and Ashley Pond, for Michigan Central Railroad Company; Mr. C. E. Gill, for Delaware, Lackawanna & Western Railroad Company.

REPORT AND OPINION OF THE COMMISSION.

Veasey, Commissioner.

In the complaint it is averred that the complainants are copartners doing business at Minetto, New York, under the copartnership name of the Minetto Shade Cloth Company, and are engaged in the manufacture, sale and shipment of the articles hereinafter mentioned;

4 INTER S.

that the defendants have been and are railroad corporations engaged as common carriers in the transportation of property, by the lines of the defendant, the Lackawanna Company, between Minetto and New York city, and together between Minetto and Chicago and other western points, under some common

control, management or arrangement for continuous carriage between the points aforesaid, so that each of the defendants constitutes a part or portion of the same through and continuous line of transportation, and are respectively within the provisions of the Act to Regulate Commerce; that the articles in respect of which the complaint is made consist of window shades; that since April 4, 1887, the defendants, in violation of said Act, have been and are guilty of unjust discrimination in that they have been and are in the habit of classifying the articles, manufactured and delivered to them for transportation by the complainants, in a classification which is unjust, unreasonable, and relatively higher than the classification of other similar kinds of property and merchandise in the elements of value, risk, compactness and cost of service; that as a result of such unjust and relatively higher classification they have been and are in the habit of charging other persons rates much lower for like and contemporaneous service, under substantially similar circumstances and conditions, by reason of the unjustly discriminating lower classification made by the defendants of the goods and merchandise so transported for such other persons; and the complainants specify the wrongs thus in general terms charged, and further allege that, by reason thereof, defendants have made and given, and do make and give undue and unreasonable preferences and advantages to some persons, firms, companies and corporations in transportation over their respective lines, and have subjected and do subject complainants thereby to undue and unreasonable prejudice and disadvantage; that the classification complained of is that which places window shades N. O. S. boxed, any quantity, in the first class; and window shades plain, undecorated, mounted on rollers, boxed, any quantity, in the second class; and that to be free from unjust discrimination all window shades should be in the third class for less than carloads and in the fourth class for carloads; and the complainants make appropriate prayer for relief.

The defendants respectively answer the complaint, but finally put their defense in their brief and argument upon two grounds: (1) That the complainants, by intentional and persistent misdescription of their shipments, and by violation of the law in so doing, preclude themselves from applying to the Commission and asking the exercise of its jurisdiction upon the merits of the controversy. (2) That the classification complained of is not unjust and in violation of the statute.

Facts.

1. The complainants are co-partners, doing business at Minetto, New York, under the firm name and style of "The Minetto Shade Cloth

Company," and are engaged in the manufacture and sale of shade cloth and of window shades, decorated and undecorated, and the shipment thereof to New York city, and to Chicago and other western points. Their establishment is located about one half a mile from the railroad track at Minetto, a point about four miles southeast of Oswego, N. Y. The cars for the shipment of complainants' goods are brought up from Syracuse in the local freight train, switched to the siding and left there to be loaded. The complainants haul their goods to the cars. Their teamsters give the shipping slips to a tallyman employed by the Lackawanna road who tallies the goods and aids the teamsters in loading the cars. These slips or receipts are made out in duplicate by the complainants, and after the freight has been checked into the cars, they are signed by the agent of the defendant, the Lackawanna Company. The original is returned to the complainants and from the duplicate, kept by the railroad company, the way bill is made. The initial road does not weigh the property described in the receipts, nor does it make any examination to see if the package contains what is set forth in the receipts; but it is the duty of its agents to understand the classification of freight shipped and to bill the goods so shipped accordingly. Trains made up in Oswego pick up these cars and haul them to Syracuse or New York city.

The establishment of the complainants covers two or three acres. During the spring and summer months they employ about two hundred and fifty persons, which number is increased in the busier seasons of fall and winter to about four hundred.

The complainants have been in business since 1879. Prior to 1886, they manufactured window shading and shade cloth used for window shades, and sold it entirely by the yard or by the piece. Their goods were known as the Minetto window shading, and were shipped by the complainants as window hollands. In 1886, the complainants commenced decorating the cloth by machinery, cutting it up into shades, placing them on the market, and shipping them in pairs. Prior to that time the decoration had all been done by hand. The complainants began making and selling mounted shades, ready for hanging, in the fall of 1887. This was then a new article commercially. They continued to ship the incomplete shades for about a year after this; then the trade began calling for the completed article, and their shipments of shades in packages or cases grew rapidly, so that the total volume of their consignments now amounts to something like four hundred carloads a year. It does not appear, however, that a majority of the complainants' shipments are in carload lots. Some indication of the proportion of carload

to less than carload quantities shipped by them is given in tables hereinafter set forth; also the different sizes of packages and cases which they use.

Prior to 1886, when shade manufacture was conducted entirely by hand, and the stamping or decoration was done by wood block printing, the value of the cheapest grade was about seventy-five cents a pair, while the higher grades ranged from five to seven dollars a pair. The commercial value of machine decorated shades, mounted and ready to put up, is from twenty-five cents to seventy-five cents a pair. The old hand decorated shade was not mounted. The complainants admit that lowering the classification, as here asked for, would not be likely to increase the number or the tonnage of their shipments. They do not prepay freight charges nor do they make allowance therefor in settling with their customers.

2. Up to January 24, 1893, the complainants described all their shipments of shades simply as "window hollands," except when they shipped shades in pairs; in that case the shipment was, in continuation of the old practice, billed by them as window shades; and the complainants still bill window shades under that name when they ship them in pairs, but the number of such shipments is very small.

The carriers have established inspection bureaus located at junctions or transfer stations within the territory covered by the "Official Classification." The revising clerk at a transfer station gives the way bill to an inspector, who thereupon examines the contents of a car to see whether they differ in description, either in character or weight, from that mentioned in the way bill. When there is no difference he marks the way bill "O. K." But if there is a difference, the inspector notes the fact on the way bill and hands it over to the revising clerk who makes the necessary corrections in the way bill. The expense bill of the delivering carrier shows the increase of weight or correction of classification, and the consignee pays the additional charges. When necessary, the inspector opens the packages in order to make an examination of their contents, and also re-weighs some or all the packages if he has reason to believe that the weight has been underbilled. It appears from a statement put in evidence and covering the period from September 1, 1892, to February 28, 1893, that about ninety per cent of the complainants' shipments were described by them as "window hollands," a little over nine per cent as "mounted window hollands," and less than one per cent as "window shades." Another exhibit in testimony shows that very many shipments by complainants were described as window hollands, when in fact they consisted of window shades. If the complainants' shipments billed as window hollands and given third class rating

had been billed as window shades, they would have taken first class rates.

On January 24, 1893, the agent of the Lackawanna Company, under instruction from the Assistant General Freight Agent of that company, requested the complainants to discontinue the practice of billing window shades as window hollands. The complainants assured him that the request would be complied with. After that time their shipments of shades were described as "plain mounted" or as "decorated" hollands, a pencil being used to write it on a printed shipping slip over or through the words "window hollands," the words "plain mounted" or "decorated." But a considerable number of shipping slips, or tickets, were put in evidence showing that this pencil notation had been omitted by complainants' employés, after the date above mentioned; and the weights of some of these shipments were underbilled. The complainants claim that these misdescriptions were the result of oversight. For two days, in the month of May, 1893, the 12th and 13th, the complainants' shipping clerk did, as instructed by complainant Benson, describe all shade shipments as "shades." This was after the taking of depositions had been commenced in New York city. This instruction was then countermanded by the complainants, and the description of the shades as hollands was resumed. The complainants did not conceal their method of billing shades as window hollands.

3. The complainants appear to have relied for justification of their course upon the following grounds: The old practice of shipping under the title of shades only when the shades were sent in pairs; the statements made to them in 1887 by the agent of the receiving road, and in 1888 by a representative of the "Merchants' Despatch," a fast freight line operated over the New York Central System, that the billing of shades as window hollands would not be improper; and the fact that under the provisions of the classification goods specified simply as "window hollands," without any specification as to their being plain, uncut and undecorated, would take first class rates, if the receiving road insisted upon billing exactly in accordance with the terms of the classification, and, therefore, even if the meaning of the classification contended for by the defendants should be correct, that there was no misdescription upon which the roads could base a charge of fraudulent billing. The defendants' principal witness (Mr. Gill) also testified that a shipment billed simply as window hollands should, under the classification, take first class rates.

When the Lackawanna agent stated to complainants in 1887, that the billing of window shades as hollands would not be incorrect, he also said that if any change should become ne-

cessary the complainants would be advised. In 1890, the agent of that road notified the complainants verbally that some inspectors of the railroads in the west said that they (the complainants) were not complying with the classification, but the complainants declare that they did not understand this to be "advice" that a change in their methods was necessary. Complainants' practice of shipping shades as hollands has also been the subject of conversations held at different times prior to 1893 between one or more of the complainants and representatives of the carriers in New York. It appears from the testimony of complainants' shipping clerk (Snively) that an order for window shades would not be understood to call for window hollands, nor would an order for the latter commodity be taken to require the shipment of any window shades. Window shades, window hollands and shade cloth are not synonymous terms. The first is well known as an article used in house furnishing; the other terms are applied to material used in the manufacture of shades. There is no ambiguity in the classification of these articles. As will appear by the statement of the classification hereinafter contained, a shipper desiring to ascertain rates in force on window hollands or shade cloth would have no difficulty in determining from the classification in force that window hollands and shade cloth, if plain, uncut and undecorated, take third-class rates, and that if otherwise, they are subject to first class charges. So with window shades: if plain and unmounted they would, under Classification No. 11, be in the second class; otherwise in the first class. Complainants have described their shipments of window shades as window hollands for the evident purpose of thereby obtaining lower rates than could lawfully have been charged if the proper description had been given; and, except when corrections were made by the carriers' inspection bureaus, this purpose was accomplished by the acceptance of such shipments as window hollands by the receiving road and the improper billing thereof by the local agent at third class instead of first class rates. It is indicated by the evidence that representatives of the carriers had knowledge of complainants' practice of billing shades as hollands, and the practice finally resulted in the remonstrance on the part of the carriers on January 24, 1893. There is no showing that the carriers have taken steps to prosecute the complainants or any person in their employ for false billing or false report of weights under section 10 of the Act to Regulate Commerce.

4. The defendants are common carriers engaged in the transportation by continuous carriage and shipment of passengers and property between Minnetto and New York city, and Minnetto and Chicago and other western points.

The road of the Lackawanna Company connects Minnetto with New York city, passing through the states of New York, Pennsylvania and New Jersey; the Lackawanna takes on the freight at Minnetto, and carries New York city freight direct to that point. Freight destined west of Buffalo is carried by it to Syracuse, N. Y., thirty-one miles southeast of Minnetto, where it is delivered to the New York Central Company, which takes it to East Buffalo, N. Y., and from there it is transported by the Michigan Central to Chicago and other points. The "Official Classification" is in use on the defendant lines, and these carriers have established and published schedules of rates for the transportation of property described in said classification.

5. The classification made by the "Official Classification" Committee, of which the defendant carriers are members, on window shades and plain uncut shade cloth, prior to 1891, was as follows: window shades, first class; shade cloth, third class. In 1891, the complainants asked the "Official Classification" Committee for the classification which they petition for in this case, to wit: window shades, L. C. L., third class; C. L., fourth class. The request was refused. But the committee did then adopt the classification of those articles, which continued in effect until January 1, 1894, viz: window shades, boxed, N. O. S., first class L. C. L. and C. L.; window shades, plain, undecorated, mounted on rollers, boxed, second class, L. C. L. and C. L.; window hollands and shade cloth, plain, uncut and undecorated, third class, L. C. L. and C. L. Official Classification No. 11, which was in effect at the time this proceeding was instituted, classified the goods involved in this case as follows:

Dry goods, N. O. S. in bales,	L. C. L.	C. L.
O. R. C., or in boxes	1	

Dry goods, as follows: Any of the following named articles (and remnants thereof) made wholly of cotton, when specific name of articles and name of shipper are plainly marked on outside of packages and stated in shipping receipts and bill of lading (marking or describing packages as containing "Cotton Piece Goods" will not be sufficient), viz.: Awning Stripes, Calicoes (64 square and under, only); Canton or Cotton Flannels, plain or dyed (not figured); Canvas; Cheese Cloth; Corset Jeans; Cottonades; Cotton Warp; Cotton Yarn; Crash (Cotton); Domestic Checks; Stripes (Hickory Shirting Stripes) and Cheviots (plain or napped on one side); Cotton Duck; Denims; Drills; Domestic Gingham; Glazed Cambrics;

Osnaburgs; Sheetings, bleached and brown; Tickings; *Window Hollands and Shade Cloth, plain, uncut and undecorated*; in bales O. R. C., or in boxes 8

All Dry Goods, except the articles above specifically named, will be classed as "Dry Goods, N. O. S.," unless the above conditions are complied with. Any package containing articles of more than one class will be charged at the tariff rate for the highest classed article contained therein.

Window Shades, N. O. S., boxed 1

Window Shades, plain, undecorated, mounted on rollers, boxed 2

By Official Classification No. 12, effective January 1st, 1894, the second-class rating for plain mounted shades was abolished, and all window shades were again placed in the first-class.

The following table shows the classification changes that have taken place in window shades, shade cloth, and window hollands since April 1st, 1887:

Changes in Official Classifications.

COMMODITY:	Number of Classification.	DATE OF CHANGE.	Class.
Window shades	1	Apr. 1, '87.	1 Discontinued under this description in Classification No. 8.
Window shades N.O.S., boxed.	8	Feb. 2, '91.	1 Discontinued under this description in No. 12.

COMMODITY:	Number of Classification.	DATE OF CHANGE.	Class.
Window shades plain, undecorated, mounted on rollers, boxed.....	8	Feb. 2, '91.	2 Discontinued under this description in No. 12.
Window shades boxed.....	12	Jan. 1, '94.	1
Shade cloth, boxed.....	1	Apr. 1, '87.	1 Discontinued under this description in No. 4.
Shade cloth, N.O.S., boxed.....	4	Aug. 15, '88.	1 Discontinued under this description in No. 5.
Shade cloth, uncut and undecorated.....	5	Feb. 18, '89.	8 Still the same under No. 12.
Window hollands and shade cloth, plain, uncut, and undecorated.....	8	Feb. 2, '91.	8 Still the same under No. 12.

The following class rates are in effect:

Between Minnetto and Chicago,—						
Class	1	2	3	4	5	6
Rates	60	52	40	28	24	20 (Oswego rate.)
Between Minnetto and New York city,—						
Class	1	2	3	4	5	6
Rates	85	80	25	18	15	12 (Oswego rate.)
Between New York City and Chicago,—						
Class	1	2	3	4	5	6
Rates	75	65	50	35	30	25

(These rates between New York and Chicago were also in effect on April 1, 1887.)

6. The classification and the comparative bulk, weight and value of a number of articles known as dry goods are shown in the following table:

Article.	Size of Case or Bale.	Weight.	Con- tents.	Value, Case or Bale.	Cubic Feet in Case.	Weight per Cubic Foot.	Value per Cubic Foot.	Classi- fication.
<i>Cotton</i>		<i>Pounds</i>	<i>Yards</i>	<i>Dollars</i>		<i>Pounds</i>	<i>Dollars</i>	<i>Class</i>
Flannels.....	33" x 32" x 48"	400	1000	80.00	29.38	18.68	2.72	8
Cheviots.....	40" x 30" x 34"	800	1800	185.00	23.61	83.88	5.72	8
Checks.....	40" x 40" x 40"	450	1000	80.00	37.08	12.15	2.16	8
Denims.....	38" x 34" x 27"	425	1000	100.00	17.53	24.24	5.07	3
Tickings.....	38" x 34" x 27"	404	1000	100.00	17.53	23.38	5.70	3
Corset Jeans.....	25" x 25" x 23"	800	1500	90.00	8.33	36.01	10.80	8
Cottonade.....	40" x 48" x 30"	900	1000	150.00	33.83	27.00	4.50	8
Prints.....	80" x 30" x 36"	450	2500	150.00	18.75	24.00	6.25	8
Calicos.....	80" x 30" x 36"	450	2500	150.00	18.75	24.00	6.25	8
Canvas.....	38" x 34" x 27"	425	1000	100.00	17.75	23.94	5.63	8
Cambric.....	24" x 30" x 46"	500	3000	142.50	17.50	28.57	8.10	8
Duck.....	38" x 34" x 27"	500	1000	100.00	17.75	28.16	6.63	8
Gingham.....	30" x 30" x 27"	400	2000	140.00	14.40	27.70	6.94	8
Drills.....	24" x 29" x 18"	210	600	42.00	7.72	27.21	5.54	8
Drills.....	22" x 36" x 36"	500	2400	290.00	16.55	30.21	17.52	8
Bleached								
Sheeting.....	40" x 40" x 14"	500	1676	167.60	12.90	38.76	12.99	8
Lace Curtains.....	36" x 26" x 48"	500	150	600.00	26.00	19.23	23.05	1
Lace Curtains.....	29" x 19½" x 29½"	110	60	260.00	9.72	11.81	24.77	1

Linen.....	40" x 28" x 27"	666	2697	950.00	17.75	37.50	53.52	1
Linen.....	40" x 28" x 27"	561	2168	1543.00	17.75	31.60	37.21	1

7. A very frequent shipment by the complainants is a box containing one dozen complete window shades, and usually weighing from twenty to twenty-one pounds. The Minnetto shades, which are the best quality, will weigh twenty-three or twenty-four pounds, and if they are seven foot shades, the box containing one dozen, will weigh twenty-five pounds. The complainants also ship shades in what they call a "standard case," containing twenty-three dozen and averaging, in weight, four hundred and ninety-five pounds, and in value \$54.74. A table in evidence and below set forth shows the value of the different grades of complainants' shades, their weight, bulk and value when packed in "standard cases," and the relative cost of labor to manufacture:

thing else. About forty per cent of the complainants' shade cloth is decorated. This decoration consists of a design printed, or stamped, upon the shade and finished in bronze, and is done by machinery. Only a few shades, less than one per cent, of the complainants' manufacture, are decorated subsequent to the cutting of the shades, the decoration prior to the cutting being the single print. The complainants have ceased altogether from decorating shades by hand, but some other manufacturers still continue hand decorations. There are four grades of decoration, called respectively, one print, two print, three print, and four print shades. It costs the complainants twenty cents a dozen for one print, and twenty-five cents a dozen for each additional print. The four prints cost ninety-five cents a dozen.

Table Showing Weights, Contents, Value, Cubic Measurements, etc., of the Twenty-three Dozen Case of Shades.

	Size of Case.	Weight.	Contents	Value.	Cubic feet in case.	Weight per cubic foot.	Value per cubic foot.	Per ct. of labor.
Minnetto shades	20½ x 25½ x 42½	588 lb.	23 doz.	\$69.00	12.70	42.86 lb.	\$5.43	.0296%
Seneca "	" " " "	542 "	23 "	63.25	12.70	41.10 "	5.06	.0323%
Ontario "	" " " "	495 "	23 "	55.20	12.70	38.79 "	4.37	.0375%
Holland "	" " " "	468 "	23 "	51.75	12.70	36.45 "	4.07	.0395%
Felt "	" " " "	439 "	23 "	34.60	12.70	34.56 "	2.71	.0693%
Average		495		\$54.74		38.65	\$4.38	.0396%

8. The classification of the different raw materials, used in the manufacture of shades, in carloads and in less than carloads, is stated in a table put in evidence, as follows:

Cloth	3rd Class C. L.	3rd Class L. C. L.
Steel	6th	
Paper	6th	
Lead	5th	
Colors	5th	4th
Iron Castings	6th	4th
Starch	6th	4th
Clay	6th	4th
Flour	6th	4th
Lumber	6th	
Dyes Aniline	4th	2nd
Dyes Wood	5th	3rd
Glue	5th	4th
Nails and Tacks	5th	4th
Shade Rollers	5th	3rd
Shade Slats	5th	3rd

Comparison with classifications 11 and 12 show some variation from the foregoing table as to two or three articles. The table is, however, correct in the main.

9. There are thirty-five different colors of the Minnetto shading; 8 colors in Senecas and Ontarios; perhaps 12 colors in the shades called Hollands; and about six colors in Felt. The Felt shade is paper. These colors are spread over the entire shade, and are put on before the cloth is cut up. The decoration is some-

Twenty cents a dozen for decorating would cover all the shades made, except about one per cent. The Senecas are printed. The Ontarios are finished when they are filled. The completed shade consists of the shade cloth cut in the proper length, usually six feet in length by thirty-eight inches in width, one end of which is attached to a roller by tacks and the other end is hemmed up and a slat run in. There may be also a fringe attached to the bottom of the shade. The roller also has brackets fastened to the ends. The market price of this finished shade is from \$1.50 to about \$3.00 per dozen. About seventy per cent of the wood used by the complainants in the manufacture of their shades comes by water from Michigan, Wisconsin and Canada.

The largest number of shades are sold from the lower grades as in shown by the following statement in evidence:

Per Cent of Shades Made by the Minnetto Shade Company from Sept. 1st to March 1st, 1893.

Minnetto	18.7%
Seneca	16.4%
Ontario	34.6%
Holland	15.2%
Felt	14.8%
	99.7%

And the following shows the average weight of Cloth and of Rollers:

		<i>Cloth.</i>	<i>Rollers.</i>
Minetto.....	1200 yds.	685	520
Seneca.....	1200 "	628	520
Ontario.....	1200 "	514	520
Holland.....	1200 "	478	520
Felts.....	1200 "	416	520
Average.....		588	520

Window Hollands, or shade cloth, the principal constituent of the window shade, is made from a loosely woven cotton fabric obtained from New England mills. That used by the complainants is sent in bales to a bleachery at Norwalk, Conn., where the bleaching is done. Complainants first grade of shading is also filled with clay and flour at Norwalk, but the lower grades are, except bleaching, treated at Minetto.

10. The standard commercial package of window hollands, or shade cloth, as manufactured and sold by the complainants, is a case of 1200 yards and weighing, with the box containing it, from 416 to 685 pounds, the box measuring 25x25x42 inches. The value of the contents ranges according to quality from \$48.00 to \$144.00. This case holds twenty pieces of hollands, containing sixty yards in each piece. This shade cloth, or hollands, constitutes about ten per cent of the total shipments of the complainants.

Taking the Minetto shade for illustration, a case of hollands measuring 25x25x42, weighing 685 pounds, and having a market value of \$144.00, will with the other materials added, when made into complete shades, more than fill two cases with Minetto shades, each case containing 28 dozen shades, meas-

4 INTER S.

uring 20½x25½x42½ inches, weighing 588 pounds, and having a market value of \$69.00; and the two cases together weigh 1076 pounds, and are worth \$188. On the basis of 50 dozen shades from each case of hollands the shades made from a case of hollands worth \$144.00, would at complainants' stated price of \$3.00 per dozen be worth \$150. Under this calculation only \$6.00, or 12 cents per dozen, remains to cover the value of rollers, slats, attachments and some labor. While this margin may possibly be sufficient, the inference is rather plain that placing the value of the case of hollands at \$144.00 is probably an overstatement, and that it is likely to be somewhere between that figure and \$182.00, the value stated in the testimony for the defense.

It is clear, however, that of two cases, one containing hollands or shade cloth and the other finished shades, both being of similar bulk and weight, the case containing the shades has less market value; and that complainants' standard case of 20½x25½x42½ inches, filled with Minetto shades, is worth only about half as much as a case of window hollands or shade cloth measuring 25x25x42 inches. The average weight of a case of complainants' shades is 495 pounds and the average weight of the shade cloth case is about 588 pounds, a difference of only 38 pounds.

11. Complainants employ at least three sizes of cases in which to ship shades:

The one dozen case, measuring 6x7x44 inches and weighing 20 to 25 pounds.

The ten dozen case measuring 12x15x42 inches and weighing about 200 pounds.

The twenty-three dozen case measuring 20½x25½x42 inches and weighing an average of 495 pounds.

The following table, put in evidence by the defense, shows the weight and sizes and the number of these shipments for six months:

Month.	Total Weight of all shipments described as "window shades" or "window shades"	Total Number and Weight of Cases weighing 25 lbs. each or less.		Average of Weight.	Per Cent of Total Weight.	Total Number and Weight of Cases weighing from 25 to 300 lbs. each.		Average of Weight.	Per Cent of Total Weight.	Total Number and Weight of Cases weighing more than 300 lbs. each.		Average of Weight.	Per Cent of Total Weight.

Statement Compiled from the Duplicate Shipping Receipts of the Minnetonka Shade Cloth Co., for the Period September 1st, 1892, to February 28th, 1893, inclusive.

Using the month of November, 1892, for illustration, the number of cases shipped by complainants weighing 25 pounds or less was 1746; the number weighing from 25 pounds to 300 pounds was 235; and the number of those weighing more than 300 pounds was 439. In the other months the proportion of 25-pound shipments was much greater.

12. The roads have more weight to carry when shades are shipped in one dozen packages than they would have in transporting the same number of shades packed in a 23-dozen case. It is estimated that 23 of the one dozen packages will exceed the 23 dozen case in weight by from 70 to 80 pounds. But when the smaller cases are shipped to different consignees there must be as many different sets of bills and as many deliveries; while with the large case there is less handling, but one billing and one delivery. As hereinbefore mentioned, the complainants practically do their own loading. The "Official Classification" contains a rule (Subdivision B of rule 16) which reads as follows: "No single package or small lot of freight of one class, classified 1st-class or lower, will be taken at less than 100 lbs. at the class to which it belongs."

13. No carload rating is allowed in the "Official Classification" for articles of dry goods. Between Nov. 1, 1892, and Feb. 25, 1893, the number of carloads of 20,000 lbs. or more, shipped by complainants, was nineteen. The total weight of these shipments amounted to 502,400 pounds. For the same period complainants' total shipments were 2,218,060 pounds. It is claimed for the defense that a carload classification for window shades would result in driving small manufacturers from the business and centralize the trade in the hands of the larger manufacturers. Beyond this, and the fact that a firm in Meriden, Conn., had applied for a reduction of the classification, including a carload rate, and been refused, there is no evidence sufficient to constitute the basis of a finding upon this point.

14. Complainants' principal competitors in the manufacture and sale of shades are located in New York; Oswego, N. Y.; Chicago, Ill.; St. Paul and Minneapolis; Meriden, Conn.; Providence, R. I.; Jersey City, N. J. There are also Hand Manufacturers in Chicago, St. Louis, Cincinnati and Cleveland. A reduction of the less than carload classification on shades would confer equal benefit upon complainants' competitors in the east in reaching the Chicago market, and such reduction will also give cheaper rates to New York and other eastern points to shade manufacturers at Chicago and other points in the West.

Upon the point as to whether a reduction of the classification of shades to that of hollands and shade cloth would injure the business of the western manufacturer, the evidence shows that he is not obliged to purchase any raw ma-

terials in the east, except hollands or shade cloth, which he can also obtain from points in the south. The complainants, located at an interior point in the state of New York, must bring all the raw material used in their manufacture by boat to Oswego, or rail to Minetto. The Chicago manufacturer has the same and apparently even greater advantages in the matter of transportation of raw materials, except hollands or shade cloth, both in respect of distance from points of supply and of rates of freight. The Chicago manufacturer is, moreover, located at the complainants' principal point of distribution, and also competes for the sale of shades at various points west of Buffalo.

15. Manufactured goods are, as a rule, classified higher than the raw materials out of which they are made, because generally the process of manufacture converts the raw materials into less weight, and increases the bulk and value. But the condition of the manufacturing industry and the competition of different producing markets are also matters which have considerable weight with the Classification Committee. The classification principle of a higher class for the finished article than for the raw material of which it is composed has, however, certain exceptions. For instance, woolen cloth is in the first class and is still in the first class when converted into woolen clothing, although the process of manufacture greatly enhances the value and possibly increases the bulk. Again, some of the ingredients used in the manufacture of soap are worth considerably more than the soap itself; but soap is in the fourth class, L. C. L., and the sixth class, C. L., while some of the ingredients used in the production of soap take higher rating.

CONCLUSIONS.

The Preliminary Question.

We have first to determine what effect the complainants' admitted practice of shipping shades as hollands shall have upon our action in this case. The classification as regards these two articles was and is in no wise ambiguous, and we find that complainants did persist in designating their shade shipments as hollands with a view of securing third instead of first class rates thereon. We are not moved from this conclusion by the fact that complainants did not prepay shipments nor allow for freight charges in settling with their customers. That freight charges enter largely into all or nearly all commercial transactions involving the transportation of property, is too well known to require discussion. That they do enter into complainants' calculations is demonstrated by their having brought this case and having at various times requested the classification committee to change the rating on

window shades. Moreover, if we are to regard them as having no interest in the amount of freight charged upon their shipments, then we must look upon their attitude in insisting upon describing shades as hollands for transportation purposes, while they regard shades and hollands as different articles in dealing with their customers, as absurd. Such a view is, therefore, altogether untenable. Complainants admit that the reductions asked for in the complaint will not be likely to increase the number of their shipments or add to their shipping tonnage. We think this is explained, in part at least, by the fact that under their practice of shipping shades as hollands their business has become adjusted to a third class rating on shades, and that, so far as complainants are concerned, the granting of a third class rating as prayed for here, will merely enable them to maintain that adjustment. Complainants' motive in endeavoring to secure a third class rating for shades as far back as 1890 and since must have been with a view of changing their practice of describing shades as hollands without submitting to higher rates. We think they were keenly alive to the impropriety of shipping shades under the name of hollands; otherwise their efforts would have been directed towards securing such a reduction in the classification as would place all hollands, decorated or undecorated, cut or uncut, in the third class.

We are also forced by the facts in this case to find that complainants' practice of misdescribing their shade shipments as window hollands would have availed them nothing if the agent of the receiving road had correctly applied first class charges to shipments described simply as "window hollands." Billing and carrying such shipments at third class rates was not warranted by the classification, which did and does limit third class rating for window hollands and shade cloth to such as are plain, uncut, and undecorated. This method of billing and forwarding complainants' shades as window hollands under third class rates was practically acquiesced in by the defendants during a period of years. Moreover, complainants did not attempt to conceal their practice of thus describing goods offered for carriage to the defendants. It was known to a local agent of the receiving road; it was known to a representative of the "Merchants' Despatch," a freight line operating over the New York Central system; it was known to freight inspectors in the service of the Carrier's Inspection Bureau as far back as 1890; it was the subject of conversation at different times during recent years between a member of the complaining firm and officers connected with the committee charged by the carriers with duties pertaining to classification; it was presumably a matter of some notoriety, and the

subject of more or less frequent consideration by the carriers' representatives. We find further, that the receiving carrier, if not the others, was chargeable with knowledge of this practice of its agent in erroneously billing this freight, described simply as "window hold-lands," at third class rates.

The amendment of March 2, 1889, subjecting shippers, as well as individuals in railroad service, to fine and imprisonment for the offense of false billing, false classification, false weighing, or false report of weight, or any other device or means by which unjust discrimination may be secured, was designed to protect carriers as well as innocent shippers. The absence of that provision against shippers was made the basis of vehement protests by carriers in every section of the country, and its passage was hailed as a just recognition by Congress of the right of carriers to be protected from the fraudulent acts of their customers. But notwithstanding the presence of this provision in the statute, carriers and their representatives have almost invariably withheld from the prosecuting officers of the Government the evidence of violations by shippers which they alone could furnish. They have seemed to prefer that the people should regard them as accomplices in the illegal transactions rather than as the victims of law breaking shippers, and even when called upon to testify before a grand jury, many railway officials have deliberately assumed the role before the public of participants in the offense, by refusing to give evidence concerning alleged violations of the law on the ground that their testimony might tend to criminate themselves. These considerations, pertinent in a general sense, may or may not be applicable to the attitude of the defendants with reference to the continued misdescription and improper rating of complainants' freight. Upon this point we go no farther than to say that the carriers have shown great lack of vigilance. Apart from being able to invoke the whole power of the law and the aid of the prosecuting officers of the Government, the exercise of ordinary care on their part in the reception and billing of complainants' freight would have rendered it impossible for complainants to derive any advantage from the misdescription in which they indulged.

It is not within our province to adjudicate whether any person has or has not so demeaned himself as to violate the penal provisions of the Act to Regulate Commerce; that is matter for determination by a court of competent jurisdiction in a proceeding where the accused may avail himself of his constitutional right of trial by jury, and nothing said herein should be construed as assuming to decide any such question. But this Commission has authority 4 INTER 8.

to determine what effect the admitted or proven acts of parties shall have upon the standing of such parties in cases before it. We took this view in the case of Ottinger, a ticket broker (*Ottinger v. Southern Pac. R. Co.* 1 Inters. Com. Rep. 607, 1 I. C. C. Rep. 144); and in the case of Slater, a disappointed applicant for an annual pass (*Slater v. Northern Pac. R. Co.* 2 Inters. Com. Rep. 243, 2 I. C. C. Rep. 859). The Commission refused to entertain the complaint of the ticket broker, and declined to assist complainant Slater in retaliating upon the carrier for revoking his annual pass; but the Commission did, nevertheless, for the guidance of the carrier and in the interest of the general traveling public, consider and rule upon the question presented by the facts in that case. We think this indicates the rule which should be followed in this case: Where it appears that a complainant has invoked the aid of the law for the purpose of securing what he, with the acquiescence of the carrier, had previously obtained in apparent contravention of the law, such acquiescing carrier will not be held entitled to plead violations of the law by complainant in bar of a decision on the merits, nor will the individual interests of the complainant be taken into consideration; but the Commission will examine the evidence and make such report thereon as, under the provisions of the law, the rights of other shippers and the public generally may require. If, independently of any action or interest of complainants, the conduct of defendants with reference to the transportation which is the subject of the proceeding is shown by the evidence to be unlawful, it is our duty to execute and enforce the statutory provisions applicable thereto.

Decision on the Merits.

Prior to February 2, 1891, all window shades were in the first class of the Official Classification. At that date the carriers determined that plain mounted shades were entitled to a lower classification and placed them in the second class, leaving all other kinds of shades in class 1. This first and second class rating for window shades remained undisturbed by the carriers until January 1st of the present year, when they abolished the second class rating for plain-mounted shades, and returned to the practice in force prior to February, 1891, of charging first class rates on all window shades. The defendants participated in this action, and the new classification is in force upon their roads. The action of the carriers, in so far as it resulted in consolidating the classification of window shades into one class, should be approved. Under Classification No. 11, in force prior to January 1, 1894, while plain-mounted shades were given second class rates, the unmounted or otherwise unfinished

article, so long as it came properly under the designation of window shade, was chargeable at first class rates—more than the plain, finished article. Again, the above findings indicate that through the employment of machinery in shade decoration the difference in value between nine-tenths of the decorated shades and those which are left plain, without any decoration, is only about 20 cents a dozen. For the purposes of transportation rating this difference, or any approximate sum, is trifling, and the carriers were not justified in placing plain and machine decorated shades in different classes. On both of these grounds, therefore, the action of the carriers in putting all shades in a single class is to be commended. But we have searched the evidence in vain to find any justification for the carriers' course in placing all shades in the first instead of a lower class. We think that in this respect their action was arbitrary, and that the facts point to the necessity of a reduction rather than an increase in the rating of this article for transportation purposes. The evidence is undisputed that economies introduced in the manufacture of window shades since 1887 have reduced the value of the cheaper grades fully two thirds and effected a still more marked decrease in the value of the higher grades. This extraordinary reduction of values carries with it a corresponding diminution in the risk which carriers assume in contracting to safely transport the freight to destination.

All of the materials used in shade making are, as shown in the eighth finding, classified by the carriers in the third class or lower, with the single exception of a second class rating for less than carload shipments of aniline dyes; but these dyes are in the fourth class when shipped in carloads. Curtain fringe, in the first class, might be regarded as another exception, but it is only attached to the better grades, and those constitute but a small proportion of the volume of shade traffic. The value of the roller, slat, and fixtures, and cost of labor required to manufacture, are insignificant in comparison with the value of the cloth or hollands which form the body of the shade. The excess in value of this single article over the combined value of all other material used in the construction of a complete window shade is so great that of two cases similar in bulk and weight, one containing plain window hollands and the other complete shades, the case containing hollands has, as shown in the tenth finding, very much greater, and sometimes double, market value. Yet the carriers have carried for several years, and still continue to carry, plain cloth or hollands at third class rates, and it must be presumed that such rating for the cloth or hollands is neither unreasonable nor unprofitable to the carriers. Moreover, practically all the other materials

used in the production of shades are transported by them at the same or lower rates.

As to the volume of shade traffic offered for transportation, we have it on defendants' own showing, by the table in the eleventh finding, that complainants' shipments amounted to considerably more than two and a half million pounds during a period of six months in 1892-93, and there is no proof or suggestion that the complainants have anything like a monopoly of the manufacture of shades. They are large producers; but the manufacturers at New York, Oswego, Meriden, Providence, and Jersey City, in the east, and at Chicago, St. Paul, and perhaps at other points in the west, also produce largely, and actively compete for the trade of various markets reached by the defendant and other lines.

In the elements of bulk, weight and value, several of the dry-goods articles described in the table set out in the sixth finding as taking third class rates have greater similarity to a 23-dozen case of finished shades than exists between such a case of shades and the first-class articles mentioned in that table. There is, however, little analogy in uses or character between window shades and the dry-goods articles referred to. With the exception of lace curtains, these articles are dry-goods in the piece; and lace curtains are in the category of ornamental house furnishings, while the window shade is regarded as a household necessity. But the fact that both shades and lace curtains are in the first class, the latter many times more valuable, is an element to be noted, though against this it must be considered that many incongruities are unavoidable when the carriers undertake, as they do by the Official Classification, to divide the great mass of freight articles into practically six classes; and the desirability of simplicity in the classification is a feature which should not be overlooked. The items of similar bulk and weight, less value and risk of carriage, and important volume of traffic, are all in the direction of giving to window shades a classification as low as that which is provided for window hollands.

So far, we have considered this question without reference to the rates themselves. Rates between New York and Chicago constitute the basis upon which rates to other points in eastern territory are adjusted. These rates between New York and Chicago are to-day exactly what they were on April 1, 1887, to wit: 75, 65, 50, 35, 30 and 25 cents, respectively, on the classes 1 to 6, inclusive. Thus, while through economy in manufacture the value of shades has been enormously reduced since April, 1887, as herein shown, the rate between the points named remains the same, that is, the first class rate of 75 cents per hundred pounds. This fact, standing alone, would perhaps indicate little, for the introduction of

great economies in manufacture has been common to very many articles of commerce; but it becomes matter of some significance when considered in connection with the other facts that the relation in point of value of window shades and window hollands, the constituent commodity, has been reversed in the intervening time, so that now a similar case of the latter is the more valuable commodity, and that since 1887 the carriers have reduced the classification of hollands to third-class, while they have recently raised the classification of plain shades to first class, where other shades have been continuously.

In comparing window shades and hollands for the purposes of this case we have based our considerations upon the 1200-yard case of hollands and a case of similar size containing shades. But finished shades are frequently shipped in smaller packages, many of which contain only one dozen shades. If a shipment consisting of one dozen shades and weighing not above 25 pounds were charged for carriage by defendants at one fourth of the hundred pound rate, this would be a very material element in this case. But this is not the fact. A 25-pound shipment pays as much as a hundred pound shipment; and so does a shipment weighing seventy-five pounds. This, we think, affords the carriers a sufficient margin for any extra expense involved in billing, handling and delivering consignments of less than one hundred pounds. A case similar in size to that which holds 1200 yards of hollands holds about 28 dozen shades. If these shades should be sent in 28 different packages to one consignee, it is possible that their transportation would involve some additional labor and time in handling than is involved in the transportation of a 28-dozen case of shades. But we are not altogether assured of this; the comparatively light 25-pound package may be easily and quickly handled, while a case weighing approximately 500 pounds is a heavy and cumbersome article. It should also be noted in this connection that the carriers, who make the classification, have not attempted to prescribe different classes for different sizes of packages containing either window shades or hollands. Any quantity of shades can be shipped at first class rates and any quantity of plain, uncut hollands at third class rates. It may be that hollands are very seldom shipped in small packages, while shades frequently are so shipped. But considering the rule of charging for one hundred pounds on shipments of less weight, the ease with which small packages containing nonbreakable material can be handled, the fact that the carriers do not make a distinction in classification between small and larger packages, and that mathematical exactness in rating is impracticable, we do not think that the single circumstance of fre-

4INTER S.

quent shipment in small packages should outweigh the other weighty reasons herein set forth for a change in window shade classification to third class; especially, when the article with which shades are mainly compared may, whatever the actual custom is, be freely shipped under the classification at third class in any quantity, weight, or size of case, and when it may be inferred from the evidence, as shown by the table in the eleventh finding, that in point of tonnage the greater number of pounds of shades shipped is represented by shipments in large cases.

From a 1200-yard case of hollands and the other necessary and comparatively very cheap materials, fifty dozen shades can be made, and these will more than fill two cases, each similar in size and weight to the average case filled with hollands. If the western manufacturer who buys his case of hollands in the east and pays third-class rates thereon to the factory should be enabled to ship shades at the same rates, he will enjoy much greater advantage than he has under the present adjustment of third class for hollands and first class for shades, so far as shipping out from his factory is concerned. As to the trade of Chicago, the manufacturer at that point must pay the rate on hollands from the east, but shades which he manufactures therefrom are already in that market; while the eastern manufacturer must pay a rate on shades to Chicago in addition to the cost of getting material to his factory. Moreover, the Chicago maker is at least as favorably situated as the eastern manufacturer in the matter of obtaining raw materials other than hollands. Neither, in view of the fact that the 50-dozen shades which can be made from a case of hollands must pay greater total transportation charges than the case of hollands even at the same rate per hundred pounds, are we able to see how makers or dealers in hollands or shade cloth can suffer disadvantage from a reduction of the rate on shades. This brings us to notice the theory of comparison advanced in behalf of the defense that as 1200 yards of hollands will make 50 dozen shades, the whole 50 dozen must, on account of cost of other material and of manufacture, be worth more than the 1200-yard case of hollands, and therefore shades should pay higher rates than hollands. 50 dozen shades are worth more than a case of hollands, and it is not contended in this case that such a quantity of shades should be carried for a *total charge* to the shipper as low, or anything like as low, as is paid by the shipper on a case of hollands. On the contrary, the whole 50 dozen shades do now, and will under third class rates, pay the carriers very much greater total transportation charges than those afforded by third class rates on a case of hollands. For example: An average case of hollands weighs 533 lbs., and the

third-class rate New York to Chicago of 50 cents will amount to a total transportation charge of \$2.87; while sending the 50-dozen shades in one dozen packages of 25 lbs. each, or a total of 1250 lbs. at the third class rate, will give the carriers an aggregate sum for transportation of \$6.25; and even when the shades are sent in two 28-dozen cases, each weighing 495 lbs., or together 990 lbs., the third class rate will amount to a total of \$4.95, and 4 dozen out of the 50 dozen shades have been left out of calculation. It is thus demonstrated, even on the theory of comparison insisted upon by the defense, that under third class rates for both hollandes and shades the carriers will receive full and proportionate compensation for carrying the greater bulk and weight of the entire 50 dozen shades over the bulk and weight represented by the case of hollandes from which that quantity of shades can be made, while the difference in value and risk of carriage between a case of hollandes and that quantity of shades is very small.

We can see no shipping or manufacturing interests which will be unjustly affected by reducing the rating on shades to third class. On the contrary, we are convinced, from the great reduction in value which has taken place since April, 1887, and the arbitrary increase of shade classification by the carriers during the progress of this proceeding, and upon all the other facts and considerations herein which pertain to the rights of shade shippers and consignees generally, and of purchasers of that article of household necessity, that the classification of window shades as first class in the Official Classification has become unjust; and

that the legal duty of defendants under the statute to so classify traffic and fix charges thereon that the burdens of transportation are reasonably and justly distributed among the articles they carry, requires them to classify window shades not higher than they classify window hollandes. This latter commodity having been in the third class for several years, such classification is, as before stated, presumably proper. The classification of shades should be reduced to that of "window hollandes and shade cloth, plain, uncut and undecorated," and order will be issued directing defendants to base charges for the transportation of window shades accordingly.

In stating facts and deciding the questions herein we have been compelled, of course, to base calculations upon figures which appear in evidence; these figures may vary somewhat from those which pertain to the business of shade manufacturers other than complainants, but it is not believed that such variation, if in evidence, would materially affect the findings and conclusions set forth in this report.

None of the reasons which induce us to order a reduction of the less than carload rating for window shades apply to the question of a lower carload classification for that commodity. Neither window hollandes, shade cloth, nor any of the other articles with which window shades have been compared in this case, and which are included under the head of dry goods in the Official Classification, are given carload rates. In view of this fact and the different aspect put upon this case by our decision of the preliminary question, we do not feel called upon to pass upon the carload question in this report.

UNITED STATES CIRCUIT COURT, WESTERN DISTRICT OF ARKANSAS.

LITTLE ROCK & MEMPHIS R. CO.

v.

ST. LOUIS, IRON MOUNTAIN & SOUTHERN R. CO.

(Two cases.)

SAME

v.

ST. LOUIS SOUTHWESTERN R. CO

(Two cases.)

SAME

v.

LITTLE ROCK & FT. SMITH R. CO.

(Two cases.)

(50 Fed. Rep. 400.)

1. Refusal to permit a forwarding company to perform an act involving the use of the tracks and terminal facilities of a receiving company is not a discrimination or denial of equal facilities by

one carrier to a connecting carrier within the prohibition of the Interstate Commerce Act.
2. The tracks and terminal facilities of a railroad company can be used by a connecting company

for the exchange of interstate freight only with the consent of the former.

3. No common carrier can justly complain of another because it is not allowed the use of the tracks and terminal facilities of such other in the same manner and to the same extent a third carrier is.
4. The fact that one connecting railway company has a contract for the interchange of interstate freight which involves the use of the receiving railway's tracks and terminal facilities will not authorize a court of equity to compel the receiving railway to grant a like contract or concession to another connecting company.
5. A connecting railway company desiring an interchange of passengers and freight cannot demand as a matter of right an interchange of freight at the point of physical connection without first furnishing at such point reasonable and proper facilities for the interchange sought and cannot rely upon the terminal facilities at another point or compel the receiving railway to go to any expense of providing proper facilities at the point of physical connection.
6. A court of equity has no power under the Inter-

state Commerce Act to compel a receiving company which has made a contract or agreement with a connecting company to establish the same rate upon through freight in favor of another company with which there is no contract and compel the receiving company to accept that rate, as no power is conferred by the Act upon any tribunal to provide for the necessary divisions growing out of a through routing and a through rating.

7. The insistence by a railway company upon its right to prepayment of the freight upon goods received from a connecting carrier rather than to consent to retain a lien upon the goods until payment is made or to hold the consignee responsible in case of delivery before payment as is done in case of freight received from other carriers cannot be construed to be a denial of equal facilities or a discrimination against the former.
8. A railroad company cannot be compelled to receive connecting carrier's cars to facilitate transportation if it has idle cars of its own, although it receives freight from another competing road in the cars of the latter and transports them over its road.

(January 5, 1894.)

ON DEMURRERS to bills and complaints at law and in equity in six suits brought to compel defendants to afford the plaintiff equal facilities for the interchange of interstate freight and passengers that were afforded to other roads, and for damages for refusal to afford such facilities. *Demurrers sustained.*

The facts are stated in the opinion.

Messrs. Rose, Hemingway & Rose, for plaintiff.

Messrs. J. M. & J. G. Taylor and Sam. H. West, for defendant, St. Louis S. W. R. Co.

Messrs. Dodge & Johnson for the other defendants.

Williams, D. J., delivered the opinion of the court:

The Little Rock & Memphis Railroad Company filed separate bills in equity against the St. Louis, Iron Mountain & Southern Railway Company and the Little Rock & Ft. Smith Railway Company. The bills are substantially alike as to allegations of fact, as well as the prayers for relief. At the same time the plaintiff company filed complaints at law against the same companies. The complaints at law are couched in substantially the same words as are used in the bills in equity.

It is stated in the bills that the plaintiff and defendants are corporations owning and operating railroads under the laws of the state of Arkansas; that all of the railroads mentioned are engaged in interstate commerce; and the terminal of the respective roads are stated. The wrong complained of is—

"That the defendant refuses to receive any freight from your orator, except upon the prepayment of all charges thereon, at the same time that it receives freight from all other persons and corporations without demanding the payment of freight charges, but collecting such charges upon the delivery of the goods, as is customary in the railroad business.

In the other case the language is somewhat different, and is as follows:

4 INTER 8.

"The defendant company, for the purpose of injuring and oppressing your orator, refuses to accept interstate freight at Little Rock upon through billing from the line of your orator, in conjunction with the defendant's line, at the same time that it accepts freight upon through billing from all other lines of railroad terminating at the city of Little Rock, and it refuses to accept freight from your orator except upon a prepayment of all freight charges, at the same time that it accepts freight from all other individuals and corporations without the prepayment of freight charges, collecting its freight charges, as is customary with railroad companies, upon the delivery of the freight as its destination; that the St. Louis, Iron Mountain & Southern Railway Company, a corporation organized under the laws of the state of Arkansas, and likewise engaged in the business of interstate commerce, has a line from Memphis to Little Rock, and parallel to that of your orator, and for the like purpose of oppressing and injuring your orator the defendant accepts from said company passengers on through tickets at greatly reduced rates, and with through checking of baggage, at the same time that it refuses to accept passengers over your orator's lines at through rates, but charges to such passengers local rates, and requires them to recheck their baggage at Little Rock."

To these bills, demurrers have been interposed, upon the ground that no cause of action is stated therein, and because there is no equity in the bills. The defendants urge that the questions presented by the bills have all been settled adversely to the plaintiff by this and other courts. The plaintiff insists that the law, as applicable to the facts now presented, has not been settled by any court, and undertakes to distinguish the cases at bar from the cases cited by defendants. To the end that the contention of the plaintiff may be stated fairly, I will state its exact position, as found on the brief of counsel, which is:

"Both cases are brought under the Act to Regulate Commerce, approved February 4, 1887, as amended by the Act of March 2, 1889. The second clause of the third section bears directly upon the question; and to it, as construed in the light of other provisions, we must look for a solution of the question presented in these cases. It reads as follows:

" 'Every common carrier, subject to the provisions of this Act, shall, according to their respective powers, afford all reasonable, proper and equal facilities for the interchange of traffic between their respective lines, and for the receiving, forwarding and delivering of passengers and property to and from their several lines and those connecting therewith, and shall not discriminate in their rates and charges between such connecting lines, but this shall not be construed as requiring any such common carrier to give the use of its tracks, or terminal facilities, to another carrier engaged in a like business.'

"The requirements of the clause are four; three mandatory, and one prohibitory. Of the mandatory provisions, two relate to all connecting carriers, without reference to the existence or nonexistence of competing lines. The others apply only to the duty of the carrier in its relation to competing carriers. In the first place, it is made the duty of all carriers coming within the Act to afford all reasonable and proper facilities for the interchange of traffic; and it must do this whether it connects with one line only, or with competing lines. The third requirement demands that the reasonable and proper facilities afforded shall also be equal, and the fourth prohibits discrimination among competing lines in rates and charges. It is not necessary to consider, in this case, the duty of the carrier under the first two requirements. The defendant determined what were reasonable and proper facilities for the interchange of traffic, and we do not complain of the determination reached. The basis of our complaint is that the facilities afforded have not been equal, and that the defendant has discriminated against the plaintiff, in withholding from it facilities afforded to competitors of the plaintiff connecting with defendant under the same circumstances and conditions as plaintiff. . . . The court is not required to determine what contract would be reasonable. That has been fixed by the defendant in its contract with the plaintiff's competitors. And, as the plaintiff does not controvert the reasonableness of the terms of that contract, it is necessary only for the court to coerce the defendant to give the plaintiff the benefit of it."

In *Little Rock & M. R. Co. v. East Tennessee,*

V. & G. R. Co. 4 Inters. Com. Rep. 263, 47 Fed. Rep. 774, Judge Hammond, in delivering the opinion of the court, said:

"If this bill averred that the East Tennessee, Virginia & Georgia Railway refused to give passengers going over the plaintiff road the same rates and facilities, including through tickets, and traffic transfers, that it affords to the Iron Mountain road for passengers going to Little Rock, or any other point on the plaintiff's road, the court would not hesitate to say that it would be a violation of this [third] section of the Interstate Commerce Act."

The state of case to which this language was applied was not made by the bill, nor had counsel been heard upon that state of facts. Plaintiff, however, insists that that precise state of case is now made by the bills before the court, and that the law, as announced by Judge Hammond, is applicable to it. Plaintiff further urges that the law applicable to the facts, as presented by the bill, is declared in *New York & N. R. Co. v. New York & N. E. R. Co.* 3 Inters. Com. Rep. 542, 4 I. C. C. Rep. 702, where it is claimed it has been decided—

"That when a railroad connects with two competitors, under substantially similar conditions, even at points a little apart, that, if it makes through rates with one, it must make the same with the other, and that this duty is enforceable."

The relief asked is—

"That the said defendant be enjoined from further discriminating against your orator, and that it be required to afford your orator the same facilities and conveniences in the transaction of business that it affords to other corporations and individuals."

The concluding portion of the third section of the Act, under which the plaintiff asks relief, declares:

"But this shall not be construed as requiring any such common carrier to give the use of its tracks, or terminal facilities, to another carrier engaged in like business."

It is clear from this language, that none of the grants, if they may be called such, in the preceding portion of the section, include, or were intended to include, the use of the tracks or terminal facilities of the receiving railway company. Therefore, in construing the section, we must at all times look to see whether what is asked includes the use of the defendant's tracks and terminal facilities. If it does, the law itself denies the prayer. In short, in ascertaining whether "equal facilities" have been denied, and whether "discrimination" exists, the court is not to call that a discrimination which arises from a refusal to permit the forwarding company to perform an act which involves the use of the tracks and terminal facilities of the receiving company, nor shall the court declare that to be a denial of "equal facilities" which flows from a refusal to a forwarding company to perform an act which involves the use of the track or terminal facilities of the receiving company. In *Kentucky & I. Bridge Co. v. Louisville & N. R. Co.* 2 Inters. Com. Rep. 888, 87 Fed. Rep. 628, in construing the third section of the Act, to which the plaintiff has appealed, Judge Jackson said: "That the provision in the third

section of the Act to the effect that a common carrier shall not be required "to give the use of its tracks and terminal facilities to another carrier engaged in like business" is a limitation upon, or qualification of, the duty of affording all reasonable, proper, and equal facilities for the interchange, or for the receiving, forwarding, and delivering of traffic to, from, and between connecting lines; and therefore it is "left open to any common carrier to contract or to enter into arrangements for the use of its tracks and terminal facilities with one or more connecting lines without subjecting itself to the charge of giving an undue or unreasonable preference or advantage to such line, or of discrimination against other carriers who are not parties to, or included in, such arrangements. No common carrier can, therefore, justly complain of another that it is not allowed the use of the other's tracks and terminal facilities upon the same or like terms and conditions which, under private contract or agreement, are conceded to other lines."

The point of connection of the plaintiff's railway with that of the defendant is not stated in the bill with any more accuracy than that it is at Little Rock. Nor is it stated that at the point of connection, or near thereto, the plaintiff company has facilities, in the way of tracks, switches, yards, and depots, for the interchange of interstate traffic, equal to those possessed by the Iron Mountain road at its connection with the defendant's railway. Judge Jackson, in speaking of that condition of affairs, in the same case, says:

"It by no means follows, because certain facilities for the interchange of freight are furnished by a railroad to another connecting line or lines, at one point, upon certain terms, conditions, and considerations, and where ample accommodations for the transaction of such business are provided and maintained at the joint expense of the companies using them, that another company, making a physical connection with the road furnishing such facilities, at another different and distant place, is entitled to demand, at said different point of connection, the same or equal facilities. The company making the physical connection at a point other than that at which the established road has already provided its facilities and conducts its interchange with other connecting lines, cannot demand or require an interchange of freight at such point of physical connection without first furnishing at such point reasonable and proper facilities for the interchange sought. It cannot rely upon the terminal facilities at another point of the road with which it has formed the physical connection; nor can it compel the road with which the connection is made to join with it in the expense of providing at that point the facilities necessary and proper for the interchange."

In *Oregon Short Line & U. N. R. Co. v. Northern Pac. R. Co.* 4 Inters. Com. Rep. 254, 51 Fed. 478,—a case having many of the phases of the cases at bar,—Judge Field, in construing the third section of the Act of March 2, 1889, said:

"The first subdivision of this section does not make all preferences or advantages which may be given by a common carrier unlawful. Only those which are undue or unreasonable

are forbidden. The second subdivision is similarly guarded in its provisions. Common carriers are there only required according to their respective powers, to afford all reasonable, proper, and equal facilities for the interchange of traffic between their respective lines, and are forbidden to discriminate in their rates and charges between them; and even this provision is subject to the limitation that it shall not be construed as requiring any common carrier to give the use of its tracks or terminal facilities to another carrier engaged in like business."

After having made this statement, the learned justice continues by quoting approvingly from the opinion of Judge Jackson in *Kentucky & I. Bridge Co. v. Louisville & N. R. Co.* 2 Inters. Com. Rep. 386, 37 Fed. Rep. 624, where it is said:

"No provision of the Interstate Commerce Act confers equal facilities upon connecting lines, under dissimilar circumstances and conditions. . . . The provision in the second subdivision of the third section of the Interstate Commerce Act, that a common carrier shall not be required to give the use of its tracks and terminal facilities to another carrier engaged in like business, is a limitation upon, or qualification of, the duty declared of affording all reasonable, proper, and equal facilities for the interchange of traffic, and the receiving, forwarding, and delivering of passengers and property to and from the several lines, and those connecting therewith. It follows from this, as it was decided in that case (*Kentucky & I. Bridge Co. v. Louisville & N. R. Co.*) that a common carrier is left free to enter into arrangements for the use of its tracks or terminal facilities with one or more connecting lines without subjecting itself to the charge of giving undue or unreasonable preferences or advantages to such lines, or of unlawfully discriminating against other carriers. In making arrangements for such use by other companies, a common carrier will be governed by considerations of what is best for its own interests. The Act does not purport to divest the railway carrier of its exclusive right to control its own affairs, except in the specific particulars indicated."

The adjudications establish four propositions: First, that the tracks and terminal facilities of the defendants can only be used by the plaintiff for the exchange of interstate freight, with the consent of the defendants; second, that no common carrier can justly complain of another because it is not allowed the use of the tracks and terminal facilities of such other railway company in the same manner and to the same extent another is; third, that the fact that one connecting railway company has a contract for the interchange of interstate commerce freight, which involves the use of the receiving railway's tracks and terminal facilities, would not authorize a court of equity to compel the receiving railway to grant a like contract or concession to another connecting company; fourth, that the connecting railway company, desiring an interchange of freight and passengers, cannot demand, as a matter of right, an interchange of freight at the point of physical connection without first furnishing at such point reasonable and proper

facilities for the interchange sought, and cannot rely upon the terminal facilities at another point, nor compel the receiving railway to go to any expense of providing proper facilities at the point of physical connection. These propositions having been established by two justices of the supreme court, I have no disposition to disregard their construction of the Interstate Commerce Act. There is nothing in the bills from which it may be inferred that the plaintiff owns, or has the proper, or any, facilities for the interchange of interstate commerce freight.

The effect of granting the relief asked would be to put the plaintiff in a position where it could receive interstate freight at Memphis, Tenn., destined to Ft. Smith, Ark., bring such freight at a distance of 185 miles, to Little Rock, over its own line, and deliver it to the Little Rock & Ft. Smith road, to be taken a further distance of 165 miles. In a case of that kind, by whom and how is the rate to be fixed from Little Rock to Ft. Smith? The plaintiff answers:

"By the same rate the defendant would receive if the freight had been brought by the Iron Mountain road from Memphis to Little Rock. That the compensation must be the same."

The answer savors of equity, and is certainly persuasive; but the contract existing between the Little Rock & Ft. Smith Railway and the Iron Mountain Railway may have been based upon the use of the tracks, switches, yards, stations, depots, and terminal facilities granted by one of these roads to the other, and, if so, it would not furnish a guide for any rate. But suppose the contract was not based upon any of these considerations. Has a court of equity, under the Interstate Commerce Act, been clothed with the power to compel the receiving company, which has made a contract or agreement with another connecting and competing company, to establish the same rate, as against the receiving company, at the instance of a railway company with which there is no contract, and compel the receiving company to accept that rate?

It is said that this precise question was decided by the Interstate Commerce Commission in *New York & N. E. Co. v. New York & N. E. R. Co.* 8 Inters. Com. Rep. 542, 4 I. C. C. Rep. 702. While such a decision, in the absence of adjudications by the courts, is entitled to great respect, and while it might be persuasive, if it went to the extent claimed for it, such decisions are not binding on this court. In the cases of the plaintiff against the East Tennessee, Virginia & Georgia Railway Company and the St. Louis, Iron Mountain & Southern Railway Company (2 Inters. Com. Rep. 460, 3 I. C. C. Rep. 16) Judge Walker, in speaking for the Commission upon the question of whether, under the Interstate Commerce Act, a compulsory through routing and through rating had been provided for by that Act, said:

"The facts in the present case clearly develop the importance of such an amendment, or of some amendment which shall provide a mode of procedure for carrying into effect the establishment of through routes and through

rates, and the equitable apportionment of the rate established, in case where the refusal of such routes and rates works an unlawful preference. As the statute now stands, there is no way apparent in which practical relief can be afforded to the complainant, without authority to provide for the necessary divisions being conferred, either upon the Commission, the courts, or some other tribunal."

It appears from this that under the Act, as it then stood, there was no authority "to provide for the necessary divisions" conferred either upon the Commission, the courts, or other tribunal. The Act has not been amended since that expression of opinion, although Congress has been appealed to to amend it so as to confer that power on the Commission and courts. If it be true that the Act does not confer the power on any tribunal to provide for the necessary divisions growing out of a through routing and a through rating, that ends the matter. The fact that the receiving company has fixed a through routing and a through rating by contract or agreement with another connecting company neither extends the jurisdiction of this court, nor confers upon it powers under the Act which it did not have before. Ascertaining the rule by which the rights of litigants, and the damages consequent upon their invasion, may be measured, is one thing; and ascertaining whether the court has jurisdiction to use the measure offered, or any other, is quite another.

The Supreme Court of the United States, in *Atchison, T. & S. F. R. Co. v. Denver & N. O. R. Co.* 110 U. S. 682, 28 L. ed. 297, held that the refusal of a common carrier to make through traffic arrangements at or upon joint rates with one connecting railroad company, such as it makes or enters into with another connecting line, does not constitute any undue or unreasonable discrimination in charges or facilities. It is true that decision was rendered before the enactment of the Interstate Commerce Act. But Judge Jackson, in the Kentucky & I. Bridge Co. case, after quoting what the court had decided, said:

"That decision is conclusive of the present question, unless some provision of the Act to Regulate Commerce has expressly, or by clear implication, provided otherwise. It is insisted for the petitioner that such is the case, and the second clause of section 3 of that Act is relied on, in connection with section 5258, U. S. Rev. Stat., as establishing a different rule and regulation from that announced in the above decision."

After stating that neither section 5258 nor the Interstate Commerce Act had changed the common law rule in relation to common carriers, the learned judge asks:

"Is it a public duty, imposed by the Act to Regulate Commerce, that every common carrier subject to the provisions of that law shall concede or afford through routing and through rates to all connecting lines whenever and so long as it voluntarily makes or enters into such arrangements with connecting lines? After a careful examination of the Act, and the argument of counsel and authorities cited, we fail to discover any such requirements. . . . Such arrangements, which usually include the reciprocal interchange of cars and the use of

each other's tracks and terminal facilities, are prompted by considerations varied and complex, as shown in the above statement of facts. In some instances, and between some companies, they may be mutually desirable and beneficial, while in other cases, and with other connecting lines, they might be prejudicial and injurious to the interests of one or both. Can companies in the latter situation (that is, those with whom a connection might be prejudicial or injurious) properly claim, as matter of right, what the former have acquired under and by virtue of private contract and arrangement? No provision of the law, rightly construed, sanctions or supports such a proposition. The statute does not undertake to create, between connecting lines, such an agency or *quasi* partnership relation as is necessarily involved in agreements or arrangements for the establishment of through routes and the making of through rates. As such arrangements exist by contract, express or implied, the fact that a common carrier enters into them with one or more connecting lines does not impose upon such carrier the duty or obligation to make the same or like contracts with all other lines."

One of the things complained of is that the defendant railway refuses to accept interstate freight upon through billing in conjunction with the plaintiff's line, and accepts such freight on through billing in conjunction with all other lines of railroad terminating at Little Rock. This is but another way of stating that one railway company has, by contract or agreement, acquired an arrangement for a through routing and a through rating with the defendant company, and that the defendant company refuses to make a like contract with the plaintiff, and, because it will not, it should be compelled by mandatory injunction to do so. This court possesses no such power. The bills do not allege whether the freight refused was in cars belonging to the plaintiff, or other railway corporations other than the defendants, or whether the defendants were without cars of their own in which to carry such freight. It was urged before *Justice Field*, in *Oregon Short Line & U. N. R. Co. v. Northern Pac. R. Co.* 4 Inters. Com. Rep. 253, 51 Fed. Rep. 473, that there was a custom among railways to receive freight from connecting lines, and not demand the prepayment of freight, and the alleged custom was pleaded as the foundation of a right, and in response to that he says:

"There is no law or custom requiring a railway company receiving freight from a connecting line to advance or assume the payment of the charges due thereon for the transportation from its point of origin to the connecting line. . . . A railway company, like any other common carrier, has a right to demand that its charges for transporting goods shall be paid in advance, and is under no obligation to receive the goods for transportation unless such charges are paid, if demanded."

It follows that if the receiving railway company is under no obligations to receive freight unless the prepayment of freight charges is tendered, if payment is demanded, and if there be no law or custom requiring it to do so, no right can grow out of an alleged law or cus-

tom which does not exist. A railway company may, undoubtedly, waive the right of prepayment, and retain a lien upon the goods until payment is made, and, in case of delivery before payment, may hold the consignee responsible, or it may refuse to do either, and demand prepayment. The exercise of these rights, or the waiver of some of them, at different times, can no more be construed to be a denial of "equal facilities," or a "discrimination," than it would be on the part of an hotel keeper to require some of his guests to pay in advance, and allow others to pay when they had concluded their stay at the hotel.

At the same time the bills were filed in the cases to which attention has thus far been directed, a bill was also filed against the St. Louis Southwestern Railway Company by the plaintiff. The only difference in the bills is that in the last mentioned bill there is an averment which is not in the others, to wit:

"The lines of railway of your orator and the defendant intersect at the town of Brinkley, at which place switches, and all other conveniences for the interchange of traffic, have been established; that the St. Louis, Iron Mountain & Southern Railway owns a line that parallels that of your orator, about thirty miles north of Brinkley, which extends from Memphis westward; that the defendant refuses to receive freight or passengers coming over your orator's line, except at local rates, and refuses to honor through tickets or through bills of lading over the line of your orator in conjunction with its own, but requires all freight to be rebilled and reloaded, and all passengers to purchase new tickets, at the said town of Brinkley, while, at the same time, it issues and accepts through tickets and through bills of lading from other railway companies," etc.

That the plaintiff has the facilities at Brinkley for an interchange of interstate commerce freight (an allegation not contained in the other bills) is distinctly alleged, but the bill shows that the defendant requires the freight offered to be rebilled and reloaded. The inference is that the plaintiff tendered the freight in its own cars, and the defendant declined to take it in that condition, as it had cars of its own, in which it preferred or desired to carry the freight. The refusal was, not to transport the freight, but to transport it in the cars of the plaintiff, or in the cars of others. That precise question was presented in the *Oregon* case, and *Justice Field*, speaking for the court, said:

"Its chief contention is that the defendant, as a common carrier by railway of freight and passengers, is obliged (1) to receive freight tendered to it by the complainant at Portland, Or. (that being a point where it connects with the road of the complainant) in the cars in which it is tendered, and transport the same to the point of destination in such cars, over its road, and pay to the company owning the cars the current rate of mileage for their use, and also pay the charges for transportation from point of origin to Portland; (2) to honor tickets or coupons for passage over its lines, north of Portland, issued by the complainant. This obligation of the defendant is asserted on three grounds: (1) the alleged established custom between railroad companies

operating connecting lines; (2) the third section of the Interstate Commerce Act; and (8) the fifth section of the defendant's charter.

As the receiving company is under no obligation to take the freight in the cars in which it is tendered, and transport it in such cars, when it has cars of its own, not in use, to transport it, there can be no question that it shall pay the owner of such cars, should it receive them in such case, car mileage for their use. The car mileage, in that case, must be upon an arrangement between the parties."

It would seem from this case that the defendant had the right, if it had unemployed cars of its own, which is not negatived by any allegation in the bill, to carry the freight in its own cars, and to refuse to pay for the use of cars it did not need in the conduct of its business. Prior to the enactment of the Interstate Commerce Act, it would hardly have been contended that a connecting railway company would have had a remedy in equity, to compel the company with which the connection was made to accept freight in the cars of other companies than its own, and transport the same to a point of destination on its line, or that a remedy at law, for damages for such refusal, existed. It seems to me that to allow the plaintiff company to load one or more of its cars at Memphis, Tenn., with freight to Ft. Smith, Ark., bring it to Little Rock, and compel the Little Rock & Ft. Smith Railway to transport the cars to Ft. Smith, without any agreement as to rates, and without the Little Rock & Ft. Smith Railway having any privilege to haul the freight in its own cars, would be giving the plaintiff the absolute use of the tracks of the defendant, to enable the plaintiff to carry on an interstate commerce business. The "use of the tracks" of a common carrier for such a purpose is denied, in express terms, by the concluding clause of section 8 of the Act. If it may thus tender cars of freight for transportation, it is difficult to see why the locomotive and tender should be detached from such cars. If a court of equity, by mandatory process, has the power to compel the receiving company to accept and transport interstate commerce freight in other cars than its own, it has the same right to say that such cars shall, if it will facilitate the business of delivery, be transported to the point of destination with and by the same motive power that brought them to the connecting road. The running of freight cars over the track of another railroad, without its consent, is just as much "use of the tracks" as if the locomotive was attached.

I have given these causes my best consideration, and it seems to me that if the court undertakes to adopt a rate agreed upon between the defendants and other connecting companies, or any other rate, the court would be making a contract which the law does not authorize it to make, between the plaintiff and defendants. In *Atchison, T. & S. F. R. Co. v. Denver & N. O. R. Co.* 110 U. S. 679, 28 L. ed. 296, the court said:

"A court of equity is not, any more than a court of law, clothed with legislative power. It may enforce in its own appropriate way, the specific performance of an existing legal

obligation, arising out of contract, law, or usage, but it cannot create the obligation."

In *Memphis & L. R. R. Co. v. Southern Exp. Co. (Express Cases)* 117 U. S. 29, 29 L. ed. 803, the court below had rendered just such a decree, in form, as this court is now asked to make, and the court said:

"Having found that the railroad company should furnish the express company with facilities for business, it had to define what those facilities must be; and it did so by declaring that they should be furnished to the same extent and upon the same terms that the company accorded to itself, or to any other company engaged in conducting an express business on its line. It then prescribed the time and manner of making the payment for the facilities, and how the payment should be secured, as well as how it should be measured. Thus, by the decrees, these railroad companies are compelled to carry these express companies, at these rates and on these terms, so long as they ask to be carried. In this way,

as it seems to us, the court has made an arrangement for the business intercourse of these companies, such, as, in its opinion, they ought to have made for themselves. The regulation of matters of this kind is legislative in its character, not judicial. To what extent it must come, if it comes at all, from Congress, and to what extent it may come from the states, are questions we do not now undertake to decide; but that it must come, when it does come, from some source of legislative power, we do not doubt."

If a decree was entered in this case in favor of the plaintiff, would it not have to be in substantially the same language as the decree in the Express Cases:

"To accord to the plaintiff the same facilities, in the matter of the interest of interstate commerce freight, that the defendant accords to other companies connecting with defendant's railway, as to freight delivered to defendants at Little Rock, and destined to Ft. Smith."

Suppose there were three or more railroads connecting with the Little Rock & Ft. Smith Railway at Little Rock, all engaged in interstate commerce; and that two of them had contracts with that company for through routing and through rating, and that these contracts were dissimilar as to rates and charges. Which of the rates would the court be compelled to accept, when it undertook to decree a rate for the plaintiff? But admit they should be found to be alike, and that the court should adopt the rate so found, and that the contracts were to expire on the 1st day of January next, and that after that time the rate, by contract, should be increased. Is this litigation to remain open as long as these corporations exist, and interstate commerce continues, and is the court to make orders from time to time to meet the varying changes? Again, suppose the contracts shall not be renewed at all. Could the defendant come into this court, and plead the expiration of the contracts, and have the mandatory injunction set aside? If it could, does that not show that the power of the court to act in the first instance depended, not upon any provision of the Interstate Commerce Act, but upon

evidence by which an equitable rate might be ascertained?

In *Little Rock & M. R. Co. v. St. Louis, I. M. & S. Ry. Co.* 2 Inters. Com. Rep. 768, 41 Fed. Rep. 559,—a case involving a construction of the third section of the Interstate Commerce Act, and many of the questions now presented,—Judge Caldwell, in delivering the opinion of the court, said:

"The precise question in this case is, can the United States circuit court, in the exercise of its equity powers, require a railroad company engaged in interstate commerce traffic to enter into an agreement with another railroad company, engaged in like traffic, for a joint through routing and joint through rates; and, upon the refusal of the company to comply with such a requirement, may the court itself make such a contract for the parties?"

The question is answered in the negative. The fact that in the case at bar there exists a contract with another company for similar services, while that was not true in the other case, cannot confer jurisdiction in this case, if there was none in the other. Through routing and through rating cannot be effected without the use of the tracks of the companies creating the through routing and rating. Such contracts are entered into for the very reason that they do away with rebilling and reloading freight, and give to the parties to the arrangement the use of each other's cars and tracks for the purpose of forwarding the freight from its origin to its destination without breaking

bulk. If this be true, and if it also be true that nothing contained in the third section of the Interstate Commerce Act is to be so construed as "requiring any such common carrier to give the use of its tracks or terminal facilities to another carrier engaged in a like business," where does the court get the power to say, in the absence of a contract giving the plaintiff such a right, that it shall have the use of defendant's tracks in order to aid it in carrying on interstate commerce traffic? The prayer of the bills cannot be granted without compelling the defendants to permit the plaintiff to run its own, or cars other than those of the defendants, over their tracks. To stop the cars at the point of physical connection, and reload the freight into the cars of the receiving company, is to break a through routing; and to break a through routing is to break a through rating.

Being of the opinion that the defendants are not required to allow the plaintiff the use of their tracks for the purpose of enabling the plaintiff to do an interstate commerce business, and that the relief asked cannot be granted without the use of defendants' tracks, and compelling the defendants to haul freight, in other cars than their own, over their own tracks, and at a less rate than they would receive, or be entitled to receive, if the freight was hauled in their own cars, I cannot see my way clear to grant the relief asked.

The demurrers to the bills, as well as those to the complaints at law, are sustained.

4 INTER 8.

UNITED STATES SUPREME COURT.

THE INTERSTATE COMMERCE COMMISSION, *Appt.*, .

v.

W. G. BRIMSON ET AL.

(See S. C. 154 U. S. 447, 38 L. ed. —.)

[No. 888.]

Act to Regulate Commerce—power of Congress—appropriate means—judiciary—compelling testimony before Interstate Commerce Commission—due process of law.

1. The 12th section of the Act of Feb. 4, 1887, as amended in 1889 and 1891, is constitutional and valid, so far as it authorizes or requires the circuit courts of the United States to use their process in aid of inquiries before the Interstate Commerce Commission.
2. Congress has plenary power, subject to the limitations imposed by the Constitution, to prescribe the rule by which commerce among the several states is to be governed.
3. Congress may, in its discretion, employ any appropriate means, not forbidden by the Constitution, to carry into effect, and accomplish the objects of, a power given to it by the Constitution.
4. The judiciary can only inquire whether the means devised by Congress in the execution of a power granted are forbidden by the Constitution.
5. A proceeding to compel the attendance of a witness before the Interstate Commerce Commission, or to require him to answer questions put to him, or to compel the production of books, documents or papers in his possession is a case of which, under the Constitution, a court of the United States may take cognizance.
6. In matters of contempt, a jury is not required by "due process of law;" courts possess the power to punish for contempt.

Argued April 16, 17, 1894. Decided May 26, 1894.

APPEAL from a judgment of the Circuit Court of the United States for the Northern District of Illinois, dismissing a petition filed by the Interstate Commerce Commission under the Act of Congress entitled "An Act to Regulate Commerce" of February 4, 1887, and amended by the Acts of March 2, 1889, and Feb. 10, 1891, invoking the aid of the circuit court in requiring the attendance and testimony of witnesses and the production of documents, books and papers, in a case before the said Interstate Commerce Commission. *Reversed, and cause remanded for further proceedings.*

See same case below, 53 Fed. Rep. 476, 480. *Messrs. Lawrence Maxwell, Jr., Solicitor Gen., and Geo. F. Edmunds, for appellant:*

The Constitution declares that Congress shall have power "to regulate commerce with foreign nations and among the several states."

The power to regulate commerce necessarily and confessedly includes the power to provide all means fairly adapted to the complete exercise of the power.

One (and perhaps the most salutary of all) of these means is the establishment of a national, official body, by whatever name styled, to put into execution the principles and regu-

lations declared by law, and in so doing, and, as essentially and indispensably a part thereof, to investigate the course and practice of interstate commerce as carried on by whomsoever engaged in it, and so to ascertain whether or not it is carried on according to the requirements of law.

Congress possessed the power of making it the legal duty of every such carrier and of every other person having knowledge of the subject under consideration, to appear, on due summons, before the Commission and produce the papers and give the evidence it or he might possess legitimately relating to the matter so lawfully under consideration.

Congress, having imposed it, could provide the natural and necessary means of compelling performance, as well as punishing nonperformance of such duty.

The natural, necessary and only lawful means of compelling the performance of any legal duty (except payment of taxes and military service, etc.) is by the exertion of the judicial power. This is done by an application to a court, in whatever mode or form the law may provide, by the party entitled to have the duty performed, against the party complained of.

Such a proceeding as that in this case by a

MEM.—References in note are to U.S. Repts. L. ed.

party having a statutory standing as complainant against a party who has refused to perform a duty that a valid statute required him to perform is, within the very letter as well as the spirit of the Constitution a "case" and a "controversy," which the judicial power was established to hear, try, and determine.

It is a due and constant exercise of the judicial power to command the performance of any duty that any person or corporation is legally bound to perform, either to the public or to an individual, and to do it under such modes and forms of procedure as the legislative power shall have prescribed. If Congress has no power to impose such a duty the judiciary can neither compel a performance nor punish a nonperformance. But if Congress has and exercises the power to impose such a duty, no matter to whom it may be imputed, the judiciary is bound (if the law has so provided) to hear the complaint of the party seeking performance, and to decide whether the other party owes the duty demanded, and, if the duty is found to exist, to decree its performance.

This is both a "case" and a "controversy" arising under the laws of the United States, and to which the United States were, in substance and effect, parties. The controversy had two opposing parties legally interested in it. It was brought into court by one of them, praying redress and the performance of a legal obligation against the other. The court had been given jurisdiction of that very class of cases and controversies. The mode of procedure was provided for by law.

The admitted jurisdiction of the courts to hear and determine complaints by the Commission for disobedience of their final orders upon carriers is of precisely the same legal character as the jurisdiction here invoked.

It is the province of the legislative and not of the judicial power to say what the form of procedure and remedy shall be in every case of an officer or person who has refused to do that which a valid law has required him to do, subject of course to the provisions requiring jury trial, etc., not applicable here. In cases like the present one, the legislative power has declared that the procedure shall be of the character employed in this case.

The judiciary cannot constitutionally compel affirmative obedience to any part of the interstate commerce acts if it cannot do it as to this part of them.

As the decree of the court below was based

4 INTER S.

solely upon the question of the power of the court to act at all, the matter of the relevancy of the questions asked and of the papers called for is not open for consideration here.

Passavant v. United States, 148 U. S. 214 (87: 426); Circuit Court of Appeals Act, March 5, 1891, §§ 5, 6.

But if the propriety of the action of the Commission is now open for review, then it is insisted that the questions refused to be answered and the papers refused to be produced were relevant to the subject-matter under consideration by the Commission.

If these companies were engaged in interstate commerce, there was nothing connected with any part of their affairs that the commission had not a right and was not bound, in case of complaint, to know, not only who were the owners of their stock and the controllers of their roads, but whether they or their officers were owners or interested in the steel company, whose interstate business they were transacting. The hearing had just begun. The statements of these officers were not conclusive, and had the questions been answered, and the books produced their denials might have been overcome perhaps by their own evidence. But the examination was suspended at the threshold by the necessity of applying to the court in the manner before stated.

Perfectly analogous to the jurisdiction contended for here are many instances of immemorial jurisdiction where the principal and final matters were not before the court called upon to act. Among these are:

Injunctions to stay waste, etc., pending suits at law to try titles (*Erhardt v. Boaro*, 113 U. S. 537 (28: 1116); *Kinsler v. Clarke*, 2 Hill, Eq. 617); certiorari (Story, Eq. Pl. § 18); bills to perpetuate testimony (Story, Eq. Jur. § 1512. See also Act of 1787, § 30); bills for examination of witnesses (Story, Eq. Pl. § 19; and see Act of 1827, § 2); bills of discovery (Story, Eq. Pl. § 19); and the judicial course on letters rogatory. 10 Stat. at L. 680; 12 Stat. at L. 769; Rev. Stat. 4071; *Nelson v. United States*, Pet. C. C. 285; *Mexico v. Arrangois*, 5 Duer, 684; *Kuehling v. Leberman*, 9 Phila. 160; *Re Spanish Consul at New York*, 1 Ben. 225.

No court of the United States can exercise any other than judicial power, and it cannot exercise judicial power without having a "case" or a "controversy" before it. How, then, can all these courts exercise power in all these varied instances otherwise than under the very principle before stated, that is, that it is the exertion of judicial power to pass and act upon the application of a party demanding relief in respect to another who is bound by law to do the thing asked, and that such an application in the form prescribed by law is a "case" and if disputed is a "controversy?"

Messrs. E. Parmalee Prentice, James C. Hutchins and Charles S. Holt, for appellees:

This investigation was in its nature judicial, and authority to make it could not lawfully be conferred by Congress upon the Interstate Commerce Commission, which is in its nature an administrative and not a judicial body.

1 Kent, Com. 804; *United States v. Ferreira*, 54 U. S. 18 How. 45 (14: 44).

The Interstate Commerce Commission is an administrative body.

Kentucky & I. Bridge Co. v. Louisville & N. R. Co. 2 Inters. Com. Rep. 351, 87 Fed. Rep. 567.

The inquiry which the Commission was pursuing was judicial.

It is not one of the constitutional means included in the power to regulate interstate commerce, to delegate to a non-judicial body the duty of inquiring whether such commerce is carried on according to the "requirements of law." The proposition thus laid down by counsel is that Congress may authorize compulsory inquiry by a non-judicial body for the purpose of discovering and punishing past violations of law. A more startling proposition has seldom been asserted in this court. These violations are, if anything, crimes, punishable by heavy penalties of fine and imprisonment, and the investigation of the question whether crime has been committed is not an administrative act within any possible construction of the language. Such an inquiry is a function of the courts, with their historic appropriate machinery of the grand jury.

Com. v. Jones, 10 Bush, 725; *Cooley*, Const. Lim. (5th ed.) 109, 110.

Whether we look, therefore, at the prescription of duty, or at the enforcement of duty, we find no place for the operation of the Commission in such an investigation as this.

Re Pacific R. Co. 82 Fed. Rep. 251.

The Commission is in no respect a judicial body. Under our system of government such a body cannot conduct such an inquiry.

Kilbourn v. Thompson, 108 U. S. 168 (26: 877); *Boyd v. United States*, 116 U. S. 616 (29: 746).

The power of visitation is a power applicable only to ecclesiastical and eleemosynary corporations. The visitation of civil corporations is by the government itself, through the medium of the courts of justice.

2 Kent, Com. (18th ed.) 800.

The state has authority to interfere to ascertain whether or not the course pursued by a civil corporation is in excess of corporate power.

Waterman, Corp. 668; *Atty. Gen. v. Utica Ins. Co.* 2 Johns. Ch. 371.

Even if Congress could empower the Commission to make this investigation, still it could not empower this court to grant the order applied for; because, whether the character of the inquiry is judicial or non-judicial, the question does not here arise in a case or controversy as required by the Constitution.

The Federal Constitution, limits the judicial power of the United States and only "cases" and "controversies" can find an entrance into the Federal courts.

Chisholm v. Georgia, 2 U. S. 2 Dall. 482 (1: 485).

A case, in the sense of this clause of the Constitution, arises when some subject touching the Constitution, laws or treaties of the United States is submitted to the courts by a party who asserts his rights in the form prescribed by law.

Story, Const. § 1646; *Osborn v. United States*, 22 U. S. 9 Wheat. 745 (6: 206); *Smith v. Adams*, 180 U. S. 178 (82: 997); *Hayburn's Case*, 2 U. S. 4 INTER 8.

S. 2 Dall. 409 (1: 486); *United States v. Todd*, 54 U. S. 13 How. 52 (14: 47) note.

The language of the Act does not make it the duty of any carrier or other person to furnish information, but simply confers authority upon the Commission to inquire into the management of the business of all common carriers subject to the provisions of the Act.

United States v. Mitchell, 58 Fed. Rep. 998; *United States v. Hudson*, 11 U. S. 7 Cranch, 42 (8: 259); *United States v. Lancaster*, 2 McLean, 481.

But even if it were held that there is an implied "duty" as broad as the "right conferred by the Act," that is not broad enough to cover the duty here insisted on.

If the duty exists it must be one that is expressly or by implication contained in and defined by the Act of Congress.

The only possible definition of the duty asserted by counsel for the Commission in this case is, that it consisted in furnishing to the Commission all books, papers and information which the Commission might see fit to ask for. This is simply arming the Commission with unlimited powers of inquisition. Under the guise of a duty it empowers the Commission to create as many separate duties as it sees fit, and the very act of creation is a legislative act. If Congress delegate power in these broad terms, it can delegate any power whatever.

The application to the court is not for a decision whether the information is necessary, but for the enforcement of a duty which is assumed by the hypothesis to have been previously created. It must then have been either created by the Commission, acting as a legislature, or adjudged by the Commission, acting as a court. Either hypothesis is fatal.

When the Commission asks the question, either a duty to answer is thereby finally established or it is not. If it is finally established, then the act of the Commission is a legislative act, which is in the first place beyond the power of the Commission; but if valid, the court has no power to do anything except enforce it or punish its violation, without inquiry as to the materiality or necessity of the information sought. This makes the court the mere ministerial agent of the Commission.

If the duty is not established finally, but only provisionally (i. e. subject to the court's inquiry as to its propriety and necessity) then the court is called upon to take part in a legislative act, which is wholly beyond its competency; and what bears especially on the point now in hand, the supposed "case or controversy" consisting of the assertion on one side, and denial on the other, of an established duty, becomes a mere advisory inquiry whether it is lawful and expedient that a duty shall be established.

The provision of section 12 of the Interstate Commerce Act, under which this proceeding was taken, is, that the Commission "may invoke the aid of any court of the United States in requiring the attendance and testimony of witnesses and the production of books, papers, documents, etc."

This application is stamped from the outset with the marks of its purely ancillary character.

It is only by splitting up the investigation

into minute fragments that the Commission can find any part of it to submit to the court for judicial action. If it had been attempted to carry on this entire investigation in the first instance by petition to the court, it would not have been possible to pretend that it made a case or controversy of which the court could take cognizance. A part cannot be greater than the whole, and the Commission cannot set 'n motion the judicial power by dismembering their case and bringing a small fragment into court to be decided and returned to them for such use as they may choose to make of it.

Moreover, if each refusal of a witness to answer a question in such an investigation may be made the subject of a separate judicial inquiry, under the guise of enforcing a duty, there may be as many separate controversies as there are questions. It follows also that each controversy thus submitted to the court gives the right of appeal to the defeated party. Thus, the extraordinary spectacle would be presented of this court or of the court of appeals deciding in succession a series of objections to evidence, arising in a controversy carried on before another and non-judicial tribunal. It is a perversion alike of language and of thought to speak seriously of this as a proper method of judicial action.

The courts have uniformly and repeated refused to recognize as "cases or controversies" questions arising at a preliminary stage before the judicial power is called into exercise, or subject to revision by another department after the courts have done with them.

United States v. Ritchie, 58 U. S. 17 How. 525 (15: 236); *Election Supra. Case*, 114 Mass. 247; *Ex parte Siebold*, 100 U. S. 399 (25: 727).

The court will look at the nature of the right, and not merely at the form in which it is asserted, to determine whether there is or is not a "case" for judicial consideration.

Den v. Hoboken Land & Imp. Co. 59 U. S. 18 How. 282-284 (15: 276, 377).

The case at bar is fatally defective, both as to substance, and form, and can by no possibility gain any standing in a Federal court.

The application is an attempt to borrow the process of contempt for use in an administrative inquiry, and it has no other substantial purpose.

The right of trial by jury as guaranteed by the Constitution forbids the creation of new methods of procedure in cases involving private rights.

Scott v. Neely, 140 U. S. 106 (35: 358); *Puterbaugh v. Smith*, 131 Ill. 199.

The judicial process of contempt is not a legitimate method for the enforcement of executive or legislative command.

Kilbourn v. Thompson, 108 U. S. 168 (26: 377); *Langenberg v. Decker*, 16 L. R. A. 108, 131 Ind. 471; *Wyatt v. People*, 17 Colo. 252.

The mere ownership of the stock in the switching roads by the steel company would not constitute a violation of the Interstate Commerce Law.

Pullman Palace Car Co. v. Missouri Pac. R. Co. 115 U. S. 587 (29: 499).

Mr. Justice Harlan delivered the opinion of the court:

This appeal brings up for review a judgment 4 INTER S.

rendered December 7, 1892, dismissing a petition filed in the Circuit Court of the United States on the 15th day of July 1892 by the Interstate Commerce Commission under the Act of Congress entitled "An Act to Regulate Commerce," approved February 4, 1887, and amended by the acts of March 2, 1889 and February 10, 1891. 24 Stat. at L. 379, chap. 104; 25 Stat. at L. 855, chap. 382; 26 Stat. at L. 743, chap. 128; 1 Rev. Stat. Supp. 529, 684, 891.

The petition was based on the 12th section of the Act authorizing the Commission to invoke the aid of any court of the United States in requiring the attendance and testimony of witnesses, and the production of documents, books, and papers.

The circuit court held that section to be unconstitutional and void, as imposing on the judicial tribunals of the United States duties that were not judicial in their nature. In the judgment of that court, this proceeding was not a case to which the judicial power of the United States extended. 4 Inters. Com. Rep. 315, 53 Fed. Rep. 476, 480.

The provisions of the Interstate Commerce Act have no application to the transportation of passengers or property, or to the receiving, delivering, storing, or handling of property, wholly within one state and not shipped to a foreign country from any state or territory, or from a foreign country to any state or territory. But they are declared to be applicable to carriers engaged in the transportation of passengers or property wholly by railroad, or partly by railroad and partly by water when both are used, under a common control, management, or arrangement, for a continuous carriage or shipment from one state or territory of the United States, or the District of Columbia, to any other state or territory of the United States, or the District of Columbia, or from any place in the United States to an adjacent foreign country, or from any place in the United States through a foreign country to any other place in the United States, and also to the transportation in like manner of property shipped from any place in the United States to a foreign country and carried from such place to a port of transshipment, or shipped from a foreign country to any place in the United States and carried to such place from a port of entry either in the United States or an adjacent foreign country.

The term "railroad" as used in the Act includes all bridges and ferries used or operated in connection with any railroad, and also all the road in use by any corporation operating a railroad, whether owned or operated under a contract, agreement, or lease; and the term "transportation" includes all instrumentalities of shipment or carriage.

All charges made for services rendered or to be rendered in the transportation of passengers or property, as above stated, or in connection therewith, or for the receiving, delivering, storing, or handling of such property, are required to be reasonable and just; and every unjust and unreasonable charge for such service is prohibited and declared to be unlawful. § 1.

Any carrier subject to the provision of the Act, directly or indirectly, by special rate, rebate, drawback, or other device, charging, de-

manding, collecting, or receiving from any person or persons a greater or less compensation for services rendered or to be rendered in the transportation of passengers or property, than it charges, demands, collects, or receives for doing a like and contemporaneous service in the transportation of a like kind of traffic under substantially similar circumstances and conditions, is to be deemed guilty of unjust discrimination, which the Act expressly declares to be unlawful. § 2.

So it is made unlawful for any such carrier to make or give any undue or unreasonable preference or advantage to any particular person, company, firm, corporation, or locality, or to any particular description of traffic, or to subject any particular person, company, firm, corporation, or locality, or any particular kind of traffic, to undue or unreasonable prejudice or disadvantage in any respect. And carriers subject to the provisions of the Act are required to afford, according to their respective powers, all reasonable, proper, and equal facilities for the interchange of traffic between their respective lines, and for the receiving, forwarding, and delivering of passengers and property to and from their several lines and those connecting therewith, and not to discriminate in their rates and charges between such connecting lines; but this regulation does not require a carrier to give the use of its tracks or terminal facilities to another carrier engaged in like business. § 3.

It is made unlawful for any carrier subject to the provisions of the Act to charge or receive any greater compensation in the aggregate for the transportation of passengers or of like kind of property under substantially similar circumstances and conditions, for a shorter than for a longer distance over the same line, in the same direction, the shorter being included within the longer distance; but this does not authorize the charging and receiving as great compensation for a short as for a longer distance. Upon application to the Commission, the carrier may in special cases, after investigation by that body, be authorized to charge less for longer than for short distances for the transportation of passengers or property; and the Commission may from time to time prescribe the extent to which the carrier may be relieved from the operation of this section. § 4.

It is also made unlawful for any carrier subject to the provisions of the Act to enter into any contract, agreement, or combination with any other carrier or carriers for the pooling of freights of different and competing railroads, or to divide between them the aggregate or net proceeds of the earnings of such railroads, or any portion thereof; and in any case of an agreement for the pooling of freights as aforesaid each day of its continuance is deemed a separate offense. § 5.

Another section of the Act provides for the printing and posting by carriers of their rates, fares, and charges for the transportation of passengers and property, including terminal charges, classifications of freight, and any rules or regulations affecting such rates, fares, and charges, including the rates established and charged for freight received in this country to be carried through a foreign country to any

place in the United States; forbids any advance or reduction in such rates, fares, and charges, so established and published, except upon public notice, of which changes the Commission shall be notified; requires every carrier to file with the Commission copies of all contracts, agreements, or arrangements with other carriers relating to any traffic affected by the provisions of the Act, as well as copies of schedules of joint tariffs of rates, fares, or charges for passengers and property over continuous lines or routes operated by more than one carrier; declares it to be unlawful for any carrier, party to any joint tariff, to charge, demand, collect, or receive from any person or persons a greater or less compensation for the transportation of persons or property, or for any services in connection therewith between any points as to which a joint rate, fare, or charge is named thereon than is specified in the schedule filed with the Commission in force at the time; authorizes in addition to the penalties prescribed for neglect or refusal to file or publish rates, fares, and charges, a writ of mandamus to be issued by any circuit court of the United States in the judicial district wherein the principal office of the carrier is situated, or wherein such offense may be committed, and if such carrier be a foreign corporation, in the judicial circuit wherein it accepts traffic, and has an agent to perform such service, to compel compliance with the above provisions of the section relating to schedules of rates, fares, and charges—such writ to issue in the name of the people of the United States, at the relation of the commissioners appointed under the provisions of the Act, and the failure to comply with its requirements being punishable as and for a contempt; and empowers the commissioners, as complainants, to apply, in any such circuit court of the United States, for a writ of injunction against the carrier, to restrain it from receiving or transferring property among the several states and territories of the United States, or between the United States and adjacent foreign countries, or between ports of transshipment and of entry and the several states and territories of the United States, as mentioned in the 1st section of the Act, until the carrier shall have complied with the provisions last referred to. § 6.

So a common carrier subject to the provisions of the Act is forbidden to enter into any combination, contract, or agreement, expressed or implied, to prevent by change of time schedule, carriage in different cars, or by other means or devices, the carriage of freights from being continuous from the place of shipment to the place of destination; and no break of bulk, stoppage, or interruption made by such common carrier shall prevent the carriage of freights from being, and being treated, as one continuous carriage from the place of shipment to the place of destination, unless such break, stoppage, or interruption was made in good faith for some necessary purpose, and without any intent to avoid or unnecessarily interrupt such continuous carriage or to evade any of the provisions of the Act. § 7.

By the 11th section a commission is created and established, to be known as the Interstate Commerce Commission, and to be composed of five commissioners, appointed by the Pres-

ident, by and with the advice and consent of the Senate. § 11.

Other sections give a right of action to the persons injured by the acts of carriers done in violation of the statute; prescribe penalties against carriers for illegal exactions and discriminations; and indicate how the provisions of the statute may be enforced against carriers by the Commission.

The 12th section (26 Stat. at L. 743, chap. 128) the validity of certain parts of which is involved in this proceeding, provides as follows: "That the Commission hereby created shall have authority to inquire into the management of the business of all common carriers subject to the provisions of this Act, and shall keep itself informed as to the manner and method in which the same is conducted, and shall have the right to obtain from such common carriers full and complete information necessary to enable the Commission to perform the duties and carry out the objects for which it was created; and the Commission is hereby authorized and required to execute and enforce the provisions of this Act; and, upon the request of the Commission, it shall be the duty of any district attorney of the United States to whom the Commission may apply to institute in the proper court and to prosecute under the direction of the Attorney General of the United States all necessary proceedings for the enforcement of the provisions of this Act and for the punishment of all violations thereof, and the costs and expenses of such prosecution shall be paid out of the appropriation for the expenses of the courts of the United States; and for the purposes of this Act the Commission shall have power to require, by subpoena, the attendance and testimony of witnesses and the production of all books, papers, tariffs, contracts, agreements, and documents relating to any matter under investigation.

"Such attendance of witnesses and the production of such documentary evidence, may be required from any place in the United States, at any designated place of hearing. And in case of disobedience to a subpoena the Commission, or any party to a proceeding before the Commission, may invoke the aid of any court of the United States in requiring the attendance and testimony of witnesses and the production of books, papers, and documents under the provisions of this section.

"And any of the circuit courts of the United States within the jurisdiction of which such inquiry is carried on may, in case of contumacy or refusal to obey a subpoena issued to any common carrier subject to the provisions of this Act, or other person, issue an order requiring such common carrier or other person to appear before said Commission (and produce books and papers if so ordered) and give evidence touching the matter in question; and any failure to obey such order of the court may be punished by such court as a contempt thereof. The claim that any such testimony or evidence may tend to criminate the person giving such evidence shall not excuse such witness from testifying; but such evidence or testimony shall not be used against such person on the trial of any criminal proceeding.

"The testimony of any witness may be taken, at the instance of a party, in any proceeding or investigation depending before the Commission, by deposition, at any time after a cause or proceeding is at issue on petition and answer. The Commission may also order testimony to be taken by deposition in any proceeding or investigation pending before it, at any stage of such proceeding or investigation. Such depositions may be taken before any judge of any court of the United States, or any commissioner of a circuit, or any clerk of a district or circuit court, or any chancellor, justice, or judge of a supreme or superior court, mayor or chief magistrate of a city, judge of a county court, or court of common pleas of any of the United States, or any notary public, not being of counsel or attorney to either of the parties, nor interested in the event of the proceeding or investigation. Reasonable notice must first be given in writing by the party or his attorney proposing to take such deposition to the opposite party or his attorney of record, as either may be nearest, which notice shall state the name of the witness and the time and place of the taking of his deposition. Any person may be compelled to appear and depose, and to produce documentary evidence, in the same manner as witnesses may be compelled to appear and testify and produce documentary evidence before the Commission as hereinbefore provided.

"Every person deposing as herein provided shall be cautioned and sworn (or affirm if he so request) to testify the whole truth; and shall be carefully examined. His testimony shall be reduced to writing by the magistrate taking the deposition, or under his direction, and shall, after it has been reduced to writing, be subscribed by the deponent.

"If a witness whose testimony may be desired to be taken by deposition be in a foreign country, the deposition may be taken before an officer or person designated by the Commission, or agreed upon by the parties by stipulation in writing to be filed with Commission. All depositions must be promptly filed with the Commission.

"Witnesses whose depositions are taken pursuant to this Act, and the magistrate or other officer taking the same, shall severally be entitled to the same fees as are paid for like services in the courts of the United States." § 12.

The nature of the present proceeding, instituted pursuant to the authority conferred by that section, will appear from the following summary of the pleadings and orders in the cause:

Prior to the 14th of June, 1892, informal complaint was made to the Interstate Commerce Commission, under the provisions of the Interstate Commerce Act, that the Illinois Steel Company, a corporation of Illinois, had caused to be incorporated under the laws of that state the Calumet & Blue Island Railroad Company, the Chicago & Southeastern Railway Company of Illinois, the Joliet & Blue Island Railway Company, and the Chicago & Kenosha Railway Company, for the purpose of operating its switches and side tracks at South Chicago, Chicago, and Joliet, respectively, and engaging in traffic by a continuous shipment from cities and places without to cities and places within Illinois, in connection,

respectively, with the Baltimore & Ohio Railroad Company, the Baltimore & Ohio Southwestern Railroad Company, the Illinois Central Railroad Company, the Lake Shore & Michigan Southern Railway Company, the Chicago, Rock Island & Pacific Railway Company, the Pittsburgh, Fort Wayne & Chicago Railway Company, the Pennsylvania Company, the Pennsylvania Railroad Company, the Belt Railway Company, the Chicago & Alton Railroad Company, the Chicago Railway Transfer Company, the Atchison, Topeka & Santa Fé Railway Company, the Elgin, Joliet & Eastern Railway Company, the Chicago & Northwestern Railway Company, and the Chicago, Milwaukee & St. Paul Railway Company; that it had also caused to be incorporated under the laws of Wisconsin, the Milwaukee, Bay View & Chicago Railway Company, for the purpose of operating its switches and side tracks at or near Milwaukee, in that state, and engaging in traffic or traffic by a continuous shipment from places and cities without to cities and places within Wisconsin, in connection with the Chicago, Milwaukee & St. Paul Railway Company, and the Chicago & Northwestern Railway Company; and that said Illinois Steel Company owned and controlled the above named companies, which it caused to be incorporated under the laws of Illinois, and operated them in connection with the other companies named, "as a device for the purpose of evading the provisions of the Act to Regulate Commerce, and obtaining special, illegal, unjust, and unreasonable rates for the transportation of interstate traffic," and, by the connivance and consent of said other connecting railroad companies, in such a manner as to give the Illinois Steel Company an illegal, undue, and unreasonable preference and advantage, subjecting other persons, firms, and companies to undue and unreasonable prejudice and discrimination in the transportation of property from divers cities and places without the states of Illinois and Wisconsin to divers cities and towns within those states.

It was made to appear to the Commission that the companies so owned, controlled, and operated by the Illinois Steel Company for more than the six months then last past had been and were still engaged in the transportation of property by railroad in connection with the other companies named "under a common control, management, and arrangement for a continuous carriage or shipment" from divers cities and towns without to divers cities and towns within the states of Illinois and Wisconsin, and that none of the companies, so owned, controlled, and operated, had filed with the Commission copies of their contracts, agreements, and common arrangements with the other companies, nor their tariffs nor schedules of rates, fares, and charges as required by the Act of Congress.

The Commission, of its own motion, decided to investigate the matters set forth in said informal complaint by inquiring into the business of all of said railroad companies and the management thereof with reference as well to the alleged making of illegal, unjust, and unreasonable rates, as to the alleged unjust and illegal discrimination in favor of the Illinois Steel Company, and the failure, as

above stated, to file with the Commission the above contracts, agreements, and tariffs.

An order was thereupon made by the Commission, which recited the facts of the informal complaint made to it, and required each of the above mentioned companies to make and file in its office in Washington, a full, complete, perfect, and specific verified answer, setting forth all the facts in regard to the matters complained of and responding to the following questions:

1. Does any contract, agreement, or arrangement in writing or otherwise exist between the companies above alleged to be under the control [of] and operated by the said Illinois Steel Company and any of the other companies with reference to interstate traffic? If so, state the contract, agreement, or arrangement.

2. Or [are] any tariffs of rates and charges for the transportation of interstate property in effect between said companies above alleged to be under the control of and operated by the Illinois Steel Company and said other railroad companies? If so, what are they and what are the divisions thereof between the several carriers?

3. Have the companies above alleged to be under the control of and operated by the Illinois Steel Company received interstate traffic from any of the other carriers above mentioned during the six months last past, or have they delivered any such traffic to such other carriers during that time, for any person, firm, or company other than the Illinois Steel Company; and if so, to what amount?

The order further required all of the companies named to appear before the Commission at a named time and place in Chicago, when that body would proceed to make inquiry into and investigate the management of the said business by the carriers so ordered to appear.

Each of the companies which, according to the allegations of the petition, the Illinois Steel Company had caused to be incorporated, filed its answer with the Commission, and averred that it had in all respects complied with the obligations imposed upon it by the laws of the state and of the United States; that it was not engaged in interstate commerce within six months preceding the filing of the complaint against them; and it answered "No" to each of the above specific questions. The Calumet & Blue Island Railway Company also denied that the operation of its railways was a device to evade the provision of the Interstate Commerce Act, or had resulted in obtaining for the Illinois Steel Company special, illegal, unjust, or unreasonable rates in interstate traffic or in securing to that company illegal, undue, or unreasonable preferences.

The Commission, notwithstanding these denials, conceived it to be their duty to proceed with the investigation by the examination of witnesses and the books and papers of the corporations involved, and especially to ascertain whether the Illinois Steel Company was the owner in fact of the railroads, which it was alleged to have caused to be incorporated, and whether such incorporations were for the purpose of giving to that company

an undue and illegal preference in the transportation of its property and freight.

Among the witnesses subpoenaed to testify before the Commission was William G. Brimson, the president and manager of the five roads so incorporated in Illinois. Being asked what constituted the principal traffic of the roads, he said: "The business of these roads, except as indicated in the answers, is that of switching — switching business. We do a switching and terminal business, in that we are open to any business, for anybody's property, or persons who may locate at such place where we can go to them; mainly our business it with the Illinois Steel Company. This is the great proportion of our business." In reply to the question whether his company engaged in transportation business other than as stated by him, he said that they did not, "except the Calumet & Blue Island, as stated in our reply. On that we do engage in other business to a certain extent." Having stated that his companies did not engage in the transportation business for everybody and anybody having occasion to employ them, and that their business was limited to the above companies with which they had traffic arrangements, he was asked whether the companies of which he was president and manager were owned by the Illinois Steel Company. The witness, under the advice of counsel, refused to answer this question.

J. S. Keefe, secretary and auditor of the five roads mentioned, was examined by the Commission as a witness. He admitted that he had in his possession a book showing the names of the stockholders of the Calumet & Blue Island Railway Company, but refused, upon the demand of the Commission, to produce it. He also refused to answer the question, "Do you know, as a matter of fact, whether the Illinois Steel Company owns the greater part of the stock of these several railroads?"

William R. Stirling, the first vice president of the Illinois Steel Company, was also examined as a witness, and after stating that that company had a contract with the five railroads in question to handle the railroad business at the five "plants" of the Steel Company, refused to answer the question, "Is that the only relation which your company sustains to these railroad companies?"

On the succeeding day the Commission issued a subpoena *duces tecum*, directed to J. S. Keefe, secretary and auditor of the five railroads in question, commanding him to appear before that body, and bring with him the stock books of those companies. A like subpoena was issued to William R. Stirling, as first vice president of the Steel Company, commanding him to appear before the Commission and produce the stock books of that company. Keefe and Stirling appeared in answer to the subpoenas, but refused to produce the books or either of them so ordered to be produced.

The Commission thereupon, on the 15th day of July, 1892, presented to and filed in the court below its petition embodying the above facts, and prayed that an order be made requiring and commanding Brimson, Keefe, and Stirling to appear before that body and answer the several questions propounded by them

and which they had respectively refused to answer, and requiring Keefe and Stirling to appear and produce before the Commission the stock books above referred to as in their possession.

The answers of Brimson, Keefe, and Stirling in the present proceeding, besides insisting that the question propounded to them, respectively, were immaterial and irrelevant were based mainly upon the ground that so much of the Interstate Commerce Act as empowered the Commission to require the attendance and testimony of witnesses and the production of books, papers and documents, and authorizes the circuit court of the United States to order common carriers or persons to appear before the Commission and produce books and papers and give evidence, and to punish by process for contempt any failure to obey such order of the court, was repugnant to the Constitution of the United States.

Is the 12th section of the Act unconstitutional and void, so far as it authorizes or requires the circuit court of the United States to use their process in aid of inquiries before the Commission? The court recognizes the importance of this question, and has bestowed upon it the most careful consideration.

As the Constitution extends the judicial power of the United States to all cases in law and equity arising under that instrument or under the laws of the United States, as well as to all controversies to which the United States shall be a party (Art. 3, § 2) and as the circuit courts of the United States are capable, under the statutes defining and regulating their jurisdiction, of exerting such power in cases or controversies of that character, within the limits prescribed by Congress (25 Stat. at L. 484, chap. 866) the fundamental inquiry on this appeal is whether the present proceeding is a "case" or "controversy" within the meaning of the Constitution. The circuit court, as we have seen, regarded the petition of the Interstate Commerce Commission as nothing more than an application by an administrative body to a judicial tribunal for the exercise of its functions in aid of the execution of duties not of a judicial nature, and accordingly adjudged that this proceeding did not constitute a case or controversy to which the judicial power of the United States could be extended.

At the same time the learned court said: "Undoubtedly, Congress may confer upon a non-judicial body authority to obtain information necessary for legitimate governmental purposes, and make refusal to appear and testify before it touching matters pertinent to any authorized inquiry, an offense punishable by the courts, subject, however, to the privilege of witnesses to make no disclosures which might tend to criminate them or subject them to penalties or forfeitures. A prosecution or an action for violation of such a statute would clearly be an original suit or controversy between parties within the meaning of the Constitution, and not a mere application, like the present one, for the exercise of the judicial power in aid of a non-judicial body." *Re Interstate Commerce Commission*, 4 Inters. Com. Rep. 815, 58 Fed. Rep. 476, 480.

In other words if the Interstate Commerce Act made the refusal of a witness duly summoned

to appear and testify before the Commission in respect to a matter rightfully committed by Congress to that body for examination, an offense against the United States, punishable by fine or imprisonment, or both, a criminal prosecution or an information for the violation of such a statute would be a case or controversy to which the judicial power of the United States extended; while a direct civil proceeding, expressly authorized by an Act of Congress, in the name of the Commission, and under the direction of the Attorney General of the United States, against the witness so refusing to testify, to compel him to give evidence before the Commission touching the same matter, would not be a case or controversy of which cognizance could be taken by any court established by Congress to receive the judicial power of the United States.

This interpretation of the Constitution would restrict the employment of means to carry into effect powers granted to Congress within much narrower limits than, in our judgment, is warranted by that instrument.

The Constitution expressly confers upon Congress the power to regulate commerce with foreign nations, among the several states, and with the Indian tribes, and to make all laws necessary and proper for carrying that power into execution. Art. 1, § 8. While the completely internal commerce of a state is reserved to the state itself, because never surrendered to the general government, commerce, the regulation of which it committed by the Constitution to Congress, comprehends traffic, navigation and every species of commercial intercourse or trade between the United States, among the several states, and with the Indian tribes. *Gibbons v. Ogden*, 22 U. S. 9 Wheat. 1, 193, 194 [6: 23, 60]. "It may be doubted," this court has said, "whether any of the evils proceeding from the feebleness of the Federal government contributed more to that great revolution which introduced the present system than the deep and general conviction that commerce ought to be regulated by Congress. It is not, therefore, matter of surprise that the grant should be as extensive as the mischief, and should comprehend all foreign commerce, and all commerce among the states. To construe the power so as to impair its efficiency would tend to defeat an object, in the attainment of which the American public took, and justly took, that strong interest which arose from a full convention of its necessity." *Brown v. Maryland*, 25 U. S. 12 Wheat. 419, 446 [6: 678, 688]; *Philadelphia & S. M. SS. Co. v. Pennsylvania*, 122 U. S. 326, 346 [30: 1200, 1205], 1 Inters. Com. Rep. 308. "In the matter of interstate commerce," this court, speaking by Mr. Justice Bradley, has declared, "the United States are but one country, and are and must be subject to one system of regulations, and not to a multitude of systems." *Robbins v. Shelby County Tazng Dist.* 120 U. S. 439, 494 [30: 694, 696], 1 Inters. Com. Rep. 45. The same principle was announced by the present Chief Justice in *Stoutenburgh v. Hennick*, 129 U. S. 141, 148 [32: 687, 689].

What is the nature of the power thus expressly given to Congress, and to what extent, and under what restrictions, may it be constitutionally exerted?

This question was answered when Chief Justice Marshall said that it was the power "to prescribe the rule by which commerce is to be governed." "This power," the Chief Justice continued, "like all others vested in Congress, is complete in itself, may be exercised to its utmost extent, and acknowledges no limitations other than are prescribed in the Constitution. These are expressed in plain terms, and do not affect the questions which arise in this case, or which have been discussed at the bar. If, as has always been understood, the sovereignty of Congress, though limited to specified objects, is plenary as to those objects, the power over commerce with foreign nations and among the several states is vested in Congress as absolutely as it would be in a single government having in its constitution the same restrictions on the exercise of the power as are found in the Constitution of the United States. The wisdom and the discretion of Congress, their identity with the people, and the influence which their constituents possess at elections, are, in this, as in many other instances, as that, for example, of declaring war, the sole restraints on which they have relied to secure them from its abuse. They are the restraints on which the people must often rely solely, in all representative governments." *Gibbons v. Ogden*, 22 U. S. 9 Wheat. 1, 189, 196, 197 [6: 23, 68, 70].

Congress thus having plenary power subject to the limitations imposed by the Constitution to prescribe the rule by which commerce among the several states is to be governed, the question necessarily arises, what are the principles that should control the judiciary when determining whether a particular Act of Congress, avowedly adopted in execution of that power, is consistent with the fundamental limitations of the Constitution?

The general principle applicable to this subject was long ago announced by this court, and has been so often affirmed and applied that argument in support of it is unnecessary, even if it were possible to suggest any thought not heretofore expressed in the adjudged cases. In the great case of *McCulloch v. Maryland*, 17 U. S. 4 Wheat. 316, 421, 428 [4: 579, 605], it was said: "The sound construction of the Constitution must allow to the national legislature that discretion, with respect to the means by which the powers it confers are to be carried into execution, which will enable that body to perform the high duties assigned to it, in the manner most beneficial to the people. Let the end be legitimate, let it be within the scope of the Constitution, and all means which are appropriate, which are plainly adapted to that end, which are not prohibited, but consistent with the letter and spirit of the Constitution, are constitutional." Again: "Where the law is not prohibited, and is really calculated to effect any of the objects entrusted to the government, to undertake here to inquire into the degree of its necessity would be to pass the line which circumscribes the judicial department, and to tread on legislative ground. This court disclaims all pretensions to such a power."

Guided by these principles, we proceed to inquire whether the twelfth section of the Interstate Commerce Act, so far as it authorizes

the present proceeding, assumes to invest the circuit courts of the United States with functions that are not judicial.

It was not disputed at the bar, nor indeed can it be successfully denied, that the prohibition of unjust charges, discriminations, or preferences, by carriers engaged in interstate commerce, in respect to property or persons transported from one state to another, is a proper regulation of interstate commerce, or that the object Congress has in view by the Act in question may be legitimately accomplished by it under the power to regulate commerce among the several states. In every substantial sense such prohibition is a rule by which interstate commerce must be governed, and is plainly adapted to the object intended to be accomplished. The same observation may be made in respect to those provisions empowering the Commission to inquire into the management of the business of carriers subject to the provisions of the Act, and to investigate the whole subject of interstate commerce as conducted by such carriers, and, in that way, to obtain full and accurate information of all matters involved in the enforcement of the Act of Congress. It was clearly competent for Congress, to that end, to invest the Commission with authority to require the attendance and testimony of witnesses, and the production of books, papers, tariffs, contracts, agreements, and documents relating to any matter legally committed to that body for investigation. We do not understand that any of these propositions are disputed in this case.

Interpreting the Interstate Commerce Act as applicable, and as intended to apply, only to matters involved in the regulation of commerce, and which Congress may rightfully subject to investigation by a Commission established for the purpose of enforcing that Act, we are unable to say that its provisions are not appropriate and plainly adapted to the protection of interstate commerce from burdens that are or may be, directly and indirectly, imposed upon it by means of unjust and unreasonable discriminations, charges, and preferences. Congress is not limited in its employment of means to those that are absolutely essential to the accomplishment of objects within the scope of the powers granted to it. It is a settled principal of constitutional law that "the government which has a right to do an act, and has imposed on it the duty of performing that act, must, according to the dictates of reason, be allowed to select the means; and those who contend that it may not select any appropriate means, that one particular mode of effecting the object is excepted, take upon themselves the burden of establishing that exception." 17 U. S. 4 Wheat. 316, 409 [4: 579, 602]. The test of the power of Congress is not the judgment of the courts that particular means are not the best that could have been employed to effect the end contemplated by the legislative department. The judiciary can only inquire whether the means devised in the execution of a power granted are forbidden by the Constitution. It cannot go beyond that inquiry without entrenching upon the domain of another department of the government. That it may not do with safety to our institutions.

4 INTER R.

Union Pac. R. Co. v. United States ("Sinking Fund Cases") 99 U. S. 700, 718 [25: 496, 501].

An adjudication that Congress could not establish an administrative body with authority to investigate the subject of interstate commerce and with power to call witnesses before it, and to require the production of books, documents, and papers relating to that subject, would go far towards defeating the object for which the people of the United States placed commerce among the states under national control. All must recognize the fact that the full information necessary as a basis of intelligent legislation by Congress from time to time upon the subject of interstate commerce cannot be obtained, nor can the rules established for the regulation of such commerce be efficiently enforced, otherwise than through the instrumentality of an administrative body, representing the whole country, always watchful of the general interests, and charged with the duty not only of obtaining the required information, but of compelling by all lawful methods obedience to such rules.

It is to be observed that independently of any question concerning the nature of the matter under investigation by the Commission—however legitimate or however vital to the public interests the inquiry being conducted by that body—the judgment below rests upon the broad ground that no *direct* proceeding to compel the attendance of a witness before the Commission, or to require him to answer questions put to him, or to compel the production of books, documents or papers in his possession relating to the subject under examination, can be deemed a case or controversy of which under the Constitution, a court of the United States may take cognizance, even if such proceeding be in form judicial. And the theory upon which the judgment proceeded is applicable alike to corporations and individuals, although by the established doctrine of the courts a railroad corporation may, under legislative sanction and upon making compensation, appropriate private property for the purposes of its right of way, because and only because its road is a public highway established primarily for the convenience of the people and to subserve public objects, and, therefore, subject to governmental control. *Cherokee Nation v. Southern Kansas R. Co.* 185 U. S. 641, 657 [34: 295, 302].

What is a case or controversy to which, under the Constitution, the judicial power of the United States extends? Referring to the clause of that instrument, which extends the judicial power of the United States to all cases in law and equity arising under the Constitution, the laws of the United States, and treaties made or that shall be made under their authority, this court, speaking by Chief Justice Marshall, has said: "This clause enables the judicial department to receive jurisdiction to the full extent of the Constitution, laws, and treaties of the United States when any question respecting them shall assume such a form that the judicial power is capable of acting on it. That power is capable of acting only when the subject is submitted to it by a party who asserts his rights in the form prescribed by law. It then becomes a case, and the Consti-

tution declares that the judicial power shall extend to all cases arising under the Constitution, laws, and treaties of the United States." *Osborn v. Bank of United States*, 22 U. S. 9 Wheat. 788, 819 [8: 204, 228]. And in *Den v. Hoboken Land & Imp. Co.* 59 U. S. 18 How. 272, 284 [15: 372, 377], *Mr. Justice Curtis*, after observing that Congress cannot withdraw from judicial cognizance any matter which, from its nature, is the subject of a suit at the common law, or in equity, or admiralty, nor on the other hand, bring under judicial power a matter which, from its nature, is not a subject for judicial determination, said: "At the same time there are matters involving public rights which may be presented in such form that the judicial power is capable of acting on them and which are susceptible of judicial determination, but which Congress may or may not bring within the cognizance of the courts of the United States, as it may deem proper." So, in *Smith v. Adams*, 180 U. S. 173 [32: 897], *Mr. Justice Field*, speaking for the court, said that the terms "cases" and "controversies" in the Constitution embraced "the claims or contentions of litigants brought before the courts for adjudication by regular proceedings established for the protection or enforcement of rights, or the prevention, redress, or punishment of wrongs."

Testing the present proceeding by these principles, we are of opinion that it is one that can properly be brought under judicial cognizance.

We have before us an Act of Congress authorizing the Interstate Commerce Commission to summon witnesses and to require the production of books, papers, tariffs, contracts, agreements, and documents relating to the matter under investigation. The constitutionality of this provision—assuming it to be applicable to a matter that may be legally entrusted to an administrative body for investigation—is, we repeat, not disputed and is beyond dispute. Upon every one, therefore, who owes allegiance to the United States, or who is within its jurisdiction, enjoying the protection that its government affords, rests an obligation to respect the national will as thus expressed in conformity with the Constitution. As every citizen is bound to obey the law and to yield obedience to the constituted authorities acting within the law, this power conferred upon the Commission imposes upon any one, summoned by that body to appear and to testify, the duty of appearing and testifying, and upon any one required to produce such books, papers, tariffs, contracts, agreements, and documents, the duty of producing them, if the testimony sought, and the books, papers, etc., called for, relate to the matter under investigation, if such matter is one which the Commission is legally entitled to investigate, and if the witness is not excused, on some personal ground, from doing what the Commission requires at his hands. These propositions seem to be so clear and indisputable that any attempt to sustain them by argument would be of no value in the discussion. Whether the Commission is entitled to the evidence it seeks, and whether the refusal of the witness to testify or to produce books, papers, etc., in his possession, is or is not in 4 INTER 8.

violation of his duty or in derogation of the rights of the United States, seeking to execute a power expressly granted to Congress, are the distinct issues between that body and the witness. They are issues between the United States and those who dispute the validity of an Act of Congress and seek to obstruct its enforcement. And those issues made in the form prescribed by the Act of Congress, are so presented that the judicial power is capable of acting on them.

The question so presented is substantially, if not precisely, that which would arise if the witness was proceeded against by indictment under an Act of Congress declaring it to be an offense against the United States for any one to refuse to testify before the Commission after being duly summoned, or to produce books, papers, etc., in his possession upon notice to do so, or imposing penalties for such refusal to testify or to produce the required books, papers, and documents. A prosecution for such offense or a proceeding by information to recover such penalties would have as its real and ultimate object to compel obedience to the rightful orders of the Commission, while it was exerting the powers given to it by Congress. And such is the sole object of the present direct proceeding. The United States asserts its right, under the Constitution and laws, to have these appellees answer the questions propounded to them by the Commission, and to produce specified books, papers, etc., in their possession or under their control. It insists that the evidence called for is material in the matter under investigation; that the subject of investigation is within legislative cognizance, and may be inquired of by any tribunal constituted by Congress for that purpose. The appellees deny that any such rights exist in the general government, or that they are under a legal duty, even if such evidence be important or vital in the enforcement of the Interstate Commerce Act, to do what is required of them by the Commission. Thus has arisen a dispute involving rights or claims asserted by the respective parties to it. And the power to determine it directly, and, as between the parties, finally, must reside somewhere. It cannot be that the general government, with all the power conferred upon it by the people of the United States, is helpless in such an emergency, and is unable to provide some method, judicial in form, and *direct in its operation*, for the prompt and conclusive determination of this dispute.

As the circuit court is competent under the law by which it was ordained and established to take jurisdiction of the parties, and as a case arises under the Constitution or laws of the United States when its decision depends upon either, why is not this proceeding judicial in form and instituted for the determination or distinct issues between the parties, as defined by formal pleadings, a case or controversy for judicial cognizance, within the meaning of the Constitution? It must be so regarded, unless, as is contended, Congress is without power to provide any method for enforcing the statute or compelling obedience to the lawful orders of the Commission, except through criminal prosecutions or by civil actions to recover penalties imposed for non-com-

pliance with such orders. But no limitation of that kind upon the power of Congress to regulate commerce among the states is justified either by the letter or the spirit of the Constitution. Any such rule of constitutional interpretation, if applied to all the grants of power made to Congress, would defeat the principal objects for which the Constitution was ordained. As the issues are so presented that the judicial power is capable of acting on them finally as between the parties before the court, we cannot adjudge that the mode prescribed for enforcing the lawful orders of the Interstate Commission is not calculated to attain the object for which Congress was given power to regulate interstate commerce. It cannot be so declared unless the incompatibility between the Constitution and the Act of Congress is clear and strong. *Fletcher v. Peck*, 10 U. S. 6 Cranch, 87, 128 [8: 162, 175]. In accomplishing the objects of a power granted to it, Congress may employ any one or all the modes that are appropriate to the end in view, taking care only that no mode employed is inconsistent with the limitations of the Constitution.

We do not overlook those constitutional limitations which, for the protection of personal rights, must necessarily attend all investigations conducted under the authority of Congress. Neither branch of the legislative department, still less any merely administrative body, established by Congress, possesses, or can be invested with, a general power of making inquiry into the private affairs of the citizen. *Kilbourn v. Thompson*, 108 U. S. 168, 190 [26: 377, 386]. We said in *Boyd v. United States* 116 U. S. 616, 630 [29: 746, 751]—and it cannot be too often repeated—that the principles that embody the essence of constitutional liberty and security forbid all invasions on the part of the government and its employés of the sanctity of a man's home, and the privacies of his life. As said by Mr. Justice Field in *Re Pacific R. Commission*, 32 Fed. Rep. 241, 250, "of all the rights of the citizen, few are of greater importance or more essential to his peace and happiness than the right of personal security, and that involves, not merely protection of his person from assault, but exemption of his private affairs, books, and papers from the inspection and scrutiny of others. Without the enjoyment of this right, all others would lose half their value."

It was said in argument that the twelfth section was in derogation of those fundamental guarantees of personal rights that are recognized by the Constitution as inhering in the freedom of the citizen. It is scarcely necessary to say that the power given to Congress to regulate interstate commerce does not carry with it any power to destroy or impair those guarantees. This court has already spoken fully upon that general subject in *Counselman v. Hitchcock*, 142 U. S. 547 [35: 1110], 3 Inters. Com. Rep. 816. We need not add anything to what has been there said. Suffice it in the present case to say that as the Interstate Commerce Commission, by petition in a circuit court of the United States, seeks, upon grounds distinctly set forth, an order to compel appellees to answer particular questions and to produce certain books, papers, etc., in their possession, it was open to each of them to contend

before that court that he was protected by the Constitution from making answer to the questions propounded to him; or that he was not legally bound to produce the books, papers, etc., ordered to be produced; or that neither the questions propounded nor the books, papers, etc., called for relate to the particular matter under investigation, nor to any matter which the Commission is entitled under the Constitution or laws to investigate. These issues being determined in their favor by the court below, the petition of the Commission could have been dismissed upon its merits.

It may be proper to state in this connection that after the decision in *Counselman v. Hitchcock*, the Interstate Commerce Act was amended by an Act approved February 11, 1893, which provides "that no person shall be excused from attending and testifying, or from producing books, papers, tariffs, contracts, agreements, and documents before the Interstate Commerce Commission, or in obedience to the subpoena of the Commission, whether such subpoena be signed or issued by one or more Commissioners, or in any cause or proceeding, criminal or otherwise, based upon or growing out of any alleged violation of the Act of Congress, entitled 'An Act to Regulate Commerce,' approved February fourth, eighteen hundred and eighty-seven, or of any amendment thereof, on the ground or for the reason that the testimony or evidence, documentary or otherwise, required of him may tend to criminate him or subject him to a penalty or forfeiture. But no person shall be prosecuted or subjected to any penalty or forfeiture for or on account of any transaction, matter or thing concerning which he may testify, or produce evidence, documentary or otherwise, before said Commission, or in obedience to its subpoena, or the subpoena of either of them, or in any such case or proceeding: *Provided*. That no person so testifying shall be exempt from prosecution and punishment for perjury committed in so testifying. Any person who shall neglect or refuse to attend and testify, or to answer any lawful inquiry, or to produce books, papers, tariffs, contracts, agreements, and documents, if in his power to do so, in obedience to the subpoena or lawful requirement of the Commission, shall be guilty of an offense, and upon conviction thereof by a court of competent jurisdiction shall be punished by fine not less than one hundred dollars nor more than five thousand dollars, or by imprisonment for not more than one year, or by both such fine and imprisonment." 27 Stat. at L. 443, chap. 83. But that Act was not in force when this case was determined below. Nor does it reach the question whether a proceeding like the present one can be maintained in a circuit court of the United States.

In the course of the argument at the bar our attention was called to *Hayburn's Case*, 2 U. S. 2 Dall. 409 [1: 436], and *United States v. Ferreira*, 54 U. S. 13 How. 40, 46 [14: 42, 44], as announcing principles not in harmony with the views we have expressed in this opinion.

Hayburn's case was an application for a mandamus to be directed to the Circuit Court of the United States for the District of Pennsylvania, commanding that court to proceed in a petition by Hayburn to be put on the pen-

sion list of the United States in conformity with an Act of Congress, approved March 28, 1792, chap. 11, which provided for the settlement of the claims of widows and orphans barred by limitations previously established, and to regulate claims to invalid pensions. This court took the case under advisement, but as Congress provided in another way for the relief of invalid pensioners, no decision was made. Nevertheless, by a note to Hayburn's case, we are informed of the views expressed at the circuit by different members of this court in relation to the Act of 1792. They concurred in holding that it was not in the power of Congress to assign to the courts of the United States any duties except such as were properly judicial, and to be performed in a judicial manner; and that the duties assigned to the circuit courts were not of that description, and were not contemplated by the Act of Congress as of that character; and, consequently, that the Act could be considered as only appointing commissioners for the purposes mentioned in it by official instead of personal descriptions, which positions the judges of the court were at liberty to accept or decline.

In a note prepared by *Chief Justice Taney*, under the direction of this court, and found in 54 U. S. 13 How. 52 [14: 47], an account is given of *United States v. Todd*, which also involves the validity of the Act of 1792, so far as it imposed upon the circuit courts duties relating to pensions. And it is there stated that *Chief Justices Jay and Justice Cushing*, upon further reflection, became satisfied that the power conferred by the Act of 1792 on the circuit court as a court could not be construed as giving such power to the judges of the court as commissioners.

The same general principles were announced in *Ferreira's case*, which arose under the treaty of 1819 between Spain and the United States, and under certain acts of Congress passed to carry a particular article of that treaty into execution. The case came before this court upon appeal from a decision or award made by the district judge, acting upon a special statute authorizing him to receive and adjudicate certain claims. A motion to dismiss the appeal for want of jurisdiction in this court raised the question whether the district judge exercised judicial power, strictly speaking, under the Constitution. The motion to dismiss was sustained. *Chief Justice Taney*, referring to the statutes under which the district judge proceeded, said: "It is manifest that this power to decide upon the validity of these claims is not conferred on them as a judicial function to be exercised in the ordinary forms of a court of justice. For there is to be no suit; no parties in the legal acceptance of the term are to be made; no process to issue; and no one is authorized to appear in behalf of the United States, or to summon witnesses in the case. The proceeding is altogether *ex parte*, and all that the judge is required to do is to receive the claim when the party presents it, and to adjust it upon such evidence as he may have before him, or be able himself to obtain. But neither the evidence nor his award are to be filed in the court in which he presides, nor recorded there; but he is required to transmit

4 INTER S.

both the decision and the evidence upon which he decided to the Secretary of the Treasury; and the claim is to be paid if the Secretary thinks it just and equitable, but not otherwise. It is to be a debt from the United States upon the decision of the Secretary, but not upon that of the judge. It is too evident for argument on the subject that such a tribunal is not a judicial one, and that the Act of Congress did not intend to make it one. The authority conferred on the respective judges was nothing more than that of a commissioner to adjust certain claims against the United States; and the office of judges and their respective jurisdictions are referred to in the law merely as a designation of the persons to whom the authority is confided, and the territorial limits to which it extends. The decision is not the judgment of a court of justice. It is the award of a commission." 54 U. S. 13 How. 40, 46, 47 [14: 42, 44].

It thus appears that the Act of 1792, above referred to, attempted to impose upon the courts of the United States duties purely administrative in their character. So, also, the acts of Congress involved in *Ferreira's case* conferred no authority upon the district judge to determine finally any questions of a judicial nature, and, without requiring any petition to be filed, and without empowering the district attorney to enter an appearance for the United States, so as to make it a party to the proceeding, or to authorize a judgment against it, gave that officer the power only of adjusting, without the presence of parties, certain claims, the allowance and payment of which, after being so adjusted, were made to depend wholly upon the discretion of the Secretary of the Treasury.

Some allusion should be made in this connection to *Gordon v. United States*, 117 U. S. appx. p. 697 and *Re Sanborn*, 148 U. S. 222 [37: 429].

In *Gordon's case*, the question was whether this court had jurisdiction to review the action of the Court of Claims in respect to a claim examined and allowed in the latter court under an Act of Congress (12 Stat. at L. 65, chap. 92, §§ 5, 7, 14) which, among other things, provided that no money should be paid out of the Treasury for any claim passed upon by the Court of Claims, until after an appropriation therefor should be estimated by the Secretary of the Treasury, and an appropriation to pay it be made by Congress. Under that Act neither the Court of Claims nor this court could do anything more than certify their opinion to the Secretary of the Treasury, and it depended upon that officer, in the first place, to decide whether he would include it in his estimates of private claims, and if he decided in favor of the claimant, it rested with Congress to determine whether it would or would not make an appropriation for its payment. Neither the Court of Claims nor this court could, by any process, enforce its judgment; and whether the claim was paid or not, did not depend on the decision of either court, but upon the future action of the Secretary of the Treasury and of Congress.

The appeal of *Gordon* was dismissed upon the ground that Congress could not "authorize or require this court to express an opinion on a case where its judicial power could not be ex-

exercised, and where its judgment would not be final and conclusive upon the rights of the parties, and process of execution awarded to carry it into effect." "The award of execution," said Chief Justice Taney, "is a part and an essential part, of every judgment, passed by a court exercising judicial power. It is no judgment, in the legal sense of term, without it. Without such an award the judgment would be inoperative and nugatory, leaving the aggrieved party without a remedy. It would be merely an opinion which would remain a dead letter, and without any operation upon the rights of the parties, unless Congress should at some future time sanction it, and pass a law authorizing the court to carry its opinion into effect. Such is not the judicial power confided to this court in the exercise of its appellate jurisdiction; yet it is the whole power that the court is allowed to exercise under this Act of Congress," p. 702. See *De Groot v. United States*, 72 U. S. 5 Wall. 419 [18:700].

In Sanborn's case, above cited, the same principles were announced. That case arose under an Act of Congress of March 3, 1887 (24 Stat. at L. 505, chap. 105) one section of which provided that "when any claim or matter may be pending in any of the executive departments which involves controverted questions of fact or law, the head of such department, with the consent of the claimant, may transmit the same, with the vouchers, papers, proofs, and documents pertaining thereto, to said Court of Claims, and the same shall be there proceeded in under such rules as the court may adopt. When the facts and conclusions of law shall have been found, the court shall report its findings to the department by which it was transmitted." § 12. This court dismissed an appeal from a finding of the Court of Claims, under this Act. Referring to the cases of Hayburn, Todd, Ferreira, and Gordon, above cited, it observed: "Such a finding is not made obligatory on the department to which it is reported—certainly not so in terms—and not so, as we think, by any necessary implication. We regard the function of the Court of Claims, in such a case, as ancillary and advisory only. The finding or conclusion reached by that court is not enforceable by any process of execution issuing from the court, nor is it made by the statute the final and indisputable basis of action either by the department or by Congress," p. 226 (481).

The views we have expressed in the present case are not inconsistent with anything said or decided in those cases. They do not, in any manner, infringe upon the salutary doctrine that Congress (excluding the special cases provided for in the Constitution, as, for instance, in section two of article two of that instrument) may not impose upon the courts of the United States any duties not strictly judicial. The duties assigned to the circuit courts of the United States by the 12th section of the Interstate Commerce Act are judicial in their nature. The inquiry whether a witness before the Commission is bound to answer a particular question propounded to him, or to produce books, papers, etc., in his possession and called for by that body, is one that cannot be committed to a subordinate administrative or executive tribunal for final determination. Such

a body could not, under our system of government, and consistently with due process of law, be invested with authority to compel obedience to its orders by a judgment of fine or imprisonment. Except in the particular instances enumerated in the Constitution, and considered in *Anderson v. Dunn*, 19 U. S. 6 Wheat. 204 [5:242], and in *Kilbourn v. Thompson*, 103 U. S. 168, 190 [26:877,886], of the exercise by either house of Congress of its right to punish disorderly behavior upon the part of its members, and to compel the attendance of witnesses, and the production of papers in election and impeachment cases, and in cases that may involve the existence of those bodies, the power to impose fine or imprisonment in order to compel the performance of a legal duty imposed by the United States, can only be exerted, under the law of the land, by a competent judicial tribunal having jurisdiction in the premises. See *Whitcomb's Case*, 120 Mass. 118, 21 Am. Rep. 502, and authorities there cited.

Without the aid of judicial process of some kind, the regulations that Congress may establish in respect to interstate commerce cannot be adequately or efficiently enforced. One mode, as already suggested—the validity of which is not questioned—of compelling a witness to testify before the Interstate Commerce Commission, to answer questions propounded to him relating to the matter under investigation and which the law makes it his duty to answer, and to produce books, papers, etc., is to make his refusal to appear and answer, or to produce the documentary evidence called for, an offence against the United States punishable by fine or imprisonment. A criminal prosecution of the witness under such a statute, it is conceded, would be a case or controversy within the meaning of the Constitution, of which a court of the United States could take jurisdiction. Another mode would be to proceed by information to recover any penalty imposed by the statute. A proceeding of that character, it is also conceded, would be a case or controversy of which a court of the United States could take cognizance. If, however, Congress, in its wisdom, authorizes the Commission to bring before a court of the United States for determination the issues between it and a witness, that mode of enforcing the Act of Congress, and of compelling the witness to perform his duty, is said not to be judicial, and is beyond the power of Congress to prescribe.

We cannot assent to any view of the Constitution that concedes the power of Congress to accomplish a named result, indirectly, by particular forms of judicial procedure, but denies its power to accomplish the same result, directly, and by a different proceeding judicial in form. We could not do so without denying to Congress the broad discretion with which it is invested by the Constitution of employing all or any of the means that are appropriate or plainly adapted to an end which it has unquestioned power to accomplish, namely, the protection of interstate commerce against improper burdens and discriminations. Indeed, of all the modes that could be constitutionally prescribed for the enforcement of the regulations embodied in the Interstate Commerce Act, that provided by the 12th sec-

tion is the one which, more than any other, will protect the public against the devices of those who, taking advantage of special circumstances, or by means of combinations too powerful to be resisted and overcome by individual effort, would subject commerce among the states to unjust and unreasonable burdens.

The present proceeding is not merely ancillary and advisory. It is not, as in Gordon's case, one in which the United States seeks from the circuit court of the United States an opinion that "would remain a dead letter, and without any operation upon the rights of the parties." The proceeding is one for determining rights arising out of specified matters in dispute that concern both the general public and the individual defendants. It is one in which a judgment may be rendered that will be conclusive upon the parties until reversed by this court. And that judgment may be enforced by the process of the circuit court. Is it not clear that there are here parties on each side of a dispute involving grave questions of legal rights, that their respective positions are defined by pleadings, and that the customary forms of judicial procedure have been pursued? The performance of the duty which, according to the contention of the government, rests upon the defendants, cannot be directly enforced except by judicial process. One of the functions of a court is to compel a party to perform a duty which the law requires at his hands. If it be adjudged that the defendants are, in law, obliged to do what they have refused to do, that determination will not be merely ancillary and advisory, but, in the words of Sanborn's case, will be a "final and indisputable basis of action," as between the Commission and the defendants, and will furnish a precedent in all similar cases. It will be as much a judgment that may be carried into effect by judicial process as one for money, or for the recovery of property, or a judgment in mandamus commanding the performance of an act or duty which the law requires to be performed, or a judgment prohibiting the doing of something which the law will not sanction. It is none the less the judgment of a judicial tribunal dealing with questions judicial in their nature, and presented in the customary forms of judicial proceedings, because its effect may be to aid an administrative or executive body in the performance of duties legally imposed upon it by Congress in execution of a power granted by the Constitution.

This view is illustrated by the case of *Fong Yue Ting v. United States*, 149 U. S. 698, 728 [37: 905, 918], which arose under the Act of May 5, 1892, chap. 60, prohibiting the coming of Chinese persons into the United States. That Act provided for the arrest and removal from the United States of any person of Chinese descent unlawfully within this country, unless such persons shall establish, by affirmative proof, to the satisfaction of a justice, judge or commissioner of the United States before whom he might be brought and tried, his lawful right to remain in the United States. It also authorized the arrest of such person by any customs official, collector of internal revenue, or United States marshal, and taken before a United States judge. This

court said: "When, in the form prescribed by law, the executive officer, acting in behalf of the United States, brings the Chinese laborer before the judge, in order that he may be heard, and the facts upon which depends his right to remain in the country be decided, a case is duly submitted to the judicial power; for here are all the elements of a civil case—a complainant, defendant, and a judge—*actor, reus et iudex*. 3 Bl. Com. 25; *Osborn v. Bank of United States*, 23 U. S. 9 Wheat. 738, 819 [6: 204, 228]. No formal complaint or pleadings are required, and the want of them does not affect the authority of the judge, or the validity of the statute."

Another suggestion thrown out in argument against the validity of the 12th section of the Interstate Commerce Act, in the particular adverted to, is that the defendants are not accorded a right of trial by jury. If, as we have endeavored to show, this proceeding make a case or controversy within the judicial power of the United States, the issue whether the defendants are under a duty to answer the questions propounded to them, and to produce the books, papers, documents, etc., called for, is manifestly not one for the determination of a jury. The issue presented is not one of fact, but of law exclusively. In such a case, the defendant is no more entitled to a jury than is a defendant in a proceeding by mandamus to compel him, as an officer, to perform a ministerial duty. Of course, the question of punishing the defendants for contempt could not arise before the Commission; for, in a judicial sense, there is no such thing as contempt of a subordinate administrative body. No question of contempt could arise until the issue of law, in the circuit court, is determined adversely to the defendants and they refuse to obey, not the order of the Commission, but the final order of the court. And, in matters of contempt, a jury is not required by "due process of law." From the very nature of their institution, and that their lawful judgments may be respected and enforced, the courts of the United States possess the power to punish for contempt. And this inherent power is recognized and enforced by a statute expressly authorizing such courts to punish contempts of their authority when manifested by disobedience of their lawful writs, process, orders, rules, decrees, or commands. Rev. Stat. § 725; 1 Stat. at L. 88; 4 Stat. at L. 487; *United States v. Hudson*, 11 U. S. 7 Cranch, 32 [8: 259]; *Anderson v. Dunn*, 19 U. S. 6 Wheat. 204, 237 [5: 242, 247]; *Ex parte Robinson*, 86 U. S. 19 Wall. 505, 510 [22: 205, 207]; *Ex parte Terry*, 128 U. S. 289, 302, 303 [32: 405, 408]; *Cartwright's Case*, 114 Mass. 280, 288. Surely it cannot be supposed that the question of contempt of the authority of a court of the United States, committed by a disobedience of its orders, is triable, of right, by a jury.

We are of opinion that a judgment of the circuit court of the United States determining the issues presented by the petition of the Interstate Commerce Commission and by the answers of appellees, will be a legitimate exertion of judicial authority in a case or controversy to which, by the Constitution, the judicial power of the United States extends. And a final order by that court dismissing the petition of the

Commission, or requiring the appellees to answer the questions propounded to them, and to produce the books, papers, etc., called for, will be a determination of questions upon which a court of the United States is capable of acting and which may be enforced by judicial process. If there is any legal reason why appellees should not be required to answer the questions put to them, or to produce the books, papers, etc., demanded of them, their rights can be recognized and enforced by the court below when it enters upon the consideration of the merits of the questions presented by the petition.

In view of the conclusion reached upon the only question determined by the circuit court, what judgment shall be here entered? The case was heard below upon the petition of the Commission and the answers of the defendants. But no ruling was made in respect to the materiality of the evidence sought to be obtained from the defendants. Passing by every other question in the case, the circuit court, by its judgment, struck down so much of the

twelfth section as authorized or required the courts to use their process in aid of inquiries before the Commission. Under the circumstances, we do not feel obliged to go further at this time than to adjudge, as we now do, that that section in the particular named is constitutional, and to remand the cause that the court below may proceed with it upon the merits of the questions presented by the petition and the answers of the defendants and make such determination thereof as may be consistent with law. Any other course would, it might be apprehended, involve the exercise of original jurisdiction, and might possibly work injustice to one or the other of the parties.

For the reasons stated the judgment is reversed, and the cause is remanded for further proceedings in conformity with this opinion. Reversed.

Dissenting: Mr. Justice Brewer, The Chief Justice, Mr. Justice Jackson. Mr. Justice Field was not present at the argument of this case and took no part in the consideration or decision of it.

JOHN H. REAGAN ET AL., *Appts.*,
v.
THE FARMERS LOAN & TRUST COMPANY ET AL.

(See S. C. 154 U. S. 362, 38 L. ed. —.)

[No. 928.]

Suit against a state—jurisdiction of Federal court—state power to regulate charges by carrier—equity powers of United States court—validity of statute—courts may restrain rates fixed by a commission—equal protection of property—14th Amendment—reasonableness of rates—rates prescribed by Texas railroad commission unjust.

1. A suit to restrain the enforcement by state officers of unjust and unreasonable rates fixed for carriers by state authority is not a suit against the state, within the prohibition of the 11th Amendment, since the state is interested only in a governmental and not in a pecuniary sense.
2. The constitutionality of a state statute will not oust the jurisdiction of a Federal court in a suit between citizens of different states to prevent such wrongful administration of the statute by state officers, as will make it an illegal burden and exaction upon an individual.
3. A section of a statute prescribing penalties, and another section declaring the effect as evidence of freights fixed by commissioners may be dropped as invalid without affecting the validity of the remainder of the statute, where it appears that the prime object of the statute was the establishment of rules for the operation of railroads, and the regulation of their rates, which can be fully accomplished irrespective of those sections.
4. Although the formation of a tariff of charges for transportation by a common carrier is a legislative or ministerial rather than a judicial function, the court may decide whether or not such rates are unjust and unreasonable and such as to work a practical destruction to rights of property, and if found so to be may restrain their operation.
5. The fixing and enforcement by a railroad commission of unjust and unreasonable rates for transportation by railroad companies is an unconstitutional denial of the equal protection of the laws.
6. A schedule of rates made by railroad commissioners, being challenged as a whole, the court must either condemn or sustain it as a whole and cannot rearrange it or prepare a new schedule.
7. An injunction against the enforcement of unreasonable and unjust rates fixed by railroad commissioners must not extend to restraining the commission from proceeding to establish other rates.
8. A tariff of railroad rates fixed by a commission, which will so diminish the earnings of a road that they will not be able to pay one half the interest on its bonded debt above the operating expenses, is unjust and unreasonable, where, without waste or mismanagement in construction or operation, the road has cost far more than the amount of stock and bonds outstanding, which represent money expended in its construction, and the rates have been voluntarily decreased by the company within ten years more than 50 per cent, while under these rates the stock, representing two fifths of the value of the road, has never received a dividend, and for the last three years the earnings above operating expenses have been insufficient to pay the bonded debt.

Argued April 4, 5, 1894. Decided May 26, 1894.

APPEAL from a decree of the Circuit Court of the United States for the Western District of Texas, perpetually enjoining the International & Great Northern Railroad Company from putting or continuing in effect the rates or tariffs of the railroad commission of Texas, described in the complaint, and perpetually enjoining said railroad commission and the Attorney General of Texas, from instituting any suits for penalties under the law of Texas of April, 3, 1891, or under or by virtue of the said tariffs of said railroad commission, etc., and perpetually restraining said railroad commission from issuing any further tariffs, and decreeing that the rates and tariffs heretofore made and issued by said commission and described in the complaint are unreasonable, unfair and unjust, and cancelling the same, and declaring the same to be null and void, etc. *Reversed in part and affirmed in part.*

Statement by Mr. Justice Brewer:

On April 8, 1891, the legislature of the state of Texas passed an act to establish a railroad commission. The first section provides for the appointment and qualification of three persons to constitute the commission; the second for the organization of the commission, while the third defines the powers and duties of the commission, and is as follows:

"Sec. 3. The power and authority is hereby vested in the railroad commission of Texas, and it is hereby made its duty, to adopt all necessary rates, charges, and regulations to govern and regulate railroad freight and passenger tariffs, the power to correct abuses and prevent unjust discrimination and extortion in the rates of freight and passenger tariffs on the different railroads in this state, and to enforce the same by having the penalties inflicted as by this act prescribed through proper courts having jurisdiction.

"(a) The said commission shall have power, and it shall be its duty, to fairly and justly classify and subdivide all freight and property of whatsoever character that may be transported over the railroads of this state into such general and special classes or subdivisions as may be found necessary and expedient.

"(b) The commission shall have power, and it shall be its duty, to fix to each class or subdivision of freight a reasonable rate for each railroad subject to this act for the transportation of each of said classes and subdivisions.

"(c) The classifications herein provided for shall apply to and be the same for all railroads subject to the provisions of this act.

"(d) The said commission may fix different rates for different railroads and for different lines under the same management, or for different parts of the same lines if found necessary to do justice, and may make rates for express companies different from the rates fixed for railroads.

"(e) The said commission shall have power, and it shall be its duty, to fix and establish for all or any connecting lines of railroad in this state reasonable joint rates of freight charges for the various classes of freight and cars that may pass over two or more lines of such railroads.

"(f) If any two or more connecting railroads shall fail to agree upon a fair and just division of the charges arising from the transportation of freights, passengers or cars over their lines, the commission shall fix the *pro rata* part of such charges to be received by each of said connecting lines.

"(g) Until the commission shall make the classifications and schedules of rates as herein provided for, and afterwards if they deem it advisable, they may make partial or special classifications for all or any of the railroads subject hereto, and fix the rates to be charged by such roads therefor; and such classifications and rates shall be put into effect in the manner provided for general classifications and schedules of rates.

"(h) The commission shall have power, and it shall be its duty from time to time, to alter, change, amend, or abolish any classification or rate established by it when deemed necessary; and such amended, altered, or new classifications or rates shall be put into effect in the same manner as the originals.

"(i) The commission may adopt and enforce such rules, regulations, and modes of procedure as it may deem proper to hear and determine complaints that may be made against the classifications or the rates, the rules, regulations, and determinations of the commission.

"(j) The commission shall make reasonable and just rates of charges for each railroad subject hereto for the use or transportation of loaded or empty cars on its road; and may establish for each railroad or for all railroads alike reasonable rates for the storing and handling of freight and for the use of cars not unloaded after forty eight hours' notice to the consignee, not to include Sundays.

"(k) The commission shall make and establish reasonable rates for the transportation of passengers over each or all of the railroads subject hereto, which rates shall not exceed the rates fixed by law. The commission shall have power to prescribe reasonable rates, tolls, or charges for all other services performed by any railroad subject hereto."

The first paragraph of the fourth section is in these words:

"Sec. 4. Before any rates shall be established under this act, the commission shall give the railroad company to be affected thereby ten days' notice of the time and place when and where the rates shall be fixed; and said railroad company shall be entitled to be heard at such time and place, to the end that justice may be done; and it shall have process to enforce the attendance of its witnesses. All process herein provided for shall be served as in civil cases."

The remaining paragraphs give power to adopt rules of procedure. The fifth, sixth, and seventh sections are as follows:

"Sec. 5. In all actions between private parties and railway companies brought under this law, the rates, charges, orders, rules, regulations, and classifications prescribed by said commission before the institution of such action shall be held conclusive, and deemed and accepted to be reasonable, fair, and just, and in such respects shall not be controverted

therein until *finally found* otherwise in a direct action brought for that purpose in the manner prescribed by sections 6 and 7 hereof.

"Sec. 6. If any railroad company or other party at interest be dissatisfied with the decision of any rate, classification, rule, charge, order, act, or regulation adopted by the commission, such dissatisfied company or party may file a petition setting forth the particular cause or causes of objection to such decision, act, rate, rule, charge, classification, or order, or to either or all of them, in a court of competent jurisdiction in Travis county, Texas, against said commission as defendant. Said action shall have precedence over all other causes on the docket of a different nature, and shall be tried and determined as other civil causes in said court. Either party to said action may appeal to the appellate court having jurisdiction of said cause, and said appeal shall be at once returnable to said appellate court, at either of its terms, and said action so appealed shall have precedence in said appellate court of all causes of a different character therein pending: *Provided*, That if the court be in session at the time such right of action accrues, the suit may be filed during such term and stand ready for trial after ten days' notice.

"Sec. 7. In all trials under the foregoing section the burden of proof shall rest upon the plaintiff, who must show by clear and satisfactory evidence that the rates, regulations, orders, classifications, acts, or charges complained of are unreasonable and unjust to it or them."

Sections 8, 9, 10, 11, 12, and 13 contain special provisions which are not material to the consideration of any question presented in this case.

Section 14 reads:

"Sec. 14. If any railroad company subject to this act, or its agent or officer, shall hereafter charge, collect, demand or receive from any person, company, firm or corporation a greater rate, charge, or compensation than that fixed and established by the railroad commission for the transportation of freight, passengers, or cars, or for the use of any car on the line of its railroad, or any line operated by it, or for receiving, forwarding, handling, or storing any such freight or cars, or for any other service performed or to be performed by it, such railroad company and its said agent and officer shall be deemed guilty of extortion, and shall forfeit and pay to the state of Texas a sum not less than \$100 nor more than \$5000."

Section 15 defines unjust discrimination, and imposes a penalty of not less than \$500 nor more than \$5000 upon any railroad company violating any provision of the section.

Section 16 is leveled against officers and agents of railroads, and imposes a penalty of not less than \$100 nor more than \$1000 for certain offenses denounced therein.

Section 17 declares that any railroad company violating the provisions of the act shall be liable to the persons injured thereby for the damages sustained in consequence of such violation, and in case it is guilty of extortion or discrimination, as defined in the act, shall pay, in addition to such damages to the person

injured, a penalty of not less than \$125 nor more than \$500.

In sections 18 and 19 are further provisions as to penalties. The remaining sections, 20 to 24, inclusive, contain matter of detail which is unimportant in this case.

Three of the plaintiffs in error, Reagan, McLean, and Foster, were duly appointed and qualified as members of said railroad commission, and organized it on the 10th day of June, 1891. The other plaintiff in error, Culberson, is the attorney general of the state, who, by section 19 of the act, was charged with the duty of instituting suits in the name of the state for the recovery of all the penalties prescribed by the act, excepting those recoverable by individuals under the authority of section 17.

After the commission had organized on June 10, it proceeded to establish certain rates for the transportation of goods over the railroads in the state, and also certain regulations for the management of such transportation. Thereafter, on April 30, 1892, the Farmers' Loan & Trust Company filed its bill in the Circuit Court of the United States for the Western District of Texas, making as defendants the railroad commissioners, the attorney general, the International & Great Northern Railroad Company, and Thomas M. Campbell, the receiver thereof, duly appointed by the district court of Smith county, Texas. That bill, which is too long to be copied in full, alleged that the plaintiff was the trustee in a trust deed executed by the railroad company on the 15th day of June, 1881, to secure a second series of bonds, aggregating \$7,054,000, bearing interest at the rate of 6 per cent per annum; and that there was a prior issue of bonds to the amount of \$7,954,000, secured by a conveyance to John S. Kennedy and Samuel Sloan, as trustees. It then set forth the railroad commission act heretofore referred to, or so much thereof as was deemed material, the proceedings of the commission, and the notices that were given to the railroad company, and attached as exhibits the several orders prescribing rates and regulations. It also averred generally that such rates were unreasonable and unjust, set forth certain specific facts which it claimed established the injustice and unreasonableness of those rates, and prayed a decree restraining the commission from enforcing those rates, or any other rates, and also restraining the attorney general from instituting any suits to recover penalties for failing to conform to such rates and obey such regulations. The International & Great Northern Railroad Company appeared, filed an answer and also a cross bill similar in its scope and effect to the bill filed by the plaintiff, and praying substantially the same relief. The railroad commission and the attorney general at first filed answers, but, after a certain amount of testimony had been taken (of the nature and extent of which we are not advised, inasmuch as it is not preserved in the record) they withdrew their answers and filed demurrers, leave being given at the same time to the complainant and cross complainant to amend the bill and cross bill before the filing of the demurrer. The amendments to the bill and cross bill were similar, and contained

allegations more in detail of the losses in revenue sustained by the company through the enforcement of the tariffs, and the average reduction caused by such tariffs in the rate theretofore existing; and also setting forth certain contract rights under an act of the legislature of the state of Texas, passed on February 7, 1883. Thereafter the cause was submitted to the court on the bills and cross bills and demurrers, and, on March 23, 1893, a decree was entered in favor of the plaintiff as follows:

"This cause having been set down for final hearings on the pleadings and evidence, and being called for hearing thereon, the defendants John H. Reagan, William P. McLean, L. L. Foster, and Charles A. Culberson presented their motion, on file herein, for leave to withdraw their answers and file demurrers, which motion was granted conditioned upon the said defendants paying all costs of taking depositions and evidence, herein against them to be taxed, and for which execution may issue, and on condition that the complainant and cross complainant have leave to amend before the filing of the demurrers of the said defendants, which leave was granted, and whereupon said amendments were filed, and the demurrers of the said defendants were filed to the original bill of complaint and cross-bill in this cause, as also to all amendments thereto, and were, by complainant and cross complainant, set down for argument by consent, and were by all parties forthwith submitted; and thereupon, in consideration thereof, it was ordered, adjudged, and decreed that said demurrers be, and the same are hereby, overruled: and the defendants John H. Reagan, William P. McLean, L. L. Foster, and Charles A. Culberson having entered of record their refusal to make further answer, and the fact that they stood upon their demurrers, and all parties submitting the cause for final decree, it is now, upon consideration thereof, ordered, adjudged, and decreed that the bill of complaint as amended, and the cross bill of complaint as amended, in the above entitled cause, be, and the same are hereby, sustained and taken for confessed. And the said cause coming on further to be heard upon the bill of complaint herein as amended, and upon the answer of the defendant railroad company thereto, confessing the same, it is further ordered, adjudged, and decreed as follows, to wit:

"First. That the injunctions heretofore issued in this cause be, and the same are hereby, made perpetual, and accordingly,

"Second. That defendant, the International & Great Northern Railroad Company be, and it is hereby, perpetually enjoined, restrained, and prohibited from putting or continuing in effect the rates, tariffs, circulars, or orders of the railroad commission of Texas, or either or any of them, as described in the bill of complaint herein and in 'Exhibit C' thereto and therewith filed, and from charging or continuing to charge the rates specified in said tariffs, circulars, or orders, or either or any of them.

"Third. It is further ordered, adjudged, and decreed that the defendants, the railroad commission of Texas and the defendants, John H. Reagan, William P. McLean, and L. L. Foster,

acting as the railroad commission of Texas, and their successors in office, and the defendant, Charles A. Culberson, acting as attorney general of the state of Texas, and his successors in office, be, and they are hereby, perpetually enjoined, restrained, and prohibited from instituting or authorizing or directing any suit or suits, action or actions, against the defendant railroad company for the recovery of any penalties under and by virtue of the provisions of the act of the legislature of the state of Texas, approved April 8, 1891, and fully described in the bill of complaint; or under or by virtue of any of the said tariffs, orders, or circulars of the said railroad commission of Texas, or any or either of them, or under or by virtue of the said act and the said tariffs, orders, or circulars of said railroad commission, or any or either of them combined, and said defendants Reagan, McLean and Foster and the railroad commission of Texas are further perpetually restrained from certifying any copy or copies of any of said orders, tariffs, or circulars, or from delivering, or causing or permitting to be delivered, certified copies of any of said orders, tariffs, or circulars to the said Culberson or any other party, and from furnishing the said Culberson, or any other party, any information of any character for the purpose of inducing, enabling, or aiding him or any other party to institute or prosecute any suit or suits against the said defendant railroad company for the recovery of any penalty or penalties under the said act.

"Fourth. It is further ordered, adjudged, and decreed that the said railroad commission of Texas and the said Reagan, McLean and Foster be perpetually enjoined, restrained, and prohibited from making, issuing, or delivering to the said railroad company, or causing to be made, issued, or delivered to it, any further tariff or tariffs, circular or circulars, order or orders.

"Fifth. It is further ordered, adjudged, and decreed that all other individuals, persons, or corporations be, and they are hereby, perpetually enjoined, restrained, and prohibited from instituting or prosecuting any suit or suits against the said railroad company for the recovery of any damages, overcharges, penalty, or penalties, under or by virtue of the said act or any of its provisions, or under and by virtue of the said tariffs, orders, or circulars of the said railroad commission of Texas, or any or either of them, or under and by virtue of the said act and the said tariffs, orders, and circulars, or any or either of them combined.

"Sixth. It is further ordered, adjudged, and decreed that all rates, tariffs, circulars, and orders heretofore made and issued by said commission, and fully described in 'Exhibit C' to the bill of complaint herein, be, and they are hereby, declared to be unreasonable, unfair, and unjust as to complainant and cross complainant, and they are hereby canceled and declared to be null, void, and of no effect.

"Seventh. It is further ordered, adjudged, and decreed that all costs herein be taxed against said defendants Reagan, McLean, Culberson, and Foster and the railroad commission of Texas, and that execution may issue therefor."

From that decree the railroad commission and the attorney general have appealed to this court.

Messrs. Charles A. Culberson, Atty. Gen. of Texas, Henry C. Coke and W. S. Simkins, for appellants:

This being a suit by a citizen of the state of New York against the attorney general and the railroad commission, it is in effect a suit against the state of Texas inhibited by the 11th Amendment to the Constitution of the United States.

Ex parte Ayers, 128 U. S. 443 (81: 216); *Penoyer v. McConnaughey*, 140 U. S. 10 (85: 365); *Re Tyler*, 149 U. S. 190 (87: 697); *Rensselaer & S. R. Co. v. Bennington & R. R. Co.* 18 Fed. Rep. 617; *McWhorter v. Pensacola & A. R. Co.* 2 L. R. A. 504, 24 Fla. 417.

The law does not deny the right of trial by jury. If such were the case it would not render it objectionable. Trial by jury is not essential to due process of law.

Walker v. Saurinet, 92 U. S. 90 (23: 678); *Kennard v. Louisiana*, 92 U. S. 480 (23: 478); *Hurtado v. California*, 110 U. S. 538 (28: 237); *State v. Whisner*, 35 Kan. 275; *Janes v. Reynolds*, 2 Tex. 252; *Reagh v. Spann*, 8 Stew. (Ala.) 108.

The penalties denounced by the statute are not immoderate or excessive.

O'Neil v. State, 58 Vt. 140, 56 Am. Rep. 557, 144 U. S. 381 (86: 455); *Burlington, C. R. & N. R. Co. v. Dey*, 82 Iowa, 341; *Chicago & N. W. R. Co. v. Dey*, 2 Inters. Com. Rep. 325, 1 L. R. A. 744, 85 Fed. Rep. 877.

The legislature has the authority to establish courts inferior to the supreme court and to allot and distribute its jurisdiction as it may deem proper.

Atlantic Exp. Co. v. Wilmington & W. R. Co. 18 L. R. A. 393, 111 N. C. 463.

By section 22 of the act its provisions are expressly limited to the transportation of passengers, freight and cars between points within this state and the rates fixed are also thus limited. In the United States all commerce is subject to regulation, interstate commerce by Congress and internal commerce by the states.

Stone v. Farmers Loan & T. Co. 116 U. S. 334 (29: 645); *Gloucester Ferry Co. v. Pennsylvania*, 114 U. S. 215 (29: 166), 1 Inters. Com. Rep. 382; *Hatterman v. Western U. Teleg. Co.* 127 U. S. 411, (32: 229), 2 Inters. Com. Rep. 59; *Kentucky & I. Bridge Co. v. Louisville & N. R. R. Co.* 2 Inters. Com. Rep. 351, 37 Fed. Rep. 618.

Traffic arrangements and competitive conditions cannot take from the state its right to regulate domestic commerce.

Chicago, B. & Q. R. Co. v. Dey, 38 Fed. Rep. 663.

If such regulation can be said to affect interstate commerce in any way it is incidentally and so remotely as not to amount to a regulation of such commerce.

Picklen v. Shelby County Taxing Dist. 145 U. S. 24 (36: 601), 4 Inters. Com. Rep. 79; *Lehigh Valley R. Co. v. Pennsylvania*, 145 U. S. 192 (36: 673), 4 Inters. Com. Rep. 87; *Louisville & N. R. Co. v. Tennessee R. Co.* 19 Fed. Rep. 699.

A regulation of commerce, by which the revenue derived from the use of property

clothed with a public trust is reduced, is not a taking of property for public use.

Varner v. Martin, 21 W. Va. 534; *Memphis Freight Co. v. Memphis*, 4 Coldw. 419; *Jenal v. Green Island Draining Co.* 12 Neb. 163; *Sholl v. German Coal Co.* 118 Ill. 427, 59 Am. Dec. 379; *Re Eureka Basin Warehouse & Mfg. Co.* 96 N. Y. 42; *Gilmer v. Lime Point*, 18 Cal. 239.

Sections 1 and 15 of an act of the legislature of Texas alleged to have been passed February 7, 1854, constitutes no contract between the railroad company, the state and bondholders.

Pennsylvania R. Co. v. Miller, 132 U. S. 75 (82: 267); *Chicago, M. & St. P. R. Co. v. Minnesota*, 134 U. S. 454 (33: 978), 3 Inters. Com. Rep. 209; *Dows v. Chicago*, 78 U. S. 11 Wall. 112 (20: 67); *Cross v. Del Valle*, 68 U. S. 1 Wall. 5 (17: 515); *Milwaukee & M. R. Co. v. Milwaukee & St. P. R. Co.* 78 U. S. 6 Wall. 742 (18: 856); *Bound v. South Carolina R. Co.* 47 Fed. Rep. 33; *Dill v. Shahan*, 25 Ala. 694, 60 Am. Dec. 540; *Wetmore v. Fiske*, 15 R. I. 354.

The act approved March 10, 1875, authorizing the consolidation, contains no provision in reference to rates.

Tomlinson v. Branch, 82 U. S. 15 Wall. 460 (21: 159); *Beach, Railways*, §§ 553, 556, 557.

The act of the legislature of the state of Texas, approved April 8, 1891, creating the railroad commission and defining its powers and duties, is valid and constitutional.

Den v. Hoboken Land & Imp. Co. 59 U. S. 18 How. 280 (15: 376).

Though "due process of law" generally implies and includes *actor, reus, judex*, regular allegations, opportunity to answer, and a trial according to some settled course of judicial proceeding (2 Coke Inst. 47, 50; *Hoke v. Henderson*, 15 N. C. 15, 25 Am. Dec. 677; *Taylor v. Porter*, 4 Hill, 146, 40 Am. Dec. 274; *Van Zant v. Waddel*, 2 Yerg. 280; *State Bank v. Cooper*, 2 Yerg. 599; *Jones v. Perry*, 10 Yerg. 59, 30 Am. Dec. 430; *Greene v. Briggs*, 1 Curt. 811) yet this is not universally true.

Paulsen v. Portland, 149 U. S. 41 (37: 641); *San Mateo County v. Southern Pac. R. Co.* ("Railroad Tax Cases,") 18 Fed. Rep. 751; *Bartlett v. Wilson*, 59 Vt. 35; *Eames v. Savage*, 77 Me. 221, 53 Am. Dec. 751; *Weimer v. Buxbury*, 30 Mich. 211; *Re Ryers*, 72 N. Y. 10, 28 Am. Rep. 88; *People v. Smith*, 21 N. Y. 596; *Re Union Elec. R. Co.* 2 L. R. A. 359, 112 N. Y. 74; *Baltimore v. Scharf*, 54 Md. 517; *Baltimore Belt R. Co. v. Baltzell*, 75 Md. 99; *Budd v. New York*, 143 U. S. 517 (36: 247), 4 Inters. Com. Rep. 45; *McMillen v. Anderson*, 95 U. S. 41 (24: 335); *Burlington, C. R. & N. R. Co. v. Dey*, 8 Iowa, 339.

Due process of law in each particular case means such an exertion of the powers of government as the settled maxims of law permit and sanction and under such safeguards for the protection of individual rights as those maxims prescribe for the class of cases to which the one in question belongs.

Cooley, Const. Lim. (6th ed.) 434; *Lewis Em. Dom.* § 865; *Davidson v. New Orleans*, 96 U. S. 105-107 (24: 620); *Hagar v. Reclamation Dist. No. 108*, 111 U. S. 706 (28: 573); *Stuart v. Palmer*, 74 N. Y. 184, 30 Am. Rep. 239; *People v. O'Brien*, 2 L. R. A. 255, 111 N. Y. 1.

The general rule is that the method pursued should be appropriate to the case, adapted to the end to be attained, just to the parties, with notice and an opportunity to be heard before an appropriate and impartial tribunal.

Cooley, Const. Lim. (6th ed.) 694, 695; *Mills*, Em. Dom. §§ 84, 85; *Lewis*, Em. Dom. § 318; *Buffalo Bayou*, B. & C. R. Co. v. *Ferris*, 26 Tex. 599; *Rhine v. McKinney*, 58 Tex. 391; *Menges v. Albany*, 56 N. Y. 374.

Argument is unnecessary to show that railroad commissions are peculiarly appropriate tribunals to fix and establish rates. It is universally accepted law.

Stone v. Farmers Loan & T. Co. 116 U. S. 307 (29: 686); *Chicago, M. & St. P. R. Co. v. Minnesota*, 134 U. S. 418 (38: 970), 3 Inters. Com. Rep. 209; *Chicago & G. T. R. Co. v. Wellman*, 143 U. S. 839 (36: 176); *Tilley v. Savannah, F. & W. R. Co.* 5 Fed. Rep. 658; *Chicago & N. W. R. Co. v. Dey*, 2 Inters. Com. Rep. 325, 1 L. R. A. 744, 35 Fed. Rep. 873; *People v. Harper*, 91 Ill. 366; *State v. Chicago, M. & St. P. R. Co.* 83 Minn. 281; *Georgia R. Co. v. Smith*, 70 Ga. 694; *Stone v. Yazoo & M. V. R. Co.* 62 Miss. 607, 52 Am. Dec. 193; *McWhorter v. Pensacola & A. R. Co.* 2 L. R. A. 504, 24 Fla. 417; *Wellman v. Chicago & G. T. R. Co.* 88 Mich. 592; *State v. Fremont & E. M. V. R. Co.* 22 Neb. 313; *Atlantic Exp. Co. v. Wilmington & W. R. Co.* 18 L. R. A. 898, 111 N. C. 463.

In all such cases, where not in conflict with the state constitution, the findings of the board of commissioners or other tribunal may be made final and conclusive.

Mills, Em. Dom. § 322; *Lewis*, Em. Dom. §§ 520, 536; 2 Dill. Mun. Corp. § 619; *Ex parte Cook*, 49 Cal. 403; *Rhoads v. Cushman*, 45 Ind. 85; *Emery v. Bradford*, 29 Cal. 85; *Houston T. & B. R. Co. v. Randolph*, 24 Tex. 383; *Re Fowler*, 53 N. Y. 63; *Williams v. School Dist. No. 6*, 38 Vt. 279; *Norfolk S. R. Co. v. Ely*, 95 N. C. 77; *Passavant v. United States*, 148 U. S. 219 (37: 428); *Hilton v. Merritt*, 110 U. S. 97 (28: 83); *Quinby v. Conlan*, 104 U. S. 425 (26: 802); *Ex parte Fassett*, 142 U. S. 479 (35: 1087); *Fong Yue Ting v. United States*, 149 U. S. 714 (37: 918); *Cooley*, Taxn. 528, 529.

The railroad commission is a special tribunal peculiarly adapted to discharge the duties devolved upon it and invested with legislative and judicial or, certainly, quasi judicial powers, which are to be exercised after the manner of the legislature and the courts.

Tilley v. Savannah, F. & W. R. Co. 5 Fed. Rep. 659; *Re County Seat of Linn County*, 15 Kan. 500; *People v. Turner*, 117 N. Y. 227; *Ballard v. Thomas*, 19 Gratt. 14; *State v. Jersey City*, 35 N. J. L. 381; *Arrowsmith v. Harmoning*, 118 U. S. 195 (30: 248); *Kelly v. Pittsburgh*, 104 U. S. 78 (26: 658); *Wellman v. Chicago & G. T. R. Co.* 88 Mich. 624; *Chicago, M. & St. P. R. Co. v. Minnesota*, 134 U. S. 460 (38: 982), 3 Inters. Com. Rep. 209.

Statutes that are constitutional in part only will be upheld so far as they are not in conflict with the Constitution, provided the allowed and prohibited parts are severable.

Keokuk N. L. Puckett Co. v. Keokuk, 95 U. S. 89 (24: 381); *Allen v. Louisiana*, 108 U. S. 83 (26: 819); *Little Rock & Ft. S. R. Co. v. Worthen*, 120 U. S. 102 (30: 590); *Florida Cent. R. Co. v. Schutte*, 108 U. S. 142 (26: 835); *Well v. Calhoun*, 25 Fed. Rep. 873.

When rates are established either by the legislature or a commission, whether they are reasonable is a legislative or administrative question, and not ordinarily the subject of judicial investigation and determination.

Chicago, M. & St. P. R. Co. v. Minnesota, 134 U. S. 460 (38: 982), 3 Inters. Com. Rep. 209; *Baltimore & O. R. Co. v. Maryland*, 88 U. The Texas act is unconstitutional.

Marx v. Hanthorn, 148 U. S. 172 (37: 410); *Pensacola & A. R. Co. v. State*, 8 L. R. A. 661, 25 Fla. 310, 37 Am. & Eng. R. Cas. 579.

The commission's rates are confiscatory.

Messrs. Alexander G. Cochran, Winslow S. Pierce and R. S. Lovett, for the International & Great Northern Railroad Company, Cross, complainant and appellee.

Mr. Justice Brewer delivered the opinion of the court:

The questions in this case are of great importance, and have been most ably and satisfactorily discussed by counsel for the respective parties.

We are met at the threshold with an objection that this is, in effect, a suit against the state of Texas, brought by a citizen of another state, and, therefore, under the 11th Amendment to the Constitution, beyond the jurisdiction of the Federal court. The question as to when an action against officers of a state is to be treated as an action against the state has been of late several times carefully considered by this court, especially in the cases of *Ex parte*

Ayers, 128 U. S. 443 [31: 216], by *Mr. Justice Matthews*, and *Pennoy v. McConaughy*, 140 U. S. 1 [35: 363], by *Mr. Justice Lamar*. In the former of these cases it was said (p. 505 [239]):

"To secure the manifest purposes of the constitutional exemption guaranteed by the 11th Amendment requires that it should be interpreted, not literally and too narrowly, but fairly, and with such breadth and largeness as effectually to accomplish the substance of its purpose. In this spirit it must be held to cover, not only suits brought against a state by name, but those also against its officers, agents, and representatives, where the state, though not named as such, is, nevertheless, the only real party against which alone in fact the relief is asked, and against which the judgment or decree effectively operates."

And in the latter (p. 9 [865]):

"It is well settled that no action can be maintained in any Federal court by the citizens of one of the states against a state, without its consent, even though the sole object of such suit be to bring the state within the operation of the constitutional provision which provides that 'no state shall pass any law impairing the obligation of contracts.' This immunity of a state from suit is absolute and unqualified, and the constitutional provision securing it is not to be so construed as to place the state within the reach of the process of the court. Accordingly, it is equally well settled that a suit against the officers of a state, to compel them to do the acts which constitute a performance by it of its contracts, is, in effect, a suit against the state itself.

"In the application of this latter principal, two classes of cases have appeared in the decisions of this court, and it is in determining to which class a particular case belongs that differing views have been presented.

"The first class is where the suit is brought against the officers of the state, as representing the state's action and liability, and thus making it, though not a party to the record, the real party against which the judgment will so operate as to compel it to specifically perform its contracts. *Ex parte Ayers*, 128 U. S. 443 [31: 216]; *Louisiana v. Jumel*, 107 U. S. 711 [27: 448]; *Antoni v. Greenhow*, 107 U. S. 769 [27: 468]; *Cunningham v. Macon & B. R. Co.* 109 U. S. 446 [27: 992]; *Hagood v. South-ern*, 117 U. S. 52 [29: 805].

"The other class is where a suit is brought against defendants who, claiming to act as officers of the state, and under the color of an unconstitutional statute, commit acts of wrong and injury to the rights and property of the plaintiff acquired under a contract with the state. Such suit, whether brought to recover money or property in the hands of such defendants, unlawfully taken by them in behalf of the state, or for compensation in damages, or, in a proper case where the remedy at law is inadequate, for an injunction to prevent such wrong and injury, or for a mandamus, in a like case, to enforce upon the defendant the performance of a plain, legal duty, purely ministerial—is not, within the meaning of the 11th Amendment, an action against the state. *Osborn v. Bank of United States*, 23 U. S. 9 Wheat. 738 [6: 204]; *Davis v. Gray*, 33 U. S. 16 Wall. 208 [21: 447]; *Tomlinson v. Branch*,

82 U. S. 15 Wall. 480 [21: 189]; *Litchfield v. Webster County*, 101 U. S. 778 [25: 925]; *Allen v. Baltimore & O. R. Co.* 114 U. S. 811 [29: 200]; *Louisiana Board of Liquidation v. McComb*, 92 U. S. 531 [23: 623]; *Pindecker v. Greenhoe*, 114 U. S. 270 [29: 185]."

Appellants invoke the doctrines laid down in these two quotations, and insist that this action cannot be maintained because the real party against which alone in fact the relief is asked and against which the judgment or decree effectively operates is the state, and also because the statute under which the defendants acted and proposed to act is constitutional, and that the action of state officers under a constitutional statute is not subject to challenge in the Federal court. We are unable to yield our assent to this argument. So far from the state being the only real party in interest, and upon whom alone the judgment effectively operates, it has in a pecuniary sense no interest at all. Going back of all matters of form, the only parties pecuniarily affected are the shippers and the carriers, and the only direct pecuniary interest which the state can have arises when it abandons its governmental character and, as an individual, employs the railroad company to carry its property. There is a sense, doubtless, in which it may be said that the state is interested in the question, but only a governmental sense. It is interested in the well-being of its citizens, in the just and equal enforcement of all its laws; but such governmental interest is not the pecuniary interest which causes it to bear the burden of an adverse judgment. Not a dollar will be taken from the treasury of the state, no pecuniary obligation of it will be enforced, none of its property affected by any decree which may be rendered. It is not nearly so much affected by the decree in this case as it would be by an injunction against officers staying the collection of taxes, and yet a frequent and unquestioned exercise of jurisdiction of courts, state and Federal, is in restraining the collection of taxes, illegal in whole or in part.

Neither will the constitutionality of the statute, if that be conceded, avail to oust the Federal court of jurisdiction. A valid law may be wrongfully administered by officers of the state, and so as to make such administration an illegal burden and exaction upon the individual. A tax law, as it leaves the legislative hands, may not be obnoxious to any challenge, and yet the officers charged with the administration of that valid tax law may so act under it in the matter of assessment or collection as to work an illegal trespass upon the property rights of the individual. They may go beyond the powers thereby conferred, and when they do so the fact that they are assuming to act under a valid law will not oust the courts of jurisdiction to restrain their excessive and illegal acts. In *Cunningham v. Macon & B. R. Co.* 109 U. S. 446, 452 [27: 992, 994], it was said:

"Another class of cases is where an individual is sued in tort for some act injurious to another in regard to person or property, to which his defense is that he has acted under the orders of the government.

"In these cases he is not sued as, or because he is, the officer of the government, but as an 4 INTER 8.

individual, and the court is not ousted of jurisdiction because he asserts authority as such officer. To make out his defense he must show that his authority was sufficient in law to protect him. See *Mitchell v. Harmony*, 54 U. S. 18 How. 115 [14: 75]; *Bates v. Clark*, 95 U. S. 204 [24: 471]; *Meigs v. McClung*, 18 U. S. 9 Cranch, 11 [8: 639]; *Wilcox v. Jackson*, 38 U. S. 18 Pet. 498 [10: 284]; *Brown v. Huger*, 62 U. S. 21 How. 805 [16: 125]; *Grisar v. McDowell*, 73 U. S. 6 Wall. 863 [18: 863].

Nor can it be said in such a case that relief is obtainable only in the courts of the state. For it may be laid down as a general proposition that, whenever a citizen of a state can go into the courts of the state to defend his property against the illegal acts of its officers, a citizen of another state may invoke the jurisdiction of the Federal courts to maintain a like defense. A state cannot tie up a citizen of another state, having property rights within its territory invaded by unauthorized acts of its own officers, to suits for redress in its own courts. Given a case where a suit can be maintained in the courts of the state to protect property rights, a citizen of another state may invoke the jurisdiction of the Federal courts. *Mercer County Supra. v. Cowles*, 74 U. S. 7 Wall 118 [19: 86]; *Lincoln County v. Luning*, 133 U. S. 529 [33: 766]; *Chicot County v. Sherwood*, 148 U. S. 529 [37: 546].

We need not, however, rest on the general powers of a Federal court in this respect for in the act before us express authority is given for a suit against the commission to accomplish that which was the specific object of the present suit. Section 6 provides that any dissatisfied "railroad company, or other party at interest, may file a petition" "in a court of competent jurisdiction in Travis county, Texas, against said commission as defendant." The language of this provision is significant. It does not name the court in which the suit may be brought. It is not a court of Travis county, but in Travis county. The language differing from that which ordinarily would be used to describe a court of the state was selected apparently in order to avoid the objection of an attempt to prevent the jurisdiction of the Federal courts. The Circuit Court for the Western District of Texas is "a court of competent jurisdiction in Travis county. Not only is Travis county within the territorial limits of its jurisdiction, but also Austin, in that county, is one of the places at which the court is held. 23 Stat. at L. 35. It comes, therefore, within the very terms of the act. It cannot be doubted that a state, like any other government, can waive exemption from suit. Were this in terms a suit against the state, if by express statute the state had waived its exemption and consented that suit might be brought against it by name in any court of competent jurisdiction in Travis county, it might well be argued that thereby it consented to a suit, brought by a citizen of another state, in the Circuit Court of the United States for the Western District of Texas, sitting in Travis county, on the ground that the limitations of the 11th Amendment to the Federal Constitution simply create a personal privilege which can at any time be waived by the state. However, it is unnecessary to go so far as that, for

this cannot, for the reasons heretofore indicated, in any fair sense be considered a suit against the state.

Still another matter is worthy of note in this direction. In the famous *Dartmouth College Case*, 17 U. S. 4 Wheat. 518 [4: 629], it was held that the charter of a corporation is a contract protected by that clause of the National Constitution, which prohibits a state from passing any law impairing the obligation of contracts. The International & Great Northern Railroad Company is a corporation created in the state of Texas. The charter which created it is a contract whose obligations neither party can repudiate without the consent of the other. All that is within the scope of this contract need not be determined. Obviously, one obligation assumed by the corporation was to construct and operate a railroad between the termini named; and on the other hand one obligation assumed by the state was that it would not prevent the company from so constructing and operating the road. If the charter had in terms granted to the corporation power to charge and collect a definite sum per mile for the transportation of persons or of property, it would not be doubted that that express stipulation formed a part of the obligation of the state which it could not repudiate. Whether, in the absence of an express stipulation of that character, there is not implied in the grant of the right to construct and operate, the grant of a right to charge and collect such tolls as will enable the company to successfully operate the road and return some profit to those who have invested their money in the construction, is a question not as yet determined. It is at least a question which arises as to the extent to which that contract goes, and one in which the corporation has the right to invoke the judgment of the courts; and if the corporation, a citizen of the state, has a right to maintain a suit for the determination of that question, clearly a citizen of another state, who has, under authority of the laws of the state of Texas, become pecuniarily interested in, equitably, indeed, the beneficial owner of the property of the corporation, may invoke the judgment of the Federal courts as to whether the contract rights created by the charter, and of which it is thus the beneficial owner, are violated by subsequent acts of the state in limitation of the right to collect tolls. Our conclusion from these considerations is that the objection to the jurisdiction of the circuit court is not tenable, and this, whether we rest upon the provisions of the statute or upon the general jurisdiction of the court existing by virtue of the statutes of Congress, under the sanction of the Constitution of the United States.

Passing from the question of jurisdiction to the act itself, there can be no doubt of the general power of a state to regulate the fares and freights which may be charged and received by railroad or other carriers, and that this regulation can be carried on by means of a commission. Such a commission is merely an administrative board created by the state for carrying into effect the will of the state as expressed by its legislation. *Stone v. Farmers Loan & T. Co. (Railroad Commission Cases)* 116 U. S. 807 [29:636]. No valid objection, there-

fore, can be made on account of the general features of this act; those by which the state has created the railroad commission and entrusted it with the duty of prescribing rates of fares and freights as well as other regulations for the management of the railroads of the state.

Specific objections are made to the act, on the ground that, by section 5, the rates and regulations made by the commission are declared conclusive in all actions between private individuals and the companies, and that by section 14 excessive penalties are imposed upon railroad corporations for any violation of the provisions of the act; and thus, as claimed, there is not only a limitation but a practical denial to railroad companies of the right of a judicial inquiry into the reasonableness of the rates prescribed by the commission. The argument is, in substance, that the railroad companies are bound to submit to the rates prescribed until in a direct proceeding there has been a final adjudication that the rates are unreasonable, which final adjudication, in the nature of things, cannot be reached for a length of time; that meanwhile a failure to obey those regulations exposes the company, for each separate fare or freight exacted in excess of the prescribed rates, to a penalty so enormous as in a few days to roll up a sum far above the entire value of the property; that even if in a direct proceeding the rates should be adjudged unreasonable, there is nothing to prevent the commission from re-establishing rates but slightly changed and still unreasonable, to set aside which requires a new suit, with its length of delay; and thus, as is claimed, the railroad companies are tied hand and foot and bound to submit to whatever illegal, unreasonable, and oppressive regulations may be prescribed by the commission.

It is enough to say in respect to these matters, at least so far as this case is concerned, that it is not to be supposed that the legislature of any state, or a commission appointed under the authority of any state, will ever engage in a deliberate attempt to cripple or destroy institutions of such great value to the community as the railroads, but will always act with the sincere purpose of doing justice to the owners of railroad property, as well as to other individuals; and also that no legislation of a state, as to the mode of proceeding in its own courts, can abridge or modify the powers existing in the Federal courts, sitting as courts of equity. So that if in any case, there should be any mistaken action on the part of a state, or its commission, injurious to the rights of a railroad corporation, any citizen of another state, interested directly therein, can find in the Federal court all the relief which a court of equity is justified in giving. We do not deem it necessary to pass upon these specific objections because the fourteenth section or any other section prescribing penalties may be dropped from the statute without affecting the validity of the remaining portions, and if the rates established by the commission are not conclusive, they are at least *prima facie* evidence of what is reasonable and just. For the purpose of this case it may be conceded that both the clauses are unconstitutional, and still the great body of the act remains un-

challenged—that which establishes the commission, and empowers it to make reasonable rates and regulations for the control of railroads. It is familiar law that one section or part of an act may be invalid without affecting the validity of the remaining portion of the statute. Any independent provision may be thus dropped out if that which is left is fully operative as a law, unless it is evident from a consideration of all the sections that the legislature would not have enacted that which is within, independently of that beyond its power. Applying this rule, and the invalidity of these two provisions may be conceded without impairing the force of the rest of the act. The creation of a commission, with power to establish rules for the operation of railroads and to regulate rates, was the prime object of the legislation. This is fully accomplished whether any penalties are imposed for a violation of the rules prescribed, or whether the rates shall be conclusive or simply prima facie evidence of what is just and reasonable. The matters of penalty and the effect as evidence of the rates are wholly independent of the rest of the statute. Neither can it be supposed that the legislature would not have established the commission and given it power over railroads without these independent matters. In other words, it is not to be presumed that the legislature was legislating for the mere sake of imposing penalties, but the penalties and the provision, as to evidence, were simply in aid of the main purpose of the statute. They may fail, and still the great body of the statute have operative force, and the force contemplated by the legislature in its enactment. Take a similar body of legislation—a tax law. There may be incorporated under such a law a provision giving conclusive effect to tax deeds, and also a provision as to the penalties incurred by non-payment of taxes. These two provisions may, for one reason or another, be obnoxious to constitutional objections. If so, they may be dropped out, and the balance of the statute exist. It would not for a moment be presumed that the whole tax system of the state depended for its validity upon the penalties for non payment of taxes or the effect to be given to the tax deed. We, therefore, for the purposes of this case, assume that the two provisions of the statute are open to the constitutional objections made against them. We do not mean by this to imply that they are so in fact, but simply that it is unnecessary to consider and determine the matter, and we leave it open for future consideration.

It appears from the bill that, in pursuance of the powers given to it by this act, the state commission has made a body of rates for fares and freights. This body of rates, as a whole, is challenged by the plaintiff as unreasonable, unjust, and working a destruction of its rights of property. The defendant denies the power of the court to entertain an inquiry into that matter, insisting that the fixing of rates for carriage by a public carrier is a matter wholly within the power of the legislative department of the government and beyond examination by the courts.

It is doubtless true, as a general proposition, that the formation of a tariff of charges for the transportation by a common carrier of per-

sons or property is a legislative or administrative rather than a judicial function. Yet it has always been recognized that, if a carrier attempted to charge a shipper an unreasonable sum, the courts had jurisdiction to inquire into that matter and to award to the shipper any amount exacted from him in excess of a reasonable rate; and also in a reverse case to render judgment in favor of the carrier for the amount found to be a reasonable charge. The province of the courts is not changed, nor the limit of judicial inquiry, altered because the legislature instead of the carrier prescribes the rates. The courts are not authorized to revise or change the body of rates imposed by a legislature or a commission; they do not determine whether one rate is preferable to another, or what under all circumstances would be fair and reasonable as between the carriers and the shippers; they do not engage in any mere administrative work; but still there can be no doubt of their power and duty to inquire whether a body of rates prescribed by a legislature or a commission is unjust and unreasonable, and such as to work a practical destruction to rights of property, and if found so to be, to restrain its operation. In *Chicago, B. & Q. R. Co. v. Iowa*, 94 U. S. 155 [24: 94], and *Peik v. Chicago & N. W. R. Co.* 94 U. S. 164 [24: 97], the question of legislative control over railroads was presented, and it was held that the fixing of rates was not a matter within the absolute discretion of the carriers, but was subject to legislative control. As stated by Mr. Justice Miller, in *Wabash, St. L. & P. R. Co. v. Illinois*, 118 U. S. 557, 569 [30: 244, 248], 1 Inters. Com. Rep. 81, in respect to those cases:

“The great question to be decided, and which was decided, and which was argued in all those cases, was the right of the state within which a railroad company did business to regulate or limit the amount of any of these traffic charges.”

There was in those cases no decision as to the extent of control, but only as to the right of control. This question came again before this court in *Stone v. Farmers Loan & T. Co. (Railroad Commission Cases)* 116 U. S. 807, 881 [29: 686, 644], and while the right of control was reaffirmed a limitation on that right was plainly intimated in the following words of the Chief Justice:

“From what has thus been said, it is not to be inferred that this power of limitation or regulation is itself without limit. This power to regulate is not a power to destroy, and limitation is not the equivalent of confiscation. Under pretense of regulating fares and freights, the state cannot require a railroad corporation to carry persons or property without reward; neither can it do that which in law amounts to a taking of private property for public use without just compensation, or without due process of law.”

This language was quoted in the subsequent case of *Dow v. Beidelman*, 125 U. S. 680, 699 [81: 841, 848], 2 Inters. Com. Rep. 56. Again, in *Chicago, M. & St. P. R. Co. v. Minnesota*, 184 U. S. 418, 458 [83: 970, 981], 8 Inters. Com. Rep. 209, it was said by Mr. Justice Blatchford, speaking for the majority of the court:

“The question of the reasonableness of a

rate of charge for transportation by a railroad company, involving as it does the element of reasonableness, both as regards the company and as regards the public, is eminently a question for judicial investigation, requiring the process of law for its determination."

And in *Chicago & G. T. R. Co. v. Wellman*, 143 U. S. 839, 844 [86: 176, 179], is this declaration of the law:

"The legislature has power to fix rates, and the extent of judicial interference is protection against unreasonable rates."

Budd v. New York, 143 U. S. 517 [86: 247], 4 Inters. Com. Rep. 45, announces nothing to the contrary. The question there was not whether the rates were reasonable, but whether the business, that of elevating grain, was within legislative control as to the matter of rates. It was said in the opinion: "In the cases before us, the records do not show that the charges fixed by the statute are unreasonable." Hence there was no occasion for saying anything as to the power or duty of the courts in case the rates as established had been found to be unreasonable. It was enough that upon examination it appeared that there was no evidence upon which it could be adjudged that the rates were in fact open to objection on that ground.

These cases all support the proposition that while it is not the province of the courts to enter upon the merely administrative duty of framing a tariff of rates for carriage, it is within the scope of judicial power and a part of judicial duty to restrain anything which, in the form of a regulation of rates, operates to deny to the owners of property invested in the business of transportation that equal protection which is the constitutional right of all owners of other property. There is nothing new or strange in this. It has always been a part of the judicial function to determine whether the act of one party (whether that party be a single individual, an organized body, or the public as a whole) operates to divest the other party of any rights of person or property. In every constitution is the guarantee against the taking of private property for public purposes without just compensation. The equal protection of the laws which, by the 14th Amendment, no state can deny to the individual, forbids legislation, in whatever form it may be enacted, by which the property of one individual is without compensation wrested from him for the benefit of another, or of the public. This, as has been often observed, is a government of law, and not a government of men, and it must never be forgotten that under such a government, with its constitutional limitations and guarantees, the forms of law and the machinery of government, with all their reach and power, must in their actual workings stop on the hither side of the unnecessary and uncompensated taking or destruction of any private property, legally acquired and legally held. It was, therefore, within the competency of the Circuit Court of the United States for the Western District of Texas, at the instance of the plaintiff, a citizen of another state, to enter upon an inquiry as to the reasonableness and justice of the rates prescribed by the railroad commission. Indeed, it was in so doing only exercising a power expressly named in the act creating the commission.

4 INTER S.

A classification was made by the commission, and different rates established for different kinds of goods. These rates were prescribed by successive circulars. Classification of rates is based on several considerations, such as bulk, value, facility of handling, etc., it is recognized in the management of all railroads, and no complaint is here made of the fact of classification, or the way in which it was made by the commission. By these circulars, rates all along the line of classification were reduced from those theretofore charged on the road. The challenge in the case is of the tariff as a whole, and not of any particular rate upon any single class of goods. As we have seen, it is not the function of the courts to establish a schedule of rates. It is not therefore, within our power to prepare a new schedule or rearrange this. Our inquiry is limited to the effect of the tariff as a whole, including therein the rates prescribed for all the several classes of goods, and the decrees must either condemn or sustain this act of the quasi legislation. If a law be adjudged invalid, the court may not in the decree attempt to enact a law upon the same subject which shall be obnoxious to no legal objections. It stops with simply passing its judgment on the validity of the act before it. The same rule obtains in a case like this.

We pass then to the remaining question, Were the rates, as prescribed by the commission, unjust and unreasonable? The bill, it will be remembered, was filed by a second mortgagee. The railroad company was made a defendant, and filed a cross bill. Each of these bills contains a general averment that the rates are unjust and unreasonable. That in the original bill, which was filed April 30, 1892, or some six or seven months after the action of the commission, is in these words:

"Eighth. That the classifications and schedules of rates and charges so announced and promulgated in and by said commodity tariffs and circulars of said commission, or sought so to be, as hereinbefore shown, are unfair, unjust, and unreasonable, and that the same cannot be adopted or put or continued in effect by the defendant company or defendant receiver without serious and irreparable loss to it, and serious and irreparable injury to and destruction of the property, rights, and interests of your orator and the beneficiaries of its trust as hereinafter more fully set forth; that the rates so charged and announced by said commission are not compensatory, and are unreasonably low, and the adoption and enforcement thereof would result, as nearly as can be estimated, in a diminution of revenues derived from the operation of said International & Great Northern Railroad, aggregating more than \$200,000 per annum, and that the revenues from said railroad, so reduced and diminished, would be inadequate and insufficient to provide for the payment of the interest upon the prior obligations of the defendant railroad company, recited in paragraph 4 hereof, and the interest upon the second mortgage bonds secured by said mortgage to your orator as trustee, after providing for the expenses of operating said lines of railroad and property, and maintaining the same in proper order and good working condition, so that the traffic and business of said road, and of every part thereof shall at

all times be conducted with safety to person and property, and with due expedition."

It may not be just to take this as an allegation of a mere matter of fact, the truthfulness of which is admitted by the demurrer, and which, as thus admitted, eliminates from consideration all questions as to the true character and effect of the rates, yet it is not to be ignored. There are often in pleadings general allegations of mixed law and fact, such as of the ownership of property and the like, which standing alone are held to be sufficient to sustain judgments and decrees, and yet are always regarded as qualified, limited, or even controlled by particular facts stated therein. It would not, of course, be tolerable for a court administering equity to seize upon a technicality for the purpose or with the result of entrapping either of the parties before it. Hence, we should hesitate to take the filing of the demurrers to these bills as a direct and explicit admission on the part of the defendants that the rates established by the commission are unjust and unreasonable. Yet it must be noticed that at first answers were filed, tendering issue upon the matters of fact, and testimony was taken, the extent of which, however, is not disclosed by the record. After that the defendants applied for leave to withdraw their answers and file demurrers. It is not to be supposed that this was done thoughtlessly. But one conclusion can be drawn from that action, and that is that upon the taking of their testimony defendants became satisfied that the particular facts were as stated in the bills, and that the conclusions to be drawn from such facts could not be overthrown by any other matters. Hence, if it appears that the facts stated in detail tend to prove that the rates are unreasonable and unjust, we must assume, as against the demurrers, that the general allegation heretofore quoted is true, and that there are no other and different facts which, if proved, might induce a different conclusion, and compel a different result.

What, then, are the special facts disclosed in the several bills? It appears that there is a bonded indebtedness of over \$15,000,000, and in addition capital stock to the amount of \$9,755,000; that the bonds and stock were issued for and represent value, and that the rates theretofore existing on the road were not sufficient to enable the company to pay all the interest on the bonds. At the time suit was commenced the first mortgage bonds outstanding amounted to \$7,054,000, drawing 6 per cent interest; the second mortgage bonds to \$7,954,000, drawing also 6 per cent interest. The stockholders had never received any dividends whatever upon their investment, but on the contrary (as appears from the cross bill filed subsequently to the commencement of the suit), they had been forced to pay a cash assessment of over a million of dollars, or about 12 per cent of the face value of the stock, for the purpose of providing in part for the interest upon the first mortgage bonds; the holders of those bonds had been compelled to accept, and had accepted, in payment of one half of the accrued and defaulted interest—a sum exceeding \$750,000—deferred certificate of indebtedness bearing interest at the rate of 5 per cent; the holders of the second mortgage bonds had

been called upon to fund, and substantially all had consented to fund, passed due interest, amounting to upwards of \$1,250,000, in third mortgage bonds, bearing 4 per cent interest, and they had also been required to reduce, and substantially all had agreed to reduce, the interest on their bonds to 4 per cent per annum for the period of six years, and thereafter to 5 per cent per annum. For about three years the road had been in the hands of a receiver, appointed on account of the default of the company in the payment of its obligations. A statement in detail was incorporated in the bill of the earnings and operating expenses of the road during the years 1889 and 1890, and the first nine months of 1891, which was supplemented by a like statement in the cross bill subsequently filed of the earnings and expenses for the entire year 1891 and the first three months of 1892. These statements show the following figures:

1889: Earnings	\$3,488,186 14
Operating expenses, exclusive of taxes	2,629,452 90
Surplus	858,733 24
1890: Earnings	3,646,422 38
Operating expenses, exclusive of taxes	3,148,245 09
Surplus	498,177 24
1891: Earnings	3,645,641 79
Operating expenses, exclusive of taxes	3,098,550 30
Surplus	555,091 50
Three months of 1892: Earnings	750,178 18
Operating expenses, exclusive of taxes	829,074 87
Deficit	69,896 69

The bill also contains a tabular statement of the revenue per ton per mile derived from the operation of the road during the years 1883 to 1893, inclusive, as follows:

"Revenue per ton per mile for 1883 (in cents) 2.08	
" " " 1884	1.90
" " " 1885	1.71
" " " 1886	1.65
" " " 1887	1.58
" " " 1888	1.53
" " " 1889	1.44
" " " 1890	1.38
" " " 1891 (first nine months) 1.30"	

The mileage owned and operated by the company within the state of Texas amounts to 825 miles. There had been necessarily expended in cash in the construction and equipment of its road more than \$50,000 per mile and it could not be replaced for less than \$30,000 per mile. There is also this allegation in the cross bill:

"That the lines of railway of your orator's company, have at all times been operated as economically as practicable, and that its operating expenses have at all times been as reasonable and low in amount as they could be made by economical and judicious management, and that it has not been possible for your orator to operate said road for less than it has been operated. That for the year ending June 30, 1892, there were employed by your orator's company seventeen general officers, who received during said year an average daily compensation of \$12.64, and, exclusive of its general officers, all of its employees during and for the year ending June 30, 1892, received an average daily compensation of \$2.01, and that at all times your orator has secured the service of

its officers and employes as cheaply as practicable, and has employed no more than necessary, and that the above were fair and reasonable rates of pay. That at all times the International & Great Northern Railroad Company has secured all supplies, material, and property, of whatever character, for the operation of its road at the cheapest market price and at as low rates as the same could be secured, and has secured and used no more than actually necessary in the operation of the road."

In the amendment to the cross bill, filed in March, 1893, is given a table showing the actual reductions in amounts received by the railroad company for the transportation of the different classes of goods under the operation of the new tariffs up to August 31, 1892, and amounting to \$159,694.51, and also a table showing the per cent of reductions as to different articles—varying from 5 per cent on cement to 54.90 per cent on grain in carloads. The bill also, in general terms, negatives the probability of any increase in amount of business to compensate for the reduction in rates, a negation sustained by the figures given in the amended bill as to the actual effect upon the receipts. It also contains a general averment that the rates on interstate business would be injuriously affected to an equal amount by reason of the reduction of rates on business within the state.

As against these facts the attorney general presses these matters: In the table in the bill heretofore referred to, showing earnings and expenses during the years 1889 and 1890, and the first nine months of 1891, there is this item, several times repeated, "balance of income account," and this on September 30, 1891, is stated at \$3,795,785.68. Of what this account is composed we are not informed (possibly there was included within it the proceeds of the land grant, which, as we are told, was made by the state to the corporation) but, whatever it includes, it was on January 1, 1889, as stated, \$2,612,118.68, which would make the increase of that account during the two years and nine months to be \$1,183,667. Confessedly no interest was paid during those years, and that amounted each year to something like \$900,000, or nearly two millions and a half for the two years and nine months. It is obvious that, no matter what may have been in the bookkeeping of the company included in this account, or how much or from what sources in prior years the road had accumulated this balance the increase during the time stated did not equal the accruing interest. The attorney general also notices the report for the year ending June 30, 1892, made by the company to the railroad commission, a copy of which is attached as an exhibit to the amendment to the cross bill, and from that he tabulates a statement which, as he contends, shows that the earnings during that year were sufficient to pay the operating expenses and fixed charges. We give the table as he has prepared it:

"Gross earnings from operation.....	\$3,568,690 26
Less operating expenses.....	2,966,204 12
Income from operation.....	\$582,486 14
To which should be added amounts expended for 'cost of road, equipment, and permanent improvements,' ad-

Deductions from Income.	
Interest on funded debt accrued during the year, viz:	
On \$7,954,000 first mortgage bonds at 6 per cent.....	\$477,240 00
On \$7,064,000 second mortgage bonds, one month, at 6 per cent.....	85,270 00
On \$7,054,000 second mortgage bonds, eleven months, at 4½ per cent.....	290,977 50
Total interest accrued.....	\$853,487 50
Rental paid Colorado River Bridge Company.....	14,583 32
Taxes.....	28,951 85
Total deductions.....	\$847,022 17
Surplus after paying operating expenses proper. Interest accrued on bonds, taxes, etc.....	\$45,569 74"

But this table ignores that which is disclosed in the cross bill, to wit, \$750,000 in certificates of indebtedness, bearing interest at five per cent, and \$1,250,000, third mortgage bonds, bearing four per cent interest, the interest on which sums would exceed all the apparent surplus. These items also appear in the report, under the head of current liabilities, the total balance of which on July 1, 1892, is given as \$3,772,062.94, which sum may not unreasonably be taken as showing by how much the company has fallen short of paying its operating expenses and fixed charges. Again, the sum of \$302,085.77 appears in that table, under the description "Cost of road, equipment and permanent improvements, admitted to have been included in operating expenses," and is added to the income as though it had been improperly included in operating expenses. But before this change can be held to be proper, it is well to see what further light is thrown on the matter by other portions of the report. That states that there were no extensions of the road during that year, so that all of this sum was expended upon the road as it was. Among the items going to make up this sum of \$302,085.77 is one of \$113,212.09 for rails, and it appears from the same report that there was not a dollar expended for rails, except as included within this amount. Now, it goes without saying that in the operation of every road there is a constant wearing out of the rails and a constant necessity for replacing old with new. The purchase of these rails may be called permanent improvements, or by any other name, but they are what is necessary for keeping the road in serviceable condition. Indeed, in another part of the report, under the head of "renewals of rails and ties," is stated the number of tons of "new rails laid" on the main line. Other items therein are for fencing, grading, bridging, and culvert masonry, bridges and trestles, buildings, furniture, fixtures, etc. It being shown affirmatively that there were no extensions it is obvious that these expenditures were those necessary for a proper carrying on of the business required of the company. Certainly the mere title, under which these expenditures are once stated, is not sufficient to overthrow the facts so fully and clearly shown that the stockholders have never received any dividends; that in order to meet

the accumulating interest on the bonds they have had to put their hands in their pockets and advance a million and over of dollars. Those are facts whose significance cannot be destroyed by any mere manner of bookkeeping or classification of expenditures.

Further, the attorney general asserts that there are five trunk lines, of which the International & Great Northern road is one, paralleling each other, and thus dividing the business of the territory through which they pass; that the state of Texas had made large donations of land to railroad companies, and that, as appears from its executive documents, this railroad company had received a donation of 8,352,320 acres to aid in its construction, as well as exemption of all its property from taxation for twenty-five years. He also calls attention to the financial depression which has of late years pervaded every avenue of trade, and adds a table from the report of the commissioner of agriculture of Texas, showing as to different articles produced in that state an increase in the amount of product and a decrease in the prices received therefor; all of which considerations, he earnestly insists, affect the question of the reasonableness of the rates prescribed.

None of the matters mentioned in the foregoing paragraph appear in the pleadings or elsewhere in the record, and it is, therefore, doubtful to what extent they may be taken into consideration. If we may take judicial notice of the five parallel roads, must we also assume that the existence of the other four diminishes the business of the International & Great Northern, and that, if they had never been built, all the business which now passes over the five would have been carried by the one? May not the topography of the country be such as to prevent any of the business of the other roads from ever coming to the International & Great Northern, even if, without them, it was obliged to seek water or wagon transportation? May not the building of those other roads have increased the population and business to such an extent that the overflow has, so far from diminishing, really resulted in an increase of the business of the International & Great Northern? If there has been a division of business, has there not also been a competition by which the rates have been reduced, and reduced to such an extent as to forbid the propriety of any further reduction? If we may take judicial notice that the state made a grant of three million and odd acres to the company, must we also take notice of the value of that land, of its sale, and the amount realized therefrom? While undoubtedly there has been lately a period of financial depression, can we take judicial notice of the extent to which that depression has reduced the prices of the products of the state; and is the report of the commissioner of agriculture of the state to be considered as evidence before us, and accepted as substantially correct, both as to product and prices? And if the depreciation of prices, as stated in said report, be accepted as correct, will such depreciation uphold a compulsory reduction of the rates of transportation to such an extent that some of those who have invested their money in rail-

road transportation receive no compensation therefrom? Is it just to deprive one party of all compensation in order that another may make some profit? They who invest their money in railroads take the same chances that men engaged in other business do of making profit from the carrying on of their business; and, as appears from other cases submitted to us with this, some of the railroads in the state of Texas have operated at a constant loss. But such possibilities of loss are simply the natural results of all business freely carried on, against which the law is powerless to afford protection. Very different are the considerations which arise when the strong arm of the law is invoked to compel parties engaged in legitimate business, and business which cannot be abandoned at will, to so reduce their charges for service as to make the carrying on of that business result in a continued loss. In the one case the law is powerless to prevent injury; in the other it is used to work injury. Counsel suggest that the state itself may construct and operate railroads, and then may properly make rates so low that the business is done at a loss. They refer to the postal system of the United States which, carried on for the common welfare, not infrequently results in a loss which is made good out of the public treasury. But the parallel is not good. In the case suggested the loss is cast through taxation upon the general public, and all bear their proportionate share of that loss which is incurred in securing a common benefit, while the scope of this legislation is to secure such common benefit at the expense of a single class. The equal protection of the laws—the spirit of common justice—forbids that one class should by law be compelled to suffer loss that others may make gain. If the state were to seek to acquire the title to these roads, under its power of eminent domain, is there any doubt that constitutional provisions would require the payment to the corporation of just compensation, that compensation being the value of the property as it stood in the markets of the world, and not as prescribed by an act of the legislature. Is it any less a departure from the obligations of justice to seek to take not the title but the use for the public benefit at less than its market value?

The act of 1858, to which reference has already been made, contained a section looking to the acquisition by the state of the title to railroad property. Section 17 of the acts (Tex. Gen. Laws, 1853, p. 58) is as follows:

"If the legislature of this state shall at any time make a provision by law for the repayment to any such company of the amount expended by them in the construction of said road, together with all moneys for permanent fixtures, cars, engines, machinery, chattels, and real property then in use for the said road, with all moneys expended for repairs or otherwise, and interest on such sums at the rate of twelve per centum per annum, after deducting the amount of tolls, freights, passage money, and all moneys received from the sale of lands donated by the state to said company, with twelve per centum per annum interest on all such sums, then the road, with all its fixtures and appurtenances aforesaid, and all the lands

donated to the same by the state and remaining unsold, shall vest in and revert to the state: *Provided*, That the state shall not be required to pay or allow a greater rate of interest on any amount of the money so expended by any company which shall have been borrowed from this state than the state shall have received for the same from such company."

This section, as will be perceived, provides for the payment of interest at the high rate of 12 per cent on the difference between what the company has paid out and what it has taken in, and to that extent evidences the thought of the state that justice required the return to the builders of railroads of something more than the actual cost as the condition of depriving them of the title. It is only significant, however, as an expression of the thought of the state at the time; for, were the provision ever so unjust, every corporation which, after the passage of the act, invested its money in building a road would do so with the knowledge that that was the condition upon which the investment was made, and could not, therefore, challenge its validity.

And now, what deductions are fairly to be drawn from all the facts before us? Is there anything which detracts from the force of the general allegation that these rates are unjust and unreasonable? This clearly appears. The cost of this railroad property was \$40,000,000; it cannot be replaced to-day for less than \$25,000,000. There are \$15,000,000 of mortgage bonds outstanding against it, and nearly \$10,000,000 of stock. These bonds and stock represent money invested in the construction of this road. The owners of the stock have never received a dollar's worth of dividends in return for their investment. The road was thrown into the hands of a receiver for default in payment of the interest on the bonds. The earnings for the last three years prior to the establishment of these rates was insufficient to pay the operating expenses and the interest on the bonds. In order to make good the deficiency in interest the stockholders have put their hands in their pockets and advanced over a million of dollars. The supplies for the road have been purchased at as cheap a rate as possible. The officers and employes have been paid no more than is necessary to secure men of the skill and knowledge requisite to suitable operation of the road. By the voluntary action of the company the rate in cents per ton per mile has decreased in ten years from 2.08 to 1.80. The actual reduction by virtue of this tariff in the receipts during the six or eight months that it has been enforced amounts to over \$150,000. Can it be that a tariff which under these circumstances has worked such results to the parties whose money built this road is other than unjust and unreasonable? Would any investment ever be made of private capital in railroad enterprises with such as the proffered results?

It is unnecessary to decide, and we do not

wish to be understood as laying down as an absolute rule that in every case a failure to produce some profit to those who have invested their money in the building of a road is conclusive that the tariff is unjust and unreasonable. And yet justice demands that every one should receive some compensation for the use of his money or property, if it be possible without prejudice to the rights of others. There may be circumstances which would justify such a tariff; there may have been extravagance and a needless expenditure of money; there may be waste in the management of the road; enormous salaries, unjust discrimination as between individual shippers, resulting in general loss. The construction may have been at a time when material and labor were at the highest price, so that the actual cost far exceeds the present value; the road may have been unwisely built, in localities where there is not sufficient business to sustain a road. Doubtless too, there are many other matters affecting the rights of the community in which the road is built as well as the rights of those who have built the road.

But we do hold that a general averment in a bill that a tariff as established is unjust and unreasonable is supported by the admitted facts that the road cost far more than the amount of the stock and bonds outstanding; that such stock and bonds represent money invested in its construction; that there has been no waste or mismanagement in the construction or operation; that supplies and labor have been purchased at the lowest possible price consistent with the successful operation of the road; that the rates voluntarily fixed by the company have been for ten years steadily decreasing until the aggregate decrease has been more than fifty per cent; that under the rates thus voluntarily established the stock, which represents two fifths of the value, has never received anything in the way of dividends, and that for the last three years the earnings above operating expenses have been insufficient to pay the interest on the bonded debt, and that the proposed tariff, as enforced, will so diminish the earnings that they will not be able to pay one half the interest on the bonded debt above the operating expenses; and that such an averment so supported will, in the absence of any satisfactory showing to the contrary, sustain a finding that the proposed tariff is unjust and unreasonable, and a decree reversing it being put in force.

It follows from these considerations that the decree as entered must be reversed in so far as it retains the railroad commission from discharging the duties imposed by this act, and from proceeding to establish reasonable rates and regulations; but must be affirmed so far only as it restrains the defendants from enforcing the rates already established. The costs in this court will be divided.

Decree accordingly.

JOHN H. REAGAN ET AL., *Appts.*,
v.
THE MERCANTILE TRUST COMPANY, Trustee, ET AL.

(See S. C. 154 U. S. 418, 38 L. ed. —.)

[No. 1167.]

Railway company subject to state regulation—rates established by railroad commission.

1. The Texas & Pacific Railway Company is, as to business done wholly within the state, subject to the control of the state in all matters of taxation, rates, and other police regulations.
2. So much of the decree of the United States circuit court in this case as restrains the state rail-

road commissioners from proceeding under the railroad commission act to establish reasonable rates and regulations is set aside, but so much of it as restrains the enforcement of the rates already established is affirmed.

Argued April 13, 1894. Decided May 26, 1894.

APP^{EAL} from a decree of the Circuit Court of the United States for the Western District of Texas, perpetually enjoining the Texas & Pacific Railway Company from continuing in effect the rates or tariffs of the Railroad Commission of Texas, and perpetually enjoining the defendants, The Railroad Commission of Texas, and John H. Reagan *et al.*, members of said commission, and Charles A. Culberson, attorney general of said state and their successors, from instituting any suits to recover penalties under the law of Texas, of April 3, 1891, or under or by virtue of any of the tariffs or orders of said commission, etc., and also perpetually enjoining said railroad commission and said Reagan *et al.*, from making any further tariff or tariffs, etc., and also decreeing that the rates and tariffs heretofore made by said commission, and described in the complaint are unreasonable, unfair, and unjust, and that they are cancelled and null and void. *Reversed in part, and affirmed in part.*

The facts are stated in the opinion.

Messrs. C. A. Culberson, H. C. Coke and W. S. Simkins for appellants.

Messrs. John F. Dillon, E. B. Kruttschnitt, John J. McCook, Winslow S. Pierce, Alexander G. Cochran, R. S. Lovett and T. J. Freeman for appellees.

Mr. Justice Brewer delivered the opinion of the court:

The case is similar to that just decided, in which the same parties were appellants and the Farmers' Loan & Trust Company and the International & Great Northern Railroad Company, appellees. It was commenced by the Mercantile Trust Company in the same court against the appellants and the Texas & Pacific Railway Company, with like purpose to restrain the enforcement of the railroad commission act, and with like result. The Mercantile Trust Company was trustee in a deed of trust executed by the Texas & Pacific Railway Company to secure an issue of bonds, and, as a citizen of New York, invoked the jurisdiction of the Federal court.

There are some matters of difference between the two cases which call for special notice. The Texas & Pacific Railway is a corporation organized under the laws of the United States (16 Stat. at L. 573) and by reason of that fact it is earnestly insisted by counsel for it and the Trust Company that it is not subject to the control of the state, even as to rates for transportation wholly within the state. The argument is that it receives all its franchises from Congress; that among those franchises is the right to charge and collect tolls, and that the state has not the power, therefore, in any manner to limit or qualify such franchise. This is an important question and deserves consideration, even though in respect to other matters the facts should present a case exactly parallel to that just decided and calling for a like decision; because if the state has no control in the matter the decree should not be affirmed in part but *in toto*.

We are of the opinion that the contention of the railway and trust companies cannot be sustained, and that the reasoning in the cases of *Thomson v. Union Pac. R. Co.* 76 U. S. 9 Wall. 579 [19: 792] and *Union Pac. R. Co. v. Peniston*, 85 U. S. 18 Wall. 5, 36 [21: 787, 798], leads to this conclusion.

In the first of those cases these facts appeared: The Union Pacific Railway Company (Eastern Division) a corporation created by the legislature of Kansas, received government aid in bonds and land, and, thus aided, constructed its road to become one link in the transcontinental line known as the Union Pacific system. After its construction, the legislature of Kansas having enacted a law laying certain taxes upon its property, a bill was filed to restrain the collection of those taxes, on the ground that the property of the company was mortgaged to the United States, and that it, under the Congressional grant, was bound to perform certain duties and ultimately pay five per cent of its net earnings to the United States, an obligation which would be greatly hindered if the taxes imposed should be collected. But this contention was not sustained, and while

it was said by the *Chief Justice*, delivering the opinion of the court, that Congress had the power to provide an exemption from state taxation in such a case, there was no exemption in the absence of legislation to that effect. This decision was followed by that in the other case, in which a like exemption was sought of the property belonging to the Union Pacific Railroad Company, a corporation created, like the Texas & Pacific Railway Company, by an Act of Congress, and also like the Kansas company, aided by the government in lands and bonds, but here, too, by a majority of the court, the claim of exemption was denied. *Mr. Justice Strong*, in delivering the opinion of the court, said:

"It is, therefore, manifest that exemption of Federal agencies from state taxation is dependent, not upon the nature of the agents, or upon the mode of their constitutions, or upon the fact that they are agents, but upon the effect of the tax; that is, upon the question whether the tax does in truth deprive them of power to serve the government as they were intended to serve it, or does hinder the efficient exercise of their power. A tax upon their property has no such necessary effect. It leaves them free to discharge the duties they have undertaken to perform. A tax upon their operations is a direct obstruction to the exercise of Federal powers.

"In this case the tax is laid upon the property of the railroad company precisely as was the tax complained of in *Thompson v. Union Pacific*. It is not imposed upon the franchises or the right of the company to exist and perform the functions for which it was brought into being. Nor is it laid upon any act which the company has been authorized to do. It is not the transmission of dispatches, nor the transportation of United States mails, or troops, or munitions of war that is taxed, but it is exclusively the real and personal property of the agent, taxed in common with all other property in the state of a similar character. It is impossible to maintain that this is an interference with the exercise of any power belonging to the general government, and, if it is not, it is prohibited by no constitutional implication."

Similarly we think it may be said that, conceding to Congress the power to remove the corporation in all its operations from the control of the state, there is in the act creating this company nothing which indicates an intent on the part of Congress to so remove it, and there is nothing in the enforcement by the state of reasonable rates for transportation wholly within the state which will disable the corporation from discharging all the duties and exercising all the powers conferred by Congress. By the Act of incorporation Congress authorized the company to build its road through the state of Texas. It knew that, when constructed, a part of its business would be the carrying of persons and property from points within the state to other points also with-

in the state, and that in so doing it would be engaged in a business, control of which is nowhere by the Federal Constitution given to Congress. It must have been known that, in the nature of things, the control of that business would be exercised by the state, and if it deemed that the interests of the nation and the discharge of the duties required on behalf of the nation from this corporation demanded exemption in all things from state control, it would unquestionably have expressed such intention in language whose meaning would be clear. Its silence in this respect is satisfactory assurance that, in so far as this corporation should engage in business wholly within the state, it intended that it should be subjected to the ordinary control exercised by the state over such business. Without, therefore, relying at all upon any acceptance by the railroad corporation of the legislature of the state, passed in 1873 in respect to it, we are of opinion that the Texas & Pacific Railway Company is, as to business done wholly within the state, subject to the control of the state in all matters of taxation, rates, and other police regulations.

Another matter of difference between the two cases is this: The entire mileage of the International & Great Northern Railway was within the limits of the state of Texas, while the Texas & Pacific Railway Company owns and operates several hundred miles of road outside the limits of the state. No reference is made in the briefs of counsel to this difference, and probably there is nothing in the facts stated in the bill and cross bill in respect to the earnings, operating expenses, and incumbrances of the property which would in any way affect the conclusion as to the reasonableness of the rates imposed; and we only notice the difference now to guard against the inference that such a fact is always without significance in the consideration of questions as to the reasonableness of rates imposed in one of the states within which the line of the carrier runs.

Beyond these two matters of difference we see nothing that calls for any comment. It is true the figures in respect to earnings, operating expenses, incumbrances, reduction of revenue, etc., are not the same in this as in that case, but still, relatively to each other, they have the same significance, and there are in the bills and cross bills the same general averments. It would be useless, therefore, to encumber the record with a mass of figures for the sake of making it clear that the same conclusion must be reached here as in that case.

In this case also, as in that, the decision is that so much of the decree of the circuit court as restrains the defendants from proceeding under the railroad commission act to establish reasonable rates and regulations is set aside, but so much of it as restrains the enforcement of the rates already established is affirmed. The costs in this court will be divided between the parties.

Cases followed.

The cases of *Reagan v. Farmers Loan & T. Co.* and
Reagan v. Mercantile Trust Co., *ante*, pp. 560,

575, followed, and the same decision and decrees
 made as in those cases.

Submitted April 13, 1894. Decided May 26, 1894.

APPEALS from decrees of the Circuit Court of the United States for the Western District of Texas, perpetually enjoining the railroad companies, defendants, from putting or continuing in effect the tariffs of the railroad commission of Texas, mentioned in the complaint, and perpetually enjoining defendants, the railroad commission of Texas, and the attorney general of that state *et al.*, from instituting any suits for the recovery of penalties under the law of Texas, of April 8, 1891, or under or by virtue of any of the tariffs or orders of said railroad commission, etc., and perpetually enjoining said railroad commission from making or issuing any further tariffs or orders, and decreeing that all rates and tariffs heretofore made by said commission and described in the complaint are unreasonable, unfair, and unjust, and declaring them cancelled, void and of no effect, etc. *Affirmed in part, and reversed in part.*

The facts are stated in the opinion.

Messrs. C. A. Culberson, H. C. Coke and W. S. Simkins for appellants.

Messrs. John F. Dillon, E. B. Kruttschnitt, John J. McCook, W. S. Pierce, Alexander G. Cochran for appellees.

Mr. Justice Brewer delivered the opinion of the court:

These are cases in which, as in those just decided, the tariff established by the Texas Railroad Commission was challenged, and with like result. The St. Louis Southwestern Railway Company, named in the first of these cases, is called by counsel for defendants in their brief "a reorganized bankrupt concern." Its road has a total mileage, including main line and branches, of 572 miles. It would seem to be a railroad which was unwisely built, and one whose operating expenses have always exceeded its earnings. Counsel say that "it is

familiarly known in Texas as a 'teazer,' and, if it ever passes beyond this interesting but unprofitable stage, even its friends will be surprised." We are not advised, and we can hardly be expected to take judicial notice of what is meant by the term "teazer," but it is clearly disclosed by the record that this was an unprofitable road.

The Tyler Southeastern Railway Company, named in the second suit, has a short road of ninety miles, and also appears as a "reorganized bankrupt concern," and one whose road has been operated with constant loss. In the record in each case is found two annual reports returned to the railroad commission, one for the year ending June 30, 1891, and the other for that ending June 30, 1892. Comparing the statements in these reports, defendants' counsel say that the business of the roads has largely increased since the establishment of the rates made by the commission, and urge that no complaint can be made of action which has resulted so favorably. But an examination shows that the report for the year ending June 30, 1891, includes only the earnings and operating expenses for the single month commencing June 1, 1891, when the new company took possession and commenced operations; and so the enormous increase spoken of is simply the difference between the earnings and expenses for twelve months and those for one month. The bills, with their amendments, allege a decrease in the tonnage as well as a decrease in the rates.

We think, therefore, the cases come within the reasoning of the prior opinions, and that it will not do to hold that, because the roads have been operating in the past at a loss to the owners, it is just and reasonable to so reduce the rates as to increase the amount of that loss. Hence, the decrees here will be like those ordered in the prior cases.

v.

THE FARMERS LOAN & TRUST COMPANY, Trustee, ET AL.

[No. 1170.]

(See S. C. 154 U. S. 420, 38 L. ed. —.)

Cases followed.

This case is controlled by the cases of *Reagan v. Farmers Loan & T. Co.*, *Reagan v. Mercantile Trust Co.* (No. 1) and *Reagan v. Mercantile Trust*

Co. (No. 2) *ante*, pp. 560, 575, 577, and a like decision and decree made herein.

Submitted April 13, 1894. Decided May 26, 1894.

A PPEAL from a decree of the Circuit Court of the United States for the Western District of Texas, perpetually enjoining the Gulf, Colorado & Santa Fé Railroad Company, from continuing in effect the rates and tariffs of the railroad commission of Texas, described in the complaint, etc., and perpetually enjoining the railroad commission of Texas, and John H. Reagan *et al.*, and Charles A. Culberson, attorney general of said state, and their successors, from instituting any suits from the recovery of penalties, under the law of Texas of April 3, 1891, or under or by virtue of any of said rates or tariffs, etc., and further perpetually enjoining said commission and the members thereof, from making or issuing any further rates or tariffs, etc., and decreeing that the rates and tariffs heretofore made and issued by said commission and described in the complaint are unreasonable, unfair, and unjust, and cancelling them and declaring them to be null and void, etc. *Reversed in part and affirmed in part.*

The facts are stated in the opinion.

Messrs. C. A. Culberson, H. C. Coke and W. S. Simkins for appellants.

Messrs. John F. Dillon, E. B. Kruttschnitt, John J. McCook, H. B. Turner, Geo. R. Peck and J. W. Terry for appellees.

Mr. Justice Brewer delivered the opinion of the court:

This case is controlled by the opinions in the four preceding cases. There are one or two differences of fact, but nothing affecting the merits of the controversy. The Gulf, Colorado & Santa Fé Railroad Company was incorporated by the state of Texas, but a part of its line was constructed through the Indian Territory under authority of an Act of Congress. The figures as to earnings, etc., are also different, but they tend to the same result as to the reasonableness of the rates.

A like decree will be entered in this as in the former cases.

UNITED STATES CIRCUIT COURT OF APPEALS, EIGHTH CIRCUIT.

CHICAGO, MILWAUKEE & ST. PAUL R. CO., *Appl.*,

v.

WABASH, ST. LOUIS & PACIFIC R. CO.

(See S. C. 61 Fed. Rep. 963.)

1. A pooling contract between several railroad companies which control the business of a large section of country by which all their roads are to be run as one so far as through business is concerned, and each company is to receive a certain proportion of the gross earnings, by either a division of business or of receipts, is void as against public policy.
2. An action will not lie to compel a railroad company to pay over its earnings in excess of its share under an illegal pooling contract by which

several companies agree to divide the earnings from a certain class of business by either giving each its share of the business or of the earnings, since it is not a suit merely to compel an accounting of moneys received but is one to compel specific performance of the contract.

3. Performance of an illegal contract on one side only does not make it an executed contract so that an action can be maintained for the consideration.

May 7, 1894.

A PPEAL by complainant from a decree of the Circuit Court of the United States for the Eastern District of Missouri sustaining a demurrer to a bill filed to compel defendant

to account for freights which it had received and appropriated to its own use in excess of its share under a pooling contract for the division of business and gross receipts among certain railroad companies. *Affirmed.*

Statement by Caldwell, C. J.:

On December fifth and December twenty-ninth, 1883, contracts providing, among other things, for a pooling and division of competitive traffic were entered into by and between seven railroad companies, to wit: The Union Pacific; The Chicago, Rock Island & Pacific; The Chicago, Milwaukee & St. Paul; The Wabash, St. Louis & Pacific; The Chicago & Northwestern; The Chicago, St. Paul, Minneapolis & Omaha, and The Missouri Pacific.

There were four contracts. The first was between the Union Pacific Railway Company as party of the first part, and The Chicago, Rock Island & Pacific Railway Company as party of the second part, and The Chicago, Milwaukee & St. Paul Railway Company as party of the third part.

The other three contracts admitted the other parties in to the pool, and made some modifications and extensions of the original contract. The four contracts were in effect one and will be so treated. The following are some of the material provisions of the contract:

The preamble declares the object of the contract to be to "make the railway system of the party of the first part substantially a part of the railway system of each of the other parties hereto, as to westward bound traffic which will pass through Council Bluffs, in the state of Iowa, and each of the railway systems of the other parties, substantially a part of the system of the party of the first part, as to east bound traffic which will pass through the same place."

"It is declared to be the purpose of the parties hereto by the execution of these articles, and the performance of the several covenants, promises and agreements herein set out, to establish and operate through lines of railway, which shall connect, when the same can be done by a reasonably direct line through Council Bluffs, all points on the system of the party of the first part with all points on the several systems of the other parties (excepting the Kansas division of the party of the first part and its railroads in the state of Kansas) including all extensions of the main lines, branches, and other railways mentioned in the preamble hereto, and all lines and branches which are now owned, controlled or operated by either of the parties hereto in connection with any of its railways above mentioned, and which may be added thereto by construction, purchase, lease, or otherwise, and to secure the operation of all of said lines as to such through traffic as they should be if operated by one corporation which owned all of them."

"The party of the first part covenants, promises and agrees with each and both of the other parties, that:

It will, so far as it lawfully can, deliver to the railways of said other parties, at Council Bluffs, all eastward bound through traffic which may be received by it for transportation to any point which can be reached with reasonable directness, over any of the through

lines composed of the railroads of two or more of the parties hereto, passing through Council Bluffs, and that it will make all lawful and reasonable efforts to secure the transportation of all such through traffic which may be received by it for transportation over such through lines.

"It will divide all competitive through traffic which shall be transferred from its own railways to those of the other parties, as nearly as shall be practicable, into two equal parts, and transfer one of said parts to the railways of each of said parties for transportation to destination, or to the proper connecting line.

"The rates which shall be charged for the transportation of through traffic over the through lines hereby established, for which provision has not been made in the preceding section, shall be fixed in the manner following:

"The established or current rate of the party of the first part as per schedules hereto attached and made a part hereof, between the points at which traffic is received or to which it is destined and Council Bluffs, shall be added to the established or current rates of the parties of the second and third parts, as per schedules hereto attached and made a part hereof, between the points on their several lines at which such traffic is received or to which it is destined and Council Bluffs, and the sum of the two rates shall be the through rate. Provided, however, that the rates upon all through traffic between competitive points which may be connected by a through line over the Northern Pacific Railroad, shall be so adjusted that the rates between such points and all Chicago and Mississippi river points by way of Council Bluffs, shall be as low as by way of St. Paul."

"The through rates on east bound through traffic over the lines hereby established may be reduced by the party of the first part, and the like rates on like traffic west bound may be reduced by the party of the second or third part, by whom it shall be delivered to the party of the first part, when such reduction shall be rendered necessary by competition with lines other than those hereby established. When any through rate is reduced by a party, for any reason, it shall immediately notify the other party hereto of such reduction, and the facts which it is claimed justified such reduction. A reduction of a rate shall continue only so long as shall be necessary because of competition. No rates shall be reduced by any party otherwise than as provided in this and preceding sections."

"If any through rate shall be reduced by any party for reasons which are not satisfactory to the other parties, the rates fixed by the schedule shall be immediately restored and maintained until a majority shall direct a modification, and all traffic transported under modified rates shall be accounted for at full rates in the division of the proceeds of the through rate traffic between the parties. In no case shall a schedule of rates be in any manner modified, altered or reduced for the purpose of drawing traffic from the railways of any party hereto. If any party shall feel aggrieved because of any modification of any through rate, or of any order restoring a rate which has been cut, or by the action of any party tending to

evade or in any wise impair agreed rates, the party so aggrieved may make it the basis of a complaint which shall be determined by reference as hereinafter provided. On the hearing of any such reference, the referees may affirm the order made by a majority of the parties or direct the restoration of the rate reduced, and in a proper case make an award to the party or parties injured by any evasion or unjustifiable reduction of a rate, as compensation for any damages which shall have been sustained.

"If the east bound competitive traffic actually transported by either of the parties of the second or third part, in any one month, shall not amount to the equal share to which it shall be entitled under the provisions of these articles, the balances shall be so adjusted as to give to each the proceeds of an equal share of the gross revenue received by both for the transportation of such traffic.

"To prevent confusion in the settlement of accounts, the following distances are arbitrarily established:

"From Council Bluffs to all points east thereof, which take Chicago rates, five hundred miles; from Council Bluffs to all points east thereof, which take Mississippi river rates, three hundred and forty miles.

"No covenant, promise or agreement in said original articles or in these supplemental articles contained, shall be so construed as to affect or control (otherwise than by securing equality of rates as provided in said original and the supplemental articles) through traffic specially routed, marked and consigned by the shippers over through lines of which the Southern Pacific Railroad does now or shall hereafter form a part, but the rates on all through traffic between competitive points which may be connected by a through line over the Southern Pacific Railroad, shall be so adjusted that the rates between such points and all Chicago and Mississippi river points by way of the Southern Pacific shall be as high as by the way of Council Bluffs.

"If at any time while this contract remains in force, the construction of new railroads or the extension of existing ones, or the purchase or lease of railroads or traffic or other arrangements made by any one or more of the parties hereto, shall materially change the relations now existing between the parties with regard to traffic, the contract set out in the original and in the supplemental articles shall be so modified, altered and amended as to establish between them with regard to the then existing circumstances, substantially the relations hereby established between them with regard to the circumstances now existing. It is declared to be the purpose and intent of the parties to maintain the relations hereby established with regard to existing railroads and operating and traffic arrangements, and to adjust such relations to any change which may be made therein with regard to through traffic.

"If the parties cannot agree upon the modifications, alterations or amendments which shall be made, if any, under the provisions of this section, the difference or differences which may thereby arise shall be determined by reference as in the original and the supplemental articles provided.

"Each party will contribute to a common

fund all of the gross revenue which it shall receive for the transportation of both east and west bound freight traffic, hereinafter described, to or from Council Bluffs, and to and from Missouri valley in the performance of the covenants, promises and agreements set out in said original and supplemental articles.

"For the purpose of ascertaining the full amounts of the gross revenue which the parties shall severally contribute, each shall account and pay for all through traffic, both east and west bound, so transported by it as follows:

"For all through traffic except lumber, between the said Union Pacific and the Sioux City Pacific railways and the railways of other parties hereto covered by said original and supplemental articles, which shall originate at, be destined to, or cross the Mississippi river at any point between the cities of Dubuque and St. Louis, both inclusive, at the rates for like traffic between Chicago and Council Bluffs.

"Through traffic which shall be transported for the government of the United States shall be accounted for at the actual rates paid for the same, that is, the regular rate less the discount which may be made because of land grants.

"When a penalty is charged on traffic for excess of weights such traffic shall be accounted for at the regular rates for actual weight.

"Each party shall deliver to each of the others quarter-monthly statements showing what through traffic covered by said original articles and the supplemental articles referred to has, during the quarter-month immediately preceding been transferred over its railroads or any of them, in what it consisted, between what stations and in what directions it was transported, and the rates charged and received therefor.

"The party of the third part hereto undertakes to account to the other parties and pay to the common fund, provided for in the second section hereof, at Chicago rates, for all through traffic which may be received on its line, which can be lawfully transported from the point at which it shall be received, to destination or the proper connecting railway, over any of the through lines by the original articles and the supplemental articles established, with reasonable directness through Council Bluffs, though such traffic or some portion thereof, may not have been so actually transported: Provided, however, that no greater amount of traffic, to or from California points, actually transported by way of the line of the party of the third part and the Southern Pacific line shall be reported to such common fund than the amount that shall be necessary (when added to the amount reported for other through traffic transported by the party of the third part) to make the sum equal to the proportion of the common fund to which the third party is entitled.

"Said common fund shall, when settlements are made between the parties in manner and form, as provided in said original articles, be divided into four equal parts, one of which shall be paid to each of the parties hereto.

"This result shall be accomplished so far as shall be practicable by a physical division of

the traffic to be accounted for (aided by divisions from one line to another) into four equal parts, one of which shall be transported by each of the parties hereto.

"When for any reason such division of the traffic has not been made during the month, the party or parties who shall receive an excess over the share to which it shall be entitled as above provided, shall pay to the party or parties who shall not have received their full shares, a sum or sums of money sufficient to make the division exact in producing gross revenue to the parties."

The pooling and division of traffic intended by the contracts were to be accomplished, so far as might be, by a physical division of the traffic itself between the companies, in certain fixed proportions, and where this was not or could not be done it was to be accomplished by pooling and division of the gross earnings of such traffic between the companies in such fixed proportions. The contract was to continue for twenty-five years.

In May, 1884, Solon Humphreys and Thomas E. Tutt were appointed receivers of the property, rights and franchises of the Wabash, St. Louis & Pacific Railway Company by the Circuit Court of the United States for the Eastern District of Missouri, and, as such receivers, they operated the railway committed to their charge, until, under the decree and order of the court, the property was sold and transferred to the purchasers.

The receivers acquiesced in the contracts referred to until March 31, 1887, when, by consent of all the parties they were abandoned.

In the course of business, under the contracts, the traffic involved was not actually divided between and carried by the companies in the proportions fixed, but the Wabash, St. Louis & Pacific Railway Company, among others, actually carried more than the share allotted to it, and the Chicago, Milwaukee & St. Paul Railway, among others, actually carried less. The pool commissioners provided for by the contracts, ascertained and made a statement of the differences and in making an adjustment of them directed that the Wabash receivers should pay to the Chicago, Milwaukee & St. Paul Railway Company a sum which, after deducting admitted credits, amounted to eighteen thousand four hundred and four dollars and forty cents (\$18,404.40) and this suit was instituted to recover that amount.

The defense is that the contract upon which the claim is based is against public policy and void. The court below (Thayer, J.) sustained this defense and the intervenor appealed. There was no evidence of the rate fixed by the parties for the traffic involved in their contract and no evidence as to their mode of operating under the contract beyond what is afforded by the contract itself.

Signed before Caldwell and Sanborn, Circuit Judges.

Mr. John W. Carey for appellant.

Mr. F. W. Lehman for appellee.

Caldwell, C. J., delivered the opinion of the court:

The design of the contract on which the appellant rests its claim is not left to presumption
4 INTER S.

or conjecture. Its purpose is apparent on the face of the instrument. Its object was not to avoid ruinous competition by entering into an arrangement to carry freight at reasonable rates, but its evident purpose was to stifle all competition for the purpose of raising rates.

By the term of the contract all the roads are to be operated as to through traffic, "as they should be if operated by one corporation which owned all of them."

These seven corporations were made one company so far as concerned their relations with each other, with rival carriers, and with the public. Between them there could be no competition nor freedom of action. To the extent of the traffic covered by this contract, and it covered no inconsiderable portion of the traffic of the continent, each company practically abdicated its functions as a common carrier and conferred them on a new creation for the sole purpose of suppressing competition. Before they entered into this contract each of these companies had the power, and it was its duty, to make rates for itself and to make them reasonable; but, by the terms of this contract, every one of the companies was divested of all its powers and discretion in this respect.

The contract removed every incentive to the companies to afford the public proper facilities and to carry at reasonable rates, for, under its provisions, the company is entitled to its full percentage of gross earnings even though it does not carry a pound of freight. The necessary and inevitable result of such a contract is to foster and create poorer service and higher rates. There is no inducement for a road to furnish good service and carry at reasonable rates when it receives as much or more for poor service or for no service, as it would receive for good service and an energetic struggle for business.

A railroad company is a quasi public corporation and owes certain duties to the public, among which are, the duty to afford reasonable facilities for the transportation of persons and property, and to charge only reasonable rates for such service. Any contract by which it disables itself from performing these duties, or which makes it to its interest not to perform them, or removes all incentive to their performance, is contrary to public policy and void. And the obvious purpose of this contract being to suppress or limit competition between the contracting companies in respect to the traffic covered by the contract, and to establish rates without regard to the question of their reasonableness, it is contrary to public policy and void. *Cleveland, C. C. & I. R. Co. v. Closser*, 3 Inters. Com. Rep. 887, 9 L. R. A. 754, 126 Ind. 148; *Gulf, C. & S. F. R. Co. v. State*, 2 Inters. Com. Rep. 835, 1 L. R. A. 849, 72 Tex. 404, 38 Am. & Eng. R. Cas. 481; *State v. Standard Oil Co.* 15 L. R. A. 145, 49 Ohio St. 137; *Texas & P. R. Co. v. Southern Pac. R. Co.* 41 La. Ann. 970; *Gibbs v. Consolidated Gas Co.* 130 U. S. 896, 82 L. ed. 979; *Morris Run Coal Co. v. Barclay Coal Co.* 68 Pa. 173, 8 Am. Rep. 159; *Central Ohio Salt Co. v. Guthrie*, 35 Ohio St. 666; *Stanton v. Allen*, 5 Denio, 484, 49 Am. Dec. 282; *Hooker v. Vandewater*, 4 Denio, 349, 47 Am. Dec. 258; *Chicago Gas Light & C. Co. v. Peoples Gas Light & C. Co.* 121 Ill. 590; *West Virginia*

Transp. Co. v. Ohio River Pipe Line Co. 22 W. Va. 600; *Western U. Teleg. Co. v. American U. Teleg. Co.* 65 Ga. 160, 38 Am. Rep. 781; *Sayre v. Louisville Union Ben. Assn.* 1 Duv. 143, 85 Am. Dec. 613; *United States v. Trans-Missouri Freight Assn.* 4 Inters. Com. Rep. 443, 58 Fed. Rep. 58.

But conceding that the contract is illegal and void, the appellant asserts that it has been performed and that the appellees are bound to account for moneys received under the contract according to its terms. This contention rests upon a misconception of the character of this suit. The appellants' claim is grounded on the illegal and void contract, and this suit is, in legal effect, nothing more than a bill to enforce specific performance of that contract.

The contract contemplated two modes of pooling, one by an actual division of the traffic, and the other by a division of the gross earnings.

The traffic not having been divided, this is a suit to enforce the second method of the pool—a division of the gross earnings—or in other words, a pooling of the earnings. The illegal and void contract has not been executed and the appellant invokes the aid of the court to compel the Wabash Company to execute it on its part by pooling its earnings. It may be conceded that the illegal contract has been performed on the part of the appellant though it does not appear to have done anything more than to sign the contract. The only thing it could do towards a performance of the contract was not to compete for the business. This was a violation of its duty to the public and illegal.

But a contract performed on one side only is not an executed contract. Where an illegal act is to be done and paid for the contract is not executed until the act is done and paid for. A court will not compel the act to be done even though it has been paid for. Neither will it compel payment although the act has been done, for this would be to enforce the illegal contract.

The illegality taints the entire contract and

neither of the parties to it can successfully make it the foundation of an action in a court of justice.

The Wabash Company performed the service that earned the money the appellant is seeking to recover. The appellant earned no part of it. There is nothing in the record to show that the appellant would have carried more or the Wabash Company less freight, if the contract had never been entered into. The money demanded was received by the Wabash Company for freight tendered to it by shippers themselves and carried by it over its own line. It was legally bound to accept the freight thus tendered and was entitled to receive the compensation for the carriage, and cannot be compelled to pay the money thus earned, or any part of it, to the appellant on this illegal and void contract.

The case of *Brooks v. Martin*, 69 U. S. 2 Wall. 70, 17 L. ed. 732, is not in point. In that case the defendant set up an illegal contract which had been fully performed and executed as a defense against a demand that existed independently of the contract. Whereas, in this case, the illegal contract is set up by the plaintiff as the foundation of its action. Strike this contract out and confessedly the complaint states no cause of action—leave it in, and it states an illegal and void cause of action.

Courts will not lend their aid to enforce the performance of a contract which is contrary to public policy or the law of the land, but will leave the parties in the plight their own illegal action has placed them. *Central Transp. Co. v. Pullman Palace Car Co.* 139 U. S. 24, 35 L. ed. 55; *Gibbs v. Consolidated Gas Co.* 130 U. S. 396, 32 L. ed. 979; *Texas & P. R. Co. v. Southern Pac. R. Co.* 41 La. Ann. 970; *Morris Run Coal Co. v. Barclay Coal Co.* 68 Pa. 173, 8 Am. Rep. 159; *Hooker v. Vandewater*, 4 Denio, 349, 47 Am. Dec. 258.

We have not overlooked the case of *Central Trust Co. v. Ohio Cent. R. Co.* 23 Fed. Rep. 306. The opinion in that case is not supported by the authorities and is unsound in principle.

The decree of the court below is affirmed.

UNITED STATES CIRCUIT COURT OF APPEALS, FIFTH CIRCUIT.

INTERSTATE COMMERCE COMMISSION, *Appl.*,

v.

CINCINNATI, NEW ORLEANS & TEXAS PACIFIC R. CO. *et al.*

1. Water competition in favor of the more distant point does not change the circumstances and conditions substantially dissimilar within the implied permission of the Interstate Commerce Act to charge less under such circumstances for a longer than for a shorter haul, where the competition is not with a carrier by a parallel water route between the points of shipment and destination but between routes from different points of shipment for the purpose of giving the shipping point the advantage in the markets of the destination point.
2. Several railroad companies which bill and carry

freight from points in one state to points in another will not be heard to say that the carriage by each is local and that they are not engaged in interstate commerce for the purpose of avoiding the requirements of the Interstate Commerce Act.

3. Decree reversing a decree of the United States circuit court refusing to enforce an order of the Interstate Commerce Commission requiring defendants to desist from making a greater charge in aggregate on freight in less than car lots from Cincinnati to Social Circle than they charge on such freight from Cincinnati to Augusta.

May 29, 1894.

A PPEAL by complainant from a decree of the Circuit Court of the United States for the Northern District of Georgia reversing the relief demanded in a proceeding by the Interstate Commerce Commission to enforce an order made by it in reference to rates over defendants' roads. *Reversed.*

The James & Mayer Buggy Company manufactured carriages and buggies at Cincinnati, Ohio; defendants were common carriers carrying freight from Cincinnati to points in Georgia, including Atlanta, Social Circle and Augusta. The rates on buggies in less than car load lots from Cincinnati to Atlanta and Augusta were \$1.07 per hundred, and the rate to Social Circle, which was on the line between Atlanta and Augusta, was \$1.87. The distance from Cincinnati to Atlanta was 474 miles; from Cincinnati to Augusta was 645 miles, and from Cincinnati to Social Circle 526 miles. The Buggy Company instituted proceedings before the Interstate Commerce Commission to have the rates corrected and equalized. The defendants claimed that the rates charged from Atlanta to Social Circle were not unreasonable, and that the transportation from Cincinnati to Augusta was performed under circumstances substantially dissimilar from that between Cincinnati and Social Circle, so as to justify a lower charge, although the distance was greater. The Commission heard evidence and rendered a decree requiring the railroads to desist from making the greater charge to Social Circle than it made to Augusta, establishing the propositions stated in the headnotes, *supra*, and it also fixed the rates from Cincinnati to Atlanta at \$1.00 per hundred pounds. 8 Inters. Com. Rep. 682.

The railroads did not obey the order, and the Commission then instituted a proceeding before the Circuit Court of the United States for the Northern District of Georgia to enforce obedience to the order. The circuit court (Newman, J.) heard further testimony in the case and finally entered a decree dismissing the bill in support of which an elaborate opinion was filed. 4 Inters. Com. Rep. 332.

The Commission appealed the case to the United States Circuit Court of Appeals.

Before **Pardee** and **McCormick**, Circuit Judges, and **Toulmin**, District Judge.

Messrs. N. J. Hammond and **George F. Edmunds**, for appellant:

Section 50 of the English traffic act of 7 & 8 Vict. chap. 8 (the full text of which is copied in a note to *Great Western R. Co. v. Sutton*, L. R. 4 H. L. 228) provided for equal charges for the transportation of persons and property, where the service was rendered "under like circumstances," the court held that the qualifying word, "like," did not require the circumstances to be identical and from that time forward the definition given to the word "like" is fully and exactly expressed by the words, "substantially similar."

In 1868, 1869, the case of *Great Western R. Co. v. Sutton*, L. R. 4 H. L. 228, was decided in the House of Lords, and the question of what constituted "like (substantially similar) circumstances" was the gist of the whole controversy. *Mr. Justice Blackburn*, said, as to the meaning of these words, that they applied to the "cir-

cumstances of the carriage and not to the trade of the consignor or consignee."

Under this phraseology, competition did not differentiate the circumstances, the fact that the persons who are charged less are so constituted that they could go by another road, and probably would do so, would not be a circumstance justifying an unequal charge. *Evershed v. London & N. W. R. Co.* L. R. 3 App. Cas. 1029.

Denaby Main Colliery Co. v. Manchester, S. & L. R. Co. L. R. 11 App. Cas. 97, is peculiarly interesting because it discloses the element of competition of "market with market."

Mr. Justice Blackburn said: "Neither is it a difference of circumstances justifying an inequality of charge that those whom the railways charge less are seeking to develop a new trade."

In accordance with familiar principles, that definition became a necessary and constituent part of our legislation; and this principle has been distinctly recognized by the Supreme Court with reference to the Act to Regulate Commerce. *Interstate Commerce Com. v. Baltimore & O. R. Co.* 4 Inters. Com. Rep. 92, 145 U. S. 263, 36 L. ed. 699.

The transportation from Cincinnati to Social Circle, Augusta and Atlanta was on "the same line."

For nearly a generation the expression "continuous lines for transportation" has stood upon the statute books of the United States. See Act of July 1, 1862 (12 Stat. at L. 381; 18 Stat. at L. 112) and the Act of June 15, 1866 (14 Stat. at L. 66) as covered by § 5258 of the Revised Statutes. In 1873 the Supreme Court of the United States, in *Dubuge & S. O. R. Co. v. Richmond*, 86 U. S. 19 Wall. 584, 22 L. ed. 173, had held that the Act of June 15, 1866, and another of July 25, 1866 (14 Stat. at L. 219, Rev. Stat. § 259) "were designed to remove trammels upon transportation between different states interposed by state enactments or by existing laws of Congress," etc.

And so in 1887 and 1889, when dealing with interstate commerce and creating the Commission, etc., the United States, in the exercise of its constitutional power to regulate commerce among the several states, used the same expression of "continuous lines" to mean physical things, over which arrangement is made for through transportation of passengers or merchandise. The railroads interested in this litigation did form such a system.

The evidence shows that prior to this controversy buggies shipped by the complainant by these companies from Cincinnati to Social Circle had been billed on through bills of lading, and that it was only stopped, if stopped at all, by a request from the Georgia Railroad Company, dated July 3, 1891.

Judge Newman's second head note decides practically that railroad companies may make the law apply to their several parts as they please by merely varying their contracts to suit themselves. For that he relies upon *Chicago & N. W. R. Co. v. Osborne*, 4 Inters. Com. Rep. 257, 52 Fed. Rep. 912, decided October 17, 1892, before *Brewer, C. J.* That decision, was made under the old Act of 1887, before it was amended.

While we differ with the judge as to what makes a "line" under the fourth section, certainly there is nothing in that opinion that declares that by a series of contracts affecting interstate commerce carriers thereof may make just such line or as many lines as is agreeable to them; and yet that is necessary to sustain the opinion in this case.

Mr. Edward Baxter, for appellee, the Georgia Railroad Company:

The principles of the common law applicable to common carriers "demanded little more than that they should carry for all persons who applied, in the order in which the goods were delivered at the particular station, and that their charges for transportation should be reasonable. It was even doubted whether they were bound to make the same charge to all persons for the same service."

Interstate Commerce Com. v. Baltimore & O. R. Co. 4 Inters. Com. Rep. 96, 145 U. S. 275, 86 L. ed. 708.

In *Bazendale v. Eastern Counties R. Co.* 4 C. B. N. S. 98, decided February 11, 1858, Byles, *Judge*, said: "I know of no common law reason why a carrier may not charge less than what is reasonable to one person, or even carry for him free of all charge."

In *Branley v. South Eastern R. Co.* 12 C. B. N. S. 104, decided May 12, 1862, Wills, *Judge*, said that the obligation of a carrier at common law is "to charge reasonably, but not to charge equally."

The case of *Great Western R. Co. v. Sutton*, L. R. A. 4 H. L. 226, was decided July 13, 1869. *Mr. Justice Blackburn* said (p. 237): "At common law a person holding himself out as a common carrier was not under any obligation to treat all customers equally."

When railways came into operation it became a question for the legislature how far they would, when granting numerous persons power to make a railway and act as carriers on that line, impose on them restrictions beyond what the common law imposed on ordinary carriers.

At first the legislature, in each special act, inserted such clauses as seemed to the particular committees reasonable in each case.

Finally in 1845, the legislature embodied in a general act (8 & 9 Vict. chap. 20) those clauses which it was thought expedient should generally be inserted in railway acts, and the act was known as the Railways Clauses Consolidation Act of 1845.

Section 90, after giving the companies power to fix tolls, provided that all such tolls be at all times charged equally to all persons, and after the same rate, whether per ton, per mile, or otherwise, in respect of all passengers, and of all goods or carriages of the same description, and conveyed or propelled by a like carriage or engine, passing only over the same portion of the line of railway under the same circumstances; and no reduction or advance in any such tolls shall be made, either directly or indirectly, in favor of or against any particular company or person traveling upon or using the railway.

A study of the English cases will show that while Parliament intended to change the common law so as to require that rates should thereafter be impartial as well as reasonable,

4 INTER S.

it did not intend to deprive railway companies of the right to operate their railways for profit, nor of the right to make all such arrangements as might conduce to their pecuniary interests, provided the rates charged by them were reasonable and impartial.

Parker v. Great Western R. Co. 3 Eng. R. & Canal Cas. 599; *Atty. Gen. v. Birmingham & D. J. R. Co.* 2 Eng. R. & Canal Cas. 182; *Nicholson v. Great Western R. Co.* 1 Nev. & MacN. 148; *West v. London & N. W. R. Co.* 1 Nev. & MacN. 172; *Ransome v. Eastern Counties R. Co.* 1 Nev. & MacN. 70; *Oxlade v. North Eastern R. Co.* 1 Nev. & MacN. 94; *Interstate Commerce Com. v. Baltimore & O. R. Co.* 3 Inters. Com. Rep. 198, 43 Fed. Rep. 49.

If, in considering the circumstances and conditions under which transportation is conducted, it is legitimate to regard "the pecuniary interests" of the railway company, and, if it can be shown that "the pecuniary interests" of the company will be promoted by allowing the company to compete for business at certain rates, at certain competitive points, without detriment to the interests of the public considered as a whole, then the effect of such competition upon the circumstances and conditions under which the transportation is conducted, may be legitimately regarded.

In examining the English cases which may be claimed to have held that the word "circumstances" applied exclusively to the "circumstances of the carriage," and that competition can in no case, be considered as differentiating the circumstances under which transportation is conducted, it will save time to divide said cases into classes.

In the first class will be placed those cases in which it has been held that under the English statutes a railway company has no right to discriminate against an individual on account of his occupation or personal status.

In considering whether the goods of one person have been conveyed over a railway "under the same circumstances" as the goods of another person, the English courts have invariably held that the company has no right to consider the occupation or personal status of the shippers, but must confine itself to a comparison of the services rendered by the railway to the respective shippers.

Edwards v. Great Western R. Co. 11 C. B. 588; *Pickford v. Grand Junction R. Co.* 10 Mees. & W. 899; *Parker v. Great Western R. Co.* 11 C. B. 545, 7 Man. & G. 253; *Crouch v. London & N. W. R. Co.* 3 Car. & K. 789, 9 Exch. 556, 1 Nev. & MacN. 16.

If the defendant railroad companies were to charge the Southern Express Company, which does business over their line, higher rates than the general public on shipments from Cincinnati to Augusta, the express company would under the cases, just noticed, be entitled to redress. There is competition between Cincinnati and Augusta, and competitive rates prevail at Cincinnati; and the Southern Express Company, when shipping from Cincinnati, is entitled to precisely the same competitive rates as the general public at Cincinnati.

But Social Circle is a non-competitive local station on the Georgia R. R. between Atlanta and Augusta; and if the express company should insist that it was entitled to the same

rates from Cincinnati to Social Circle as prevail between Cincinnati and Augusta, then a totally different question would be presented, and upon which the cases just noticed throw no light whatever.

The cases of *Bazendale v. Great Western R. Co.* 1 Nev. & MacN. 202, decided Nov. 15, 1856; *Garton v. Great Western R. Co.* 1 Nev. & MacN. 214, decided Jan. 29, 1859, and *Great Western R. Co. v. Sutton*, L. R. 4 H. L. 226, differ from the cases just noticed, only in this: That the discriminations, while made against intercepting carriers, were not made in favor of the general public, but were made in favor of the railway companies themselves; they being engaged as rivals of the plaintiffs in the accessorial business of intercepting or express carriers; and the point decided was that if a railway company engages in such an accessorial business it can no more discriminate in its own favor than it can in favor of another individual, or of the general public.

The next class of English cases to be considered is where the courts have held, under the Railway and Canal Traffic Act of 1854, that a railway company can not legally discriminate in favor of a traffic because of its origin and antecedents.

The Act of 1854 provides that "no such company shall make or give any undue or unreasonable preference or advantage to or in favor of any particular description of traffic, nor shall any such company subject any particular description of traffic to any undue or unreasonable prejudice or disadvantage in any respect whatsoever."

This class of cases is well illustrated by the case of *Ransome v. Eastern Counties R. Co.* 1 Nev. & MacN. 68, decided January 29, 1857.

If freight is brought to the Cincinnati, N. O. & T. P. R. Co. at Cincinnati by steamboat from Pittsburg, and similar freight is brought from Pittsburg by the Pittsburg, C. C. & St. L. R. Co. to Cincinnati, and both shipments are there tendered for the first time to the Cincinnati, N. O. & T. P. R. Co. for transportation to Augusta, that company cannot, according to the class of cases just cited, legally discriminate in favor of the freight brought by railway to Cincinnati, over that brought by steamboat.

The next class of English cases to be considered is where the courts have held, under the Act of 1854, that a railway company can not legally discriminate in favor of a traffic, because of the ultimate use to which it is to be put, after the railway transportation has been completed and ended.

This class of cases is illustrated by the case of *Manchester, S. & L. R. Co. v. Denaby Main Colliery Co.* 4 Eng. R. & Canal Traffic Cas. 437-455, decided in December, 1885, in the Queen's Bench Division and in the Court of Appeals; and in December, 1885, decided in the House of Lords. See 6 Eng. R. & Canal Traffic Cas. 133.

The most that can be claimed as having actually been decided in the Denaby case, is, that where the services performed by a railway company in respect of one local shipment, are identical with the services performed by said company in respect of another local shipment, the two shipments will be re-

garded as having been made "under the same circumstances" notwithstanding any difference that may exist between them as to the ultimate use to which they are to be put after their arrival at the place of common destination.

The case of *Oxlade v. North Eastern R. Co.* 1 Nev. & MacN. 72, decided in 1857, may be said to belong to the same class as the Denaby case.

If two merchants at Cincinnati offer to the Cincinnati, N. O. & T. P. R. Co. similar shipments consigned to Augusta, they are, under the class of cases just noticed, entitled to the same competitive rates though one of them may intend his shipment for export to Cuba, and the other may intend his for consumption at Augusta.

But where a railroad company concedes, at a competitive point, competitive rates to shippers at that point, while those shippers may have a certain advantage over shippers at non-competitive points, it is an advantage which the competitive shippers have, not by reason of the action of the railroad company, but by reason of the fact that they can secure similar rates by other competing routes.

The next class of English cases to be considered is where the courts have held that a railway company has no right to discriminate between different local shippers by depriving one of them of a natural advantage which he may have over the other, by reason of location, distance, etc. *Ransome v. Eastern Counties R. Co.* 1 Nev. & MacN. 109, known as case No. 2, and decided on February 25, 1858.

The case of *Denaby Main Colliery Co. v. Manchester, S. & L. R. Co.* 3 Nev. & MacN. 426, decided in 1880 by the English Commissioners, may also be considered in this case. See 4 Eng. R. & Canal Traffic Cas. 437, and L. R. 11 App. Cas. 97, 99.

As I understand the tariffs of the defendant railway companies, in this case, they do not deprive any of their local shippers of any natural advantages which any of them may possess by reason of location, etc. On the contrary, all of them are charged reasonable rates; and on the Georgia R. R. they are charged proportionate to their respective distances from the nearest competitive points: so that at all local stations on the Georgia R. R. the indirect advantages of competitive rates are secured by the local shippers.

The next class of English cases to be considered is where the courts have held that a railway company has no right to give to some of its local shippers the benefit of competitive rates, while it refuses those rates to other local shippers, upon some ground that is capricious, arbitrary and unreasonable.

An illustration of this class of cases will be found in the case of *Budd v. London & N. W. R. Co.* which was decided June 18, 1877. See 4 Nev. & MacN. 393, 4 Eng. R. & Canal Traffic Cas. 393, Brown & Macnamara.

The defendant railway companies in this case make no such arbitrary or capricious distinction between their customers, as was made in the Budd case.

The English Railway and Canal Commissioners, as late as November, 1890, spoke of the Budd case as being "in conflict with the

subsequent Scotch case of *Murray v. Glasgow & S. W. R. Co.* 4 Nev. & MacN. 456, and with the case of *Denaby Main Colliery Co. v. Manchester, S. & L. R. Co.* 7 Eng. R. & Canal Traffic Cas. 184, 185, 142; *Liverpool Corn Traders Assn. v. London & N. W. R. Co.* 1891 [1 Q. B. 120].

The next class of English cases to be considered is, where the courts have held that a railway company can not legally discriminate in favor of one local shipper against another local shipper merely to prevent the threatened construction of a competitive railway line.

The cases of *Harris v. Cockermouth R. Co.* 1 Nev. & MacN. 97, decided January 15, 1858; *Slake Co. v. Festiniog R. Co.* 2 Nev. & MacN. 73, decided in December, 1874, and the case of *Holland v. Festiniog R. Co.* 2 Nev. & MacN. 278, decided in February, 1876, all belong to that class.

If the defendant railway companies in this case were to give lower rates to certain shippers at Cincinnati than they give to other shippers at that point, in consideration that the former should agree to ship all their traffic over the defendant's line to Augusta and not aid in the construction of a competitive line from Cincinnati to Augusta, a case would be presented precisely within the class of cases just cited. But the defendant railway companies make no such discrimination between their shippers.

The next class of English cases to be considered is where the courts have held that a railway company can not legally discriminate in favor of one local shipper against another local shipper simply because the former has agreed to ship the whole or some indefinite amount of his traffic, over the defendant's line, while the other has not.

In that class may be placed the cases of *Bazendale v. Great Western R. Co.* (known as the "*Bristol Case*") 1 Nev. & MacN. 191, decided November 9, 1858, and the case of *Belladyke Coal Co. v. N—B— R. Co.* 2 Nev. & MacN. 105, decided March, 1875.

No such question is presented in this case.

The next class of English cases to be considered is where the courts have held that a railway company can not legally discriminate in favor of one shipper against another shipper, shipping the same class of freight between the same competitive points, unless there be some substantial difference in the cost of the service to the company. The case of *Garton v. Birmingham & E. R. Co.*, 1 Nev. & MacN. 218, decided June 18, 1859, will furnish one illustration of this class of cases. See also *Thompson v. London & N. W. R. Co.* 2 Nev. & MacN. 115; *London & N. W. R. Co. v. Evershed*, L. R. 3 App. Cas. 1029, *et seq.*

The note of the reporters to *Thompson v. London & N. W. R. Co.*, 2 Nev. & MacN. 121, states exactly my conception of the English law, which is, that a railway company may, in order to meet competition with other railways, or with water lines, reduce its fares or rates to the public at such competitive points, provided it makes its reductions equally and impartially to every one who offers to ship from such competitive points. But it can no more discriminate between different shippers at competitive points, than it can discriminate be-

tween different shippers at non-competitive points, unless the shippers have obligated themselves to ship definite quantities, at regular intervals, in train load lots, or have in some other way offered a regular traffic to the company which can be conducted at a less cost to the company than other traffic. Citing *Strick v. Swansea Canal Co.* 16 C. B. N. S. 245; *Ransome v. Eastern Counties R. Co.* (No. 1) 1 Nev. & MacN. 68; *Oxlade v. North Eastern R. Co.* (No. 1) 1 Nev. & MacN. 72; *Garton v. Birmingham & E. R. Co.* 1 Nev. & MacN. 218; *Harris v. Great Western R. Co.* 1 Nev. & MacN. 97; *Nicholson v. Great Western R. Co.* 1 Nev. & MacN. 121.

I have discussed every class of English cases decided before the passage of the Act to Regulate Commerce, which can be claimed as even intimating that competition can in no case be considered as a circumstance affecting transportation.

None of the cases, when examined upon their facts, are authority for so broad an assertion.

The question as to whether transportation conducted between competitive points, is conducted under substantially similar circumstances and conditions with transportation conducted between non-competitive points, was before the English Chancery Court in 1840, in the case of the *Atty. Gen. v. Birmingham & D. J. R. Co.* 2 Eng. R. & Canal Cas. 124.

The Lord Chancellor said: "The Attorney General now asks me to interfere to prevent the company carrying passengers (between competitive points) at too low a rate. . . . It is not necessary to say anything about the jurisdiction of the court, or how far I should interfere if I had the power, because I am quite clear that the 63d section has not the slightest reference to this case."

Hozier filed a petition against the Caledonia R. Co., alleging that he was aggrieved by being charged nine shillings six pence for traveling between Motherwell and Edinburgh, a distance of forty-three miles, while passengers traveling in the same train, and in the same class of carriage between Glasgow and Edinburgh, a distance of fifty-nine miles, were charged only two shillings; and that the through rates charged between Edinburgh and Glasgow amounted to an undue and unreasonable preference in favor of such through passengers over petitioner, and others, traveling between Motherwell and Edinburgh, or Motherwell and Glasgow, or intermediate places.

The petition was dismissed January 20, 1855.

Lord Curriehill said: "The complainant must satisfy us that there is something unfair or unreasonable in what he complains of, in order to warrant any interference. Now, I have read the statement in the petition, and I have listened to the argument in support of it, to find what is unreasonable in giving that advantage to through passengers. What disadvantage do Motherwell passengers suffer by this? I think that no answer was given to this, except that there was none." *Hozier v. Caledonian R. Co.* 1 Nev. & Macn. 81.

In *Jones v. Eastern Counties R. Co.*, 1 Nev. & MacN. 45, it appeared that defendant charged £45 per year for season tickets from Colchester to London, a distance of twenty miles, while it charged for such tickets only £20 per year from Harwich to London, a distance of over

seventy miles. It was insisted that this was an undue preference of the inhabitants of Harwich over those of Colchester.

The court (on January 27, 1858) refused a rule for an injunction. Williams, *Judge*, said: "For anything that appears there may be very good reasons for making such difference in the price. . . . At this moment there is active competition at Reading between the Great Western and Southwestern railways; the consequence is, that considerably less is charged for tickets from that place to London, and *vice versa*, than for intermediate stations." See also *Napier v. Glasgow & S. W. R. Co.* 1 Nev. & MacN. 292; *Foreman v. G—, E. R. Co.* 2 Nev. & MacN. 203; *Richardson v. Midland R. Co.* 4 Eng. R. & Canal Traffic Cas. 1; *Broughton Coal Co. v. Great Western R. Co.* 4 Eng. R. & Canal Traffic Cas. 191; *Strick v. Swansea Canal Co.* 16 C. B. N. S. 245; *Ransome v. Eastern Counties R. Co.* 1 Nev. & MacN. 63, 120; *Harris v. Cockermouth R. Co.* 1 Nev. & MacN. 102.

A careful examination of the cases cited will leave no reasonable doubt but that the English courts and the English Railway Commissioners have never regarded traffic conducted between competitive points as conducted "under the same circumstances" as traffic conducted between points not competitive.

The same authorities also establish the proposition that the forced concession of competitive rates between competitive points has never been regarded by the English courts or Commissioners as an "undue or unreasonable preference or advantage to, or in favor of," shippers at those competitive points, nor an "undue or unreasonable prejudice or disadvantage to, or against," shippers at points not competitive. See also *Phipps v. London & N. W. R. Co.* [1892] 2 Q. B. 229.

There is quite a difference between literal similarity, such as might technically satisfy the letter of the English "equality clause," and the "substantial" similarity which is required by both the letter and the spirit of the Act to Regulate Commerce.

Atchinson, T. & S. F. R. Co. v. Denver & N. O. R. Co. 110 U. S. 668, 28 L. ed. 292, in effect, establishes—

First: That, in order to meet competition, the Cincinnati, N. O. & T. P. R. Co. the Western & A. R. Co. and the Georgia & R. Co. have the right to form a through line from Cincinnati to Augusta, and that the through rate from Cincinnati to Augusta may, lawfully, be less than the sum of the locals of those three roads.

Second: That the proportion of the through rate, from Cincinnati to Augusta, which is received by the Georgia R. Co. may, lawfully, be less than the local rate charged by said road for transportation from Atlanta to Augusta.

Third: That freight transported between the competitive points, Cincinnati and Augusta, is not transported under substantially similar circumstances and conditions as freight transported from Cincinnati to Atlanta by the Cincinnati, N. O. & T. P. R. Co. and the Western & A. R. Co. and thence by the Georgia R. Co. to Social Circle, a local station

on that road, a non-competitive point; and the fact that both shipments may be transported from Atlanta to Social Circle in the same cars and trains, is a matter of no consequence. See also *Union Pac. R. Co. v. United States*, 104 U. S. 668, 26 L. ed. 884; *Ragan v. Aiken*, 9 Lea, 619, 42 Am. Rep. 684; *Scofield v. Lake Shore & M. S. R. Co.* 43 Ohio St. 620; *Ex parte Koehler*, 28 Fed. Rep. 533, 25 Fed. Rep. 78.

In *Missouri Pac. R. Co. v. Texas & P. R. Co.* 31 Fed. Rep. 862, decided June 21, 1887, Judge Pardee said: "That competition, the life of trade, cuts an important figure in the conditions and circumstances attendant upon transportation of property and passengers, cannot well be overlooked nor denied, nor can it well be denied, that, as between the short and long haul, competition may exist to that extent that what would otherwise be similar circumstances and conditions will be dissimilar circumstances and conditions." See also *Ex parte Koehler*, 31 Fed. Rep. 319; *Junod v. Chicago & N. W. R. Co.* 3 Inters. Com. Rep. 664, 47 Fed. Rep. 298; *Osborne v. Chicago & N. W. R. Co.* 48 Fed. Rep. 54.

In one of the earliest cases decided by the Commission Judge Cooley said: "The charging or receiving the greater compensation for the shorter, than for the longer haul, is seen to be forbidden only when both are under substantially similar circumstances and conditions; and therefore, if in any case the carrier, without first obtaining an order of relief, shall depart from the general rule, its doing so will not alone convict it of illegality, since if the circumstances and conditions of the two hauls are dissimilar, the statute is not violated." *Re Southern R. & S. S. Assn.* 1 Inters. Com. Rep. 280, 1 I. C. C. Rep. 57. See also *United States v. Mellen*, 4 Inters. Com. Rep. 247, 53 Fed. Rep. 229; *Interstate Commerce Com. v. Atchison, T. & S. F. R. Co.* 4 Inters. Com. Rep. 323, 50 Fed. Rep. 295.

Judge Jackson, in speaking of §§ 2, 3 of the Act to Regulate Commerce, said: "To come within the inhibitions of said sections the differences must be made under like conditions; that is, there must be contemporaneous service in the transportation of like kinds of traffic, under substantially the same circumstances and conditions. In respect to passenger traffic, the position of the respective persons or classes between whom differences in charges are made must be compared with each other, and there must be found to exist substantial identity of situation, and of service accompanied by irregularity and partiality, resulting in undue advantage to one, or undue disadvantage to the other, in order to constitute unjust discrimination." *Interstate Commerce Com. v. Baltimore & O. R. Co.* 43 Fed. Rep. 49.

The Interstate Commerce Commission in all of its decisions, has conceded that water competition, or competition with foreign railroads, or competition with lines of railroads wholly in a single state, may make out the dissimilarity of circumstances and conditions in reference to the transportation of traffic, which will authorize a railroad company, without applying to the Commission, to charge less for the longer than for the shorter distance. *Re Southern R. & S. S. Co.* 1 Inters. Com. Rep. 278, 1 I. C. C. Rep. 81; *Gerke Brew. Co. v. Louisville &*

N. R. Co. 4 Inters. Com. Rep. 272, 5 I. C. C. Rep. 607; *Trammell v. Clyde SS. Co.* 4 Inters. Com. Rep. 146, 5 I. C. C. Rep. 387.

In *Re Southern R. & SS. Co. supra*, the Commission said, that even as between railroads which are subject to the Act to Regulate Commerce, there might be rare and peculiar cases of competition, which would create the dissimilarity of circumstances and conditions entitling the carrier to charge less for the longer than the shorter haul. See also *Trammell v. Clyde SS. Co.* and *Gerke Brew. Co. v. Louisville & N. R. Co. supra*.

Yet the Commission holds that in all cases it must appear that the competition is actually existing and that it is of a controlling force, in respect to traffic important in amount. *Re Southern R. & SS. Co. supra*.

The real question, therefore, is, what is meant by the "actual existence" of competition?

The testimony in this case shows that there are seven rail lines which "actually compete" for traffic between Cincinnati and Atlanta; and thirteen rail lines which "actually compete" for traffic between Cincinnati and Augusta.

The testimony further shows that there are a number of other additional lines which "can practically compete" between those points.

We have, therefore, made out "a clear case of competition," not only "potential" but actual; and in respect to the entire traffic passing between those cities.

One of the defenses relied upon in this case is, that at Baltimore and other eastern cities, large manufactories of buggies, carriages, etc., exist, and that the product of those factories is transported to Augusta at such rates, that if the defendants charge a higher rate than \$1.07 per 100 pounds from Cincinnati to Augusta, no freight of that character would come over defendants' roads; for the product of the eastern factories would be delivered in Augusta at a rate which would exclude the Cincinnati product from the Augusta market.

The Commission held, in effect, that competition between market and market, or between product and product, can not be considered as affecting the circumstances and conditions under which transportation is conducted.

If the appellee railroad companies can obtain rates for carrying the traffic which are reasonably remunerative to them, and if Cincinnati shippers, after paying those rates, can sell their products in the Augusta markets at a profit reasonably remunerative to them, why should the Commission interfere with the traffic between Cincinnati and Augusta? Who is to be benefited by such interference except the city of Baltimore? And Baltimore, with the ocean and the Savannah river, is amply able to take care of herself.

If the appellees should carry freight from Cincinnati to Atlanta, for less than its cost of carriage, they would be guilty of giving to Cincinnati an undue preference, which would operate as an unjust prejudice against every other city not similarly favored. But as the rates charged by the appellees on first class freight from Cincinnati to Augusta, are reasonably remunerative, it is not giving to Cincinnati an undue preference, to allow her to avail herself of those rates.

On the contrary, it would be subjecting Cincinnati to an undue prejudice, if the appellees were to refuse to carry her traffic to Augusta at rates fairly remunerative to the carriers; and it would also subject Augusta to an undue prejudice to deprive her of the benefit of the competition afforded by the introduction of the Cincinnati products into her markets. See *Phipps v. London & N. W. R. Co.* [1892] 2 Q. B. 242.

The rates charged in this case are "reasonable and just"; and therefore not violative of the first section. *Interstate Commerce Com. v. Baltimore & O. R. Co.* 4 Inters. Com. Rep. 92, 145 U. S. 277, 36 L. ed. 703; *Killmer v. New York Cent. & H. R. Co.* 100 N. Y. 402.

The rates charged in this case do not "unjustly discriminate" against Social Circle; and therefore they do not violate the second section. *Interstate Commerce Com. v. Baltimore & O. R. Co. supra*; *Harwell v. Columbus & W. R. Co.* 1 Inters. Com. Rep. 636, 1 I. C. C. 248.

Mr. Joseph B. Cumming, also for appellee, the Georgia Railroad Company:

Social Circle is on the "line" of the Georgia Railroad, and is treated like other stations on that "line." But it is not included in any agreement between the Georgia and any other company; on the contrary there is an express refusal to make any agreement on the subject; so it is not on any "line" starting in Cincinnati or in any other place off the Georgia Railroad. *Chicago & N. W. R. Co. v. Osborne*, 4 Inters. Com. Rep. 257, 52 Fed. Rep. 912; *United States v. Mollen*, 4 Inters. Com. Rep. 747, 58 Fed. Rep. 229.

Messrs. Edward Colston and George Hoadly, Jr., for appellee, the Cincinnati, New Orleans & Texas Pacific Railway Company.

Messrs. Payne & Tyne, for appellee, the Western & Atlantic Railway Company.

By the Court:

This cause came on to be heard at this term, and was argued by counsel, and thereupon, and upon consideration thereof,

It is ordered, adjudged and decreed that the decree of the Circuit Court of the Northern District of Georgia, rendered on June 5, 1890, be annulled, avoided and reversed, and this cause be remanded to the said circuit court, with instructions to enter a decree in favor of the complainant, the Interstate Commerce Commission, and against the defendants, the Cincinnati, New Orleans & Texas Pacific Railway Company, the Western & Atlantic Railroad Company and the Georgia Railroad Company, commanding and restraining the said defendants, their officers, servants and attorneys, to cease and desist from making any greater charge in the aggregate on buggies, carriages and on other freight of the first class carried in less than carloads from Cincinnati to Social Circle than they charge on such freight from Cincinnati to Augusta; that they so desist and refrain within five days after the entry of the decree, and in case they or any of them shall fail to obey said order, condemning the said defendants and each of them to pay one hundred dollars a day for every day thereafter

they shall so fail, and denying the relief prayed for in relation to charges on like freight from Cincinnati to Atlanta. The said defendants to pay all costs of court.

UNITED STATES CIRCUIT COURT OF APPEALS, FIFTH CIRCUIT.

SAVANNAH, FLORIDA & WESTERN R. CO. *et al.*, *Appts.*,

v.

FLORIDA FRUIT EXCHANGE.

1. The increase of rates for the transportation of oranges from Florida points to northeastern markets over the line of the Savannah, Florida & Western Railway and its connections, which was made November 23, 1890, and amounted to 33½ per cent upon rates previously in effect, is unjust, unreasonable and excessive, and in violation of the Interstate Commerce Act; and it is not justified by the increased facilities which have been afforded by the carriers for handling and preserving the fruit.
2. Decree affirming a decree enjoining the violation of an order of the Interstate Commerce Commission passed November 29, 1891, which prohibited the exaction of a rate for the transportation of oranges from Florida to northeastern markets which should exceed the rates in force prior to November 3, 1890, by more than five cents per box—allowing complainant a counsel fee of \$5000—and directing defendant to pay costs of the suit, including the master's charges of \$870.50.

May 29, 1894.

A PPEAL by defendants from a decree of the United States Circuit Court for the Northern District of Florida enforcing a decree of the Interstate Commerce Commission enjoining the exaction of excessive rates for the carriage of oranges from Florida points to northeastern cities. *Affirmed.*

On December 30, 1890, the Railroad Commission of Florida filed a complaint before the Interstate Commerce Commission against the Savannah, Florida & Western Railway Co. and its connections, and other companies to the number of seventeen, in which it was alleged that during the season of 1885-86 the through rates for the transportation of oranges and lemons from points in Florida were, and are still, made up of the rates charged by the gathering railroads in Florida to certain base points, with the rates therefrom to the points of destination added thereto, and that from these base points, the carriers, by arrangements and agreements among themselves, had established certain independent lines, five in number; that during the said season of 1885-86, and for each season since, the several lines, by arrangements and agreements among themselves, established and maintained rates for the transportation of oranges and lemons by said several lines from said base points to said points of destination with but few changes until the season of 1889-90, which rates were, from the base points to New York by three of the lines, 30 cents per standard box and by the other two 37½ cents and 43 cents respectively. At the beginning of the 1889-90 season the said several carriers constituting said several lines combined and agreed to advance, and did actually advance, said rates 10 cents per standard box; that said advanced rates are unlawful and in violation of the Act to Regulate Commerce, and relief was prayed that the carriers be compelled to desist from charging more than 25 cents per standard box. The Commission, after hearing

testimony and considering briefs in the case, entered an order that an increase of 5 cents per box over rates in force prior to November 23, 1890, was justified, but that the said several lines should be prohibited from exacting more than said increase. See 3 Inters. Com. Rep. 688.

The transportation companies having neglected to comply with the order of the Commission, the Florida Fruit Exchange instituted a proceeding before the United States Circuit Court for the Northern District of Florida to compel its enforcement. The case was referred to a special master, whose finding substantially agreed with that of the Commission, and a decree was entered thereon embodying the points shown in the above headnotes. The defendants thereupon appealed to the circuit court of appeals, specifying the following errors:

1st. That the circuit court erred in rendering the decree and order on the 30th day of November, 1892, whereby it affirmed the master's report filed in this case on the 17th of September, A. D. 1892, and wherein it overruled the exceptions of the defendant to the report of said master.

2d. That the said circuit court erred in finding as a matter of fact that 35 cents per box for oranges from base points in Florida to northeastern cities of the United States was a reasonable rate.

3d. That the circuit court erred in allowing a fee of \$5000 to complainant's solicitor.

4th. (Withdrawn upon the argument.)

5th. That the court erred in allowing the fees charged by the master, said fees being excessive.

6th. That the court erred in refusing to allow the defendant its order of supersedeas and by this a bond that should operate as a supersedeas to the decree of the 30th day of November, A. D. 1892, or of any part thereof.

Argued before **Pardee** and **McCormick**, Circuit Judges.

Messrs. R. G. Erwin and John E. Hart-ridge, for appellant:

The question of reasonableness of rates involves so many considerations and is affected by so many conditions and circumstances which may seem at first blush to be foreign, that it is quite impossible to deal with it on mathematical principles or on any principles whatever without a consciousness that no conclusion that can be reached, can by demonstration be shown to be absolutely correct.

1st Annual Report of Interstate Commerce Commission (1887) pp. 312, 313.

Classification is the foundation of all rate making.

1st Annual Report of Interstate Commerce Commission, pp. 803, 313.

On the system of apportioning the charges strictly to the cost, much of the commerce of the country would have no existence at all, for the article at the place of delivery would not be worth the purchase price with the transportation added.

1st Annual Report of Interstate Commerce Commission, p. 308.

In determining what is a reasonable rate for a particular commodity, the rates charged on the same commodity by other roads situated as nearly similar as may be, the diversities between the railroad in question and such other railroad, the relative amount of through and local business, the proportion borne by the commodity in question to the rest of the local traffic, the market value of the commodity and its gradual reduction, and all other questions affecting the traffic and relating to the other considerations entering into the "charges of the carriers."

Evans v. Oregon R. & Nav. Co. 1 Inters. Com. Rep. 641, 1 I. C. C. Rep. 325.

Shippers cannot justly demand that in all cases the rate on local shipments shall not be higher than the particular division of the through rate from distant points to the point of delivery.

Rend v. Chicago & N. W. R. Co. 2 Inters. Com. Rep. 313, 2 I. C. C. Rep. 540.

The division of the through rate cannot in any way affect the reasonableness of the rate. It is not apparent how a division of the earnings of two roads can concern or affect the public, so long as the rate of transportation on them is reasonable.

Ex parte Koehler, 23 Fed. Rep. 534.

The character of the commodity is one of the elements necessary to the determination of what is a reasonable rate.

Imperial Coal Co. v. Pittsburg & L. E. R. Co. 2 Inters. Com. Rep. 436, 2 I. C. C. Rep. 618.

In determining the reasonableness of a rate the market value of the commodity in question is a fact, among other things to be considered.

Evans v. Oregon R. & Nav. Co. supra; *James v. East Tennessee, V. & G. R. Co.* 2 Inters. Com. Rep. 609, 3 I. C. C. Rep. 225; *Harvard Co. v. Pennsylvania Co.* 3 Inters. Com. Rep. 257, 4 I. C. C. Co. 2 Inters. Com. Rep. 436, 2 I. C. C. Rep. 618.

Transportation charges should have reasonable relation to cost of production.

Re Rates and Charges on Food Products, supra; Poughkeepsie Iron Co. v. New York Cent. & H. R. R. Co. 8 Inters. Com. Rep. 248, 4 I. C. C. Rep. 195.

If, upon considering the testimony originally taken before the Interstate Commerce Commission, the court should conclude that the judgment reached by the Commission is erroneous, the petitioner below (appellee here) is again placed in the attitude of asserting an affirmative which it is bound to prove.

Pulton v. Chicago, St. P. M. & O. R. Co. 1 Inters. Com. Rep. 375, 1 I. C. C. Rep. 104.

Mr. C. M. Cooper, for appellee:

The Interstate Commerce Commission, after full hearing of all parties in interest, and the submission by them of voluminous evidence and full argument, determined that the rates complained of were unjust, unreasonable, excessive, and unlawful. Upon rehearing and reargument the Commission affirmed this decision. These findings of the Commission are made by the statute prima facie evidence of the matters therein stated. The master came to the same conclusion after carefully considering said findings and voluminous evidence submitted to him, and after full argument. The circuit court, after full argument by counsel and full consideration, came to the same conclusion and confirmed the master's report. An appellate court will not reverse such findings even if there is conflicting testimony.

Tilghman v. Proctor. 125 U. S. 136, 31 L. ed. 664; *Callaghan v. Myers.* 128 U. S. 617, 32 L. ed. 547; *Kimberly v. Arms.* 129 U. S. 512, 32 L. ed. 764; *Welling v. La Bau.* 32 Fed. Rep. 293, 34 Fed. Rep. 40; *Bates v. St. Johnsbury & L. C. R. Co.* 32 Fed. Rep. 628.

The rates which were in effect immediately before the advance of rates which was complained of had continued in force for five years, being continued by the transportation lines from year to year by yearly agreements among themselves.

The presidents of the transportation lines, overruling the traffic managers and freight agents, suddenly advanced the rates 33½ per cent. So great an advance on long established rates on a staple article is without a precedent or a parallel in the history of transportation lines in this country, and it is submitted that it carries its own condemnation on its face.

Bates v. Pennsylvania R. Co. 2 Inters. Com. Rep. 715, 3 I. C. C. Rep. 435; *Re Rates and Charges on Food Products*, 4th Annual Report of Interstate Commerce Commission, p. 96.

Oranges are worth no more, weight for weight, than flour, if as much; they are no more difficult to handle, except as to flour in barrels—that a barrel will roll and a box will not; no more care appears to be taken of them by railroads, other than the use of cars with grated holes for ventilation; they are shipped released, so if they are perishable that merely makes them a less valuable commodity to the owner, but does not in fact affect the transportation line. The rates complained of are

far in excess of rates fixed by the Interstate Commerce Commission as reasonable rates on flour.

Evans v. Oregon R. & Nav. Co. 1 Inters.

Com. Rep. 641, 1 I. C. C. Rep. 325; *Re Rates and Charges on Food Products, supra.*

DECREE:

The decree appealed from is affirmed with costs.

INTERSTATE COMMERCE COMMISSION.

THE FREIGHT BUREAU OF THE CINCINNATI CHAMBER OF COMMERCE
v.
THE CINCINNATI, NEW ORLEANS & TEXAS PACIFIC RAILWAY COMPANY
et al.

THE CHICAGO FREIGHT BUREAU
v.
THE LOUISVILLE, NEW ALBANY & CHICAGO RAILWAY COMPANY *et al.*

c.

(Nos. 322, 323.)

1. If railway companies engaged in the transportation of traffic from one territory voluntarily enter into an association with railway companies engaged in the transportation of similar traffic from another territory to a common market, for the purpose, among others, of a mutual adjustment of rates over their respective lines, and in pursuance of this purpose as members of such association agree to and maintain rates over their own lines higher than are reasonable and the relation thus established between the rates from the two territories, respectively, is unjustly prejudicial to the former and unduly preferential to the latter, this is a violation of the first paragraph of section 8 of the Act to Regulate Commerce, for which, whether or not there be a joint liability under said Act of the two systems of carriers, there is at least a several liability on the part of those serving the territory injuriously affected.
2. Where the reasonableness of rates is in question, comparison thereof may be made, not only with rates on another line of the same carrier, but also with those on the lines of other and distinct carriers—the value of the comparison being dependent in all cases upon the *degree* of similarity of the circumstances and conditions attending the transportation for which the rates compared are charged.
3. The influence of water competition *via* the Atlantic on rail rates from northeastern cities to southern territory is not so great, as appears by the proof in these cases, as to account for or justify the difference between the mileage rates from those cities and the mileage rates from Chicago and Cincinnati to such territory under the rates complained of, and the fact of that influence on rates from the former cities cannot be invoked as a justification of rates from the latter, which, after due allowance for such influence as a substantially dissimilar circumstance, still appear on comparison of the two sets of rates to be *unduly* preferential to the former and *unjustly* discriminative against the latter. In rates from different territories to a common market, "relative equality is necessary in the *degree* of the similarity" of circumstances and conditions attending the transportation in the two cases.
4. The fact which is made to appear in these cases, that rates on traffic of the numbered classes from Chicago and Cincinnati to Southern territory are made *higher* than they otherwise would be, for the purpose of securing to the lines from northeastern cities the transportation of that traffic from the territory set apart to them under the Southern Railway & Steamship Association Agreement, itself raises a *prima facie* presumption of the unreasonableness of those rates.
5. Each locality competing with others in a common market is entitled to reasonable and just rates at the hands of the carriers serving it and to the benefit of all its natural advantages, and no departure from the rule requiring rates in all cases to be reasonable in themselves can be justified on the ground that it is necessary in order to maintain existing trade relations, or to "protect competing markets," or to "equalize commercial conditions," or to secure to carriers traffic from certain territory assumed to be exclusively theirs.
6. The division of territory between the eastern and western lines provided for in the Southern Railway & Steamship Association Agreement, is without warrant in law and appears to be made for the benefit of the carriers without regard to the interests of shippers in the territory so divided, to whom it is in effect a denial of the privilege of shipping their goods or produce to market by the line or route they may prefer.
7. The "fines" or "penalties" imposed by the provisions of the agreement of the Southern Railway & Steamship Association on members for violation of association rules appear on the face of that agreement to be available as substitutes for payments which would

be exacted under a regular pooling system, and the arrangement under which they are imposed is tantamount to a combination, contract or agreement "for the pooling of freights of different and competing railroads, or to divide between them the aggregate or net proceeds of the earnings of such railroads or any portion thereof," which are forbidden by the Statute.

8. The requirement of the agreement of the Southern Railway & Steamship Association

that its members apply "full local rates upon all traffic subject to the Association Agreement coming from or going to" connecting lines which do not maintain Association rates, while to traffic from other connecting lines conforming to such rates full local rates are not applied, is repugnant to that clause of section 8 of the Act to Regulate Commerce which forbids carriers to "discriminate in their rates and charges between connecting lines."

Decided May 29, 1894.

UNREASONABLE RATES from Chicago and Cincinnati to Southern points. Southern Railway & Steamship Association agreement.

Messrs. E. P. Wilson and Mortimer Matthews for the Cincinnati Freight Bureau.

Messrs. James E. Munroe and N. G. Iglehart for the Chicago Freight Bureau.

Messrs. Edward Colston, Charles M. Oist and George Hoadley, Jr., for the Cincinnati, New Orleans & Texas Pacific Railway Company and the Alabama Great Southern Railway Company.

Messrs. Edward Colston and S. R. Knott for the Louisville & Nashville Railroad Company.

REPORT AND OPINION OF THE COMMISSION.

Clements, Commissioner:

The complaints in these cases, which were heard and may be disposed of together, were filed, respectively, by the Freight Bureau of the Cincinnati Chamber of Commerce and the Chicago Freight Bureau. The former will hereinafter be referred to as the Cincinnati case, and the latter as the Chicago case.

In both complaints, Baltimore, Philadelphia, New York, Boston and contiguous territory, are designated "Eastern Seaboard Territory;" Knoxville and Chattanooga, Tenn., Rome and Atlanta, Ga., Birmingham, Anniston and Selma, Ala., Meridian, Miss., and contiguous territory, "Southern Territory;" and Cincinnati, Ohio, Louisville, Ky., Indianapolis and Evansville, Ind., Chicago and Cairo, Ill., St. Louis, Mo., and contiguous territory, "Central Territory." These designations will be so applied in this opinion.

The general ground of complaint in the Cincinnati case is that the rates of freight established by the defendant carriers from the Eastern Seaboard and Central territories, respectively, to Southern territory, "unjustly discriminate in favor of the merchants and manufacturers whose business is located and transacted in Eastern Seaboard territory and against the merchants and manufacturers whose business is located and transacted in Cincinnati and other points in Central territory." It is stated that "the burden of the

complaint lies against the relation which exists between the current rates of freight on *manufactured articles and merchandise*" (numbered classes) "from Eastern Seaboard territory to Southern territory, and the current rates of freight exacted upon like commodities when shipped from Central territory to the South, and against the unfair basis of general construction of the tariffs under consideration whereby the rates charged for transportation of commodities classified under 'numbered classes' bear a much higher percentage relation to the rates from New York than do the rates on commodities enumerated under the lettered classes" (food products and similar heavy traffic); and it is alleged, "that this improper relation between rates has the effect of restraining and impeding the growth of productive industries in Central territory and encouraging and promoting similar industries in eastern Seaboard territory, and is the direct result of an agreement established by convention between the officers of defendants, whereby in order to secure stability in rates and to prevent competition between the lines leading respectively from the Eastern Seaboard and Central territories to the South, it was decided to secure to the Eastern lines and Eastern territory the traffic in merchandise and manufactured articles and to the Western territory the traffic in food products and similar heavy commodities." In support of these charges as

to the alleged "improper relation" between the rates from Eastern territory and Central territory to Southern territory, and between those on the numbered and lettered classes, tabular statements are given of the distances, and class rates from leading points in the Eastern and Central territories to the points named above in Southern territory and of the percentage relation borne by rates and distances from Cincinnati to those from New York.

The complaint in the Chicago case contains similar tabular statements and charges, made applicable to Chicago, and in addition calls in question the *reasonableness in themselves* of the through rates from Chicago to Southern territory by the averments "that traffic between Chicago and the Southern territory is through traffic and it is unjust to Chicago that rates from that point should be exacted by defendants based upon unreasonably high rates between Cincinnati and other Ohio river crossings and Southern territory, to which are added substantially the local rates in effect from Chicago to Cincinnati and said other Ohio river crossings," and that "if Cincinnati rates are to be taken as a basis, the rates from Chicago to Southern territory should be some fair percentage above the rates from Cincinnati, or some other arbitraries above the Cincinnati rates as the present New York and Boston rates are above the rates from Baltimore." It is also alleged that "the same rates are charged from New York and from Boston to points in Southern territory whose distances vary more than 500 miles," and it is claimed, that if equal rates prevail from points widely separated in Eastern territory such as New York and Boston to Southern territory, the same basis should govern in rate making to the same Southern points from stations in Central territory, such as Cincinnati and Chicago, which are much nearer together than New York and Boston." The prayer of the complainants in both cases is for an order commanding the defendants to desist from the alleged violations of the Act to Regulate Commerce and requiring them to so adjust their several freight tariffs as to afford the merchants and manufacturers of Cincinnati and Chicago and other points in contiguous territory "a fair and equal opportunity to deliver their products to consumers in the South upon such terms of equality compared with their competitors in Eastern Seaboard territory, as their geographical position, commercial ability and ample transportation facilities will justify."

In the Cincinnati case answers are filed by the Cincinnati, New Orleans & Texas Pacific Railway Company (lessees of Cincinnati Southern Railroad) the Alabama Great Southern Railroad Company, the Louisville & Nashville Railroad Company, the East Tennessee, Virginia & Georgia Railway Company, the Atlanta

4 INTER 8.

& West Points Railroad Company, the Central Railroad & Banking Company of Georgia, the Georgia Pacific Railway Company, the Norfolk & Western Railroad Company, the Port Royal & Augusta Railway Company, the Richmond & Danville Railroad Company, the Seaboard & Roanoke Railroad Company, the Western Railway of Alabama, the Baltimore, Chesapeake & Richmond Steamboat Company, the Merchants & Miners Transportation Company, the Ocean Steamship Company and the Old Dominion Steamship Company. They all deny the general charge, that the rates over the respective lines of transportation from the Central and Eastern Seaboard territories to Southern territory unjustly discriminate against Central territory in favor of Eastern Seaboard territory. It is alleged in substance that the all-rail rates from Eastern Seaboard to Southern territory are determined by the combined rail-and-water rates from Boston, New York, Philadelphia and Baltimore *via* Steamship lines to Charleston and Savannah and thence by rail to the interior, and that the rates from Cincinnati and other points in Central territory are not thus controlled by water competition. The other allegations of the complaint stated above are also denied, and it is claimed by most of the respondents that the transportation in which they, as members of through lines from their respective territories to the South, are engaged, is not "*under a common control, management or arrangement, for a continuous carriage or shipment,*" within the meaning of those words as used in the first section of the Act to Regulate Commerce.

In the Chicago case answers are filed by the following railway companies: the Louisville, New Albany & Chicago, the Chicago & Alton, the Chicago & Eastern Illinois, the Cincinnati, Hamilton & Dayton, the Cleveland, Cincinnati, Chicago & St. Louis, the Illinois Central, the Louisville, Evansville & St. Louis, the Pittsburgh, Cincinnati, Chicago & St. Louis, the Terre Haute & Indianapolis, the Cincinnati, New Orleans & Texas Pacific (lessees Cincinnati Southern) the East Tennessee, Virginia & Georgia, the Alabama Great Southern, the Atlanta & West Point, the Central of Georgia, the Georgia Pacific, the Norfolk & Western, the Port Royal & Augusta, the Richmond & Danville, the Seaboard & Roanoke, the Western of Alabama, and the following steamship companies: The Baltimore, Chesapeake & Richmond, the Merchants & Miners Transportation, the Ocean, and the Old Dominion. These answers present substantially the same issues as are raised in the Cincinnati case. It will be noted, that in addition to the railroad and steamship companies made parties defendants in the Cincinnati case, the complaint in the Chicago case is filed against a number of railroad companies running from

Chicago to Cincinnati and other Ohio river points. These roads allege that their "rates are confined to the Ohio river, and that the through rate to any point south of the Ohio river is made by adding their rates to the Ohio (exclusively made by them) to the rates established by the lines south thereof, to the point of destination, over which rates south of the Ohio they neither possess nor exercise any control whatever, either as to the making or enforcement thereof." They also affirm the reasonableness of their rates north of the Ohio.

There are many argumentative averments and allegations of facts contained in the complaints and answers, which it is unnecessary to set forth here, as such as are deemed material will be stated further on and given due consideration.

Facts.

1. The tabular statements mentioned above as being contained in the complaints purporting to show distances and class rates from Cincinnati and Chicago in Central territory and from Boston, New York, Philadelphia and Baltimore, in Eastern Seaboard territory, to the points designated as being in Southern territory, and also giving the percentage relation borne by such distances and rates from Cincinnati and Chicago to those from New York are found to be correct with a few immaterial exceptions. The following are those statements corrected and showing current rates and percentages:

2. The distances from the Eastern Seaboard cities in the above statements are *all rail*, while the rates are *rail and water*, or based on the rail and water rates; both the distances and rates from Cincinnati and Chicago are *all rail*. There are a number of steamship lines running from the Eastern Seaboard to Charleston, Savannah and other southern ports, namely, the Ocean Steamship, the Mallory, the Morgan, the Clyde, and the Merchants and Miners; and the above combined *rail and water* rates appear to be made by adding the rate of the steamer lines to the rate of the rail lines from the ports to interior points. The actual mile-

age by water from New York to Charleston and Savannah is estimated at about 750 miles, but the rates of the steamer lines are made on the basis of what is termed by the witnesses a "constructive mileage" of 230 miles to Charleston and 250 miles to Savannah, that is, the water rate from New York to Charleston is equal to the rail rate for 230 miles by land, and to Savannah, to the rail rate for 250 miles. The all rail distance from New York to Charleston is 799 miles and to Savannah 914 miles. The following are the distances from Charleston and Savannah by rail to the interior points named:

From Charleston,		From Savannah,	
to		to	
Knoxville,	538 miles.	Knoxville,	520 miles.
Chattanooga,	446 "	Chattanooga,	433 "
Atlanta,	303 "	Atlanta,	295 "
Rome,	367 "	Rome,	367 "
Birmingham,	475 "	Birmingham,	462 "
Anniston,	412 "	Anniston,	399 "
Selma, (Via E. T. V. & G.)	561 "	Selma, (Via S. F. R. R.)	462 "
Meridian,	671 "	Meridian, (Via E. T. V. & G.)	669 "

The sums of the "constructive" mileages of 230 miles from New York to Charleston and 250 miles to Savannah, plus the actual rail

mileages to interior points above given, are shown by the following table:

Via Charleston.		Via Savannah.	
to		to	
Knoxville,	763 miles.	Knoxville,	770 "
Chattanooga,	676 "	Chattanooga,	683 "
Atlanta,	538 "	Atlanta,	545 "
Rome,	597 "	Rome,	617 "
Birmingham,	705 "	Birmingham,	712 "
Anniston,	642 "	Anniston,	649 "
Selma,	791 "	Selma,	712 "
Meridian,	901 "	Meridian,	919 "

These are what are termed the "rate making mileages" from New York by water to Charleston and Savannah and thence by rail to the interior points named, upon which the combined *rail and water* rates from New York are based. The rail and water rates from the eastern seaboard cities to southern territory practically control the all rail rates. The all rail rates are the same as the rail and water rates to Knoxville, Chattanooga, Birmingham, Selma and Meridian, but to Rome, Atlanta, Anniston, and points east of a line drawn from Chattanooga through Birmingham, Selma and Montgomery to Pensacola, the all rail rates are higher than the rail and water rates by the following differentials.

Classes.....	1	2	3	4	5	6	A	B	C	D	E	F
Differentials in cents....	8	6	5	4	3	2	2	2	2	2	3	4

3. The lines regularly engaged in the transportation of traffic from Cincinnati, Chicago and contiguous territory, to Southern territory, are *all rail*. There appears to be no 4 INTER S.

through water or rail and water line in regular operation for the transportation of traffic in the numbered classes between those territories. There is a line by lake from Chicago to Buffalo and from that point by rail or canal to New York, which has a *direct* effect on the rail rates between Chicago and the seaboard—particularly the rates on grain and grain products. As to rates on articles of the higher classes, the influence of the water competition does not appear to be so controlling. The rates from Chicago to New York are the basis of the rates from Central and Trunk Line territory to the Northeastern seaboard, the latter being percentages of the former, and the water competition by lake and canal thus *indirectly* exerts an influence upon the rates to the seaboard from as far south as St. Louis and Cincinnati. Traffic may be transported by the lake and canal or lake and rail line from Chicago to New York and thence on the Atlantic to Charleston, Savannah and other southern ports, and thence by rail to interior points in Southern territory, and there is evidence tend-

ing to show that in the past, some shipments have been made that way, but mostly of grain and heavy articles such as are embraced in class 6 of the Official Classification and the lettered classes of the Southern Classification. The traffic shipped from Chicago by lake to Buffalo and from that point by canal or rail to New York is principally wheat, corn and other grains, which can be transferred through an elevator at Buffalo to the canal boat, or car. If the transportation be continued by ocean to a southern seaport the same process of transfer is necessary at the seaboard and these transfers add to the expense. The "navigation season" by the lake and canal line lasts from April to December. In the winter this line suspends and the rail lines appear to advance their grain rates—for example, in November during the navigation season in 1891, the all rail rate on grain (except corn) was 22½ cts. per 100 lbs. and in May, 1892, the grain rate was 20 cts. per 100 lbs., but after the season of navigation closed the normal rate of 25 cts. per 100 lbs. was resumed. The time made by the steamship lines from eastern seaboard cities to Charleston and Savannah is much less than that made by lake and canal from Chicago to New York. The distance by canal is about 450 miles and that mode of transportation is much slower than by lake and ocean. During the season of 1891, the rates on wheat by lake and rail from Chicago to New York were approximately from 14 cts. to 16½ cts. per 100 lbs., and on corn, from 11½ cts. to 17 cts., and by lake and canal, on wheat from 8 cts. to 16 cts., and on corn from 7 cts., to 15 cts. The distance from Chicago to New York is 912 miles and the present *all rail* class rates (which have been in force since Dec. 17, 1888) are as follows:

	Cents per 100 lbs.					
Classes	1	2	3	4	5	6
Rates	75	65	50	35	30	25

The class 6 rate of 25 cts., per 100 lbs., is the regular normal rate on grain and grain products.

The following are the class rates by Ocean Steamship lines from New York to Savannah:

	Cents per 100 lbs.					Per
Classes...	1	2	3	4	5	bbl.
Rates...	55	45	35	28	28	18
	18	18	18	18	28	28
	18	18	18	18	28	31

Merchandise may also be carried from Central territory by rail to Baltimore and thence by steamer to Charleston, Savannah and other southern ports for shipment by rail to the interior. The class rates from Cincinnati to Baltimore are:

	Cents per 100 lbs.					
Class	1	2	3	4	5	6
Rates	62	53½	40½	27½	23	18½

4. The rates on through shipments from Chicago *via* the Ohio river crossings, Cincinnati, Louisville and Evansville, to points in Southern territory, are not prorated the entire distance but are the sum of the regular rate to the Ohio, of the roads north of that river, plus that of those south. The shipments are almost invariably however, under a through bill of lading, quoting a total through rate (made up as above stated) and issued at Chicago by the agent of the initial carrier, and the goods when in car-loads are carried through without transfer or "breaking bulk" at the river. When shipments are in less than car loads, it is stated a transfer is generally made at the river because of the disinclination of the southern roads to pay for the use of cars of other roads. The rates both north and south of the river appear to be influenced to a large extent by competition of the various railway lines, and are not, strictly speaking, local rates. The rates of the roads north of the river are lower per mile than those of the southern roads, this being attributed to the greater volume of tonnage in the territory of the former than in that of the latter. The effect of prorating on a mileage basis the rate from Chicago to points in southern territory would be to advance the proportion of the lines North of the Ohio and to reduce the proportion of the lines South. The rates for transportation between Chicago and the Ohio are what are known as Trunk Line rates, and are governed by the Official Classification and those for transportation between the Ohio and Southern territory are governed by the Classification of the Southern Railway & Steamship Association. The class rates and distances by the short lines from Chicago to the Ohio river points, Cincinnati, Louisville, and Evansville, and to Cairo, are shown below:

To	Distances.	Rates in cents per 100 lbs.					
		1	2	3	4	5	6
Cincinnati	298 miles,	40	34	25	17	15	12
Louisville	304 "	42	36	27	19	17	14
Evansville	287 "	40	34	25	17	15	12
Cairo	364 "	45	35	25	20	15	12

(The distances and rates from Cincinnati to points in Southern territory, are hereinbefore given in the tables taken from the complaints.)

INTER 8.

In the tables of rates which we have given, those containing only the six numbered classes are under the Official Classification.

which is applied east of Chicago and the Mississippi and north of the Ohio and Potomac rivers, and those embracing also lettered classes are under the Classification of the Southern Railway & Steamship Association, which applies south of the Ohio and Potomac and east of the Mississippi rivers. As above stated, grain and grain products fall under class 6 of the Official Classification; in the Southern Classification, grain and its products and heavy freight are in the lettered classes. Manufactures and costly commodities are in the higher classes.

5. It appears from tariffs on file with the Commission that there were in existence when the Interstate Commerce Law was passed and up to April 17, 1893, through rates from New York *via* Cincinnati to Chattanooga, Meridan and Birmingham, less than the sum of the rates to Cincinnati and the rates thence on to those cities, and there are such rates still in effect to Nashville, Memphis, Mobile, and a number of Mississippi river points.

Those through rates to Chattanooga, Meridan, and Birmingham, were as follows:

1	2	3	4	5	6
114	98	86	78	60	49

The following are the rates from New York to Cincinnati:

1	2	3	4	5	6
65	57	44	30	26	22

6. The tables below show the average receipts per ton per mile, the estimated cost of carrying a ton a mile and the number of tons hauled per mile of line, as reported for the years ending June 30, 1890, and 1891, by the roads named therein, being (1) certain of the roads north of the Ohio engaged in transportation of traffic from Chicago to the Ohio, (2) certain of the roads north of the Potomac forming parts of lines from the Eastern seaboard to Southern territory, and (3) certain of the roads south of the Ohio and Potomac rivers continuing the transportation to Southern territory from the Central and Eastern Seaboard territories respectively.

8. The carriers' made parties defendant in the Chicago case may be divided into three classes: (1), those north of the Ohio participating in the transportation of traffic to that river; (2), those south of the Ohio and continuing the transportation from that river to Southern territory, and (3) those participating in the transportation from Eastern to Southern territory. The defendants in the Cincinnati case embrace the two classes last named.

The roads of the defendants north of the Ohio, except the Illinois Central, do not extend south beyond the river and are distinct in their organization and ownership from their southern connections. The Illinois Central crosses the river at Cairo and runs south *via* Holly Springs (near Memphis) to New Orleans. At Cairo it connects and forms through lines with roads to Southern territory. The roads constituting through lines from Chicago to Cincinnati, Louisville and Evansville (Ohio river points) respectively, appear to be principally the following: to Cincinnati, the Cleveland, Cincinnati, Chicago & St. Louis; the Pittsburg, Cincinnati, Chicago & St. Louis; the Louisville, New Albany & Chicago, and 4 INTER S..

the Cincinnati, Hamilton & Dayton; to Louisville, the Pittsburg, Cincinnati, Chicago & St. Louis and the Louisville, New Albany & Chicago; to Evansville, the Chicago & Eastern Illinois and the Evansville & Terre Haute.

The defendants mainly engaged in the transportation of traffic from Cincinnati to Southern territory appear to be the Louisville & Nashville and the Cincinnati, New Orleans and Texas Pacific; and those constituting parts of the principal rail lines from Eastern to Southern territory appear to be the East Tennessee, Virginia & Georgia, the Norfolk & Western and the Richmond & Danville. The Norfolk & Western extends north east to Hagerstown and the Richmond & Danville, to Washington. None of the defendant railroads, except the two last named, cross the Potomac and the roads over which the traffic from the Eastern seaboard cities, Boston, New York, Philadelphia, and Baltimore, is transported to connecting lines leading to Southern territory *are not made defendants*. The ocean steamship companies having lines from northeastern cities to southern ports and forming parts of the combined rail and water lines *via* those ports to in-

terior points in Southern territory are made defendants, and also the roads leading from the ports to the interior.

9. All the defendants (including the steamship lines) in the Cincinnati case are also defendants in the Chicago case and are for the most part members of the Southern Railway & Steamship Association. The latter case, as before stated, embraces as defendants, in addition to those in the former, roads north of the Ohio participating in the transportation of traffic from Central territory to that river. *None of these are members of the Southern Railway & Steamship Association except the Illinois Central Railroad*, which, as we have seen, extends into territory south of the Ohio. This Association is composed of transportation lines (including the steamship lines from Northeastern cities to southern ports) engaged in the traffic of the territory South of the Potomac and Ohio rivers and east of the Mississippi, and the rates involved in these cases from both Eastern and Central to Southern territory are established and maintained under its rules and regulations. As to the origin of this Association, it is set forth in a report of March 4, 1891, by Commissioner Wilson to the Cincinnati Freight Bureau (which report was put in evidence), that "subsequent to the close of the war and closely following the re-establishment of transportation lines and through rates into the south, there arose lively competition between what are known as Eastern Coastwise Lines and the Western lines which reached the south from the west *via* Ohio and Mississippi river gateways. Each commenced operations in the territory of the other, and while corn from Chicago was carried *via* Boston and Charleston to Atlanta and Chattanooga, the manufactured products of the East were not infrequently brought west *via* Cincinnati and Louisville, or Chicago and Cairo, for delivery to southern destinations. Rate wars were much more fierce and frequent than they are now. It was to check competition of this character and to protect the revenues of transportation lines generally that the Southern Railway & Steamship Association was established."

The records of proceedings of the Association from as far back as 1878 and up to January 14, 1892, have been introduced in evidence. From these records, it appears that in 1878, the roads leading South from Chicago, St. Louis, Cincinnati, Louisville and other western cities (then combined in an organization known as the "Green Line") met in convention with the steamer lines from eastern cities and the roads South of the Potomac engaged in the transportation of eastern traffic. At this meeting its object was disclosed to be "to protect to the Green Line Roads the business which is peculiar to the northwest and to the

eastern lines, the business peculiar to their territory, and to maintain equal rates on business common to the two sections." The Green Line rates appear to have then been advanced and the rates of the two systems of carriers adjusted with a view to the transportation by western lines of *western products* (that is, products from territory west of Pittsburg and East of the Mississippi and between the Ohio and the lakes) and the transportation by Eastern lines of *eastern manufactures*.

Up to 1885 this adjustment of rates appears to have been the means employed to carry out the above stated object of the convention of 1878. In 1885 a division of territory was established and a provision was inserted in the agreement for that year requiring the exaction of local rates by the Eastern and Western lines, with a view to the protection to those lines, respectively (so far as it was possible in that way), of what is termed "the revenue derived by them from transportation."

By a resolution adopted by the Executive Committee of the Association in April, 1885, it was provided in connection with the division of territory above referred to that "in case Eastern Lines take Western business or Western Lines take Eastern business, they are to pay the *pool* the entire revenue accruing thereon from points of junction with Association roads, to be given to the lines composing the Eastern or Western Lines as the case may be." The agreement of that year and those of subsequent years up to at least as late a date as that of the agreement which terminated July 1, 1887, make provision for such pooling or as it is termed "actual apportionment." In those agreements two methods of apportionment are provided for—namely, apportionment of *tonnage* and apportionment of *revenue*. Subsequent agreements do not so distinctly provide for pooling, but in the last agreement introduced in evidence (that of January 14, 1892), it is declared that "the principle of an apportionment of business subject to arbitration shall be recognized in the operation of the Association so far as this can be *lawfully* done." Provision is, also, made in that and the last agreement entered into since the hearing in these cases, for raising a fund for payment of what are termed fines for violations of the agreement, as will hereinafter appear.

The provisions as to division of territory and the exaction of local rates have been carried forward in the various agreements entered into from 1885 to the present time. The last agreement introduced in evidence is that dated, January 14, 1892, and it is substantially the same as those of preceding years as far back as 1885. Its clauses as to the exaction of local rates and division of territory are as follows:

"Art. II., sec 2. For the mutual protection of the various interests, and for the purpose of

securing the greatest amount of net revenue to all the companies parties to this agreement, it is agreed that what are termed western lines shall protect the revenue derived from transportation by what are known as eastern lines, *under the rates as fixed by this Association*, so far as can be done by the exaction of local rates, and that eastern lines shall in like manner protect like revenue of western lines."

"Sec. 3. That a line from Buffalo through Salamanca, Pittsburg, Wheeling and Parkersburg, to Huntington, West Virginia, be made the dividing line between eastern and western lines for the territory hereinafter outlined. That the western lines shall not make joint rates from points east of that line for any points east of a line drawn from Chattanooga through Birmingham, Selma and Montgomery to Pensacola."

"Sec. 4. The eastern lines, including the Richmond & Danville railroad *via* Strasburg or points east of Strasburg, and the East Tennessee, Virginia & Georgia Railway *via* Bristol, shall not make joint rates on traffic from points west of that line (Buffalo, etc.) to any points on or West of a line drawn from Chattanooga through Athens, Augusta and Macon, to Live Oak, Florida."

"Sec. 5. The traffic from Buffalo through Salamanca, Pittsburg, Wheeling and Parkersburg to Huntington, West Virginia, and points on that line, to and east of Chattanooga, Calera and Selma, shall be carried by either the eastern or western lines only at such rates as may be agreed upon."

"Sec. 6. It is understood that the eastern and western lines will co-operate in the enforcement of the 8d and 4th sections of this second article."

The objects of the Association as alleged in the preamble to this agreement, are "the establishment and maintenance of tariffs of uniform rates, to prevent unjust discrimination such as necessarily arises from the irregular and fluctuating rates which inevitably attend the separate and independent action of transportation lines" and the securing as to business in which the carriers have a common interest "a proper co-relation of rates, such as will protect the *interests of competing markets* without unjust discriminations in favor of or against any city or section."

The traffic embraced in the agreement is defined in § 1 of art. 2, as follows:

"The traffic subject to this agreement shall be (a) all business for which two or more of the parties hereto compete, having origin and destination with the territory of this Association, that is, south of the Virginias and south of the Ohio river and east of the Mississippi river; and (b) all traffic between territory on or north of the southern boundaries of the Virginias and on or north of the Ohio river and 4 INTER S.

west of the Mississippi, and the territory south of such southern boundaries of the Virginias and the Ohio river, and east of the Mississippi river, *except*, that traffic to or from a local point on any line shall be considered local to that line, and so far as that line may be concerned, shall not be subject to this agreement, and further *except*, that traffic between points on the Ohio and Mississippi rivers, or between points on the Ohio and Mississippi rivers and points north of the Ohio and west of the Mississippi shall not be subject to this agreement."

The agreement provides for an annual convention of the representatives of the several companies, members of the Association, at which each company shall have one vote, two-thirds of the whole vote of the members present being required to make the action of the convention binding. At this meeting, among other business to be transacted, there are to be elected a President, a Commissioner, a Secretary and three Arbitrators. The members of the Association are each required to designate a representative, authorized "to represent them in all matters of business with the Association or its members," and the representatives so designated constitute an "Executive Board." The "Executive Board," it is provided, "shall have jurisdiction over all matters relating to traffic covered by the agreement, but shall act only by *unanimous consent* of all its members' and "in the event of failure to agree, the questions at issue shall be settled by the Board of Arbitration." The "Executive Board" are authorized "at their discretion to appoint *Rate Committees* and other sub-committees, either of their own number or from among the officers and agents of the Companies; members of the Association." It is provided that, "with a view to a proper relative adjustment of all rates, and especially a proper relative adjustment of rates on similar articles from the East and West to common territory, the *Rate Committees* shall have *sole authority to make all rates and classifications on all traffic covered by the agreement*, subject to decision of the Commissioner, the Executive Board or Board of Arbitration in case such Rate Committees cannot agree." If the "Rate Committees" fail or omit to make rates, the Commissioner is given authority to make such rates, so that, it is stated, "there shall be properly authenticated tariffs of rates on all traffic covered by the agreement." The sub-committees appointed by the "Executive Board" can "only act by *unanimous consent*, and failing to agree, the questions at issue may, upon demand of any member, be referred to the Executive Board for action at their next meeting, and such questions may be submitted direct to the Board of Arbitration, when so authorized by a majority of the Executive Board. The decisions of

the "Board of Arbitration" are made "final and conclusive on all questions which may be submitted to them under the agreement or by consent of the parties." The Commissioner is Chairman of the Executive Board, and also of the sub-committees and is authorized to represent absent members of sub-committees as well as of the Executive Board, and "during the interim between the reference of any matter of difference from a sub-committee to the Executive Board and the final determination of such matter," he is given authority "if he deem it a matter requiring prompt action, to decide it temporarily" and his decision is made "binding on all parties until reversed by the Executive Board or by arbitration;" he is declared to be "the chief executive officer of the Association, and as a representative of its members, both *severally and jointly*," is empowered to "act for them in all matters which come within the jurisdiction of the Association, in conformity with the requirements of the agreement and the instructions of the Executive Board and sub-committees, but *exercising his discretion in all cases* which are not provided for either by the agreement or by the Executive Board and committees acting under its authority and sanction;" and he is also authorized "to reduce the rates when necessary to meet the competition of lines or roads not parties to the agreement and at the same time to make corresponding reductions from other points from which relative rates are made," and is given "such authority over the traffic officers and their subordinates and over the accounting departments of the parties to the agreements as may be necessary to enforce its terms relative to the maintenance of rates." When rates have been fixed under the provisions of the agreement by the Rate Committees, the Commissioner, the Executive Board or by arbitration, there is to be "no reduction from such rates without the consent of the Commissioner" and in all cases changes therein are to be made by the Rate Committees or the Commissioner. The agreement declares "that the maintenance of rates as established under the rules of the Association is of its very essence and that the parties thereto pledge themselves to require all their connections to maintain such rates, and in the event of any company or line, or its connections, not members of the Association, failing to conform to this obligation, the other parties in interest *pledge themselves to increase their proportion of through rates sufficiently to protect the authorized rate whenever required by the Commissioner, to do so*;" and further, that it is "one of the fundamental principles of the agreement that no party thereto shall take *separate* action in any matter affecting the interests of one or more of the other parties, contrary to the spirit and intent of the agreement," and that "all measures necessary to carry out the purpose of the agreement shall be taken

4 INTER S.

jointly by the parties thereto." In cases of violation of the agreement, the Board of Arbitration, after hearing, is required to "impose such penalties therefor as it may deem proper and necessary to secure the maintenance of the rates of the Association." These penalties are to be enforced by the Commissioner, and "in order to provide for the prompt payment of any fines that may be assessed against any member of the Association for violating its rules, each company is required to deposit with the Commissioner an amount equivalent to five dollars (\$5.00) for each mile of the road operated by said company under the provisions of the agreement, or in case a company operates a water line, five dollars (\$5.00) for each mile allowed as a prorating distance in the division of through rates—provided such amounts shall not exceed the sum of five thousand dollars (\$5000.00) for any one company." Of this fund thus raised it is provided, that "any surplus over and above the *amount that may be awarded by the Board of Arbitration to indemnify any members for losses sustained* shall be applied to the payment of the expenses of the Association."

The agreement now in force (made July 14, 1898, since the hearings in these cases) extends the territorial line commencing at Buffalo and terminating at Huntington to "Toronto on the north shore of Lake Ontario, through Lewiston and Niagara Falls," and provides that points on this line (from Toronto to Huntington) "shall be common to lines through the Eastern and Western gateways, together with such points adjacent thereto from which the rates shall be the same as from the points above named" (points on said line) "through the gateways of Cincinnati and Louisville, the Rate Committees to agree upon the common points adjacent to said line." To the clause requiring members of the Association "to increase their proportions of through rates sufficiently to protect the authorized rates" in the event of any company or line or its connections not members of the Association failing to conform to the rates established by the Association, it adds the further requirement, that they (members of the Association interested) shall "*apply full local rates upon all traffic subject to the Association Agreement coming from or going to such offending lines, when required by the Commissioner to do so*." The clause requiring the Board of Arbitration in cases of violations of the Agreement by any member, to impose "such penalties therefor as it may deem proper and necessary to secure the *maintenance of the rates of the Association*," is altered so as to read "such penalties therefor as it may deem proper and *commensurate with the injuries inflicted upon the Association and of competing lines parties to this Agreement*." The other material terms of this agreement are substantially the same as those

of the agreement of January 14, 1892, above given.

The agreements of the Association appear to be made as a general rule, annually, to terminate on the 31st day of the July following the date of their taking effect. They purport to be renewals or reorganizations of the Association from year to year and to be binding only on the carriers signing them. That of January 14, 1892, was signed by the Illinois Central and all the defendants common to the two cases, except the South Carolina Railway Company, the Clyde New York Steamship Lines and the Wilmington, Columbia & Augusta Railroad Company. The present agreement is signed by the Illinois Central and all the defendants common to the two cases except the Norfolk & Western and Wilmington, Columbia & Augusta Railroad Companies and the Merchants & Miners Transportation Company. The agreement preceding that of

January 14, 1892, was made July 25, 1888, to take effect August 1 of that year. The Western roads, namely, the Cincinnati, New Orleans & Texas Pacific (Lessees of the Cincinnati Southern) the Alabama Great Southern, the Louisville & Nashville and the Illinois Central, did not sign this agreement and ceased to be members of the Association from the date of its taking effect, August 1, 1888, to January 14, 1892, when they entered into the agreement of that date. During this period of about three years and a half, the eastern lines alone were members of the Association, but the rates maintained by the western lines appear to have remained substantially as they were when those lines suspended their connection with the Association. In the following tables are given the class rates from Chicago and Cincinnati to points in Southern territory in force on December 31, of each year from 1887 to 1891, both inclusive:

In a "Report on Changes in Railway Transportation Rates" to the Senate Committee on Finance prepared by the Auditor of this Commission from data furnished by the roads, are given the rates on classified traffic and important commodities from Chicago and Cincinnati to Atlanta and Chattanooga in 1879 (the year after the Convention of 1878) and in 1891. Those rates and the differences between them are shown in the following tables.

CHICAGO TO ATLANTA.

Date.	Cents per 100 lbs.											Cents per bbl.		
	1	2	3	4	5	6	Bagging and cotton ties.	Lard, meats, bacon, pork, and packed and loose meats, (C. L.)	Flour in sacks.	Grain.	Ale and Beer in wood.	Whiskey in wood.	Flour in barrels.	Beef and Pork in barrels.

†Excess of latter rate.

10. At the convention of the eastern and western lines in 1878, it was announced by Mr. Peck, General Manager of the Southern Railway & Steamship Association, that the western lines "concede that the transportation of manufactured articles into the territory embraced by the Association should be left to the eastern lines and undertake by *prohibitory* rates to prevent such articles from eastern cities reaching Association points over their lines." Accordingly a basis of rates was then adopted, by which rates on the western lines for "articles peculiar to the east" were to be at least 10 cts. higher than the rates on the eastern lines and rates on eastern lines for "western products" were to be at least 10 cts. higher than the rates on western lines. At the time of this adjustment it appears that the west (or Central territory) contributed "principally food products in the solid and liquid forms of corn, bacon, flour, whiskey, etc.," for Southern consumption, while "manufactured articles and notions" came for the most part from the Eastern Seaboard. These conditions have, however, materially changed; "the centers of food production have moved Westward" and Central territory has engaged much more extensively in manufacturing enterprises. In the Annual Report made to the Southern Railway & Steamship Association by its Commissioner,

were to be at least 10 cts. higher than the rates on western lines. At the time of this adjustment it appears that the west (or Central territory) contributed "principally food products in the solid and liquid forms of corn, bacon, flour, whiskey, etc.," for Southern consumption, while "manufactured articles and notions" came for the most part from the Eastern Seaboard. These conditions have, however, materially changed; "the centers of food production have moved Westward" and Central territory has engaged much more extensively in manufacturing enterprises. In the Annual Report made to the Southern Railway & Steamship Association by its Commissioner,

July 6, 1889, he says: "Formerly, agricultural products constituted a large excess of the western business, but the proportion of miscellaneous commodities—traffic formerly from the east—is steadily growing from the west. Especially is this true in all manufactured articles of wood, such as furniture, wagons, carriages of all kinds, etc., and manufactures from the cheap grades of iron from the south, such as stoves, agricultural implements, etc." Central territory has also entered upon the manufacture on a large scale and shipment south of boots, shoes, clothing, saddlery, harness and other articles of general merchandise. It is estimated that manufactures in Central territory have increased 100 per cent in twenty years.

These manufactured articles are shipped south from Central territory under the rates applied to the numbered classes in the Southern Railway & Steamship Association Classification, and bagging, ties, grain (and its products including liquors) and packing house products are shipped under the rates applied to the lettered classes. The testimony is to the effect that articles falling within the lettered classes are of more general consumption in the Southern territory than those in the numbered classes. No reliable data is furnished as to the proportion the south bound tonnage of the former bears to that of the latter, but it appears to be much larger. In their reports on file with the Commission the railways do not give separately the south-bound and north bound tonnage, but it appears that boots, shoes, clothing, woodenware, furniture, saddlery, harnesses, groceries and "everything that goes under the head of general merchandise" constituted in 1891 not quite 25 per cent of the total southbound tonnage of the Cincinnati, New Orleans & Texas Pacific Road, and that bagging, ties, grain (and its products) and packing house products, "covered the bulk of the business south bound."

Articles in the numbered classes manufactured in Wisconsin, Michigan, Illinois, Indiana and Ohio, are sold as far east as Rochester and Albany, New York, as far west as the Pacific coast, and to a greater or less extent over the south from Texas and Arkansas to the Virginias. The testimony tends to show that in the southeast, in the territory embracing Alabama, East Tennessee, Florida, Georgia, the Carolinas and Virginias, and particularly at points near the Atlantic Coast, the merchants and manufacturers of Central territory meet with strong competition in the sale of these goods from New York and the other eastern seaboard cities. They do not appear to be driven out of this territory altogether by this competition, but their business and the profit on it are not so great as a general rule as in

other markets reached by them. In some instances they are required by their customers to "equalize the rates," or in other words, to refund the excess of the rates on their goods over those on goods of the same kind and class from eastern seaboard territory.

11. L. R. Brockenborough, General Freight Agent of the Chicago & Eastern Illinois Railway Company (whose road runs from Chicago to the Ohio at Evansville) stated that "his impression (is) that the general impression seems to be that the rates from Central territory into Southern territory are out of line with those from the seaboard," and that his road "would be willing to reduce its rate to bring the through rate in line with the New York rate." John C. Gault, General Manager of the Queen & Crescent System (in which are defendants, the Cincinnati, New Orleans & Texas Pacific and the Alabama Great Southern Companies) stated that he "always thought rates from Chicago to southern points on higher classes ought to be the same as those from Boston and New York;" and that this "would not harm New York and hardly be enough in favor of the west." He also, under date of August 14, 1888, wrote to the Commissioner of the Chicago Board of Trade, that "the roads interested in Chicago business ought in my (his) judgment to take such action as is necessary to insure a reduction of the rates" from the west. M. C. Markham, Assistant Traffic Manager of the Illinois Central R. R. Co., testified that he had made an effort to have the Southern Railway & Steamship Association reduce the rates from Central territory, and said, "Looking at the disparity between the rates from eastern and central territories, it appears there might be in them an element of unfairness to the latter. If it is true, that rates from Eastern territory into the southeast were made on account of water competition along the Atlantic seaboard, and if all rail lines leading from the East into that territory can afford to carry the goods for those rates made by water lines, then the western through lines *could afford to carry for the same rates a less distance*, provided all conditions governing the matter were equal." S. R. Knott, Traffic Manager of the Louisville & Nashville Road in a letter to G. J. Grammar of April 14, 1890, wrote that "While the adjustment may be *unfair, as we think it is*, yet it can hardly be said to be arbitrary or wholly unreasonable;" and that his company, "together with other lines interested in western traffic, then members of the Southern Railway & Steamship Association, urged a modification of the difference" (between eastern and western rates) "and succeeded in having the matter brought under the rules of the Association before the Board of Arbitration;" and that "the question was fully presented from both sides of the case and

the decision of the Board at that time (May, 1888) was that the best protection of *all interests* did not warrant the change in the adjustment of rates which we, with the other western lines, had requested, that is, changing the adjustment from Ohio river points and points north as compared with the rates from eastern cities." B. E. Hand, Assistant General Freight Agent of the Michigan Central Road, stated that he had made "repeated efforts with railroads operating in Southern territory for a reduction of rates on manufactures from the west to the southeast." G. J. Grammar, Chairman of the Central Traffic Association's Committee on relations with southern roads, in a letter to N. G. Iglehart, of April 2, 1890, says "All our efforts thus far have been unavailing to get the southern roads to more justly equalize the rates. You doubtless understand southern roads' rates from the Ohio river are arbitrary, their rates on all classes south bound being from 50 to 100 per. ct. greater per mile than by lines north of the River on similar traffic." In a letter, dated April 8, 1890, to S. R. Knott, he says, "The injustice of the present basis of rates" (from the Ohio) "must of necessity be apparent."

Conclusions.

The principal charge in both cases it is stated is based on the first paragraph of section 3 of the Act to Regulate Commerce, which declares,

"That it shall be unlawful for any common carrier subject to the provisions of this Act to make or give any undue or unreasonable preference or advantage to any particular person, company, firm, corporation, or locality, or any particular description of traffic, in any respect whatsoever, or to subject any person, company, firm, corporation or locality, or any particular description of traffic, to any undue or unreasonable prejudice or disadvantage in any respect whatsoever."

The specific ground of complaint under this charge is in substance that the rates on *manufactured goods* from Eastern Seaboard territory to Southern territory, and those on the same classes of goods from Central territory to Southern territory, are so fixed or adjusted with reference to each other as to give to merchants and manufacturers in Eastern Seaboard territory an "undue or unreasonable preference or advantage" over those in Central territory, and consequently subject the latter to "an undue or unreasonable prejudice or disadvantage" with respect to the former, when they meet in competition in the southern markets.

The defendants embrace two groups of carriers, operating under distinct tariffs of rates different systems or lines of transportation, leading, respectively, from initial points and

through territories widely separated to common destinations. As establishing the joint liability of these two sets of carriers, the complainants contend that the relation created between them (or such of them as are parties thereto) by the provisions of the Southern Railway & Steamship Association Agreement constitutes a "common control, management or arrangement" in the sense in which those words are used in the first section of the Interstate Commerce law. From the view we take of these cases, it is unnecessary to determine this question of *joint liability*. The injury, which it is claimed results from the relation between the rates from Eastern Seaboard and Central territories, is injury to merchants and manufacturers in, and shippers from, the latter; the complaints are in their behalf alone. This injury could not proceed from rates from Eastern Seaboard territory unreasonably *high*, in themselves or relatively, as the tendency of such high rates would be to give an advantage to dealers in Central territory. There is no claim—and if there were, there is no proof to sustain it—that the eastern rates are *in themselves* unreasonably low. Those rates stand unchallenged as to their reasonableness in themselves and for the purpose of this argument must be considered as reasonable and just. If the roads serving Central territory voluntarily entered into an agreement with the Eastern Seaboard lines, in carrying out which they made their rates higher than was reasonable and than they otherwise would have made them, and the relation thus established between the rates of the two sets of carriers was unduly preferential to Eastern territory and unjustly prejudicial to Central territory, this was a violation on their part of the above clause of section 3 of the Act. Whether or not there be a *joint liability* on the part of the eastern lines, there is unquestionably a *several liability* on the part of the lines serving Central territory for the unreasonableness of their own rates. By entering into an agreement such as that of "The Southern Railway & Steamship Association," a carrier does not merge its separate corporate existence and cease to be a distinct entity, responsible as such under the Interstate Commerce Law for the rates over its own road or line. In becoming parties to this agreement, the defendants act separately and voluntarily, they each have a representative on the "Executive Board" (which is given full jurisdiction over the matter of rates), and this Board can act only by "unanimous consent of *all* its members." The rates thus established for each road or line are to be considered the result of its own voluntary *several* action, so far as amenability to the law is concerned. Furthermore, the defendants north of the

Ohio (except the Illinois Central) and the roads north of the Potomac and reaching northeastern cities as parts of the all rail eastern lines, are not members of the Southern Railway & Steamship Association, and the latter roads are not made parties defendant though interested in the eastern rates. In view of the foregoing considerations, we deem it proper to treat these cases from the standpoint of the several liability of the defendants serving Central territory both as to the rates over their lines, and the relation between those rates and the rates over eastern lines.

The defendant carriers north and south of the Ohio, serving Central territory, form through lines of connecting roads from Chicago, and those south of the Ohio, from Cincinnati, to Southern territory, and are engaged in the continuous carriage over those lines of interstate traffic under through bills and joint through rates. They are, therefore in respect to such traffic and rates, subject to the provisions of the Act to Regulate Commerce, as we have repeatedly held. *Trammell v. Clyde SS. Co.* 4 Inters. Com. Rep. 120, 5 I. C. C. Rep. 324; *James & M. Buggy Co. v. Cincinnati, N. O. & T. P. R. Co.* 8 Inters. Com. Rep. 682, 4 I. C. C. Rep. 744; *Board of Trade of Troy v. Alabama M. R. Co.* 4 Inters. Com. Rep. 348.

The reasonableness in themselves of the rates from Central territory is a matter ma-

terial to the issue raised by the charge in both cases, that the relation between those rates and the eastern rates is *unjustly* prejudicial to Central territory, and the question is directly presented in the Chicago case by the allegation that the rates from Cincinnati and other Ohio river crossings to Southern territory are "unreasonably high." Where the reasonableness of rates is in question, comparison may be made, not only with rates on another line of the same carrier, but also with those on the lines of other and distinct carriers—the value of the comparison being dependent in all cases upon the *degrees* of similarity of circumstances and conditions attending the transportation for which the rates compared are charged. It appears from the tabular statements in our findings of fact, giving *all-rail* distances and class rates from Cincinnati and Chicago in Central territory and from New York and other northeastern cities, to points in Southern territory, that on a *mileage* basis the rates from the former (particularly, those on the higher or numbered classes) are largely in excess of those from the latter. For the purpose of illustration the following table is given, which shows the current rates on goods of *Class 1* from Cincinnati and Chicago and from New York to points named in Southern territory, and what the rates from Cincinnati and Chicago would be on the basis of the (all-rail) mileage rates from New York:

To	Current Class 1 Rates.			Rates on basis of mileage rates from New York.	
	From Cincinnati.	From Chicago.	From New York.	From Cincinnati.	From Chicago.
Knoxville,	76	116	100	39	78
Chattanooga,	76	116	114	45	79
Rome,	107	147	114	51	88
Atlanta,	107	147	114	61	95
Meridian,	122	134	124	62	71
Birmingham,	89	119	114	54	75
Anniston,	107	147	114	57	85
Selma,	108	138	114	62	78

The excess of the Class 1 rates in the above table from Cincinnati and Chicago over the New York rates from a mileage standpoint is, as follows:

To	From Cincinnati.	From Chicago.
Knoxville,	37	38
Chattanooga,	31	37
Rome,	56	64
Atlanta,	46	52
Meridian,	60	63
Birmingham,	35	44
Anniston,	50	62
Selma,	46	60

As to the other *numbered* classes and the other northeastern cities, the relation or difference between the two sets of rates is to a large extent substantially the same as shown in the above tables.

4 INTER S.

Many striking disparities in rates will be observed on an inspection of the tabular statements of rates and distances in our findings of facts, and particularly, in the Class 1 rates from Chicago, on the one hand, and Boston and New York, on the other—the latter two cities being given for the most part the same rates. For example, while the distance from Chicago to Chattanooga is 595 miles, and from Boston and New York, respectively, 1060 and 847 miles, the rate from Chicago is 116 cts. and from Boston and New York, 114 cts., and while the distance from Chicago to Meridian, Miss., is 723 miles and from Boston and New York, respectively, 1355 and 1142 miles, the rate from Chicago is 134 cts., and from Boston and New York, 124 cts. Under the rate last named, a ship-

per of a car load of 25000 lbs., of *Class 1* goods from Boston and New York to Meridian would pay \$25.00 less than a shipper of a like car load from Chicago, notwithstanding the relative proximity of the latter city to the common point of destination. (Up to March 16, 1894, the rate from New York and Boston to Meridian was 114 cts.) Further examples of similar import might be taken from the tabular statements of rates and distances, but the above are deemed sufficient.

A comparison of rates on one road or line with those on another for the purpose of determining the reasonableness of either, is, as before stated, valuable only to the extent of the similarity of circumstances and conditions attending the transportation in the two cases and relative equality in rates is only necessary in the *degree* of such similarity. *Manufacturers & J. Union v. Minneapolis & St. L. R. Co.* 3 Inters. Com. Rep. 115, 4 I. C. C. Rep. 79. Distance or mileage is by no means the only, or in many cases the most important, factor in rate making, but, *other things being equal*, it is a circumstance of great, if not controlling, weight. In *Logan v. Chicago & N. W. R. Co.* 2 Inters. Com. Rep. 431, 2 I. C. C. Rep. 604, the Commission hold that, "a departure from the rule of equal mileage rates as applied to the several branches of a road or system of roads is not conclusive of the unlawfulness of rates, but the company making such departure should have satisfactory reasons for such variance of rates and must show them to be reasonable when disputed. This burden is by the Act to Regulate Commerce put on carriers when they 'charge or receive as great compensation for a shorter as for a longer distance.' The same burden is on the company making a greater charge for one of two hauls." In *McMorran v. Grand Trunk R. Co. of Canada*, 2 Inters. Com. Rep. 604, 3 I. C. C. Rep. 252, it is said, "Due regard to distance proportions should be observed in connection with the other considerations that are material in fixing transportation charges;" and, in reference to the burden of proof, where a carrier sets up dissimilarity of circumstances and conditions in the matter of expenses in justification of a disparity in mileage rates, it is said, "The evidence does not show with any precision what these several expenses (terminal and others) are . . . The defendants assume in their brief that the burden of showing these expenses was upon the petitioner; but this assumption is altogether erroneous. It would impose on persons conceiving themselves aggrieved by carriers a difficult and onerous rule of evidence. It would be impossible for the petitioners to show such facts otherwise than by defendants' agents, and it was clearly the province

of the defendants to make them appear. No presumption arises that a rate is reasonable from the mere fact that it has been put in effect; and when it is *prima facie* disproportionate or relatively unequal the *onus* is on the carrier to justify its charges when challenged on these grounds. The knowledge of the justifying circumstances and conditions is peculiarly in the possession of the carrier."

The above, it is true, are cases where the rates compared were made by the same carrier for one or more branches of its own road or system, and not by distinct carriers for their respective roads or lines. This distinction, however, is material only as to the question of *joint responsibility*, and, while, as the defendants contend, the eastern carriers may not be liable under a strict construction of the interstate commerce law jointly with the western for the rates from central territory, this fact does not under the circumstances showing a community of origin of the two sets of rates, affect the propriety or lessen the value of a *comparison* of them in an investigation (like the present) as to the reasonableness of the western rates. The rule laid down as to the burden of proof is peculiarly applicable to the present cases, in view of the fact that the relation between the eastern and western rates was fixed by mutual agreement between the two systems of carriers and, as the evidence tends to show, *for the accomplishment of a particular object* as hereinafter appears. The disproportion between the rates being so large, the burden was upon the defendants serving central territory to justify the relatively high rates over their lines, or, in other words, to show the substantial dissimilarity of circumstances and conditions necessitating or authorizing such disproportionately high rates. The defendants, while disclaiming that it was upon them, nevertheless assumed the burden of proof and set up in justification of the comparatively high rates from central territory the fact that the eastern rates are affected by water competition from the northeastern cities *via* the Atlantic to southeastern ports—particularly, the ports of Charleston and Savannah. No other dissimilar circumstance or condition explaining or authorizing the lower mileage rates from the east is alleged or proven. If there was anything in the way of fixed charges, operating expenses, or other matter proper to be considered in this connection and peculiarly within their own knowledge, they should have made proof of it. It did not devolve upon the complainants to negative the existence of such circumstances in the absence of evidence tending to make them affirmatively appear.

The plea that the all rail lines from north-

eastern cities to southern territory are subjected to water competition *via* the Atlantic and that this competition has naturally a controlling influence on their rates, is sustained by the proof. In an argument filed in behalf of the Cincinnati, New Orleans & Texas Pacific, the Alabama Great Southern and the Louisville & Nashville Companies (the only defendants who appeared at the hearing) it is contended that the fact of this water competition "takes the whole situation entirely out of the operation of the third section of the Act and makes inapplicable any further comparison." On this point it is said:

"But it may be urged that although an inequality of charge may be so justified" (by water competition), "yet the inequality of condition and diversity of circumstances is not sufficient to warrant so great a disparity as is exhibited between the rates from Cincinnati, Ohio, to points in southern territory, and the rates from New York, Boston and other eastern cities to these points. This objection, however, is invalid, for the law is that when once a substantial dissimilarity of circumstances and conditions appears, that fact takes the whole situation entirely out of the operation of the third section of the Act, makes inapplicable any further comparison, and forbids any attempt at a compulsory adjustment of the rates so as to allow for such dissimilarity. The section itself immediately ceases to apply."

This position is manifestly untenable. It is in effect a claim that a substantial dissimilarity of circumstances and conditions is, even after due allowance has been made therefor, a license to a carrier to go further and give *undue* preferences and practice all the other forms of *unjust* discrimination denounced by the statute. In *Raworth v. Northern Pac. R. Co.* 8 Inters. Com. Rep. 357, 5 I. C. C. Rep. 284, it is held that the law forbidding unjust discrimination "applies even in cases where a departure from the 'long and short haul rule' of the statute is shown to be authorized, and the right, if established, of making the greater charge for the shorter haul, does not justify a disparity in rates so great as to result in *unjust* discrimination;" and in the case of the *Manufacturers & J. Union v. Minneapolis & St. L. R. Co.*, 3 Inters. Com. Rep. 115, 4 I. C. C.

4 INTER S.

Rep. 79, the rule is laid down that "relative equality is necessary in the degree of similarity."

The defendants in their proof have furnished a measure or given *their estimate* of the influence of the water competition from the northeastern cities to the southeastern ports. It is that, while the distance by water from New York to Charleston and Savannah is approximately 750 miles, the rates by the steamer lines are made on the basis of what is termed a "constructive mileage" of 230 miles to Charleston and 250 miles to Savannah, or, in other words, the water rate from New York to Charleston is equal to the rail rate for 230 miles by land, and to Savannah, to the rail rate for 250 miles by land. These "constructive mileages" plus the actual distances by rail from those ports to interior points in Southern territory are called the "rate making mileages," upon which the combined rail and water rates from New York to the interior points are based. As is claimed by defendants, the proof tends to show that the rail and water rates regulate the all rail rates, and the rail and water and all rail rates are the same to all the points named in Southern territory except *Rome, Anniston and Atlanta*, to which the all rail rates are higher than the rail and water by certain differentials ranging from 2 to 8 cts. per 100 lbs. as appears from our findings of facts. A comparison of these "rate making mileages" (rail and water) with the all rail distances from New York to Southern points may be instructive as indicating the *estimate by the roads* of the extent of the influence of water competition on the eastern rates. Those "mileages" (*via* Charleston) and all rail distances are given in the following table:

To	FROM NEW YORK.	
	All-rail distances.	"Rate making mileages" <i>via</i> Charleston—rail and water.
Knoxville,	785 miles.	768 miles.
Chattanooga,	847 "	676 "
Rome,	925 "	597 "
Atlanta,	876 "	588 "
Meridian,	1142 "	901 "
Birmingham,	990 "	705 "
Anniston,	949 "	642 "
Selma,	1080 "	791 "

From the table below a comparison may be made of the "rate making mileages," rail and water, from New York to Southern points, with the actual all-rail distances from Cincinnati and Chicago to the same.

To	From New York.	From Chicago.	From Cincinnati.
	"Rate making mileages" via Charleston—rail and water.	All-rail distances.	All-rail distances.
Knoxville,	763 miles	560 miles	290 miles
Chattanooga,	676 "	595 "	385 "
Rome,	597 "	673 "	413 "
Atlanta,	538 "	788 "	475 "
Meridian,	901 "	723 "	680 "
Birmingham,	705 "	652 "	478 "
Anniston,	642 "	715 "	476 "
Selma,	791 "	746 "	598 "

It will be seen from the above table that the "rate making mileages" from New York, which are arrived at by an allowance for the estimated effect of water competition—the estimate being that of the defendants, are greater than the actual all rail distances from Chicago, as follows: to Knoxville, by 203 miles; to Chattanooga, by 81 miles; to Meridian, by 178 miles; to Birmingham, by 53 miles; and to Selma, by 45 miles. They are less to Rome by 76 miles, to Anniston by 73 miles and to Atlanta by 195 miles. They are in every instance much greater than the distances by rail from Cincinnati. The all rail distances from Cincinnati and Chicago are the following percentages of the "rate making mileages" from New York:

From.	To						
	Knoxville	Chattanooga	Rome	Atlanta	Meridian	Birmingham	Anniston
Cincinnati	pr.c. 88	pr.c. 50	pr.c. 69	pr.c. 88	pr.c. 70	pr.c. 66	pr.c. 74
Chicago	78	88	112	186	80	92	111

On the above basis—that is, making the rates from Cincinnati and Chicago the same percentages of the current New York rates as the distances by rail from the former cities are of the "rate making mileages" from the latter—the rates from Cincinnati will be materially less than they now are on the numbered classes in all cases and also from Chicago, except those to Atlanta and those on classes 4, 5, and 6 to Birmingham and 4 and 6 to Chattanooga. They will also be less to a large, but not so great an extent, on the lettered classes. It thus appears that, giving full weight to the claim of defendants that water competition via the Atlantic necessitates rates from the east relatively lower than those from the west and as a consequence rates from the west relatively higher than those from the east, it does not with the exceptions above named account for or justify the existing disparity between them.

4 INTER 8.

The evidence shows that the rates from Eastern Seaboard and Central territories, respectively, were adjusted with reference to each other by mutual agreement between the eastern and western carriers through the medium of the Southern Railway & Steamship Association and that in making this adjustment other considerations than those of water competition, or other dissimilarity of circumstances or condition affecting transportation, had a controlling influence. It appears that lively competition resulting in rate wars had arisen between the eastern and western lines in the transportation into the south by each of traffic from territory claimed by the other. This led to the convention in 1878 (referred to in our statement of facts) of the carriers interested, the object of which was stated to be the establishment of such a co-relation of rates as would "protect to the eastern lines the business peculiar to their territory" and to the western lines (then known as the "Green Line Roads") the business relating to "their peculiar commodities"—in other words, to secure to the eastern lines the transportation of "articles manufactured in the east, and in other countries and imported into eastern cities, embraced under the general terms of dry goods, groceries, crockery and hardware" and classified for the most part under the first four of the numbered classes, and to the western lines, the transportation of "articles of western produce, comprising the produce of animals and the field" and embraced principally in the lettered classes. The only way to accomplish this result through the agency of rate adjustment or manipulation was to place relatively high rates on manufactured articles and relatively low rates on food products shipped from or via the West, and vice versa, as to such shipments from or via the east; and at the opening of the Convention, Mr. Peck, the General Manager of the Association, being called on by the chairman to state its object, said, among other things, that the western lines conceded that the transportation of manufactured articles "into the territory em-

braced by the Southern Railway & Steamship Association should be left to the eastern lines, and undertake by prohibitory rates to prevent such articles from eastern cities reaching the Association points over their lines." A basis of rates, at least ten cents higher by the eastern lines than the western on western products and at least ten cts. higher by the western lines than the eastern on "articles peculiar to the east," was then adopted, with a view to effecting the announced object of the convention. It is manifest that at that time the influence of water competition on the eastern rates was not regarded as a controlling factor in determining what the excess of the western should be over the eastern rates on manufactured goods and the reasonableness in themselves of those western rates was a matter of secondary, if any, consideration. While there have since been fluctuations and changes in the two sets of rates, the principle regulating their co-relation or adjustment with reference to each other has remained practically the same to the present time. The leading idea of securing to each system of carriers the traffic of what is termed its territory by the adjustment and manipulation of rates and in other ways, is prominent throughout all the Association Agreements. In the last, as in those preceding, it distinctly appears, and the provisions, among others, for a geographical division of territory, for the exaction of local rates to protect Association rates, and for penalties, all look to this end. It is, also, apparent on an inspection of the current rates themselves, which disclose the broad distinction made between the rates on the numbered and lettered classes—the relation between the two sets of rates on the former being advantageous to the east, while that between the rates on the latter are not nearly so favorable to that territory. As a fair illustration, the rates from Chicago to Chattanooga on the lettered classes are from seventy to eighty nine per cent of the New York rates, while on the numbered classes 1, 2 and 3,—they are respectively, 102, 101 and 95 per cent. It is true, rates upon the heavy and cheap articles in the lettered classes should be less than rates upon the comparatively light weighted and valuable articles in the numbered classes, because, as respects the latter, the value of the service to the shipper and the risk to the carrier are greater. These considerations, however, apply equally to shipments of traffic from both territories, and do not, therefore, justify or account for the distinction to which we have just adverted. The fact, that the tonnage of traffic in the lettered classes from Central territory is larger than of traffic in the numbered classes, and doubtless, also, larger than the tonnage of traffic in the lettered classes from

Eastern territory is not in our opinion sufficient to authorize or account for the great difference apparent on the face of the tariffs. This difference finds a natural solution in the avowed purposes of the Southern Railway & Steamship Association to secure, by an adjustment of rates calculated to bring about that result, the transportation by the Eastern lines of goods in the numbered classes from the territory set apart as theirs and to the western lines the transportation of traffic in the lettered classes from the territory apportioned to them.

The relation established between the eastern and western rates in 1878 was, doubtless, suggested by, and found a plausible pretext in, the fact that at that time the west contributed principally articles in the lettered classes for southern consumption, while goods in the numbered classes came for the most part from the east. The situation in this respect has, however, as appears from our statement of facts, materially changed, and it is estimated that the manufacture in Central territory of goods in the numbered classes has increased 100 per cent in twenty years. If, therefore, the condition as to manufactures and products in 1878 could have been set up in justification of the adjustment of rates then made, that justification no longer exists and the change in those conditions is an argument in favor of a corresponding change in the rate adjustment. We are of opinion, however, that the situation in 1878 in the respect named constituted no justification. The tendency of such an adjustment of rates was to encourage and build up manufactures in the east and discourage and retard them in the west and thus maintain the *status quo*. In this connection may be noticed the claim of the defendants, that the great growth in Central territory of the manufacture and sale of articles in the numbered classes shows that the rates in question to Southern territory have not been prejudicial to manufacturers and shippers in Central territory. This does not appear to be a legitimate inference in view of the fact that Central territory is not limited to southern territory as a market, but also sells its manufactures and products as far west as the Pacific coast, as far east as Rochester and Albany, and in the southwest. The proof is that the shipments of goods in the numbered classes from Central to Southern territory (the southeast) are small in comparison with those of goods in the lettered classes and this may be, in part at least, due to the rate adjustment complained of. If the fact, that one section is a large producer and another a small producer of certain classes of traffic, is a factor to be considered in fixing rates from them to a common market, which is not conceded, it would

seem that it should operate to give more favorable rates to the latter with a view of stimulating and increasing its production. Considerations of this character, however, if they are to be allowed any weight by carriers in fixing rates from rival territories, should always be held in strict subordination to the invariable rule, that in all cases rates shall be reasonable in themselves. No departure from this rule can be justified on the ground, that it is necessary in order to maintain existing trade relations, or to "protect the interests of competing markets," or to "equalize commercial conditions," or to secure to carriers traffic from certain territory assumed to be exclusively theirs. It is not the duty of carriers, nor is it proper, that they undertake by adjustment of rates or otherwise to impair or neutralize the natural commercial advantages resulting from location or other favorable condition of one territory in order to put another territory on an equal footing with it in a common market. Each locality competing with others in a common market is entitled to reasonable and just rates at the hands of the carriers serving it and to the benefit of all its natural advantages. *James & M. Buggy Co. v. Cincinnati, N. O. & T. P. R. Co.* 3 Inters. Com. Rep. 683, 4 I. C. C. Rep. 744; *Raworth v. Northern Pac. R. Co.* 3 Inters. Com. Rep. 857, 5 I. C. C. Rep. 234; *Eau Claire Board of Trade v. Chicago, M. & St. P. R. Co.* 4 Inters. Com. Rep. 65, 5 I. C. C. Rep. 264; *Chamber of Commerce of Minneapolis v. Great Northern R. Co.* 4 Inters. Com. Rep. 230, 5 I. C. C. Rep. 571. If this result in prejudice to one and advantage to another, it is not the *undue* prejudice or advantage forbidden by the statute, but flows naturally from conditions beyond the legitimate sphere of legal or other regulation. "Carriers," moreover, "in making rates cannot arrange them from an exclusive regard to their own interests, but must respect the interests of those who may have occasion to employ their services, and subordinate their own interests to the rules of relative equality and justice which the Act prescribes." (Second Annual Report.) The provision in the Association Agreements for the "exaction of local rates" to "protect" to each system of carriers the revenue which would come to them, respectively, under a strict enforcement of Association rates and under the division of territory between them, is stated to be for "the purpose," among others, "of securing the greatest amount of net revenue to all the companies parties to the agreement." This is, doubtless, the controlling consideration. The interests of the public, certainly, cannot be subserved in this way. The division of territory is wholly without warrant in law and is practically a denial to shippers in such territory of the right to ship their goods or produce to market by the line or

route they may prefer. The exaction of higher rates on certain articles shipped from Central to Southern territory *than would otherwise prevail*, for the purpose of securing to eastern lines the transportation of that traffic from territory apportioned to them, is manifestly unlawful, and results in injury to both Central and Southern territory.

The fact, which clearly appears, that rates on the numbered classes from Central territory are made *higher than they otherwise would be*, for the purpose of securing to the eastern lines the transportation of that traffic from the territory set apart to them under the southern Railway & Steamship Association Agreement, itself raises a *prima facie* presumption of the unreasonableness of those rates. In the Cincinnati case, the complainant does not directly question the reasonableness of the rates from Cincinnati, but in the Chicago case it is charged, that the rates on through traffic from Chicago to Southern territory are made up of "substantially the local rates in effect from Chicago to Cincinnati and other Ohio river crossings" and "*unreasonably high rates*" from the Ohio on to Southern territory. It appears that the Chicago rates are made up of the two rates as charged—the rates from that city to the Ohio being the regular Trunk Line rates and from the Ohio southward, the Southern Railway & Steamship Association rates. The shipments being through shipments, under a through bill of lading quoting a total through rate, and without breakage of bulk at the river, this method of making up the rates is a departure from the general rule under which through rates established by two or more connecting carriers *are less than the sum of their separate rates*. The Trunk Line rates per ton per mile from Chicago to Cincinnati and the Association rates per ton per mile from Cincinnati to Southern territory are given in the following tables:

Rates per ton per mile on the numbered classes from Chicago to Cincinnati.

	1	2	3	4	5	6
	cts.	cts.	cts.	cts.	cts.	cts.
	2 68	2 28	1 68	1 14	1 00	80

Rates per ton per mile on the numbered classes from Cincinnati.

To	1	2	3	4	5	6
	cts.	cts.	cts.	cts.	cts.	cts.
Knoxville,	5 24	4 48	3 93	3 24	2 75	2 06
Chattanooga,	4 53	3 88	3 40	2 80	2 38	1 79
Rome,	5 18	4 45	3 92	3 29	2 71	2 22
Atlanta,	4 50	3 87	3 41	2 86	2 35	1 93
Meridian,	3 87	3 23	2 82	2 38	1 96	1 71
Birmingham,	3 72	3 30	2 84	2 30	1 96	1 50
Anniston,	4 49	3 86	3 40	2 85	2 35	1 93
Selma,	3 61	3 41	2 94	2 37	1 97	1 57

From these tables it will be seen that the rates per ton per mile from Cincinnati south are in all cases much higher, and in many instances a hundred per ct. or more higher, than those from Chicago to Cincinnati.

The averages of the rates per ton per mile

on all the classes, lettered as well as numbered, from Cincinnati, are approximately:

From Cincinnati.	Average of rates per ton per mile on all classes.
To	Cents.
Knoxville,	2 70
Chattanooga,	2 33
Rome,	2 62
Atlanta,	2 31
Meridian,	2 00
Birmingham,	1 96
Anniston,	2 27
Selma,	1 85

By reference to the tables in our statement of facts giving freight revenue per ton per mile and cost per ton per mile, it will be seen that the above averages are largely in excess of that revenue and cost on the roads taken as whole in, respectively, Southern territory, Central territory and the country at large.

It appears from tariffs on file with the Commission that, up to April 17, 1893, and for a series of year's running as far back at least as 1887, and how much anterior to that time we are not advised, through rates were in existence from New York *via* Cincinnati to Chattanooga, Meridian and Birmingham, *less* than the sum of the Trunk line rate to Cincinnati plus the Association rate from Cincinnati on to those cities, and that such rates are still published to Nashville, Memphis, Mobile and a number of Mississippi river points. The proportions of these through rates left for the hauls from Cincinnati south to Chattanooga, Meridian and Birmingham, after deducting the Trunk line rates from New York to Cincinnati, and the extent to which the regular Association rates from Cincinnati exceed those proportions are shown below:

	1	2	3	4	5	6
Through rates from New York <i>via</i> Cincinnati to Chattanooga, Birmingham and Meridian	114	98	86	73	60	49
Trunk Line rates from New York to Cincinnati	65	57	44	30	26	22
Proportions for hauls from Cincinnati, South	49	41	42	43	34	27
Association rates from Cincinnati to Chattanooga	76	65	57	47	40	30
Deduct proportions of through rate	49	41	42	43	34	27
Excess of Association rates	27	24	15	4	6	3
Association rates from Cincinnati to Birmingham	89	79	68	55	47	36
Deduct proportions of through rates	49	41	42	43	34	27
Excess of Association rates	40	38	26	12	13	9
Association rates from Cincinnati to Meridian	122	102	89	75	62	54
Deduct proportions of through rates	49	41	42	43	34	27
Excess of Association rates	73	61	47	32	28	27

Under these through rates from New York, goods on reaching Cincinnati from New York would take thence on to the south a much lower rate, as shown above, than goods of the same class from Chicago—the rates from Cincinnati being dependent upon the question whether the shipment originated in New York or Chicago. Although they were withdrawn in April, 1893, it does not seem unfair to presume from the fact that they were so long in existence (and that similar rates are still published to Nashville, Memphis and other points) that they were not entirely unremunerative to the roads south of the Ohio, and may be taken as a circumstance, among others, indicating that the rates of those roads on traffic from Central territory would be lower than they are but for their agreement with the eastern lines to maintain the present standard of rates.

The weight of the testimony of railroad officials connected with the roads and lines leading from Central territory to the south, as appears from our findings of facts, tends to show that the idea is prevalent in western railroad circles, that the adjustment of rates from Central and Eastern territories is unjustly prejudicial to the former, and that those roads and lines, south as well as north of the Ohio, are disposed to favor a readjustment of their rates on a basis more favorable to Central territory, but that they have not done so on account of their alliance with the eastern lines as members of the southern Railway & Steamship Association—the latter lines not being willing to agree to such readjustment.

Our conclusion upon the whole is, that, as charged in the complaint in the Chicago case, the rates on the numbered classes from Cincinnati and the Ohio river crossings to the south are "unreasonably high," and as they enter into the through rates from Chicago, that those through rates, as well as the rates from Cincinnati, are excessive. There is no complaint that the rates from Chicago to Cincinnati and the other crossings are unreasonable in themselves and no evidence authorizing us to so find. They are the regular Trunk line rates and are *not* subject to the objection, as in the case of the Association rates south of the river, that they are made higher than they otherwise would be for the purpose of securing to the Eastern Seaboard lines traffic from territory set apart to them. The cost on freight in general per ton per mile on the roads south of the river appears to have been for the years named in the tables heretofore given about 25 per cent on an average greater than the cost per ton per mile on the roads from Chicago to the river. The tonnage of the latter roads is also greater than that of the former as shown in the tables.

Rates from Cincinnati to Southern territory from 35 to 50 per cent higher per ton per mile than those from Chicago to Cincinnati and other Ohio river crossings will, in our opinion, make full allowance for these differences in cost and tonnage, and be at least not unreasonably low as maximum rates. The rates in cents per 100 lbs. given below are approximately upon this basis.

From Cincinnati.						
To	1	2	3	4	5	6

Selma,	108	82	78	60	48	36

Rates from Chicago to Knoxville, Chattanooga, Rome, Atlanta and Anniston are made *via* Cincinnati; those from Chicago to Birmingham and Selma, *via* Louisville; and those from Chicago to Meridian, *via* Cairo, on the Illinois Central. The rates in the following table, accordingly, to the five cities first named are combinations of the above rates to those cities with the existing rates from Chicago to Cincinnati; to the two cities next named, they are combinations of rates from Louisville constructed on the same basis as the rates in the above table with the existing rates from Chicago to the river; and to Meridian, they are combinations of rates from Cairo constructed on the same basis as rates in the above table with the existing rates from Chicago to Cairo.

From Chicago.

(Note. The rates from Chicago and Cincinnati to Meridian are made substantially the same, because the larger portion of the haul from Chicago is in Central territory where rates are lower.)

An order will be issued directing the defendants engaged in transporting traffic from Chicago and Cincinnati to Southern territory to desist from charging higher rates on the traffic embraced in the numbered classes from those cities, respectively, than those in the two preceding tables and to make all the necessary readjustments of their tariffs. These rates are a conservative reduction of the existing rates and, while it is believed they will go far to do away with the "undue prejudice" to which Central territory is now subjected, they are, probably, not so low as they might be made if fuller and more accurate

data were accessible. If the rates by the Eastern Seaboard lines be taken as the standard of comparison, the rates in these tables will be found to make in the main due allowance for the estimated effect on those rates of water competition *via* the Atlantic. They are also higher than the proportions of the through rates from New York *via* Cincinnati to Chattanooga, Birmingham and Meridian, allowed for the hauls from Cincinnati to those points, and which were in effect for a long period of years; and they yield a rate per ton per mile largely in excess of the reported cost per ton per mile of freight on the roads from the Ohio south (and in other sections of the country) and much above the average of their receipts per ton per mile. (See tables in statement of facts.) They are, it seems scarcely necessary to add, prescribed as maximum rates and are not intended to be prohibitory of such lower rates as the carriers interested may find to be just and reasonable.

We are not unmindful that a compliance with the order in these cases may and probably will necessitate a readjustment of rates from Central territory to other points in Southern territory than those named, but as we took occasion to say in the case of the *Board of Trade of Troy v. Alabama M. R. Co.* 4 Inters. Com. Rep. 848, 6 I. C. C. R. 1, "it cannot be held to be a valid objection to the correction of unlawful rates to one locality, that it involves a like correction to other localities."

Even pecuniary embarrassment of a road by reason of insufficient receipts from all sources is not a fact that will warrant making rates on a portion of its traffic unreasonably high for the accomplishment of a purpose such as is disclosed in these cases. Excessive rates on certain classes of traffic may be made the basis of proportionately low rates on other classes, and thus shippers of the former are taxed with burdens which in justice should be borne by the latter and without any addition to the general aggregate revenue of the carrier. It is believed, moreover, that the reduction in rates ordered in these cases will result in a corresponding increase in the tonnage of the roads in the traffic affected, and that the revenue therefrom will be augmented rather than lessened. This, at any rate, will be the natural tendency of the change.

The further claim is made in the Chicago case, that, in the language of complainant's brief, "As Boston is given the same rates to Southern points as New York, by the tariffs fixed by defendants through the agency of the Southern Railway & Steamship Association, Chicago should have the same rates to Southern points as may prevail between Cincinnati and Southern points, the distance between New York and Boston being 213 miles and the distance between Chicago and Cincinnati

being not substantially greater." No sufficient reason appears for sustaining this proposition. In the first place the short line distance from Chicago to Cincinnati is 298 miles, which is 85 miles or about 40 per cent greater than the distance from New York to Boston—a material difference in our opinion; and, in the second place, the transportation between Chicago and Cincinnati, is all rail, while between Boston and New York there is water transportation *via* the Atlantic at small cost as compared with that by rail.

As will be seen from our statement of facts, unmistakable provisions for pooling are found in the Association Agreements from 1885 up to and including that which terminated July 1, 1887. In those agreements in addition to the sum required to be paid monthly into the pool, each member is assessed \$300.00 for the payment of salaries of officers and other "general expenses" of the Association. Subsequent agreements omit these provisions, but in lieu thereof require the payment by each member of an amount equivalent to \$5.00, for each mile of road operated, not to exceed \$5000.00 for any one company. The sum thus to be raised, it will be observed, is many times larger than the \$300.00 assessment in prior agreements for payment of expenses. It is to be applied in the first place to the payment of "any fines that may be assessed by the Board of Arbitration against any member of the Association for violating its rules" and the *surplus* is to be applied to the expenses of the Association. As to what is meant by term "fines," the language of the agreement of 1892 and that now in force in reference to this surplus is significant, namely, "any surplus over and above the amount that may be awarded by the Board of Arbitration to indemnify any member for losses sustained shall be applied to the payment of the expenses of the Association." In the agreement of 1892, it is declared that the fines or penalties imposed for violations of the agreement shall be such as the Board of Arbitration "may deem proper and necessary to secure the maintenance of the rates of the Association," but in the present agreement, they are to be such as the Board "may deem proper and commensurate with the injuries inflicted upon the Association and of competing lines parties to this Agreement." The "losses sustained" by, and the "injuries inflicted" on, any member of the Association by a violation of the agreement by another member, would be the traffic or revenue therefrom, lost by reason of such violation. For example, if a Western road or line should haul traffic assigned to an Eastern road or line under the territorial clauses of the agreements, the loss sustained by or injury inflicted on the Eastern road or line would be the revenue which

would have been earned by the latter on such traffic under Association rates. This, it seems, would be the amount which the "injured" road or line would be entitled to receive credit for under a pooling arrangement. As the fines or penalties provided for are, in the words of the agreement of 1892, intended "to indemnify any member for losses sustained" by reason of any violation of the agreement, and by the subsequent agreement, are to be "*commensurate with injuries*" thus inflicted, it appears clear that they are available as substitutes for balances or amounts which would be due under a regular pooling arrangement and the system under which they are imposed is—if not expressly, at least in legal effect—a combination, contract or agreement for (in the language of the Act) "the pooling of freights of different and competing railroads, or to divide between them the aggregate or net proceeds of the earnings of such railroads, or any portion thereof." The money paid to the "injured" road would be that "portion" of the "offending" road's earnings, which it had received by reason of its violation of the Association rules and which the "injured" road presumably, would have earned and received but for such violation. Ample provision, furthermore, is made in these agreements for the detection of any violation of their rules by requiring the rendition to the Commissioner by all the members of the Association of *tonnage and revenue* reports and the furnishing to him "copies of all manifests for traffic covered by the Agreements (such copies to be forwarded at the time the shipments to which they appertain are made and to show the original shipping point and through rates and divisions thereof)" and also monthly "abstracts of all such manifests." These monthly abstracts, if not for the purpose, at any rate enable the Association to impose at the end of each month the so-called "penalties" for violations of its rules, just as under prior agreements with avowed pooling arrangements monthly balances were struck and clearing-house settlements had. The law has regard to the substance, rather than the form or name of things, and whatever it prohibits from being done directly cannot legally be effected indirectly.

We also deem it our duty to call attention to sec. 2 of Article 28 of the Agreement of July 31, 1893 (now in force) which is as follows:

"It is distinctly understood and agreed that the maintenance of rates as established under the rules of the Association is of the very essence of this Agreement, and the parties hereto pledge themselves to maintain them and to require all their connections to maintain such rates, and in the event of any company or line or its connections not mem-

bers of the Association failing to conform to this obligation, the other parties in interest pledge themselves to increase their proportions of through rates sufficiently to protect the authorized rates, and to *apply full local rates upon all traffic subject to the Association Agreement coming from or going to such offending lines*, when required by the Commissioner to do so."

Whatever obligation there may be on the part of members to maintain Association rates is the result of their *voluntary* action in entering into the Association Agreement. One carrier has no authority to dictate the rates which another shall charge for the service of transportation over its own road or line; and, whether or not members of the Association are justified in "increasing their proportions of through rates sufficiently to protect the authorized rates" of the Association, it seems clear that they cannot lawfully resort to discrimination against their connections, not members of the Association, as a punishment for failure on their part to conform to those rates or for the purpose of compelling such conformity. Among other things prohibited in section 8 of the Act to Regulate Commerce, is discrimination by

carriers subject to the Act "in their rates and charges between connecting lines." Applying "full local rates upon all traffic subject to the Association Agreement coming from or going to" connecting lines which do not maintain Association rates, while to traffic from other connecting lines conforming to such rates full local rates are not applied, would be, in our opinion, an unlawful discrimination against the former under the above clause of Section 8 of the Act. The mere combination or agreement to thus discriminate is not, however, made an offense under the Act and no actual discrimination of this kind has been shown in these cases. As to whether such combination or agreement alone, in the absence of an overt act, would be indictable at common law or under some other statute, it is unnecessary and, perhaps, improper for this Commission to express an opinion. We can only say, that the agreement in this particular is an agreement to do an act forbidden by the Interstate Commerce Law, and, if in any instance it should be put in practice, the carriers involved would be liable to be proceeded against, under that law.

UNITED STATES CIRCUIT COURT, DISTRICT OF NEBRASKA.

OLIVER AMES, 2d *et al.*,

v.

UNION PACIFIC R. CO. *et al.* (No. 1).

1. When a court of equity undertakes, through a receiver, the conduct and operation of a railroad, the men engaged in conducting the business and operating the road become the employes of the court, and are subject to its orders in all matters relating to the discharge of their duties and entitled to its protection.
2. When the schedule of wages in force at the time a court assumes the management of a railroad is the result of mutual agreement between the company and its employes which has been in force for years, the court will presume the schedule to be reasonable and just, and any one disputing that presumption must overthrow it by satisfactory proof.
3. The recommendation of the majority of the receivers of a railroad will not be accepted by the court as conclusive upon the question of wage schedules, when such majority is not composed of practical railroad men.
4. The court will take judicial notice that for the first \$36,000,000 of stock issued by the Union Pacific Railroad Company it received less than two cents on the dollar, and that the profit on construction represented by outstanding bonds was nearly \$44,000,000.
5. Wages of the employes of a railroad in the hands of a receiver will not be reduced below 4 INTER S.
- what is reasonable and just in order to pay dividends on stock for which practically no value was paid, and interest on bonds which represent profit in construction.
6. Receivers in possession of a railroad will not be permitted to reduce the wages of employes without giving them notice and an opportunity to be heard as required by the contract between the men and the company, although an opportunity is given to protest against the new schedules after they are prepared.
7. Wage schedules are not within the class of executory contracts which receivers can renounce while relying on the power of the court to compel the employes to continue in service.
8. A contract to render personal service cannot be specifically enforced.
9. It is not unlawful for employes to associate, consult or confer together with a view to maintain or increase their wages by lawful and peaceful means.
10. A court will not approve the action of its receiver in reducing the wages of employes or discharging them in a body without giving them an opportunity to be heard.
11. Receivers must give employes an opportunity to be heard before fixing wage schedules.

12. Wage schedules recommended by receivers will not be adopted when the only practical railroad man among the receivers says they should not be put in force without modifications.
13. The allowance of excess mileage by railroad receivers to employes will be approved by the court for portions of the road running through mountains and desert country, where competent men cannot be kept at regular rates, but where such course was entirely successful as employed by the company.
14. The diminished opportunity to earn wages induced by the same conditions which forced the railroad into the hands of a receiver should be considered when deciding the question of reduction or maintenance of the old wage schedules.
15. It is a contempt of court to interfere with property in the hands of a receiver, or with men in their employ.
16. An injunction will not be granted to prevent the employes of a railroad in the hands of a receiver from interfering with the property or other employes, since such action is punishable as a contempt.

ON PETITION by the receivers of the Union Pacific System for leave to put into force reduced wage schedules over the railroad system in their charge. *Petition denied.*
The facts sufficiently appear in the opinion.

The Receivers appeared by John M. Thurston, solicitor; the Brotherhood of Locomotive Engineers by George W. Vroman, chairman; the Brotherhood of Locomotive Firemen by C. A. M. Petrie, chairman; the Order of Railway Conductors by John L. Kissick, chairman; the Order of Railway Telegraphers by F. E. Gilliland, chairman; The Union Pacific Employes' Association by Henry Breitenstein, chairman; the Brotherhood of Railway Trainmen by Samuel D. Clark, chairman. Said several labor organizations and the members thereof further appeared by T. Fulton Gantt, Geo. L. Hodges, McClanahan & Halligan and T. W. Harper, their solicitors.

Caldwell, C. J., delivered the opinion of the court:

On the 18th day of October, 1893, on a bill filed for that purpose, this court took into its possession, control and management, The Union Pacific Railway System, embracing The Union Pacific Railway proper, and some fourteen other constituent and allied roads, which together constitute what is known as The Union Pacific System.

Whether the bill states a case of equitable cognizance justifying the appointment of receivers has not been mooted on this hearing, and we, therefore, express no opinion upon that question.

The system of which the court assumed the management and control comprised 7700 miles of railroad, and about 8000 miles of water communication, and had in its employ over 22,000 men. The great body of these men had been in the employ of the company for a considerable length of time, some of them for as much as a quarter of a century. The relation of these men to the company, and their rate of wages, were determined in the main by certain written rules, regulations and schedules, some of which had been in force for more than a quarter of a century, and all of which had been in force, substantially as they stand to-day, for a period of eight years and more. These rules, regulations and schedules were the result of free and voluntary conferences, held from time to time, between the managers of the railroad and the officers and representatives of the several labor organizations representing the men in the different subdivisions or

branches of the service, viz: The Brotherhood of Locomotive Engineers, The Brotherhood of Locomotive Firemen, The Order of Railway Conductors, The Order of Railway Telegraphers, The Union Pacific Employes' Association, and the Brotherhood of Railway Trainmen. These labor organizations, like the rules, regulations and schedules, had become established institutions on this system many years before the appointment of the receivers. Two of the ablest railroad managers ever in the service of this system, and probably as able as any this country has ever produced—Mr. S. H. H. Clark and Mr. Edward Dickinson, now general manager of the road—testify that these labor organizations on this system had improved the morals and efficiency of the men and had rendered valuable aid to the company in perfecting and putting into force the rules and regulations governing the operation of The Union Pacific Railway, which, confessedly, have made it one of the best managed and conducted roads in the country. The managers of this great transcontinental line testify that it has been their policy to bring it up to the highest standard of efficiency and to afford to passengers and property transported over it all the security and protection attainable by the exercise of the highest degree of intelligence on the part of those engaged in the operation of its trains, and they cheerfully bear testimony to the fact that their efforts in this direction have been seconded and materially aided by the labor organizations which are represented in this hearing. The good opinion of the men entertained by the managers seems to be shared by the receivers, for in their petition to the court in this matter, they declare: "That the employes, generally, upon The Union Pacific System are reasonable, intelligent, peaceable and law-abiding men."

Among the rules and regulations referred to and in operation when the receivers were appointed was one to the effect that no change should be made in the rules and regulations and rate of wages without first giving to the labor organization whose members would be affected by such change, thirty days' notice, or other reasonable notice. On the 27th day of January, 1894, the receivers, without giving the men, or the officers of the labor organizations representing them, any notice, filed in

this court a lengthy petition, stating, among other things: "That, as receivers herein, they have, from the time they entered upon their duties as such, as far as consistent with the proper discharge of their duties to the public, and with justice to their employes, inaugurated economies in every department, with a view to reduce the operating expenses as far as possible, and produce results fair to all those parties having liens upon and interests in the properties confided to the care of your receivers." "Your petitioners further represent that they conceive it to be their duty to make and carry into effect such reductions and such reforms of the rules, regulations and schedules without application being first made to the court in that behalf;" and, stating further that they had "revised the schedules aforesaid, upon principles which have seemed to them just, right and proper." With this petition, the receivers filed what they termed rules, regulations and schedules, which they asked the court to approve and order that they be put into effect on the 1st day of March, 1894, and the "employes directed to conform thereto." The petition also prayed for a very extended injunction against the employes. On the day the petition was filed the court entered an order declaring that the rules, regulations and schedules prepared by the receivers and filed with their petition, were "prima facie reasonable and just," and directed that they become operative on the first day of March, 1894, and ordered an injunction to issue as prayed for in the petition. Upon the presentation of this petition, and the order made thereon, to the United States circuit courts for the districts of Wyoming and Colorado, those courts declined to give effect to the order in those districts, for the reason that the employes had had no notice of the proposed change.

Thereupon the receivers applied to the circuit judges at their chambers in St. Louis to put the order made by the United States circuit court in Nebraska in force in the districts of Colorado and Wyoming. This the circuit judge declined to do, but directed the receivers to annul their orders adopting the new rules, regulations and schedules, and this having been done, they made the following order:

"In the matter of the petition for rehearing before the circuit judges of the application of the receivers for authority to place in effect new and reduced wage schedules."

"Since the action of the courts in the different districts in this circuit on the petition filed by the receivers for leave to revoke the schedules of wages of the employes in force when they were appointed, and to adopt new and reduced schedules has not been uniform and harmonious; and since it is desirable and necessary that any order made on said petition should have a uniform operation upon the lines of railway operated by said receivers throughout the circuit; and since the receivers have revoked and annulled their action heretofore taken, ordering new wage schedules into effect on the first day of March, 1894, and have resolved that the entire matter of new wage schedules be held in abeyance to await further action of the court, it is now here ordered as follows:"

4 INTER S.

"First. That the petition of the receivers for leave to set aside and annul the schedules of wages of the employes on The Union Pacific System in force when they were appointed, and to adopt new schedules equalizing and in some cases reducing the wages of the employes, be set down for hearing before the circuit judges at Omaha, Nebraska, on the 27th day of March, A. D. 1894."

"Second. That the receivers forthwith, or as soon as may be practicable, invite the proper representatives of the employes on said system to attend a conference at Omaha, Nebraska, commencing on the 15th day of March, 1894, for the purpose of conferring with S. H. H. Clark, receiver (who is hereby specially designated and selected to conduct said conference on behalf of the receivers) and such other person or persons as he may select to act with him, at which conference the entire matter of proposed changes in wage schedules shall be taken up and as far as possible, agreed upon between the said Clark and said representatives of the employes. Such conference to continue from day to day until such agreement is reached."

"Third. That in case there are any matters in difference remaining unadjusted, such matters of difference shall be clearly and specifically stated and presented to the court in writing on or before said 27th day of March, 1894, and the hearing herein shall proceed as to such matters in difference before the circuit judges holding the court, and after hearing the parties and their witnesses and counsel the circuit judges will make such order in the premises as may be right and just."

"Fourth. That the receivers grant to such representatives of the employes leave of absence to attend said conference and hearing, and furnish them transportation to Omaha and return."

Henry C. Caldwell,

Walter H. Sanborn,

Circuit Judges.

In compliance with the terms of this order, a conference between Mr. Clark and his assistants, and the officers of the several labor organizations representing the employes of the court was held in Omaha. At this conference an agreement was reached as to the rules, regulations and schedules relating to the train dispatchers and operators, which have been reported to the court and confirmed. This was one of the most difficult schedules in the whole list to adjust, and the satisfactory agreement reached in the conference shows the great value of a good-tempered, calm and intelligent inquiry in which both sides are represented, and in which both sides learned, perhaps for the first time, the ground on which the demand is made by the one and resisted by the other. The receivers had declared to the court, in their petition filed on the 27th day of January, 1894, "that after careful consideration of the matter, and consultation with the managing officials of the Union Pacific System, they are of the opinion that the so-called rules, regulations and schedules of pay for train dispatchers and operators are entirely unnecessary, and they have, therefore, not only decided to disaffirm the same, but they have also decided that they will not prepare or establish any

rules and regulations in lieu thereof; and with respect thereto your receivers further advise your honors that all of said train dispatchers and telegraph operators are employed on monthly salaries which are determined in consideration of all the circumstances of each particular case, and are intended to cover all the services and all the time necessary in which to perform the service required from each of said train dispatchers and operators at the several respective stations on the lines of the Union Pacific System."

And yet at the conference held, under the order of the circuit judges, the position assumed by the receivers in their petition to the court was found to be untenable and was abandoned, and rules and regulations governing telegraphers' wages adopted.

It would serve no useful purpose here to state the causes which in the opinion of the court prevented an agreement between the conferees upon rules, regulations and schedules for the other branches of the service. It is sufficient to say that they were of a character which do not in any degree militate against the usefulness or efficiency of conferences or the ability or fairness of the conferees. Freed from the state of things brought about by the erroneous proceedings of a majority of the receivers in the beginning of this business, it is highly probable that the conferees would have agreed upon all the schedules. Failing to agree, the matter was brought before the court, in accordance with the order made by the circuit judges. At the appointed time the receivers appeared in person and by attorney, and the employes by the officers of the several labor organizations to which they belong, and by their attorneys. Upon calling the case for hearing the court directed an order to be entered setting aside and vacating the order of the court made on the 27th day of January, 1894, approving the rules, regulations and schedules framed by the receivers without notice to or conference with the employes affected thereby, and also setting aside and vacating the order of injunction entered at the same time. The court then announced to counsel that the rules, regulations and schedules in force when the receivers were appointed were still in force and would be held and treated as *prima facie* just and reasonable, and that the burden was cast upon the receivers to show that the wages received by the court's employes under the existing regulations were in excess of a fair, just and reasonable compensation for the service performed, taking into consideration all the circumstances and in view of the existing conditions.

The hearing proceeded on these lines, and the court listened for a week to the testimony of witnesses.

Before stating the conclusions we have reached upon the facts, it will be well to state the leading principles which courts of equity must keep in view in this class of cases. When a court of equity takes upon itself the conduct and operation of a great line of railroad, the men engaged in conducting the business and operating the road become the employes of the court, and are subject to its orders in all matters relating to the discharge of their duties, and entitled to its protection. The first and

supreme duty of a court when it engages in the business of operating a railroad is to operate it efficiently and safely. No pains and no reasonable expense are to be spared in the accomplishment of these ends. Passengers and freight must be transported safely. If passengers are killed or freight lost through the slightest negligence to provide all the means of safety commonly found on first class roads, the court is morally and legally responsible. An essential and indispensable requisite to the safe and successful operation of the road is the employment of sober, intelligent, experienced and capable men for that purpose. When a road comes under the management of a court on which the employes are conceded to possess all these qualifications—and that concession is made in the fullest manner here—the court will not, upon light or trivial grounds, dispense with their services or reduce their wages—and when the schedule of wages in force at the time the court assumes the management of the road is the result of a mutual agreement between the company and the employes which has been in force for years, the court will presume the schedule is reasonable and just, and any one disputing that presumption will be required to overthrow it by satisfactory proof.

It is suggested that upon this question the court ought to be governed by the recommendation of a majority of the receivers. The suggestion is without merit in this case for several reasons: Four of the five receivers are not practical railroad men, and are not familiar with the subject; two of them are lawyers residing in New York, one a merchant residing in Chicago, and one a railroad accountant having, doubtless, a thorough knowledge of the books of the company, but knowing nothing about the wage schedules. These four gentlemen are eminent in the line of their professions and pursuits, and entirely capable of managing the financial affairs of this great trust, for which purpose they were, doubtless, selected, but their opinions upon the subject of wage schedules is confessedly of little value. The court shares in their anxiety to have an economical administration of this trust to the end that those who own the property and have liens upon it may get out of it what is fairly their due. But to accomplish this desirable result the wages of the men must not be reduced below a reasonable and just compensation for their services. They must be paid fair wages, though no dividends are paid on the stock and no interest paid on the bonds. It is a part of the public history of the country, of which the court will take judicial notice, that for the first \$36,000,000 of stock issued this company received less than two cents on the dollar, and that the profit of construction represented by outstanding bonds was \$43,929,828.34. These facts are disclosed by the report of the "commission of the United States Pacific Railway Company," 1887, of which Mr. Anderson, one of the receivers in this case, was a member. See Report, pp. 51, 137. There would seem to be no equity in reducing the wages of the employes below what is reasonable and just in order to pay dividends on stock and interest on bonds of this character. The recommendation of the receivers to adopt

their schedules cannot be accepted by the court for another reason. That schedule was adopted without affording to the men or their representatives any opportunity to be heard. This was in violation of the agreement existing between the company and the men, by the terms of which no change of the schedules was to be made without notice to the men and granting them a hearing. This was a fundamental error. The receivers should have given notice and invited the men to a conference even if there was no contract requiring it. In answer to this objection to their mode of proceeding, it is said the order of the receivers and the order of the court extended an opportunity to the men to protest against the new schedules after their adoption. The men could have small hopes of a fair and impartial hearing after the receivers had prepared new schedules behind their backs which were declared by the receivers and the court to be "prima facie just and reasonable." This was very much like first hanging a man and trying him afterwards. It is small consolation to the victim of the mob to be told he shall have a trial after he is hanged. It is further said that the receivers had the right to renounce the old schedules and adopt the new ones because the old ones were mere executory contracts. There are some executory contracts which receivers may renounce, but they cannot claim the benefit of such contracts and at the same time renounce their burdens. This is precisely what was attempted to be done by the receivers in this matter: they renounced the old schedules and adopted new ones reducing wages, but seemingly with no idea of absolving the men from the duty of continuing to work and operate the road, for in their petition they ask that their schedules be confirmed by the court, "and all of the said employes directed to conform thereto." The receivers were the first to break the contract between the court and its employes, but if the converse had been the case the court could not have directed or enjoined the men to continue in its service. Specific performance of a contract to render personal service cannot be enforced by injunction, by pains and penalties or by any other means. For a breach of such a contract the only redress the law affords is a civil action for the damages.

The court is asked to apply to the employes in its service the principles of the early English statutes, which, by the imposition of heavy pains and penalties, forced laborers to work at fixed wages, and made it an offense to seek to increase them, or to quit the service of their employer. The period of compulsory personal service, save as a punishment for crime, has passed in this country. In this country it is not unlawful for employes to associate, consult and confer together with a view to maintain or increase their wages, by lawful and peaceful means, any more than it was unlawful for the receivers to counsel and confer together for the purpose of reducing their wages. A corporation is organized capital; it is capital consisting of money and property. Organized labor is organized capital; it is capital consisting of brains and muscle. What it is lawful for one to do it is lawful for the other to do. If it is lawful for the stockholders and officers of a corporation to associate and confer together

for the purpose of reducing the wages of its employes, or of devising other means of making their investments profitable, it is equally lawful for organized labor to associate, consult and confer with a view to maintain or increase wages. Both act from the prompting of enlightened selfishness, and the action of both is lawful when no illegal or criminal means are used or threatened.

It is due to the receivers and to the managers of this property to say that they have not questioned the right of the labor organizations to appear and be heard in court in this matter, and that what they have said about these organizations has been in commendation of them and not in disparagement. Men in all stations and pursuits in life have an undoubted right to join together for resisting oppression or for mutual assistance, improvement, instruction and pecuniary aid in time of sickness and distress. Such association commonly takes place between those pursuing the same occupation and possessing the same interests. This is particularly true of men engaged in the mechanical arts, and in all labor pursuits where skill and experience are required. The legality and utility of these organizations can no longer be questioned.

The action of the receivers is objectionable upon another ground. It would be difficult to devise any action better calculated to provoke a "strike." The method of adopting the new schedules was calculated to arouse resentment in the breast of every self-respecting, intelligent and independent man in the service. While they might have been willing to acquiesce in the reduction of their wages, they were quite sure to revolt against the manner of doing it. Whatever may be the legal right of a railroad corporation to reduce the wages of its employes or discharge them in a body without giving them an opportunity to be heard, a court of equity will not act in that manner or approve the action of its receivers who have acted in that manner. The receivers, no more than the court, should have undertaken to determine what wages were just and reasonable without giving the men an opportunity to be heard. It is fundamental in the jurisprudence of this country that no court can rightfully make an order or render a judgment affecting the rights of one who is absent and who has had no notice. The requirement that the court or any other tribunal shall hear before it decides is much older than Magna Charta or our Constitution. It was written in the Book three thousand years ago that "He that answereth a matter before he heareth it, it is folly and shame unto him."

A further and conclusive answer to the contention in favor of putting the receivers' schedules in force is found in the fact that Mr. Clark, the only one of the receivers who is a practical railroad man, testifies that they ought not to be put into force without "some modifications."

As a result of the old code of rules and schedules this company has been able to bring into every branch of its service, at reasonable cost, intelligent and capable men who have carefully guarded and protected its property and business interests until the train service upon The Union Pacific is to-day equal to any

of the great railway systems of the country. Upon the question of the reasonableness of the old schedules we have had no trouble in coming to a satisfactory conclusion.

The record shows that all that portion of railroad mileage, where excess mileage has been allowed, runs through either a mountainous or desert country, where the men engaged in the operation of trains have to contend with heavy grades, and where the winters are long and often severe, and where the hazard of operating is necessarily greatly increased. There is practically no agriculture, and the cost of living is much greater than in an agricultural region. As stated by Mr. Dickinson, "it is a pretty tough place to live." The system of paying excess mileage, Mr. McConnell testifies, has been in vogue ever since the road was built, and was allowed because the company had difficulty in obtaining men who would stay in that region of country. If this system was a good thing for the company when operating the road, it is a good thing for the court when operating the road. As a result of this system men of intelligence and character have been induced to enter the service and to establish permanent homes in regions of country where there is practically no business except the business in which they are engaged, and where, for many reasons disclosed by the evidence, it is not desirable to live. A system of rules and regulations by which the company has been able to bring into its service and retain for twenty-five years, in some instances, the class of men who have appeared before the court at this hearing, is certainly commendable, and meets the entire approval of the court.

In the opinion of the court the allowances made by the schedules now in force are just and equitable when all the conditions are considered. The employes, under the present system, share the burdens of diminished business. They make less mileage and get less pay per month. The rate now paid is not higher than the rate paid on other lines operated through similar country and under like conditions, and, in the opinion of the court is not higher than it should be for the service rendered.

Some of the employes with large families to support are seldom more than a few days' wages in advance of want, and if their present wages were materially reduced they could not live. The highest and best service cannot be expected from men who are compelled to live in a state of pinch and want.

It is a gratifying fact that the officers and representatives of labor organizations of which the men interested in this hearing are members have unanimously assured the court that whatever judgment is rendered in this case will be

4 INTER S.

accepted by the men as a settlement of the dispute, and that in no event, after such a hearing as has been accorded to them in court, will they "strike." We are confident these assurances will be kept.

When property is in the custody of receivers the law declares it to be a contempt of the court appointing them for any person to interfere with the property or with the men in their employ. No injunctive order can make such unlawful interference any more of a contempt than the law makes it without such order. Such orders have an injurious tendency because they tend to create the impression among men that it is not an offense to interfere with property in the possession of receivers or with the men in their employ unless they have been specially enjoined from so doing. This is a dangerous delusion. To the extent that a special injunction can go in this class of cases the law itself imposes an injunction. For this reason no injunctive order will be entered in this case.

In conclusion, we may be indulged in giving expression to the hope that in future differences about wages between courts and their employes, at least, and we would fain hope between all employers and employes, resort may be had to reason, and not to passion, to the law and not to violence, to the courts and not to a "strike." It is a reproach to our civilization that such differences should result, as they often have, in personal violence, loss of life, destruction of property, loss of wages to the men, and loss of earnings to the employer, and when they occur on great lines of railroad, great damage and inconvenience to the public.

An order will be entered in the district of Nebraska continuing the present schedules (subject to the modification as to delayed or overtime) in full force and effect and setting aside the order made by this court on the 27th day of January, 1894.

Also an order directing the receivers to cause 500 copies of a complete record of this cause, including the pleadings, evidence, opinions and orders entered in the several districts, printed and distributed as provided in the order.

Also an order requiring the receivers to pay the expenses of the employes attending the conference ordered by the circuit judges and while attending this hearing.

An order will be entered in the districts of Colorado and Wyoming modifying the orders entered in those districts on the 26th and 27th days of February, 1894, to conform to the order now entered in the district of Nebraska, relating to the rules, regulations and schedules of pay.

Riner, J., concurs.

UNITED STATES CIRCUIT COURT, DISTRICT OF NEBRASKA.

OLIVER AMES, Second ET AL.,

v.

UNION PACIFIC R. CO. ET AL. (No. 2.)

1. An order relative to wages of employ  es of a receiver should be for the benefit of all parties similarly situated, whether belonging to any of the labor organizations applying for it or not.
2. If employ  es of receivers do not receive enough compensation for the work they do they have the right to apply to the receivers or to the court to have their wages increased, and on a proper showing made, justice will be done.
3. The rate of wages to be paid to employ  es of receivers must be left mainly to the receivers to manage.

ON PETITION by a committee of the American Railway Union for an order directing the restoration of a wage schedule formerly in force, but which had been changed, to the detriment of the petitioners. *Relief granted.*

The facts are stated in the opinion.

Dundy, J., delivered the following opinion:

I very much disliked to enter upon the hearing of the matters involved in this application, for reasons hereafter to be stated, but under the peculiar circumstances surrounding the petitioners, and the difficulty under which they labored in presenting their claims to the court, resulting in their being completely ignored, after they had, as is alleged, been promised a hearing, I have thought it no more than fair to hear them rather than to send them to their distant homes unrecognized and unheard. Whilst *Judge Caldwell* was here holding court for the purpose of hearing the alleged grievances of some of the labor organizations (I had nothing whatever to do with hearing them) I positively declined to hear the complaints of these parties, as it seemed to me that under orders theretofore made by the circuit judges, the complainants ought to have been heard before one or both of those judges. But after the hearing before *Judges Caldwell* and *Riner* had been completed, and after *Judge Caldwell* had left the city, application was again made to me, praying for a hearing, which had theretofore been denied them. At this time an affidavit was filed and presented to me stating, in substance, that the petitioners had been promised a hearing, that they had been waiting for days to have the promise carried out, and finally, that they had been absolutely refused the hearing theretofore promised. These petitioners were present in person and were represented by *Judge Duffie* and *Hon. John D. Howe*, two reputable and distinguished lawyers. They were not "suppressed" or turned away without permission to state the character of the application they desired to make. After hearing the statements of the applicants, and their attorneys, and reading the affidavit before referred to, I concluded to entertain the application and to fully hear the merits and demerits of the claims made in the petition now under consideration. Finally the 11th day of April was fixed as the time of hearing, which has resulted in the orders to be made herein. I am not fully advised of the reasons leading to the refusal to hear these petitioners. I do not know whether it was because of their supposed poverty or because they received but small wages for their daily toil, or because of their having less influence, or being less numerous

than their more favored friends who succeeded in gaining a hearing, that the court refused to accord them a hearing as well as the others.

This much I have thought is due to myself to state in explanation of the refusal to hear the application when it was at first presented to me therefor.

A week or so ago the train men in the employ of the Union Pacific Company had a hearing before *Judge Caldwell*, where the wage question was under consideration. That case in all essential particulars was the same as this one. A written opinion was filed in the case. Some facts are stated in the opinion—one or two important facts are misstated, and some important facts are omitted entirely.

I propose to give a history of the case and the reasons that lead to the making of the order that has been so extensively criticised and denounced. This I do here and now because it is the only opportunity I have had for stating the reasons on which action was based. Much of the opinion is devoted to the occupation and business qualifications of the Receivers, who happened to be appointed without consultation with the senior circuit judge. Much of it is devoted to the alleged character of the injunction allowed, and which was under consideration by the court, and much of it is devoted to that part of the order which authorized the Receivers to put the wage schedule in force on the first day of March, 1894. The author of the opinion seems to have taken great, if not malicious pleasure, in passing his strictures on what had been done in connection with the matters then under consideration. No one, probably, questions the right to do so, but many, very many, have questioned the good taste and decency of the manner in which the hearing was had and the opinions prepared.

Now for the history of this litigation.

This suit was commenced on the 9th day of October, 1893, and about the same time receivers were appointed to take possession of and operate the several roads named as defendants. These numerous defendant roads constitute what is known as "The Union Pacific System," and were, at the time the suit was commenced, operated as one harmonious whole.

Mr. S. H. H. Clark, E. Ellery Anderson and

Oliver W. Mink were at first appointed Receivers. These persons were agreed on, and were entirely satisfactory to all parties named in the suit. Afterwards, on the 18th day of November, 1893, General John C. Cowin, who represented the Attorney General, and on behalf of the general government, came into open court and asked and obtained leave for the government to intervene as a defendant so that it might be in better position to protect the vast claims held against The Union Pacific Railway. The railways and other Receivers were represented by Mr. Thurston, and then and there all parties in interest asked to have Mr. Frederic Coudert and J. W. Doane appointed additional Receivers, which was done. This was done not only by consent, but at the request of all parties in interest, including the government.

Now, who are these men so held up to ridicule as wanting the necessary qualifications for Receivers of a railroad? Mr. Clark has spent the greater part of his life in connection with the railroad business. A well merited eulogy was pronounced on him, so that little more need be said, so far as he is concerned. Mr. Mink came up from the ranks as a railroad telegraph boy. Many years ago he became the comptroller of the Union Pacific and its branches, and continued to act as such until he was appointed one of these Receivers; he was also, at the time of his appointment, vice president of the road, and is still such. He is well known to be one of the best accountants the country affords, and is the only man living who is thoroughly conversant with the financial history and standing of the several defendant roads.

Mr. Anderson is a distinguished lawyer of New York city, but has had much to do with railroad business. He has been, and I think is still, a receiver of another road. He was several years ago a member of the government commission which was created for the purpose of investigating the management and affairs of the Union Pacific road. He is now and has been for some time past, one of the government directors of the road, and knows very much about its business and condition. Mr. Doane is a man of commanding influence, and is known to be highly successful in whatever he undertakes. He too, is a government director, and still continues to act as such. Mr. Coudert is a distinguished lawyer of New York. Is well known as one of the leading lawyers of the United States. He stands well with the present administration, and with the country, as well, perhaps, as any other man in it. These are the men sneered at in the manner and for the reasons stated. But they are well known in the greater part of this country. They need no defense here or any other place. The high character and standing of each and every one of them blunts the criticisms intended for them, as well as the one that appointed them. I will dismiss this branch of the subject by saying that these receivers will not suffer by a comparison between them and the receivers appointed for the great Santa Fé system, not one of whom, it is understood, was ever a practical railroad man, but not for that reason, or any other so far as known, unfit for railroad receivers. Whether the repu-

tation of the receivers, or either of them will suffer more from the unjust and unwarranted criticism passed upon them and their doings in the premises, than will the reputation of the author of the criticism, is a debatable question.

It seems to me that all their efforts down to this time have been made in the right direction. Their duties are multifarious and difficult. Their responsibilities are simply enormous. The several roads operated by them extend into numerous states and territories. They have been required to give bond in about fourteen states and territories. The aggregate amount of the bonds so given approximate the sum of \$———. Until they do more than to make an honest effort to reduce the operating expenses of the roads under their charge they ought not to be stigmatized as ignoramuses in this court, nor in any other place. Then, again, if the four receivers last named are so incompetent, it would strike even a careless and casual observer as somewhat peculiar that Mr. Clark should be banished from his post of duty, and directed to stay away from the headquarters of the roads for five months at one time. Some things seem to be inexplicable, and this is one of them.

The next important step taken in connection with this litigation was the presentation by the Receivers of a petition in which it was shown that a new wage schedule had been prepared by them to take effect on the 1st day of February then following. On the 27th day of January, 1894, an order was made approving the schedule so prepared and presented by the receivers for approval. They were then authorized to put the same in force on the first day of March, if in their judgment the same was fair and reasonable. They were at the same time authorized to establish new rates and new schedules as circumstances might thereafter require. No written notice of any intention to reduce wages of any of the employes seems to have been given. This is the part of the said order which seems to have aroused so much indignation in some quarters, and the part which seems to have been taken as such an excellent text on which to base a sermon, which, it was supposed, would obliterate the author of the order. Portions of this order will appear hereafter.

This order expressly provided for any one or more of the employes having a hearing in court, if any such happened to feel aggrieved. One person or many, as the case might be, was guaranteed this right. The aggrieved had the right under this order to come into court in person, or by agents, representative or attorney, and there to have his or their complaints heard, and their wrongs redressed. This is the first order and notice to men so far as I know, ever made in a court, where the right of the employes to go into court was recognized and provided for. But this order containing this wholesome provision—a provision made therein for the exclusive benefit of the men, has been revoked by Judge Caldwell. If the order was without authority of law on which to base it then manifestly it ought to have been revoked. But if sanctioned by law then it ought to have been let alone. The reasons for revoking it are not made known to us. It

cannot well be contended that the portion of the order in question was contrary to law or justice or reason, and that it was revoked for such reasons. The only reason thought to exist for its revocation is the source from which it emanated. Hereafter if any of these poor men have a grievance they want heard in court it may be somewhat expensive for them to travel eight or ten hundred miles from here to hunt up the "source of power," the "fountain head of justice," before whom an application might be made for leave to file a petition asking to have the wrong redressed, which right was fully accorded to all such by the order in question until it was revoked.

The part of this order under consideration is as follows:

"The court further finds and holds: That the said Receivers are fully authorized and empowered under and by virtue of the original orders of their appointment, to put into force and effect from time to time, such rules, regulations or schedules aforesaid, when so determined upon and formulated in accordance with the best judgment of the said Receivers after due investigation and consideration of all the conditions affecting the trust property in their charge. It is also by the court further held and found: That each and every of the employes of this court, acting under said Receivers, and engaged in the transaction of the business and the operation of the railway and telegraph lines, and properties for the said Receivers, having cause of complaint against the putting into effect or enforcement of any such rules, regulations, or schedules, are entitled, either individually or collectively, in person or by duly authorized representatives, to come into this court by proper petition and have their complaints fully heard and considered, to the end, that any such rules, regulations, and schedules so put into effect in the first instance by the said Receivers, may be by order of the court so changed and modified as to do equal and exact justice to each and every of the employes of this court under the said Receivers. And leave is hereby given to each and every employe of this court engaged in operating the railway and telegraph lines, and conducting the business in charge of the said Receivers, to intervene in this cause by petition and to move for such modification, change or abrogation of such rules, regulations, and schedules, or this or any other made herein, or for such further order or direction in the premises as may be just and equitable, and said employes may so appear by petition, either individually or collectively in proper person or by or through their duly authorized representative or representatives. It is by the court further held and found that the revised rules, regulations and schedules prepared, adopted and formulated by the said Receivers, and more specifically described and set forth in the petition herein, and the exhibits thereto attached, and which said revised rules, regulations and schedules are by the direction of the said Receivers, to become operative on the 1st day of March, 1894, are prima facie reasonable and just, and appear to provide for fair compensation to all of the employes therein specified for the character and value of their services to be rendered by each and every of

them. It is therefore, by the court ordered, adjudged and decreed that the said Receivers be, and they are hereby authorized and empowered to put the said revised rules, regulations and schedules into full force and effect upon the date aforesaid, if in their judgment the same are fair and reasonable, and continue and maintain the same upon all the railway and telegraph lines, and with respect to the management and operation of all the property of each and every of the defendants herein, so far as the same apply thereto, except as the same may be changed, revised or abrogated by the said Receivers, or by further orders of the court herein. And the said Receivers are further authorized and empowered from time to time, without any additional or other order of the court in the premises, to prepare, adopt, formulate, and to put into force and effect upon any of the lines of railway under their charge or with respect to any of the business transacted by them, such additional or revised rules, regulations and schedules as they may determine are for the best interests of the trust estate and are just and reasonable towards their employes. The action of the said Receivers in electing to discontinue all former rules, regulations and schedules in force as to those classes of employes referred to and described in said petition, and in preparing, adopting and promulgating all those certain rules, regulations and schedules set forth in the said petition and the exhibits thereto attached is hereby approved and confirmed."

It is by the court further held and ordered: That an employe of this court acting under the said Receivers, who does not wish to continue his employment as such under the rules, regulations and schedules so put into force and effect, or any such rules, regulations and schedules as may from time to time be put in force and effect by the said Receivers, or by further order of the court herein, may terminate his employment at any proper time and fit place, and in such a manner as he may elect, but so as not to impede, obstruct or interfere with the business of the said Receivers or the use and operation of any of the railway and telegraph lines, or properties in charge of this court through its said Receivers."

So much for this provision in the order which was revoked, and for which nothing but a "vacuum" has been substituted.

The portion of the said order of the 27th of January at which the heavy artillery is aimed in the said opinion, is that part which authorizes the Receivers to put in force the wage schedule on the first of last March.

In the opinion it is stated on the sixth page as follows:

The petition also prayed for a very extended injunction against the employes. On the day the petition was filed the court entered an order declaring that the rules, regulations and schedules prepared by the Receivers and filed with their petition, were "prima facie reasonable and just," and directed that they become operative on the first day of March, 1894, and ordered an injunction to issue as prayed for in the petition. Upon the presentation of this petition, and the order made thereon, to the United States Circuit Courts for the Districts of Wyoming and Colorado,

those courts declined to give effect to the order in those districts for the reason that the employes had had no notice of the proposed change.

It is here stated that the court "directed that they become operative on the first day of March, 1894, and ordered an injunction to issue as prayed for in the petition." I feel bound to interpose here in behalf of truth and the correctness of history. The court did no such thing. It simply authorized the Receivers to put in force the schedule on the first of March, if in their judgment they considered the same fair and reasonable. Nor was there any injunction ordered "to issue as prayed for in the petition." Nor was any injunction in fact ever issued from the clerk's office in connection with this suit for this or any other purpose.

The portion of the order here referred to will be found interesting reading matter when placed side by side of certain other orders made in another case by another judge. Reference is made, and attention is particularly directed thereto.

Most lawyers, and many others who care to know, are fully advised of the fact that the district judges usually follow the decisions, rulings and orders of the circuit judges in the circuit where they belong. I know of no exceptions to the rule. It is supposed to be a safe rule to follow. It is the rule here or at least it has been the rule here. But from recent events I am thoroughly convinced that I did that once too often. In my childlike innocence I really thought it right to make the order authorizing the Receivers to put in force the wage schedule, either by first giving notice or without it. But it seems I was too unsophisticated, I could not see far enough into the future to know what was in store for the obnoxious order, nor to see the strictures to be passed on its author for making it. The officers and agents of any railroad corporation who have the right to prescribe rules and regulations for the government and operation of the road also have the right to say to all persons, including employes, that we will pay so much per day, or per month, or per year, or per trip, as the case may be. If the offer is satisfactory, agreements can be based thereon which will be satisfactory to all parties concerned. If no agreement is made for any particular length of service, then either party can terminate the employment at will. At least that is the general rule. Here the Receivers gave over thirty days' notice of their intention to reduce and equalize wages. The employes were not bound to stay in the service of the Receivers if it did not suit them to do so. But if they saw proper to remain in the service after a notice of the reduction of the wages, then there is no law by which they could recover any sum over and above the amount fixed by the reduced schedule. After notice to the employes that the pay had been reduced, it would not do for him to say that "I will remain in your service and compel you to pay a greater rate of wages than you have fixed in your new schedule." "That we have had no agreement between us by which you can reduce my wages." His remedy, under such circumstances, would be to sever his con-

nection with his employers. That he could lawfully do without restraint, and no injunction or other order could lawfully prevent him from doing so. What is said here applies as well to other corporations and individual employers as to railroads. I thought at the time, and still think, that the order was properly made. It seemed to be a matter of expediency only. Precedent and authority seemed not to be wanting, and such precedents, too, as any judge or court might think it perfectly safe to follow. In the justly celebrated case of the Farmers' Loan & Trust Company against the Northern Pacific Railroad Company, a similar order was made in the circuit court in Wisconsin. Judge Jenkins, one of the ablest, and as I think one of the best judges in this whole country, made the order in that case. Other judges have made similar orders before the case above referred to was brought.

The order in question was issued on or about the 19th of December last. It was more comprehensive in its terms, and went further in one direction than the order issued in the Union Pacific case. Such a precedent, coming from such a court, and such a distinguished and able judge seemed to be sufficient authority on which to base action in this case. But this is by no means *all* the authority, nor the only precedent for making the order in this case, as we shall presently see. On the 21st day of December last, more than a month before the making of the order in the Union Pacific case, another judge had made an order in a case pending in the United States Circuit Court of Minnesota, and on the 27th day of the same month another order of similar import was made in the same case. The title of that suit is "Farmers Loan & Trust Company *versus* Northern Pacific Railroad Company *et al.*" Receivers had been appointed in this last named case, the same as in the case in the Wisconsin court. The Receivers prepared a new wage schedule, the same as the Receivers did in the Union Pacific case, and presented the same to a judge for approval. No notice, so far as appears, was previously given to any labor organization, or any person, of any change in schedule, or of any intention to reduce wages. This new schedule was to take effect on the first day of January, only five days after making the last order, yet no notice of the adoption of the new schedule had been given to the men to be affected by the change and reduction of wages.

This application was granted. A judge made the orders referred to and ordered an injunction to issue, which was done, not only against the employes of the road, but against many individuals who had no connection with it. *All this was done without notice to any of the parties to be affected by the orders.* And the judge who made these orders is the senior Circuit Court Judge of this Judicial Circuit, Judge Caldwell. That seems to have been all right when applied to the employes of the Northern Pacific, but all wrong when applied to the men connected with the Union Pacific. One rule to apply to one road and altogether a different one to apply to the other. It was thought safe to follow the circuit judge at all times, which has

been done usually down to the time of the promulgation of the recent "enactment." These orders *authorize* and *instruct* the Receivers to put the new schedule in force at the time before stated. The orders so made in the said case, together with the injunction issued pursuant thereto, are as follows:

(Copy.)

No. 86.

Order of United States Circuit Court for District of Minnesota granting injunction against employes of Northern Pacific Railroad Company and others from interfering with property of Receivers.

In the Circuit Court of the United States for the District of Minnesota.

Farmers Loan & Trust Company,	}
Complainant,	
<i>v.</i>	
Northern Pacific Railroad Company <i>et al.</i> ,	
Defendants.	

On reading and filing the petition of Thomas F. Oakes, Henry C. Payne and Henry C. Rouse, Receivers of the Northern Pacific Railroad Company, appointed by this court, as in said petition set forth, said petition being verified by Henry C. Payne, one of said Receivers, and it appearing that the Circuit Court of the United States for the Eastern District of Wisconsin, the court of primary jurisdiction in this cause, has made an order on a similar petition filed in said court, and after considering said petition and the order of the court of primary jurisdiction and being fully advised in the premises, this court adopts the order so made by said court of primary jurisdiction;

Now therefore, It is ordered, adjudged and decreed that the said Receivers, Thomas F. Oakes, Henry C. Payne and Henry C. Rouse, are entitled to a writ of injunction, and the clerk of this court is hereby directed to issue the same (in the form given below) under the seal of this court, and to deliver the same to the marshal for execution who is hereby ordered to protect the Receivers of the Northern Pacific Railroad Company in their possession of the property of the Northern Pacific Railroad and in their operation thereof.

Dated December 21, 1893.

Henry C. Caldwell,
United States Circuit Judge.

Endorsed: Filed December 21, 1893.

Oscar B. Hillis,
Clerk.

Injunction Issued Pursuant to said Order.

In the Circuit Court of the United States for the District of Minnesota.

United States of America, }
District of Minnesota. } ss.

The President of the United States of America,

To the officers, agents and employes of Thomas F. Oakes, Henry C. Payne and

4 INTER 8.

Henry C. Rouse as Receivers of the Northern Pacific Railroad Company, and to the engineers, firemen, trainmen, train dispatchers, telegraphers, conductors, switchmen and all other employes of said Thomas F. Oakes, Henry C. Payne and Henry C. Rouse as Receivers of the Northern Pacific Railroad Company and to each and every one of you, and to all persons, associations, and combinations, voluntary or otherwise, whether employes of said Receivers or not and to all persons generally, and to each and every one of you, greeting:

Whereas, it has been represented to the United States Circuit Court for the District of Minnesota, on the part of Thomas F. Oakes, Henry C. Payne and Henry C. Rouse, as Receivers of the Northern Pacific Railroad Company, as by their certain verified petition filed in said cause on December 21, 1893, and that said Thomas F. Oakes, Henry C. Payne, and Henry C. Rouse, as Receivers of the Northern Pacific Railroad Company, ought to be relieved touching the matters in said petition more particularly described;

And whereas, the United States Circuit Court for the District of Minnesota, in a certain cause there pending, in which the Farmers' Loan & Trust Company is complainant, and the Northern Pacific Railroad Company, Phillip B. Winston, William C. Sheldon, Jr., and Thomas F. Oakes, and Henry C. Payne and Henry C. Rouse, as Receivers of the Northern Pacific Railroad Company, are defendants, did make an order directing that the writ of injunction issue as prayed for in said petition of said Receivers,

Now therefore, In consideration thereof and of the matters in said petition set forth, you, the officers, agents and employes of Thomas F. Oakes, Henry C. Payne and Henry C. Rouse, as Receivers of the Northern Pacific Railroad Company, and the engineers, firemen, trainmen, train dispatchers, telegraphers, conductors, switchmen, and all other employes of said Thomas F. Oakes, Henry C. Payne and Henry C. Rouse, as Receivers of the Northern Pacific Railroad Company, and each and every one of you, and all persons, associations and combinations, voluntary or otherwise, whether employes of said Receivers or not, and all persons generally, and each and every one of you, in the penalty which may ensue, are hereby strictly charged and commanded that you and each and every one of you do absolutely desist and refrain from disabling or rendering in any wise unfit for convenient and immediate use, any engines, cars, or other property of Thomas F. Oakes, Henry C. Payne and Henry C. Rouse, as Receivers of the Northern Pacific Railroad Company, and from interfering in any manner with the possession of locomotives, cars or other property of the said Receivers or in their custody, and from interfering in any manner, by force, threats or otherwise, with men who desire to continue in the service of the said Receivers, and from interfering in any manner by force, threats or otherwise with men employed by the said Receivers to take the places of those who quit the service of said Receivers, or from interfering with or obstructing in anywise the operation of the railroad or any portion thereof, or the running of engines

and trains thereon or thereover, as usual, and from any interference with the telegraph lines of said Receivers, or along the lines of railways operated by said Receivers, or the operation thereof, and generally from interfering with the officers and agents of said Receivers or their employes, in any manner, by actual violence or by intimidation, threats or otherwise, in the full and complete possession and management of the said railroad, and of all the property thereunto pertaining, and from interfering with any and all property in the custody of the said Receivers, whether belonging to the Receivers or shippers or other owners, and from interfering, intimidating or otherwise injuring or inconveniencing or delaying the passengers being transported or about to be transported over the railway, or by interfering in any manner by actual violence or threats or otherwise preventing or endeavoring to prevent the shipment of freight or the transportation of the mails of the United States over the road operated by said Receivers, until further orders of this court.

This process is directed to the marshal for the District of Minnesota, who is hereby commanded to execute the same within his jurisdiction and to make due return thereof without delay.

Witness:

The Honorable Melville W. Fuller,
Chief Justice of the Supreme Court of the
United States, at the City of St. Paul, Min-
nesota, this 26th day of December, in the
year of our Lord one thousand eight hun-
dred and ninety-three.

Oscar B. Hillis,
Clerk of said Court.

[Seal of U. S. Circuit Court.]

Supplemental Order for Injunction, etc.

United States Circuit Court for the District of
Minnesota.

Farmers Loan & Trust Company, }
Complainant, }

vs.

Northern Pacific Railroad Com- }
pany *et al.*, }
Defendants. }

On reading and filing the supplemental petition of Thomas F. Oakes, Henry C. Payne and
4 INTER S.

Henry C. Rouse, Receivers of the Northern Pacific Railroad Company, with supplemental petition being verified by Henry C. Payne, one of said Receivers, and it appearing that the Circuit Court of the United States, for the Eastern District of Wisconsin, the court of primary jurisdiction in this case, has made an order on a similar supplemental petition filed in said court, and after considering said supplemental petition, and the order of the court of primary jurisdiction, and being fully advised in the premises, this court adopts the order so made by said court of primary jurisdiction.

Now, therefore:

It is ordered, adjudged and decreed that the said Receivers, Thomas F. Oakes, Henry C. Payne and Henry C. Rouse, be and they are hereby authorized and instructed to put in operation and maintain upon the said Northern Pacific Railroad the revised schedules and the rates in said petition ordered by said Receivers, to take effect January 1st, 1894, and to that purpose and end their action in abrogating schedules in force on said railroad at the time of their appointment as said Receivers, August 15th, 1893, is hereby confirmed.

It is further ordered, adjudged and decreed that said Receivers, Thomas F. Oakes, Henry C. Payne and Henry C. Rouse, are entitled to a writ of Injunction, and the clerk of this court is hereby directed to issue the same in the form given below under the seal of this court, and to deliver the same to the marshal for execution, who is hereby ordered to protect the Receivers of the Northern Pacific Railroad Company in their possession of the property of the Northern Pacific Railroad, and in their operation thereof.

Dated December 27 1893. By the Court.
Henry C. Caldwell,
United States Circuit Judge.

Form of writ to be issued:

United States of America—*ss.*

United States Circuit Court, District of
Minnesota.

The President of the United States of America,

To J. Horan, S. P. Olsen, C. Barrett, E. S. Johnson, Jos. Wood, H. L. Porter, John Collins, M. Vetter, J. W. Gribble, J. J. Foster, J. B. Quimby, Jesse W. Rees, O. S. Humes, E. J. Shea, J. M. Rapelje, F. E. Bradbury, F. J. Woodward, John Dowdell, A. D. Jenkins, F. A. Ressor, J. B. W. Johnston, J. Mackey, C. N. Dorsey, P. T. Boleyn, D. Goodall, T. F. Hagan, R. B. Kelley, H. L. Shepard, J. S. Burns, J. W. Mapleson, W. Y. Pheal, J. R. Benham, Bart Hines, F. G. Kellogg, Thomas A. Leeson, M. O. Graves, E. E. Moyer, F. J. Becker, G. Olsen, John Ryan, P. H. Miller, D. McClelland, Edward C. Rust, R. Reed, P. H. Campbell, J. K. Porter, W. J. Gillispie, C. E. Baker, Harry Raffley, S. E. Garrett, D. D. McInnis, O. O. Wichard, Con Keefe, T. N. Gleason, Patrick Harty, Matt Conlin, L. C. Mann, P. Schmidt, L. F. Hare, M. H. Williams, W. G. Hogg, S. Craig, S. J. Grouthwaite, J. Moriarity, H. N. Shupert, P. M. Arthur, — Youngsen, E. E. Clark, T. P. Sargent, D.

G. Ramsey, S. E. Wilkinson, F. H. Morrison, A. E. Brown, George W. Newman, and each and every and all of you and all your agents, sub-agents, representatives and employes, and all persons generally, whether employes of the Receivers of the Northern Pacific Railroad or not, and to the officers, agents and employes of Thomas F. Oakes, Henry C. Payne, and Henry C. Rouse, as Receivers of the Northern Pacific Railroad Company, and to the engineers, firemen, train dispatchers, telegraphers, conductors, and all other employes of said Thomas F. Oakes, Henry C. Payne, and Henry C. Rouse, as Receivers of the Northern Pacific Railroad Company, and to each and every one of you, and to all persons, associations and combinations, voluntary or otherwise, whether employes of said Receivers or not, and to all persons generally, and to each and every one of you. Greeting:

Whereas, It has been represented to the United States Circuit Court for the District of Minnesota, on the part of Thomas F. Oakes, Henry C. Payne and Henry C. Rouse, as Receivers of the Northern Pacific Railroad Company, as by their certain verified petition filed in said cause on December 21, 1893, and by their supplemental verified petitions filed in said cause on December 27, 1893, that said Thomas F. Oakes, Henry C. Payne and Henry C. Rouse, as Receivers of the Northern Pacific Railroad Company, ought to be relieved touching the matters in said petition more particularly described. And,

Whereas, The United States Circuit Court for the District of Minnesota, in a certain cause there pending in which the Farmers Loan & Trust Company is the complainant and the Northern Pacific Railroad Company, Philip B. Winston, William C. Sheldon, George R. Sheldon, William S. P. Prentiss, William C. Sheldon, Jr., and Thomas F. Oakes, Henry C. Payne and Henry C. Rouse, as Receivers of the Northern Pacific Railroad Company are defendants, did make orders directing that a certain writ of injunction issue.

Now therefore, In consideration thereof and of the matters in said petition set forth, you, J. Horan, S. P. Olsen, C. Barrett, E. S. Johnson, Joseph Wood, M. L. Porter, John Collins, J. K. Bingham, Bart Hines, F. G. Kellogg, Thomas A. Leeson, P. H. Miller, D. McClelland, Edward C. Rust, R. Reed, Henry Raffley, S. E. Garrett, D. D. McInnis, A. C. Wishard, M. Vetter, J. W. Dribble, J. J. Foster, J. B. Quimby, Jesse W. Reese, O. S. Humes, E. J. Shea, J. M. Rapelje, F. E. Bradbury, F. J. Woodward, John Dowdel, A. D. Jenkins, F. A. Ressor, J. B. W. Johnston, J. Mackey, C. F. Dorsey, P. T. Boleyn, D. Goodall, T. F. Hagan, R. B. Kelley, R. L. Shepard, J. S. Burns, J. W. Mapleson, W. Y. Theal, M. O. Graves, E. E. Moyer, F. J. Becker, G. Olsen, John Ryan, P. H. Campbell, J. K. Porter, W. J. Gillispe, C. E. Baker, Con Keefe, T. N. Gleason, Patrick Harty, Matt Conlin, L. C. Mann, P. Schmidt L. F. Hare, M. H. Williams, W. G. Hogg, S. Craig, S. J. Grouthwaite, J. Moriarity, H. L. Shupert, F. M. Arthur, Youngsen, E. E. Clark, T. P. Sargent, D. G. Ramsey, S. E.

4 INTER S.

Wilkinson, F. H. Morrison, A. E. Brown and George W. Newman, and each and every and all of you, and all your agents, sub-agents, representatives and employes, and all persons generally whether employes of the Receivers of the Northern Pacific Railroad Company or not, and the officers, agents and employes of Thomas F. Oakes, Henry C. Payne and Henry C. Rouse as Receivers of the Northern Pacific Railroad Company, and the engineers, firemen, trainmen, train dispatchers, telegraphers, conductors and all other employes of said Thomas F. Oakes, Henry C. Payne and Henry C. Rouse as Receivers of the Northern Pacific Railroad Company, and each and every one of you, and all persons, associations and combinations, voluntary or otherwise, whether employes of said Receivers or not, and all persons generally and each and every one of you in the penalty which may ensue are herewith strictly charged and commanded that you and each of you do absolutely desist and refrain from disabling or rendering in any wise unfit for convenient and immediate use, any engines, cars or other property of Thomas F. Oakes, Henry C. Payne and Henry C. Rouse, as Receivers of the Northern Pacific Railroad Company, and from interfering in any manner with the possession of locomotives, cars or property of the said Receivers or in their custody, and from interfering in any manner by force, threats or otherwise, with men who desire to continue in the service of the said Receivers and from interfering in any manner by force, threats or otherwise, with men employed by the said Receivers and from interfering with or obstructing in anywise the operation of their railroad or any portion thereof or the running of engines and trains thereon and thereafter, as usual, and from any interference with the telegraph lines of said Receivers, or along the lines of railways operated by said Receivers, or the operation thereof, and generally, from interfering with the officers and agents of said Receivers, or their employes in any manner, by actual violence or by intimidation, threats or otherwise, in the full and complete possession and management of said railroad and of all the property thereunto pertaining, and from interfering with any and all property in the custody of the said Receivers, whether belonging to the said Receivers, or to shippers, or to other owners, and from interfering, intimidating or otherwise injuring or inconveniencing or delaying the passengers being transported, or about to be transported over the railway of said Receivers, or any portion thereof, by said Receivers, or by interfering in any manner, by actual violence or threats, and otherwise preventing or endeavoring to prevent the shipment of freight or transportation of the mails of the United States over the road operated by said Receivers, until the further order of the court.

This process is directed to the marshal for the District of Minnesota, who is hereby commanded to execute the same within his jurisdiction, and to make due return thereof without delay.

In testimony whereof, Honorable Melville W. Fuller, Chief Justice of the Supreme Court of the United States, has caused the seal of said circuit court to be hereunto affixed, this

.....day of.....A. D. 189.. and in the 118th year of our independence.

Attest:

Clerk.

Now, as comparisons are in order, I am willing to submit the said orders side by side to the candid reader so that he may determine which is the more preferable, the one which *authorized* The Union Pacific Receivers to put in force the new schedule, if in their judgment the same were *fair and reasonable*, or the order made in the Northern Pacific case in which the Receivers were "*authorized*" and *instructed* to put in force the new schedule, and that too within five days after making the last order. It was a "*fundamental error*" as stated in the opinion, to put in force a new schedule, no previous notice of which had been given before making the order, but of which more than thirty days notice had been given before the change was to take effect, what sort of "*error*" was it to make the orders in the Northern Pacific case, putting in force new schedules no notice of which had been given, and which schedules were to take effect in five days after the last order adopting them and directing their enforcement. The answer will probably suggest itself. Much is said in the opinion in denunciation of issuing injunctions in such cases, as they are calculated, as it is claimed, to induce strikes. This may be true, but it seems that this matter must have been overlooked in the Northern Pacific case, as there the injunction issued against all mankind generally as well as against a very large number by name. The trouble here seems to be in following what may possibly be a very bad precedent set by another judge, whose rulings it has heretofore been customary to follow.

After the making of the order of the 27th of January, Judge Riner, the United States District Judge for Wyoming, made an order, and it is understood issued, or ordered issued, an injunction restraining the Receivers of the Union Pacific from carrying the new wage schedule into effect in Wyoming and Colorado. This had the effect of nullifying, to some extent, the order made the 27th of January. These adverse orders resulted in the hearing recently had in this court, where the order last named was revoked. When the hearing came on, Judge Riner, who had heretofore enjoined the enforcement of the order of the 27th of January, as was understood, was called here from another state to hear the case with Judge Caldwell, whilst I was excluded and entirely ignored. This may have been judicial courtesy, but other names would describe it more correctly.

That afforded me no opportunity whatever to defend or justify, or give reasons for what had been done in the premises. I thought then, and still think, that ordinary fairness, independent of any question of judicial courtesy, ought to have afforded an opportunity to explain the reasons for making the order, more especially so because of so much adverse criticism of the same.

At the very beginning of the hearing of this application I found that it was "a condition and not a theory that confronted me." Hence the preceding history and explanation of

things is thought necessary and proper to show the reasons for making the order of the 27th of January, which I have heretofore had no opportunity to explain or defend. To save any misapprehension I desire to say that no exceptions are taken to any part Judge Riner has been required to take in connection with any matter growing out of this litigation.

The petition presented and now under consideration shows, in substance, that the committeemen before named represent about four thousand employes of the railroad who are members of the American Railway Union. That the men they represent have been in the employ of the company from six months to twenty years. That the wages usually paid to the men for a great length of time had been reduced on the first day of last September, and that the wages paid before the reduction were only fair and reasonable. The prayer of the petition is for a restitution of the old schedule as it stood before the change which took effect on the first of September last. It is claimed on the one side and admitted on the other, that eight or ten thousand of the men are affected by the reduction, a large part of whom were common laborers, such as the ones who wield the shovel and pick or handle the freight and heave the coal. Some of the men so employed belong to other organizations, including the Knights of Labor, whilst some of them belong to no organization of the sort.

If it should be thought proper to make any order whatever in the direction asked, then any such order ought to be for the benefit of all parties similarly situated, whether belonging to any of the associations or not. In such a matter all should be treated fairly, and, so far as practicable, alike. There is no particular question of law to be considered here. It is simply a question of expediency and fair dealing. Of course, when by order of court the Receivers take possession of a railroad for the purpose of operating it there is an implied authority on their part to employ and pay for all necessary force to carry out the object of appointment. It would need no special order of a court to authorize that to be done. It would follow, as a necessary consequence, that the Receivers would have the right to pay a just and reasonable compensation for the services to be performed in the operation of the road. It is necessary for the Receivers to have a large number of men to operate the road successfully. It cannot be done without it. If necessary men cannot be employed at just and reasonable rates, as viewed from the Receivers' standpoint, then they would be fully justified in applying to the court for leave to pay more than the usual and ordinary rates. If the men in the employ of the road think they do not receive enough compensation for the work they do, they have the right to apply to the Receivers or the court to have their wages increased.

And on a proper showing made, justice will be done.

This case is no exception to the rule as here stated, several thousand of these men, it is claimed, receive but small pay, many of them not more than \$1.25 per day. They are entitled to great consideration, much more than those who receive the high rate of wages. But the

wages they are at the present time receiving were fixed by the railroad officers long before the Receivers were appointed. The compensation then fixed was supposed to be fair and reasonable and as much as other railroads were paying for similar services. Considerable testimony was taken which tended to show that a part of the employes were not at the present time receiving living wages. Many of them doubtless are, whilst some of them are certainly not. After the testimony had all been presented, the Receivers presented a petition, through their attorney, Mr. Thurston, asking leave to restore the schedule in force before the first of September last. These and similar matters ought, as a general proposition, to be left mainly to the Receivers to manage. On their judgment, it may be stated, it is safe to rely. It is there where these matters, at least in part, must be left. The Receivers manifest a dis-

position to do what is fair with the employes. They must have a chance to do voluntarily, at least in part, what the petitioners ask herein to have done. Authority will be given them to do as requested if in their judgment it ought to be done.

An order will be entered directing the Receivers to restore the old wage schedule in force before the first day of September last, so far as it relates to the men represented by these petitioners, and others similarly situated. And in cases where the men receive less than \$60.00 per month the increased pay shall commence on the first of March last.

And in all cases where the men received \$60.00 per month or over the increase pay shall commence on the first of the present month.

This order shall remain in force until otherwise ordered.

UNITED STATES CIRCUIT COURT, NORTHERN DISTRICT OF ILLINOIS.

v.

PHILADELPHIA & READING R. CO.

SAME

v.

CENTRAL VERMONT R. CO.

SAME

v.

FITCHBURG R. CO.

SAME

v.

NEW YORK, CHICAGO & ST. LOUIS R. CO.

SAME

v.

DELAWARE, LACKAWANNA & WESTERN R. CO.

1. In the absence of some prohibition or restraint, common law or statutory, a common carrier may lawfully demand or contract for such compensation for carriage as he may be able to obtain, without regard to its unreasonableness.
2. Congress has not adopted the common law of England as a national municipal law. The enforcement of the common law by the courts of the United States has in every instance been as the municipal law of the state by which the subject-matter was affected.
3. Outside of the Interstate Commerce Act there is no law of the United States, as a distinct sovereignty, imposing any restraint upon the imposition by a carrier of unreasonable rates.
4. A state law prohibiting the exaction by carriers

of unreasonable rates is, as applied to a contract for shipment from one state to another, an interference with interstate commerce and cannot be so applied.

5. A contract for interstate shipment does not come within a state law regulating rates because made in that state so that such law will introduce a new term into the contract, but its utmost effect would be to forbid a contract for an unreasonable rate and make the contract unlawful, leaving the transaction open to adjustment under the laws of the United States.
6. A United States court in a case removed from a state court on the ground of diverse citizenship has no jurisdiction over a question as to the reasonableness of an interstate commerce rate.

(November 27, 1895.)

ON DEMURRER to complaints in actions at law to recover back the amounts of unreasonable freight rates alleged to have been exacted of plaintiff for the carriage of commodities shipped over the defendant roads. *Demurrer sustained.*

The facts are stated in the opinion.

Messrs. Albert H. Veeder and Mason B. Loomis for complainants.

Messrs. Walker & Eddy, for defendants Fitchburg R. Co., New York, C. & St. L. R. Co., and Delaware, L. & W. R. Co.

Messrs. Ullman & Hacker and Osborn & Lynde for defendant Philadelphia & R. R. Co.

Messrs. Schuyler & Kremer, for defendant Central Vermont R. Co.

Grosscup, D. J., delivered the opinion of the court:

The declarations in these cases are substantially alike. The first three counts with some variations, aver that the plaintiff is a corporation engaged in the business of shipping dressed beef and other provisions from the Union Stock Yards, in Chicago, to New York, Montreal, and other points in the eastern states and Canada; that after the 4th day of April, 1887, (the date the interstate commerce law went into effect) and until April, 1888, the plaintiff, from time to time, delivered and the defendant accepted for transportation to such terminal points certain of its manufactured products; that the defendants were common carriers, engaged with other common carriers, in transporting continuously from Chicago to the eastern terminal points at certain rates established and then in force as the rate between such points; that the plaintiff was compelled to pay these defendants, according to the schedule rates the sum of 65 cents per 100 pounds from Chicago to New York for Boston, and other rates in like proportion to other points; and that the rates so taken and exacted were unjust and unreasonable. Two of these counts allege that these rates were established by combination between defendant and other corporations, and that the plaintiff paid the same under protest. The other special counts, except the fifth and seventh, are substantially the same, except that they aver that the defendants, and the other common carriers engaged with them in transporting the goods, used bills of lading for such shipments in the name and style of the Great Eastern Fast Freight Line, or other fast freight lines. The fifth and seventh counts are substantially the same as the others, except that they proceed expressly under the Interstate Commerce Act. Most of the defendants demurred to all the special counts, one of them, the Delaware, Lackawanna & Western Railroad Company, in place of a demurrer, filed a plea to the jurisdiction to the fifth and seventh counts. The cases are removed here, on the petition of the defendants, from the state courts, on the ground of diverse citizenship.

The general question raised by the demurrer is whether there is any law, common or statutory, applicable to the transactions set forth, which prohibits the exaction of unreasonable rates, or affects any contract between the shipper and carriers whereby unreasonable rates are stipulated for and taken. There can be no question that, in the absence of such prohibition or restraint, a common carrier can lawfully demand or contract for such compensation for carriage as he may be able to obtain. His privileges would, in such cases, be like

those of any other person, and subject only to the economic laws which flow from trade and competition. If there is any municipal law which supersedes or supplements these economic laws, and subjects the carrier to restraints or regulations not imposed upon general business, it must be found either in the municipal law of the states or in a law of the United States.

It is not disputed that within the territory of the states, and upon subjects affected by state law, such a prohibition exists. It is one of the restraints embodied in the common law of England, and is therefore in force within every jurisdiction where the common law is the law of the land. It seems to me equally clear that, outside of the Interstate Commerce Act, there is no law of the United States, as a distinct sovereignty, imposing such restraint. The United States, as a distinct sovereignty, imposes no laws upon its subjects, except such as are expressly or impliedly enacted by Congress. Congress has not adopted the common law of England as a national municipal law. The courts of the United States have had many occasions to enforce the common law, but in every instance it has been as the municipal law of the state by which the subject-matter was affected. Outside of the Interstate Commerce Act, there is no enactment of Congress, and no self-operating provision of the Federal Constitution, which expressly or by implication evidences a command or purpose to interfere with the freedom of interstate commerce, or lay any restraint upon the rights of carriers or shippers engaged therein. *Welton v. Missouri*, 91 U. S. 282, 23 L. ed. 850; *Brown v. Houston*, 114 U. S. 622, 29 L. ed. 257.

The question then arises, is the municipal law of the state applicable to the transaction set forth in the declaration? Is the act or contract of a carrier, who accepts goods for carriage from one state into another, subject to that particular provision of the municipal law of the several states where the goods are taken, or through which they are conveyed, which prohibits the exaction of unreasonable rates? There can be no doubt that to Congress is given, by the Constitution, the absolute power to regulate commerce between the states. This power, independently of legislation, is not necessarily exclusive of the right of the states to reasonably regulate such incidents of interstate commerce, lying within their respective jurisdictions, as wharves, pilots, harbors, roads, bridges, etc. A wharf, harbor, or bridge lying within a state is a tangible entity, over which the laws of the state extend. The cost of their creation and the expenses of their maintenance make the imposition of tolls or

charges not only reasonable, but necessary. These must be enforced by and subject to some law, and, in the absence of congressional legislation, there is no law except that of the state. The application of state law in such cases is not inconsistent with the general power conferred upon Congress, and does not introduce into commerce between the states either confusion or restraint. Such regulations may exist harmoniously with regulations imposed by other states upon wharves, harbors, and bridges within their territorial limits. But the fixing of a rate for the carriage of goods from one state to another is not simply an incident of, or appurtenance to, commerce, but is the very core and essence of interstate commerce. It is not a physical entity within the limits of a state, and it cannot be subject to regulation in one state without coming into interference with the equally rightful regulations of other states, and thus producing hopeless contradiction and confusion. How can Illinois determine what is a reasonable charge for carriage across Indiana, Ohio, or Pennsylvania? The reasonableness of such rate depends, among other things, upon the cost of construction and wages paid beyond her jurisdiction; the amount of capitalization allowed, and taxes and assessments exacted, by other jurisdictions; the terms of contracts for the interchange of freight between carriers, made and allowed under the laws of other states; and the amount of traffic carried, which may, in turn, be affected by the laws of the other states governing the acquisition of, or consolidation with, other lines. These, and many others, are the elements of the cost of carriage, and, before the reasonableness of a rate can be determined, the cost must be ascertained. The reasonableness of rates for such long distances, and over different methods of conveyance, can only be approximately ascertained at best, by men of special learning and equipment in such matters. Is it possible that the Constitution contemplates that such learning can be found in the courts and juries of every county traversed by a line 1000 miles long? I am of the opinion that a rate for the carriage of interstate commerce, dependent, as it is, for its reasonableness upon so many different considerations of expenditure, business, and interpretations of

the laws of different states, is essentially a national affair, and its regulation is therefore exclusively national. The rate of carriage is the heart pulse of commerce, and can be subject safely to a single source of restraint only. Many restraints, themselves entirely different and inconsistent with each other, would destroy the very possibility of uniformity or fixedness of rates. It follows, therefore, that in my opinion the local municipal law of the several states is not applicable to the reasonableness of these rates, and cannot be appealed to as a basis for suits such as these.

It is urged on argument that, inasmuch as the contracts for shipment were made in Illinois, the law of Illinois necessarily entered into their constitution and terms; that a contract could not be made which contravened the municipal law of the state. The counts of the declaration which proceed upon contract assume that the rate charged was agreed upon between the parties. Now the law of Illinois does not introduce a new term into this contract. Its utmost effect would be to forbid a contract for an unreasonable rate, and therefore make the supposed contract unlawful. But the effect of this would be simply to abrogate the contract, and leave the transaction open to such adjustment as the application of the proper laws allowed. That law, as has already been pointed out, cannot be found in the jurisdiction of the states, but only in the body of the laws of the United States.

Those counts of the declaration which proceed directly upon the Interstate Commerce Act cannot be sustained in these suits. The courts of the United States, upon removed cases, have no wider jurisdiction than have the courts of the state from which they were removed. The removal simply transfers the hearing from the state to the national tribunal, but does not enlarge the right of the court to hear the cause. The right to question the reasonableness of an interstate commerce rate is a matter of primary, as well as of exclusive jurisdiction in the Federal courts. It does not reside in the jurisdiction of the state courts, or of the Federal courts, acquired by the fact of diverse citizenship.

For the reasons above stated, the demurrers are sustained, and the several counsel will prepare their orders accordingly.

UNITED STATES CIRCUIT COURT, DISTRICT OF SOUTH CAROLINA.

Ex parte JAMES E. EDGERTON.

No authority to punish the agent of a carrier engaged in interstate commerce, under a state law, for receiving in the course of his employment liquors imported from another state, is given by the

Wilson Law of 1890, which makes liquors subject to the operation of state laws upon their arrival in the state.

(December 11, 1894.)

APPPLICATION for a writ of habeas corpus to procure the discharge of petitioner from the custody of the sheriff of Charleston county, to which he had been committed for 4 INTER S.

the alleged violation of the state law prohibiting the importation of intoxicating liquors. *Petitioner discharged.*

The facts are stated in the opinion.

Messrs. Bryan & Bryan for petitioner.

Mr. W. St. J. Jervey for respondent.

Simonton, D. J., delivered the opinion of the court:

This case comes up on a petition for habeas corpus, the rule thereon, and the return thereto. James E. Edgerton, the petitioner, is the general freight and passenger agent of the Clyde Line of steamships, and its general manager in the port of Charleston. These steamships ply between New York, Charleston, and Jacksonville over the high seas. Their business is that of common carriers engaged in foreign commerce and in commerce between the states.

On the 19th of September, 1893, there were brought to this port in the steamship *Seminole*, and unloaded at the dock of the line, along with other freight of a miscellaneous character, 12 barrels. Each barrel had its mark,—nine of them were lettered; three had on them the name of the consignee in full. On each barrel was a statement of its supposed contents,—two were marked "Soda Water;" five, "Ginger Ale;" one, "Sarsaparilla;" one, "Mineral Water;" one, "B Cider." The manifest showed that all of the barrels were shipped in due course at New York, for delivery at the port of Charleston. On reaching the dock they were discharged with, and as a part of, the ship's cargo. On that day one R. H. Pepper obtained a warrant from a trial justice in Charleston, which, after reciting that complaint had been made before him by said Pepper that "James E. Edgerton, general freight agent of the Clyde Steamship Company, has brought into this state 12 barrels of intoxicating liquors, in violation of sections 2 and 25 of an act approved December 24, 1892," commands the arrest of Edgerton, to be brought before the justice, to be dealt with according to law. The affidavit with the warrant alleges that "Edgerton did unlawfully bring into this state the intoxicating liquors, contrary to the act of assembly in such case made and provided, and that Edgerton is not a licensed dispenser, and is without any permission or license to bring in the same." The petitioner was arrested, carried before the trial justice, released on bail, was afterwards surrendered by his sureties, and is now in custody of the sheriff of Charleston county under this warrant. He prays his discharge, for that his arrest, and the act of assembly upon which it is based, are in contravention of the interstate commerce law, of which he seeks the protection. The return of the sheriff gives as the cause of detention that Edgerton has been under recognizance to answer for a violation of the law of the state, and was surrendered by his sureties. The barrels in question were opened, and were found to contain beer,—an intoxicating liquor.

Looking to the warrant as stating the cause and ground of arrest, and assuming that the act of assembly which it quotes as its authority does in fact forbid the bringing of intoxicating liquors into this state, the question is, can any state forbid the importation of intoxicating

liquors into its territory by a common carrier engaged in interstate and foreign commerce? The authority to regulate commerce with foreign countries and between the states is exclusively in the Congress of the United States. When Congress has not legislated on any part of this subject, such commerce is free. *Bowman v. Chicago & N. W. R. Co.* 1 Inters. Com. Rep. 823, 125 U. S. 465, 31 L. ed. 700; *Mr. Justice Field*, in *Mobile County v. Kimball*, 102 U. S. 696, 26 L. ed. 239, says:

"That power [to regulate commerce] is indeed without limitation. It authorizes Congress to prescribe the conditions upon which commerce in all its forms shall be conducted between our citizens and the citizens or subjects of other countries, and between the citizens of the several states and to adopt measures to promote its growth and insure its safety. * * * Some of them [the subjects of commerce] are national in their character, and admit and require uniformity of regulation,—affecting alike all the states * * * Of the former class may be mentioned all that portion of commerce with foreign countries or between the states which consists in the transportation, purchase, sale, and exchange of commodities. Here, then, can be of necessity only one system or plan of regulations, and that Congress alone can prescribe."

Mr. Justice Lamar, in *Kidd v. Pearson*, 3 Inters. Com. Rep. 285, 128 U. S. 17, 32 L. ed. 849, says:

"The power expressly conferred upon Congress to regulate commerce is absolute and complete in itself, with no limitations other than are prescribed in the Constitution; is to a certain extent exclusively vested in Congress; so far free from state action; is coextensive with the subject on which it acts, and cannot stop at the external boundary of a state, but must enter into the interior of every state whenever required by the interests of commerce with foreign nations or among the several states."

In *Bowman v. Chicago & N. W. R. Co.* 1 Inters. Com. Rep. 823, 125 U. S. 465, 31 L. ed. 700, a statute of Iowa forbidding common carriers to bring intoxicating liquors into the state from any state or territory without being first furnished with a certificate under the seal of the auditor of the county to which it is to be transported or consigned, certifying that the consignee, or the person to whom it is to be transported or delivered, is authorized to sell intoxicating liquors in the county, although adopted without a purpose of affecting interstate commerce, but as a part of a general system designed to protect the health and morals of the people against the evils resulting from the unrestricted manufacture and sale of intoxicating liquors within the state, is neither an inspection law nor a quarantine law, but is essentially a regulation of commerce among the states, affecting interstate commerce in an essential and vital part, and, not being sanc-

tioned by the authority, express or implied of Congress, is repugnant to the Constitution of the United States.

In *Leisy v. Hardin*, 3 Inters. Com. Rep. 86, 185 U. S. 100, 34 L. ed. 128, the Supreme Court of the United States, speaking through the chief justice, distinctly recognize intoxicating liquor as an article of commerce:

"They are subjects of exchange, barter, and traffic, like any other commodity in which a right of traffic exists, and are so recognized by the usages of the commercial world, the laws of Congress, and the decisions of the courts."

The precise question we are discussing was decided in that case. It was held that, in the absence of legislation on the part of Congress, no state can prohibit the importation of intoxicating liquors from abroad or from a sister state; and, further, that the police power of the state over the imported article does not commence the instant when the article enters the country, but only when it has become incorporated in and mixed up with the mass of property in the country. The effect of this decision was to protect an imported article while in the original package, and, inasmuch as the right to sell followed the right to import, the original package could be sold unbroken, notwithstanding that the law of the state into which it was imported absolutely forbade the manufacture or sale of intoxicating liquors. To meet this last conclusion, Congress passed the Act of 1890 commonly known as the "Wilson Act." Its title is "An Act to Limit the Effect of the Regulations of Commerce between the Several States and Foreign Countries in Certain Cases." Its provisions are:

"That all fermented, distilled, or other intoxicating liquors or liquids transported into any state or territory, or remaining therein for use, consumption, sale or storage therein, shall, upon arrival in such state or territory be subject to the operation and effect of the laws of such state or territory enacted in the exercise of its police powers to the same extent and in the manner as though such liquids or liquors had been produced in such state or territory, and shall not be exempt therefrom by reason of being introduced therein in original packages or otherwise." 26 Stat. at L. 818.

It will be noticed that this Act does not in any way forbid the importation of intoxicating liquors; indeed it deals with such liquors after having been transported into any state.

In this connection it is well to compare the provisions of the Act of Congress extending the police power of the states over nitroglycerine:

"The two preceding sections shall not be so construed as to prevent any state, territory, district, city or town within the United States from regulating or prohibiting the traffic in or transportation of those substances between persons and places lying or being within their respective territorial limits or from prohibiting the introduction thereof into such limits for sale, use or consumption therein." Rev. Stat. § 4280.

It will also be noted that the Act proceeds at once to remedy the mischief it was intended to meet. The regulations of commerce protected the original package. Under this protection, the laws of the state against intoxicating liquors were evaded, and the laws forbidding the manufacture made nugatory. Congress placed the original package under the state police power. It cautiously went no further. But we are not left to general reasoning. The construction of this Act of Congress came up in *Wilkerson v. Rahrer* ("Re Rahrer") 140 U. S. 564, 35 L. ed. 577. Of it, the chief justice, delivering the opinion of the court, says:

"Congress did not use terms of permission to the state to act, but simply removed an impediment to the enforcement of the state laws in respect to imported packages in their original condition, created by the absence of a specific utterance on its part. It imparted no power to the state not then possessed, but allowed imported property to fall at once upon arrival within the local jurisdiction."

The decisions of the supreme court distinctly declare that before the passage of the Wilson Act no state could forbid the importation of intoxicating liquors. This last case declares that the Wilson Act gave no new power to the states. All that it did was to remove a protection from the imported package, and place it under state jurisdiction. The liquors in this case without doubt come within the police powers of the state as soon as they become part of the property of the state. The commission of any act done in and about them, under such circumstances, can lawfully be punished. It is no offense on the part of this general agent of the Clyde Line that the liquors were imported as stated.

Let the prisoner be discharged.

UNITED STATES SUPREME COURT.

THE POSTAL TELEGRAPH CABLE COMPANY, *Appt.*,

v.
THE CITY COUNCIL OF CHARLESTON ET AL.

(See S. C. 153 U. S. 692, 38 L. ed. 871.)

1. An ordinance of a city imposing a license fee upon every telegraph company, or agency, doing

business in the city, for business done exclusively in the city, not including business done to and

NOTE.—As to right of telegraph and telephone companies to use public streets and erect poles therein; compensation; injunction poles for street car propulsion; placing electric wires under surface of streets, see note to *St. Louis v. Western U. Telegr. Co.* 37: 610. Mem. References in this note are to U. S. Repts. L. ed.

4 INTER 8.

As to power of Congress to control commerce; state statute when invalid as being a regulation of commerce; drummers; vessels; railways; telegraph companies; state tax on commerce, when invalid, see note to *Harmon v. Chicago*, 37: 216.

from points without the state or business done for the government, its officers or agents, is not void as an interference with interstate commerce.

2. Messages of a telegraph company sent and delivered entirely within the state are subject to its taxing power.

[No. 1009.]

Submitted Jan. 22, 1894. Decided May 14, 1894.

APPEAL from a decree of the Circuit Court of the United States for the District of South Carolina, dismissing a suit in equity brought by the Postal Telegraph Cable Company, plaintiff, against the City of Charleston *et al.*, to restrain the collection of a license imposed upon said company by an ordinance of said city, and dissolving a temporary injunction. *Affirmed.*

The facts are stated in the opinion.

Messrs. R. S. Guernsey and T. M. Mordecai, for appellant:

The ordinance which imposes this tax of \$500 is void because it is specific taxation of property or the use of it.

Harmon v. Chicago, 147 U. S. 396 (87: 216).

The license required by the ordinance is a tax upon the telegraph company for the privilege of exercising its franchise within the city of Charleston and is not a mere exercise of the police power granted to the city by the state.

San Francisco v. Liverpool & L. & G. Ins. Co. 74 Cal. 113; *Pembina Consol. S. Min. & M. Co. v. Pennsylvania*, 125 U. S. 181 (81: 650), 2 Inters. Com. Rep. 24; *Pensacola Teleg. Co. v. Western U. Teleg. Co.* 96 U. S. 12 (24: 711); *Cooley, Taxn.* 886; *Cooley, Const. Lim.* 245.

The Postal Telegraph Cable Company having constructed its lines along the post roads in the city of Charleston, no state or municipal authority can exact a license for the privilege of conducting its business and restraining the powers conferred upon it under its franchises and under the acts of Congress.

Western U. Teleg. Co. v. Pendleton, 123 U. S. 358 (80: 1189), 1 Inters. Com. Rep. 306; *Western U. Teleg. Co. v. Atty. Gen.* 125 U. S. 580 (81: 790).

The Postal Telegraph Cable Company does no business which can properly be included under the provisions of this ordinance, for the reason that it does no business exclusively within the city of Charleston.

The ordinance in question is an interference with interstate commerce and is *ultra vires* and void.

Pensacola Teleg. Co. v. Western U. Teleg. Co. 96 U. S. 1 (24: 708); *Western U. Teleg. Co. v. Texas*, 105 U. S. 460 (26: 1067); *Pickard v. Pullman Southern Car Co.* 117 U. S. 34 (29: 785).

The decision of the United States Supreme Court, in the case of *Leloup v. Mobile*, 127 U. S. 640 (32: 311) 2 Inters. Com. Rep. 134, and cases there cited should be followed in the case at bar.

Ward v. Maryland, 79 U. S. 12 Wall. 427 (30: 451).

A burden imposed upon interstate commerce is not to be sustained simply because the statute imposing it applies alike to the people of all the states, including the people of the state enacting it.

Minnesota v. Barber, 136 U. S. 818 (84: 455), 4 INTER S.

8 Inters. Com. Rep. 185; *Robbins v. Shelby County Taxing Dist.* 120 U. S. 489 (30: 694), 1 Inters. Com. Rep. 45; *Norfolk & W. R. Co. v. Pennsylvania*, 136 U. S. 114 (34: 394), 3 Inters. Com. Rep. 178; *Minot v. Philadelphia, W. & B. R. Co.* 2 Abb. (U. S.) 323; *State v. Railroad Corp.* 4 S. C. 376.

An injunction is the proper remedy to prevent the collection of the illegal license tax and penalty in this case.

Ratterman v. Western U. Teleg. Co. 127 U. S. 411 (32: 229), 2 Inters. Com. Rep. 59; *Allen v. Baltimore & O. R. Co.* 114 U. S. 311 (29: 200).

Mr. Charles Inglesby, for appellees:

So far as the legality under the constitution of South Carolina, of the license tax is concerned, the question is *res adjudicata*.

State v. Hayne, 4 S. C. 418; *Information v. Jager*, 29 S. C. 438.

The ordinance expressly excluded all interstate commerce business, all government business, and is absolutely confined to the business done within the city of Charleston.

No constitutional implication prohibits a state tax upon the property of an agent of the government merely because it is the property of such an agent.

Union Pac. R. Co. v. Peniston, 85 U. S. 18 Wall. 5 (21: 787); *Western U. Teleg. Co. v. Texas*, 105 U. S. 460 (26: 1067); *Ratterman v. Western U. Teleg. Co.* 127 U. S. 411 (32: 229); *Ficklen v. Shelby County Taxing Dist.* 145 U. S. 6 (36: 602); *Maine v. Grand Trunk R. Co.* 142 U. S. 217 (35: 994); *Home Ins. Co. v. Augusta*, 93 U. S. 122 (23: 826); *Wiggins Ferry Co. v. East St. Louis*, 107 U. S. 876 (27: 423).

Mr. Justice Shiras delivered the opinion of the court:

On the first day of July, 1892, the Postal Telegraph Cable Company, a corporation of the state of New York, filed in the Circuit Court of the United States for the District of South Carolina a bill of complaint against the city of Charleston, a municipal corporation of the state of South Carolina, and William L. Campbell and Glenn E. Davis, citizens of the state of South Carolina, and respectively sheriff and treasurer of said city, seeking to restrain the collection of a license imposed upon the said Postal Telegraph Cable Company by an ordinance of the city council of Charleston. A preliminary injunction was granted enjoining the defendants from proceeding to collect said license until the hearing of the cause on its merits. Answers were filed by the city and by the city treasurer and city sheriff, and issue was joined by replications. The complainant put in evidence tending to sustain the allegations of the bill.

The facts, as disclosed by the bill, answers, and evidence, were substantially these:

The Postal Telegraph Cable Company, a corporation of the state of New York, has an

office in the city of Charleston; is engaged in sending and receiving messages by wire to and from points inside and outside of the state of South Carolina; and has its lines over the post roads, highways, and railroads in the city of Charleston, and in several of the states. The company has accepted the provisions of the Act of Congress approved July 28, 1866, whereby it has put its lines at the service of the United States for postal, military, and other purposes, and given precedence to its business. The company has offices in other cities and towns in South Carolina, several of which have adopted ordinances exacting licenses from the company. During the year commencing January 1, 1892, and for several years prior to that time, the company has been engaged in the business of receiving and sending telegrams for private persons and for the public between the city of Charleston and other places within the state of South Carolina, and also in sending telegraphic communications between the governmental departments of the United States, and was and is engaged in the telegraph business for the purpose of interstate commerce. By an Act approved December 17, 1881, the general assembly of the state of South Carolina authorized the city council of Charleston to impose a license tax, not exceeding five hundred dollars, on all persons engaged in any business, trade or profession in the city of Charleston. By an ordinance, entitled, "An ordinance to regulate licenses for the year 1892," the city council enacted that every person, firm, company, or corporation engaged in any trade, business, or profession within the city of Charleston should obtain, on or before the 20th day of January, 1892, a license therefor. The provision relating to telegraph companies is as follows: "Telegraph companies or agencies, each for business done exclusively within the city of Charleston, and not including any business done to or from points without the state, and not including any business done for the government of the United States, its officers or agents, \$500." A penalty, for failure to take out the license, of fifty per cent of the amount of the tax was provided for, and a continuing penalty of fifty per cent for each day's business done without taking out such license. The Postal Telegraph Cable Company, after notification, declined and failed to take out and pay for such license, and, on May 28, 1892, in pursuance of the terms of the ordinance, the license tax of \$500, with penalty of fifty per cent was assessed against the company and put in the hands of the city treasurer for collection, who issued execution therefor, addressed to the city sheriff, requiring him to proceed to collect said license tax and penalty by distress and sale.

At the final hearing, on June 21, 1893, the temporary injunction was dissolved, and the bill dismissed with costs. From this decree the present appeal was taken.

We do not deem it necessary to discuss the contention that the ordinance imposing the license tax in question is invalid by reason of its disregard of provisions of the constitution of South Carolina. The supreme court of that state has, in several cases, judicially settled that the power to raise revenue by a license tax on business, given by statute to the city

council of Charleston, does not violate any provision of the state constitution. *State v. Hayne*, 4 S. C. 418; *Information v. Jager*, 29 S. C. 443.

It is claimed that the license required by the ordinance is a tax upon the telegraph company for the privilege of exercising its franchise within the city of Charleston, and not an exercise of the police power granted to the city by the state; that the Postal Telegraph Cable Company, having constructed its lines along post roads in the city of Charleston and elsewhere, no state or municipal authority can exact a license for the privilege of conducting its business, thus restraining the powers possessed by it under its franchises and under the acts of Congress; and that the ordinance in question is an interference with interstate commerce and therefore void.

The questions thus suggested have been so frequently and so recently considered and decided by this court, in well known cases, that our duty will be sufficiently performed by briefly citing and applying those cases.

That this license is not a condition upon which the right to do business depends, but is a tax, is shown by the case of *Home Ins. Co. v. Augusta*, 93 U. S. 122 [23: 826]. There the city council of the city of Augusta passed an ordinance which imposed a license tax of \$250 "on each and every fire, marine, or accidental insurance company located, having an office, or doing business within the city of Augusta." The Home Insurance Company, a corporation of the state of New York, and having an agency in the city of Augusta, refused to recognize the obligation of the ordinance, and filed a bill in the superior court of Richmond county in the state of Georgia, to enjoin the city council from collecting the license tax. That court, having refused the injunction prayed for, and having dismissed the bill, the case went to the supreme court of Georgia, which affirmed the decree of the superior court, and the case was then brought to this court.

It was argued on behalf of the insurance company that, as it had complied with the provisions of the laws of Georgia which authorized foreign insurance companies to do business in that state, it was not competent for a municipal corporation of the state to impose an additional condition on the right of the company to do business. But it was held, citing *License Tax Cases*, 72 U. S. 5 Wall. 462 [18:495], that the license in question must be regarded as nothing more than a tax; that the penalty provided was a mode of enforcing its payment; and that the license, when issued, was only a receipt for the tax, and not a grant of an authority to conduct business on condition of paying the license.

In *Wiggins Ferry Co. v. East St. Louis*, 107 U. S. 376 [27: 428], where a ferry company, authorized by an act of assembly of the state of Illinois to carry on its business and paying state taxes prescribed in its charter, was called upon by a city ordinance to pay a license tax, it was held by this court that the exaction of a license fee is an ordinary exercise of police power by municipal corporations; that the power of the state to authorize any city within its limits to enforce a license tax on trades or callings generally, especially those which are

quasi public, cannot be disputed; and that whether a license fee is exacted under the power to regulate or the power to tax, is a matter of indifference if the power to do either exists.

It was held, in *Western U. Tele. Co. v. Massachusetts*, 125 U. S. 580 [81: 790], that a tax imposed by the laws of Massachusetts upon the Western Union Telegraph Company, a corporation of the state of New York, on account of the property owned and used by it within Massachusetts, was valid.

But it is contended that, while a state can prohibit a foreign corporation from doing business within its territory, or can impose conditions upon the exercise of its franchises, such power does not exist when such corporations are engaged in interstate commerce or are agents of the United States government, and reliance is placed on the case *Leloup v. Mobile*, 127 U. S. 640 [82: 811], 2 Inters. Com. Rep. 184. There it was held that where a telegraph company is doing the business of transmitting messages between different states, and has accepted and is acting under the telegraph law passed by Congress July 24, 1866, no state within which it sees fit to establish an office can impose upon it a license tax, or require it to take out a license for the transaction of such business; that telegraphic communications are commerce, as well as in the nature of postal service, and if carried on between different states they are interstate commerce, and within the power of regulation conferred upon Congress, free from the control of state regulations, except such as are strictly of a police character; and that any state regulations by way of tax on the occupation, or business, or requiring a license to transact such business, are unconstitutional and void. Accordingly, a judgment of the supreme court of Alabama, which sustained the validity of an ordinance of a municipal corporation of that state imposing a license tax upon the Western Union Telegraph Company, engaged in the business of transmitting telegrams from and to points within the state of Alabama and between private individuals of the state of Alabama, as well as between citizens of said state and citizens of other states, was reversed. But it was said, in the course of the discussion in that case, that "it is urged that a portion of the telegraph company's business is internal to the state of Alabama, and therefore taxable by the state. But that fact does not remove the difficulty. This tax affects the whole business without discrimination. There are sufficient modes in which the internal business, if not already taxed in some other way, may be subjected to taxation, without the imposition of a tax which covers the entire operations of the company."

In *Western U. Tele. Co. v. Texas*, 105 U. S. 460 [26: 1067], in error to the supreme court of Texas, it was held that, in respect to its foreign and interstate business, a telegraph company is, as an instrument of commerce, subject to the regulating power of Congress, and, if it accepts the provisions of Act of July 24, 1866 (Rev. Stat. §§ 5263, 5268) it becomes an agent of the United States, so far as the business of the government is concerned; and that the state laws, so far as they impose upon such company a specific tax on each message which it transmits beyond the state, or which an of-

ficer of the United States sends over its lines on public business, are unconstitutional; but it was said that "any tax which the state may put on messages by private parties, and not by agents of the United States, from one place to another exclusively within its own jurisdiction, will not be repugnant to the Constitution of the United States."

The case, in *Ratterman v. Western U. Tele. Co.*, 127 U. S. 411 [82: 239], 2 Inters. Com. Rep. 59, was one where the telegraph company, a corporation of the state of New York, filed a bill in the Circuit Court of the United States for the Southern District of Ohio, against Ratterman, treasurer of Hamilton county, Ohio, seeking to restrain the collection of a tax on the gross receipts of the company, which were principally, but not wholly, derived from business between points within and points without the state of Ohio. The complainant, in its bill, expressed its willingness to pay and offered to pay taxes chargeable against its property and business within the state, but alleged that the defendant refused to accept such partial payment, and demanded payment for the total assessment on all the gross receipts. The district and circuit judges certified a division of opinion to this court, as to whether a single tax upon the receipts of a telegraph company, which receipts were derived partly from interstate commerce and partly from commerce within the state, but which were returned and assessed in gross and without separation or apportionment, was wholly invalid, or invalid only in proportion and to the extent that said receipts were derived from interstate commerce. Mr. Justice Miller delivered the unanimous opinion of this court. The case of *Philadelphia & R. R. Co. v. Pennsylvania* ("The State Freight Tax") 82 U. S. 15 Wall. 282 [21: 146], was cited as ruling that where the subjects of taxation can be separated so that that which arises from interstate commerce can be distinguished from that which arises from commerce wholly within the state, the court will act upon this distinction, and will restrain the tax on interstate commerce while permitting the state to collect that arising upon commerce wholly within its own territory. Accordingly the decree of the court below, following the opinion of the circuit judge, enjoining the collection of the taxes on that portion of the receipts derived from interstate commerce, and permitting the treasurer to collect the other tax upon property of the company and upon receipts derived from commerce entirely within the limits of the state, was affirmed.

The question arose and was determined in the same way, in the case of *Western U. Tele. Co. v. Seay*, 132 U. S. 472 [33: 409], 2 Inters. Com. Rep. 726. It there appeared that a statute of Alabama imposed a tax "on the gross amount of the receipts by any and every telegraph company derived from the business done by it in this state." The Western Union Telegraph Company reported to the board of assessors only its gross receipts received from business wholly transacted within the state. The board required of the company a further return of its gross receipts from messages carried partly within and partly without the state. The company made such further return, and the tax was imposed

on the gross receipts as shown by the two returns. This mode of assessment was sustained by the supreme court of Alabama, but this court held that the statute of Alabama, thus construed, was a regulation of commerce, and that the tax imposed upon the messages comprised in the second return was unconstitutional. In the discussion of the case, *Mr. Justice Miller* expressed himself as follows: "The principle of our cases is, in respect to telegraph companies which have accepted the provisions of the Act of Congress of July 24, 1866 (Rev. Stat. §§ 5263-5268) that they shall not be taxed by the authorities of a state for any messages, or receipts arising from messages, from points within the state to points without, or from points without to points within the state, but that such taxes may be levied upon all messages carried and delivered exclusively within the state. The foundation of this principle is that messages of the former class are elements of commerce between the states and not subject to legislative control of the states, while the latter class are elements of internal commerce solely within the limits and jurisdiction of the state, and, therefore, subject to its taxing power." See, likewise, *Pacific Exp. Co. v. Seibert*, 142 U. S. 339 [35: 1035], 3 Inters. Com. Rep. 810.

The reasoning of these cases needs no reinforcement, and their conclusions are readily applied to the case in hand.

The express terms of the ordinance restrict the tax to "business done exclusively within the city of Charleston, and not including any business done to or from points without the state, and not including any business done for the government of the United States, its officers or agents."

It is claimed that the Postal Telegraph Cable Company is not within the terms of this ordinance, because it does not do any business

exclusively within the city of Charleston; that its city offices are merely initial points for sending and receiving messages, and that, irrespective of the messages sent or received outside of the state, the intrastate messages are not between points within the city; and that, if license exactions were allowed to and made by the various cities in the state, great injury and wrong would be done to the telegraph company.

But this is a hardship, if such exists, that is not within our province to redress. If business done wholly within a state is within the taxing power of the state, the courts of the United States cannot review or correct the action of the state in the exercise of that power.

It is further contended that the ruling of the cited cases does not cover the case of a telegraph company which has constructed its lines along the post roads in the city of Charleston, and elsewhere, and which is exercising its functions under the Act of Congress as an agency of the government of the United States. It is obvious that the advantages or privileges that are conferred upon the company by the Act of July 24, 1866 (Rev. Stat. §§ 5263-5268) are in the line of authority to construct and maintain its lines as a means or instrument of interstate commerce, and are not necessarily inconsistent with a right on the part of the state in which business is done and property acquired to tax the same, within the limitations pointed out in the cases heretofore cited.

It was upon the doctrine of these cases that the court below acted in refusing the injunction and dismissing the bill, and its decree is therefore affirmed.

Harlan, J., Brown, J., Jackson, J., dissented.

THE NORTHERN PACIFIC RAILROAD COMPANY, *Appt.*,

v.

A. G. CLARK, County Auditor of Kidder County, North Dakota, ET AL.

(See S. C. 153 U. S. 252, 38 L. ed. 706.)

1. No one can have an injunction against the collection of a tax until he has paid so much of the tax assessed against him as it can be plainly seen he ought to pay.
2. The suit in equity by the Northern Pacific Railroad Company to enjoin the collection of the taxes imposed upon its property in certain

counties of North Dakota is without equity, because of the failure to aver that the company had tendered or paid the gross earnings tax for the year 1889 (or the tax assessed by the county auditors) and it is not entitled to the equitable relief prayed without first tendering or paying such taxes.

[No. 1045.]

Argued April 12, 1894. Decided April 30, 1894.

ON A CERTIFICATE from the United States Circuit Court of Appeals for the Eighth Circuit, of propositions of law upon which that court desired the instructions of this

court, in a suit in equity brought by the Northern Pacific Railroad Company, plaintiff, against A. G. Clark, auditor of the county of Kidder, North Dakota *et al.*, to enjoin the

collection of certain taxes upon the lands of the company in Kidder county, Stutsman county, Richland county, and McLean county, in that state, etc. *Eighth question certified in the affirmative.*

Seesame case in circuit court, 47 Fed. Rep. 681.

The facts are stated in the opinion.

Mr. Fred M. Dudley, for appellant:

This suit is not without equity because of the failure to aver that the complainant has tendered or paid the "gross earnings tax" for the year 1889, and said complainant is entitled to the equitable relief prayed without first tendering or paying such tax.

In states where a court of equity exercises a jurisdiction to set aside, or to restrain the collection of illegal assessments or taxes, the relief will not be granted unless the plaintiff pays such portion of the tax or assessment as is lawful and justly due.

Pom. Eq. Jur. § 398; *Morrison v. Hershire*, 32 Iowa, 271.

The rule is confined in its application, by the courts, to cases where the tax is excessive, or is partly legal and partly illegal.

Cooley, Taxn. (2d ed.) 768, and note; *Taylor v. Secor* ("State R. Tax Cases") 92 U. S. 575 (23: 668).

"Gross earnings percentage" cannot be made a condition precedent to the granting of an injunction under this rule, unless the "gross earnings percentage" be a tax on these lands. That it is not, is self-evident.

The exemption from assessment and levy of taxes in the ordinary manner, made by the "gross earnings law," did not depend upon the payment of the three per centum of the gross earnings in the first instance, but upon the filing with the secretary of the territory of a resolution adopted by the railroad company and attested by its secretary, accepting the provisions of the act and subjecting the corporation to its terms.

As the "gross earnings law" required the payment of a certain percentage upon the gross earnings of each year, the earnings of that year must be completed before any payment can be made; thus for the year 1889, no payment could be made prior to 1890, when by the terms of the act the percentage was to be paid in two parts, one half on or before February 15, and one half on or before August 1; nevertheless the exemption was complete for the year 1889.

The "gross earnings act" having provided an exclusive remedy for failure to pay the percentage by a distraint by the territorial treasurer, the railroad company is entitled to an order restraining the counties from seeking to collect another and unauthorized tax. Further, the failure to pay the gross earnings percentage is a question between the territorial officials and the railroad company; with it the county officials have nothing to do.

Since the failure to pay the "gross earnings" per centum would not give the counties the right to tax these lands as other lands are taxed, it is not essential to negative such failure in the bill of complaint; and no inference can be drawn from the absence of an averment, that no such payment has been made; and that portion of the opinion of the circuit court, holding that there is no equity in com-

plainant's bill, is founded upon an assumed fact that is not in the record.

There was, and is, no "gross earnings" percentage due, and there is no one authorized to receive such money.

Before any payment became due under the act for 1889, it was repealed by the adoption of the constitution as repugnant to it.

Where a statute requires a certain tax to be collected and the act prescribing the method of such collection is repealed before the collection is made, or the tax due, and there is no saving clause, the right to make such collection is gone, and all proceedings for the collection of the tax, after such repeal, are void.

McQuilkin v. Doe, 8 Blackf. 581, 583; *Marion Twp. Gravel Road Co. v. Sleeth*, 53 Ind. 35, 41; *Tivey v. People*, 8 Mich. 128, 130, 131; *Hunt v. Jennings*, 5 Blackf. 195, 38 Am. Dec. 465; *Abbott v. Britton*, 23 La. Ann. 511; *French v. State*, 53 Miss. 651; *Musgrove v. Vicksburg & N. R. Co.* 50 Miss. 677.

Prior to the time it became due in February, or certainly prior to January 1, when the gross earnings upon which the tax was to be computed, were completed, there was no amount due whatever. The territory had no vested right in any sum; its claim at best amounted to no more than an inchoate right. With the repeal of the act without a saving clause, all possibility of this inchoate claim ripening into a perfect right was extinguished. There never was, therefore, any amount due the territory or state under the "gross earnings law" as the percentage upon the earnings for 1889; and the company is not, and never has been, under any obligations, legal or equitable, to pay or tender such sum.

Backwell, Tax Titles, §§ 1047, 1049; Cooley, Taxn. (2d ed.) 18; *Bleidorn v. Abel*, 6 Iowa, 5; *Van Inwagen v. Chicago*, 61 Ill. 31; *Com. v. Standard Oil Co.* 101 Pa. 119; *St. Joseph County Comrs. v. Ruckman*, 57 Ind. 96; *Ben-net v. Hargus*, 1 Neb. 419; *Butler v. Palmer*, 1 Hill, 324.

A valuable consideration for the exemption from taxation was, in fact, given by the railroad company and accepted and retained by the state.

Northern Pac. R. Co. v. Carland, 5 Mont. 146.

Under the provisions of the Act of Congress approved July 15, 1870 (16 Stat. at L. 291) the lands granted to the Northern Pacific Railroad Company could not be taxed until the company had paid "into the treasury of the United States the cost of surveying, selecting and conveying" the lands granted to the company. The railroad company did not, prior to 1887, pay such fees upon lands owned by it, and hence its lands were not taxable.

Northern Pac. R. Co. v. Rockne ("Northern Pac. R. Co. v. Traill County") 115 U. S. 600 (29: 505).

There was, therefore, subject to taxation within the territory, but a small amount of personal property of the company.

The railroad company insisted that it was beyond the power of the territory to lay a tax upon the interstate earnings, as such a tax would be a tax upon interstate commerce; and that the gross earnings upon which the percentage was to be computed must be restricted

to territorial earnings. In August, 1887, acting upon this construction, it refused to make the second payment for 1886, claiming that the first payment was more than was due for the entire year, computing the amount to be paid upon the territorial earnings alone, and that such payment satisfied the entire amount due for the year.

The railroad company brought suit to enjoin the sale of its property, basing its action upon the grounds stated. The case having been carried to the territorial supreme court, the company's position was there sustained in a decision rendered October 18, 1888.

Northern Pac. R. Co. v. Raymond, 2 Inters. Com. Rep. 321, 1 L. R. A. 732, 5 Dak. 356.

The act of March 7, 1889, required the payment of all sums and interest due under the act of 1883, as a condition precedent to the acceptance of the contract. It further required any company which had not paid such percentages or made a return of its earnings on both territorial and interstate traffic under the act of 1883, to make such return within thirty days from the date of the act, "and pay one half of the entire amount due under the agreement and acceptance herein referred to, for the current year, and also the entire amount of taxes heretofore claimed by the territory on local and interstate earnings of such companies but remaining unpaid at the time of filing said account and within thirty days after the passage of this act, or the same shall not apply to such company or companies. The balance of such taxes due for the current year shall be paid to the territorial treasurer on or before the 15th day of August, 1889.

The Northern Pacific Railroad Company accepted this act; and, as a condition precedent, made a return to the territorial treasurer of its earnings on interstate as well as territorial traffic for the years in which it had not made such return under the act of 1883, and paid the percentage thereon April 4, 1889.

In addition thereto, the company obligated itself to pay in August, 1889, the last half of the gross earnings percentage for 1888 computed on both territorial and interstate traffic.

If the supreme court of the territory construed the act of 1888 correctly in *Northern Pac. R. Co. v. Raymond*, 2 Inters. Com. Rep. 321, 1 L. R. A. 732, 5 Dak. 356, and *Northern Pac. R. Co. v. Barnes*, 2 N. D. 810, and this court cannot question that construction, so far as it determines the meaning of the territorial act. *Stuteman County v. Wallace*, 142 U. S. 293, 306 (35: 1018, 1022).

This immense sum of over \$175,000 must be considered as a cash consideration for the exemptions contained in the act of 1889. Certainly the counties cannot justly complain of a lack of equity while they retain this sum, amounting to double the entire tax assessed upon the lands.

The railroad company has paid, under this law, into the territorial treasury, a sum far greater than the taxes upon the lands for the same year could have amounted to. And in all of these views that payment is an incontrovertible answer either to discrimination or lack of equity. In either of the views considered, the attempt by the counties to tax these lands after the state has collected more than the amount of the tax in consideration of exemption, occupies

4 INTER 8.

the same moral plane as the exercise of the blackmailer's art.

Messrs. E. W. Camp and W. H. Standish, for appellees:

The appellant's counsel, while admitting that the amount to be paid as a condition precedent to invoking the aid of a court of equity is the amount conceded to be due, and while conceding that the appellant had obligated itself to pay an amount equal to 8 per centum of its gross earnings for and during the year 1889 as consideration for exemption from taxation upon its other property for that year, nevertheless seeks to excuse the appellant for its neglect to fulfill this obligation.

As to the first excuse offered, while the tax imposed was not a tax directly upon the lands, it was a tax imposed in lieu of all other taxes, including taxes with which the lands would otherwise be chargeable. This is the only ground upon which the appellant claims exemption from such taxes under this act. For the purpose of this discussion, we must, of course, admit the validity of this act and that the exemption it offered could have been made effective for the year 1889. This being the case, payment of the tax imposed by the act would have discharged all claims for taxes upon the lands for that year. Unless, then, those claims had been already discharged by mere acceptance of the act, they remain still undischarged, so long as payment of the tax imposed by the act is deferred, and the amount of that tax must be deemed to be the amount "conceded to be due" and which should be paid as a condition precedent to invoking the aid of a court of equity. But it is urged that those claims had been already discharged by mere acceptance of the act, which necessitates notice of the second excuse offered, viz: that the acceptance of the act, and not payment thereunder, created the exemption as to the lands.

We cannot so read the act. In the first section, after providing for payment of the per centum, it is expressly provided as follows:

"And the payment of such amount annually as aforesaid, shall be and is in full of any and all other taxation and assessment whatever upon the property aforesaid."

This is the very provision under which the appellant claims exemption, and yet it expressly makes that exemption dependent upon payment. But, as if to make assurance doubly sure, the proviso in section 7 expressly declares that—

"Any company failing to promptly and strictly comply with the provisions herein set forth and to pay all sums herein provided to be paid, shall be subject to assessment and taxation in the same manner as individuals."

Could language be plainer?

The third excuse offered is that the act itself was repealed prior to the time when the first installment became due, and there was no one authorized to receive the money; and that, consequently, there is no "gross earnings" percentage due.

It is impossible to construe this statement in any other light than as an avowed unwillingness on part of appellant to pay the amount which it concedes to be due as consideration for the exemption claimed. If the obligation

was complete at time of acceptance (which is not disputed) the continuance of that obligation could not be made to depend upon the continuance in effect of the act under which it arose. The repeal of that act might, or might not, have weakened the remedy for enforcement; but in either event the obligation itself continued the same.

No attempt to discharge the obligation contracted for the year 1889 has been shown. It would seem as though the least that the appellant could have done, had it desired to do equity, would have been to aver its willingness to discharge that obligation, on the contrary, its unwillingness to do so is manifest.

Mr. Justice Jackson delivered the opinion of the court:

This case, under the style of the *North-ern Pac. R. Co. v. Walker*, 148 U. S. 391 [37: 494], was before this court at October term, 1892, and the jurisdiction of the circuit court not appearing upon the face of the record, it was remanded with leave to amend. The appellant accordingly, on June 6, 1893, filed in the Circuit Court of the United States for the District of North Dakota its amended bill of complaint, in which, after setting forth its creation and organization under and by virtue of an Act of Congress approved July 2, 1864, entitled "An Act Granting Lands to Aid in the Construction of a Railroad and Telegraph Line from Lake Superior to Puget's Sound on the Pacific Coast by the Northern Route," and certain acts and joint resolutions of Congress supplementary thereto and amendatory thereof, it was alleged that for the purposes of laying out, locating, constructing, furnishing, and maintaining a railroad and the telegraph line between the points indicated there was granted to it by Congress every alternate section of public land, not mineral, designated by odd numbers, to the amount of twenty alternate sections per mile on each side of the railroad line as the company might adopt, through the territories of the United States, and ten alternate sections of land per mile on each side of the railroad line whenever it passed through any state, to which the United States had full title, not reserved, sold, granted, or otherwise appropriated, free from pre-emption or all other claims at the time the line of the railroad should be definitely fixed, and the plat thereof be filed with the Commissioner of the General Land Office; that the railroad company duly accepted the terms, conditions, and impositions of said Act of Congress, and that on the respective dates of May 28, 1873, and July 20, 1880, it definitely fixed the line of its railroad through certain counties in the territory of Dakota (now the state of North Dakota) and filed plats thereof in the office of the Commissioner of the General Land Office; that the line of railroad so fixed extends opposite to and past the lands set forth and described in the schedules made a part of the bill; that prior to December 20, 1880, it had completed that portion of the railroad and telegraph line extending on, over, and along the line of definite location of the railroad, and that the President of the United States, from time to time, after the same had been examined by commissioners, had accepted the railroad and telegraph line as

having been constructed and completed in all respects as required by the Act of July 2, 1864, and the acts and joint resolutions supplementary and amendatory thereof.

The bill further alleged that the lands on each side of the railroad, and every portion thereof, were within forty miles of the company's line of road so definitely fixed; that they were public lands to which the United States had full title, not reserved, sold, granted, or otherwise appropriated, and no entry or application to make entry for the lands was made or was pending when the lists of definite location were filed in the office of the Commissioners of the General Land Office on May 26, 1873, and July 20, 1880; that the described lands had been surveyed by United States surveyors, and had been reported to be agricultural in their character and non-mineral; and that the lands were not on July 2, 1864, or May 26, 1873, and July 20, 1880, known as mineral lands, etc.; that the company had prior to the year 1889, in accordance with the direction of the Secretary of the Interior, duly prepared and filed lists in the United States land offices in the land districts in which the lands were situated respectively, describing the lands and claiming them as a portion enuring to it under and by virtue of the Act of Congress approved July 2, 1864, which lists were duly allowed and approved by the United States district land officers, to whom the fees prescribed by law were paid by the company, and which were retained by the United States; that the lists of lands so filed were duly transmitted by the district land officers to the Commissioner of the General Land Office for his approval; that since the lists were filed and transmitted to the Commissioner of the General Land Office, the Commissioner, under the direction of the Secretary of the Interior, had required the company to file in the office of the Commissioner, or in the office of the land office districts in which the lands were respectively situated, an affidavit made by some person acquainted with the character of the lands, setting forth and showing that the same were non-mineral, and that until such affidavits had been filed the Commissioner refused to approve the lists; that the company had not, nor had any one in its behalf, filed affidavits of persons having knowledge of the mineral or non-mineral character of the lands set out in the lists.

The bill then proceeds to state that none of the lands described had ever been certified or patented to the railroad company, and that neither the United States, nor any of its officers or agents, had ever ascertained and determined what specific lands in the state of North Dakota passed to the railroad company by virtue of the Act of July 2, 1864, although the railroad company had repeatedly petitioned to have this done; that the United States and its officers had refused to certify to the company the lands described in the schedules of the bill, but held the lists suspended and unapproved upon the claim that the lands may be mineral in character, and as such excepted from the grant to the company, or that the lands may not have been free from claims or rights reserved in the grant, or that the question as to whether title to the lands had passed to the railroad company under and by virtue of the

granting Act, and acts amendatory thereof; that said matters were still in controversy, and pending before the Commissioner of the General Land Office and the Secretary of the Interior.

It is further alleged that the railroad company had no other right, title, claim, interest, property, or possession in or to any of the lands or premises described in the bill except such right, title, claim, interest, property, or possession as it may have obtained under and by virtue of the acts and resolutions of Congress, and its compliance with the conditions thereof.

It is then averred that on March 7, 1889, the legislature of the territory of Dakota passed an act, which was duly approved by the governor of the territory, entitled "An act providing for the levy and collection of taxes upon the property of railroad companies in this territory," in and by which it was, among other things, enacted and provided: "In lieu of any and all other taxes upon any railroads, except railroads operated by horse power, within this territory, or upon the equipment, appurtenances, or appendages thereof, or upon any other property situated within this territory belonging to the corporation owning or operating such railroads, upon the capital stock, or business transactions of said railroad company, there shall hereafter be paid into the treasury of this territory an amount equal to a percentage of all the gross earnings of the corporation owning or operating such railroad arising from the operation of such railroad as shall be situated within the territory, both upon territorial and interstate traffic, in case the railroad company owning or operating such line shall accept and become subject to this act as hereinafter provided;" that the railroad company did, within thirty days after the passage of this act, by resolution of its board of directors, attested by its secretary, filed with the secretary of the territory of Dakota, accept and become subject to the provisions of the Act of March 7, 1889; that within thirty days of its passage the railroad company, as required by the act, prepared and filed with the treasurer of the territory, in the manner required by the provisions of chapter 99 of the Session Laws of the territory for the year 1888, an account of the gross earnings of the company, both territorial and interstate, for the years 1886 and 1887, and paid into the treasury the entire amount of taxes claimed by the territory on local and interstate earnings remaining unpaid at the time of filing such account for said years, such payment being as follows, to wit: For the last half of the year 1886, \$83,095.81; for the year 1887, \$65,585.46. Such sums so paid, as provided for in the territorial act of March 7, 1889, were percentages computed entirely upon gross earnings of the company derived from domestic business, the percentage for the same years computed upon the gross earnings derived from interstate business having been previously paid by the company, as required by the provisions of the territorial act of 1888.

It was also alleged that, at the same time, the company paid into the treasury of the territory one half of the entire amount due for the year 1888, amounting to \$46,987.09, and

that before August 15, 1889, it had paid the remainder of the amount due for the year 1888; that the sums so paid into the treasury for the year 1888 were percentages computed upon the gross earnings of the company for that year, derived from both domestic and interstate business, the former amounting to \$11,446.78 and the latter to \$82,427.40, and it was alleged that all the percentages derived from interstate business so paid into the treasury were not due from the company, except by virtue of the act of March 7, 1889, and the company's acceptance thereof, and that they were paid as a consideration for the exemption from taxation provided for by that act, and for no other reason.

It is then charged that, notwithstanding the premises, in the year 1889 the county auditors for the counties of Kidder, Stutsman, Richland, and McLean, under the authority of the laws of the territory of Dakota, had assessed the company's lands situate in their respective counties for purposes of county taxation, and that they had advertised the lands as described in the schedules to the bill, for sale, and were about to wrongfully sell the same for the non-payment of taxes so levied, together with penalties and costs, and to issue certificates of sale for the same in the form prescribed by the laws of North Dakota, and unless restrained by the order of the court they would sell the lands, and issue certificates of sale thereafter, whereby the rights of the railroad company in and to the lands would be irreparably injured, and lead to multiplicity of suits concerning the title thereto.

It was further claimed on the part of the railroad company that the taxes so assessed and levied upon the lands were a cloud upon the title of the railroad company thereto; that if sold and certificates were issued to the purchaser, such certificates would constitute a cloud upon the title of the company in and to the lands so sold; that the counties were bankrupt, and that if the railroad company should pay the taxes and then bring an action against them to recover the amount thereof, it would require a multiplicity of suits, and such judgments as might be recovered would be worthless.

The bill further averred that the amount of the taxes levied upon the lands, together with the costs and penalties claimed by the county auditors to have accrued thereon, and for which the lands had been advertised for sale, and were about to be sold, were as follows: Upon the lands in Kidder county, \$12,820.67; upon the lands in Stutsman county, \$8863.39; upon the lands in Richland county, \$4094.37; and upon the lands in McLean county, \$4048.17—the amount of such tax, penalty, and cost upon each tract of land being particularly shown in the schedules attached to the bill.

The prayer of the bill was to the effect that the county assessments and taxes so levied upon the lands of the railroad company might be declared illegal and void, and a cloud upon the title of the company, and that the defendants, and each of them, their deputies and successors in office, be restrained from selling or attempting to sell the lands or any portion thereof, or from issuing tax certificates therefor.

The defendants appeared and demurred to the amended bill on the ground that, according to the showing made therein, the plaintiff was not entitled to the relief sought. The circuit court sustained the demurrer and dismissed the bill on the ground that the act of 1889 was void, because it violated the Organic Act, which provided that the legislative assembly of the territory shall not make any discrimination in taxing different kinds of property, but all property subject to taxation shall be taxed in proportion to its value; secondly, that the bill was without equity in failing to allege payment or tender of the gross earnings tax for the year 1889. 47 Fed. Rep. 681.

From this judgment the railroad company appealed to the United States Circuit Court of Appeals for the Eighth Circuit, and that court, desiring instructions upon certain questions presented by the assignments of error filed in the cause, certified to this court various propositions of law, as to whether the railroad company acquired such title to the odd numbered sections of land within the place limits of the grant of July 2, 1864, which were not mineral, and which, at the dates of the grant and of the filing of the map of definite location in the office of the Commissioner of the General Land Office, were not reserved, sold, granted, or otherwise appropriated, as to render them taxable before being patented and certified to the railroad company; whether the company was taxable on such lands by the territories after the filing of the map of definite location of its railroad, and full compliance with the terms and conditions of the granting Act, while the United States refused to patent and certify such lands to the company; whether chapter 107 of the Laws of Dakota for 1889, being an act entitled "An Act Providing for the Levy and Collection of Taxes upon the Properties of Railroad Companies in this Territory," approved March 7, 1889, was void as a regulation of interstate commerce; whether the act of March 7, 1889, was in conflict with the 5th and 14th amendments of the Constitution of the United States, and with the organic law of the territory, as an attempt to exempt from taxation the lands granted by the Act of July 2, 1864; whether the act of March 7, 1889, should be construed as granting an exemption for the year 1889, or to be in force and effect only after the year 1890. The eighth and remaining question certified is as follows: "Is said bill without equity because of the failure to aver that the complainant has tendered or paid the 'gross earnings tax' for the year 1889; and is said complainant entitled to the equitable relief prayed without first tendering or paying such tax?"

In the view we take of the case, the answer to the last question will dispose of the suit, and render it unnecessary to enter upon the consideration and determination of the other propositions of law on which instructions are asked.

By an act of the legislature of the territory, approved March 9, 1883, chapter 99, Laws of 1883, it was provided that all railroad companies, except railroads operated by horse power, owned and operated within the territory, should pay two per centum on the gross earnings of their railroads for a period of five years, and thereafter three per centum on the

gross earnings, in lieu of all other taxes upon said railroads and the capital stock and business thereof. The payment of this percentage was to be made at designated dates in each year, and penalties were imposed upon the companies failing to comply with the provisions of the law as to the making of returns of earnings and paying the percentages imposed by the act. The moneys so received and collected were to be apportioned between the territory and the several counties through which the railroads respectively ran.

This act of 1883 left the railroad companies no choice as to whether they would pay the designated percentage on their gross earnings, or remain subject to taxation upon their property in the ordinary method. It was compulsory upon them. It is not material to the present case to consider whether this act was constitutional or not; it was repealed by the act of legislature approved January 29, 1889. Now, it is shown by the bill that at the time the act of 1883 was repealed the appellant was in default of the payment of the percentages due upon its gross earnings for the years 1886, 1887, and 1888.

On March 7, 1889, the legislature of the territory of Dakota passed an act, entitled "An Act Providing for the Levy and Collection of Taxes upon Property of Railroad Companies in this Territory,"* which went into force and effect immediately after its passage.

This act is by its terms nothing but a tax law, and while it adopted the same rule of percentages on the gross earnings as provided in the act of 1883, it differed from that act in not being compulsory upon the railroad companies, for it left to them the election as to which of two modes of taxation they should accept or submit to. It practically gave to the railroad companies the choice of having their property taxed as other property in the territory, by assessment and levy, or of taking the benefits of the act upon the terms and conditions provided therein. It was, by section 7, made a condition of the acceptance of the act that "any railroad company assessed under chapter 99 of the Laws of 1883 shall, within thirty days after the passage of this act, pay into the territorial treasury the full amount of the taxes and interest due under the assess-

*Be it enacted by the Legislative Assembly of the Territory of Dakota:

1. *Percentage of gross earnings to be paid in lieu of other taxes.*—In lieu of any and all other taxes upon any railroads, except railroads operated by horse power, within this territory, or upon the equipment, appurtenances, or appendages thereof, or upon any other property situated in this territory belonging to the corporation owning or operating such railroads, upon the capital stock or business transactions of said railroad company, there shall hereafter be paid into the treasury of this territory an amount equal to a percentage of all the gross earnings of the corporation owning or operating such railroad, arising from the operating of such railroad, as shall be situated within this territory, both upon territorial and interstate traffic. In case the railroad company owning or operating such line shall accept and become subject to this act as hereinafter provided.

Every such railroad corporation or person owning or operating or that may hereafter own or operate any line of railroad in this territory which shall have accepted this act shall pay to said treasurer each year "for the first five years" after the approval of this act an amount equal to three per centum of such gross earnings, and for and in each and every year after the expiration of such

ments under said laws of 1883, including taxes on both territorial and interstate earnings, before they can avail themselves of the provisions of this act." It was further provided that any company failing to strictly comply with the provisions of the act within the time provided should be immediately subject to assessment and taxation upon its property in the same manner as the property of individuals was assessed and taxed.

The companies accepting the benefits of the act were not only to pay arrearages under the law of 1883, but were also to pay a percentage of gross earnings for the current year of 1889, it being provided that "if such acceptance was filed on or before the 15th day of February in any year such companies should pay one half of said amount on said 15th day of February and the balance on the 15th day of August next following. Should such acceptance be filed before the 15th day of August and after the 15th day of February in any year, then an amount equal to three per centum of such account shall be paid in full on or before the 15th day of August in each year."

It is shown by the bill that the appellant ac-

cepted the provisions and benefits of the act within thirty days after March 7, 1889, and it thereby became liable to pay the required percentage on its gross earnings on or before the 15th of August, 1889. It is also shown by the bill that within thirty days after the passage of the act it paid the arrearages of percentages on its gross earnings accruing under the act of 1883, for the years 1886, 1887, and 1888; but it is not alleged that it made payment, or tender of payment, of the percentage on its gross earnings for the year 1889, or any portion thereof, although by the express provisions of the act a percentage on a portion of such gross earnings was due and payable on the 15th day of August, 1889.

The moneys to be received and collected by the territorial treasurer under this act from the railroad companies which accepted its provisions were to be apportioned between the territory and the several counties, respectively, through which the railroads run, or in which the companies had lands subject to taxation, in the manner pointed out in section 6 of the act. The several counties, whose auditors are made defendants in the present

five years an amount equal to two per cent of said gross earnings," and the payment of such amount annually as aforesaid shall be and is in full of any and all other taxation and assessment whatever upon the property aforesaid.

Said payments shall be made, except as herein-after provided, one half on or before the 15th day of February, and one half on or before the 1st day of August in each year. And for the purpose of ascertaining the gross earnings aforesaid, an accurate account of such earnings shall be kept by said company. An abstract shall be furnished by said company to the treasurer of this territory on or before the 1st day of February in each year, the truth of which abstract shall be verified by the affidavits of the treasurer and secretary of such company, and for the purpose of ascertaining the truth of such affidavits and the correctness of such abstracts, full power is hereby vested in the governor of this territory, or any other person appointed by law, to examine under oath the officers, employees of said company, or other persons, and if any person so examined by the governor or other authorized person shall knowingly or willfully swear falsely, concerning the matter aforesaid, every such person is declared to have committed perjury; and for the purpose of securing to the territory the payment of the aforesaid per centum it is hereby declared that the territory shall have a lien upon the railroad of said company, and upon all property, estate, or effects of said company whatsoever, personal, real, or mixed, and the lien hereby secured to the territory shall have and take precedence of all demands, decrees, and judgments against said company.

2. *When company shall fail to make return.*—If any such railroad company having accepted this act shall fail to make return of its gross earnings as aforesaid, or of any part thereof, at the time and in the manner provided by law, and such default shall continue during the period of thirty days, such company shall be subject to a penalty of an amount equal to ten per cent of the tax imposed upon such company by this act, and the treasurer of the territory shall forthwith ascertain the amount of such percentage justly due from such company, as near as may be, from such evidence as may be available, and shall thereupon collect such amount so ascertained, together with the said penalty thereon.

The amount so ascertained by the territorial treasurer as in this section provided shall, together with the said penalty thereon, be by him entered in the books of his office and such entry when so made shall stand in the place of the report required by law to be made by such company, and shall in all courts within this territory be evidence of the amount of such tax and penalty and of the other facts stated therein in pursuance of this act.

4 INTER S.

3. *Neglect to pay taxes.*—In case any railroad company which shall have accepted the provisions of this act shall fail or neglect to pay the amount reported at the time and in the manner hereinafter provided, for a period of thirty days after the same shall have become due by the terms thereof, in such case there shall be added to the amount of such tax ten per centum thereof as a penalty for such failure or neglect to pay.

4. *Territorial treasurer to distrain.*—At any time after the expiration of the period of thirty days after the amount as above provided has become due and payable under the provisions of this act, the territorial treasurer or his deputy shall distrain sufficient goods, chattels, or other movable property, if found within this territory, to pay the said amount due from such corporation, together with the penalty thereon as hereinafter provided, and shall immediately advertise the sale of the same in at least three newspapers published within this territory, stating the time when and the place where such property shall be sold, such sale shall take place at some point on the railroad of such delinquent company, and at least four weeks' notice of the time and place of such sale shall be given; such delinquent company, its successors or assigns, may pay in such amount and penalty at any time before the sale of the property distrained as herein provided, and thereupon further proceedings in connection with such distress shall cease, and the property distrained shall be delivered to the owner thereof.

5. *Land subject to taxation.*—The lands of any railroad company shall become subject to taxation in the same manner as other similar property as soon as the same are sold, leased, contracted to be sold or leased; and on or before the first day of April of each year each railroad company having lands within the territory shall return to the county clerk of each county within this territory full and complete lists, verified by the affidavits of such officers of the company having knowledge of the facts, of all lands of such company situated within such county, sold, or contracted to be sold, or leased, during the year ending the last day of December preceding, and the list furnished on or before the first day of April, A. D. 1889, in compliance with the terms of this section, shall include a complete list of all lands sold or leased, prior to the last day of December, 1888.

6. *How taxes apportioned.*—The moneys received and collected by the territorial treasurer in pursuance to this act shall be disposed of by him as follows: In case the railroad company paying such tax owns no land granted in aid of the construction of its railroad, one third of the same shall be retained in the territorial treasury for the use of the territory, and the remainder shall be apportioned among the several counties into or through which

case, were therefore interested in the gross earnings tax which the appellant was required to pay for the year 1889 in lieu of all other ordinary taxes upon its property.

The gross earnings act remained in force until November 2, 1889, when it was repealed by the repugnant provisions contained in the constitution of the state of North Dakota, as adopted and approved by Congress, and the claim is now made by the appellant that the repeal relieves it from liability to pay any percentage on its gross earnings for the year 1889, or any part thereof, because the same was not payable until after 1890; and that it was not liable to assessment and taxation on its property because it had accepted the provisions of the gross earnings act of 1889.

This contention, if correct, would relieve the appellant from any burden in the way of taxation for the year 1889, but such a claim as this cannot possibly be sustained. The act of March 7, 1889, clearly intended that the gross earnings tax, therein provided for, as to all companies which would accept its provisions, should supply revenue for the territory and the counties for the year 1889. It is equally clear from the whole act as a tax law, that the railroad company had to pay the required per-

centage on its grossearnings for that year, and that such percentage was payable in part on the 15th day of August in that year. It is not therefore correct to say that no part of the gross earnings were payable until 1890; but, if that were not the case, having accepted the provisions of that act and thus becoming liable to pay the designated percentage of its gross earnings in lieu of taxes for the year 1889, that liability would not be discharged by the subsequent repeal of the gross earnings act of 1889. If the company was released from the gross earnings tax by the repeal of the act, its property immediately became subject to assessment and taxation in the manner provided for the assessment and taxation of property of individuals in the territory, and it would not vitiate any such assessment made on the part of the counties that happened to be made prior to the repeal of the act of 1889. Such assessment would remain in full force and effect after the repeal of the act and until satisfied.

It is next contended by the appellant that its payment of arrearages, claimed to be due under the act of 1883, was a consideration for the exemption of its property from taxation for the year 1889. This position cannot be sustained

the railroad or railroads of such companies run, in proportion to the number of miles of main track situated in such counties respectively. In case the railroad company paying such tax owns land granted in aid of the construction of its railroad, then thirty per cent of the tax paid by such company shall be retained in the territorial treasury for the use of the territory, and forty per cent shall be apportioned among the several counties into or through which the railroad or railroads of such company run, in proportion to the number of miles of main track situated in such counties, respectively, and thirty per cent shall be apportioned among the several counties in which lands forming a part of its land grant are situated, in proportion to the number of acres of surveyed and unsold lands in said counties.

7. *Any railroad company.*—Which, at the date of the passage of this act owns or is engaged in operating any line or lines of railroad in this territory, may at any time within thirty days after the passage of this act, by resolution of its board of directors, attested by its secretary, and filed with the secretary of the territory, accept and become subject to the provisions of this act, and provided that any railroad company which is now in arrears in the payment of taxes assessed under chapter 90 of the Laws of 1883 shall, within thirty days after the passage of this act, pay into the territorial treasury the full amount of the taxes and interest due under the assessments under said laws of 1883 before they can avail themselves of the provisions of this act, by accepting its terms, including taxes on both territorial and interstate earnings. It is further expressly provided that any company failing to strictly comply with the provisions of this act within the term herein provided shall be immediately subject to assessment and taxation in the manner provided for the assessment and taxation of the property of individuals of this territory, and said taxes shall be collected in the same manner as is now provided in cases of the property of individuals. Any company which has not complied with the provisions of chapter 90 of the Session Laws of 1883, by paying all taxes claimed on gross earnings both territorial and interstate, or by filing an account of gross earnings both territorial and interstate, shall prepare and file such account in the manner therein provided within thirty days from the passage hereof, and pay one half of the entire amount due under the agreement and acceptance herein referred to, for the current year, and also the entire amount of taxes heretofore claimed by the territory on local and interstate earnings of such companies, but remaining unpaid at the time of filing said account and within thirty days after the passage of this act, or the same

shall not apply to such company or companies. The balance of said taxes due for the current year shall be paid to the territorial treasurer on or before the 15th day of August, 1889. Any railroad company that may be hereafter organized in this territory, or that shall hereafter become the owner of or engaged in operating any lines of railroad in this territory, may accept and become subject to the provisions of this act by filing a resolution of its board of directors in the manner as hereinbefore provided.

In case any such railroad company shall accept and become subject to the provisions of this act, it shall at the time of filing such acceptance render an account of gross earnings both territorial and interstate, in the manner as hereinbefore provided, and shall pay at the time of rendering such account, all amounts claimed by the territorial auditor as tax due on the local and interstate earnings of such company for the current or any preceding year, and shall thereafter pay an amount equal to 3 per centum of such account, as follows: If such acceptance is filed on or before the fifteenth day of February in any year, such company shall pay one half of said amount on said fifteenth day of February, and the balance on the fifteenth day of August following. Should such acceptance be filed before the fifteenth day of August and after the fifteenth day of February in any year, then an amount equal to 3 per centum of such account shall be paid in full on or before the fifteenth day of August in each year. Thereafter accounts shall be rendered and payment made in the manner provided in this act; provided, that any company failing to promptly and strictly comply with the provisions herein set forth and to pay all sums herein provided to be paid shall be subject to assessment and taxation in the same manner as individuals.

8. *In case of non-acceptance.*—The railroads and property of all railroad companies owning or operating lines of railway in this territory, which companies shall not accept and become subject to the provisions of this act, shall not be entitled to the exemption in this act contained, but shall be subject to taxation in such manner as shall be provided by law.

9. *Repeal or amendment.*—This act shall be subject to repeal or amendment by any future legislature, and nothing herein contained shall be construed as a repeal of any revenue law now in existence, as applicable to any railroad company which shall not accept the provisions of this act as herein provided.

10. *Effect when.*—This action shall take effect and be in force from and after its passage.

Approved March 7, 1889.

for, by the terms of the act of 1889, the payment of those arrearages was simply a condition upon which the railroad company was allowed to accept the benefits of that act, which was not an act exempting the property of the railroad company from taxation, but merely substituted one mode of taxation for another upon the terms and conditions specified. One of the terms on which the railroad was allowed to accept the gross earnings tax, in lieu of the ordinary tax upon its property, was that it should pay the arrearages which the territory claimed under the act of 1888. No exemption from taxation for the year 1889 was contemplated. The railroads accepting the act were required to pay the gross earnings tax for that year in addition to such arrearages. It cannot, therefore, be properly claimed that the payment of these arrearages constituted a consideration for any exemption from taxation, or that such payment raised any equity on the part of the appellant against the payment of taxes for 1889, whether such taxes were imposed in the shape of a percentage on the gross earnings for that year, or in the shape of the ordinary assessment upon its property.

There is nothing in the allegations of the bill showing affirmatively that the company did not possess the equitable title or ownership in the lands described and assessed. Nor do the averments of the bill negative the fact that the appellant was properly chargeable with taxes on the lands coming within the grant of July 2, 1864, and within the limits of the line of definite location of its road. Payment of the gross earnings tax, imposed by the act of 1889, would have discharged all claims for taxes upon the company's lands for that year, but no ground is shown by the bill for releasing the appellant for the payment of either the percentage tax on its gross earnings, or from the payment of the assessment upon its lands made by the county auditors. By section 7 of the act of 1889, its failure to promptly and strictly comply with the provisions thereof, and pay all sums therein provided to be paid, subjected the company to assessment and taxation in the same manner as individuals. It did not comply with the provisions of the act in paying the percentage of gross earnings due on the 15th day of August, 1889, and thereupon its property became liable to assessment and taxation as the property of individuals in the several counties.

Being liable to pay either the percentage on gross earnings in accordance with the provisions of the act of 1889, or the tax upon its lands, as other property of like character was assessed, the appellant was not entitled to any relief in a court of equity by injunction without payment or tender of what was due under one or the other of those modes of taxation.

In *Taylor v. Secor* ("State R. Tax Cases") 92 U. S. 575, 616, 617 [28: 663, 674], the rule is established that before an injunction will be granted in such cases as the present, a party must pay or tender what can be seen to be due on the face of the bill, and, speaking for the court in that case, *Mr. Justice Miller* said that the duty of making such a tender or payment before any injunction will be allowed is laid down "as a rule to govern the courts of the United States in their action in such cases." This rule was repeated in *German Nat. Bank of Chicago v. Kimball*, 108 U. S. 732, 733 [26: 469], where it was treated as a fatal objection to the bill that there was no offer to pay any sum as a tax which the party ought to pay, and, again speaking for this court, *Mr. Justice Miller* there said: "We have announced more than once that it is the established rule of this court that no one can be permitted to go into a court of equity to enjoin the collection of a tax until he has shown himself entitled to the aid of the court by paying so much of the tax assessed against him as it can be plainly seen he ought to pay," etc.

Applying this rule to the present case, it is clear that the appellant's bill was properly dismissed for failing to pay, or tender to pay, taxes which he ought to have paid on its property, or, in lieu thereof a percentage of its gross earnings.

Our response, therefore, to the eighth question certified is, that the bill was without equity, because of the failure to aver that the plaintiff had tendered or paid the gross earnings percentage for the year 1889 (or the tax assessed by the county auditors) and was not entitled to the equitable relief prayed without first tendering or paying such taxes.

The answer of the court to that question will accordingly be certified to the Circuit Court of Appeals for the Eighth Circuit.

Mr. Justice Brewer dissented.

THE COVINGTON & CINCINNATI BRIDGE COMPANY, *Plff. in Err.*,

COMMONWEALTH OF KENTUCKY.

(See S. C. 154 U. S. 204, 38 L. ed. 962.)

1. The Kentucky law of 1890 fixing rates of toll and fare over the bridge of The Covington & Cincinnati Bridge Co., spanning the Ohio river and connecting the states of Ohio and Kentucky, is an attempted regulation of commerce which it is not within the power of the state to make.
2. A state has no power to regulate tolls upon a bridge connecting such state with another state; Congress alone has such power.
4. Whether two states can, in the absence of legislation by Congress, fix, by reciprocal action, the rates of toll and fare over a bridge connecting

such states, this court does not decide in this case.

3. A bridge across waters between two states and

connecting such states, is an instrument of interstate commerce and traffic across it is interstate commerce.

[No. 1025.]

Argued Jan. 26, 29, 30, 1894. Reargued April 25, 1894. Decided May 26, 1894.

IN ERROR to the Court of Appeals of the State of Kentucky, to review a judgment of that court, affirming the judgment of the criminal court of Kenton county, in that state, adjudging the defendant, The Covington & Cincinnati Bridge Company, guilty of the offenses charged in an indictment against that company, for collecting illegal tolls upon the bridge of that company across the Ohio river between the states of Kentucky and Ohio, and imposing a fine upon defendant. *Reversed, and case remanded for further proceedings.*

Statement by Mr. Justice Brown:

This was an indictment found by the grand jury of Kenton county, Kentucky, against the defendant Bridge Company for demanding and collecting illegal tolls, refusing to sell tickets at the rates required by law, and for failing to keep an office for the sale of tickets at its bridge in said county.

The Covington & Cincinnati Bridge Company was incorporated under an act of the legislature of Kentucky, approved February 17, 1846, the third section of which required the confirmation of the act by the state of Ohio, before the corporation should open its books for subscription; and the eighth section of which declared that "the president and directors shall have the right to fix the rates of toll for passing over said bridge, and to collect the same from all and every person or persons passing thereon, with their goods, carriages, or animals of every description or kind; provided, however, that the said company shall lay before the legislature of this state a correct statement of the costs of said bridge, and an annual statement of the tolls received for passing the same, and also the cost of keeping the said bridge in repair, and of the other expenses of the company; and the said president and directors shall, from time to time, reduce the rates of toll, so that the net profits of the said bridge shall not exceed fifteen per cent per annum, after the proper deductions are made for repairs and charges of other descriptions."

By an act of the legislature of Ohio, enacted March 9, 1849, this company was made a body corporate and politic of that state, "with the same franchises, rights, and privileges, and subject to the same duties and liabilities," as were specified in its original incorporation; and with a further proviso that "nothing herein contained shall be construed to take away the jurisdiction of this state to the center of the said bridge, nor in anywise to acknowledge the jurisdiction of the commonwealth of Kentucky this side of the said center."

On March 20, 1850, this act of confirmation was amended by the legislature of Ohio by granting the company "power to enter upon any lands in the city of Cincinnati, from low-water mark in the Ohio river northwardly, not

exceeding one hundred feet in width, to Front street, and appropriate the same" for passageways and abutments, etc.

The original act of incorporation was amended by the legislature of Kentucky by the following amongst other subsequent acts:

1. By act of February 23, 1856, authority was given to increase the capital stock from \$300,000 to \$700,000, with power in the city of Covington to subscribe for and purchase \$100,000.

2. By act of February 6, 1858, the company was authorized to issue preferred stock under certain restrictions, such stockholders to receive dividends of 6 per cent.

3. By act of February 5, 1861, the capital stock was increased to \$1,000,000, one half of such amount in preferred stock, and to pledge the revenues of the company for the payment of dividends upon such preferred stock to the extent of 15 per cent per annum.

4. By act of January 21, 1865, the capital stock was increased to \$1,250,000, the additional \$250,000 being preferred stock, the holders of which should enjoy all the benefits, privileges, and immunities to which the holders of the existing stock were entitled.

By the sixth section of this act the legislature reserved the right to change, alter, or amend the original charter, "but not so as to abridge or injure legal or equitable rights acquired thereunder."

5. By act of February 25, 1865, the above sixth section was repealed.

6. By Act of Congress of February 16, 1865, the bridge was declared to be a lawful structure and post road for the conveyance of the mails of the United States. 13 Stat. at L. 431.

The bridge was completed and opened for travel January 1, 1867.

On March 31, 1890, the legislature of Kentucky passed another act amendatory of the act of incorporation, and out of which this prosecution arose, providing that it should be unlawful for any person or corporation to charge, collect, demand, or receive for passage over the bridge spanning the Ohio river, constructed under such act of incorporation, any toll, fare, or compensation greater than, or in excess of, certain rates prescribed by the act, which were much less than the directors had fixed upon under the eighth section of the act of incorporation. The second section provided that the company should sell passage tickets over their bridge at these rates, entitling the holder to passage either way over said bridge; and by the third section, the company was required to keep an office within the county of Kenton constantly open for the sale of such tickets; and keep conspicuously posted a schedule of the tolls fixed in pursuance of the act.

The company failing to conform to this last mentioned act, this indictment was filed May

9, 1890. Defendant demurred thereto, and the case was submitted upon this demurrer and a statement of facts, showing the cost of the bridge structure and offices to have been \$1,855,462.86; the per cent. of net earnings on cost for first 23 years, 4.82; the per cent of net earnings on cost for the year 1889, 6.14; the estimated per cent of net earnings on cost for 1890, 4½, under the charges fixed by the directors; the estimated percentage of net earnings on cost for the year 1890, under the act of which complaint was made 1½. The court sustained the demurrer and dismissed the indictments upon the ground that the act of 1890 impaired the obligation of the contract contained in the eighth section of the original act. The commonwealth appealed to the court of appeals, by which the judgment of the court below was reversed, and the case remanded with directions to overrule the demurrer, and for further proceedings. The case was thereupon remanded to the lower court and submitted without a jury. The court adjudged the defendant guilty, and imposed a fine of \$1000, from which judgment the defendant again appealed to the court of appeals, which affirmed the judgment of the court below, and certified, at the request of the appellant, the following questions as arising under the Constitution and laws of the United States:

1. Whether the act of 1890 was within the constitutional inhibition of laws impairing the obligation of contracts.
2. Whether such acts were in violation of the exclusive power of Congress to regulate commerce among the states.
3. Whether said act was in violation of the 14th Amendment, prohibiting the taking of private property without due process of law.

Defendant thereupon sued out a writ of error from this court.

Messrs. Lawrence Maxwell, Jr., Solicitor General, Wm. M. Ramsay, James W. Bryan, John F. Fisk and Charles H. Fisk, for plaintiff in error:

The bridge of the plaintiff in error, being an instrumentality of interstate commerce, lying partly in two states, it is not competent for the legislature of Kentucky to regulate it by prescribing tolls for the transit and passage of persons and property thereover from one state to another.

Wabash, St. L. & P. R. Co. v. Illinois, 118 U. S. 557 (30: 244), 1 Inters. Com. Rep. 81.

The question of the reasonableness of the rates is not material. If the legislature of Kentucky can fix the tolls at all, the amount will rest in its discretion.

Gloucester Ferry Co. v. Pennsylvania, 114 U. S. 196 (29: 158), 1 Inters. Com. Rep. 382.

A bridge is an instrument of commerce within the meaning of the Constitution.

Pensacola Teleg. Co. v. Western U. Teleg. Co. 96 U. S. 1 (24: 708); *Western U. Teleg. Co. v. Texas*, 105 U. S. 460 (26: 1067); *Western U. Teleg. Co. v. Pendleton*, 122 U. S. 347 (30: 1187), 1 Inters. Com. Rep. 806; *Mobile County v. Kimball*, 102 U. S. 691 (26: 238); *California v. Central Pac. R. Co.* 127 U. S. 1 (32: 150), 2 Inters. Com. Rep. 153; *Cherokee Nation v. Southern Kansas R. Co.* 135 U. S. 641 (34: 295); *Decker v. Baltimore & N. Y. R. Co.* 80 Fed. Rep. 723.

4 INTER S.

The plaintiff in error is engaged in the business of interstate commerce, because its bridge extends from one state to another, and every passage thereover of persons or property is necessarily from one state to another.

Budd v. New York, 143 U. S. 517 (36: 247), 4 Inters. Com. Rep. 45; *Munn v. Illinois*, 94 U. S. 113 (24: 77); *Chicago, B. & Q. R. Co. v. Iowa*, 94 U. S. 155 (24: 94); *Philadelphia & R. R. Co. v. Pennsylvania* ("State Freight Tax") 82 U. S. 15 Wall. 232 (21: 146).

If it is competent for the legislature of Kentucky to fix tolls for this bridge, the acts of 1890 prescribe rates which are in conflict with the contract contained in the original charter of the company.

Stone v. Yazoo & M. V. R. Co. 62 Miss. 607, 52 Am. Rep. 193; *Stone v. Farmers Loan & T. Co.* 116 U. S. 307 (29: 636); *Philadelphia, W. & B. R. Co. v. Bowers*, 4 Houst. (Del.) 506; *Sloan v. Pacific R. Co.* 61 Mo. 24, 21 Am. Rep. 397; *Hamilton v. Keith*, 5 Bush, 458; *Atty. Gen. v. Chicago & N. W. R. Co.* 35 Wis. 425.

If it is to be presumed, in the absence of proof, that the bridge company failed to file, or delayed in filing, the reports called for by the eighth section of the charter, such failure or delay does not work a forfeiture of its right to collect tolls under its charter.

Georgia R. & Bkg. Co. v. Smith, 128 U. S. 174 (32: 377); *Stanley v. Colt*, 72 U. S. 5 Wall. 119 (18: 502); *Goldborough v. Orr*, 21 U. S. 8 Wheat. 217 (5: 600); *Philadelphia, W. & B. R. Co. v. Howard*, 54 U. S. 13 How. 307 (14: 157).

Messrs. Wm. J. Hendrick, Atty. Gen. of Kentucky, and *Wm. Goebel*, for defendant in error:

The business or employment of the bridge company is not commerce, and the acts of 1890 are not regulations of commerce. Those acts are regulations of charges for the use of artificial facilities constituting mere local aids to commerce, and affect commerce only incidentally. Such facilities do not require, nor admit of, uniformity of regulation. Congress not having legislated on the subject, it was competent for the state to do so. A state having power to impose charges for the use of such facilities, it has also power to determine what the charges shall be.

Kentucky & I. Bridge Co. v. Louisville & N. R. Co. 2 Inters. Com. Rep. 351, 87 Fed. Rep. 616; *Mobile County v. Kimball*, 102 U. S. 691 (26: 238); *Gloucester Ferry Co. v. Pennsylvania*, 114 U. S. 196 (29: 158), 1 Inters. Com. Rep. 382; *Newport & O. Bridge Co. v. United States*, 105 U. S. 470 (26: 1143).

Congress has never attempted to regulate the operation of bridges or ferries, nor the tolls or fares on either. These matters Congress has left to the states, and the states always have regulated and controlled them.

Keokuk N. L. Packet Co. v. Keokuk, 95 U. S. 80 (24: 377); *Huse v. Glover*, 119 U. S. 543 (30: 487); *Ouachita & M. R. Packet Co. v. Aiken*, 121 U. S. 444 (30: 976), 1 Inters. Com. Rep. 379; *Escanaba & L. M. Transp. Co. v. Chicago*, 107 U. S. 678 (27: 442); *Conway v. Taylor*, 66 U. S. 1 Black, 608 (17: 191).

If, by virtue of its original charter, the corporation was exempt from legislative control of its tolls, it lost the exemption by reason of

the amendment to its charter, approved January 21, 1865.

Gibbs v. Consolidated Gas Co. 180 U. S. 408 (32: 984); *Chicago L. Ins. Co. v. Needles*, 118 U. S. 588 (28: 1088); *Shields v. Ohio*, 95 U. S. 819 (24: 357); *Miller v. New York & E. R. Co.* 21 Barb. 518; *Worcester v. Norwich & W. R. Co.* 109 Mass. 108; *Greenwood v. Union Freight R. Co.* 105 U. S. 18 (26: 961).

Whatever power is dependent solely upon the grant of the charter, is abrogated by the repeal of the law which granted these special rights.

Com. v. Essex Co. 18 Gray, 289; *Miller v. New York*, 82 U. S. 15 Wall. 498 (21: 104); *Tomlinson v. Jessup*, 82 U. S. 15 Wall. 454 (21: 204); *Maine Cent. R. Co. v. Maine*, 96 U. S. 499 (24: 886); *Union Pac. R. Co. v. United States ("Sinking Fund Cases")* 99 U. S. 700 (25: 496); *Hill v. Glasgow R. Co.* 41 Fed. Rep. 610.

There being no consideration for the act, it was a mere gratuitous concession which the state might at any time recall or disregard.

Christ Church v. Philadelphia County, 65 U. S. 24 How. 801 (16: 604); *Tucker v. Ferguson*, 89 U. S. 22 Wall. 574 (22: 816); *Louisville Gas Co. v. Citizens Gas Light Co.* 115 U. S. 688 (29: 510).

The bridge company failed to perform an express duty, which was, by the terms of its charter, made a condition of the exemption from legislative control of tolls, which it claims. By failing to perform the condition, it waived and lost the alleged exemption dependent upon it.

Rich v. Atwater, 16 Conn. 419; *Voorhees v. Jackson*, 85 U. S. 10 Pet. 471-9: 499; *Auditor v. Haycraft*, 14 Bush, 284.

The state need not accept any substitute for performance of the condition.

Maine Cent. R. Co. v. Maine, 96 U. S. 499 (24: 886); *Atty. Gen. v. Petersburg & R. R. Co.* 28 N. C. 461.

The power to fix or regulate tolls or other charges for the use of property clothed with a public interest is a power of government, continuing in its nature; and when that power has been by the state delegated to a corporation, it may be resumed at will unless the state has unequivocally contracted not to do so. There was no such contract in the original charter of the Covington & Cincinnati Bridge Company.

Stone v. Farmers Loan & T. Co. 116 U. S. 307 (29: 686); *Stone v. Illinois Cent. R. Co.* 116 U. S. 847 (29: 650); *Providence Bank v. Billings*, 29 U. S. 4 Pet. 560 (7: 955); *Charles River Bridge v. Warren Bridge*, 96 U. S. 11 Pet. 420 (9: 778); *Minot v. Philadelphia, W. & E. R. Co. ("Delaware R. Tax")* 85 U. S. 18 Wall. 206 (21: 888); *Bailey v. Maguire*, 89 U. S. 22 Wall. 215 (22: 850); *Northwestern Fertilizing Co. v. Hyde Park*, 97 U. S. 659 (24: 1086); *Gordon v. Appeal Tax Court*, 44 U. S. 8 How. 183 (11: 529); *Piqua Branch of Bank of Ohio v. Knoop*, 57 U. S. 16 How. 869 (14: 977); *Proprietors of Passaic & H. River Bridges v. Hoboken Land & Imp. Co.* 68 U. S. 1 Wall. 116 (17: 571); *Home of the Friendless v. Rouse*, 75 U. S. 8 Wall. 480 (19: 495); *Ruggles v. Illinois*, 108 U. S. 526 (27: 812); *Georgia R. & Bkg. Co. v. Smith*, 128 U. S. 174 (32: 877).

The fixing of a maximum of rates in a charter does not make a contract, nor deprive the

legislature of the power subsequently to regulate and reduce the rates.

Com. v. Easton Bank, 10 Pa. 442; *Georgia R. & Bkg. Co. v. Smith*, 128 U. S. 174 (32: 877).

The power to charge being coupled with the condition that the charge shall be reasonable, the state is left free to act on the subject of reasonableness within the limits of its general authority, as circumstances may require.

Munn v. Illinois, 94 U. S. 118 (24: 77); *Ruggles v. Illinois*, 108 U. S. 526 (27: 812); *Dow v. Beidelman*, 125 U. S. 680 (31: 841), 2 Inters. Com. Rep. 56; *Minneapolis & E. R. Co. v. Minnesota*, 134 U. S. 467 (38: 985), 3 Inters. Com. Rep. 224; *Chicago & G. T. R. Co. v. Wellman*, 148 U. S. 839 (38: 176); *Budd v. New York*, 148 U. S. 517 (38: 247), 4 Inters. Com. Rep. 45.

The rule of construction in this class of cases is that it shall be most strongly against the corporation. Every reasonable doubt is to be resolved adversely.

Northwestern Fertilizing Co. v. Hyde Park, 97 U. S. 659 (24: 1086); *Pennsylvania R. Co. v. Canal Comrs.* 21 Pa. 9.

Mr. Justice Brown delivered the opinion of the court:

This case involves the power of a state to regulate tolls upon a bridge connecting it with another state, without the assent of Congress, and without the concurrence of such other state in the proposed tariff.

The right of the commonwealth of Kentucky to prescribe a schedule of charges in this instance is contested, not only upon the ground that such regulation is an interference with interstate commerce, but upon the further ground that it impairs the obligation of the contract contained in the original charter of the company.

The power of Congress over commerce between the states and the corresponding power of individual states over such commerce have been the subject of such frequent adjudication in this court, and the relative powers of Congress and the states with respect thereto are so well defined, that each case, as it arises, must be determined upon principles already settled, as falling on one side or the other of the line of demarkation between the powers belonging exclusively to Congress, and those in which the action of the state may be concurrent. The adjudications of this court with respect to the power of the states over the general subject of commerce are divisible into three classes. First, those in which the power of the state is exclusive; second, those in which the states may act in the absence of legislation by Congress; third, those in which the action of Congress is exclusive and the states cannot interfere at all.

The first class, including all those wherein the states have plenary power, and Congress has no right to interfere, concern the strictly internal commerce of the state, and while the regulations of the state may affect interstate commerce indirectly, their bearing upon it is so remote that it cannot be termed in any just sense an interference. Under this power, the states may authorize the construction of highways, turnpikes, railways, and canals between points in the same state, and regulate the tolls

for the use of the same (*Baltimore & O. R. Co. v. Maryland*, 88 U. S. 21 Wall. 456 [22:878]), and may authorize the building of bridges over non-navigable streams, and otherwise regulate the navigation of the strictly internal waters of the state—such as do not, by themselves or by connection with other waters, form a continuous highway over which commerce is or may be carried on with other states or foreign countries. *Veazie v. Moor*, 55 U. S. 14 How. 568 [14: 545]; *United States v. The Montello*, 78 U. S. 11 Wall. 411 [20: 191], 87 U. S. 20 Wall. 430 [22: 891]. This is true notwithstanding the fact that the goods or passengers carried or traveling over such highway between points in the same state may ultimately be destined for other states, and, to a slight extent, the state regulations may be said to interfere with interstate commerce. The states may also exact a bonus, or even a portion of the earnings of such corporation, as a condition to the granting of its charter. *Society for Savings v. Cotte*, 78 U. S. 6 Wall. 594 [18: 897]; *Provident Inst. for Savings v. Massachusetts*, 73 U. S. 6 Wall. 611 [18: 907]; *Hamilton Mfg. Co. v. Massachusetts*, 78 U. S. 6 Wall. 632 [18: 904]; *Baltimore & O. R. Co. v. Maryland*, 88 U. S. 21 Wall. 456 [22: 678]; *Ashley v. Ryan*, post, p. 664.

Congress has no power to interfere with police regulations relating exclusively to the internal trade of the states (*United States v. De Witt*, 76 U. S. 9 Wall. 41 [19: 593]; *Patterson v. Kentucky*, 97 U. S. 501 [24: 1115]) nor can it by exacting a tax for carrying on a certain business thereby authorize such business to be carried on within the limits of a state. *License Tax Cases*, 72 U. S. 5 Wall. 463 [18: 497]. The remarks of the *Chief Justice* in this case contain the substance of the whole doctrine: "Over this [the internal] commerce and trade, Congress has no power of regulation nor any direct control. This power belongs exclusively to the states. No interference by Congress with the business of citizens transacted within a state is warranted by the Constitution, except such as is strictly incidental to the exercise of powers clearly granted to the legislature. The power to authorize a business within a state is plainly repugnant to the exclusive power of the state over the same subject."

It was at one time thought that the admiralty jurisdiction of the United States did not extend to contracts of affreightment between ports of the United States, though the voyage were performed upon navigable waters of the United States. *Allen v. Newberry*, 62 U. S. 21 How. 244 [16: 110]. But later adjudications have ignored this distinction as applied to those waters. *The Belfast v. Boon*, 74 U. S. 7 Wall. 624, 641 [19: 266, 271]; *Rodd v. Hearit* ("The *Lottaanna*"), 88 U. S. 21 Wall. 558, 587 [22: 654, 665]; *Lord v. Goodall, N. & P. SS.* Co. 102 U. S. 541 [26: 224].

Under this power the states may also prescribe the form of all commercial contracts, as well as the terms and conditions upon which the internal trade of the state may be carried on. *Trade Mark Cases*, 100 U. S. 82 [25: 550].

Within the second class of cases—those of what may be termed concurrent jurisdiction—are embraced laws for the regulation of pilots

(*Cooley v. Philadelphia Port Wardens*, 58 U. S. 12 How. 299 [18: 996]; *Pacific Mail SS. Co. v. Joliffe*, 69 U. S. 2 Wall. 450 [17: 805]; *Ex parte McNiel*, 80 U. S. 18 Wall. 236 [20: 624]; *Wilson v. McNamers*, 102 U. S. 572 [26: 234]) quarantine and inspection laws and the policing of harbors (*Gibbons v. Ogden*, 22 U. S. 9 Wheat. 1, 208 [6: 23, 71]; *New York v. Miln*, 36 U. S. 11 Pet. 102 [9: 648]; *Turner v. Maryland*, 107 U. S. 88 [27: 370]; *Morgan's L. & T. R. & SS. Co. v. Louisiana Board of Health*, 118 U. S. 455 [30: 237]) the improvement of navigable channels (*Mobile County v. Kimball*, 102 U. S. 691 [26: 288]; *Escunaba & L. M. Transp. Co. v. Chicago*, 107 U. S. 678 [27: 442]; *Huse v. Glover*, 119 U. S. 543 [30: 487]) the regulation of wharfs, piers, and docks (*Cannon v. New Orleans*, 87 U. S. 20 Wall. 577 [22: 417]; *Keokuk N. L. Packet Co. v. Keokuk*, 95 U. S. 80 [24: 877]; *Northwestern U. Packet Co. v. St. Louis*, 100 U. S. 423 [25: 688]; *Cincinnati, P. B. S. & P. Packet Co. v. Catlettsburg*, 105 U. S. 659 [26: 1169]; *Pittsburg & O. R. Transp. Co. v. Parkersburg*, 107 U. S. 691 [27: 584]; *Ouachita & M. R. Packet Co. v. Aiken*, 121 U. S. 444 [30: 976], 1 Inters. Com. Rep. 379), the construction of dams and bridges across the navigable waters of a state (*Wilson v. Black Bird Creek Marsh Co.* 27 U. S. 2 Pet. 245 [7: 412]; *Cardwell v. American River Bridge Co.* 118 U. S. 205 [28: 959]; *Pound v. Turck*, 95 U. S. 459 [24: 525]), and the establishment of ferries. *Conway v. Taylor*, 66 U. S. 1 Black, 603 [17: 191].

Of this class of cases it was said by *Mr. Justice Curtis* in *Cooley v. Philadelphia Port Wardens*, 58 U. S. 12 How. 299, 318 [18: 996, 1004]: "If it were admitted that the existence of this power in Congress, like the power of taxation, is compatible with the existence of a similar power in the states, then it would be in conformity with the contemporary exposition of the Constitution, and with the judicial construction, given from time to time by this court, after the most deliberate consideration, to hold that the mere grant of such a power to Congress did not imply a prohibition on the states to exercise the same power; that it is not the mere existence of such a power, but its exercise by Congress, which may be incompatible with the exercise of the same power by the states, and that the states may legislate in the absence of Congressional regulations." See also *Sturges v. Crowninshield*, 17 U. S. 4 Wheat. 192, 193 [4: 547, 548]. But even in the matter of building a bridge, if Congress chooses to act, its action necessarily supercedes the action of the state. *Pennsylvania v. Wheeling & B. Bridge Co.* 59 U. S. 18 How. 421 [15: 435]. As matter of fact, the building of bridges over waters dividing two states is now usually done by Congressional sanction. Under this power the states may also tax the instruments of interstate commerce as it taxes other similar property, provided such tax be not laid upon the commerce itself.

But wherever such laws, instead of being of a local nature and not affecting interstate commerce but incidentally, are national in their character, the non-action of Congress indicates its will that such commerce shall be free and untrammelled, and the case falls within the third class—of those laws wherein the jurisdiction of Congress is exclusive. *Brown v.*

Houston, 114 U. S. 632 [29: 257]; *Bowman v. Chicago & N. W. R. Co.* 125 U. S. 465 [31: 700], 1 Inters. Com. Rep. 823. Subject to the exceptions above specified, as belonging to the first and second classes, the states have no right to impose restrictions, either by way of taxation, discrimination, or regulation, upon commerce between the states. That, while the states have the right to tax the instruments of such commerce as other property of like description is taxed, under the laws of the several states, they have no right to tax such commerce itself, is too well settled even to justify the citation of authorities. The proposition was first laid down in *Crandall v. Nevada*, 73 U. S. 6 Wall. 85 [18: 745], and has been steadily adhered to since. That such power of regulation as they possess is limited to matters of a strictly local nature, and does not extend to fixing tariffs upon passengers or merchandise carried from one state to another, is also settled by more recent decisions, although it must be admitted that cases upon this point have not always been consistent.

The question of the power of the states to lay down a scale of charges, as distinguished from their power to impose taxes, was first squarely presented to the court in *Munn v. Illinois*, 94 U. S. 113 [24: 77], in which a power was conceded to the state to prescribe regulations and fix the charges of elevators used for the reception, storage, and delivery of grain, notwithstanding such elevators were used for the storage of grain destined for other states. The decision was put upon the ground that elevators were property "affected with a public interest," and that from time immemorial in England, and in this country from its first colonization, it had been customary to regulate ferries, common carriers, hackmen, bakers, millers, wharfingers, innkeepers, etc., and in so doing to fix a maximum of charge to be made for services rendered, accommodations furnished, and articles sold. That the decision does not necessarily imply a power in the states to prescribe similar regulations with regard to railroads and other corporations directly engaged in interstate commerce is evident from the remarks of the *Chief Justice* (p. 185) in delivering the opinion of the court: "The warehouses of these plaintiffs in error are situated and their business carried on exclusively within the limits of the state of Illinois. They are used as instruments by those engaged in state as well as those engaged in interstate commerce, but they are no more necessarily a part of commerce than the dray or the cart by which but for them grain would be transferred from one railroad station to another. Incidentally they may become connected with interstate commerce, but not necessarily so. Their regulation is a thing of domestic concern, and certainly, until Congress acts in reference to their interstate relations, the state may exercise all the powers of government over them, even though in so doing it may operate upon commerce outside its immediate jurisdiction." The principle of this case has been recently affirmed in *Budd v. New York*, 148 U. S. 517 [36: 247], 4 Inters. Com. Rep. 45, and reaffirmed in *Brass v. North Dakota*, *post*, p. 670, though not without strong opposition from a minority of the court.

4 INTER S.

In the next case, viz, that of the *Chicago, B. & Q. R. Co. v. Iowa*, 94 U. S. 155 [24: 94], was a bill filed by the Chicago, Burlington & Quincy Railroad Company, an Illinois corporation, to restrain the prosecution of suits against it under "An act to establish reasonable maximum rates of charges for the transportation of freight and passengers on the different railroads of this state." The complainant was also the lessee of the Burlington & Missouri Railroad in Iowa, the two roads being connected by a bridge which crossed the Mississippi river at Burlington, thus making a continuous railroad from Chicago to Plattsburgh on the Mississippi river, in Iowa. The case was held to be covered by *Munn v. Illinois*, the road, like the warehouse in that case, being situated within the limits of a single state. "Its business," said the *Chief Justice*, "is carried on there, and its regulation is a matter of domestic concern. It is employed in state as well as interstate commerce, and, until Congress acts, the state must be permitted to adopt such rules and regulations as may be necessary for the promotion of the general welfare of the people within its own jurisdiction, even though in so doing those without, may be indirectly affected." In short, the case was treated as one of internal commerce only.

In the next case, viz, *Peik v. Chicago & N. W. R. Co.* 94 U. S. 164 [24: 97], it was held that under the constitution of Wisconsin, providing that all acts creating corporations within the state "may be altered or repealed by the legislature at any time after their passage," the legislature had a right to prescribe a maximum of charges to be made by the Chicago & Northwestern Railway Company for transporting persons or property within the state, or taken up outside the state and brought within it, or taken up inside and carried without. The vital question is not discussed at any length, but it was held that, until Congress acted with reference to the relations of this company to interstate commerce, it was within the power of the state of Wisconsin to regulate its affairs so far as they were of a domestic concern. These three cases were cited with approval in *Ruggles v. Illinois*, 108 U. S. 526 [27: 812], in which the power of a state to limit the amount of charges by a railroad company for fares and freight was recognized.

A similar principle, though under quite a different state of facts, was involved in *Hall v. De Cuir*, 95 U. S. 485 [24: 547], which concerned an act of the legislature of Louisiana, requiring those engaged in the transportation of passengers among the states to give all persons traveling within that state, upon vessels employed in such business, equal rights and privileges in parts of the vessel, without distinction on account of race or color. The act was held to be a regulation of interstate commerce, and, therefore, unconstitutional and void. In *Stone v. Farmers Loan & T. Co.* ("Railroad Commission Cases") 116 U. S. 307 [29: 636] it was held that the right of a state to limit the charges of a railroad company for the transportation of persons or property within its jurisdiction could not be granted away by its legislature unless by words of positive grant or words equivalent in law.

and that a statute which granted to a railroad company the right from time to time to fix and regulate the tolls and charges by them to be received for transportation did not deprive the state of its power to act upon the reasonableness of the tolls and charges so fixed and regulated. It was held that the state might, "beyond all question, by the settled rule of decision in this court, regulate freights and fares for business done exclusively within the state, and it would seem to be a matter of domestic concern to prevent the company from discriminating against persons and places in Mississippi." "Nothing can be done by the government of Mississippi which will operate as a burden on the interstate business of the company or impair the usefulness of its facilities for interstate traffic. . . . The commission is in express terms prohibited by the Act of March 15, 1884, from interfering with the charges of the company for the transportation of persons or property through Mississippi from one state to another. The statute makes no mention of property taken up without the state and delivered within, nor of such as may be taken within and carried without." The court studiously avoided committing itself upon the question of the power of the commission over interstate commerce.

The prior cases were all reviewed, and the subject exhaustively considered in the *Wabash, St. L. & P. R. Co. v. Illinois*, 118 U. S. 557 [30:244], 1 Inters. Com. Rep. 31, in which there came under review a statute of Illinois enacting that if any railroad company should, within that state, charge or receive for transporting passengers or freight of the same class the same or a greater sum for any distance than it does for a longer distance, it should be liable to a penalty for unjust discrimination. The defendant in that case made such discrimination in regard to goods transported over the same road or roads, from Peoria, Illinois, and from Gilman, in Illinois, to New York; charging more for the same class of goods carried from Gilman than from Peoria, the former being 86 miles nearer the city of New York than the latter, this difference being in the length of line in the state of Illinois. The court held that such transportation was commerce among the states, even as to that part of the voyage which lay within the state of Illinois, and that the regulation of such commerce was confided to Congress exclusively, under its power to regulate commerce between the states, and that the statute in question, being intended to regulate the transmission of persons or property from one state to another, was not within that class of legislation which the states may enact in the absence of legislation by Congress. In delivering the opinion of the court Mr. Justice Miller cited the prior cases, and said that it must be admitted that, in a general way, the court treated the cases then before it as belonging to that class of regulations of commerce, which, like pilotage, bridging navigable rivers, and many others, could be acted upon by the states in the absence of any legislation by Congress upon the same subject. He further observed that "the great question to be decided, and which was decided, and which was argued in all those cases, was the right of the

state in which the railroad company did business to regulate or limit the amount of any of these traffic charges. The importance of that question overshadowed all others; and the case of *Munn v. Illinois* was selected by the court as the most appropriate one in which to give its opinion on that subject, because that case presented the question of a private citizen, or unincorporated partnership, engaged in the warehouse business in Chicago. . . . free from the question of continuous transportation through the several states, . . . and the question how far a charge made for a continuous transportation over several states, which included a state whose laws were in question, may be divided into separate charges for each state, in enforcing the power of the states to regulate the fares of its railroads, was evidently not fully considered." The substance of the opinion was that, if the prior cases were to be considered as laying down the principle that the states might regulate the charges for interstate traffic, they must be considered as overruled. See also *Bozman v. Chicago & N. W. R. Co.* 125 U. S. 465 [31:700], 1 Inters. Com. Rep. 823. In none of the subsequent cases has any disposition been shown to limit or qualify the doctrine laid down in the *Wabash* case, and to that doctrine we still adhere.

The real question involved here is whether this case had been distinguished from the *Wabash* case. That involved the right of a single state to fix the charge for transportation from the interior of such state to places in other states. This case involves the right of one state to fix charges for the transportation of persons and property over a bridge connecting it with another state, without the assent of Congress or such other state, and thus involving the further inquiries, first, whether such traffic across the river is interstate commerce; and, second, whether a bridge can be considered an instrument of such commerce.

The first question must be answered in the affirmative upon the authority of *Gloucester Ferry Co. v. Pennsylvania*, 114 U. S. 196 [29:158], 1 Inters. Com. Rep. 882, in which the state of Pennsylvania attempted to tax the capital stock of a corporation whose entire business consisted in ferrying passengers and freight over the river Delaware between Philadelphia, in Pennsylvania, and Gloucester, in New Jersey. This traffic was held to be interstate commerce, and, inasmuch as it appeared that the ferry boats were registered in New Jersey, and were taxable there, it was held that there was no property held by the company which could be the subject of taxation in Pennsylvania, except the lease of a wharf in that state. "Congress alone," said the court (p. 204), "therefore, can deal with such transportation; its non-action is a declaration that it shall remain free from burdens imposed by state legislation. Otherwise, there would be no protection against conflicting regulations of different states, each legislating for its own interests and products and against those of other states." If, as was intimated in that case, interstate commerce means simply commerce between the states, it must apply to all commerce which crosses the state line, regardless

of the distance from which it comes or to which it is bound, before or after crossing such state line—in other words, if it be commerce to send goods from Cincinnati, in Ohio, to Lexington, in Kentucky, it is equally such to send goods or to travel in person from Cincinnati to Covington; and while the reasons which influenced this court to hold in the Wabash case that Illinois could not fix rates between Peoria and New York may not impress the mind so strongly when applied to fixing the rates of toll upon a bridge or ferry, the principle is identically the same, and, at least in the absence of mutual or reciprocal legislation between the two states, it is impossible for either to fix a tariff of charges.

With reference to the second question, an attempt is made to distinguish a bridge from a ferry boat, and to argue that while the latter is an instrument of interstate commerce, the former is not. Both are, however, vehicles of such commerce, and the fact that one is movable and the other is a fixture makes no difference in the application of the rule. Commerce was defined in *Gibbons v. Ogden*, 22 U. S. 9 Wheat. 1, 189 [6: 28, 68], to be "intercourse," and the thousands of people who daily pass and repass over this bridge may be as truly said to be engaged in commerce as if they were shipping cargoes of merchandise from New York to Liverpool. While the bridge company is not itself a common carrier, it affords a highway for such carriage, and a toll upon such bridge is as much a tax upon commerce as a toll upon a turnpike is a tax upon the traffic of such turnpike, or the charges upon a ferry a tax upon the commerce across a river. A tax laid upon those who do the business of common carriers upon a certain bridge is as much a tax upon the commerce of that bridge as if the owner of the bridge were himself a common carrier.

Let us examine some of the cases which are supposed to countenance the doctrine that ferries and bridges connecting two states are not instruments of commerce between such states in such sense as to exempt them from state control. In *Conway v. Taylor*, 66 U. S. 1 Black, 608 [17: 191], a ferry franchise on the Ohio was held to be grantable under the laws of Kentucky to a citizen of that state who was a riparian owner on the Kentucky side. It was said not to be necessary to the validity of the grant that the grantee should have the right of landing on the other side or beyond the jurisdiction of the state. The opinion, however, did not pass upon the question of the right of one state to regulate the charge for ferryage, nor does it follow that because a state may authorize a ferry or bridge from its own territory to that of another state, it may regulate the charges upon such bridge or ferry. A state may undoubtedly create corporations for the purpose of building and running steamships to foreign ports, but it would hardly be claimed that an attempt to fix a scale of charges for the transportation of persons or property to and from such foreign ports would not be a regulation of commerce and beyond the constitutional power of the state. It is true the states have assumed the right in a number of instances, since the adoption of the Constitution, to fix the rates or tolls upon in-

terstate ferries and bridges, and perhaps in some instances have been recognized as having the authority to do so by the courts of the several states. But we are not aware of any case in this court where such right has been recognized. Of recent years it has been the custom to obtain the consent of Congress for the construction of bridges over navigable waters, and by the seventh section of the Act of September 19, 1890 (26 Stat. at L. 426, 454), it is made unlawful to begin the construction of any bridge over navigable waters, until the location and plan of such bridge have been approved by the Secretary of War, who has also been in frequent instances authorized to regulate the tolls upon such bridges, where they connected two states. So, too, in *Wiggins Ferry Co. v. East St. Louis*, 107 U. S. 365 [27: 419], it was held that a state had the power to impose a license fee, either directly or through one of its municipal corporations, upon ferry keepers living in the state, for boats which they owned and used in conveying from a landing in the state passengers and goods across a navigable river to another state. It was said that "the levying of a tax upon vessels or other watercraft, or the exaction of a license fee by the state within which the property subject to the exaction has its *situs*, is not a regulation of commerce within the meaning of the Constitution of the United States." Obviously the case does not touch the question here involved. Upon the other hand, however, it was held in *Moran v. New Orleans*, 112 U. S. 69 [18: 658], that a municipal ordinance of New Orleans imposing a license tax upon persons owning and running tow boats to and from the Gulf of Mexico was void as a regulation of commerce.

It is clear that the state of Kentucky, by the statute in question, attempts to reach out and secure for itself a right to prescribe a rate of toll applicable not only to persons crossing from Kentucky to Ohio, but from Ohio to Kentucky, a right which practically nullifies the corresponding right of Ohio to fix tolls from her own state. It is obvious that the bridge could not have been built without the consent of Ohio, since the north end of the bridge and its abutments rest upon Ohio soil; and without authority from that state to exercise the right of eminent domain, no land could have been acquired for that purpose. It follows that, if the state of Kentucky has the right to regulate the travel upon such bridge and fix the tolls, the state of Ohio has the same right, and so long as their action is harmonious there may be no room for friction between the states; but it would scarcely be consonant with good sense to say that separate regulations and separate tariffs may be adopted by each state (if the subject be one for state regulation), and made applicable to that portion of the bridge within its own territory. So far as the matter of construction is concerned, each state may proceed separately by authorizing the company to condemn land within its own territory, but in the operation of the bridge their action must be joint or great confusion is likely to result. It may be for the interest of Kentucky to add to its own population by encouraging residents of Cincinnati to purchase homes in Covington, and

to do this by fixing the tolls at such a rate as to induce citizens of Ohio to reside within her borders. It might be equally for the interest of Ohio to prescribe a higher rate of toll to induce her citizens to remain and fix their homes within their own state, and as persons living in one state and doing business in another would necessarily have to cross the bridge at least twice a day, the rates of toll might become a serious question to them. Congress, and Congress alone, possesses the requisite power to harmonize such differences, and to enact a uniform scale of charges which will be operative in both directions. The authority of the state, so frequently recognized by this court, to fix tolls for the use of wharves, piers, elevators, and improved channels of navigation, has always been limited to such as were exclusively within the territory of a single state, thus affecting interstate commerce but incidentally, and cannot be extended to structures connecting two states without involving a liability of controversies of a serious nature. For instance, suppose the agent of the Bridge Company in Cincinnati should refuse to recognize tickets sold upon the Kentucky side, enabling the person holding the ticket to pass from Ohio to Kentucky, it would be a mere *brutum fulmen* to attempt to punish such agent under the laws of Kentucky. Or, suppose the state of Ohio should authorize such agent to refuse a passage to persons coming from Kentucky, who had not paid the toll required by the Ohio statute; or that Kentucky should enact that all persons crossing from Kentucky to Ohio should be entitled to a free passage, and thus attempt to throw the whole burden upon persons crossing in the opposite direction. It might be an advantage to one state to make the charge for foot passengers very low and the charge for merchandise very high, and for the other side to adopt a converse system. One scale of charges might be advantageous to Kentucky in this instance, where the larger city is upon the north side of the river, while a wholly different system might be to her advantage at Louisville, where the larger city is upon the south side.

We do not wish to be understood as saying that, in the absence of Congressional legislation or mutual legislation of the two states, the company has the right to fix tolls at its own discretion. There is always an implied understanding with reference to these structures that charges shall be reasonable, and the question of reasonableness must be settled as other questions of a judicial nature are settled, by the evidence in the particular case. As was said in *Gloucester Ferry Co. v. Pennsylvania*, 114 U. S. 196, 217 [29: 158, 166], 1 Inters. Com. Rep.

382: "freedom from such imposition does not of course imply exemption from reasonable charges, as compensation for the carriage of persons, in the way of tolls or fares, or from the ordinary taxation to which other property is subjected, any more than like freedom of transportation on land implies such exemption. Reasonable charges for the use of property, either on water or land, are not an interference with the freedom of transportation between the states secured under the commercial power of Congress." Nor are we to be understood as passing upon the question whether, in the absence of legislation by Congress, the states may by reciprocal action fix upon a tariff which shall be operative upon both sides of the river.

We do hold, however, that the statute of the commonwealth of Kentucky in this case is an attempted regulation of commerce which it is not within the power of the state to make. As was said by *Mr. Justice Miller* in the *Wabash* case: "It is impossible to see any distinction in its effect upon commerce of either class between a statute which regulates the charges for transportation and a statute which levies a tax for the benefit of the state upon the same transportation."

The judgment of the court of appeals of Kentucky is, therefore, reversed, and the case remanded to that court for further proceedings in conformity with this opinion.

Mr. Chief Justice Fuller, Mr. Justice Field, Mr. Justice Gray and Mr. Justice White concurred in the judgment of reversal, for the following reasons:

The several states have the power to establish and regulate ferries and bridges, and the rates of toll thereon, whether within one state, or between two adjoining states, subject to the paramount authority of Congress over interstate commerce.

By the concurrent acts of the legislature of Kentucky in 1846, and of the legislature of Ohio in 1849, this bridge company was made a corporation of each state, and authorized to fix rates of toll.

Congress, by the Act of February 17, 1865, chap. 39, declared this bridge "to be, when completed, in accordance with the laws of the states of Ohio and Kentucky, a lawful structure;" but made no provision as to tolls; and thereby manifested the intention of Congress that the rates of toll should be established by the two states. 13 Stat. at L. 481.

The original acts of incorporation constituted a contract between the corporation and both states, which could not be altered by one state without the consent of the other.

COVINGTON & CINCINNATI ELEVATED RAILROAD & TRANSFER & BRIDGE COMPANY, *Plff. in Err.*,v.
COMMONWEALTH OF KENTUCKY.

(See S. C. 154 U. S. 224, 38 L. ed. 970.)

The Kentucky law of 1890 fixing the tolls and fare over the bridge connecting that state and Ohio and spanning the Ohio river at Cincinnati, is in conflict with the interstate commerce clause of the Constitution.

[No. 1043.]

Argued Jan. 26, 29, 30, 1894. Reargued April 25, 1894. Decided May 26, 1894.

IN ERROR to the Court of Appeals of the State of Kentucky, affirming the judgment of the criminal court of Kenton county, in that state, adjudging the defendant the above-named Bridge Company guilty, and imposing a fine for taking illegal tolls and fares on the bridge spanning the Ohio river, between the states of Kentucky and Ohio, contrary to a law of Kentucky. *Reversed, and case remanded for further proceedings.*

Messrs. Wm. H. Jackson and W. H. Wadsworth for plaintiff in error, on both arguments.
Messrs. Wm. Goebel and Wm. J. Hendrick, Atty. Gen. of Kentucky, for defendant in error, on both arguments.

Mr. Justice Brown delivered the opinion of the court:

This case differs from the last only in the fact that the plaintiff in error was not incorporated until 1886, and subsequently to a general law of the state declaring that all charters and grants of or to corporations shall be subject to amendment or repeal at the will of the legislature. Conceding that these words became a part of its charter, and hence that no contract was impaired by the legislation of 1890, such legislation is still open to the objection found to exist in the former case, that

it is in conflict with the interstate commerce clause of the Constitution.

The judgment of the court of appeals of Kentucky is, therefore, reversed, and the case remanded to that court for further proceedings.

Mr. Chief Justice Fuller, Mr. Justice Field, Mr. Justice Gray and Mr. Justice White concurred in the judgment of reversal, for the like reasons as in the case of *Covington & C. Bridge Co. v. Kentucky*, ante, p. 649.

J. W. BRENNAN, *Plff. in Err.*, v. CITY OF TITUSVILLE.

(See S. C. 153 U. S. 289, 38 L. ed. 719.)

1. A manufacturer of goods, which are legitimate subjects of commerce, who carries on his business of manufacturing in one state can send an agent into another state to solicit orders for the products of his manufactory without paying to the latter state a tax for the privilege of thus trying to sell his goods.
2. A regulation as to the manner of sale of subjects of commerce whether by sample or not, whether by exhibiting samples at a store or at a dwelling house, is a regulation of commerce.
3. Whatever may be the reason given to justify, or the power invoked to sustain the act of the state, if that act is one which trenches directly upon that which is within the exclusive jurisdiction of the national government, it cannot be sustained.
4. The police power cannot be set up to control the inhibitions of the Federal Constitution, or the powers of the United States government created thereby.
5. Nothing which is a direct burden upon interstate commerce can be imposed by the state without the assent of Congress.
6. A license tax required for the sale of goods is in effect a tax upon the goods themselves.
7. A license tax imposed by a state upon an agent of a citizen of another state for the privilege of selling his goods in the former state, is a direct burden on interstate commerce, and therefore beyond the power of the state.
8. No state can levy a tax on interstate commerce in any form, whether by way of duties laid on

the transportation of the subjects of that commerce, or on the receipts derived from that trans-

portation, or on the occupation or business of carrying it on.

[No. 902.]

Submitted Jan. 5, 1894. Decided April 30, 1894.

IN ERROR to the Supreme Court of the State of Pennsylvania, to review a judgment of that court, affirming the judgment of the court of common pleas of Crawford county, in that state, sentencing J. W. Brennan to pay a fine of \$25, and costs for the violation of an ordinance imposing a tax for a license for soliciting orders for and selling goods in the city of Titusville. *Reversed, and case remanded for further proceeding.*

Statement by Mr. Justice Brewer:

On May 13, 1890, plaintiff in error was convicted in the court of the city recorder of the city of Titusville, Pennsylvania, of a violation of an ordinance, entitled "An ordinance to provide for the levy and collection for general revenue purposes of annual license taxes in the city of Titusville," and sentenced to pay a fine of \$25 and costs. From that sentence he appealed to the court of common pleas of Crawford county. In that court the case was tried upon the following agreed statement of facts:

"1. J. A. Shephard is a manufacturer of picture frames and maker of portraits, residing in Chicago, in the state of Illinois, of which state he is a citizen and in which city he has his manufactory and place of business.

"2. In the prosecution of said business he employs agents who, under his direction, solicit orders for pictures and picture frames in the state of Pennsylvania and in other states of the Union, by going personally to residents and citizens of said state of Pennsylvania and other states and exhibiting samples of his pictures and frames, going, when necessary, from house to house in said state of Pennsylvania and other states.

"3. The defendant, J. W. Brennan, was an agent of the said J. A. Shephard, employed by him to travel and solicit orders for said pictures and frames in the manner stated, upon a salary and also upon commission upon the amount of his sales, at the time of his arrest, May 25, 1889, upon a warrant issued by the authorities of the city of Titusville, in the state of Pennsylvania.

"4. Upon receiving orders for pictures and picture frames, the agents of the said J. A. Shephard forwarded the same to him at Chicago, in the state of Illinois, where the goods were made, and from there shipped by said J. A. Shephard to the purchasers in Titusville, in the state of Pennsylvania, by railroad freight and express, and the price of said goods was collected and forwarded by the express companies and sometimes by the agents to said Shephard, at Chicago, in the state of Illinois. J. W. Brennan, the agent employed by J. A. Shephard, was engaged in conducting the business in the manner stated at the time of his arrest, May 25, 1889. The said J. W. Brennan, at the time of his arrest and before, had not been otherwise

employed than as stated, and was acting solely for the said Shephard.

"5. The city of Titusville had enacted an ordinance, in force at the date of the arrest of said J. W. Brennan, which in the 12th section thereof provides in words and figures as follows:

"That all persons canvassing or soliciting within said city orders for goods, books, paintings, wares, or merchandise of any kind, or persons delivering such articles under orders so obtained or solicited, shall be required to procure from the mayor a license to transact said business, and shall pay to the said treasurer therefor the following sums, according to the time for which said license shall be granted, viz: For one day, one dollar and fifty cents; one week, \$5.00; three months, \$10.00; one year, twenty-five dollars; provided, that the provisions of this ordinance shall not apply to persons selling by sample to manufacturers or licensed merchants or dealers residing and doing business in said city."

"And the said ordinance further provides, in the 18th section thereof, as follows:

"That any person or persons failing to obtain a license as required by this ordinance shall, upon conviction thereof before any magistrate, alderman, or justice of the peace of said city, forfeit and pay a fine not exceeding one hundred dollars, nor less than the amount required for a license to such person or persons, together with twenty per cent added as a penalty, with costs of suit; and in default of payment thereof shall undergo a confinement in the city or county prison for a period not exceeding ninety days, or perform hard labor on the streets or elsewhere in said city not exceeding such period."

"6. At the time of his arrest the defendant Brennan was not and had not been selling by sample to manufacturers or licensed merchants or dealers residing in said city of Titusville, and was not, within the provision of the 12th section of said ordinance, soliciting to such excepted persons.

"7. The defendant, J. W. Brennan, at the time of his arrest had not obtained a license as required by said ordinance, and had not paid to the treasurer of the city of Titusville the license fee provided by said ordinance.

"8. The defendant was arrested, tried, convicted, and sentenced to pay a fine of \$25 and costs of suit under said ordinance, on the 29th day of May, 1889, before W. M. Dame, city recorder of the city of Titusville.

"If the court should be of opinion upon the facts stated that the defendant, J. W. Brennan, was liable to take out a license and pay the license fee provided by said ordinance, then judgment to be entered for the plaintiff, the city of Titusville, for \$25 and costs of suit. If the court should be of opinion that said Brennan was not so liable then

judgment to be entered for the defendant, with costs of suit."

Upon these facts, on May 20, that court entered judgment against him for \$25 and costs. From that judgment he appealed to the supreme court of the state, which court, on October 5, 1891, affirmed the judgment. Thereupon he sued out a writ of error from this court.

Mr. Roger Sherman, for plaintiff in error:

Until the sale has been completed in the state to which the article has been imported, and it has thereby become mingled in the common mass of property within that state, there exists no power in the state, nor in any of her municipalities, to interfere, by any action with the free exportation of the commodity.

Robbins v. Shelby County Taxing Dist. 120 U. S. 497 (80: 697), 1 Inters. Com. Rep. 45; *Leisy v. Hardin*, 135 U. S. 100 (84: 128), 3 Inters. Com. Rep. 86.

The business carried on was strictly within the rule prohibiting state or municipal interference.

A state cannot impose taxes upon persons passing through the state, or coming into it merely for a temporary purpose, especially if connected with interstate or foreign commerce.

Rothermel v. Meyerle, 3 Inters. Com. Rep. 315, 9 L. R. A. 366, 136 Pa. 250-256.

This was an indirect tax upon Mr. Shephard's business and property.

Welton v. Missouri, 91 U. S. 275 (23: 347); *Walling v. Michigan*, 116 U. S. 446 (29: 691); *McCall v. California*, 136 U. S. 104 (84: 891), 3 Inters. Com. Rep. 181; *Minnesota v. Barber*, 136 U. S. 314 (84: 455), 3 Inters. Com. Rep. 185; *Patterson v. Kentucky*, 97 U. S. 501 (24: 1115); *Crowley v. Christensen*, 137 U. S. 86 (84: 620); *Brimmer v. Rebman*, 138 U. S. 78 (84: 862), 3 Inters. Com. Rep. 485.

Mr. George A. Chase, for defendant in error:

All rights are held subject to the police power of the state.

Boston Beer Co. v. Massachusetts, 97 U. S. 25 (24: 989.)

The police power extends to the protection of the lives, health and property of the citizens, and to the preservation of good order and the public morals. The legislature cannot, by any contract, divest itself of the power to provide for these objects.

Barbier v. Connolly, 113 U. S. 27 (28: 923).

The 14th Amendment was not designed to interfere with the power of the state, sometimes termed its "police power," to prescribe regulations to promote the health, peace, morals, education and good order of the people, and to legislate so as to increase the industries of the state, develop its resources and add to its wealth and prosperity.

Hayes v. Missouri, 120 U. S. 68 (30: 578); *Powell v. Pennsylvania*, 127 U. S. 678 (32: 253); *Munn v. Illinois*, 94 U. S. 118 (24: 77); *Pullman Palace Car Co. v. Pennsylvania*, 141 U. S. 18 (35: 613), 3 Inters. Com. Rep. 595.

The authority of the states over commerce not wholly internal, particularly in respect to the police power, and their power to tax the

subjects of interstate commerce is evidenced by the recent decisions of this court in several important cases.

Maine v. Grand Trunk R. Co. 142 U. S. 217 (35: 994), 3 Inters. Com. Rep. 807; *Philadelphia & S. Mail SS. Co. v. Pennsylvania*, 122 U. S. 326 (30: 1200); *Horn Silver Min. Co. v. New York*, 143 U. S. 805 (36: 164), 4 Inters. Com. Rep. 57; *Budd v. New York*, 143 U. S. 517 (36: 247), 4 Inters. Com. Rep. 45.

The fee required to be paid by the ordinance under which this suit originated is not a tax, in the common acceptance of that term, but a license fee.

Cooley, Taxn. 386; *Burroughs, Taxn.* § 79; *Cooley, Const. Lim.* 202, and note.

If it be a license fee or license tax it cannot be a regulation of commerce.

License Tax Cases, 73 U. S. 5 Wall. 471 (18: 500); *Osborne v. Mobile*, 83 U. S. 16 Wall. 479 (21: 470); *Ward v. Maryland*, 79 U. S. 12 Wall. 418 (20: 449).

It is competent for the legislature to grant a city or town power to require the payment of money as the condition of exercising particular employment. This is not in the nature of a tax which must be general, but of an excise on special vocations.

Dill. Mun. Corp. (4th ed.) § 357, note 3 and cases cited.

This power is recognized and affirmed by the supreme court of Pennsylvania in several cases.

Warren Borough v. Geer, 117 Pa. 207; *Com. v. Gardner*, 7 L. R. A. 666, 133 Pa. 284; *Titusville v. Brennan*, 14 L. R. A. 100, 143 Pa. 642.

Mr. Justice Brewer delivered the opinion of the court:

The question in this case is whether a manufacturer of goods, which are unquestionably legitimate subjects of commerce, who carries on his business of manufacturing in one state can send an agent into another state to solicit orders for the products of his manufactory without paying to the latter state a tax for the privilege of thus trying to sell his goods.

It is true, in the present case, the tax is imposed only for selling to persons other than manufacturers and licensed merchants; but if the state can tax for the privilege of selling to one class it can for selling to another, or to all. In either case it is a restriction on the right to sell, and a burden on lawful commerce between the citizens of two states. It is as much a burden upon commerce to tax for the privilege of selling to a minister as it is for that of selling to a merchant. It is true, also, that the tax imposed is for selling in a particular manner, but a regulation as to the manner of sale, whether by sample or not, whether by exhibiting samples at a store or at a dwelling house, is surely a regulation of commerce. It must be borne in mind that the goods which the defendant was engaged in selling, to wit, pictures and pictures frames, are open to no condemnation, and are unchallenged subjects of commerce. There is no charge of dealing in obscene or indecent pictures, or that the pictures, or the frames,

were in any manner dangerous to the health, morals, or general welfare of the community. It must also be borne in mind that the ordinance is not one designed to protect from imposition and wrong either minors, habitual drunkards, or persons under any other affliction or disability. There is no discrimination except between manufacturers and licensed merchants on the one hand, and the rest of the community on the other, and unless it be a matter of just police regulation to tax for the privilege of selling to manufacturers and merchants it cannot be to tax for the privilege of selling to the rest of the community. The same observation may also be made in respect to the places and manner in which the sales were charged to have been made. It is as much within the scope of the police power to restrain parties from going to a store or manufactory as from going to a dwelling-house for the purposes of making a sale. We do not mean to say that none of these matters to which we have referred are within the reach of the police power; but simply that the conditions on the one side are no more within its reach than those on the other, so that if, under the excuse of an exercise of the police power, this ordinance can be sustained, and sales in the manner therein named be restricted, by an equally legitimate exercise of that power almost any sale could be prevented.

But again, this license does not purport to be exacted in the exercise of the police but rather of the taxing power. The statute under which the ordinance in question was passed is found in Laws of Pennsylvania, 1874, pages 280 to 271. Clause 4 of section 20, page 289, grants authority "to levy and collect license tax on . . . hawkers, peddlers, . . . merchants of all kinds, . . . and regulate the same by ordinance."

The ordinance itself is entitled "An ordinance to provide for the levy and collection for general revenue purposes of annual license taxes in the city of Titusville," and the special section requires a license for transacting business, the license being graded in amount by the time for which it is obtained. This license, therefore, the failure to take out which is the offense complained of, and for which defendant was sentenced, is a license for "general revenue purposes" within the very declarations of the ordinance. Even if those declarations had been the reverse, and the license in terms been declared to be exacted as a police regulation, that would not conclude this question, for whatever may be the reason given to justify, or the power invoked to sustain the act of the state, if that act is one which trenches directly upon that which is within the exclusive jurisdiction of the national government, it cannot be sustained. Thus, in *New Orleans Gas Light Co. v. Louisiana Light & H. P. & Mfg. Co.* 115 U. S. 650, 661 [29: 516, 520], this court, by Mr. Justice Harlan, said:

"Definitions of the police power must, however, be taken, subject to the condition that the state cannot, in its exercise, for any purpose whatever, encroach upon the powers of the general government, or rights granted or secured by the supreme law of the land."

4 INTER 8.

"Illustrations of interference with the rightful authority of the general government by state legislation which was defended upon the ground that it was enacted under the police power, are found in cases where enactments concerning the introduction of foreign paupers, convicts, and diseased persons, were held to be unconstitutional, as conflicting, by their necessary operation and effect, with the paramount authority of Congress to regulate commerce with foreign nations, and among the several states. In *Henderson v. Wickham*, 92 U. S. 259 [23: 543], the court, speaking by Mr. Justice Miller, while declining to decide whether in the absence of action by Congress, the states can, or how far they may, by appropriate legislation protect themselves against actual paupers, vagrants, criminals, and diseased persons, arriving from foreign countries, said, that no definition of the police power, and 'no urgency for its use can authorize a state to exercise it in regard to a subject-matter which has been confided exclusively to the discretion of Congress by the Constitution.' (p. 271.) *Chy Lung v. Freeman*, 92 U. S. 275 [23: 550]. And in *Hannibal & St. J. R. Co. v. Huse*, 95 U. S. 465 [24: 527], Mr. Justice Strong, delivering the opinion of the court said that 'the police power of a state cannot obstruct foreign commerce or interstate commerce beyond the necessity for its exercise; and, under color of it, objects not within its scope cannot be secured at the expense of the protection afforded by the Federal Constitution.'"

In *Walling v. Michigan*, 116 U. S. 446, 460 [29: 691, 695], in the opinion delivered by Mr. Justice Bradley, it was said: "The police power cannot be set up to control the inhibitions of the Federal Constitution, or the powers of the United States government created thereby."

In *Leisy v. Hardin*, 135 U. S. 100, 108 [34: 128, 132], 8 Inters. Com. Rep. 36, Mr. Chief Justice Fuller commenced the opinion of the court with this general statement of the law applicable to questions of this kind:

"The power vested in Congress 'to regulate commerce with foreign nations, and among the several states, and with the Indian tribes,' is the power to prescribe the rule by which that commerce is to be governed, and is a power complete in itself, acknowledging no limitations other than those prescribed in the Constitution. It is coextensive with the subject on which it acts and cannot be stopped at the external boundary of a state, but must enter its interior and must be capable of authorizing the disposition of those articles which it introduces, so that they may become mingled with the common mass of property within the territory entered. *Gibbons v. Ogden*, 22 U. S. 9 Wheat. 1 [6: 23]; *Brown v. Maryland*, 25 U. S. 12 Wheat. 419 [6: 678]."

"And while, by virtue of its jurisdiction over persons and property within its limits, a state may provide for the security of the lives, limbs, health and comfort of persons and the protection of property so situated, yet a subject-matter which has been confided exclusively to Congress by the Constitution

is not within the jurisdiction of the police power of the state, unless placed there by congressional action."

And, in the still later case of *Crutcher v. Kentucky*, 141 U. S. 47, 59 [35: 649, 652], Mr. Justice Bradley referred to the matter in these words:

"But the main argument in support of the decision of the court of appeals is that the act in question is essentially a regulation made in the fair exercise of the police power of the state. But it does not follow that everything which the legislature of a state may deem essential for the good order of society and the well-being of its citizens can be set up against the exclusive power of Congress to regulate the operations of foreign and interstate commerce."

So in the case of *Minnesota v. Barber*, 136 U. S. 313 [34: 455], 3 Inters. Com. Rep. 185, in which a law of the state of Minnesota, ostensibly a law for inspection of meats, was declared unconstitutional, the court distinguished in the opinion by Mr. Justice Harlan between that which is mere inspection and in the legitimate exercise of the police power, and that which, under the guise of inspection, is a direct burden upon and obstruction to interstate commerce. Very similar to this was the case of *Brimmer v. Rebmam*, 138 U. S. 78 [34: 862], 3 Inters. Com. Rep. 485, in which also an inspection statute of the state of Virginia was set aside for the same reason.

Because a license may be required in the exercise of the police power it does not follow that every license rests for its validity upon such police power. A state may legitimately make a license for the privilege of doing a business one means of taxation, and that such was the purpose of this ordinance is obvious, not merely from the fact that in the title it is declared to be for "general revenue purposes," but also from the further fact that, so far as we are informed by any quotations from or references to any part of the ordinance, there is no provision for any supervision, control, or regulation of any business for which by the ordinance a license is required. In other words, so far as this record discloses, this ordinance sought simply to make the various classes of business named therein pay a certain tax for the general revenue of the city.

Even if it be that we are concluded by the opinion of the supreme court of the state that this ordinance was enacted in the exercise of the police power, we are still confronted with the difficult question as to how far an act held to be a police regulation, but which in fact affects interstate commerce, can be sustained. It is undoubtedly true that there are many police regulations which do affect interstate commerce, but which have been and will be sustained as clearly within the power of the state; but we think it must be considered, in view of a long line of decisions, that it is settled that nothing which is a direct burden upon interstate commerce can be imposed by the state without the assent of Congress, and that the silence of Congress in respect to any matter of interstate commerce is equivalent to a declaration on its part that it should be absolutely free.

4 INTER S.

That this license tax is a direct burden on interstate commerce is not open to question. In the early and leading case of *Brown v. Maryland*, 25 U. S. 12 Wheat. 419, 444 [6: 678, 687], in which a state law requiring an importer to take out a license and pay \$50 before he should be permitted to sell a package of imported goods, was adjudged in conflict with the commerce clause in the national Constitution. Chief Justice Marshall said:

"But if it should be proved that a duty on the article itself would be repugnant to the Constitution, it is still argued that this is not a tax upon the article, but on the person. The state, it is said, may tax occupations, and this is nothing more."

"It is impossible to conceal from ourselves that this is varying the form without varying the substance. It is treating a prohibition which is general, as if it were confined to a particular mode of doing the forbidden thing. All must perceive that a tax on the sale of an article, imported only for sale, is a tax on the article itself. . . . So a tax on the occupation of an importer is, in like manner, a tax on importation. It must add to the price of the article, and be paid by the consumer, or by the importer himself, in like manner as a direct duty on the article itself would be made."

In *Welton v. Missouri*, 91 U. S. 275, 278 [23: 347, 348], Mr. Justice Field said:

"Where the business or occupation consists in the sale of goods, the license tax required for its pursuit is in effect a tax upon the goods themselves."

In *Leloup v. Mobile*, 137 U. S. 640, 645 [32: 311, 313], 2 Inters. Com. Rep. 134, are these words from Mr. Justice Bradley:

"Of course, the exaction of a license tax as a condition of doing any particular business, is a tax on the occupation; and a tax on the occupation of doing a business is surely a tax on the business."

It is clear, therefore, that this license tax is not a mere police regulation, simply inconveniencing one engaged in interstate commerce, and so only indirectly affecting the business, but is a direct charge and burden upon that business; and if a state may lawfully exact it it may increase the amount of the exaction until all interstate commerce in this mode ceases to be possible. And notwithstanding the fact that the regulation of interstate commerce is committed by the Constitution to the United States, the state is enabled to say that it shall not be carried on in this way, and to that extent to regulate it.

These questions of interference by state regulations with interstate commerce have been frequently before this court, and it may not be unwise to examine a few of them. *Welton v. Missouri*, 91 U. S. 275 [23: 347], presented these facts: Welton was indicted and convicted for acting as a peddler under a statute defining a peddler to be one "going from place to place to sell" goods not the growth, produce, or manufacture of the state, and prohibiting any one from peddling without a license. The conviction was set aside by this court. It is true that the case turned largely upon the act of discrimination

between products of other states and those of Missouri, but nevertheless the decision is an adjudication that the imposition of a license tax on the peddling of goods is a regulation of commerce.

Robbins v. Shelby County Taxing Dist. 120 U. S. 489 [90: 694], 1 Inters. Com. Rep. 45, was a case closely in point. Robbins was engaged in soliciting in the city of Memphis, Tenn., the sales of goods for a Cincinnati firm, exhibiting samples for the purpose of effecting such sales, his employment being that which is usually denominated that of a drummer. This business was declared by a statute of Tennessee to be a privilege for which a license tax was required. Robbins was convicted of a violation of that statute. The statute made no discrimination between those who represented business houses out of the state and those representing like houses within the state. There was, therefore, no element of discrimination in the case, but, nevertheless, the conviction was set aside by this court on the ground that whatever the state might see fit to enact with reference to a license tax upon those who acted as drummers for houses within the state, it could not impose upon those who acted as drummers for business houses outside of the state (and who were, therefore, engaged in interstate commerce) any burden by way of a license tax. The opinion by *Mr. Justice Bradley* is elaborate and enters fully into a discussion of the question, citing many authorities. It affirms in the strongest language the exclusive power of Congress over interstate commerce; that its failure to make express regulations indicates its will that the subject shall be left free from any restrictions or impositions, and that whatever may be the extent to which the police power of the state can go, it cannot go so far as to uphold any regulations directly affecting interstate commerce.

In the case of *Leloup v. Mobile*, 127 U. S. 640 [32: 311], 2 Inters. Com. Rep. 184, a license tax sought to be imposed by the state upon a telegraph company engaged in interstate commerce, was declared beyond the powers of the state.

Asher v. Texas, 128 U. S. 129 [32: 868], 2 Inters. Com. Rep. 241. In that case, a statute requiring from "every commercial traveler, drummer, salesman, or solicitor of trade, by sample or otherwise, an annual occupation tax of \$35" was declared inoperative so far as it affected one soliciting orders for a business house in another state, and the case of *Robbins v. Shelby County Taxing Dist.* was expressly reaffirmed.

The same doctrine was applied in *Stoutenburgh v. Hennick*, 129 U. S. 141 [32: 637], to the case of an agent of a Maryland business house soliciting orders in the District of Columbia without having taken out a license there, as required by an act of the legislative assembly of the District of Columbia.

In *Lyng v. Michigan*, 185 U. S. 161, 166 [34: 150, 153], 8 Inters. Com. Rep. 143, it was said:

"We have repeatedly held that no state has the right to lay a tax on interstate commerce in any form, whether by way of duties

laid on the transportation of the subjects of that commerce, or on the receipts derived from that transportation, or on the occupation or business of carrying it on, for the reason that such taxation is a burden on that commerce, and amounts to a regulation of it, which belongs solely to Congress."

In *McCall v. California*, 186 U. S. 104 [34: 391], 8 Inters. Com. Rep. 181, it appeared that McCall was an agent in San Francisco, California, engaged in soliciting business for an Eastern railroad corporation, but not engaged in selling tickets for that company, or receiving, or paying out, money on its account, yet it was held that he was engaged in interstate commerce, and the license tax imposed upon him for the privilege of doing such business was unconstitutional. *Mr. Justice Lamar*, reviewing the prior cases and replying to the objection that this only indirectly affected the commerce of the road, said (p. 111 [393]):

"The test is, was this business a part of the commerce of the road? Did it assist, or was it carried on with the purpose to assist, in increasing the amount of passenger traffic on the road? If it did, the power to tax it involves the lessening of the commerce of the road to an extent commensurate with the amount of business done by the agent."

In *Orutcher v. Kentucky*, 141 U. S. 47 [35: 649], an act of the state of Kentucky which forbade the agent of an express company, not incorporated by the laws of that state, from carrying on business without first obtaining a license from the state, and, as preliminary thereto, that he should satisfy the auditor of the state that the company he represented was possessed of an actual capital of at least \$150,000, was held to be a regulation of commerce and invalid. *Mr. Justice Bradley*, speaking for the court, observed (p. 61 [658]):

"The character of police regulation, claimed for the requirements of the statute in question, is certainly not such as at give them a controlling force over the regulations of interstate commerce which may have been expressly or impliedly adopted by Congress, or such as to exempt them from nullity when repugnant to the exclusive power given to Congress in relation to that commerce. This is abundantly shown by the decisions to which we have already referred, which are clear to the effect that neither licenses nor indirect taxation of any kind, nor any system of state regulation, can be imposed upon interstate any more than upon foreign commerce; and that all acts of legislation producing any such result are, to that extent, unconstitutional and void."

Within the reasoning of these cases it must be held that the license tax imposed upon the defendant was a direct burden on interstate commerce, and was, therefore, beyond the power of the state.

The case of *Picklen v. Shelby County Taxing Dist.* 145 U. S. 1 [36: 601], 4 Inters. Com. Rep. 79, is no departure from the rule of decision so firmly established by the prior cases. At least, no departure was intended, though as shown by the division in the court, and by the dissenting opinion of *Mr. Justice Harlan*,

the case was near the boundary line of the state's power. In that case the plaintiffs were in a general commission business, not acting for any particular firm within or without the state. Of the power of a state to impose a license tax upon such a general business there can be no question. The license required by the statute was \$50 per annum, plus .10 on every \$100 of capital invested, or, if no capital was invested, 24 per cent on the gross yearly commissions, and at the time of taking out the license the licensees were required to give bond to make return and pay such 24 per cent at the end of the year. The plaintiffs, for the year 1887, paid each the sum of \$50, and having no capital, executed bonds for the return and payment of the 24 per cent. At the end of the year 1887 they failed to make such return and payment, and the authorities refused to issue new licenses for the succeeding year until that was done. Plaintiffs' contention was that, as to one of them, all, and as to the others, most, of their commissions were received on sales of goods forwarded by non-resident parties. On that ground they refused to perform the stipulation of their bonds. It was held that the tax was an entirety, and was not affected by the variable and adventitious results of business from year to year. It could hardly be contended that if the license tax exacted in advance for the privilege of engaging in such business was a fixed sum, a party paying the tax could, on a failure to secure and do any business, recover the tax so paid, for the tax is not for the business done, but for the privilege of engaging in business. So, when the plaintiffs in that case applied for their licenses at the beginning of the year they assumed the whole liability imposed by the state. That all of it was not paid at once did not affect

the measure of liability. Suppose the tax, a fixed sum, had been payable one half at the commencement and the other half at the close of the year, would it be thought that, having paid the first half at the commencement of the year, they could resist payment of the second half on the ground that half of their commissions were received on goods shipped from outside the state? In other words, the tax imposed was for the privilege of doing a general commission business within the state, and whatever were the results peculiarly to the licensees, or the manner in which they carried on business, the fact remained unchanged that the state had, for a stipulated price, granted them this privilege. It was thought by a majority of the court that to release them from the obligations of their bonds on account of the accidental results of the year's business was refining too much, and that the plaintiffs who had sought the privilege of engaging in a general business should be bound by the contracts which they had made with the state therefor. In the opinion in that case, by the Chief Justice, the authorities which are referred to in this opinion, were cited, and the general rule was announced as is here stated. We only refer thus at length to that case to show the distinction between it and this case, and to notice that in the opinion was reaffirmed the proposition that "no state can levy a tax on interstate commerce in any form, whether by way of duties laid on the transportation of the subjects of that commerce, or on the receipts derived from that transportation, or on the occupation or business of carrying it on."

For these reasons the judgment of the supreme court of the state of Pennsylvania is reversed, and the case remanded for further proceedings in conformity with this opinion.

OSSIAN D. ASHLEY ET AL., *Pliffs. in Err.*,

v.

DANIEL J. RYAN, Secretary of State of the State of Ohio.

(See S. C. 153 U. S. 496, 38 L. ed. 778.)

1. A writ of error to a state court brings before this court only the Federal questions in the case.
2. A state, in granting a corporate privilege to its own citizens, or, what is equivalent thereto, in permitting a foreign corporation to become one of the constituent elements of a consolidated corporation organized under its laws, may impose such conditions as it deems proper, and the acceptance of the franchise in either case implies a

submission to the conditions without which the franchise could not have obtained.

3. A state has the right to determine upon what conditions its laws as to the consolidation of corporations may be availed of.
4. The exaction of a charge by a state for the filing of articles of consolidation of several railroad companies forming a connecting line, only one of which is a corporation of the state as a condition

NOTE.—As to jurisdiction of Federal over state courts: necessity of Federal question; what constitutes Federal question, see note to Hamblin v. Western Land Co. 37: 287.

As to corporations, when deemed citizens or persons, see note to United States v. Amedy, 6: 502.

As to when consolidation dissolves former companies, see note to Shields v. Ohio, 24: 357.

As to forfeiture of franchises of, for misuse, nonuse, or abuse, see note to Chicago L. Ins. Co. v. Needles, 28: 1084.

As to when taxation of stock or shares in corpora-

tion impairs obligation of contracts, see note to Providence Bank v. Billings, 7: 980.

As to jurisdiction in the United States Supreme Court, where Federal question arises, or where are drawn in question statutes, treaty or Constitution, see notes to Martin v. Hunter, 4: 97, Matthews v. Zane, 2: 654, and Williams v. Norris, 6: 571.

As to jurisdiction of United States Supreme Court to declare state law void as in conflict with state constitution; to review decrees of state courts as to construction of state laws, see note to Hart v. Lamphire, 7: 679, and to Commercial Bank of Cincinnati v. Buckingham, 12: 160.

Mem.—References in note are to U. S. Repts. L. ed.

imposed by the state upon the taking of corporate being or the exercise of corporate franchises, constitutes no tax upon interstate commerce, or the right to carry on the same, or the instruments thereof, and its enforcement involves no attempt on the part of the state to extend its taxing power beyond its territorial limits.

5. The law of Ohio requiring a corporation to pay

the secretary of state for filing articles of agreements of consolidation of corporations a percentage on the capital stock of the new consolidated corporation created by such articles, is valid and constitutional when applied to the consolidation of foreign corporations with a domestic corporation of the state forming a continuous line of railroad through several states.

[No. 888.]

Argued and Submitted April 26, 1894. Decided May 14, 1894.

IN ERROR to the Supreme Court of the State of Ohio, to review a judgment of that court, affirming the judgment of the Circuit Court of Franklin County, Ohio, affirming the judgment of the Court of Common Pleas of said county, sustaining a demurrer to the petition in and dismissing an action brought by Oestian D. Ashley *et al.*, plaintiffs, against Daniel J. Ryan, secretary of the state of Ohio, defendant, to restrain the defendant from paying into the treasury of the state certain moneys, paid him as a fee for filing in his office articles of agreement of consolidation of certain railway companies which the plaintiffs claim had been wrongfully exacted of them, and which had been paid under protest, and also to recover the moneys so paid for said fee, over and above \$700. *Affirmed.*

Statement by Mr. Justice White:

The Wabash, St. Louis & Pacific Railroad Company, which owned and operated lines running through the states of Ohio, Indiana, Illinois, Missouri, and Michigan, having defaulted in the payment of interest on its bonds, foreclosure proceedings were commenced in the Federal courts for the sale of its property. Subsequently a committee was entrusted with the duty of buying in the property. After purchase by the committee the property in the several states was transferred to companies incorporated in those states. The following were the companies thus organized, and to whom the necessary transfers were respectively made:

In Ohio: The Toledo & Western; capital stock, \$700,000.

In Michigan: The Detroit & State Line Wabash; capital stock, \$300,000.

In Indiana: The Wabash Eastern, of Indiana; capital stock, \$9,000,000.

In Illinois: The Wabash Eastern, of Illinois; capital stock, \$12,000,000.

In Missouri: The Wabash Western; capital stock, \$30,000,000.

Thereafter these several companies were consolidated into one. Section 1486 of the Revised Statutes of Ohio contains, among other provisions, the following:

"The secretary of state shall hereafter charge and collect the following fees for official services:

"1. For filing the articles of incorporation of any corporation whose capital stock is ten thousand dollars or under, ten dollars; of a corporation whose capital stock is over ten thousand dollars, one tenth of one per cent upon the authorized capital stock of such corporation.

4 INTER S.

"2. For filing a certificate of increase of the capital stock of any corporation having a capital stock where the amount of the increase is ten thousand dollars or under, ten dollars; where the amount of increase is over ten thousand dollars, one tenth of one per cent upon the proposed amount of increased capital.

"3. For filing articles of agreements of consolidation of corporations having a capital stock, the following fees shall be collected by the secretary of state: Said articles of agreements of consolidation shall be treated as the articles of incorporation of the new consolidated corporations created by such articles or agreements of consolidation, and the fees for filing such articles or agreements of consolidation shall be the same in each case as is hereinbefore set forth for the filing of articles of incorporation of a corporation having the same amount of capital stock, as is provided for by the articles or agreements of consolidation for the new consolidated corporation, created by any such articles or agreement of consolidation; and in fixing the amount of such fees, no credit shall be allowed for fees previously paid by any of the constituent corporations, parties to such consolidation, but the same shall be determined solely by the amount of capital stock of the new corporation created by such articles or agreements of consolidation."

By another provision of the Revised Statutes of Ohio, the fees to be collected under the foregoing law were required to be paid by the secretary of state into the treasury.

The plaintiffs in error presented their articles of consolidation, for filing, to the secretary of state, and tendered \$700, that being one tenth of one per cent on the capital stock of the Toledo & Western Railroad, the only Ohio corporation which had entered into the consolidation. The secretary refused to file the proffered articles for that amount, and demanded \$52,000, or one tenth of one per cent of the par value of the entire stock of the consolidated corporation. This amount was paid under protest, and suit was at once brought to recover all the excess paid over and above the \$700 originally tendered, upon the ground that such excess had been collected without warrant of law; that it constituted a tax for the general purposes of revenue, and, therefore, its exaction was contrary to the constitution and laws of the state of Ohio; and, moreover, that its enforcement would violate the Constitution of the United States, because it would be an attempt on the part of the state of Ohio to lay a burden on interstate commerce, or the instruments of such commerce

and to give an extraterritorial force to its taxing power.

Pending the controversy, an injunction issued restraining the secretary of state from covering into the state treasury the sum which had been paid him under protest. The cause was ultimately taken to the supreme court of the state of Ohio, and by that court the judgment which maintained the validity of the charge was affirmed. The plaintiffs in error thereupon brought the cause here for review.

Mr. Henry Crawford, for plaintiffs in error:

Illegal fees and taxes paid under compulsion, can be recovered back.

Baker v. Cincinnati, 11 Ohio St. 534.

A payment may be, under circumstances, involuntary and an action brought to recover the money, when the position or interests of the party are such as to require from another the performance of a duty enjoined by law and he is illegally compelled to pay money to induce such performance.

Stephan v. Daniels, 27 Ohio St. 527; *Western U. Teleg. Co. v. Mayer*, 28 Ohio St. 521; *Wilson v. Felton*, 40 Ohio St. 306.

Taxes illegally assessed may always be recovered back, if the collector understands from the payer that the tax is regarded as illegal and that suit will be instituted to compel the refunding.

Erskine v. Van Arsdale, 82 U. S. 15 Wall. 75 (21: 63); *Shelton v. Platt*, 139 U. S. 595 (35: 276); *Harmon v. Chicago*, 147 U. S. 896 (37: 216).

The law under which the charge was exacted is not a police regulation, but an attempted exercise of the taxing power of the state, and its construction and validity must be adjudged exclusively on that theory.

Marmet v. State, 45 Ohio St. 68; *State v. Hipp*, 38 Ohio St. 199; *Adler v. Whitbeck*, 44 Ohio St. 539; *Pittsburg, C. & St. L. R. Co. v. State*, 49 Ohio St. 189; *United States v. Vassar ("License Tax Cases")* 72 U. S. 5 Wall. 462 (18: 497); *Southern SS. Co. v. New Orleans Port Wardens*, 78 U. S. 6 Wall. 81 (18: 749); *Mays v. Cincinnati*, 1 Ohio St. 268; *Cincinnati v. Bryson*, 15 Ohio, 625; *Ryall v. Virginia*, 116 U. S. 572 (29: 785).

This rule holds good as to exercise or franchise charges.

Home Ins. Co. v. New York, 134 U. S. 599 (33: 1029); *Horn Silver Min. Co. v. New York*, 143 U. S. 305 (36: 164), 4 Inters. Com. Rep. 57.

This court should limit the scope of the law and construe it not to authorize the imposition of a unit franchise or organization tax, rated upon the aggregate capital stock of combined domestic and foreign corporations.

Pennoyer v. Neff, 95 U. S. 714 (24: 565); *Pana v. Boulder*, 107 U. S. 529 (27: 424); *Gormley v. Clark*, 134 U. S. 338 (33: 909); *Wilson v. Seligman*, 144 U. S. 41 (36: 838); *United States v. Wigglesworth*, 2 Story, 369; *Cincinnati, N. O. & T. P. R. Co. v. Kentucky ("Kentucky R. Tax Cases")* 115 U. S. 334 (29: 417); *Marye v. Baltimore & O. R. Co.* 127 U. S. 117 (32: 94); *Lee v. Sturges*, 2 L. R. A. 556, 46 Ohio St. 167; *State Treasurer v. Auditor General*, 46 Mich. 224; *Chicago & N. W. R. Co. v. Auditor General*, 53 4 INTER S.

Mich. 79; People v. New York, C. & St. L. R. Co. 15 L. R. A. 82, 129 N. Y. 474.

Under the law as construed by the state court the tax under challenge is in part illegal because it is a unit charge mainly laid upon incorporations and franchises not created or granted by Ohio, or upon business operations carried on outside its boundaries.

Exchange Bank of Columbus v. Hines, 3 Ohio St. 1; *Weston v. Charleston*, 27 U. S. 2 Pet. 406 (7: 487); *St. Louis v. Wiggins Ferry Co.* 78 U. S. 11 Wall. 423 (20: 192); *People v. Equitable Trust Co.* 96 N. Y. 388; *Northern Cent. R. Co. v. Jackson*, 74 U. S. 7 Wall. 262 (19: 88); *Cleveland, P. & A. R. Co. v. Pennsylvania ("State Tax on Foreign Held Bonds")* 82 U. S. 15 Wall. 300 (21: 179); *Wisconsin Cent. R. Co. v. Price County*, 133 U. S. 504 (33: 690); *California v. Central Pac. R. Co.* 127 U. S. 41 (32: 157), 2 Inters. Com. Rep. 153; *Muller v. Docs*, 94 U. S. 447 (24: 208).

The assessment of public charges against this class of corporations has always been levied only upon the state's proportional share of the whole property, franchise, stock or earnings.

State v. Metz, 32 N. J. L. 199; *Pittsburg, Ft. W. & O. R. Co. v. Com.* 66 Pa. 73, 5 Am. Rep. 344; *Minot v. Philadelphia, W. & B. R. Co. ("Delaware R. Tax")* 85 U. S. 18 Wall. 206 (21: 888); *Erie R. Co. v. Pennsylvania*, 88 U. S. 21 Wall. 492 (22: 595); *Taylor v. Scoor ("State R. Tax Cases")* 92 U. S. 610 (23: 672); *Western U. Teleg. Co. v. Texas*, 105 U. S. 460 (26: 1067); *Western U. Teleg. Co. v. Atty. Gen.* 125 U. S. 530 (31: 790); *Pullman Palace Car Co. v. Pennsylvania*, 141 U. S. 18 (35: 613), 3 Inters. Com. Rep. 595; *Horn Silver Min. Co. v. New York*, 143 U. S. 305 (36: 164), 4 Inters. Com. Rep. 57; *Maine v. Grand Trunk R. Co.* 142 U. S. 217 (35: 994), 8 Inters. Com. Rep. 807; *Sebastian v. Covington & C. Bridge Co.* 31 Ohio St. 451; *Covington & C. Bridge Co. v. Mayer*, 31 Ohio St. 317.

Upon the theory that the entire organization tax of \$52,000 was assessed only upon the Ohio constituent of the interstate copartnership, the exaction plainly imposes a unequal and discriminating burden in violation of the 14th Amendment.

Portland Bank v. Apthorp, 12 Mass. 262; *Oliver v. Washington Mills*, 11 Allen, 279; *Fields v. Highland County Comrs.* 36 Ohio St. 476; *Youngblood v. Seaton*, 32 Mich. 406, 20 Am. Rep. 654; *McMahon v. Palmer*, 102 N. Y. 188, 55 Am. Rep. 796; *Boyer v. Boyer*, 113 U. S. 689 (28: 1069); *People v. Albany Ins. Co.* 93 N. Y. 460; *Com. v. People's Five Cent Sav. Bank*, 5 Allen, 428; *Home Ins. Co. v. New York*, 134 U. S. 599 (33: 1029); *Whitbeck v. Mercantile Nat. Bank of Cleveland*, 127 U. S. 193 (32: 118); *Yick Wo v. Hopkins*, 118 U. S. 357 (30: 221); *Santa Clara County v. Southern Pac. R. Co.* 9 Sawy. 165, 18 Fed. Rep. 385; *Cummings v. Merchants Nat. Bank*, 101 U. S. 158 (25: 906); *New York v. Weaver*, 100 U. S. 539 (25: 705); *Cooley*, Taxn. 128.

The tax as laid is in principle and result an unlawful interference with interstate commerce and necessarily imposes a burden upon national instrumentalities engaged therein.

Philadelphia & R. R. Co. v. Pennsylvania ("State Freight Tax") 82 U. S. 15 Wall. 273

(21: 160); *Maine v. Grand Trunk R. Co.* 142 U. S. 217 (35: 994), 3 Inters. Com. Rep. 807; *Brown v. Maryland*, 25 U. S. 12 Wheat. 444 (6: 687); *Cook v. Pennsylvania*, 97 U. Pennsylvania*, 141 U. S. 18 (35: 613), 3 Inters. Com. Rep. 595; *Maine v. Grand Trunk R. Co.* 142 U. S. 217 (35: 994), 3 Inters. Com. Rep. 807; *Pacific Exp. Co. v. Seibert*, 142 U. S. 354 (35: 1040), 3 Inters. Com. Rep. 810.

Mr. Justice White delivered the opinion of the court:

With the question whether the sum paid was authorized by the Ohio statutes, or constituted a fee, a license, or a tax, under the Ohio laws and constitution, we are not concerned. The writ of error brings before us only the Federal question. *Watson v. Mercer*, 38 U. S. 8 Pet. 88 [8:876]; *Barber v. Connolly*, 118 U. S. 27 [28:928]. Nor does the determination of the Federal question render it necessary to define the nature of the charge imposed, for, whether this charge be viewed as a tax, a license, or a fee, if its exaction violated the interstate commerce clause of the Constitution of the United States, or involved the assertion of the right of a state to exercise its powers of taxation beyond its geographical limits, it was void, whatever might be the technical character affixed to the exaction.

The purpose of the tender of the articles of consolidation to the secretary of state was to secure to the consolidated company certain powers, immunities, and privileges which appertain to a corporation under the laws of Ohio. The rights thus sought could only be acquired by the grant of the state of Ohio, and depended for their existence upon the provisions of its laws. Without that state's consent they could not have been procured. Ohio Rev. Stat. 3239, 3382, 3384b, amended by act of April 1, 1890, 87 Ohio Laws, 184. Hence, in seeking to file its articles of incorporation, the company was applying for privileges, immunities, and powers which it could by no means possess, save by the grace and favor of the constitution of the state of Ohio and the statutory provisions passed in accordance therewith. At the time the articles were presented for filing, the statute law of the state charged the parties with notice that the benefits which it was sought to procure could not be obtained without payment of the sum which the secretary of state exacted. As it was within the discretion of the state to withhold or grant the privilege of exercising corporate existence, it was, as a necessary result, also within its power to impose whatever conditions it might deem fit as pre-requisite to corporate life. The act of filing, constituting, as it did, a claim of a right to the franchise granted by the state law, carried with it a voluntary assumption of any burden with which the privilege was accompanied, and without which the right of corporate existence could not have been procured. We say voluntary assumption, because, as the claim to the franchise was voluntary, the assumption of the privilege which resulted from it partook necessarily of the nature of the claim for corporate existence. Having thus accepted the act of grace of the state and taken the advantages which sprang from it, the company cannot be permitted to hold on to the privilege or right granted, and at the same time repudiate the condition by the performance of which it could alone obtain the privilege which it sought.

That the right to be a state corporation depends solely upon the grace of the state, and is not a right inherent in the parties, is settled. Thus, in *California v. Central Pac. R. Co.* 127 U. S. 40 [32:157], 2 Inters. Com. Rep. 153, speaking through *Mr. Justice Bradley*, the court

said: "A franchise is a right, privilege, or power of public concern, which ought not to be exercised by private individuals at their mere will and pleasure, but should be reserved for public control and administration.

Under our system, their existence and disposal are under control of the legislative department of the government, and they cannot be assumed or exercised without legislative authority.

. . . No private person can take another's property, even for public use, without such authority; which is the same as to say, that the right of eminent domain can only be exercised by virtue of a legislative grant. This is a franchise. No persons can make themselves a body corporate and politic without legislative authority. Corporate capacity is a franchise. The list might be continued indefinitely."

In *Home Ins. Co. v. New York*, 134 U. S. 595 [38:1026], through *Mr. Justice Field*, we said: "The right or privilege to be a corporation, or to do business as such body, is one generally deemed of value to the corporation or it would not be sought in such numbers as at present. It is a right or privilege by which several individuals may unite themselves under a common name, and act as a single person with a succession of members, without dissolution or suspension of business and with a limited individual liability. The granting of such right or privilege rests entirely within the discretion of the state."

These citations only reiterate principles established beyond controversy by a series of decisions. *Bank of Augusta v. Earle*, 38 U. S. 13 Pet. 519 [10:274]; *Lafayette Ins. Co. v. French*, 59 U. S. 18 How. 404 [15:451]; *Paul v. Virginia*, 75 U. S. 8 Wall. 168 [19:357]; *Ducat v. Chicago*, 77 U. S. 10 Wall. 410 [19:972].

Nor is the question at issue affected by the fact that some of the constituent elements which entered into the consolidated company were corporations owning and operating property in another state. The power of corporations of other states to become corporations, or to constitute themselves a consolidated corporation under the Ohio statutes, and thus avail of the rights given thereby, is as completely dependent on the will of that state as is the power of its individual citizens to become a corporate body, or the power of corporations of its own creation to consolidate under its laws. *Bank of Augusta v. Earle*, and *Lafayette Ins. Co. v. French*, *supra*; *Paul v. Virginia*, 75 U. S. 8 Wall. 168, 181 [19:357, 360].

In the latter case, speaking through *Mr. Justice Field*, we observed: "Now a grant of a corporate existence is a grant of special privileges to the corporators, enabling them to act for certain designated purposes as a single individual and exempting them (unless otherwise specially provided) from individual liability. The corporation being the mere creation of local law, can have no legal existence beyond the limits of the sovereignty where created. As said by this court in *Bank of Augusta v. Earle*, 'It must dwell in the place of its creation, and cannot migrate to another sovereignty.' The recognition of its existence, even, by other states, and the enforcement of its contracts

made therein depend purely upon the comity of these states—a comity which is never extended where the existence of the corporation or the exercise of its powers are prejudicial to their interests or repugnant to their policy.

At the present day corporations are multiplied to an almost indefinite extent. There is scarcely a business pursued requiring the expenditure of large capital, or the union of large numbers, that is not carried on by corporations. It is not too much to say that the wealth and business of the country are to a great extent controlled by them. And if, when composed of citizens of one state, their corporate powers and franchises could be exercised in other states without restriction, it is easy to see that, with the advantages thus possessed, the most important business of those states would soon pass into their hands. The principal business of every state, would, in fact, be controlled by corporations created in other states."

It follows from these principles that a state, in granting a corporate privilege to its own citizens, or what is equivalent thereto, in permitting a foreign corporation to become one of the constituent elements of a consolidated corporation organized under its laws, may impose such conditions as it deems proper, and that the acceptance of the franchise in either case implies a submission to the conditions without which the franchise could not have obtained. In *Paul v. Virginia, supra*, the court said: "Having no absolute right of recognition in other states, but depending for such recognition and the enforcement of its contracts upon their assent, it follows, as a matter of course, that such assent may be granted upon such terms and conditions as those states may think proper to impose. They may exclude the foreign corporation entirely; they may restrict its business to particular localities, or they may exact such security for the performance of its contracts with their citizens as in their judgment will best promote the public interest."

In the case of the *Baltimore & O. R. Co. v. Maryland*, 88 U. S. 21 Wall. 456 [22: 678], considering a grant by the state of Maryland to a railroad company of a right to build a branch from Baltimore to Washington, upon condition that the company should pay semi-annually to the state one fifth of the amount received from the transportation of passengers over the road authorized, the court spoke as follows: "The state could have built the road itself and charged any rate it chose, and could thus have filled the coffers of its treasury without being questioned therefor. How does the case differ, in a constitutional point of view, when it authorized its private citizens to build the road and reserved for its own use a portion of its earnings? We are unable to see any distinction between the two cases. In our judgment there is no solid distinction. If the state, as a consideration of the franchise, had stipulated that it should have all the passenger money, and the corporation should have only the freight for the transportation of merchandise, and the corporation had agreed to those terms, it would have been the same thing. It was simply the exercise by the state of absolute control over its own property and preroga-

tives." And the contention that the charge imposed a burden upon interstate commerce was thus answered: "It may, incidentally, affect transportation. It is true; but so does every burden or tax imposed on corporations or persons engaged in that business. Such burdens, however, are imposed *discreto intuitu*, and in the exercise of an undoubted power. The state is conceded to possess the power to tax its corporations, and yet every tax imposed on a carrier corporation effects more or less the charges it is compelled to make upon its customers. So, the state has an undoubted power to exact a bonus for the grant of a franchise, payable in advance or *in futuro*; and yet that bonus will necessarily affect the charge upon the public which the donee of the franchise will be obliged to impose. The stipulated payment in this case, indeed, is nothing more or less than a bonus."

In *Ducat v. Chicago, supra*, the court said: "The only difference between the statute of Virginia and that of Illinois is that the latter is more onerous to the companies than the former. The difference is in degree, not in principle." That was a case in which an insurance company was not only required to comply with the general law of the state of Illinois, but also to pay a portion of its premium to the city of Chicago as a condition of doing business therein.

The case of *Philadelphia Fire Asso. v. New York*, 119 U. S. 110 [30: 842], involved the validity of a tax imposed by the state of New York on an insurance company which had been incorporated in Pennsylvania. Mr. Justice Blatchford, in delivering the opinion of the court said: "This Pennsylvania corporation came into the state of New York to do business by the consent of the state under this act of 1858, with a license granted for a year, and has received such license annually, to run for a year. It is within the state for any given year under such license, and subject to the conditions prescribed by statute. The state, having the power to exclude entirely, has the power to change the conditions of admission at any time, for the future, and to impose as a condition the payment of a new tax or a further tax as a license fee. If it imposes such license fee as a prerequisite for the future, the foreign corporation, until it pays such license fee, is not admitted within the state or within its jurisdiction. It is outside, at the threshold, seeking admission, with consent not yet given."

Indeed, the cases illustrating this doctrine are too numerous for review, and need only be referred to. *Society for Savings v. Coile*, 73 U. S. 6 Wall. 594 [18:897]; *Provident Inst. for Savings v. Massachusetts*, 73 U. S. 6 Wall. 611 [18:907]; *Hamilton Mfg. Co. v. Massachusetts*, 73 U. S. 6 Wall. 632 [18:904]; *Philadelphia & R. Co. v. Pennsylvania* ("State Tax on Railway Gross Receipts") 82 U. S. 15 Wall. 284 [21:164]; *Union Pac. R. Co. v. Peniston*, 85 U. S. 18 Wall. 5 [21: 787]; *Minot v. Philadelphia, W. & B. R. Co.* ("The Delaware R. Tax") 85 U. S. 18 Wall. 206 [21:888]; *Taylor v. Secor* ("State R. Tax Cases") 92 U. S. 575 [23:663]; *Philadelphia & S. M. S. Co. v. Pennsylvania*, 123 U. S. 326 [30:1200], 1 Inters. Com. Rep. 308; *California v. Central Pac. R. Co.* 127 U. S. 1 [32:150]; *Horns Ins. Co.*

v. *New York*, 184 U. S. 594 [88:1025]; *Maine v. Grand Trunk R. Co.* 142 U. S. 217 [85:994], 8 Inters. Com. Rep. 807.

The question here is not the power of the state of Ohio to lay a charge on interstate commerce, or to prevent a foreign corporation from engaging in interstate commerce within its confines, but simply the right of the state to determine upon what conditions its laws as to the consolidation of corporations may be availed of.

Considering as we do, that the payment of the charge was a condition imposed by the

state of Ohio upon the taking of corporate being or the exercise of corporate franchises, the right to which depended solely on the will of that state, and hence that liability for the charge was entirely optional, we conclude that the exaction constituted no tax upon interstate commerce, or the right to carry on the same, or the instruments thereof, and that its enforcement involved no attempt on the part of the state to extend its taxing power beyond its territorial limits.

Judgment affirmed.

NORMAN BRASS, *Pff. in Err.*,

v.

THE STATE OF NORTH DAKOTA *ex rel.* LOUIS W. STOESER.

(See S. C. 158 U. S. 391, 38 L. ed. 767.)

1. The law of North Dakota, of March 7, 1891, regulating grain warehouses and the weighing and handling of grain, etc., is constitutional. *Munn v. Illinois*, 94 U. S. 113 (24: 77) and *Budd v. New York*, 143 U. S. 517 (36: 247) followed.
2. The North Dakota law of March 7, 1891, is not unconstitutional, because it is applicable to the entire state, which is agricultural and is not restricted to large cities.
3. One who enters upon the business of elevating and storing the grain of other persons for profit in North Dakota, becomes subject to the stat-

utory regulations, although he also elevates and stores his own grain in the same warehouse.

4. The legislature of North Dakota, in regulating by a general law the business and charges of public warehousemen engaged in elevating and storing grain for profit, does not deny to the plaintiff in error the equal protection of the laws nor deprive him of his property without due process of law, and such statutory regulations do not amount to a regulation of commerce between the states.

[No. 768.]

Argued April 26, 1894. Decided May 14, 1894.

IN ERROR to the Second Judicial District Court of Ramsey County, State of North Dakota, to review a judgment of that court entered in pursuance of a judgment of the supreme court of North Dakota, affirming the judgment of the former court, granting a writ of mandamus to Norman Brass, upon the petition of Louis W. Stoesser, requiring said Brass to receive from said Stoesser, at the elevator of the former, grain tendered by the latter for storage, at the statutory rate of that state for storage in handling such grain. *Affirmed.*

See same case below, 2 N. D. 482.

Statement by *Mr. Justice Shiras*:

Norman Brass, the plaintiff in error, owns and operates a grain elevator in the village of Grand Harbor, in the state of North Dakota. The defendant in error, Louis W. Stoesser, owns a farm adjoining the village, on which in the year 1891 he raised about four thousand bushels of wheat. On September 30, 1891, Stoesser applied to store a part of his wheat crop for the compensation fixed by section eleven of chapter 126 of the laws of North

Dakota for the year 1891, which Brass refused to do unless paid therefor at a rate in excess of that fixed by the statute. On this refusal, Stoesser filed in the District Court of Ramsey County, North Dakota, a petition for an alternative writ of mandamus. The district court granted an alternative writ of mandamus as follows:

"The state of North Dakota to Norman Brass, respondent: Whereas the following facts have been made to appear to this court by the verified petition of the above named relator, to wit: 1. That he is the relator in the above entitled matter; that he owns and operates a farm containing 540 acres in the vicinity of the railroad station of Grand Harbor, in the county and state aforesaid, and during the year 1891 has raised on said farm about 4000 bushels of grain, principally wheat. 2. That the relator has not sufficient storage capacity on his farm or elsewhere for said grain so raised as aforesaid, but is dependent almost wholly upon the grain elevators and warehouses in the vicinity of said farm for storage capacity. 3. That fully fifty per

cent of the grain raised in said Ramsey county, North Dakota, is dependent for storage capacity upon the grain elevators and warehouses at the various towns, villages, and railroad stations in said Ramsey county. 4. That the respondent, Norman Brass, is now and at all the time herein stated has owned and operated a grain elevator at the railroad station of Grand Harbor aforesaid for the purpose of buying, selling, storing, and shipping grain for profit. 5. That the relator on the 30th day of September, 1891, hauled fifty-eight bushels of wheat to the grain elevator of respondent, Norman Brass, at Grand Harbor aforesaid, and tendered the same at said elevator of said Norman Brass for storage, and requested said Norman Brass to receive, elevate, insure, and store said grain for twenty days, and at the time tendered to said Brass two cents per bushel for compensation for receiving, elevating, insuring and storing said grain for twenty days; that said grain when so tendered as aforesaid was dry and in a suitable condition for storage, and there was in said grain elevator of said Brass at Grand Harbor aforesaid at said time storage capacity for over twenty-five thousand bushels of grain not in use and wholly unoccupied. 6. That said Brass then and there refused to receive said grain for the purpose aforesaid and wholly refused to store said grain at said price. 7. That the relator endeavored to secure storage for said grain at the only other elevator in operation at said railroad station of Grand Harbor aforesaid, but said elevator refused to receive relator's grain upon the same ground as respondent. 8. That the relator is informed and believes that the owners of grain elevators and warehouses within a radius of fifty miles of Grand Harbor aforesaid refused to receive grain for storage at said price: Now, therefore, this court, in order that justice may be done in this behalf to him, Louis W. Stoesser, relator, does hereby command and enjoin you that immediately upon receipt of this writ you do receive from relator, while your storage capacity at your elevator herein mentioned is sufficient for that purpose, all grain that may be tendered you by the relator in a dry and suitable condition for storage at a rate of compensation not exceeding the following schedule, viz, for receiving, elevating, insuring, delivering, and twenty days' storage, two cents per bushel; storage rates after the first twenty days, one half cent per bushel for each fifteen days or fraction thereof, and shall not exceed five cents for six months, or that you show cause to the contrary before this court at the court house, in the city of Devil's Lake, Ramsey county, North Dakota, on the 5th day of October, 1891, at ten o'clock in the forenoon of said day, or as soon thereafter as counsel can be heard; and how you have executed this writ make known to this court at the time and place aforesaid, and have you then and there this writ.

"Dated Sept. 30, 1891."

To which writ appellant made return by answer as follows:

"The return of the respondent to the alternative writ of mandamus issued in the above entitled proceeding shows to the court—

"1. That the respondent admits the truth of the facts pleaded in said alternative writ.

"2. For a further return to the said alternative writ the respondent alleges that he owns and operates only one grain elevator in North Dakota or elsewhere; that the said elevator is the elevator mentioned in said alternative writ, and is situated at Grand Harbor, a small way station on the line of the Great Northern Railroad, containing a population of less than one hundred people; that there are two other elevators owned and operated by different owners independently of and in competition with each other; that there are about six hundred grain elevators, flat houses, and warehouses in said state of North Dakota at which grain is bought and shipped for profit, which said elevators, warehouses, and flat houses are owned and operated by over one hundred and twenty-five different owners independent of and in competition with each other; that the owners of said elevators, warehouses, and flat houses are individuals engaged in buying and shipping grain, millers who use their elevators to supply their mills with grain, farmers' shipping associations, elevator corporations, and individual farmers; that said elevators, flat houses, and warehouses vary in cost of construction from five hundred dollars to five thousand dollars, and vary in capacity from five thousand to fifty thousand bushels; that there are from two to ten elevators, warehouses, and flat houses operated and owned each by different owners and operators at every station in North Dakota at which grain is marketed; that land upon which it is practicable to erect other elevators at every station in North Dakota at which grain is marketed is unlimited in area and can be readily purchased at prices varying from one dollar and twenty-five cents per acre to forty dollars per acre; that respondent's said elevator cost, when constructed and fully equipped, about three thousand dollars; that the capacity of the same is about 80,000 bushels.

"That respondent's principal business is that of buying wheat at Grand Harbor, North Dakota, and shipping the same to and selling it at Minneapolis and Duluth, Minnesota, to which business that of storing grain for third persons has been a mere incident.

"That all grain purchased by respondent at his said elevator is purchased for the sole purpose of being shipped to and sold at and is shipped to and sold at Minneapolis and Duluth, Minnesota.

"That respondent in the conduct of his said business contracts with millers and other purchasers of grain at said Minneapolis and Duluth to sell and deliver to said persons at a future and fixed date certain quantities of wheat and operates and maintains his said elevator for the exclusive purpose of purchasing grain to fill said contract.

"That in seasons when the grain yield is light and railroad facilities are such as to enable grain to be moved rapidly there is space and storage capacity in respondent's elevator in excess of that used by respondent's grain, and particularly when respondent's contracts for the sale of grain are small, while

at other times, when the yield is enormous, as in the present year, respondent's contracts are large, and the quantities of grain presented for shipment are beyond the capacity of the railroads to move, there is not sufficient storage capacity in respondent's elevator to hold and store the grain purchased by respondent in the conduct of his said business.

"That there are located in Minneapolis and Duluth, Minnesota, a great many corporations, persons, and copartnerships engaged in a business known as the 'grain commission' business.

"That those grain commission houses have swarms of agents traveling throughout the state of North Dakota, going from town to town and farm to farm, purchasing grain from farmers in some instances and in others soliciting farmers to ship their grain to said houses at Minneapolis or Duluth, Minnesota, to be by the latter sold on commission.

"That none of said grain commission houses have or own any storage capacity in North Dakota.

"That if chapter 126 of the Laws of 1891 is valid and its effect is to compel respondent to receive all grain that may be tendered to him for storage by grain commission men, farmers, grain speculators, and others, without reference to the necessities or condition of respondent's business at any particular time, the entire storage capacity of respondent's elevator will be exhausted in storing grain for third persons, and the principal business of the respondent, to conduct which his capital was invested in said elevator, will be utterly ruined and annihilated for want of storage capacity to contain wheat purchased by him to fill contracts made by him in the conduct of his said business, and respondent subjected to suits for damages for non-fulfillment of his said contracts.

"That the relator only offered to pay respondent for the service which he requested him to perform, the rate fixed by chapter 126 of the Laws of 1891—that is, two cents per bushel; that respondent refused to perform the service for less than two and one half cents per bushel.

"That respondent refuses to comply with the provisions of said chapter 126 on the ground that it abridges his privileges and immunities as a citizen of the United States; that it deprives him of his liberty and property without due process of law, and denies to him the equal protection of the laws, and amounts to a regulation of commerce among the states.

"That for thirteen years last past the rate charged for the storage of grain has been uniform at all elevators, flat houses, and warehouses in North Dakota, and during that time did not exceed the following schedule: For receiving, elevating, insuring, delivering, and fifteen days' storage, two and one half cents per bushel; after the first fifteen days, one half cent per bushel for each fifteen days or part thereof, but not to exceed five cents per bushel for six months.

"That the average farm in North Dakota does not exceed in area 160 acres; that the average yield in grain of a quarter section of land in North Dakota does not exceed twenty-five hundred bushels; that a granary sufficient

in size to safely and securely store twenty-five hundred bushels of grain can be erected on any farm in North Dakota at a cost not exceeding one hundred and fifty dollars.

"That the business of respondent and all other persons, firms, and corporations engaged in the business of operating grain elevators, warehouses, and flat houses in North Dakota and the manner in which said business is conducted is not in any manner unwholesome or deleterious to the health, morals, welfare, or safety of the community or society.

"That the railroad and warehouse commissioners of North Dakota, on page 33 of their annual report to the governor for 1890, said: 'In view of the fact that after thorough investigation the board deem the charges allowed by section 22, chapter 187 (Laws of 1890) and also section 10 of said chapter, as unreasonable, the following rules of storage are recommended: 1, for receiving, elevating, insuring, delivering, and fifteen days' storage, two and one half cents per bushel; 2, after fifteen days, one half cent per bushel for each fifteen days or part thereof, but not to exceed five cents for six months.'

"That the rates referred to by said commissioners as unreasonable were less than the rate recommended by said board.

"That the respondent denies that the legislature has any power whatever to say whether he shall rent the bins in his elevator or not, and wholly denies the power of the legislature to say what he shall charge for the use of his said elevator or the bins therein.

"That since the enactment of section nine of chapter 126 of the Laws of 1891 the amount of grain shipped directly by farmers without the intervention of elevators, warehouses, or flat houses has been increasing, and in 1890, as respondent is informed and believes, nearly fifty per cent of the entire grain product of North Dakota was shipped to Minneapolis and Duluth, Minnesota, by farmers; that the amount of grain shipped in that manner is steadily increasing from year to year.

"That pursuant to section 7 of chapter 122, Laws of 1890, the railroad commissioners adopted and published the following rules to govern the distribution of cars and other freight, which rules are now in operation in said state of North Dakota, to wit:

"State of North Dakota,

"Office of Commissioners of Railroads.
"Rules for the distribution of cars between stations and shippers.

"1. In distributing cars to stations for grain loading they shall be distributed according to the daily average shipments from such stations.

"2. In distributing cars to shippers for grain loading at stations, agents shall first fill each shipper's order for one car to each. After this is done, the balance of the cars shall be distributed among shippers according to the amount of grain in sight offered for shipment by each shipper.

"3. Parties desiring to load grain on track shall be furnished cars and shall be allowed for loading time twenty-four hours from the time the car is set on the side track to complete loading and furnish shipping directions.

In case shipper fails to complete loading or furnish shipping directions within twenty-four hours, then, in such case, the railway company may collect upon such cars \$3.00 rental for each and every day or part of a day which such cars are delayed after twenty-four hours.

"The above rule as to time and rental charges shall also apply to grain delayed in unloading on track."

"In connection with said rules in said report said commissioners said: 'We believe that the railroads have labored faithfully to supply cars to shippers, in accordance with these rules, and, so far as their ability to supply the demand permitted, cars have been distributed in conformity therewith. From September 15 to December 15 the demand for cars is double the ability of the roads to supply, and as a necessary consequence delay in supplying cars must ensue. In all cases of complaint as to failure to get cars investigated this year, this has been the case, and cars have been supplied as soon as possible by the railroad companies.'

"The liberal policy of the railroads in the distribution of cars adopted this year has been of great benefit to the farmers of North Dakota."

"Wherefore respondent demands judgment quashing the alternative writ of mandamus dismissing this proceeding, and for his costs and disbursements laid out and expended in this action."

To this return Stoesser interposed a general demurrer, which was sustained, and Brass electing in open court to stand on his return, a peremptory writ of mandamus was allowed. From this judgment an appeal was taken to the supreme court of Dakota, which court affirmed the order and judgment of the district court, and remitted the record to that court. On May 28, 1892, final judgment was entered in the district court, making the judgment of the supreme court the judgment of the district court, and awarding a peremptory writ of mandamus to execute that judgment. Whereupon Brass sued out a writ of error to this court.

Messrs. A. B. Browne, A. T. Britton and J. F. McGee for plaintiff in error.

Messrs. Halbert E. Paine and C. D. O'Brien for defendant in error.

Mr. Justice Shiras delivered the opinion of the court:

In the 13th article of the constitution of the state of Illinois, adopted in 1870, all elevators or storehouses where grain or other property is stored for a compensation, whether the property stored be kept separate or not, were declared to be public warehouses, and it was made the duty of the general assembly to pass all necessary laws to give full effect to that article of the constitution. By an act approved April 25, 1871, and entitled "An act to regulate public warehouses and the warehousing and inspection of grain, and to give effect to article 13 of the constitution of the state," the legislature of Illinois provided that those who conducted such public warehouses located in cities containing not less than one hundred thousand inhabitants should procure licenses

and should give bond conditioned for compliance with the law; prescribed maximum rates for storage and handling grain; and declared certain penalties for the failure to procure licenses.

The validity of this law was upheld by the supreme court of Illinois (*Munn v. People*, 69 Ill. 80) and that judgment was affirmed by this court. *Munn v. Illinois*, 94 U. S. 113 [24: 77].

In June, 1888, the legislature of the state of New York passed an act entitled "An act to regulate the fees and charges for elevating, trimming, receiving, weighing, and discharging grain by means of floating and stationary elevators and warehouses in this state," whereby maximum charges were fixed for elevating, receiving, weighing, and discharging grain, when the business was carried on in a city containing 130,000 inhabitants or upwards, and penalties imposed for disregard of the provisions of the statute. The owner of an elevator in the city of Buffalo was indicted, found guilty, and sentenced, in the superior court of Buffalo, for exacting charges for elevating grain in excess of the statutory rates. An appeal was taken to the court of appeals of the state of New York, which affirmed the judgment of the superior court of Buffalo. *People v. Budd*, 5 L. R. A. 559, 117 N. Y. 1. A writ of error brought the case to this court, where the judgment of the court of appeals was affirmed. *Budd v. New York*, 143 U. S. 517 [36: 247], 4 Inters. Com. Rep. 45.

The legislature of the state of North Dakota, by an act approved March 7, 1891, and entitled, "An act to regulate grain warehouses and the weighing and handling of grain, and defining the duties of the railroad commissioners in relation thereto," enacted, in the 4th section thereof, that "all buildings, elevators, or warehouses in this state, erected and operated, or which may hereafter be erected and operated by any person or persons, association, co-partnership, corporation, or trust for the purpose of buying, selling, storing, shipping, or handling grain for profit, are hereby declared public warehouses, and the person or persons, association, co-partnership, or trust owning or operating said building or buildings, elevator or elevators, warehouse or warehouses, which are now or may hereafter be located or doing business within this state, as above described, whether said owners or operators reside within this state or not, are public warehousemen within the meaning of this act, and none of the provisions of this act shall be construed so as to permit discrimination with reference to the buying, receiving, and handling of grain of standard grades, or in regard to parties offering such grain for sale, storage, or handling at such public warehouses, while the same are in operation;" and in the 5th section, "that the proprietor, lessee, or manager of any public warehouse or elevator in this state shall file with the railroad commissioners of the state a bond to the state of North Dakota, with good and sufficient sureties, to be approved by said commissioners of railroads, in the penal sum of not less than \$5000 nor more than \$75,000, in the discretion of said commissioners, conditioned for the faithful performance of duty as public warehousemen, and a compliance with all the laws of the state in relation there-

to," and in the 11th section thereof, "the charges for storing and handling of grain shall not be greater than the following schedule: For receiving, elevating, insuring, delivering, and twenty days' storage, two cents per bushel. Storage rates, after the first twenty days, one half cent for each fifteen days and fraction thereof, and shall not exceed five cents for six months. The grain shall be kept insured at the expense of the warehouseman for the benefit of the owner;" and by the 12th section it is provided that "any person, firm or association, or any representative thereof, who shall fail to do and keep the requirements as herein provided, shall be deemed guilty of a misdemeanor, and shall, on conviction thereof, be subject to a fine of not less than two hundred dollars nor more than one thousand dollars, and be liable in addition thereto to imprisonment for not more than one year in the state penitentiary, at the discretion of the court."

In October, 1891, in the district court of the Second Judicial District of the state of North Dakota, in proceedings the nature of which sufficiently appears in the previous statement of facts, the validity of this statute was sustained, and the judgment of that court was, on error, duly affirmed by the supreme court of the state. *State v. Brass*, 2 N. D. 482.

In the cases thus brought to this court from the states of Illinois and New York, we were asked to declare void statutes regulating the affairs of grain warehouses and elevators within those states, but held valid by their highest courts, because it was claimed that such legislation was repugnant to that clause of the 8th section of article 1 of the Constitution of the United States, which confers upon Congress power to regulate commerce with foreign nations and among the several states, and to the 14th Amendment, which ordains that no state shall deprive any person of life, liberty, or property without due process of law, nor deny to any person within its jurisdiction the equal protection of the laws.

In the case now before us the same contentions are made, but we are not asked to review our decisions made in the previous cases. Indeed, their soundness is tacitly admitted in the briefs and argument of the counsel of the plaintiff in error. But it is said that those cases arose out of facts so peculiar and exceptional, and so different from those of the present case, as to render the reasoning there used, and the conclusions reached, now inapplicable.

The concession, then, is that, upon the facts found to exist by the legislatures of Illinois and New York, their enactments were by the courts properly declared valid, and the contention is that the facts upon which the legislature of North Dakota proceeded, and of which we can take notice in the present case, are so different as to call for the application of other principles, and to render an opposite conclusion necessary.

The differences in the facts of the respective cases, to which we are pointed, are mainly as follows: In the first place, what may be called a geographical difference is suggested, in that the operation of the Illinois and New York statutes is said to be restricted to the city of Chicago in the one case, and to the cities of

Buffalo, New York, and Brooklyn in the other, while the North Dakota statute is applicable to the territory of the entire state.

It is, indeed, true that while the terms of the Illinois and New York statutes embrace in both cases the entire state, yet their behests are restricted to cities having not less than a prescribed number of inhabitants, and that there is no such restriction in the North Dakota law.

Upon this it is argued that the statutes of Illinois and New York are intended to operate in great trade centers, where, on account of the business being localized in the hands of a few persons in close proximity to each other, great opportunities for combinations to raise and control elevating and storage charges are afforded, while the wide extent of the state of North Dakota and the small population of its country towns and villages are said to present no such opportunities.

The considerations mentioned are obviously addressed to the legislative discretion. It can scarcely be meant to contend that the statutes of Illinois and New York, valid in their present form, would become illegal if the law makers thought fit to repeal the clauses limiting their operation to cities of a certain size, or that the statute of North Dakota would at once be validated if one or more of her towns were to reach a population of one hundred thousand, and her legislature were to restrict the operation of the statute to such cities.

Again, it is said that the modes of carrying on the business of elevating and storing grain in North Dakota are not similar to those pursued in the eastern cities; that the great elevators used in transshipping grain from the Lakes to the railroads are essential; and that those who own them, if uncontrolled by law, could extort such charges as they pleased; and great stress is laid upon expressions used in our previous opinions, in which this business, as carried on at Chicago and Buffalo, is spoken of as a practical monopoly, to which shippers and owners of grain are compelled to resort. The surroundings in an agricultural state, where land is cheap in price and limitless in quantity, are thought to be widely different, and to demand different regulations.

These arguments are disposed of, as we think, by the simple observation, already made, that the facts rehearsed are matters for those who make, not for those who interpret the laws. When it is once admitted, as it is admitted here, that it is competent for the legislative power to control the business of elevating and storing grain, whether carried on by individuals or associations, in cities of one size and in some circumstances, it follows that such power may be legally exerted over the same business when carried on in smaller cities and in other circumstances. It may be conceded that that would not be wise legislation which provided the same regulations in every case, and overlooked differences in the facts that called for regulations. But as we have no right to revise the wisdom or expediency of the law in question, so we would not be justified in imputing an improper exercise of discretion to the legislature of North Dakota. It may be true that, in the cases cited, the judges who expressed the conclusions of the court entered, at some length, into a de-

fense of the propriety of the laws which they were considering, and that some of the reasons given for sustaining them went rather to their expediency than to their validity. Such efforts, on the part of judges, to vindicate to citizens the ways of legislatures are not without value, though they are liable to be met by the assertion of opposite views as to the practical wisdom of the law, and thus the real question at issue, namely, the power of the legislature to act at all, is obscured. Still, in the present instance, the obvious aim of the reasoning that prevailed was to show that the subject-matter of these enactments fell within the legitimate sphere of legislative power, and that, so far as the laws and Constitution of the United States were concerned, the legislation in question deprived no person of his property without due process of law, and did not interfere with Federal jurisdiction over interstate commerce.

Another argument advanced is based on the admitted allegation that the principal business of the plaintiff in error, in connection with his warehouse, is in storing his own grain, and that the storage of the grain of other persons is and always has been a mere incident, and it is said that the effect of this law will be to compel him to renounce his principal business and become a mere warehouseman for others. We do not understand this law to require the owner of a warehouse, built and used by him only to store his own grain, to receive and store the grain of others. Such a duty only arises when he chooses to enter upon the business of elevating and storing the grain of other persons for profit. Then he becomes subject to the statutory regulations, and he cannot escape them by asserting that he also elevates and stores his own grain in the same warehouse. As well might a person accused of selling liquor without a license urge that the larger part of his liquors were designed for his own consumption, and that he only sold the surplus as a mere incident.

Another objection to the law is found in its provision that the warehouseman shall insure the grain of others at his own expense. This may be burdensome, but it affects alike all engaged in the business, and, if it be regarded as contrary to sound public policy, those affected must instruct their representatives in general assembly met to provide a remedy.

The plaintiff in error, in his answer to the writ of mandamus, based his defense wholly upon grounds arising under the constitution of the state and of the United States. We are limited by this record to the questions whether the legislature of North Dakota, in regulating by a general law the business and charges of public warehouses engaged in elevating and storing grain for profit, denies to the plaintiff in error the equal protection of the laws or deprives him of his property without due process of law, and whether such statutory regulations amount to a regulation of commerce between the states. The allegations and arguments of the plaintiff in error have failed to satisfy us that any solid distinction can be found between the cases in which those questions have been heretofore

determined by this court and the present one. *The judgment of the court below is accordingly affirmed.*

Mr. Justice Brewer dissenting:

I dissent from the opinion and judgment of the court in this case. Reliance is placed in that opinion on *Munn v. Illinois*, 94 U. S. 113 [24:77] and *Budd v. New York*, 143 U. S. 517 [36:247], 4 Inters. Com. Rep. 45. In the dissenting opinion I filed in the latter case, I expressed, so far as was necessary, my views in reference to the general propositions laid down in the two cases, and I do not desire to repeat what I there said. It is a significant fact that in *Union Pac. R. Co. v. United States* ("Sinking Fund Cases") 99 U. S. 700, 747 [25:496, 511], and in *Wabash, St. L. & P. R. Co. v. Illinois*, 118 U. S. 557, 569 [30:244, 248], 1 Inters. Com. Rep. 31, *Mr. Justice Bradley* and *Mr. Justice Miller*, who concurred in the judgment in *Munn v. Illinois*, each sought to limit and qualify the scope of the language used by the *Chief Justice* in that case. These are the words of *Mr. Justice Bradley*:

"The inquiry there was as to the extent of the police power in cases where the public interest is affected; and we held that when an employment or business becomes a matter of such public interest and importance as to create a common charge or burden upon the citizen; in other words, when it becomes a practical monopoly, to which the citizen is compelled to resort, and by means of which a tribute can be exacted from the community, it is subject to regulation by the legislative power."

And this is the language of *Mr. Justice Miller*, delivering the opinion of the court:

"And in that case the court was presented with the question, which it decided, whether anyone engaged in a public business, in which all the public had a right to require his service, could be regulated by acts of the legislature in the exercise of this public function and public duty, so far as to limit the amount of charges that should be made for such services."

I desire, however, specially to notice the facts disclosed by this record, and to point out to what extent the decision of this court now goes. The case, coming from the supreme court of the state of North Dakota must be determined upon the record as it is presented. Nothing can be added to or taken from the facts as established by that record. The case was heard and determined upon a demurrer to the return made by the defendant to the petition and writ of mandamus, and of course upon such demurrer the facts stated in the return are to be taken as true. From that return it appears that along the line of the Great Northern Railroad in the state of North Dakota there are about six hundred grain elevators; that at Grand Harbor, a small way station on the line of that road, there are three elevators, one of them being that owned by the defendant; that defendant's elevator is a small one, with a capacity of 80,000 bushels, and costing about \$3000. For aught that appears, the elevator was on the private property of the defendant,

though contiguous to the railroad, and at the railroad station. It is further admitted:

"That respondent's principal business is that of buying wheat at Grand Harbor, North Dakota, and shipping the same to and selling it at Minneapolis and Duluth, Minnesota, to which the business of storing grain for third persons is and always has been a mere incident.

"That all grain purchased by respondent at his said elevator is purchased for the sole purpose of being shipped to and sold at and is shipped to and sold at Minneapolis and Duluth, Minnesota.

"That respondent in the conduct of his said business contracts with millers and other purchasers of grain at said Minneapolis and Duluth to sell and deliver to said persons at a future and fixed date certain quantities of wheat, and operates and maintains his said elevator for the exclusive purpose of purchasing grain to fill said contracts.

"That in seasons when the grain yield is light and railroad facilities are such as to enable grain to be moved rapidly there is space and storage capacity in respondent's elevator in excess of that used by respondent's grain, and particularly when respondent's contracts for the sale of grain are small, while at other times when the yield is enormous, as in the present year, respondent's contracts large, and the quantities of grain presented for shipment are beyond the capacity of the railroads to move, there is not sufficient storage capacity in respondent's elevator to hold and store the grain purchased by respondent in the conduct of his said business.

"That if chapter 126 of the Laws of 1891 is valid and its effect is to compel respondent to receive all grain that may be tendered to him for storage by grain commission men, farmers, grain speculators, and others without reference to the necessities or condition of respondent's business at any particular time, the entire storage capacity of respondent's elevator will be exhausted in storing grain for third persons, and the principal business of respondent, to conduct which his capital was invested in said elevator, will be utterly ruined and annihilated for want of storage capacity to contain wheat purchased by him to fill contracts made by him in the conduct of his said business and respondent subjected to suits for damages for non-fulfilment of his said contracts."

The rates which were established by law were as follows:

"1. For receiving, elevating, insuring, delivering, and twenty days' storage, two cents per bushel.

"2. After twenty days, one half cent per bushel for each fifteen days or part thereof, but not to exceed five cents for six months."

It appears from these admissions that the principal business of defendant was that of buying wheat and shipping it to Minneapolis and Duluth for sale, and that he operated and maintained his elevator for the exclusive purpose of purchasing grain to fill his contracts; and while at the time the elevator was not full and there was room for the storage of the grain tendered by the petitioner, and the de-

fendant had at times used vacant space in his elevator for the storage of grain of others, yet such use was a mere incident to and subordinate to his principal business of buying and selling grain, for which principal business he exclusively maintained and operated his elevator.

Now, my first objection is that by this decision a party is compelled by the mandate of the court to engage in a business which he never intended to engage in, and which he does not desire to engage in, to wit, the business of maintaining a public elevator. His business is that of buying and selling grain, and he operates and maintains the elevator, which he owns, for the exclusive purpose of carrying on that business. That he may have sometimes accommodated his neighbors by the use of his elevator for the storage of their grain, and thus to a limited extent engaged in that business, does not change the fact, as admitted, that his principal business was that of buying and selling, and that he operated and maintained that elevator exclusively for the carrying on of that business, or the other admitted fact that, if he is compelled, as he is compelled by this mandate, to receive grain as tendered so long as he has storage capacity unoccupied in his elevator, his principal business and that for which he built the elevator will be utterly ruined and destroyed.

The question is not whether, if he should receive and store in his elevator grain for others, he might not so far bring himself within the scope of the law as to be deemed for that transaction engaged in the business of maintaining a public elevator, and thus bound by the charges fixed by statute; but whether, when he maintains an elevator exclusively for his own business, the fact that at times he has used vacant room in it for the storage of the grain of other persons, compels him to receive grain when tendered irrespective of the injury which it does to his own business. And it is admitted that at the time of this tender, there was not sufficient storage capacity in his elevator to hold and store the grain purchased by him in the conduct of his business. And this is a matter of no trifling moment to one engaged in the business of buying and selling grain. He cannot know in advance when grain will be tendered at a price which will justify his purchase with a view to profit. The fact that to-day there may be storage capacity does not prove that to-morrow he may not need the entire capacity of his elevator. And yet, if, because to-day there is room in his elevator, he is bound to receive any grain that shall be tendered, he may to-morrow be unable to make purchase of the offered grain. It is a matter of common knowledge that grain is not put into and taken out of an elevator in an instant. And if once deposited the owner cannot be compelled to remove it, merely for the accommodation of the warehouseman, but may leave it there indefinitely, so long as he pays the legal charges. The petition was for a writ of mandamus commanding the defendant "so long as the capacity of his said elevator is sufficient for the purpose, to store such grain as may be tendered to him by the relator," and the decree

of the court was that the "writ issued as prayed for," and that is the decision which is affirmed by this court.

I dissent in the second place because the facts show, in the words of *Mr. Justice Bradley*, no "practical monopoly, to which the citizen is compelled to resort, and by means of which a tribute can be exacted from the community." Along the line of this single road within the limits of this state there are about six hundred of these elevators, owned and operated by over one hundred and twenty-five different persons, varying in cost of construction from \$500 to \$5000; at every station there is land purchasable by any one at prices varying from \$1.25 to \$40 per acre, and a granary sufficient to store the average product of an ordinary Dakota farm can be erected at a cost of not exceeding \$150. So it is that when any farmer or other individual can at a cost of less than \$200 provide himself with all the facilities for storing and shipping the entire product of an ordinary farm, when along the line of a single railroad there are six hundred elevators already constructed, owned, and operated by one hundred and twenty-five different persons, when at every station at which grain is marketed there are from two to ten such elevators, it is held that there exists a monopoly such as justifies control by the public of the prices at which grain shall be stored in any one of these many elevators. If this be a monopoly, justifying public control of prices for service, I am at a loss to per-

ceive at what point the fact of monopoly will cease and freedom of business commence. For obviously elevators along the line of that road were as plentiful as other institutions of industry, and as easily and cheaply constructed, and therefore savoring no more of monopoly.

I dissent, in the third place, because by this law the elevator man is bound not merely to receive, store, and discharge the grain which is tendered to him, but also to insure and pay the cost of insurance, it matters not what that cost may be, whether more or less than he receives for the whole service. I do not care to enlarge upon this matter. If the legislature can compel a party, though confessedly to the disadvantage, injury, and even destruction of his own special business of buying and selling grain, to receive and store grain for whoever may demand it in an elevator which he is maintaining and operating for the exclusive carrying on of his own business at any price which it sees fit to allow, and at the same time compel him to advance the money to insure the property thus forced upon him, I can only say that it seems to me that the country is rapidly travelling the road which leads to that point where all freedom of contract and conduct will be lost. For these reasons, thus briefly stated, I am constrained to dissent from this opinion and judgment.

I am authorized to say that *Mr. Justice Field*, *Mr. Justice Jackson*, and *Mr. Justice White* concur in this dissent.

THE CLEVELAND, CINCINNATI, CHICAGO & ST. LOUIS RAILWAY COMPANY,

Piff. in Err.,

v.

VICTOR M. BACKUS, as Treasurer of Marion County, Indiana.

(See S. C. 154 U. S. 439, 38 L. ed. 1041.)

1. *Pittsburg, C. C. & St. L. R. Co. v. Backus*, 154 U. S. 421, 38 L. ed. 1061, followed.

2. It is not within the province of this court to review any question as to the admission or rejection of evidence.

As to direct taxes, see note to *Scholey v. Rew*, 23: 99.

As to power of states to tax, see note to *Dobbins v. Erie County*, 10: 1022.

That taxation of stock or shares in corporation does not impair obligation of contracts; taxation of shares of national banks and other corporations, see note to *Providence Bank v. Billings*, 7: 939.

As to exemption from taxation; whether a contract or not; not implied, see note to *Tucker v. Furguson*, 22: 805.

As to when an injunction to restrain the collection of a tax will be granted, see note to *Dows v. Chicago*, 20: 65.

State and Federal power over commerce; what is a regulation of interstate commerce; license tax on peddlers, agents and drummers; police power.

The power of Congress to regulate commerce between the states attaches only upon the actual delivery of property to a common carrier for transportation, or the actual commencement of its

Mem. References in note are to U. S. Repts. L. ed.

4 INTER 8.

transfer to another state and continues until it has reached such other state and becomes mingled with the general mass of property therein. *Re Greene*, 52 Fed. Rep. 104.

Shipments between points within the same state do not constitute interstate commerce because made on a railroad which extends into another state. *Campbell v. Chicago, M. & St. P. R. Co.* 17 L. R. A. 443, 4 Inters. Com. Rep. 203.

A statute denying the right of a corporation of another state to bring an action within the state until it has filed its articles of incorporation therein is inoperative as to an action brought for the purchase price of goods sold within the state by commercial agents or drummers, as this constitutes interstate commerce. *Bateman v. Western Star Mill Co.* 4 Inters. Com. Rep. 260.

The imposition by the state of a franchise tax based upon the capital of a telegraph company employed within the state is not an imposition on interstate commerce. *People v. Campbell*, 70 Hun, 507.

The legislative regulation of tolls for the use of a bridge owned by a domestic corporation and connecting two states is not a regulation of interstate commerce. *Com. v. Covington & C. Bridge Co.* 14 Ky. L. Rep. 836, 54 Am. & Eng. R. Cas. 461.

Making a railroad company liable for fires set

tion of testimony in the state court which does not bear directly upon some matter of a Federal nature.

3. If an assessing board, seeking to assess for purposes of taxation a part of a road within a state, the other part of which is in an adjoining state, ascertains the value of the whole line as a single property, and then determines the value of that within the state, upon the mileage basis, that is not a valuation of property outside of the state, if no special circumstances exist to distinguish between the conditions in the two states such as terminal facilities of enormous value in one and not in another.
4. It is not necessary that the assessing board of a state in order to keep within the limits of state jurisdiction shall treat the part of a railroad within the state as an independent line, disconnected from the part without, and place upon that property only the value which can be given to it if operated separately from the balance of the road.
5. Where an assessing board is charged with the duty of valuing a certain number of miles of railroad within a state forming part of a line of road running into another state, and assesses those miles of road at their actual cash value determined on a mileage basis, this is not placing a burden upon interstate commerce, beyond the power of the state, simply because the value of

that railroad as a whole is created partly—and perhaps largely—by the interstate commerce which it is doing.

6. The true value of a line of railroad is something more than an aggregation of the values of separate parts of it, operated separately; it is the aggregate of those values plus that arising from a connected operation of the whole.
7. When a railroad runs into two states each state is entitled to consider as within its territorial jurisdiction and subject to the burdens of its taxes the proportionate share of the value flowing from the operation of the entire mileage as a single continuous road.
8. While no state can impose any tax or burden upon the privilege of doing the business of interstate commerce, yet it has the unquestioned right to place a property tax on the instrumentalities engaged in such commerce.
9. The rule of property taxation is that the value of the property is the basis of taxation; the value of property results from the use to which it is put and varies with the profitableness of that use.
10. The rule of all property taxation is the rule of value, and by that rule property engaged in interstate commerce is controlled the same as property engaged in commerce within the state, this does not cast a burden on interstate commerce.

[No. 908.]

Argued March 27, 28, 1894. Decided May 26, 1894.

by its engines or on its right of way is not a regulation of commerce among the states. *McCandless v. Richmond & D. R. Co.* 18 L. R. A. 440, 38 S. C. 103.

A license fee imposed by a city upon each pole and a mile of wire erected by a telegraph company is not invalid as a restraint upon the instruments of interstate commerce and communication. *Philadelphia v. Postal Telegr. Cable Co.* 67 Hun, 21.

A state revenue law making the occupation of sample sellers and solicitors a privilege, and requiring all persons selling goods by sample to, or taking orders from consumers, to pay an annual license or privilege tax, is a tax upon interstate commerce in so far as it applies to nonresident drummers selling within the state, for nonresident principals, goods at the time situated or to be manufactured without the state. *Hurford v. State*, 91 Tenn. 669.

The ordinance of the city of Chicago requiring a license fee for steam tugboats navigating the Chicago river, which boats were engaged in the coasting and foreign trade and in towing vessels engaged in interstate commerce is invalid. *Harmon v. Chicago*, 147 U. S. 398 (37: 216).

State legislation prohibiting the sale of an article imitating or resembling butter cannot interfere with the sale of oleomargarine imported from another state, in the original package bearing a United States revenue stamp, by a person holding a United States license for its sale. *Waterbury v. Egan*, 3 Misc. 355.

A state law is void as an interference with interstate commerce in so far as it requires original packages of baking powder, not deleterious to health, manufactured in another state, by citizens thereof and imported into the former state, to be labeled in any particular manner, and imposes a penalty for such sale when not so labeled. *Re Ware*, 53 Fed. Rep. 783.

A state statute prohibiting the sale of seed unless the year in which it is grown is plainly marked on each package, except on a sale of seed in open bulk

by farmers to other farmers or gardeners, is void as to seed brought from another state and sold in original packages. *Re Sanders*, 18 L. R. A. 549, 52 Fed. Rep. 802.

The police power of a state is subordinate to that of Congress to regulate commerce between the states. *Com. v. Paul*, 10 Pa. Co. Ct. 332.

The power of Congress to regulate commerce among the states does not embrace commerce which is completely internal or between different parts of the same state. *Lehigh Valley R. Co. v. Pennsylvania*, 145 U. S. 102 (36: 672).

In the carriage of freight and passengers between two points in one state, the mere passage over the soil of another state does not render that business foreign which is otherwise domestic. *Lehigh Valley R. Co. v. Pennsylvania*, *supra*.

A state statute requiring railway officers to assign the passengers to coaches or compartments set apart for the race to which they belong is a regulation of commerce, which, though valid as applied to domestic passengers, is unconstitutional as applied to interstate passengers. *State v. Hicks*, 44 La. Ann. 770.

The Maine statute which makes railroad tickets good for six years, with the right of the holder to stop off at usual stopping places, cannot be held to apply to a ticket purchased in Canada for a continuous passage over defendant's road from that Dominion through Vermont and New Hampshire into Maine, since, applied to such a case, the statute would be unconstitutional as interfering with both state and foreign commerce. *Lafarier v. Grand Trunk R. Co.* 84 Me. 286.

The regulation of the charges of a grain elevator is not a regulation of interstate commerce, although the grain passing through it is brought from another state. *Budd v. New York*, 143 U. S. 517 (36: 247), 4 Inters. Com. Rep. 45.

A statute prohibiting the shipment out of the state of oysters taken in the waters of the state, while they are in shells, and also prohibiting

IN ERROR to the Supreme Court of the State of Indiana, to review a decree of that court, affirming the decree of the superior court of Marion county, in that state, in favor of the defendant, Victor M. Backus, treasurer of said county, in an action brought by the Cleveland, Cincinnati, Chicago & St. Louis Railway Company, plaintiff, to restrain the collection of taxes upon the property of said company, etc. *Affirmed.*

The facts are stated in the opinion.

Mr. John T. Dye for plaintiff in error.

Messrs. Alonzo Greene Smith, Atty. Gen. of Indiana, William A. Ketcham, Albert J. Beveridge and John W. Kern for defendant in error.

Mr. Justice Brewer delivered the opinion of the court:

This case is similar to the two just decided, in that it was a suit brought by this plaintiff in the same court, challenging an assessment of its railroad property for the same year, by the same board, with the same result both in the trial and supreme court of the state. Hence it is useless to reconsider the questions decided in those cases as to the constitutionality of the act itself, or those which depend solely upon like testimony. There was, however, in the trial of this case a more elaborate effort to show that the state board included in its assessment the value of property outside

the state, and also that the valuation placed nominally upon the property within the state was largely based upon interstate business done by the plaintiff, and thus, as is claimed, to that extent, placed a direct burden upon interstate commerce, which, it is conceded, is beyond the power of the state to cast. It becomes necessary, therefore, to notice a little in detail the testimony which was received, as well as that which was excluded on the hearing.

It may be premised that there was much testimony of a character similar to that given in the other cases. Beyond that, there was a large amount of testimony received as well as

the taking of such oysters by any person who is not a resident of the state, is not unconstitutional as a regulation of interstate commerce. *State v. Har-rub*, 15 L. R. A. 761, 4 Inters. Com. Rep. 99, 95 Ala. 176.

A state statute prohibiting game birds to be killed for the purpose of conveying them out of the state is not an unlawful interference with interstate commerce. *State v. Geer*, 13 L. R. A. 804, 61 Conn. 144, 3 Inters. Com. Rep. 732.

N. Y. Laws 1846, chap. 62, imposing a duty upon foreign goods sold at auction, as applied to sales not in the original packages in which they were imported, but in the separate packages contained in such original packages, is not an unauthorized interference with commerce by the state. *People v. Wilmerding*, 62 Hun, 361.

A state statute compelling the shipment of freight within a certain time after delivery, under a penalty for default, is not an unconstitutional regulation of interstate commerce as to freight for shipment out of the state as it does not tend to trammel or obstruct, but to expedite such commerce. *Bagg v. Wilmington, C. & A. R. Co.* 14 L. R. A. 596, 109 N. C. 279.

A statute prohibiting the manufacture, sale or offer for sale, of any article in imitation of yellow butter, but providing that it shall not prohibit the sale of oleomargarine in its real character, free from anything that looks like butter, is not void as a regulation of commerce, even as applied to the sale of oleomargarine in the original packages in which it was brought from another state. *Com. v. Huntley*, 15 L. R. A. 839, 156 Mass. 236.

A merchandise broker may be required as a condition of obtaining a license for that business, to pay a license fee, and, in addition, 2½ per cent upon his gross commission from the business, including that which is wholly interstate. *Flicklen v. Shelby County Taxing Dist.* 145 U. S. 1 (36:801), 4 Inters. Com. Rep. 79.

A provision of the Federal Constitution prohibiting discrimination by states against the produce, etc., of other states, is not violated by *Mo. Rev. Stat. §§ 7211, 7212, 7217*, prohibiting the peddling of patent medicines from place to place without a license, and fixing the license fee for peddling. *State v. Smithson*, 106 Me. 149.

4 INTER S.

One soliciting orders for goods from house to house cannot refuse to comply with the terms of a police ordinance regulating such business, which applies to all alike, on the ground that he is engaged in interstate commerce because he is working for a person domiciled in another state, and simply exhibits samples and takes orders which are filled by another agent or by express. *Titusville v. Brennan*, 14 L. R. A. 100, 3 Inters. Com. Rep. 735, 143 Pa. 642.

A city ordinance imposing a license on persons canvassing for goods or books within the city is an attempt to regulate interstate commerce in so far as it affects a canvasser for one doing business in another state, even though he has a branch office within the city to supply canvassers. *Re Nichols*, 48 Fed. Rep. 64.

A license fee demanded of a manufacturer's agent employed to sell goods by sample in Louisiana, the good being shipped directly from the factory in another state to the purchaser, is illegal as a tax on interstate commerce. *McClellan v. Pettigrew*, 44 La. Ann. 356.

Persons engaged in showing samples of goods manufactured by their principal at his residence in another state, and in taking orders for such goods, which are transmitted to the principal to be filled, cannot be compelled to pay a license tax by the state in which they are operating, whether they are within its statutory definition of peddlers or not. *Re Spain*, 14 L. R. A. 97, 47 Fed. Rep. 208.

A statute requiring express companies doing business in a state to pay a license tax of \$500 where they operate less than 100 miles and \$1000 for over 100 miles, is unconstitutional as an attempted regulation of interstate commerce. *Com. v. Smith*, 92 Ky. 38.

A state may, until legislation on the subject by Congress, authorize the erection of a bridge across a navigable river within the state not in the line of general commerce. *State v. Leighton*, 83 Me. 419.

The police power of a state cannot be exercised over interstate transportation of subjects of commerce. *Com. v. Chesapeake & O. R. Co.* 3 Inters. Com. Rep. 308.

A state cannot prohibit the running of freight trains on Sundays, so far as they are engaged in in-

some offered and rejected for the purpose of showing what was presented to the board for consideration, the method by which it reached its conclusions, and the elements which entered into its estimate of value. The principal witness relied on in respect to these matters was the secretary of state, a member of the board. By him it was proved that no witness was sworn and examined, and no inquiry made in that way, as to the value of this property. It appeared that the return made by the company was before the board for consideration. The court ruled out an offer to prove that outside of such return no books, papers, or documents, except Poor's Manual and the Investor's Guide, were produced before the board, or considered by it in making the assessment; that Poor's Manual was used by it for data upon which to base the assessment; and specifically that this was the only evidence which it had as to the number of miles owned and leased by the plaintiff, the state in which they were located, and the various incumbrances upon the different lines of road included in the system belonging to the plaintiff. It was shown that plaintiff appeared before the board by its officers, with such statements as they desired to make, and also that other individuals (especially an attorney representing Marion

county, one of the counties through which the road of the plaintiff runs) appeared and made arguments. A series of questions was put to the witness, of which this is a sample:

"Q. In the assessment of the Cincinnati, La. Fayette & Chicago Railway, extending from Templeton, Indiana, to the Illinois state line," (one of the lines in plaintiff's system and included in the assessment) "in arriving at the basis for the estimate of the value which you placed upon the main line of that road, did you consider the market value of any stocks; and, if so, of what stocks did you consider the market value?"

—but the court ruled the question out on the ground that it was an attempt to inquire into the mental processes of members of the board. At the time counsel for the defendant stated:

"We desire to let the record show at this point, may the court please, that the defendant will interpose no objection to any question asked by the plaintiff as to whether or not the state board of tax commissioners assessed and valued any bonds, stocks or anything else outside of the state, and that we will not object to any question asked any member of the state board of tax commissioners as to whether or not that board assessed anything else than

terstate commerce. *Com. v. Chesapeake & O. R. Co. supra.*

A state statute prohibiting freight trains running on Sunday between sunrise and sunset, except with livestock or perishable freight, or to complete a trip which can be finished before 9 A. M., is invalid as a regulation of commerce, so far as it applies to interstate freight trains. *Norfolk & W. R. Co. v. Com.* 18 L. R. A. 107, 3 Inters. Com. Rep. 671, 88 Va. 95.

A contract of shipment to a city in the same state as the place of shipment is not interstate commerce, although the yards in which the freight is unloaded extend into another state, and the freight is actually unloaded in such other state, and the place of business of the consignee is also therein. *Scammon v. Kansas City, St. J. & C. B. R. Co.* 41 Mo. App. 194.

A package of intoxicating liquors in the possession of a carrier in transit from one state to another for delivery in the latter is interstate commerce and under the exclusive jurisdiction of Congress; and state process for its seizure before broken or delivered to the consignee is void. *State v. Intoxicating Liquors*, 3 Inters. Com. Rep. 581, 88 Me. 158.

Ark. Act of April 3, 1889, to regulate the sale of wine in Arkansas, in so far as it authorizes the sale of wine made from grapes grown on premises within the state, and prohibits the sale of wine, made out of grapes grown out of the state, violates the Federal Constitution. *State v. Deschamps*, 3 Inters. Com. Rep. 676, 53 Ark. 490.

A state cannot, under the guise of exerting its police powers or of enacting inspection laws, make discriminations against the products and industries of some of the states in favor of the products and industries of its own or of other states. *Brimmer v. Rebman*, 138 U. S. 78 (34: 862), 3 Inters. Com. Rep. 485; *Voight v. Wright*, 141 U. S. 62 (36: 638).

A state act making it a misdemeanor to sell cattle without inspection, before slaughter within the state, violates the commerce clause of the Federal Constitution. *State v. Klein*, 3 Inters. Com. Rep. 673, 126 Ind. 68.

The exaction of a license fee for the privilege of purchasing goods to be shipped to another state is 4 INTER S.

not unconstitutional as a tax upon interstate commerce. *Rothermel v. Meyerle*, 9 L. R. A. 303, 3 Inters. Com. Rep. 315, 136 Pa. 250.

A license tax on peddlers is not an unconstitutional regulation of commerce. *Re Wilson*, 12 L. R. A. 624, 8 Mackey, 341; *State v. Emert*, 11 L. R. A. 219, 3 Inters. Com. Rep. 527, 103 Mo. 241.

A law which imposes a license tax on peddlers to an attempted regulation of commerce and unconstitutional so far as it applies to one going from house to house selling by samples, forwarding the orders to his principal in another state, and on receipt of the goods delivering them personally. *Ex parte Murray*, 3 Inters. Com. Rep. 574, 98 Ala. 78; *McLaughlin v. South Bend*, 10 L. R. A. 357, 126 Ind. 471.

The solicitation of orders for books within a city by an agent who is, like his principal, a citizen of another state to which all orders are sent to be filled, such agent neither delivering the books nor collecting any money, constitutes interstate commerce and an ordinance requiring a license for doing such business is void. *Re White*, 11 L. R. A. 284, 3 Inters. Com. Rep. 531, 43 Fed. Rep. 913.

One bringing goods into Kentucky from another state for the purpose of peddling them is liable, the same as a citizen of Kentucky, to pay a peddler's license imposed by the Kentucky statute, and to all the penalties for refusing to do so. The statute does not violate the interstate commerce clause of the United States Constitution. *Rash v. Farley*, 91 Ky. 344.

A tax on the privilege of selling fertilizers is a tax on the fertilizers and therefore invalid, so far as it relates to fertilizers brought from other states, being a tax on interstate commerce. *American Fertilizing Co. v. North Carolina Board of Agriculture*, 11 L. R. A. 179, 3 Inters. Com. Rep. 532, 43 Fed. Rep. 609.

A state statute which requires from the agent of an express company not incorporated by the laws of that state a license from the auditor of public accounts before he can carry on any business for such company in the state, and imposing a fine for the violation of the statute, is repugnant to the power of Congress to regulate commerce among the states, where a part of the business

railroad track and rolling stock inside of the state of Indiana."

The plaintiff did not, however, apparently care to take advantage of this offer. Other questions were put to the witness, like the following:

"In assessing the Indianapolis & St. Louis Railroad, you placed the main track at \$27,900 per mile, while you assessed the main track of the Terre Haute & Indianapolis Railroad at \$21,800 per mile, being \$6000 per mile less than the track of the St. Louis division of the three C's & St. L. or the I. & St. L. railroad. Now, in making this assessment, \$21,800 per mile, or \$27,900 per mile upon the main track of the St. Louis division of the three C's & St. L., did you or not consider the gross earnings of the three C's & St. L. railway, including earnings derived from carrying freight and passengers from points within to points without the state of Indiana or through the state of Indiana, while engaged as a common carrier in interstate commerce?"

—but the court sustained objections to all of them. The witness was also asked, but not permitted to answer:

"Q. Did you fix the value upon the St.

Louis division of the three C's & St. L. railway—I mean did the board—as returned to the auditor of state separately or did you value that road as a part of the three C's & St. L. system in Ohio and in Indiana, and did you, having reached a unit of value by considering the whole system, distribute that unit of value according to mileage over the operated and leased lines and parts of roads in Indiana of the plaintiff?"

Another series of questions was propounded, of which the following is one:

"Q. Did you or not, in assessing and fixing the value of the St. Louis division and of the Chicago division and of the leased and operated lines of the three C's & St. L. railway in the state of Indiana, place or add anything to the value of said lines by reason of the fact that it had a franchise?"

Objections were made by the defendant to these questions, which were sustained, but afterwards, when the witness was again on the stand the objections were withdrawn, whereupon the plaintiff withdrew all the questions except the one which we have last quoted, and to that the witness answered, "We did not; no, sir."

These references are probably sufficient to

done by the agent is interstate business. *Crutcher v. Kentucky*, 141 U. S. 47 (35: 649).

A state tax on the business of buying and selling "futures" is not a tax on interstate commerce, although the business is carried on by the agent of a citizen of another state, who solicits orders within the state imposing the tax, to be executed out of it. *Alexander v. State*, 10 L. R. A. 869, 86 Ga. 246.

A state statute which requires railroads to provide separate accommodations for the white and colored races is within the power of the state, and is not a regulation of interstate commerce. *Louisville, N. O. & T. R. Co. v. Mississippi*, 133 U. S. 567 (33: 784), 3 Inters. Com. Rep. 801.

A state statute compelling railroad companies to furnish double decked cars for sheep, under a penalty for failure to do so and limiting the price per carload, is void as an attempted regulation of commerce, when applied to interstate shipments. *Stanley v. Wabash, St. L. & P. R. Co.* 3 L. R. A. 549, 3 Inters. Com. Rep. 176, 100 Mo. 435.

N. Y. Laws 1897, chap. 116 as amended by N. Y. Laws, 1898, chap. 198, relating to the heating of steam passenger railroad cars, are police regulations, and are not unconstitutional as being interstate commerce regulations. *People v. New York, N. H. & H. R. Co.* 55 Hun, 409.

A license tax assessed, under the Pennsylvania act, against a railroad company which is a corporation of Virginia, for keeping an office in Philadelphia for the use of its officers, stockholders, agents and employes, is unconstitutional as a tax upon interstate commerce, when the company is engaged in interstate commerce. *Norfolk & W. R. Co. v. Pennsylvania*, 136 U. S. 114 (34: 394), 3 Inters. Com. Rep. 178.

The Kentucky statute requiring resident agents of foreign express companies to obtain a license from the state auditor, and to pay the fee therefor, is not void as an attempt to regulate interstate commerce. *Crutcher v. Com.* 99 Ky. 6, 40 Am. & Eng. R. Cas. 29.

The business of an agent being to solicit passenger traffic out of California into and through other states to New York city, is a part of interstate commerce, which cannot be restricted or taxed by a municipal corporation. *McCall v. California*, 136 U. S. 104 (34: 391), 3 Inters. Com. Rep. 181.

4 INTER S.

A state statute prohibiting the sale of goods by hawkers or peddlers is not void as a regulation of commerce, where there is no discrimination against nonresidents or goods from out of the state. *Com. v. Gardner*, 7 L. R. A. 666, 133 Pa. 284.

A state tax on stove range agents selling goods which are in the state, not taking orders as drummers, is not unconstitutional as a regulation of interstate commerce. *Hynes v. Briggs*, 41 Fed. Rep. 468.

A state statute requiring a license from every peddler or itinerant trader by sample or otherwise, unless he is a disabled soldier of the state, is unconstitutional as a regulation of commerce. *Wrought Iron Range Co. v. Johnson*, 3 L. R. A. 273, 3 Inters. Com. Rep. 146, 84 Ga. 754.

An ordinance requiring a license tax from peddlers and declaring that all persons selling goods from house to house by retail, from samples or otherwise, shall be deemed peddlers, is, so far as relates to sales made for residents or other states, void as a regulation of commerce in violation of the Constitution of the United States. *Re Kimmel*, 3 Inters. Com. Rep. 114, 41 Fed. Rep. 775.

A state statute requiring a privilege tax of an express company for doing business in the state is unconstitutional, as the business is an agency of commerce. *United States Exp. Co. v. Hemmingway*, 39 Fed. Rep. 60.

A general license tax on a telegraph company doing business in different states affects its entire business, interstate as well as domestic, and is unconstitutional. *St. Louis v. Western U. Teleg. Co.* 39 Fed. Rep. 59.

A tax, under state laws, for the privilege of using the streets, on each telegraph or telephone pole erected or used by any company which is not, by ordinance, taxed for city purposes on its gross income, is a regulation of commerce and void. *St. Louis v. Western U. Teleg. Co. supra*.

The imposition of a license tax on a foreign traveling agent, selling goods by sample for his principal doing business without the state, is a regulation of interstate commerce and invalid. *State v. Agree*, 33 Ala. 110; *Ft. Scott v. Pelton*, 39 Kan. 764; *Asher v. Texas*, 123 U. S. 129 (32: 368), 2 Inters. Com. Rep. 241.

fully present the questions for consideration. It will not be claimed that it is within the province of this court to review any question as to the admission or rejection of testimony which does not bear directly upon some matter of a Federal nature. It will be noticed that no testimony was ruled out showing, or tending to show, what was in fact valued and assessed by the state board. There was also direct testimony that no franchise belonging to the plaintiff was estimated in making the assessment. The inquiry, therefore, in view of the testimony received and that offered and rejected is narrowed to these two matters: First. If an assessing board, seeking to assess for purposes of taxation a part of a road within a state, the other part of which is in an adjoining state, ascertains the value of the whole line as a single property and then determines the value of that within the state, upon the mileage basis, is that a valuation of property outside of the state, and must the assessing board, in order to keep within the limits of state jurisdiction, treat the part of the road within the state as an independent line, disconnected from the part without, and place upon that property only the value which can be given to it if operated separately from the balance of the road. Second. Where an assessing board is charged with the duty of valuing a certain number of miles of railroad within a state forming part of a line of road running into another state, and assesses those miles of road at their actual cash value determined on a mileage basis, is this placing a burden upon interstate commerce, beyond the power of the state, simply because the value of that railroad as a whole is created partly—and perhaps largely—by the interstate commerce which it is doing?

With regard to the first question, it is assumed that no special circumstances exist to distinguish between the conditions in the two states, such as terminal facilities of enormous value in one and not in another. With this assumption the first question must be answered in the negative. The true value of a line of railroad is something more than an aggregation of the values of separate parts of it, operated separately. It is the aggregate of those values plus that arising from a connected operation of the whole, and each part of the road contributes not merely the value arising from its independent operation, but its mileage proportion of that flowing from a continuous and connected operation of the whole. This is no denial of the mathematical proposition that the whole is equal to the sum of all its parts, because there is a value created by and resulting from the combined operation of all its parts as one continuous line. This is something which does not exist, and cannot exist, until the combination is formed. A notable illustration of this was in the New York Central Railroad consolidation. Many years ago the distance between Albany and Buffalo was occupied by three or four companies, each operating its own line of road, and together connecting the two cities. The several companies were united and formed the New York Central Railroad Company, which became the owner of the entire line between Albany and Buffalo, and operated it as a single

road. Immediately upon the consolidation of these companies, and the operation of the property as a single, connected line of railroad between Albany and Buffalo, the value of the property was recognized in the market as largely in excess of the aggregate of the values of the separate properties. It is unnecessary to enter into any inquiry as to the causes of this. It is enough to notice the fact. Now, when a road runs into two states each state is entitled to consider as within its territorial jurisdiction and subject to the burdens of its taxes what may perhaps not inaccurately be described as the proportionate share of the value flowing from the operation of the entire mileage as a single continuous road. It is not bound to enter upon a disintegration of values and attempt to extract from the total value of the entire property that which would exist if the miles of road within the state were operated separately. Take the case of a railroad running from Columbus, Ohio, to Indianapolis, Indiana. Whatever of value there may be resulting from the continuous operation of that road is partly attributable to the portion of the road in Indiana and partly to that in Ohio, and each state has an equal right to reach after a just proportion of that value, and subject it to its taxing processes. The question is, how can equity be secured between the states, and to that a division of the value of the entire property upon the mileage basis is the legitimate answer. Taxing a mileage share of that in Indiana is not taxing property outside of the state.

The second question must also be answered in the negative. It has been again and again said by this court that while no state could impose any tax or burden upon the privilege of doing the business of interstate commerce, yet it had the unquestioned right to place a property tax on the instrumentalities engaged in such commerce. See among many other cases, *Marye v. Baltimore & O. R. Co.* 127 U. S. 117 [32: 94]; *Pullman Palace Car Co. v. Pennsylvania*, 141 U. S. 18 [35: 618], 3 Inters. Com. Rep. 595.

The rule of property taxation is that the property is the basis of taxation. It does not mean a tax upon the earnings which the property makes, nor for the privilege of using the property, but rests solely upon the value. But the value of property results from the use to which it is put and varies with the profitability of that use, present and prospective, actual and anticipated. There is no pecuniary value outside of that which results from such use. The amount and profitable character of such use determines the value, and if property is taxed at its actual cash value it is taxed upon something which is created by the uses to which it is put. In the nature of things it is practically impossible—at least in respect to railroad property—to divide its value, and determine how much is caused by one use to which it is put and how much by another. Take the case before us; it is impossible to disintegrate the value of that portion of the road within Indiana and determine how much of that value springs from its use in doing interstate business, and how much from its use in doing business wholly within the state. An attempt to do so would be entering upon

a mere field of uncertainty and speculation. And because of this fact it is something which an assessing board is not required to attempt. Take for illustration, property whose sole use is for purposes of interstate commerce, such as a bridge over the Ohio between the states of Kentucky and Ohio. From that springs its entire value. Can it be that it is on that account entirely relieved from the burden of state taxation? Will it be said that the taxation must be based simply on the cost, when never was it held that the cost of a thing is the test of its value? Suppose there be two bridges over the Ohio, the cost of the construction of each being the same, one between Cincinnati and Newport, and another twenty miles below and where there is nothing but a small village on either shore. The value of the one will, manifestly, be greater than that of the other, and that excess of value will spring solely from the larger use of the one than of the other. Must an assessing board in either state, assessing that portion of the bridge within the state for purposes of taxation, eliminate all of the value which flows from the use, and place the assessment at only the sum remaining? It is a practical impossibility. Either the property must be declared wholly exempt from state taxation or taxed at its value, irrespective of the causes and uses which have brought about such value. And the uniform ruling of this court, a ruling demanded by the harmonious relations between the states and the national government, has affirmed that the full discharge of no duty entrusted to the latter

restrains the former from the exercise of the power of equal taxation upon all private property within its territorial limits. All that has been decided is that, beyond the taxation of property, according to the rule of ordinary property taxation, no state shall attempt to impose the added burden of a license or other tax for the privilege of using, constructing, or operating any bridge, or other instrumentality of interstate commerce, or for carrying on of such commerce. It is enough for the state that it finds within its borders property which is of a certain value. What has caused that value is immaterial. It is protected by state laws, and the rule of all property taxation is the rule of value, and by that rule property engaged in interstate commerce is controlled the same as property engaged in commerce within the state. Neither is this an attempt to do by indirection what cannot be done directly—that is, to cast a burden on interstate commerce. It comes rather within that large class of state action, like certain police restraints, which, while indirectly affecting, cannot be considered as a regulation of interstate commerce, or a direct burden upon its free exercise. We answer this question, therefore, in the negative.

These are the only matters which seem to distinguish this case from the two preceding, and, therefore, the judgment of the supreme court of Indiana is affirmed.

Mr. Justice Jackson did not hear the arguments in this case or take part in its decision.

ILLINOIS SUPREME COURT.

CHICAGO, BURLINGTON & QUINCY R. CO., *Appl.*,

v.

CHARLES L. JONES.

(See S. C. 24 L. R. A. 141, 149 Ill. 361.)

1. A statute prohibiting more than fair and reasonable rates by a railroad corporation, being merely declaratory of a common law rule, although penal, does not deprive the company of its property without due process of law, because the statute does not fix any limit of the rates,—especially where a provision is made in the same statute for the fixing of rates by commissioners.
2. There is no unconstitutional delegation of power to railroad commissioners by a statute authorizing them to fix reasonable maximum rates of charges for freight and passenger traffic, where their schedule is not final but is made merely *prima facie* evidence of the reasonableness of the rates established.
3. Making a schedule compiled by commissioners *prima facie* evidence that the rates therein fixed are reasonable maximum rates of charges for railroad carriage does not infringe upon the right of trial by jury.
4. Provisions in a statute as to unlawful discrimination in rates will, even if unconstitutional, not make invalid other provisions as to reasonableness of rates.
5. Only transportation within the state, and that which is not a part of any continuous transportation without the state, is within the provisions of sections 1, 7, 8, and 11 of the Act of May 2, 1873, and these do not therefore affect interstate commerce.
6. The power of railroad commissioners to make a schedule of reasonable maximum rates does not impair the obligation of the contract of a railroad company, under the Act of 1852, which authorized its board of directors to establish rates of toll from time to time, but also provides that the company's by-laws shall not be repugnant to the constitution and laws of the state.
7. A schedule of rates cannot be excluded from evidence under the Illinois statutes when accompa-

NOTE.—The above case very fully presents the authorities on the subject of state regulation of carrier's rates. See, on the same subject, *Chicago & N. W. R. Co. v. Dey* (C. C. S. D. Iowa) 1 L. R. A. 4 INTER 8. 744; *Pensacola & A. R. Co. v. State* (Fla.) 3 L. R. A. 661; *St. Louis & S. F. R. Co. v. Gill* (Ark.) 11 L. R. A. 452, and note; *Burlington, C. R. & N. R. Co. v. Dey* (Iowa) 12 L. R. A. 436.

nied by a regular certificate of the commissioners as to its publication on the ground that it never took effect because never published as required by statute, since the statutes make the schedule and accompanying certificate prima facie evidence that the schedule offered is a schedule of the commissioners.

8. A statute changing a rule of evidence is applicable to a pending action.

9. An amendment to a declaration charging a common law liability or implied contract obligation to repay money obtained by wrongful overcharges, states a new cause of action within the rule as to the statute of limitations, where the original counts sought to recover treble damages as a statutory penalty.

Decided April 2, 1894.

APPEAL by defendant from a judgment of the Circuit Court for Knox County in favor of plaintiff in an action brought to recover back overcharges of freight which had been exacted of plaintiff by defendant for the carriage of livestock. *Affirmed.*

Statement by **Magruder, J.:**

This was an action in debt, brought by appellee, Charles L. Jones, against appellant, the Chicago, Burlington & Quincy Railroad Company, under the Act of 1878, to recover penalties for alleged overcharges on shipments of livestock from points on appellant's road in this state to the Union Stock Yards, Chicago. The suit was brought in the circuit court of Knox county on October 17, 1882. On May 25, 1883, appellee filed a declaration consisting of two special counts. The first count alleged that the railroad and warehouse commissioners made and published prior to October 2, 1878, as required by law, a schedule of reasonable maximum rates for appellant; that appellee shipped over appellant's road, subsequent to that date, certain cars of livestock from certain points on its road to Chicago; that appellant charged and received from appellee certain rates of freight, which were in excess of the rates fixed in the commissioners' schedule, whereby, by force of the statute, an action accrued to appellee, to recover three times the amount of the overcharge, and a reasonable attorney's fee. The second count was the same in form, except that it alleged a second schedule made and published by the commissioners prior to December 2, 1881, and certain shipments made, and freights charged and received, in excess of the commissioners' rates, subsequent to that date. On June 8, 1883, appellant filed four pleas to the declaration. The first two pleas set out at length the corporate organization of appellant, and the several special charters of the different companies forming it, by consolidation; that, by these charters, appellant was given power by the legislature to fix its own rates of freight and fare; and that the statute under which the suit was brought was in violation of the obligation of the contract between it and the state. The third plea was *nil debet*; and the fourth, that the cause of action did not accrue within two years. On June 11, 1883, the cause was removed to the circuit court of the United States, but on September 8, 1890, was remanded, and redocketed in the state court. In February, 1891, appellee filed an amended declaration, which consisted of 191 special counts. All of these counts, ex-

cept the last, declared on single shipments on different dates, and were the same in form. Each of the first 124 counts averred the making and publication by the railroad and warehouse commissioners of a schedule of reasonable maximum rates for appellant prior to October 2, 1878,—the rate fixed by the schedule,—the rate charged, and the excess, and that thereby, by force of the statute, a cause of action accrued to the plaintiff for three times the alleged overcharge, and an attorney's fee. The remaining counts, except the last, were the same in form, except that they averred the making of a second schedule prior to December 2, 1881, and shipments subsequent to that date. The last count did not count on the statute, but averred certain shipments, and that the rates charged and received were unreasonable, and that thereby the defendant became indebted to appellee for the alleged overcharge above a reasonable rate. To this declaration, appellant filed seven pleas. The first and second, to all the counts except the last, set up appellant's charters, and the right claimed by it to fix its own rates, and that the statute sued on was a violation of the obligation of its contract with the state, substantially as in the first and second pleas to the original declaration. The third plea was *nil debet*. The fourth and seventh pleas, to all the counts except the last, averred that the causes of action alleged did not accrue within two years before the commencement of the suit. The sixth plea averred that the cause of action set out in the last count did not accrue to the appellee within five years before the filing, or obtaining leave to file, that count. Appellee joined issue on the third, fourth, and seventh pleas, and filed a demurrer to the first, second, and sixth pleas, the fifth having been withdrawn. The demurrer raised two questions: (1) Whether appellant's first and second pleas, setting up its charter provisions, constituted a defense; and (2) whether the cause of action set up by the last additional count was a different cause of action from that declared on in the original declaration. The court sustained appellee's demurrer to the first and second pleas, and overruled his demurrer to the sixth. Issues were subsequently joined, and a trial was

had by a jury. On the trial, appellee gave evidence showing the various shipments made by him for two years prior to the commencement of the suit, and the amount of freight paid on each, and to establish that the rate charged was more than a reasonable rate, and the alleged overcharges, and gave in evidence (1) a schedule of maximum rates, purporting to have been made by the railroad and warehouse commissioners for appellant, dated September 1, 1873, consisting of a classification of freight, and a tabulation of rates referring to this classification, with a certificate of the railroad and warehouse commissioners attached, as to the dates of publication; (2) a like schedule of reasonable maximum rates, purporting to have been made by the railroad and warehouse commissioners for appellant, dated December 1, 1881, and also having a certificate of the railroad and warehouse commissioners attached, as to the dates of publication. To the admission of these schedules in evidence, appellant objected, on the grounds, among others, (1) that the statute on which the suit was brought was unconstitutional and void; (2) that the provision of the statute making the commissioners' schedule prima facie evidence of reasonable maximum rates was unconstitutional and void; (3) that the schedule was not published as required by the statute, and therefore never went into effect as a schedule. Among the instructions asked by appellant, and refused by the court, were (1) an instruction that, under the pleadings and evidence, the plaintiff was not entitled to recover; (2) an instruction that in arriving at their verdict the jury should disregard the schedule of September, 1873; (3) an instruction that in arriving at their verdict the jury should disregard the schedule of December, 1881. The jury rendered a verdict in favor of appellee for \$2368.60, and the court subsequently assessed appellee's attorney's fee at \$1200. A motion for a new trial was entered, and overruled, and judgment was rendered in favor of appellee for the amount of the verdict and costs. From this judgment, appellant has appealed to this court.

Messrs. Herrick & Allen for appellant.
Messrs. J. B. Cessna and Willoughby & Barnes for appellee.

Magruder, J., delivered the opinion of the court:

The questions presented by this record concern the validity of the system under which for twenty years or more, the rates of railroad charges for the transportation of passengers and freight have been controlled and regulated by this state, through the medium of a board of railroad and warehouse commissioners. The principal points raised by the demurrers to the pleas, by the objections to the introduction of evidence, and by the refusal of instructions, relate to the constitutionality of the act of the legislature of this state, approved May 2, 1873, in force July 1, 1873, entitled "An Act to prevent extortion and unjust discrimination in the rates charged for the transportation of passengers and

freights on railroads in this state, and to punish the same, and prescribe a mode of procedure and rules of evidence in relation thereto, and to repeal an act entitled 'An Act to prevent unjust discriminations and extortions in the rates to be charged by the different railroads in this state for the transportation of freights on said roads,' approved April 7, A. D. 1871." 2 Starr & C. Anno. Stat. p. 1961; Rev. Stat. 1885, chap. 114, p. 951, §§ 124-133. Section 1 provides: "If any railroad corporation," etc., "shall charge, collect, demand, or receive more than a fair and reasonable rate of toll or compensation for the transportation of passengers or freight, . . . the same shall be deemed guilty of extortion, and upon conviction thereof shall be dealt with as hereinafter provided." Section 6 provides: "If any railroad corporation shall, in violation of any of the provisions of this act, ask, demand, charge, or receive of any person or corporation any extortionate charge or charges for the transportation of any passengers, goods, merchandise, or property, . . . the person or corporation so offended against may, for each offense, recover from such railroad corporation, in any form of action, three times the amount of the damages sustained by the party aggrieved, together with costs of suit and a reasonable attorney's fee, to be fixed by the court," etc. Section 9 is as follows: "The railroad and warehouse commissioners are hereby directed to make, for each of the railroad corporations doing business in this state, as soon as practicable, a schedule of reasonable maximum rates of the charges for the transportation of passengers and freights, and cars on each of said railroads; and such schedule shall, in all suits brought against such railroad corporations wherein is in any way involved the charges of any such railroad corporation for the transportation of any passengers or freight or cars, or unjust discrimination in relation thereto, to be deemed and taken in all courts of this state as prima facie evidence that the rates therein fixed are reasonable maximum rates of charges for the transportation of passengers and freight, and cars upon the railroads for which said schedules may have been respectively prepared. Said commissioners shall, from time to time, and as often as circumstances may require, change and revise said schedules. When any schedule shall have been made or revised as aforesaid, it shall be the duty of said commissioners to cause publication thereof to be made for three successive weeks in some public newspaper published in the city of Springfield in this state. All such schedules heretofore or hereafter made purported to be printed or published as aforesaid, shall be received and held in all such suits as prima facie evidence of the schedules of said commissioners, without further proof than the production of the schedules desired to be used as evidence, with a certificate of the railroad and warehouse commissioners that the same is a true copy of a schedule prepared by them for the railroad company or corporation therein named, and that the same has been published as required by law, stating the name of the paper in which the

same was published, together with the date of such publication."

1. The first ground upon which counsel for appellant attack the act is that it is void for uncertainty, in not defining the offenses for which the penalties provided for are imposed. The basis of this attack is found in the words: "If any railroad corporation," etc., "shall charge," etc., "more than a fair and reasonable rate," etc. It is said that it is uncertain what a fair and reasonable rate is as the determination of that question will depend upon a variety of considerations, such, for instance, as the character of the freight, the necessity of dispatch, the cost of cleaning and unloading cars, the risk of liability, as affected by the value of the article as carried, the volume of business, the amount of car room required, the difficulty of the service, the special attention demanded, etc.; that the offense of charging more than a fair and reasonable rate can only be defined when the jury, in each particular case, shall decide from the evidence before them what is a fair and reasonable rate; that the statute, being penal in its character, should describe the offense in terms which are free from ambiguity; and that the enforcement of a statute whose meaning is thus doubtful violates that provision in the Federal and state constitutions which declares that no person shall be deprived "of life, liberty, or property without due process of law." The difficulties which stand in the way of determining what are reasonable rates also stand in the way of embodying in a legal enactment such an exact definition as is insisted upon. If the legislature, in the act passed by it, fixes particular rates or charges, strict compliance therewith may work hardship, in view of the impossibility of always providing in advance for the effect of varying circumstances and conditions. The first section of the statute is merely declaratory of a well-known principle of the common law. At common law the common carrier was obliged to receive and carry all goods offered for transportation, upon receiving a reasonable hire (*Messenger v. Pennsylvania R. Co.* 36 N. J. L. 407, 18 Am. Rep. 457; *New England Exp. Co. v. Maine Cent. R. Co.* 57 Me. 188, 2 Am. Rep. 31); and the court was to judge of the reasonableness of the freight charges. *Gard v. Callard*, 6 Maule & S. 70; *Lowden v. Hierons*, 2 Moore, 102; *Bazendale v. Great Western R. Co.* 5 C. B. N. S. 330. As common carriers must carry all freight offered to them and can only make a reasonable charge for so doing, it follows that the statute is only an expression of what was the law without the statute. Undoubtedly, the legislature has the power to declare what is a reasonable compensation, or to fix the reasonable maximum rates of charges. *Dow v. Beidelman*, 125 U. S. 680, 31 L. ed. 841. But in the absence of statutory regulation upon the subject, the courts must decide what is reasonable. *Dow v. Beidelman*, *supra*; *Munn v. Illinois*, 94 U. S. 113, 24 L. ed. 77; *Chicago, B. & Q. R. Co. v. Iowa*, 94 U. S. 155, 24 L. ed. 94; *Budd v. New York*, 143 U. S. 517, 36 L. ed. 247, 4 Inters. Com. Rep. 45. This being so, we are unable to see how

the statute here deprives the appellant of its property without due process of law. If the legislature has failed to fix a reasonable rate, then the courts must decide for the railroad companies, when controversies arise, what is a reasonable rate. *Chicago, B. & Q. R. Co. v. Iowa*, *supra*.

But we held in *Chicago, B. & Q. R. Co. v. People*, 77 Ill. 443, that the first section of this statute should be construed in connection with the eighth, and that the latter section, by providing for the making, by the railroad and warehouse commissioners, of a schedule of reasonable maximum rates for each of the railroad corporations in the state, furnished a uniform rule for the guidance of the railroad companies. In that case we said: "When that is done there will be a standard of what is fair and reasonable, and the statute can be conformed to and obeyed." It is true that the taking of higher rates than those fixed by the commissioners' schedule of rates is not the exact form of statutory offense, and the taking of such higher rates might not subject to the penalties of the statute, upon the making of proof that they were fair and reasonable. Still, as we view it, to constitute the offense really designed and intended by the statute, regarding it in its whole scope and purpose, the rates taken must have been in excess of the schedule rates." This construction of the two sections, as related to each other, is not forbidden by the character of the act as a penal statute. Although penal laws are to be construed strictly, yet "the object in construing penal as well as other statutes is to ascertain the legislative intent." *United States v. Hartwell*, 73 U. S. 6 Wall. 395, 18 L. ed. 832. The statutory counts of the declaration in the case at bar contain an averment that a schedule of rates had been established by the board of commissioners, and that the defendant had received compensation in excess of those rates. It thus avoids the defect for which the declaration in *Chicago, B. & Q. R. Co. v. People*, *supra*, was condemned. Upon this branch of the case, counsel for appellant rely upon the case of *Louisville & N. R. Co. v. Railroad Commission of Tennessee*, 19 Fed. Rep. 679, decided by the circuit court of the United States, sitting in Tennessee; but a comparison of the statute of Tennessee which was under consideration in that case with the Illinois statute under which the present suit is brought will show that they differ from each other in many respects. In *Stone v. Farmers Loan & T. Co.* 116 U. S. 307, 29 L. ed. 636, the Supreme Court of the United States passed upon the validity of a statute of Mississippi passed in 1884, and entitled "An Act to provide for the regulation of freight and passenger rates in this [that] state, and to create a commission to supervise the same and for other purposes," which is similar, in many of the essential features, to the Illinois Act of 1873. It was objected to the Mississippi act that it was void for want of sufficient certainty, and the case of *Louisville & N. R. Co. v. Railroad Commission of Tennessee*, *supra*, was referred to in support of the objection. But Chief Justice Waite, in delivering the opinion of the court in the *Stone*

Case, says of the Mississippi statute: "It is difficult to understand precisely on what ground we are expected to decide that this statute is so inconsistent and uncertain as to render it absolutely void on its face.

We find nothing in it to show that the statute, as it now stands, is altogether void and inoperative." See also *Stone v. Yazoo & M. V. R. Co.* 62 Miss. 607, 52 Am. Rep. 193. We are not convinced that it is our duty to hold said Act of 1873 void for uncertainty in defining the offense for the commission of which it imposes the penalties therein mentioned.

2. It is claimed that the provision contained in said section 8 which authorizes the commissioners to fix for each of the railroads in the state a schedule of reasonable maximum rates is unconstitutional, as being an attempted delegation of legislative power. The constitutional provisions on this subject are as follows: "And the general assembly shall, from time to time, pass laws establishing reasonable maximum rates of charges for the transportation of passengers and freight on the different railroads in this state." Const. art. 11, § 12, 1 Starr & C. Anno. Stat. p. 163. "The general assembly shall pass laws to correct abuses and prevent unjust discrimination and extortion in the rates of freight and passenger tariffs on the different railroads in this state, and enforce such laws by adequate penalties to the extent, if necessary for that purpose, of forfeiture of their property and franchises." Const. art. 11, § 15, 1 Starr & C. Anno. Stat. p. 164. The power to regulate and control the charges of railroad companies, or other agencies engaged in public employments, is legislative, and not judicial. Independently of such constitutional provisions as are above quoted, it is now the settled doctrine in this country that the legislatures of the states have the power to regulate and settle the freight and passenger charges of railroad companies; and the charges for services of other employments which are public in their character, subject only to such restraints as are imposed by charter contracts, and by the authority of Congress to regulate foreign and interstate commerce. *Munn v. Illinois*, 94 U. S. 113, 24 L. ed. 77; *Chicago, B. & Q. R. Co. v. Iowa*, 94 U. S. 155, 24 L. ed. 94; *Budd v. New York*, 143 U. S. 517, 36 L. ed. 247, 4 Inters. Com. Rep. 45. This doctrine is not here controverted. It is admitted that if, in the Act of 1873, the legislature had prescribed, in definite and specific figures, reasonable maximum rates of charges, the law would have been valid. By an Act approved April 15, 1871, the legislature of Illinois classified the railroads in the state into four classes, and provided that those in the first class should be limited to 2½ cents per mile, those in the second class to 3 cents per mile, those in the third to 4 cents per mile, and those in the fourth class to 5½ cents per mile, as compensation for the transportation of any person with a certain amount of ordinary baggage. Ill. Laws 1871, p. 640. We held this law to be valid. *Ruggles v. People*, 91 Ill. 256. The Supreme Court of the United States

affirmed the decision. *Ruggles v. Illinois*, 108 U. S. 526, 27 L. ed. 812.

The objection made to the Act of 1873 is that it is not such an act as was the Act of 1871, which was repealed on March 31, 1874. 2 Starr & C. Anno. Stat. p. 2368. The Act of 1873 is said to be invalid because, instead of establishing reasonable maximum rates of charges, it is supposed to delegate the power to establish such rates to the railroad and warehouse commissioners. It has been held, in a number of cases, that statutes which create boards of commissioners, and authorize them to make schedules of rates for railroad companies, are not invalid for the reason here urged. The doctrine of these cases is that the functions of such boards are administrative, rather than legislative; that the authority conferred upon them relates merely to the execution of the law; that a grant of legislative power to do a certain thing carries with it the power to use all proper and necessary means to accomplish the end; and that, as the reasonableness of rates changes with circumstances, and legislatures cannot be continuously in session, the requirement that the statute itself shall fix the charges might preclude the legislature from the use of the agencies necessary to perform the duty imposed upon it by the constitution; in short, that the legislature may authorize others to do things which it might properly, but cannot conveniently or advantageously, do itself. *State v. Chicago, M. & St. P. R. Co.* 38 Minn. 281; *Georgia R. Co. v. Smith*, 70 Ga. 694; *Tilley v. Savannah, F. & W. R. Co.* 5 Fed. Rep. 641; *Chicago & N. W. R. Co. v. Dey*, 35 Fed. Rep. 866; *State v. Fremont & E. M. Valley R. Co.* 22 Neb. 313, 23 Neb. 117; *People v. Harper*, 91 Ill. 857; 8 Am. & Eng. Enc. Law, p. 911.

In *State v. Chicago, M. & St. P. R. Co.* *supra*, the eighth section of the Minnesota statute, which was there held to be constitutional, provided that the railroad and warehouse commissioners should have the power, in case the tariffs of rates, fares, charges, or classifications filed and published by the railroad companies should be unreasonable, to change them, and make them reasonable, and compel the carriers to adopt them as thus changed, and, upon refusal, to enforce compliance by mandamus; and said section also declared that it should be unlawful for any common carrier to charge a higher or lower rate than that fixed and published by the commission. In that case the supreme court of Minnesota interpreted the eighth section to mean that the rates recommended and published by the commission in the manner required by the act, were not simply advisory, nor merely *prima facie* equal and reasonable, but final and conclusive as to what were lawful or equal and reasonable rates, and that, in proceedings to compel compliance, no issue could be made, or inquiry had, as to the equality and reasonableness of the rates in fact. It was there conceded by counsel that the legislature could declare the schedule of rates fixed by the commission to be *prima facie* evidence of what was equal and reasonable, but the court held that the legislature

had the power to create a commission whose judgment or determination as to what was reasonable should be final and conclusive. The Minnesota case was taken to the Supreme Court of the United States, and the judgment therein rendered was reversed upon the ground that the Minnesota statute, as construed by the supreme court of that state, conflicted with the constitutional provision forbidding the states to deprive persons of their property without due process of law. *Chicago, M. & St. P. R. Co. v. Minnesota*, 184 U. S. 418, 38 L. ed. 970. In the latter case, Mr. Justice Blatchford, in delivering the opinion of the court, said of the statute: "It deprives the company of its right to a judicial investigation, by due process of law, under the forms and with the machinery provided by the wisdom of successive ages for the investigation judicially of the truth of a matter in controversy, and substitutes therefor, as an absolute finality, the action of a railroad commission, which, in view of the powers conceded to it by the state court, cannot be regarded as clothed with judicial functions, or possessing the machinery of a court of justice." From this decision, *Justices* Bradley, Gray, and Lamar dissented, and held, in their dissenting opinion, that there was no good reason why the legislature might not delegate the duty of regulating and fixing the charges, so as to make them equal and reasonable, to such a board of commissioners as was provided for in the Minnesota statute.

Subsequently, in the case of *Budd v. New York*, 143 U. S. 517, 36 L. ed. 247, 4 Inters. Com. Rep. 45, the case of *Chicago, M. & St. P. R. Co. v. Minnesota*, supra, was reviewed and explained. The doctrine of *Munn v. Illinois*, supra, and of the other cases known as the "*Granger Cases*," in 94 U. S. 155-181, 24 L. ed. 94, 102, was adhered to; and it was held that the Minnesota law had been declared invalid because it had been construed by the supreme court of that state "as providing that the rates of charges for the transportation of property by railroads, recommended and published by the commission, should be final and conclusive as to what were equal and reasonable charges, and that there could be no judicial inquiry as to the reasonableness of such rates."

We understand the doctrine of *Chicago, M. & St. P. R. Co. v. Minnesota*, supra, and of *Budd v. New York*, supra, to be as follows: The legislature has the power to directly fix the rates of charges. It has the right to declare what is reasonable. When it does so, its declaration is conclusive as to the reasonableness of the rates, and a charge beyond the maximum fixed by it must be regarded as unreasonable. But, where the legislature creates a commission to regulate the rates of charges, such commission has no power to make a schedule of rates which shall be final and conclusive evidence as to the reasonableness of the charges is unconstitutional, because judicial inquiry is thereby cut off. We do not, however, understand the Federal cases to hold that an act of a state legislature may not be valid, if, while omitting to itself fix the maximum rates, it cre-

ates a commission with authority to make schedules which shall be prima facie evidence of the reasonableness of the rates. Where the schedule is only made prima facie evidence, the court, in a suit against the carrier, can inquire and determine what is a reasonable rate; and the defect which was found to exist in the Minnesota law is thus obviated. Such is the character of the Illinois Act of 1873, which provides, in section 8, that the schedule made, published, and certified by the commissioners shall, in all suits brought against the railroad corporations, involving their freight and passenger charges, etc., be "deemed and taken, in all courts of this state, as prima facie evidence that the rates therein fixed are reasonable maximum rates of charges," etc. One of the criticisms made upon the construction given by the supreme court of Minnesota to the statute in that state is expressed in *Chicago, M. & St. P. R. Co. v. Minnesota*, supra, in the following words: "The supreme court authoritatively declares that it is the expressed intention of the legislature of Minnesota, by the statute, that the rates recommended and published by the commission, if it proceeds in the manner pointed out by the act, are not simply advisory, nor merely prima facie equal and reasonable." The Mississippi statute, which was held to be a valid law in *Stone v. Farmers Loan & T. Co.* supra, contained a provision that the determination of the commissioners should be received in the courts as prima facie evidence that such determination was right and proper. So, also, the Iowa statute, which was held not to be unconstitutional as a delegation of legislative power in *Chicago & N. W. R. Co. v. Dey*, supra, provided that the schedule made by the commissioners should be prima facie evidence of the reasonableness of the rates therein charged, in all suits brought against the railroad corporations.

Under the constitutional provisions above quoted, the legislature of this state has the right, and it is its prerogative, if it chooses to exercise it, to pass a law establishing or fixing reasonable maximum rates of charges. When it passed the Act of 1873, it did not choose to exercise the power thus conferred upon it. That act does not establish reasonable maximum rates, nor does it delegate to the board of railroad and warehouse commissioners the power to establish such rates. When a board is authorized to make a schedule of rates, and their schedule is merely given the force and effect of prima facie evidence as to the reasonableness of the rates in a suit involving the question of such reasonableness, there is no delegation to the board of the legislative power to establish rates. The legislature thereby merely refrains from the exercise of its constitutional power, and, by leaving the question as to the reasonableness of the rates open, makes room for the exercise by the courts of their jurisdiction upon the subject. The final tribunal of arbitrament is not the judiciary, but the legislature. But "when the legislature declares that the charges shall be reasonable, or, which is the same thing, allows the common law rule to that effect to prevail, and leaves the matter there, then resort may be had to

the courts, to inquire judicially whether the charges are reasonable." *Chicago, M. & St. P. R. Co. v. Minnesota*, 184 U. S. 462, 33 L. ed. 983. The decision in *Chicago, M. & St. P. R. Co. v. Minnesota*, *supra*, does not base the invalidity of the Minnesota statute upon the ground that the provision making the schedule of the commission final and conclusive as to the reasonableness of the rates was a delegation of legislative power to the commission. Nor do we deem it necessary to decide whether such a provision would amount to a delegation of legislative power, or not. But, if it be conceded that making the schedule of the commission final and conclusive as to the rates is a delegation of legislative power, it is sufficient to say, in the present case, that the Act of 1873 does not give to the schedule any such final and conclusive effect. We are therefore of the opinion that the act is not unconstitutional for the second reason urged upon our attention by counsel.

3. It is argued that the provision of the statute making the schedule of the commissioners prima facie evidence that the rates therein fixed are reasonable maximum rates of charges is unconstitutional and void, not only as depriving the carriers of their property without due process of law, but as infringing upon the right of trial by jury. We do not think that this objection should be sustained. In the first place, the act does not deprive the railroad corporations of the right to have a judicial determination of the reasonableness of the rates, if they are not satisfied with the schedule made by the commission. The courts are open to them for a review of the acts of the commissioners in fixing the rates of charges. In the next place, the provision is an exercise by the legislature of its undoubted power to prescribe the rules of evidence. 2 Rice, Ev. pp. 806, 807; *Com. v. Williams*, 6 Gray, 1; *State v. Hurley*, 54 Me. 562. Such provisions are not unusual. Cases have arisen in this state under a statute making the fact of injury caused by sparks from a locomotive passing along the road prima facie evidence of negligence, and no question has ever been raised as to the validity of the statute. *Pittsburg, C. & St. L. R. Co. v. Campbell*, 86 Ill. 448; *St. Louis V. & T. H. R. Co. v. Funk*, 85 Ill. 480; *Toledo, W. & W. R. Co. v. Larmon*, 67 Ill. 68; *Rockford, R. I. & St. L. R. Co. v. Rogers*, 62 Ill. 346; *Chicago & A. R. Co. v. Clampt*, 63 Ill. 95; *Chicago & A. R. Co. v. Quaintance*, 58 Ill. 389. Acts making tax deeds prima facie evidence of the regularity of the proceedings antecedent to the deed have been held to be valid. 2 Rice, Ev. p. 607; *Hand v. Ballou*, 12 N. Y. 541; *Delaplains v. Cook*, 7 Wis. 54; *Allen v. Armstrong*, 16 Iowa, 508; *Wright v. Dunham*, 13 Mich. 414; *Gage v. Caraher*, 125 Ill. 451. See also *Williams v. German Mut. F. Ins. Co.* 68 Ill. 387. Cases referred to by counsel, which involve the validity of acts providing for references to auditors or referees, and making the findings of facts by them in their reports prima facie evidence of the facts in trials before juries, will be found to be clearly distinguishable from the case at bar. The supreme court of

Iowa has decided that a provision making the schedule of the commission prima facie evidence of the reasonableness of the rates of charges, as contained in a statute of that state similar to the said Act of 1873, was not obnoxious to the objections here urged against it, saying: "The provision of the statute that the rates fixed by the commissioners shall be regarded as prima facie reasonable is not of an unusual character, and was enacted in the exercise of the undoubted power of the state to prescribe rules of evidence in all proceedings under the laws of the state." The law presumes the acts of officers of the state to be rightfully done, and gives them faith accordingly. This rule is not unlike the provision of the statute complained of by the plaintiff." *Burlington, C. R. & N. R. Co. v. Dey*, 82 Iowa, 312, 12 L. R. A. 486. See also *Chicago & A. R. Co. v. People*, 67 Ill. 11, 16 Am. Rep. 599.

4. It is contended that the statute has been held to be unconstitutional as to interstate shipments, and that, therefore, it is void as a whole. This contention is based upon the decisions of this court in *People v. Wabash, St. L. & P. R. Co.* 104 Ill. 476, and *Wabash, St. L. & P. R. Co. v. People*, 105 Ill. 286, and of the Supreme Court of the United States in *Wabash, St. L. & P. R. Co. v. Illinois*, 118 U. S. 557, 30 L. ed. 244. In the Illinois cases the action was to recover for unjust discrimination in carrying the same class of freight from Peoria to New York city for a less sum of money than similar freight was carried from Gilman to New York city; Peoria being a greater distance from New York than Gilman, and being 86 miles further west in Illinois upon the defendant company's road from a station near the eastern boundary of Illinois, than Gilman. The judgments in the Illinois cases were reversed by the United States Supreme Court in the *Wabash, St. L. & P. R. Co. case*, *supra*, because of the interpretation placed by this court upon those sections of the Act of 1873 which relate to unjust discrimination, and not because the United States Supreme Court considered the Act of 1873 invalid, as amounting to an attempted regulation of commerce. The latter court, in the *Wabash, St. L. & P. R. Co. case*, *supra*, said: "It might admit of question whether the statute of Illinois now under consideration was designed by its framers to affect any other class of transportation than that which begins and ends within the limits of the state." The question whether the Illinois statute was or was not so designed by its framers was not as carefully considered in the above cases as it would have been, had it not been for the construction therein placed upon the previous decisions of the Federal Supreme Court. The latter decisions were then understood as holding that a state law prohibiting unjust discrimination in the rates of charges for the transportation of property between points wholly within the state, whether it was a part of a continuous carriage to a point out of the state, or not, was not invalid, in the absence of congressional action upon the subject, and when construed as the Act of 1873 was construed in the Illinois cases. With

such understanding of the Federal rulings, this court held that, while the provisions of the Act of 1873 relating to unjust discrimination were inoperative upon that part of the contract of shipment which had reference to the transportation outside of the state, they were binding and effectual as to so much of the transportation as was within the limits of the state. In the opinion of the majority of the court (*Chief Justice Waite and Justices Bradley and Gray dissenting*) in *Wabash, St. L. & P. R. Co. v. Illinois*, *supra*, *Mr. Justice Miller* said: "It cannot be denied that the general language of the court in these cases, upon the power of Congress to regulate commerce, may be susceptible of the meaning which the Illinois court places upon it." In the same opinion the same learned justice, in speaking for the majority, while stating that they were bound by the construction given by this court to the Illinois statute, and that this court had so construed the statute as to make it apply to commerce among the states, also said: "If the Illinois statute could be construed to apply exclusively to contracts for a carriage which begins and ends within the state, disconnected from a continuous transportation through or into other states, there does not seem to be any difficulty in holding it to be valid." Looking, however, at the provisions of the Act of 1873 which have reference to unjust discrimination, in the light of the construction given to them in the Illinois cases above referred to, the Federal Supreme Court held those decisions invalid, as applied to unjust discrimination in the rates of charges for the transportation of property within the state, when such transportation was part of a continuous carriage from a point within to a point without the state, upon the ground that such construction made the provisions conflict with the constitutional grant to Congress of power to regulate interstate commerce. This court might be inclined to consider the question whether the construction announced in said cases and accepted by the United States Supreme Court, may not have been incorrect, and unauthorized by the language of the act, if the present suit had arisen under those sections of the act which have reference to unjust discrimination. But the case at bar arises under the provisions which prohibit the charge of more than fair and reasonable rates. This action is brought for damages growing out of alleged charges of unreasonable rates for the transportation of property between points lying wholly within the state, and not being part of a continuous transportation to any point outside of the state. It is within the power of the legislature to so amend the act as clearly to limit the provisions concerning unjust discrimination to commerce carried on within the state.

Counsel claim that the provisions relating to interstate commerce are so intimately connected with those relating to commerce carried on wholly within the limits of the state as not to be separable, the one from the other, and that, as the act has been declared invalid when applied to interstate commerce, it must also be invalid as applied to state commerce. Upon this point, reference is made to cases

holding that words of limitation cannot be introduced into a penal statute, so as to make it specific, when, as expressed, it is general only. *United States v. Reese*, 92 U. S. 214, 23 L. ed. 568; *Trade-Mark Cases*, 100 U. S. 82, 25 L. ed. 550; *Baldwin v. Franks*, 120 U. S. 678, 80 L. ed. 766. If the doctrine of these cases is applicable to the case at bar, it is only applicable to the sections of the Act of 1873 relating to unjust discrimination; and the effect of its application would be to hold those sections void, as affecting transportation within the state, because they had been held void as affecting interstate transportation, but the effect would not be to invalidate the act, so far as it relates to charges of fair and reasonable rates alone. Where a part of a statute is unconstitutional, the remainder will not be declared unconstitutional also, if the two are distinct and separable, so that the latter may stand, though the former becomes of no effect. The constitutional and unconstitutional provisions may sometimes be contained in the same section, but do not necessarily fall together, unless they "are essentially and inseparably connected in substance. If, when the unconstitutional portion is stricken out, that which remains is complete in itself, and capable of being executed in accordance with the apparent legislative intent, wholly independent of that which was rejected, it must be sustained."

... If a statute attempts to accomplish two or more objects, and is void as to one, it may still be, in every respect, complete and valid as to the other. ... A legislative act may be entirely valid as to some classes of cases, and clearly void as to others." *Cooley*, *Const. Lim.* 6th ed. pp. 211, 213; *Dupee v. Swigert*, 127 Ill. 494. An examination of the Act of 1873 in the light of these principles of construction will show that parts of the act relate to the prevention of unjust discrimination between persons and places in the rates of charges for transportation, while other parts relate to the prevention of charges that exceed fair and reasonable rates. Sections 2 and 3 of the Act relate more particularly to unjust discrimination, and their aim is "against favoritism,—against charging one shipper more than another for the like service under like conditions." *Indianapolis, D. & S. R. Co. v. Ervin*, 118 Ill. 250; *Illinois Cent. R. Co. v. People*, 121 Ill. 304. Section 1, in connection with sections 7 and 8, concerns the question whether the rate charged a passenger or shipper is reasonable or not, irrespective of the charge that may be made against another passenger or shipper, or at another point. It is easy to see that there is a difference between extortion and discrimination. Hence, we think that the provisions of the act upon the two subjects can be separated and disconnected from each other so that those portions relating to reasonable charges may stand, even if those portions relating to unjust discrimination fall. Whether the latter do or must fall, or not, we do not decide. It is to be noted, however, that in *Indianapolis, D. & S. R. Co. v. Ervin*, and *Illinois Cent. R. Co. v. People*, *supra*, this court treated the whole of the Act of 1873 as valid, as applied to commerce wholly within the

state. The *Wabash, St. L. & P. R. Co. cases*, 104 Ill. 476, 105 Ill. 286, arose under the sections relating to unjust discrimination; and it was those sections which were therein construed as being "broad enough to include unjust discrimination in the rates of charges for the transportation of property from a point within to a point without the state." The provisions of the act relating to fair and reasonable rates were not construed as being broad enough to prohibit charges of more than reasonable rates for transportation outside of the state, or within it, as part of a carriage beyond the state. Therefore, the question whether these provisions were intended to apply only to transportation between points lying wholly within the state, and disconnected from a continuous carriage to a point outside of the state, is not a question which is settled in the decisions of the *Wabash, St. L. & P. R. Co. cases*. After a careful study of the terms of the act, we are of the opinion that the first section, read in connection with the title, and sections 7, 8, and 11, applies only to charges of reasonable rates for such transportation within the state as is not a part of a continuous transportation without the state, and therefore does not infringe upon the power of Congress to regulate interstate commerce. The title of the act is "An act to prevent extortion . . . in the rates charged for the transportation of passengers and freights on railroads in this state," and not on railroads outside of this state. The railroad corporations forbidden by section 1 to charge more than reasonable rates are thus therein described: "Any railroad corporation organized or doing business in this state under any act of incorporation, or general law of this state, now in force, or which may hereafter be enacted, or any railroad corporation organized, or which may hereafter be organized under the laws of any other state, and doing business in this state." Section 11 provides that the term "railroad corporation," contained in the act, shall be taken to mean all corporations, etc., now or hereafter owning or operating "any railroad, in whole or in part, in this state," and to apply to all persons, whether incorporated or not, "that shall do business as common carriers upon any of the lines of railway in this state," etc. Section 1 forbids the charging of more than reasonable rate for the transportation of passengers or freight or cars "upon any railroad within the state." Section 8 directs the railroad and warehouse commissioners to make "for each of the railroad corporations doing business in this state" a schedule of reasonable maximum rates of charges for the transportation of passengers and freight and cars "on each of said railroads." It is quite manifest that the schedule thus required to be made is of more importance in determining what are reasonable rates of charges than in determining whether there has been unjust discrimination. In section 8 the discriminating rates, charges, etc., therein referred to, are made *prima facie* evidence of unjust discrimination, without mention of the schedule. If the greater distance (from Peoria to New York) and the shorter distance (from Gilman to New York)

are given, and the fact is ascertained that the charge for transportation over such greater distance is less than the charge therefor over such shorter distance, a discrimination is at once established, whether the whole of the distances be regarded, or the proportional parts thereof in this state. Given the facts of the distances, whether without or within the state, and of the actual charges, and the question of discrimination is determined, though reference to the schedule may be made as to the injustice of the discrimination to the individual. But it could not have been the intention of the legislature that this schedule should be *prima facie* evidence of what were reasonable maximum rates of charges for transportation outside of the state, or for such transportation within it as might be a part of a continuous transportation from within to without. Other states would have their own laws and commissioners, and methods of ascertaining rates. The railroad and warehouse commissioners named in schedule 8 are Illinois officials, appointed by the governor, with jurisdiction limited to this state, and without power or opportunity to gather the data for fixing reasonable rates of transportation outside of the state, or within the state, as connected with a continuous carriage to a point beyond its limits. The act establishing the board of railroad and warehouse commissioners provides that only railroads incorporated or doing business in this state shall make sworn statements of their affairs to said commissioners. 2 Starr & C. Anno. Stat. pp. 1956-1958. Section 7 of the Act of 1878 requires the commissioners to ascertain whether the provisions of the act have been violated by "any railroad corporation in this state," and for that purpose "to visit the various stations upon the line of each railroad." We construe these features of the act to indicate that, so far as the provisions relating to the charges of reasonable rates are concerned, it was not the intention of the legislature to make them apply to any other kind of transportation than that which should occur wholly within the boundaries of this state, or to any other kind of contracts than those for a carriage which begins and ends within the state, disconnected from a continuous transportation through or into other states. Consequently, we hold the provisions relating to charges of reasonable rates to be valid.

5. The statute granting power to the railroad commissioners to make a schedule of reasonable maximum rates for appellant is alleged to be a violation of appellant's charter, so as to impair the obligation of its contract with the state, and therefore the act is said to be void as to appellant. This point is settled adversely to appellant by the cases of *Ruggles v. People*, 91 Ill. 256, and *Ruggles v. Illinois*, 108 U. S. 526, 27 L. ed. 812. In the former case, one of the questions submitted by the stipulation was whether a law establishing a reasonable maximum rate of charges for the transportation of passengers on railroads in this state was such a constitutional law as appellant "was bound to obey, . . . notwithstanding the provisions of its charter;" and it was there held

that the law was valid, and that the legislature has the power to fix a maximum rate of charges for corporations exercising a business public in its character, and that such regulation does not impair the obligation of the contract in their charters. In *Ruggles v. Illinois*, *supra*, the provisions of appellant's charter are fully set out. It is not denied that, by consolidation and statutory provisions, appellant acquired the powers and franchises granted to the Central Military Tract Company by an act to incorporate the latter company passed on February 15, 1851, and by an act to amend said act passed on June 19, 1852. By section 3 of said Act of 1851, said company was thereby "created and incorporated for the purpose of organizing under an act entitled 'An Act to Provide for a General System of Railroad Incorporations,' in force November 5, 1849," and was "entitled to have and exercise the powers and privileges, and be subject to the liabilities therein enumerated." The General Law of 1849, in clause 10 of section 21 thereof, conferred upon railroad companies organized thereunder the right "to regulate the time and manner in which passengers and property shall be transported, and the tolls and compensation to be paid therefor; but such compensation for any passenger and his ordinary baggage shall not exceed three cents a mile, unless by special act of the legislature, and shall be subject to alteration as hereinafter provided." It also provides, in section 32, that "the legislature may, when any such railroad shall be opened, for use, from time to time, alter or reduce the rates of toll, fare, freight, or other profits upon such roads; but the same shall not, without the consent of the corporation, be so reduced as to produce with said profits less than fifteen per cent per annum on the capital actually paid in; nor unless on an examination of the amounts received and expended, to be made by the secretary of state, he shall ascertain that the net income derived by the company from all sources from the year then last past shall have exceeded an annual income of fifteen per cent upon the capital of the corporation actually paid in." The sixth section of the Act of 1852 is as follows: "The said company shall have power to make, ordain, and establish all such by-laws, rules, and regulations as may be deemed expedient and necessary to fulfill the purposes and carry into effect the provisions of this act, and for the well ordering, regulating, and securing the affairs, business, and interest of the company: provided, that the same be not repugnant to the Constitution and laws of the United States or of this state, or repugnant to this act. The board of directors shall have power to establish such rates of toll for the conveyance of persons or property upon the same, as they shall from time to time, by their by-laws determine, and to levy and collect the same for the use of the said company. The transportation of persons and property, the width of track, and all other matters and things respecting the use of said road, shall be in conformity to such rules and regulations as the said board of directors shall from time to time determine." It is now claimed by the ap-

4 INTER 8.

pellant that it still has the right, under its original charter of 1851, of fixing rates, subject only to a limit of three cents a mile on passengers, and that the state has no power to interfere, except to keep the annual profits down to 15 per cent per annum on the paid-up capital, and that the Act of 1873, giving the commissioners power to make a schedule of maximum reasonable rates for appellant, ignores these limitations upon the power of the state to regulate its charges. Although the Act of 1852 is entitled "An Act to Amend the Charter of 1851," it is a complete charter in itself. It contains provisions not found in the General Railroad Law of 1849. The plea alleges that it was accepted by appellant, and it was evidently intended and accepted as a substitute for the charter of 1851. In *Ruggles v. Illinois*, *supra*, it was contended by appellant that the Act of 1852 repealed sections 21 and 32 of the old charter, with the limitations therein contained as above set forth, and that under section 6 of the Amending Act of 1852, as above set forth, appellant could establish its own rates of fare and freight, free from legislative interference. In that case the Supreme Court of the United States declined to decide whether section 6 of the Amending Act repealed clause 10 of section 21 and section 32 of the original charter or not. But they held that, under said section 6, no by-law could be established by the directors that did not conform to the laws of the state, whether such laws were in force when the amended charter was granted, or came into operation afterwards; that the power of the company for the regulation of its own affairs was, in express terms, subjected to the legislative control of the state; that the by-laws fixed the rates, and no by-law could be made that was at all repugnant to the laws of the state; that only such charges could be collected by appellant as were allowed by the laws of the state; that, in the absence of legislation, the power of the directors over the rates is subject only to the common law limitation of reasonableness, but that the state may establish a maximum of rates to be charged by railroad companies for the transportation of persons and property; that when a maximum is so established the rates fixed by the directors must conform to its requirements,—otherwise, the by-laws would be repugnant to the laws. Adopting the views thus expressed by the Federal Supreme Court, we are of the opinion that there is nothing in appellant's charter which relieves it from the obligation to submit to the provisions of the Act of 1873 upon the subject of reasonable rates, and that the act does not impair the obligation of any contract alleged to be contained in appellant's charter.

6. It is claimed that the schedule of 1873, which was admitted in evidence, was not published as required by statute, and that for that reason it did not go into effect. The copy of the schedule of September 1, 1873, introduced by the plaintiff, was accompanied by the following certificate, which was attached to it: "Office of the Railroad and Warehouse Commission, Springfield, Illinois. State of Illinois, Sangamon County—

ss.: We, the undersigned, railroad and warehouse commissioners in and for the state of Illinois, do hereby certify that the foregoing is a true copy of 'A Schedule of Reasonable Maximum Rates of Charges for the Transportation of Passengers and Freight and Cars,' together with a classification of freight, explanatory, and forming a part, of said schedule, revised and prepared by the railroad and warehouse commission for the Chicago, Burlington & Quincy Company; that said 'Classification of Freight' and schedule has been published as required by law in the Illinois State Journal, a weekly newspaper published in the city of Springfield, in said state, in the issues of said paper dated, respectively, September 8, 10, 17, and 24, and October 1, A. D. 1878, as revised, and was in force from and after September 1, A. D. 1878, and remained in force until December 1, A. D. 1881. Witness our hands this 7th day of February, A. D. 1891. John R. Wheeler, Isaac N. Phillips, W. R. Crim, Railroad and Warehouse Commissioners. Attest: J. H. Paddock, Secretary."

This certificate shows that publication of both the classification and the schedule was made, not only for three successive weeks, but for five successive weeks, and that, consequently, the provision in section 8 as to publication was fully complied with. The trial court was authorized to admit it, and, when admitted, it was "prima facie evidence of the schedules of said commissioners." At the close of plaintiff's evidence the defendant introduced another certificate of the commissioners, dated December 1, 1891, and other evidence, for the purpose of showing that the classification of freights, which recited on its face that it formed a part of each schedule, was published on September 8, 10, and 17, and that the schedule for appellant, which refers to the classification as forming a part of it, was published on September 17 and 24, and October 1. The classification was published three successive weeks, and the schedule was published three successive weeks; but the point is made that, as the schedule referred to the classification, the latter was a part of the former, and that when the schedule was published, on September 17, 24, and October 1, the classification should have been published, as a part of it, and in the same issues of the newspaper with it. As the classification was for all the railroads, and a schedule was made for each, it is a question whether it was necessary to republish the classification with each schedule, it having already been published for the time required by law. The classification was on file in the office of the commissioners, and the schedules referred to it, and the roads could have access to it. The certificate, however, as above set forth, was merely prima facie evidence that the schedule introduced was that of the commissioners. Other evidence might be introduced to show that it was their schedule. This evidence was furnished by the defendant itself. Its own proof showed that the copy introduced was a copy of the schedule prepared and adopted for it by the commissioners. It is not contended that the defendant did not have notice

of the schedule of September, 1878, irrespective of any publication of it.

But even if it be true that the schedule could not go into effect until it was published in the manner required by the law, and that the separate publication of the classification and the schedule was not in compliance with section 8, we still think that the certificate above set forth was sufficient. The case below was not tried until November 30, 1891. By act approved June 30, 1885, the legislature amended said section 8, and in the amended section provided as follows: "All such schedules heretofore or hereafter made shall be received and held in all such suits as prima facie the schedules of said commissioners without further proof than the production of the schedule desired to be used as evidence, with a certificate of the railroad and warehouse commissioners, that the same is a true copy of a schedule prepared by them for the railroad company or corporation therein named." 3 Starr & C. Anno. Stat. p. 1029. The certificate of February 7, 1891, conforms to the requirement of section 8, as thus amended. No man or corporation has a vested right in the rules of evidence. They pertain to the remedies provided by the state for its citizens, and do not constitute a part of any contract. They are subject to control and modification by the legislature, whether affecting proof of existing rights, or rights subsequently acquired. Changes in them may be made applicable to existing causes of action. Cooley, Const. Lim. 6th ed. p. 451; *Gage v. Caraher*, 125 Ill. 447.

7. Appellee assigns as a cross-error the overruling of his demurrer to the sixth plea of the defendant. This plea was to the last additional count of the amended declaration, and averred that the causes of action therein set out did not accrue to the plaintiff within five years next before the filing, or the obtaining of leave to file, said last additional count, or the substitute therefor. The question is whether the amendment, or the last count of the amended declaration, sets up a new cause of action. If it does, the demurrer to the plea was properly overruled. If it does not, the amendment takes effect from the commencement of the suit. Where an amendment sets up no new matter or claim, but merely restates in a different form the cause of action set out in the original declaration, it relates to the commencement of the suits, and the statute of limitations is arrested, at that point; but, where the amendment introduces a new or different cause of action, it is treated as a fresh suit, begun at the time when such amendment is filed, and the statute is arrested at the latter date. *Baker v. Missouri Pac. R. Co.* 84 Mo. App. 98. In this case the two counts of the original declaration, and all the additional counts of the amended declaration, except the last, sought to recover the treble damages allowed by the statute for a violation of its provisions; and to these counts the two years statute of limitations was properly pleaded, as, in this state, actions for a statutory penalty must be brought within two years next after the cause of action accrued. The last amended count, filed more than seven years

after the filing of the original declaration, sought to recover damages for the violation of defendant's common law liability as a carrier for charging more than reasonable rates. To this count the five years statute of limitations was applicable. It is conceded by appellee that he cannot recover treble damages for unreasonable charges, except for those paid by him during the two years prior to the beginning of the suit, and that the object of the amended count is to recover single damages for the three years immediately preceding the two years for which treble damages are claimed. We think that the amended count introduced a new cause of action. The original declaration declares specially on the statute for the recovery of a statutory penalty; alleges, on the ground of action, the charge of rates in excess of those fixed by the schedule of the commissioner; and concludes: "Whereby, and by force of the statute, . . . an action hath accrued . . . to demand and recover of the defendant three times the amount of said sum of money," etc., "with reasonable attorney's fee, in a sum to be fixed by the court." The amended count is based on an alleged common law liability, or on an implied contract to repay money obtained by wrongful overcharges. Before it was filed the cause of action set forth in it had been barred by the five years statute of limitations. If a new suit had been begun for the same cause of action at the time of the amendment, it could not have been maintained, and there is no more reason why the cause of action should be enforced when embodied in an amended declaration

than when forming the subject-matter of a new suit. Although an amendment may properly be allowed, it does not necessarily, when allowed, have the effect of relating back to the date of bringing the suit, for the purpose of determining questions of limitation. An amendment which introduces a cause of action barred by limitation is ineffectual to avoid the statutory bar. *Gibbons v. The Steamboat "Fanny Barker,"* 40 Mo. 258; *Baker v. Missouri Pac. R. Co. supra*; *People v. Judge of Newaygo Circuit Ct.* 27 Mich. 188; *Melvin v. Smith,* 13 N. H. 463; *Illinois & St. L. R. & Coal Co. v. People,* 19 Ill. App. 141. Where the original declaration sets up overcharges upon certain shipments, and the amended declaration sets up overcharges on other and different shipments, the causes of action are not the same. *Illinois Cent. R. Co. v. Cobb,* 64 Ill. 140; *Phelps v. Illinois Cent. R. Co.* 94 Ill. 548; *North Chicago Rolling Mill Co. v. Monka,* 107 Ill. 340. Here the original declaration seeks to recover penalties for overcharges on shipments made subsequent to November 2, 1880, while the last additional count of the amended declaration declares for damages on account of overcharges on shipments made prior to October 17, 1880. We are of the opinion that there was no error in overruling the demurrer to the sixth plea.

One or two other minor objections are urged, but, after a careful consideration of them, we are satisfied that they are not well taken.

The judgment of the circuit court is affirmed.

MINNESOTA SUPREME COURT.

STATE of Minnesota v. C. E. CORBETT.

(See S. C. 24 L. R. A. 496.)

*1. Laws 1888, chap. 66, entitled "An act to regulate the sale and redemption of transportation tickets of common carriers and to provide punishment for the violation of the same," is not unconstitutional, either as "class legislation" granting special privileges to carriers.

2. Or as a delegation of the police power of the state to grant licenses to engage in a business.

3. Or as an interference with interstate commerce.

4. Or (at least as to tickets purchased after the pas-

age of the act) as depriving a citizen of his property "without due process of law."

5. If a business, as that of common carriers, is a proper subject of police regulation, so are its incidents and accessories; as, for example, the issue and sale of transportation tickets.

6. The word "owner," as used in the act, includes all those who operate a railroad or steamboat in the transportation of passengers; as, for example, lessees, receivers and the like.

Decided May 25, 1894.

CERTIFICATION by the District Court for Ramsey County for the opinion of the Supreme Court of a demurrer to an in-

*Headnotes by MITCHELL, J.

NOTE.—As to validity of statutes against ticket brokerage or "scalping" see *Burdick v. People* (Ill.) 24 L. R. A. 152 and note.

4 INTER 8.

diction for selling railroad tickets contrary to law, after the entering of an order sustaining the demurrer. *Order reversed.*

The facts are stated in the opinion.

Messrs. H. W. Childs, Atty. Gen., Pierce Butler and C. W. Bunn for the state.

Messrs. Horton & Denegre, for defendant:

The law is unconstitutional as class legislation.

It places in the exclusive control of a privileged class the right to buy and sell a certain kind of personal property. It is not questioned but that a railroad ticket is property.

Hoffman v. Northern Pac. R. Co. 45 Minn. 53.

As property easily transferred and assigned it is merchantable. The privilege granted under the law is the exclusive right to sell railroad tickets and the donee of this privilege is the railroad company. A railroad corporation as such can only act through agents. It is difficult then to perceive how a burden is placed upon them by the provisions of a law which directs that they operate in the natural way through agents, licensed by themselves, and make redemption of their unused tickets, or parts of tickets, in most instances at a profit to themselves and in no cases at a loss. The agent licensed under this act is but a creature of the railroad who creates and exterminates him at pleasure. The state can license only such as the railroad selects. The privilege of selling the property rights in a railway ticket is thus limited to the appointees of the railroad, and thereby raises in them a favored class with privileges that no others can enjoy.

Everybody has the right to dispose of his property as he will so long as he does not interfere with his neighbor.

Arrowsmith v. Burlingim, 4 McLean, 497.

The law secures to every citizen the right to do with his own what he will.

Giozza v. Tiernan, 148 U. S. 662, 87 L. ed. 601.

The law is in violation of section 1, article 14, of the Amendments to the Constitution of the United States, in that it deprives the citizen of his liberty and property without due process of law.

A ticket even though purchased from one not a licensed agent entitles the holder to travel thereon and such a contract is valid and can be enforced.

Sleeper v. Pennsylvania R. Co. 100 Pa. 259, 49 Am. Rep. 380.

The general purpose of the legislature will be defeated if it shall be held valid as to some cases and void as to others.

Cooley, Const. Lim. 181.

The only possible justification that can be found for this law is the police power of the state. This term means simply "the power of the state to impose those restraints upon private rights which are necessary for the general welfare of all and is but the power to enforce the maxim *sic utere tuo ut alienum non laedas*."

Rippe v. Becker (Minn.) 22 L. R. A. 857; *Willis v. Standard Oil Co.* 50 Minn. 297.

The legislature certainly cannot give to an act the character of a police regulation by calling it such.

Tiedeman, Pol. Powers, § 186.

The business is legal.

Hirschfield v. Dallas, 29 Tex. App. 242.

A man's business if legal, is one of his most sacred property rights. In destroying the business of ticket brokerage, this law
4 INTER S.

takes from the ticket broker his property in a manner otherwise than by the law of the land and deprives him of the liberty guaranteed him in the bill of rights.

Tiedeman, Pol. Powers, § 102; *Dent v. West Virginia*, 129 U. S. 115, 121, 32 L. ed. 623, 625; *Yick Wo v. Hopkins*, 118 U. S. 356, 369, 30 L. ed. 220, 226; *Wynshamer v. People*, 18 N. Y. 878, 484.

In order to prohibit the prosecution of a trade altogether, the injury to the public which furnishes the justification for such a law must proceed from the inherent character of the business.

Tiedeman, Pol. Powers, § 102; *People v. Marx*, 99 N. Y. 877, 52 Am. Rep. 34; *Bertholf v. O'Reilly*, 74 N. Y. 509, 80 Am. Rep. 323; *Slaughter-House Cases*, 83 U. S. 16 Wall. 86, 106, 21 L. ed. 394, 418; *Live Stock D. & B. Assn. v. Crescent City, L. S. L. & S. H. Co.* 1 Abb. U. S. 888; *People v. Gillson*, 109 N. Y. 889; *Hannibal & St. J. R. Co. v. Husen*, 95 U. S. 485, 469, 24 L. ed. 527, 529; *Ex parte Garland*, 71 U. S. 4 Wall. 333, 18 L. ed. 366; *Chicago, M. & St. P. R. Co. v. Minnesota*, 134 U. S. 418, 457, 33 L. ed. 970, 980, 3 Inters. Com. Rep. 209.

It has never been questioned and the scalper law of Illinois is to-day a dead letter.

People v. Gilbert, 25 Chicago Legal News, 812.

The Texas law was declared unconstitutional in *State v. Mercer*, Houston Daily Herald of October 6, 1893.

The law is in violation of section 8, article 1, of the Constitution of the United States, which provides: "That Congress shall have power to regulate commerce with foreign nations and among the several states and with the Indian tribes."

Warren v. Charlestown, 2 Gray, 84; *Slauson v. Racine*, 18 Wis. 399; *Allen v. Louisiana*, 108 U. S. 80, 26 L. ed. 318; *Burkholts v. State*, 16 Lea, 71; *Western U. Teleg. Co. v. Texas*, 62 Tex. 630; *Jones v. Jones*, 104 N. Y. 234; *Pom. Const. Law*, § 378; *Welton v. Missouri*, 91 U. S. 275, 23 L. ed. 347; *North River S. B. Co. v. Livingston*, 3 Cow. 713; *People v. Raymond*, 84 Cal. 492.

The power to regulate interstate commerce is exclusively vested in Congress, and any attempts to do so on the part of the states are void. It makes no difference in what language the statute is framed, its purpose must be determined by its nature and reasonable effect.

Leisy v. Hardin, 135 U. S. 100, 127, 34 L. ed. 128, 138, 3 Inters. Com. Rep. 36; *Hannibal & St. J. R. Co. v. Husen*, *supra*; *Hall v. DeCuir*, 95 U. S. 485, 489, 24 L. ed. 547, 548; *Pullman Palace Car Co. v. Pennsylvania*, 141 U. S. 18, 35 L. ed. 613, 3 Inters. Com. Rep. 595; *Chy Lung v. Freeman*, 92 U. S. 275, 28 L. ed. 550; *Henderson v. Wickham*, 93 U. S. 259, 23 L. ed. 543.

This law attempts to destroy the rights of property in tickets owned in this state though purchased and to be used upon railroads in another state; it attempts to destroy the right of property in tickets purchased in this state and for use upon railroads in another state; it attempts to prevent the transfer and regulate the redemption of tickets sold in another

state for use in this state; it attempts to legislate against a business established for the purpose of conducting ticket agencies for the sale of tickets upon railways operated in the different states of the Union. All of which said purposes are interstate commerce, and in so far as this law interferes with or regulates any of the same it contravenes the interstate commerce clause of the Constitution.

McCall v. California, 186 U. S. 104, 84 L. ed. 391, 8 Inters. Com. Rep. 181.

Mitchell, J., delivered the opinion of the court:

The defendant was indicted for selling on October 18, 1893, a railroad ticket of the Northern Pacific Railroad Company from St. Paul to Little Falls, in this state, contrary to the provisions of section 2, chapter 66, Laws, 1893, entitled "An act to regulate the sale and redemption of transportation tickets of common carriers and to provide punishment for the violation of the same," approved April 19, 1893. The trial court, having sustained a demurrer to the indictment, has certified the case to this court, pursuant to Gen. Stat. 1878, chap. 117, § 11. We think the statute contemplates that the report and certificate of the trial judge should indicate the particular questions of law which he deems so important and doubtful as to require the decision of this court. In the present case the "memorandum" of the judge, which is incorporated in his report, is the only thing which points out the questions of law upon which he desires our opinion, and it is apparent from this that the only question which he considered or passed upon in sustaining the demurrer was the constitutionality of the statute under which the indictment was found. We shall, therefore, confine ourselves to the consideration of the objections raised to the validity of that statute. These objections may be all summed up as follows: (1) It is "class" legislation, in that it gives to persons named by the carriers the exclusive privilege of conducting the business of dealing in transportation tickets. (2) It delegates to the carriers the police power of licensing persons to conduct the business of dealing in such tickets. (3) It deprives the citizen of his property in such tickets without due process of law. (4) It is an unlawful interference with interstate commerce. (5) It discriminates between incorporated and non-incorporated carriers of passengers, because section 7 imposes a penalty on the former, and not on the latter, for refusing to redeem unused tickets.

Before examining the provisions of the act, or entering upon the consideration of these objections, it may be well to refer briefly to a few elementary principles applicable to such cases. That the transportation of passengers by common carriers is a proper subject of police regulation by the state is unquestioned; and, if a business itself is the subject of police regulation, then so are all its incidents and accessories. That the matter of the issue and transfer of tickets, as evidences of the contracts of the carriers, is an incident and accessory of the business, needs no argument. And, where a business is a proper subject of

the police power, the legislature may, in the exercise of that power, adopt any measures, not in conflict with some provision of the constitution, that it sees fit, provided only they are such as have some relation to, and some tendency to accomplish, the desired end; and, if the measures adopted have such relation or tendency, the courts will never assume to determine whether they are wise, or the best that might have been adopted. *State v. Donaldson*, 41 Minn. 74; *Rippe v. Becker* (Minn.) 22 L. R. A. 857. Furthermore, courts are not at liberty to declare a statute unconstitutional because, in their opinion, it is opposed to the fundamental principles of republican government, unless those principles are placed beyond legislative encroachment by the constitution; or because it is opposed to a spirit supposed to pervade the constitution, but not expressed in words, or because it is thought to be unjust or oppressive, or to violate some natural, social, or political rights of the citizen, unless it can be shown that such injustice is prohibited or such rights are protected by the constitution. Except where the constitution has imposed limitations upon the legislative power, it must be considered as practically absolute; and to warrant the judiciary in declaring a statute invalid they must be able to point out some constitutional limitation which the act clearly transcends.

With these elementary propositions in mind, we proceed to consider the evils, or supposed evils, which the legislature designed to remedy, and the measures which they have adopted to accomplish that end. It was commonly asserted and believed (to what extent correctly is not important) that spurious and stolen tickets, and tickets which had expired by limitation, or that were not transferable, were often put on the market to such an extent as to work great frauds upon both the public and the carriers; that frequently those selling such tickets were irresponsible, so that the party defrauded had no redress; that the business of trafficking in such tickets often furnished an inducement to railway employes to steal tickets, or issue spurious ones, and put them on the market. It was also commonly believed that, in order to evade statutes designed to secure uniformity of rates and to prevent discriminations, some carriers of passengers were in the habit of placing large blocks of their tickets with "scalpers," ostensibly not their agents, for sale at cut rates. To remedy these and similar abuses, real or supposed, this statute was passed. That all its provisions have some relation to, and tendency to accomplish, this end, is quite clear. Do they transcend any constitutional limitation upon legislative power? It seems to us that most of the objections to the act—certainly the first two—are based upon a radical misconception of its provisions, and of the character of transportation tickets as property. Counsel for the defendant seems to assume—First, that such tickets are vendible chattel property, which are the legitimate subject of barter and sale, the same as any other chattels, and, second, that this statute is designed to be a "license law," in the ordinary sense of that term.

With these two premises assumed, the task of successfully assailing the validity of the act is a very easy one. While a "railroad ticket" is, in one sense, "property," yet it is not merchandise or a chattel. It is merely the evidence of the contract of the carrier to transport the holder between the points, and on the condition, therein named. Treating it as the contract itself, it is in the nature of a chose in action. No one with whom a carrier makes such a contract has any inherent constitutional right to insist that it should be assignable. At common law, all choses in action were nonassignable, and if the legislature had deemed it necessary, in order to prevent the supposed evils, to provide that all transportation tickets should be nontransferable, or even to prohibit the issue of tickets altogether, and require carriers of passengers to collect fare in cash, we fail to see why they had not the power to do so.

Again, the act has not the first element of a "license law" in the common meaning of the term. It must be borne in mind that these tickets are the contracts, or evidences of the contracts, of the carriers, and hence, in the nature of things, can in the first instance be issued or sold only by the carriers themselves, who, as a matter of course, have the exclusive right to appoint their own agents for that purpose. Now, what the act provides is that the carriers shall only issue or sell their tickets through agents appointed in a particular manner, and the evidence of whose appointment has been authenticated by certain formalities. While the certificate of a compliance with these requirements, issued by the state, is called a "license," yet it is merely the evidence of the appointment of the agent, its purpose being to secure and preserve public written evidence of that fact, so as to prevent evasions of the law, and to enable every one who buys a ticket to ascertain whether the person with whom he is dealing actually represents, and has authority to bind, the carrier. The agent is given no authority to sell or deal in tickets of other carriers, but only authority to sell the ticket of the carrier appointing him, and providing him the certificate of such authority. So far from granting any special privileges to the carrier, it imposes a burden upon him—First, by limiting his right to issue or sell tickets to agents provided with a certificate from the state of their authority; and, second, by requiring him to repurchase or redeem unused tickets. And then, in order to prevent the frauds already referred to, the act prohibits entirely the sale, barter, or transfer, within the state, of the whole or any part of any ticket, or other evidence of the holder's right to travel on any railroad or steamboat, whether situated or operated within or without the state, except by the agent of the carrier possessing the certificate of authority provided for in the first section of the act.

The fact that the purchaser of a ticket is prohibited from selling it to whom he pleases does not "deprive him of his property without due process of law." The disposition of property may always be limited or regulated where public interests so require. The ticket is not destroyed or taken from the holder, nor

is his right to ride on it at all limited. The only limitation is upon his right to transfer it. If he wishes to ride on it, which is the purpose for which a ticket is presumably bought, he can do so; but, if he does not use it, his only course is to require the carrier who issued it to redeem it. As already suggested, a man has no constitutional right to insist that these contracts for transportation shall be transferable; and if the legislature had seen fit to declare that they should not be, and that they could only be used by the party to whom they were originally issued, they might have done so, even without making any provision at all for their redemption by the carrier if not used. This might not be true as to tickets, by their expressed or implied terms transferable, purchased before the passage of the act; but as to the tickets issued and purchased after that it is unquestionably true, for the statute becomes a part of the contract expressed in the ticket, and is inherent in the property in it. *Ogden v. Saunders*, 25 U. S. 12 Wheat. 218, 6 L. ed. 606.

The indictment in this case charges defendant with selling the ticket nearly six months after the passage of the act, and, if the law should be regarded as invalid as to tickets issued and purchased before it was passed, it was for the defendant to plead and prove that he comes within the class of persons as to which the law is invalid, and that this ticket was one as to which the statute does not operate. A law may be entirely valid as to some persons and some acts, and invalid as to others, and its invalidity can be raised and taken advantage of only by those who show that they have a right to question the act. They must show that their rights are taken away by the law, and that as to them, in the particular case, there is a higher law in the constitution which supersedes the statute. In Indiana and Illinois the courts have upheld statutes similar to the one under consideration in all material respects, except that they provide that the acts shall not prohibit any person who has purchased a ticket from any agent authorized as by the act provided, with the bona fide intention of traveling upon the same, from selling it to any other person. *Fry v. State*, 68 Ind. 552, 30 Am. Rep. 288; *Burdick v. People*, 24 L. R. A. 152, 149 Ill. 600.

In these cases the courts lay some stress upon this provision. But we are unable to see how the absence of it affects the validity of the act, or how, at least as to tickets issued after its passage, it deprives a person of his property "without due process of law." The law may, in that respect, be more drastic; but if the legislature thought that such an exception would open the door to evasions of the law, and that the evils aimed at could be effectually remedied only by absolutely prohibiting any sale of tickets within the state except by the carrier himself, through his agents authorized in the manner provided, we think it was competent for them to so declare.

Neither is there anything in the objection that, while the act prohibits the sale of any tickets except in the manner prescribed, it only provides for the redemption of unused

tickets of railroads or steamboats situated or operated, in whole or in part, within the state. This limitation of the provisions as to redemption may have been because of the supposed inability of the state to compel redemption by foreign or nonresident steamboats or railway companies; but, as the sale of all tickets might have been prohibited without any provision for their redemption, the act does not deprive the holder of a ticket of a nonresident carrier simply because it leaves him, in case he does not use it, to such remedies, if any, as may be given him by the law of the domicile of the carrier. It is hardly necessary to suggest that it is just as necessary, in order to prevent frauds on the public, to regulate the sale, within the state, of tickets of "nonresident" carriers as of "resident" ones. We may add, in passing, that section 5 of the Act makes it the duty of a carrier within the state to redeem tickets sold by it in "any manner," no matter whether sold within or without the state; also, that the word "owners" is evidently used in a comprehensive sense, so as to include all who are operating a railroad or steamboat, whether as owners of the property, or as lessees, receivers, or the like. What has been said fully covers the first three objections to the statute.

There is clearly nothing in the objection that the act unlawfully interferes with interstate commerce. In the first place, the question is not in this case, because the ticket is not for an interstate ride. But, even if it was, there would be nothing in the point. The law is not a revenue law, and is not designed to, and does not, regulate interstate commerce at all. It is a mere police regulation of the sale and transfer of tickets, designed to protect the public from frauds, and its interference, if any, with interstate

commerce, is purely incidental and accidental. The grant of power to Congress to regulate interstate commerce was never designed to, and does not at all interfere with, police power of the states to promote domestic order, to prevent crime, and to protect the lives and property of its citizens, although such regulations may indirectly operate upon and affect interstate commerce. Such regulations are valid in spite of their operation on commerce, and the right to pass them does not originate from any power in the state to regulate commerce. The books are so full of cases to this effect that the citation of authorities in support of the proposition is unnecessary.

Neither is there anything in the last objection. If defendant is correct in his construction of section 7,—that it only imposes a penalty, in favor of the state, upon incorporated carriers for a refusal to redeem unused tickets,—this is not an objection which he is in position to raise, as it does not affect him. If any owner of a railroad or steamboat situated or operated, in whole or in part, within the state, refuses to redeem his ticket, as provided in section 5, the purchaser has his civil remedy, wholly independently of section 7. Even if the latter section should be declared wholly invalid, on the objection of an incorporated carrier, it would not affect the validity of the balance of the act.

We have endeavored to give this case the consideration which its importance deserves, and are not able to see that any of the objections urged against the validity of the act are well founded. With the policy or wisdom of it we have nothing to do.

Order sustaining the demurrer is reversed, and the cause remanded.

Buck and Canty, JJ., absent.

INTERSTATE COMMERCE COMMISSION.

IN THE MATTER OF

THE FORM AND CONTENTS OF RATE SCHEDULES, AND THE AUTHORITY FOR MAKING AND FILING JOINT TARIFFS.

Decided September 8, 1894.

REPORT AND OPINION OF THE COMMISSION.

By the Commission:

The various difficulties connected with the form and contents of tariff schedules, the importance of uniformity in their arrangement and simplicity in their statements, and the duty of bringing them into conformity with the requirements of the statute, have been matters of concern to the Commission from the time of its organization. In the first Annual Report to Congress the conditions existing be-

fore the Act to Regulate Commerce was enacted are described in the following language:

"Then their rates were changed at pleasure and without public notification; their dealings to a large extent were kept from the public eye, the obligation of publicity not being recognized; and the public were therefore without the means of judging whether their charges for railroad service were reasonable and just or the contrary."

"But the publications actually made only

increased the difficulties. Railroad rates difficult enough to be understood by the uninitiated when printed plainly in one general tariff with classification annexed, became mysterious enigmas when several different tariffs were printed, as was the case in some sections; some relating to competitive points and others to what were called local points, and each referring to voluminous and perhaps different classifications, which were printed but not posted, and which were observed or disregarded at will in the rates as published. Such unsystematic and misleading publications naturally led to many overcharges and controversies, and naturally invited and favored special rates and injurious preferences."

Subsequently, in the same report, referring to the tariffs which had been filed by the carriers under the 6th section of the Act, the Commission said:

"But though the carriers make and file their tariffs as required by the Act, there is no general uniformity to the tariffs or to the classifications, either in form or general method of preparation. This is unfortunate for several reasons, but especially because the public, who have to deal with many carriers, are likely to be confused between the different methods of giving information, and possibly to be misled in some cases. The difficulty of making use of them for the purposes of the Commission is also greatly enhanced by the want of uniformity, and the Commission would be very glad to correct it if that were possible."

And in concluding this report the Commission made several recommendations, among which was the following:

"The Commission ought also to have the authority and the means to bring about something like uniformity in the method of publishing rates, which is now in great confusion, and to carefully examine, collect, and supervise the schedules, contracts, etc., required by the law to be filed."

When the Second Annual Report was submitted, measures were pending before Congress for enlarging the powers and duties of the Commission in regard to railway tariffs, and the following comment was deemed a sufficient reference to the subject:

"Much still remains to be done in order to assure a complete and adequate supervision of the transportation schedules furnished by the carriers. No uniformity in form has yet been reached, nor has any general system been adopted under which they are prepared. Amendments to the Act, now pending in Congress, are designed to enable the Commission to enforce the adoption of better and more systematic methods which are greatly needed."

By an amendment approved March 2, 1889, the 6th section of the Act was changed in several important respects and the following provision inserted:

"The Commission may determine and prescribe the form in which the schedules required by this section to be kept open to public inspection shall be prepared and arranged, and may change the form from time to time as shall be found expedient."

4 INTER S.

The authority conferred by this enactment has not heretofore been exercised through definite and formal orders, because the Commission has believed it more expedient to promote the correction of rate sheets by calling the attention of individual carriers to particular defects, and by general suggestions to railway officials which have been so far adopted as to accomplish much improvement in the construction of tariff schedules. The obligations imposed by the statute, and knowledge of the power possessed by the Commission, were reasonably expected to secure substantial observance of the law in this regard, without resort to specific and mandatory directions. It was thought preferable to bring about reforms in the arrangement and contents of public tariffs through the voluntary action of railroad managers, rather than by issuing explicit and compulsory orders.

In pursuance of this policy, and to obviate the necessity of a voluminous correspondence concerning matters of detail, the Commission instructed its Auditor to prepare a statement of its views regarding the general features of tariff construction which would effect compliance with the amended statute. This statement was published in pamphlet form in December, 1891, and widely distributed to railroad officials having charge of the preparation of rate sheets, and to other persons presumably interested in such an announcement. It set forth at considerable length the various questions involved, and stated quite fully the information which should be given to the public in the published schedules of carriers subject to the Act. If the directions contained in this publication had been followed, no further action by the Commission in respect to this provision of the law would seem to be required. While, however, a general willingness has been displayed by railway managers to comply in minor details with the suggestions then made, the Commission has been somewhat disappointed in its expectations concerning matters of primary importance, and has long been impressed with the imperfections and omissions of many of the rate sheets which are in current use. Such defects are especially observed in the arrangement and recitals of joint tariffs under which the greater portion of interstate traffic is carried on. In numerous instances these tariffs fail to give the names of participating carriers—the parties to the agreement—, omit any statement as to routes employed in effecting the transportation, and are otherwise wanting in information believed to be of consequence to the public and required by the statute to be disclosed.

There has been some failure, we apprehend, to recognize the full purpose of these provisions which relate to the construction and publicity of tariff schedules. Many railroad offi-

cials apparently suppose that the sole object in view is to acquaint shippers and passengers with the scale of charges which carriers may lawfully impose for the services they are called upon to perform. This conception is clearly inadequate, for it takes no account of the relation of such requirements to the general scheme of public regulation. Beyond the information to which the individual patron of the railroads was deemed entitled, Congress intended that the agency entrusted with the duty of administering the law should be supplied with the means of becoming familiar with the entire body of rates throughout the country, to the end that complaints of injustice and exaction might be more intelligently considered, and relative reasonableness in transportation charges more effectually secured. This purpose was pointed out by the Commission in its report of an investigation concluded in March, 1889, wherein, among other comments, the following observations were made:

"It is proper to add, however, that the requirement of publication found in the law is based upon many other considerations besides that of affording information to local shippers. The necessity of establishing and maintaining a steady, uniform, open tariff rate is of paramount importance, in view of the evils which the Act to Regulate Commerce attempts to correct, and obviously the first and most efficient method of regulation is the requirement of constant publicity."

Re Atlanta & W. P. R. Co. 2 Inters. Com. Rep. 480, 3 I. C. C. Rep. 75.

This opinion was expressed, it should be remembered, concerning the 6th section of the Act as it existed before the amendments of March 2, 1890, were adopted, and without reference to the added authority at that time conferred upon the Commission to "determine and prescribe the form in which the schedules" of rates and charges "shall be prepared and arranged." The enlarged obligations created by these amendments were plainly designed to aid the enforcement of the law in other respects, as well as to furnish individual shippers with more accurate knowledge respecting the rates and regulations of public carriers.

The reciprocal duties arising under this section must be regarded as fundamental to the purpose of the whole enactment. Any system of laws adapted to the regulation of interstate commerce will include the requirement of a common standard of compensation, and provide alike for its easy comprehension and its suitable publicity. The charges for railway transportation should be uniform to all and readily understood by all. The publication of tariffs in convenient form, adequate in statement and properly authenticated, is essential to the enforcement of reasonable rates and impartial treatment. So far as possible the schedules should be simple in arrangement,

ample in their disclosures and free from ambiguity. Otherwise the opportunity is afforded for evading the law by discriminating practices and unjust exactions. This is peculiarly true of joint tariffs issued by two or more carriers whose connected roads are operated as a single and continuous line. The increased and often enormous mileage which is thus brought under a common control, the great volume of traffic which thereby receives speedy and uninterrupted movement, and the temptations to favoritism arising from competition between rival systems, render it specially necessary that the public schedules under which business of this character is conducted should answer all the requirements of the statute. That many of the joint tariffs now employed are not in accord with these provisions is practically admitted by railway managers. They are often faulty in form, imperfect or ambiguous in disclosures, and generally lacking in proper evidence of their authenticity. When such a tariff is filed by one of the associated lines only, as is usually the case, if the participating carriers are not designated and no proof of their concurrence is furnished, it is quite possible for the latter to avoid liability, when charged with criminal misconduct in respect of a joint rate so issued, by denying knowledge of its existence or consent to its publication, although the fact that they carried traffic apparently under that tariff may be clearly established. If a connecting carrier, which joins in the transportation of freight received from the initial carrier, is prosecuted for violating the joint rate published by that initial carrier alone, there can be no conviction without proof, often impossible to obtain, that such connecting carrier agreed to the joint rate in question or authorized its promulgation. On the other hand, if it is assumed that the connecting carrier is not a party to the joint rate so issued, for want of assent thereto or concurrence therein, and the charge of unlawful conduct is based upon the acceptance of less than its own local tariff, such connecting carrier may refute the accusation by asserting that it had consented to the joint schedule issued by an initial carrier and was in fact a party thereto. Thus the ground of defense can be shifted to meet the theory of the prosecution, and a given carrier actually guilty of wrong doing may secure immunity from punishment, through inability to determine, before its disclosure is forced, whether it is or is not bound by the joint tariff which another carrier has published and filed. When such avenues of escape and evasion are afforded by the rate sheets in common use, there must be something at serious fault in their contents and construction. Defects in tariff schedules provide opportunity for inhibited practices which might not otherwise be available, and tend to

defeat in greater or less degree the beneficial purposes of publicity. More than this, they indicate a measure of disrespect for the law and a disposition to avoid its wholesome restraints. They render its enforcement in many cases impracticable, weaken the authority of its various restrictions, and not unfrequently prove an aid to prohibited and inequitable dealings between shipper and carrier.

Without enlarging upon these considerations or specifying in greater detail the reasons for dissatisfaction with existing methods, it is sufficient to say that the Commission has believed for some time that the authority conferred by the amendment of 1889 should be more directly and formally exerted, with the view of securing rate sheets and joint schedules which shall meet the requirements of the statute. Desiring to proceed with all needful caution, and not unmindful of the difficulties involved in any adequate scheme of tariff construction, it was deemed suitable to acquaint the principal railroad managers with the purpose of the Commission and to invoke the aid of their practical experience. To this end the following circular letter was issued at the date therein named:

INTERSTATE COMMERCE COMMISSION.

Washington, January 20, 1894.

"Dear Sir:

The Commission having determined to prescribe the form of schedules of rates and charges required by the Act to Regulate Commerce to be kept open to public inspection, in accordance with authority conferred by the sixth section thereof, and desiring that while fully meeting the requirements of the law the form adopted shall not be unnecessarily burdensome to the railways by reason of the expense or otherwise, it is thought proper to invite the carriers subject to the Act to send representatives to a conference to be held at the office of the Commission in Washington, on Monday, February 12, 1894, when opportunity will be afforded to offer suggestions regarding the preparation of such a form (especially suggestions as to a form for joint tariffs) as will comply with the requirements of the statute. In the meantime the Commission will be glad to receive suggestions by letter from those interested.

Respectfully yours,
WM. R. MORRISON,
Chairman."

In response to this invitation a large number of traffic officials assembled at the office of the Commission on the 12th of February, 1894, and the subject was discussed at considerable length during that and the succeeding day. An understanding was then reached that a subsequent conference should be held, at which the representatives of the railroads, who were to consult with each other in the meantime, would submit to the Commission some feasible plan for accomplishing the main ends desired. This second conference was held pur-

suant to the following call issued March 2, 1894.

INTERSTATE COMMERCE COMMISSION.

Washington, March 2, 1894.

"Dear Sir:

Pursuant to a call issued on January 20, 1894, a conference was held at the office of the Commission on February 12 and 13, ultimo, for the purpose of affording the representatives of the carriers an opportunity to offer suggestions regarding the form in which schedules of rates should be arranged to meet the requirements of the statute. A copy of the proceedings of the conference is herewith enclosed for your information. At the request of those present a second conference will be held at the office of the Commission in Washington, on Wednesday, March 14, 1894, at 11 a. m. at which you are invited to be present.

Respectfully,
WM. R. MORRISON,
Chairman."

The proceedings of these two conferences, which have been published in full from the stenographers' minutes and mailed to the principal traffic officials of the country, disclose the views of those present concerning the objects sought to be accomplished by the Commission, and the feasibility of various suggested plans for simplifying the forms and improving the construction of tariff schedules.

It seemed to be generally conceded by the railroad representatives who attended these meetings that the rate sheets now employed are unsatisfactory in many respects and fall short of the standard contemplated by the statute. The disposition was repeatedly avowed to make such changes and corrections as might be required by the Commission, though much stress was laid upon the difficulties involved in any radical departure from existing methods. While the discussion at these conferences extended to a wide range of topics, and much of it was of an informal character, there were three subjects which received special consideration, and which are entitled to more or less prominence in this report. These are (1) "Proportional tariffs," as they are called; (2) The designation on joint tariff sheets of the carriers which are parties thereto and the routes formed by their connected lines, and (3) The evidence that joint tariffs filed and published by one carrier are assented to and binding upon the participating carriers.

The first of these questions relates to a certain rule or principle of rate making, rather than to the medium by which charges are made known to the public; the others relate to the contents of the published rate sheet and the proof of its authenticity.

The employment of proportional tariffs appears to be very extensive, and they are applied to a large percentage of interstate business. Such tariffs establish rates of carriage which are lower between given points when the traf-

fic has undergone transportation before reaching the first point, or is to be further transported after reaching the second, than the rates charged on like traffic which originates at one of such points and terminates at the other. The rates from New York to Chicago, subject to the Official Classification, may be cited as an illustration, viz:

	Classes.					
	In Cents Per 100 Lbs.					
	1	2	3	4	5	6
Regular Rates	75	65	50	35	30	25
Proportional Rates	70	61	47	33	29	24

The higher rate is charged on shipments destined to Chicago, the lower proportional rate is accepted for the carriage between those cities when the shipments are consigned to points beyond Chicago. Traffic from the Atlantic seaboard to the various Mississippi river crossings is also governed, to a very great extent, by a similar system of charges. The eastern lines have not been accustomed to publish rates to points west of the Mississippi; on such business they advertise and accept a lower rate for hauling to the river than they exact on shipments terminating at the river points. A somewhat different but quite frequent use of the proportional method is described by the following illustration: One railway between Chicago and Kansas City, for instance, has a line of its own west of the Missouri river reaching into the corn producing region of Kansas. Another railway from Chicago terminates at Kansas City, yet desires to participate in the grain traffic originating in the same corn belt west of the Missouri. The first named road, extending through to Chicago, naturally desires to route by its own rails the traffic shipped to that market; and, being able to make through rates over its own line, refuses to join in rates from Kansas points to Chicago *via* its line to the river and thence *via* the line of its competitor. The latter, however, by means of a low proportional tariff from Kansas City can allow the former its full local rates to that point, and still compete for the business by making through rates to Chicago equally low with those made by the road having its own through line.

Various reasons are assigned by the railroads for resorting to this method of establishing rates. The use of proportional tariffs, it is claimed, furnishes the basis for arriving at the total through rates for a large section of country, when it is impracticable to publish such rates in full by reason of the great number of roads and routes which are or may be employed in effecting the transportation. It is also asserted that cases not unfrequently arise where one carrier will refuse to unite with other carriers, whose lines are physically connected with its own, in forming through routes and pub-

lishing joint rates for through traffic. Under these circumstances the proportional plan is alleged to be necessary in order that the carrier which is unable to secure such an arrangement may nevertheless make the same through rates as are offered by competing lines. It is likewise generally urged that proportional tariffs are beneficial to the public, because they supply the advantages of through routes and through rates to many localities which could obtain them in no other way.

We deem it unsuitable, however, to make any further observations at this time upon the subject of proportional tariffs, and purposely refrain from expressing any opinion as to their lawfulness under the Act to Regulate Commerce for two reasons. One reason is that this proceeding is specially directed to an improvement of the framework and phraseology of published schedules, including evidence of authority for filing joint tariffs, and does not necessarily include the consideration of rate making rules and practices. Our present concern is with the "forms" of tariff-sheets which are required to be filed and exhibited to the public, rather than with the principles upon which charges are adjusted in the first instance. Rates must be fixed before they can be announced, and the policy which governs their application to varying circumstances of carriage is something quite different from the means devised for ensuring their proper publicity. The other reason for reserving the subject of proportional tariffs for further consideration arises from the fact that a similar question is directly involved in another proceeding, now pending before the Commission, upon the petition of a party claiming to be aggrieved by the operation of this method of rate construction. Our views respecting tariffs of this description will be more appropriately made known in the decision of that case.

The failure to apprise the public and the Commission, by announcement upon the printed schedules or otherwise, of the names of participating carriers responsible for the rates named in joint tariffs, and the routes by which traffic may be consigned at those rates, occasions much uncertainty and confusion, and constitutes a considerable obstacle to the enforcement of the statute. This defect in the form of published tariffs should be corrected to the fullest practicable extent. It is extremely desirable that joint schedules applied to the traffic of connecting lines should definitely name all the participating roads and indicate the various routes by which they undertake to afford transportation at designated rates. Theoretically at least, such a disclosure is necessary to a complete statutory joint tariff. If this information is withheld, the printed schedule must in every case be open to some degree

of criticism; it omits something which apparently ought to be stated, and leaves to inference or conjecture that which should be distinctly announced.

While it seems feasible in all cases to exhibit upon the printed joint tariff the names of the roads which unite in the joint rates thereby offered to the public, publication of the various routes formed by their combined lines may be found burdensome by many carriers and this requirement will not be insisted upon at this time. The explanations made and reasons advanced by the gentlemen who attended the recent conferences, together with well-known facts of which we may take official cognizance, incline us to this conclusion. In some sections of the country the carriers have entered into association with each other for the purpose, among other things, of establishing a system of rates throughout the territory which they serve, and are in effect operating under a "common arrangement" in respect to transportation charges between the numerous points in such territory. The scale of charges thus fixed is given general publicity and is in the nature of a standing proposition between the members and to all other carriers to receive and forward the various classes of freight at the rates agreed upon by the association. To require every joint tariff in such cases to show in detail all the different routes which are available to shippers would be a somewhat burdensome exaction without corresponding advantage to the public. The difficulty appears to be still greater where an outside line desires to use association rates, in connection with its own, in naming charges to points in association territory; under circumstances of that nature, the enumeration of the various routes to the large number of possible destinations would be a considerable hardship if not a practical impossibility. But in the great majority of cases we believe it is entirely practicable to set forth upon the published tariffs not only the names of the participating carriers, but also the routes operated by them under the joint rates filed in pursuance of their mutual agreement. For the present, however, the publication of routes will not be exacted by a definite and unqualified order, though we may rightfully expect that this information will be given in future joint tariffs, unless conditions exist which fairly excuse a relaxation of the rule. It is our desire to exercise the authority conferred upon us in aid of the substantial purpose of the law, rather than to insist upon the technical observance of its provisions.

The third subject discussed at these conferences admits of somewhat more exact and satisfactory treatment. It was freely admitted by the railroad officials in attendance that the Commission should be furnished with proof of the authority under which joint tariffs are

published and filed. Such tariffs necessarily imply an agreement between two or more carriers by virtue of which they offer their united services at the rates therein named. They must have entered into contract relations with each other, by express stipulation or mutual understanding, which impose upon the several parties thereto the obligation to accept, for the transportation proposed by them, the aggregate charge stated in their advertised schedules. If such contracts were in writing and filed with the Commission, as other written contracts are required to be filed, the instrument itself would be the best evidence of their arrangement, and no occasion would arise for additional proof. But such agreements are very rarely, if ever, reduced to writing. Almost invariably they rest in parol; quite often they are mere understandings between traffic managers, having no more definite basis than long continued custom or the doctrine of implied consent. When a joint tariff is published under such circumstances by one of the constituent roads there is no producible evidence, under the existing practice, that the other interested roads have assented to the rates thus announced. If one carrier files a tariff purporting to establish joint rates with other carriers when no agreement therefor—express or implied—exists between them, such carrier transcends its authority, misrepresents the facts and misleads the public; if there is an agreement between them, the evidence thereof should be a matter of record or otherwise readily obtainable. These propositions are wholly undisputed; indeed, there seems to be a unanimous concession that joint tariffs filed with the Commission as required by law should be accompanied in every instance with suitable proof of their authenticity.

Without commenting on the various plans suggested for accomplishing this purpose, it may be said that the most practicable method, all things considered, appears to be one brought forward at these conferences, by which each party to a joint tariff, other than the party filing the same, shall immediately upon the issuance thereof send to the Commission a written statement or certificate indicating its acceptance of and concurrence in the rates and charges named in such joint tariff. It is assumed that the carrier which publishes a tariff of this kind would ordinarily send copies of the same to all other carriers expected to participate in the joint service thereby announced, and it must be entirely feasible for the carriers receiving such a tariff to forward to the Commission official notice that they assent to the arrangement and are parties thereto. Thus by a simple and convenient process every party to a joint tariff will be identified, and the liability of each participating carrier will be capable of easy and suitable proof. The ex-

trème difficulty in many cases of showing the authority for each joint tariff upon the face of the printed document, and the practical objections to other proposed plans, warrant the Commission in sanctioning this method, at least to the extent of testing its merits by actual use. Its adoption will, therefore, be required.

The further consideration which we have endeavored to give this subject of tariff construction leads to a reaffirmance of the general principles laid down in the pamphlet of December 1, 1891, above referred to. The recommendations then made by the Commission are still believed to be founded upon correct views of the law and the obligations imposed by its provisions. We yield to the representations of railroad officials who contend that joint tariffs cannot in every case contain a statement of all the routes to which they relate, and we approve the plan for authenticating such tariffs by separate certificates filed with the Commission, as a suitable and effective method of accomplishing the main purpose of the statute in this regard. This mode of furnishing authority for filing joint tariffs is expected to be applied as well to future amendments or supplements to such tariffs, and also to classification sheets and other documents for the issuance of which some evidence of authorization should be supplied. Except as indicated above, the directions published in 1891 are intended to be repeated.

The Commission has no desire to enjoin the observance of needless formalities, or to subject any carrier to unnecessary expense. We appreciate the difficulty of preparing rate sheets which approximate a perfected standard and cover every point to which criticism might be directed. Nor is it by any means easy to formulate specific rules which shall govern the details of tariff construction and serve as an unvarying pattern in all cases. For this reason among others the order founded upon the present inquiry will be confined to general injunctions, except as to matters which obviously require more definite disposition. So far as specific directions are now given they are in accord with the declarations of railway officials at the conferences called by the Commission and in line with resolutions adopted by the Freight Committees of the Trunk Line and Central Traffic associations.

If the instructions contained in the pamphlet of December, 1891, are fairly observed, the grounds of complaint will be mainly removed. As those instructions are now modified in respect to routes in exceptional cases, they constitute a body of rules which traffic officials can follow without hardship or difficulty.

In addition to the matters already mentioned, attention is invited to the suggestions relating to numbering, titles, amendments and sup-

plements, manner of changing and abrogating current tariffs, and other features of more or less importance in the construction of rate sheets. Copies of the pamphlet will be sent out with this report, and compliance with its directions will hereafter be required. By following those directions we believe that railway managers can greatly improve their published schedules and speedily bring them into substantial conformity with the demands of the statutes. Such a result will prove alike beneficial to the carriers and advantageous to the public.

We summarize this review in the following order:

Order.

The Commission having under consideration the rate sheets, schedules and joint tariffs which, under the 6th section of the Act to Regulate Commerce, are required to be filed in its office and to be kept open to public inspection, and having discussed the subject with a large number of traffic officials, who, for that purpose, met the Commission in response to its invitation; and having, as the result of such conference, made and filed the foregoing report and opinion; and being convinced that the directions contained in the pamphlet published December first, 1891, should be complied with, in order to bring such rate sheets, schedules, and joint tariffs into conformity with the statute, and to correct the defects and omissions which are now observed in such publications: and having found and decided among other things that evidence of authority for making and filing joint tariffs should in all cases be furnished to the Commission:

It is Ordered, That all common carriers subject to the Act to Regulate Commerce shall, in all future issues of their rate sheets, schedules and joint tariffs, including all future amendments and supplements to existing joint tariffs, comply with and conform to the general rules laid down in said pamphlet of December 1, 1891, as modified by this order.

It is Further Ordered, That all joint tariffs hereafter filed, and all future amendments and supplements to existing joint tariffs, be hereafter so arranged and printed as to show distinctly the names of the several parties thereto.

And it is Further Ordered, That all common carriers subject to the Act which shall hereafter be named as parties to any joint tariff filed and published by another carrier, or as parties to any amendments or supplements to existing joint tariffs, shall forthwith upon the publication thereof file with the Commission a statement or certificate showing their acceptance of and concurrence therein and making themselves parties thereto, which said state-

ment or certificate shall be substantially in the following form:

To the Interstate Commerce Commission,
Washington, D. C.

This is to certify that the Co.
assents to and concurs in the publication and
filing of the schedule described below, and
hereby makes itself a party thereto.

UNITED STATES CIRCUIT COURT OF APPEALS, EIGHTH CIRCUIT.

UNION PACIFIC R. CO., *Appts.*,

v.

UNITED STATES.

(See S. C. 50 Fed. Rep. 812.)

- Judicial notice will be taken of the fact that there is no inherent difficulty in stringing several independent lines of telegraph on the same poles.
- The Pacific Railroad acts, requiring the railway companies to erect and maintain a line of telegraph along their right of way, do not impose upon the company the duty of maintaining a separate line of poles upon which to string its wires, where a telegraph company lawfully in possession of a line of telegraph on the railroad right of way, and operating the same for commercial and other purposes, by contract with the railway company provides that the latter may maintain upon the former's poles wires devoted to its exclusive use, and the latter has offices at convenient points and operators expressly required to send over such wires all such messages of a governmental or commercial character as are directed to be sent, and the right to string such additional wires as may be deemed essential or convenient.
- The provisions of the contract of July 1, 1881, between the Union Pacific Railway Company and the Western Union Telegraph Company, giving the latter access to the former's station-houses, with some of its wires and the right to avail itself of the service of the employees of the railway company, at most afford to the telegraph company some facilities for competing with the railway company in the matter of transacting a commercial business, which it would not enjoy if compelled to maintain independent offices, and do not amount to a transfer or surrender of the telegraphic franchise of the railway company, which, notwithstanding them, retains its right and capacity to do a commercial business.
- The condition of the business of the respective parties to a contract for a telegraph line on a railroad right of way several years after the agreement was made cannot control in determining the purpose of the parties in making it, nor its true interpretation.
- The provisions of the contract of July 1, 1881, between the Union Pacific Railway Company and the Western Union Telegraph Company looking to the exclusive right of the latter to maintain a line of telegraph upon the railroad right of way, do not render the contract voidable on the grounds of public policy, as they do not bind the railway company absolutely to exclude other telegraph companies from the right of way or withhold all facilities for the construction of competing lines, as they provide for the grant of such exclusive right only to the extent that the railway company may legally do so.
- The privilege given the United States Telegraph Company to erect and maintain a line of telegraph upon the rights of way of the Pacific railroad companies by Act of Congress of July 2, 1864, providing that such telegraph company "and their associates" may construct a line of telegraph between the Missouri river and San Francisco, and authorizing such railroad companies to enter into an arrangement with it for the transfer of its line to the line of road in fulfillment of the obligation of the railroad companies to construct and maintain a line of telegraph,—is not personal, but may be shared by another corporation becoming lawfully associated with the United States Telegraph Company in the work of constructing a transcontinental line;—especially one with which such telegraph company became lawfully united by the process of consolidation.
- The privilege granted to the United States Telegraph Company by Act of Congress of July 2, 1864, to enter into arrangements with the Pacific railroad companies for the construction and maintenance of a line of telegraph upon the railroad right of way, in discharge of the obligation of the railroad companies to construct and maintain such a line, must be presumed to have been conferred with full knowledge of the charter powers of the grantee to consolidate with other corporations engaged in like business, and is not personal so as to become lost by the merger of such telegraph company with the Western Union Telegraph Company, but passed to and became vested in the consolidated company.
- The mingling indiscriminately of matters of legal and equitable cognizance in the same complaint, and the enforcement in a single suit of all the rights and duties mentioned, is not authorized by the Act of Congress of Aug. 7, 1888, § 4, providing in effect that to secure and preserve to the United States the full value and benefit of its liens upon all the telegraph lines belonging to the railroad and telegraph companies mentioned in the Pacific Railroad companies acts, and to have them possessed, used, and operated in conformity with the statutes, it is made the duty of the attorney general by proper proceedings to prevent any unlawful interference

with the rights and equities of the United States, to have legally ascertained and adjudicated all alleged rights of all persons and corporations claiming any control or interest in any telegraph lines or property, or exclusive rights of way upon the lands of said railroad companies, and to have set aside all contracts and their provisions entered into by such companies unlawfully and beyond their powers.

9. The duty enjoined upon the Union Pacific Railroad Company by Act of Congress of Aug. 7, 1888, § 1, of operating by itself alone through its own corporate officers its telegraph lines, may and should be enforced by mandamus if in fact violated.
10. The duty enjoined by the Act of Congress of Aug. 7, 1888, § 2, upon the Pacific railroad companies, of affording equal facilities to all connecting lines of telegraph without discrimination against any, should be enforced in the mode prescribed by § 8,—of application to the Interstate Commerce Commission, which is required to proceed by mandamus, rather than by bill in equity, as the remedy provided is exclusive.
11. The United States government as the holder of a lien upon the Pacific railroads and telegraph lines is entitled, under the Act of Congress of Aug. 7, 1888, to maintain a bill in equity to have its rights and equities in and to the telegraph

property along the right of way of the Union Pacific Railway Company judicially ascertained, and to have the rights of other persons and corporations therein also ascertained and adjudicated, and, incidental thereto, to have set aside and annulled all provisions of contracts that are unlawful and in any manner impeach the security of the United States, cloud its title, or prejudice its rights.

12. The Attorney General of the United States in a suit to enforce the duty imposed upon the Pacific railroad companies by Act of Congress of Aug. 7, 1888, § 2, of affording equal facilities to all connecting lines of telegraph without discrimination, has, if such suit can be maintained, the burden of showing that some telegraph company has placed itself in a position to demand of the railway company the same facilities accorded to other companies, and that such demand has been refused, as it cannot be presumed that the railroad company intends to disregard its duty.
13. The United States government cannot demand that a contract, affecting property upon which it has a lien, and which is valid when made shall be annulled *in toto* upon the subsequent passage of a statute rendering some of its provisions not involving the others invalid.

Decided January 29, 1894.

A PPEAL by defendants from a decree of the Circuit Court of the United States for the Northern District of Nebraska in favor of complainant in a suit brought to cancel a contract between the defendant railroad company and the defendant telegraph company by which it was alleged that the railroad company had transferred to the telegraph company its franchise to operate an electric telegraph and to compel the railroad company to operate such telegraph through its own officers and employes. *Modified.*

Statement by **Thayer**, District Judge:

This was a bill exhibited by the Attorney General in behalf of the United States under the provisions of an Act of Congress approved August 7, 1888 (25 Stat. at L. 382) which by its title is declared to be supplementary to the Pacific Railroad acts of July 1, 1862, and July 2, 1864. *Vide* 12 Stat. at L. 489, and 13 Stat. at L. 356. The material portions of the Act of August 7, 1888, are as follows:

"Be it enacted by the senate and house of representatives of the United States of America in Congress assembled, that all railroad and telegraph companies to which the United States has granted any subsidy in lands or bonds or loan or credit for the construction of either railroad or telegraph lines, which, by the acts incorporating them, or by any Act amendatory, or supplementary thereto, are required to construct, maintain, or operate telegraph lines, and all companies engaged in operating said railroad or telegraph lines shall forthwith and henceforward, by and through their own respective corporate officers and employes, maintain and operate for railroad, governmental, commercial and all other purposes, telegraph lines, and exercise by themselves alone all the telegraph

franchises conferred upon them and obligations assumed by them under the acts making the grants as aforesaid.

"Sec. 2. That whenever any telegraph company which shall have accepted the provisions of title sixty-five of the Revised Statutes shall extend its line to any station or office of a telegraph line belonging to any one of said railroad or telegraph companies, referred to in the first section of this Act, said telegraph company so extending its line shall have the right and said railroad or telegraph company shall allow the line of said telegraph company so extending its line to connect with the telegraph line of said railroad or telegraph company to which it is extended at the place where their lines may meet, for the prompt and convenient interchange of telegraph business between said companies; and such railroad and telegraph companies, referred to in the first section of this Act, shall so operate their respective telegraph lines as to afford equal facilities to all, without discrimination in favor of or against any person, company or corporation whatever, and shall receive, deliver and exchange business with connecting telegraph lines on equal terms, and affording equal facilities, and without discrimination for or against any one of such connecting lines; and such exchange of business shall be on terms just and equitable.

"Sec. 3. That if any such railroad or telegraph company referred to in the first section of the Act, or company operating such railroad or telegraph line shall refuse or fail, in whole or in part, to maintain and operate a telegraph line as provided in this Act and acts to which this is supplementary, for the use of the government or the public, for commercial and other purposes, without discrimination, or shall refuse or fail to make or continue such arrangements for the in-

terchange of business with any connecting telegraph company, then any person, company, corporation, or connecting telegraph company may apply for relief to the Interstate Commerce Commission, whose duty it shall thereupon be, under such rules and regulations as said Commission may prescribe, to ascertain the facts, and determine and order what arrangement is proper to be made in the particular case, and the railroad or telegraph company concerned shall abide by and perform such order; and it shall be the duty of the Interstate Commerce Commission, when such determination and order are made, to notify the parties concerned, and, if necessary, enforce the same by writ of mandamus in the courts of the United States, in the name of the United States, at the relation of either of said Interstate Commerce Commissioners: provided, that the said commissioners may institute any inquiry, upon their own motion, in the same manner and to the same effect as though complaint had been made.

"Sec. 4. That in order to secure and preserve to the United States the full value and benefit of its liens upon all the telegraph lines required to be constructed by and lawfully belonging to said railroad and telegraph companies referred to in the first section of this Act, and to have the same possessed, used and operated in conformity with the provisions of this Act and of the several acts to which this Act is supplementary, it is hereby made the duty of the Attorney General of the United States, by proper proceedings, to prevent any unlawful interference with the rights and equities of the United States under this Act, and under the acts hereinbefore mentioned, and under all acts of Congress relating to such railroads and telegraph lines, and to have legally ascertained and firmly adjudicated all alleged rights of all persons and corporations whatever claiming in any manner any control or interest of any kind in any telegraph lines or property, or exclusive rights of way upon the lands of said railroad companies, or any of them, and to have all contracts and provisions of contracts set aside and annulled which have been unlawfully and beyond their powers entered into by said railroad or telegraph companies, or any of them, with any other person, company or corporation."

The Union Pacific Railway Company, which is named as one of the defendants in the bill, was formed in January, 1880, pursuant to section 16 of the Act of July 1, 1862, by the consolidation of three pre-existing railroad corporations, to wit, the old Union Pacific Railroad Company, the Kansas Pacific Railway Company, and the Denver Pacific Railway & Telegraph Company. The consolidated company now operates a line of railroad from Council Bluffs, Iowa, to Ogden, Utah, known as the main line; also, a line from Kansas City, Mo., to Denver, Colo., and a line from Denver north to a junction with the main line at Cheyenne. Prior to the consolidation in January, 1880, the Union Pacific Railroad had built the main line from Council Bluffs to Ogden, together with a line of telegraph along its right of way; the Kansas

Pacific Railway Company (which was first called the Leavenworth, Pawnee & Western Railroad, subsequently the Union Pacific Railroad, Eastern Division, and lastly the Kansas Pacific Railway Company) had built the line of railroad from Kansas City to Denver, and under a contract with the Western Union Telegraph Company of date October 1, 1866, had caused a line of telegraph to be erected on its right of way. Prior to the consolidation the Denver Pacific Railway & Telegraph Company had built a line of railroad and telegraph from Denver to Cheyenne, acting in that behalf under a contract with the Kansas Pacific Railway Company, whereby the former company acquired so much of the Kansas Pacific Company's subsidy as pertained to that part of its line between Denver and Cheyenne. The contract between the two companies, last mentioned, was authorized by an Act of Congress approved on March 3, 1869 (15 Stat. at L. 324). The Leavenworth, Pawnee & Western Railroad Company (afterwards termed the Kansas Pacific Railway Company) accepted the provisions of the ninth section of the Pacific Railroad acts of July 1, 1862, and July 2, 1864, which acceptance entitled it to receive, and it did in fact receive, a large subsidy from the government for constructing the line of railroad from Kansas City to Cheyenne via Denver, and the Union Pacific Railroad Company received a like subsidy for building the main line from Council Bluffs to Ogden.

The foregoing facts were stated substantially in the bill of complaint. It further charged, in substance, as follows: That by the Act of July 1, 1862, the Union Pacific Railroad Company became and was bound to build and maintain, and to operate by its own servants and agents, a line of telegraph for commercial and governmental purposes between Omaha and Ogden, but that on September 1, 1869, and on December 20, 1871, said railroad company had unlawfully leased to the Atlantic & Pacific Telegraph Company "all its telegraph lines, wires, poles, instruments, and offices, and all of its property pertaining to the business of telegraphy," for the full period of its corporate existence; and that the consolidated company had thereafter, on July 1, 1881, entered into a contract with the Western Union Telegraph Company (which had, in the mean time, become the successor of the Atlantic & Pacific Telegraph Company) whereby it had "surrendered its franchise and alienated its powers under its charter" to said Western Union Telegraph Company, and that under said contract the Western Union Telegraph Company had entered into possession and control of the lines of telegraph between Omaha and Ogden. The bill also charged that under the provisions of the Pacific Railroad acts of July 1, 1862, and July 2, 1864, the United States had a lien upon the railway and telegraph lines aforesaid, and the earnings of each, with all appurtenances, to reimburse it for aid extended in constructing the same, but that the Union Pacific Railway Company, by the contract of July 1, 1881, with the Western Union Telegraph Company, had "attempted to relieve

itself from the duty of maintaining and operating telegraph lines for railroad, governmental, commercial, and all other purposes and, had refused to exercise the obligations assumed by it under the aforesaid acts;" that the United States "had been deprived by said contract of its security and indemnity fund;" that the earnings from said telegraph business had been appropriated by the Western Union Telegraph Company, which had taken possession, for its own use, of the right of way and materials donated by the United States; that the Union Pacific Railway Company "had surrendered its telegraphic franchises to the telegraph company;" that it "had avoided and refused to perform its duties; that it had refused to connect with other lines, or to afford any facilities for the exchange of telegraph business except with the Western Union Telegraph Company; that it had refused to do any telegraph business for the United States or for the general public, and had thereby granted a monopoly of the telegraph business along its lines to the Western Union Telegraph Company, and had deprived the people of the United States of the benefits of free competition, contrary to the Pacific Railroad acts aforesaid and the supplementary Act of August 7, 1888. The bill further averred that since the passage of the Act of August 7, 1888, the Union Pacific Railway Company had continued to act in accordance with the provisions of the contract of July 1, 1881, and that it had done so, subsequent to the passage of that Act, under pretense of complying with an injunction which the Western Union Telegraph Company had obtained on February 14, 1889, in the United States Circuit Court for the District of Nebraska, restraining the Union Pacific Railway Company "from doing any act or thing contrary to the provisions of that contract." The bill of complaint disclosed the various proceedings that had been taken in said injunction suit (which is characterized as a collusive suit) and among other things averred, in substance, that it was therein claimed by the Western Union Telegraph Company that prior to October 1, 1886, the United States Telegraph Company had moved its telegraph line in the state of Kansas upon the right of way of the Kansas Pacific Railway Company under an arrangement with the Kansas Pacific Railway Company which was authorized by an Act of Congress approved July 2, 1864 (13 Stat. at L. 373); that the Western Union Telegraph Company had succeeded to all the rights of the United States Telegraph Company, and on October 1, 1886, had entered into a contract with the Kansas Pacific Railway Company, in pursuance of which it had completed the line of telegraph along the Kansas Pacific Railway to Denver, and that the line so constructed was duly accepted by the United States as a fulfillment of the obligation of the Kansas Pacific Railway Company to erect a line of telegraph. With respect to this claim on the part of the Western Union Telegraph Company, the bill filed by the United States charged, in substance, that the United States Telegraph Company did not remove its constructed line, under the aforesaid arrangement, upon the right of

way of the Kansas Pacific Railway Company; that the Western Union Telegraph Company did not complete a line of telegraph along that road to Denver, as claimed; and that the United States had neither accepted such line of telegraph from the Western Union Telegraph Company, nor dealt with nor recognized either it or the United States Telegraph Company as the builder of said line. The bill finally charged that all of the aforesaid contracts with the Western Union Telegraph Company were beyond the power of the railway company to make, and against public policy, and in violation of the Pacific Railroad acts and the Act of August 7, 1888.

The prayer of the bill was in accordance with the fourth section of the Act of August 7, 1888: "That the court ascertain and finally adjudge the rights of all persons and corporations in any manner claiming any contract or interest of any kind in said telegraph lines or property, or exclusive rights of way upon the lands of said railway company, or any of them, and that upon the hearing and order or final decree be entered, canceling and annulling said contract and all provisions of contracts relating to the alienation of said telegraph lines or the control and management thereof," and that said railway company "be decreed and compelled to maintain and operate said telegraph lines according to law." Answers were filed by the railway company and the telegraph company, which admitted the execution of the several contracts referred to in the bill, but denied that the contracts of July 1, 1881, and October 1, 1886, were invalid. The defendants further denied, in substance, that the railway company had transferred or surrendered its telegraphic franchise to the telegraph company, or that it had divested itself of the power to perform its charter obligations to the government or to the public with respect to maintaining a telegraph line, or that it had at any time failed or refused to discharge its obligations in that behalf. On the final hearing the circuit court entered a decree canceling and annulling all of the contracts with the Western Union Telegraph Company and the Atlantic & Pacific Telegraph Company that have been heretofore referred to. It further decreed that the Union Pacific Railway Company "put an end to all relations with the Western Union Telegraph Company not equally allowed to other persons and corporations operating . . . telegraphs, that it at once resume possession of its offices, poles, wires, instruments, and all of its other property belonging to the business of telegraphy, along such of its main and branch lines as were aided by the government under the Act of July 1, 1862, . . . and henceforth, by the through its own corporate officers and employes, maintain and operate for railroad, governmental, commercial, and other purposes such telegraph lines and instruments, and . . . exercise, by itself alone, all the telegraphic franchises conferred upon it under the several acts granting to it subsidies." The decree further required the railway company to afford equal facilities to all telegraph companies without discrimination, and to receive, deliver, and

exchange business with connecting telegraph companies on equal terms, and to afford equal facilities to all, without discrimination for or against any. It further commanded the railway company to construct and provide such lines of telegraph and instrumentalities as would be adequate to enable it to carry out the provisions of the decree aforesaid, and also commanded the Western Union Telegraph Company to forthwith vacate all offices of the railway company without removing therefrom, until further order, any property which had theretofore been jointly used by the two defendants.

The opinion of the circuit court is reported in 50 Fed. Rep. 28, 41.

Argued before Caldwell, *Circuit Judge*, and Thayer, *District Judge*.

Messrs. John F. Dillon, John M. Thurston, and W. R. Kelly, for appellant, Union Pac. R. Co.

Mr. Rush Taggart for appellant, Western U. Tele. Co.

Mr. Lawrence Maxwell, Jr., Solicitor General, for the United States.

Thayer, District Judge, delivered the opinion of the court:

The chief question to be considered on this appeal is whether the United States is entitled to have the contract of July 1, 1881, between the Union Pacific Railway Company and the Western Union Telegraph Company, canceled and annulled, either because it was originally illegal and beyond the power of the Union Pacific Railway Company, or because its provisions are now repugnant to the Act of August 7, 1888 (25 Stat. at L. 382). Subordinate to this general inquiry are the questions whether the contract of October 1, 1866, between the Western Union Telegraph Company and the Kansas Pacific Railway Company, is invalid, and some questions pertaining to the scope, purpose, and effect of the Act of August 7, 1888. It is claimed by the government, and is not denied by the appellants, that the Pacific Railroad acts of July 1, 1862, and July 2, 1864, imposed on the various constituent railroad companies who now compose the Union Pacific Railway company the duty, among others, of constructing and maintaining on their several rights of way a line of telegraph for governmental, commercial, and other purposes. It was held both by *Mr. Justice Brewer* in this case, and by *Mr. Justice Miller* and *Judge McCrary* in other cases where the same question was involved, that the obligation thus imposed on the several railroad companies to construct and maintain telegraph lines could not be lawfully avoided by leasing their lines of telegraph, after their construction, to some other corporation, to be by it maintained and operated. *Id.* 50 Fed. Rep. 32; *Western U. Tele. Co. v. Union Pac. R. Co.* 3 Fed. Rep. 423, 721, 725; *Atlantic & P. Tele. Co. v. Union Pac. R. Co.* 1 Fed. Rep. 745, 749. This latter proposition does not seem to be controverted by the appellants, or either of them; therefore, it must be taken as conceded that the lease granted by the

Union Pacific Railroad Company to the Atlantic & Pacific Telegraph Company on September 1, 1869, and the supplementary agreement of December 20, 1871, between the same companies, which are referred to in the bill of complaint, were each beyond the power of the railroad company to execute, and for that reason were and are of no binding force or efficacy. The nineteenth section of the Pacific Railroad Act of July 1, 1862 (12 Stat. at L. 489) and the fourth section of the Act of July 2, 1864 (13 Stat. at L. 378) provided a means by which the old Union Pacific Railroad Company and the Kansas Pacific Railway Company might respectively relieve themselves of the obligation to construct and maintain a telegraph line along their respective rights of way. When the Act of July 1, 1862, was passed, the Pacific Telegraph Company, the Overland Telegraph Company, and the California State Telegraph Company were operating a line of telegraph across the plains, from the Missouri river to San Francisco, about on the proposed route of the main line of the Union Pacific Railway Company, under a contract with the government which had been entered into pursuant to an Act of Congress approved June 16, 1860 (12 Stat. at L. 41) entitled "An Act to Facilitate Communication Between the Atlantic and Pacific States by Electric Telegraph." The nineteenth section of the Act of July 1, 1862, provided, in substance, that an arrangement might be made with said last named telegraph companies, by the railway companies mentioned in said Act, to move their line of telegraph upon the railroad right of way, and that if such an arrangement was entered into, it should be considered a fulfillment of the obligation of the railroad company to construct and maintain a line of telegraph; and, even in the absence of such an arrangement, it authorized the aforesaid telegraph companies to move their line upon the railroad right of way. In like manner the fourth section of the Act of July 2, 1864, which latter Act empowered the United States Telegraph Company to construct a telegraph line between the Missouri river and San Francisco, authorized the United States Telegraph Company to enter into an arrangement with either of the railway companies mentioned in the Pacific Railroad Act of July 1, 1862, whereby its telegraph line might be erected on the railroad right of way, and, if so erected, should be held and considered a fulfillment of the railroad company's obligation to construct and maintain a telegraph line. This latter Act, though general in its terms, evidently had in view an arrangement between the United States Telegraph Company and the Kansas Pacific Railway Company, whereby the latter should be relieved of its telegraphic obligation, as the line of the United States Telegraph Company was projected to run through Kansas. With respect to the opportunity thus afforded to the several railway companies to fulfill their telegraphic obligations to the United States otherwise than by actually constructing and maintaining a telegraph line for governmental and commercial purposes, it is sufficient to say, that it does not appear to be

claimed by the appellants, or either of them, that the old Union Pacific Railroad Company ever availed itself of the opportunity thus afforded it, so far as the main line between Omaha and Ogden is concerned. On the contrary, it built a telegraph line of its own, on the north side of its right of way, between the points aforesaid, and the three telegraph companies heretofore named (the Pacific, the Overland, and the California State) moved their line upon the south side of the right of way, in accordance with the statute aforesaid, but not under any such "arrangement" or agreement with the railway company as would suffice to relieve the latter of its obligation to maintain a telegraph. The case is different, however, with respect to the Kansas Pacific Railway Company. It is argued with much force that the latter company entered into an arrangement with the United States Telegraph Company, which arrangement was subsequently embodied in the contract of October 1, 1866, with the Western Union Telegraph Company, the successor of the United States Telegraph Company, whereby, under the fourth section of the Act of July 2, 1864, *supra*, it fulfilled its obligation to maintain a telegraph line at least between Kansas City and Denver. We shall discuss the merits of this contention further on, but at present, with the foregoing summary of the points conceded, and in the light of such concessions, we turn to consider whether the contract of July 1, 1881, which superseded all other contracts, was a valid agreement.

Before stating the provisions of that contract it will be well to describe the situation as it existed when the same was entered into. At that time the Western Union Telegraph Company, as the successor of the Overland, the Pacific, and the California State Telegraph Companies, was lawfully in possession of, and was the owner of a line of telegraph upon the railroad right of way between Omaha and Ogden. The Western Union Telegraph Company had in fact furnished the means to build, and had built, that line of telegraph across the plains, and had caused it to be moved upon the railroad right of way, through the agency of the three telegraph companies last named. On July 1, 1881, the Western Union Telegraph Company had also succeeded to all the rights of the Atlantic & Pacific Telegraph Company, which was the lessee of the Union Pacific's telegraph line under the lease of September 1, 1869. In a suit which had theretofore arisen between the Atlantic & Pacific Telegraph Company and the Union Pacific Railway Company it had been decided that the last mentioned lease was invalid; but, as it appeared in the course of the suit that the railway company had received for such lease 17,800 shares of the telegraph company's stock, from which it had realized from four to six hundred thousand dollars, the court had enjoined the railway company from taking possession of the telegraph line then in the possession of the Atlantic & Pacific Telegraph Company under the invalid lease until there had been an accounting and until the consideration for the lease had been re-

stored. *vide* 1 Fed. Rep. 745, 752. This injunction was in full force on July 1, 1881. The railway company did not have possession of the telegraph line between Council Bluffs and Ogden, and could not acquire possession of that line except on the condition last indicated. Prior to July 1, 1881, litigation had also arisen with respect to the telegraph line on the right of the Kansas Pacific Railway Company. The Union Pacific Railway Company, after the consolidation, had threatened to take possession of that line, which had been erected and was being operated by the Western Union Telegraph Company under the contract of October 1, 1866, with the Kansas Pacific Railway Company, heretofore mentioned. The Western Union Telegraph Company had applied for and obtained an injunction against the railway company to restrain its threatened action. With reference to that litigation it is sufficient to say, at present, that on July 1, 1881, the injunction was in full force, but under conditions which permitted the railway company to have the exclusive use of one wire between Kansas City and Denver for railroad and commercial business. *vide* 3 Fed. Rep. 417, 423, 721, 736.

In this posture of affairs the contract of July 1, 1881, was executed. As the contract is lengthy, we shall only undertake to state its material provisions, and according to their legal effect, rather than in the language of the parties. It recites, in the first instance, that it is entered into "for the purpose of providing telegraphic facilities for the parties thereto, and maintaining and operating the lines of telegraph along the Union Pacific Railway in the most economical manner, in the interest of both parties, and for the purpose of fulfilling the obligations of the railway company to . . . the United States and the public in respect to the telegraphic service required by the Act of Congress of July 1, 1862, and the amendments thereto." The parties then agreed, in substance, as follows: That all existing suits (being those heretofore mentioned) should be dismissed, and that the contract should operate as a release and discharge of all claims, debts, and liabilities arising and accruing under pre-existing contracts between the parties, which were then in litigation; that the railway company should assure to the telegraph company as far as it legally could do so, the exclusive right of way along its railroad, and any extensions and branches thereof, for the construction and maintenance of lines of telegraph, and that the railway company would not transport men and material for the construction of a line or lines of telegraph to be operated in competition with the Western Union Telegraph Company, except at its regular local rates, nor furnish such competing lines facilities for construction that it could lawfully withhold, nor stop its trains or distribute material at other than regular stations; that no employé of the railway company should be employed by, or have any connection with, any other telegraph company than the Western Union Company; and that the latter company should have the exclusive right, as against any other telegraph

company, to occupy and connect with the railway company's depots or station houses for commercial telegraph purposes. Concerning the mode of keeping up, maintaining, and renewing the existing lines of telegraph then on the railroad right of way, the contract contained the following stipulations: That the railway company should, at its own expense, furnish all the labor in that behalf required, except a foreman; that the telegraph company should provide a foreman, skilled in the work of construction and repair, to direct and supervise such work; and that each party should pay one half the cost of poles, wire, insulators, tools, and other materials used for the maintenance, renewal, or repair of telegraph lines along all of the railway company's roads, branches, and extensions, until three wires for the exclusive use of each party had been provided between Council Bluffs and Ogden,—two for the exclusive use of each party between Kansas City and Denver, and one for the exclusive use of each party on all other portions of the railway company's road. The contract in this respect further provided that the railway company should transport free of charge, and distribute along the line of its railroad, all poles and other materials that were required in the work of maintenance, renewal, and reconstruction, also all employés and laborers who were engaged in such work, and that the telegraph company, on its part, should supply telegraph instruments and local batteries to work the line, and blanks and stationery for commercial telegraph business. With respect to the mode of operating the telegraph lines aforesaid, the contract contained the following provisions: That at all telegraph stations of the railway company its operators should receive and transmit such commercial or public messages as were offered, and should account for the tolls paid thereon to the telegraph company, but that at the end of each month the telegraph company should return to the railway company one half of such receipts at its offices, excepting only tolls paid on ocean cable messages and tolls paid for the transmission of messages over other lines of telegraph than Western Union lines; that the telegraph company should also furnish, free of charge, one wire between Omaha and Kansas City, over which the railway company might transact its railroad business between those points and at intermediate places on the Missouri river, including Council Bluffs; that either party might maintain offices along the Union Pacific Railway where they then had offices, and might establish additional offices, but that the telegraph company should not establish independent offices at any point along said railroad within one mile of an office previously established by the railway company unless the latter company consented, and the railway company's operators should not compete with the telegraph company at points where the latter maintained independent offices, by cutting rates, or by active efforts to divert business from the telegraph company. It was further stipulated by the parties as follows: That if any person, or officer of the government, tendered a message to a railway

telegraph operator at any station between Council Bluffs and Ogden, and required its transmission over the wires of the railway company, it should be so sent, at rates fixed by the railway company. It was also stipulated, in substance, that in addition to the three wires between Council Bluffs and Ogden, and the two wires between Kansas City and Denver, and the one wire on other portions of its road, which were to be set apart, or were to be strung and maintained, for the exclusive use of the railway company, the railway company might string such other wires for its exclusive use, and at its own cost, as it saw fit; and the like privilege was accorded to the telegraph company. It was also stipulated that a competent superintendent of the telegraph lines aforesaid should be appointed by the railway and telegraph companies, and that both should contribute to pay for his services. The foregoing contract was to continue in force for 25 years, and was to supersede all previous contracts relating to said telegraph lines including the contract of October 1, 1866, between the Western Union Telegraph Company and the Kansas Pacific Railway Company, but it was agreed that if the contract of July 1, 1881, was not kept in good faith by the railway company, then the superseded contracts should be revived and considered in force. Since the foregoing agreement was entered into, and in accordance with its provisions, the lines of telegraph formerly erected on the railway company's right of way between Omaha and Ogden have been entirely reconstructed in a very substantial manner, and at great cost to the parties. In the process of reconstruction, all of the wires have been strung on a new line of poles erected on the north side of the right of way, a portion of which wires are exclusively used by the railway company and the remainder by the telegraph company. Some of the telegraph company's wires connect with the depots and station houses of the railway company, but many of its wires run into independent offices of the telegraph company, and are not so connected.

It is claimed by the United States (and this contention seems to have prevailed in the circuit court) that this contract was originally beyond the power of the Union Pacific Railway Company, and therefore invalid, because the railway company thereby transferred or surrendered its telegraphic franchise to the Western Union Telegraph Company, and disabled itself to discharge its obligations to the government and the public; secondly, that the contract is in restraint of trade and against public policy, and for that reason is illegal and void.

With reference to this contention it should be remarked, at the outset, that when the contract of 1881 was executed, and long prior thereto, the Western Union Telegraph Company was lawfully in possession of a line of telegraph on the railroad right of way, and was operating the same for commercial and other purposes. It was there with the express sanction of Congress under the nineteenth section of the Act of July 1, 1862, and neither acquired nor claims to have acquired

its right to operate its existing wires under the said contract. Looking at the provisions of the agreement, it is also noteworthy that it imposes no limitations or restrictions upon the right of the railway company to operate a telegraph for commercial, governmental, and other purposes. It has wires which are devoted to its exclusive use, telegraphic offices at convenient points along its road, operators to work its wires, who are expressly required to send over the same all such messages of a governmental or commercial character as are directed by the senders to be so sent, and the right to string such additional wires as may at any time be deemed essential or convenient to meet the demands made upon it for telegraphic service. It surely cannot be maintained that in addition to the foregoing facilities the railway company must maintain a separate line of poles on its right of way and at its own expense, for when Congress authorized other telegraph companies to go upon this right of way, as it did by the Act of July 1, 1862, and again by the Act of July 24, 1866 (14 Stat. at L. 231) it must have foreseen that it would be convenient, economical, and often necessary for such companies and the railway company to string their wires on the same poles, and we will not impute to Congress an intention to ignore all considerations of convenience and economy, especially in view of the magnitude and importance of the enterprise which it aimed to foster. We may well take judicial notice of the fact that there is no inherent difficulty in stringing several independent lines of telegraph on the same poles. That method of construction in no wise interferes with the efficiency of lines that are so built, while it is often a convenient, and always an economical, arrangement. We think, therefore, that the Pacific Railroad acts did not impose on the railway company the duty of maintaining a separate line of poles upon which to string its wires, and that its failure to do so cannot be regarded as any evidence of an abandonment of its public duties.

Perhaps the strongest evidence of an intent on the part of the Union Pacific Railway Company to part with its telegraphic franchise is to be found in those provisions of the contract whereby the telegraph company gained access to the railway company's station houses with some of its wires, and the right to avail itself of the services of employees of the railway company; but on a careful scrutiny it will be seen that the most that can be alleged against these provisions is that they afforded to the telegraph company some facilities for competing with the railway company in the matter of transacting a commercial business, which it would not have enjoyed if it had been compelled to maintain independent offices at all of such points, and to man them with its own operators. These provisions cannot be said to have amounted to a transfer or surrender of the telegraphic franchise, because, notwithstanding these provisions, the railway company still retained its right and capacity to do a commercial business. Moreover, it does not occur to us that there are any provisions in the Pacific Railroad acts which

made it the duty of the railway company to withhold from any telegraph company that was authorized to occupy its right of way any facility for the convenient and economical operation of its line, merely because it would enable such company to compete more successfully with the railway company in the transaction of a telegraph business. Congress had offered to relieve the railway company of the entire burden of constructing and maintaining a telegraph line, if it would arrange with one of these telegraph companies to move its line upon the railroad right of way. When those acts were passed, Congress was desirous, above all things, to have a telegraph line constructed across the plains that would be able to render cheap, prompt, and efficient service both to the government and the public. This purpose is manifest throughout all of the legislation of Congress, which antedates the contract of 1881, and for that reason we cannot hold the provisions of the contract now in question to be unlawful merely because they gave the telegraph company better opportunities for successful competition. We think it obvious that they enabled both the railway company and the telegraph company to operate their lines more economically, and to render the public better service, without impairing the franchise of either.

Much stress, however, is laid on the fact that under the operation of the contract the great bulk of the commercial telegraph business over the lines in question is done by the Western Union Company. Attention is also directed to the circumstance that the wires devoted to the use of the railway company are about sufficient to do its ordinary railroad business, and are wholly insufficient to do a considerable portion of the commercial business. With reference to the last of these suggestions it is sufficient to say that the record does not disclose that the railway company has ever failed or refused to transmit over its own wires a single governmental or commercial message which was tendered it to be so sent. The wires which it operates seem to be adequate for its patronage, and under no possible construction of its charter can it be held bound to furnish more wires than are needed to meet the demands made upon it for telegraphic service. But it is said that its loss of patronage is due to the contract with the telegraph company, and that what has actually occurred under the operation of that contract is persuasive evidence of what was intended to happen, and that it should control in determining the purpose of the parties thereto and the true interpretation of the agreement. We entertain no doubt that the bulk of the commercial business, as claimed, is in the hands of the Western Union Telegraph Company; that fact is abundantly shown by the record, and is practically admitted by the appellants. But we are unable to concede that the fact last mentioned is mainly due to the operation of the contract of 1881, or that it should be accepted as a safe test by which to determine the legal effect of that agreement. It is not a necessary inference that the failure of the railway company to secure a fair share of the commercial

telegraph business is due to the existence of the contract; much less does it follow that, because the Western Union Telegraph Company now transacts the great bulk of the commercial telegraph business, the railway company has therefore parted with its telegraphic franchise, and disabled itself from fulfilling its public duties. The telegraph company is engaged exclusively in operating lines of telegraph for commercial and other purposes. Its wires ramify throughout the United States, and reach every important city and hamlet, while the railway company is limited to the lines erected on its right of way, and must depend upon connecting lines for the transmission of all dispatches that are not purely local. In view of this fact it becomes highly probable that, under the operation of natural laws of trade, the same disparity in the business of the two companies would in any event exist, because of the superior facilities of the telegraph company for reaching distant points, and forwarding messages intrusted to it with promptness and accuracy. At all events, we cannot regard the existing disparity in the amount of commercial business done by the respective companies as of much importance in deciding whether the contract was beyond the power of the railway company. That issue must be determined by ascertaining what power to transact a commercial telegraph business the railway company still retains, and what functions it has abdicated; in other words, the question must be decided with reference to the provisions of the contract, rather than with reference to a business condition that now exists, which may be, and probably is, due to natural causes. *Midland R. Co. v. Great Western R. Co.* 8 Ch. 841, 854.

The result of our deliberations on this branch of the case has been that we are unable to declare the contract of 1881 to be beyond the power of the railway company because it divests the company of its telegraphic franchise, or because it renders it powerless to discharge its public duties. In our judgment, the Union Pacific Railway Company has now the same absolute power to operate a telegraph line for commercial and other purposes that it ever had. Under the contract in question it secured at once the absolute control of several lines of wire, with authority to use them for all purposes, and the right to string any number of additional wires, and to use them as it saw fit. By the provisions of the agreement it also avoided a litigation of vast proportions and great intricacy in which it was then involved, touching its right to the lines of telegraph on its right of way, and at the same time it was relieved of its liability to account for large sums of money which it had received from the Atlantic & Pacific Telegraph Company under the invalid lease of September 1, 1869. From the standpoint of the railway company it was confessedly a beneficial business arrangement, by means of which it has realized great advantages in which the government has participated; and the record before this court fails to disclose that the general public have been prejudiced by the manner in which the lines of telegraph in question have been

maintained and operated under the provisions of the agreement. We would not be understood as intimating that the considerations last mentioned should have any weight if the contract was in fact contrary to law; but they furnish an adequate reason why it should not be set aside and canceled, unless it appears that it was clearly beyond the power of the railway company to enter into such an arrangement.

The other objection to the contract of 1881, which has been heretofore mentioned, is based on those provisions of the agreement whereby the Western Union Telegraph Company attempted to obtain certain exclusive rights and privileges from the Union Pacific Railway Company, and to prevent other telegraph companies from coming upon the railroad right of way. These stipulations are said to have rendered the contract voidable on grounds of public policy. When the contract was executed, the railway company appears to have entertained doubts of its power "to assure to the telegraph company the exclusive right of way along and upon its line of road;" hence it agreed to grant such exclusive right only to the extent that it might legally do so. The further provision in the contract relative to withholding facilities for the construction of competing lines of telegraph was also accompanied with the reservation that it should only be required to refuse to afford such assistance and facilities as it might lawfully withhold. It may be admitted that these provisions of the contract would have been unlawful, as the law is now understood, if the railway company had bound itself absolutely to exclude other telegraph companies from its right of way, or to withhold all facilities for the construction of competing lines. *Western U. Teleg. Co. v. American U. Teleg. Co.* 65 Ga. 160, 38 Am. Rep. 781. But, as these stipulations were actually drawn, they neither bound the railway company to do anything that was unlawful or contrary to its duty. The most that can be alleged against them is that they placed the railway company in a position in which it might be compelled to determine, at its peril, whether, by extending certain facilities and assistance to competing lines, it would thereby violate its contract with the telegraph company; but this is an attitude in which the parties to contracts are frequently placed. The only exclusive privileges that the telegraph company acquired by this contract, so far as we are able to see, was the right to connect its wires with the railway company's station-houses and to maintain offices therein; also, the right to have the wires thus connected with such stations operated by employees of the railway company, and the right, under the ninth clause, to have poles and telegraph materials transported and distributed free of charge along the Union Pacific Railway. For all of these privileges the railway company undoubtedly received what it deemed an adequate consideration in the way of advantages derived from other provisions of the contract, and the privileges in question do not appear to us to be of such nature that the railway company was bound, either under then existing acts of Congress or on general

principles of law, to confer them equally upon all other telegraph companies. *Memphis & L. R. R. Co. v. Southern Exp. Co.* 117 U. S. 1, 29 L. ed. 791; *Pullman Palace Car Co. v. Missouri Pac. R. Co.* 115 U. S. 587, 29 L. ed. 499. Under the second section of the Act of Congress of August 7, 1888, enjoining upon the railway company the duty of affording equal facilities to all without discrimination, the privileges aforesaid may most likely be claimed by all telegraph companies who comply with the provisions of the last mentioned Act, and they can no longer be regarded as exclusive; but we think it must be conceded that, when the contract was executed, the railway company had some power to enter into arrangements with other telegraph companies with a view of making a profitable use of its telegraphic franchise, and that within this power was the right to select some telegraph company, and to confer upon its special privileges, like those above mentioned, in exchange for benefits and advantages which it could by such means secure. We will not impute to Congress the folly of having granted to the railway company a telegraphic franchise, and of having so limited the power to exercise it or deal with it as to render it a burden rather than a benefit. In the nature of things, some power must be conceded to the railway company to enter into arrangements with other telegraph companies to assure the economical maintenance and profitable working of its lines, and we think that the grant of the exclusive privileges above referred to was not an unreasonable nor an unlawful exercise of that power.

Passing, now, to the contract of October 1, 1866, between the Kansas Pacific Railway Company and the Western Union Telegraph Company, it should be observed, that the necessity of noticing that contract, which has been superseded, for the time being, by the contract of 1881, grows out of the fact that it was annulled by the decree of the circuit court, whereas the appellants claim that it was lawfully entered into under the fourth section of the Act of July 2, 1864, and operated to relieve the railway company of its obligation to maintain a telegraph line along the railroad right of way between Kansas City and Denver. Hence, it becomes an important inquiry whether that contract was rightfully annulled. The Act of July 2, 1864, last referred to, is entitled "An Act for Increased Facilities of Telegraphic Communication Between the Atlantic and Pacific States and the Territory of Idaho." 13 Stat. at L. 373. Its first section declared "that the United States Telegraph Company and their associates, are hereby authorized to erect a line or lines of magnetic telegraph between the Missouri river and the city of San Francisco, . . . on such route as they may select, to connect with the lines of the said United States Telegraph Company now constructed and being constructed through the states of the Union." By the same section the company was given the right to use unoccupied land of the United States for right of way, materials, station houses, etc. The second section granted said company the right to

erect a line of telegraph from Ft. Hall to Portland, Or., via San Francisco, and from Ft. Hall to Bannock and Virginia City. The third section granted to the company the right to send dispatches over any line then or thereafter built by authority of Congress, to connect with any lines erected by the Russian or English governments. The fourth and last section was as follows:

"Sec. 4. The several railroad companies authorized by Act of Congress, July one, eighteen hundred and sixty-two, are authorized to enter into arrangements with the United States Telegraph Company so that the line of telegraph between the Missouri river and San Francisco may be made upon and along the line of said railroad and branches as fast as said roads and branches are built, and if said arrangements be entered into, and the transfer of said telegraph line be made in accordance therewith to the line of said railroad and branches, such transfer shall, for all purposes of the Act referred to, be held and considered a fulfillment on the part of said railroad companies of the provision of the Act in regard to the construction of a telegraph line; and, in case of disagreement, said telegraph company are authorized to remove their line of telegraph along and upon the line of railroad therein contemplated, without prejudice to the rights of said railroad companies."

Now, the contract of October 1, 1866, provided, in substance, for the erection of a line of telegraph on the railroad right of way from Lawrence, Kan., to Denver, Colo., at the joint expense of the telegraph company and the railway company, and for their joint use, but the railway company was denied the right to transact a commercial telegraph business over that line. Before this contract was entered into, a small portion of the line between Lawrence and Denver had been wholly or partially constructed by the United States Telegraph Company, under an arrangement with the railway company for its joint use, and it seems evident that the agreement of October 1, 1866, was entered into with the Western Union Telegraph Company because, by consolidation proceedings, it had then become the successor of the United States Telegraph Company. It seems most probable, we think, that the contract of October 1, 1866, was intended to give expression, in a more detailed form, to an oral understanding or agreement which had previously existed between the Kansas Pacific Railway Company and the United States Telegraph Company, and it admits of no doubt that, in accordance with the terms of that contract, a line of telegraph was completed through to Denver. After a very full consideration of the question it was held by *Mr. Justice Miller*, as far back as 1880, in the case of *Western U. Tele. Co. v. Union Pac. R. Co.* 3 Fed. Rep. 721, 727, 728, that the contract of October 1, 1866, embodies such an "arrangement" as was contemplated and authorized by the fourth section of the Act of July 2, 1864, above quoted, and such an "arrangement" as, if carried out, would absolve the railway company with which it was made from the obligation to construct and operate an independent line of tele-

graph. The court said in that case that "it was manifestly the design of the Act of 1864 to enable the United States Telegraph Company to become substituted, by a proper arrangement with the Pacific Railroad Company and its branches, to the right to build a telegraph line along the . . . right of way of those railroad companies, and thereby to relieve those companies from the obligation to build and operate such a line." It furthermore said, in substance, that the contract of 1866 satisfied all the requirements of the Act of July 2, 1864, notwithstanding the fact that it prohibited the railway company from transmitting commercial messages. In that case, however, the evidence then before the court did not disclose whether the Western Union Telegraph Company was in fact the legal successor of the United States Telegraph Company, and that point was left undetermined, with the statement, however, that the contract of 1866 was clearly valid if such successorship was thereafter established.

On the trial of the present case *Mr. Justice Brewer*, held, in effect that the testimony showed that the United States Telegraph Company and the Western Union Telegraph Company had become lawfully consolidated under the laws of New York, prior to October 1, 1866, and that the latter company was the legal successor of the former. He was of the opinion, however, that the privilege conferred upon the United States Telegraph Company by the fourth section of the Act of July 2, 1864, *supra*, was so strictly personal that it was lost by the consolidation proceedings, and did not pass to the consolidated company. In all other respects the circuit court appears to have fully concurred in the points ruled by *Mr. Justice Miller*, and in similar rulings made by *Judge McCrary* in the same case. *vide* 3 Fed. Rep. 423, 425. The question that we have to decide, therefore, with respect to the contract of 1866 (and in view of former decisions, the only question that we deem it necessary to consider) is whether the privilege granted to the United States Telegraph Company by the act of July 2, 1864, was purely personal, and was lost by its merger with the Western Union Telegraph Company. With reference to that question it may be conceded to be a well settled rule, resting upon sound reasons, that, when a franchise has been granted to a quasi public corporation in consideration of public benefits that may result from its exercise, such franchise cannot be bodily assigned by the grantee company unless the power of assignment is conferred in express terms or by fair implication. Such franchises are properly said to be personal in their nature, and not assignable. But when a corporation is endowed with a privilege or power like the one now in question, and the corporation is one which, under the law of its creation, has the right to consolidate with other corporations engaged in a like business, it may well be doubted whether the rule above conceded has any application. In such cases it must be presumed that the privilege was conferred with full knowledge of all the charter powers of the grantee, and it is a reasonable inference, unless some restrictive words are

employed, that the legislature intended that the privilege conferred should pass to, and become vested in, the consolidated company, if one was subsequently formed. In the present case, however, it is not necessary for the Western Union Telegraph Company to rest its right to enter into the aforesaid arrangement with the Kansas Pacific Railway Company upon the ground last stated, however tenable that ground may appear to be, for the Act of July 2, 1864, bears upon its face indubitable evidence that Congress did not intend that the right to enter into such an arrangement should be exercised solely by the United States Telegraph Company. The first section of that Act granted the right to construct a line of telegraph between the Missouri river and San Francisco to "the United States Telegraph Company and their associates." That was the important franchise which the Act conferred, and other privileges mentioned in succeeding sections were incidental and supplementary; in other words, they were conferred to furnish an inducement to the telegraph company and its associates, and to enable them, to accomplish the work authorized by the first section, which the government was desirous of fostering. In view of the language employed in the first paragraph of the Act, which clearly authorized and encouraged other corporations to become associated with the United States Telegraph Company, and to embark their means in what was then considered a great and hazardous enterprise, it cannot be consistently maintained that Congress intended that the privilege of entering into the arrangement mentioned in the fourth section of the Act should be confined solely to the United States Telegraph Company, and that it should not inure to the benefit of its associates. We think it is far more reasonable to suppose that Congress intended that the privilege in question should be shared by any corporation which became lawfully associated with the United States Telegraph Company in the work of constructing a transcontinental line, and more especially that the privilege should inhere in a corporation with which the United States Telegraph Company became lawfully united by the process of consolidation.

In opposition to the views last expressed, it is urged by the government that when the Act of July 2, 1864, was passed, Congress knew that a line of telegraph had already been constructed across the plains, by other telegraph companies, about on the proposed route of the main line of the Union Pacific Railroad; that by the last named Act it intended to aid in the construction of an independent and competing line of telegraph; and that this purpose will be defeated unless it is held that the privilege granted by the United States Telegraph Company to enter into an arrangement with the Kansas Pacific Railway Company was strictly a personal privilege accorded to the former company. It is to be observed, however, that the Act now under consideration says nothing about competing lines of telegraph, but is entitled "An Act for Increased Facilities of Telegraphic Communication Between the Atlantic

and Pacific States. . . .” Such additional facilities would be obtained by the construction of a new line on a new route, and Congress undoubtedly contemplated that such a line would be built, and such a line was in fact constructed. We fail to see, therefore, how the purpose which Congress saw fit to express in the title of the Act will be defeated by conceding that the privilege mentioned in the fourth section of the Act was not strictly personal, but was a grant to the United States Telegraph Company “and its associates.” It might happen, of course, that by a process of consolidation the two companies would fall under one management; but even in that event the two lines of telegraph, if erected, would afford increased facilities for communication. Moreover, if the idea of exciting competition by the construction of a second line of telegraph across the continent was at that time entertained by Congress (which we very much doubt) it was evidently well known to Congress that a practical identity of interest and control could be effectually secured by other means than by a consolidation of property and franchises, and it took no precautions to prevent such a merger. We must conclude, therefore, that the considerations last mentioned are entitled to little weight in determining whether the privilege in question became vested in the Western Union Telegraph Company. An attempt is also made, in behalf of the government, to deduce evidence, from certain reports made by the Kansas Pacific Railway Company to the United States, that the line of telegraph along that railway, from the Missouri river to Denver, was in fact built by the railway company at its own expense, in fulfillment of its charter obligations; but an obvious answer to this suggestion is that no statement made by the officers of the railway company can prejudice the rights of the telegraph company. For other reasons, however, the suggestion is without merit. We have no doubt, under the testimony, that the line of telegraph along the Kansas Pacific Railway was built substantially in accordance with the arrangement embodied in the contract of October 1, 1866. To enable the railway company to obtain its subsidy it was no doubt required to prove, to the satisfaction of the officers of the government, that a telegraph line, as well as a railroad, had been constructed. The United States was entitled to insist upon such proof because the obligation of the railway company to construct a telegraph would not be fulfilled merely by entering into an “arrangement” with some telegraph company to construct such a line. It was bound to see that the arrangement was carried out, and that a line was erected along its right of way, either by the telegraph company alone, or by itself and the telegraph company, under some satisfactory agreement as to dividing the expense, which telegraph line would be fairly adequate for governmental and commercial purposes; but it certainly was not necessary for the railway company to set forth in its reports to the government the precise terms of its arrangement with the telegraph company, or the precise sum which it had itself contributed

towards the construction of the line. For these reasons we cannot attach much importance to such reports,—certainly not enough to decide that the line was not built under an arrangement with the telegraph company. The result is that with respect to this feature of the case we feel constrained to concur in the view entertained by *Mr. Justice Miller*,—that the contract of October 1, 1866, was a valid agreement, and that it was within the purview of the Act of July 2, 1864.

This opinion has necessarily been extended to such length in the discussion of the foregoing questions that we have felt compelled to dispose of the remaining questions as briefly as possible, although we have considered them attentively, and with a due appreciation of their importance. The fourth section of the Act of August 7, 1888, under which this bill purports to have been filed, provides, in effect, “that in order to secure and preserve to the United States the full value and benefit of its liens upon all the telegraph lines . . . constructed by and lawfully belonging to said railroad and telegraph companies referred to in the first section of this Act [being those mentioned in the Pacific Railroad acts] and to have the same possessed, used and operated, in conformity with the provisions of this Act and of the several acts to which this Act is supplementary—it is . . . made the duty of the Attorney General . . . by proper proceedings, to prevent any unlawful interference with the rights and equities of the United States . . . to have legally ascertained and . . . adjudicated all alleged rights of all persons and corporations . . . claiming . . . any control or interest . . . in any telegraph lines or property, or exclusive rights of way upon the lands of said railroad companies, . . . and to have all contracts and provisions of contracts set aside, . . . which have been unlawfully and beyond their powers entered into by said railroad or telegraph companies. . . .” We must presume in this case, as in all others, that, when Congress authorizes the Attorney General to take any legal proceedings to enforce the rights of the United States, it is intended, unless the contrary idea is clearly expressed, that rights of a purely legal nature, for the enforcement of which there is an adequate legal remedy, shall be so enforced by a proceeding at law rather than by a suit in equity. We cannot assume, therefore, there being no clear expression of such a purpose, that Congress intended by the fourth section of the Act of August 7, 1888, to authorize matters of legal and equitable cognizance to be mingled indiscriminately in the same complaint, and that all the rights and duties mentioned in said Act, of whatsoever nature, should be enforced in a single suit, to be instituted by the Attorney General in the name of the United States. Even if Congress has power to so direct, we should not feel authorized to say that it has done so, without a positive declaration of such purpose, which we do not find in the statute now in question. Some of the duties imposed by the Act of August 7, 1888, which the government apparently

seeks to enforce in this suit, are evidently of such a nature that they may be adequately enforced at law. Among these may be mentioned the duty enjoined upon the Union Pacific Railway Company, by the first section of the Act, of operating "by itself alone, through its own corporate officers, its telegraph lines." We know of no reason why this precise duty may not, and should not, be enforced by mandamus, if it has in fact been violated. *United States v. Union Pac. R. Co.* 98 U. S. 569, 609, 25 L. ed. 148, 158; *Atty. Gen. v. Utica Ins. Co.* 2 Johns. Ch. 371. Acting in accordance with the views last stated, we have not considered it our duty in this case to inquire, and we do not determine, whether the railway company's present method of operating its line of telegraph is in violation of the first section of the Act of August 7, 1888. It is shown by the record that since the passage of that Act the parties to the contract of 1881 have by mutual consent rescinded the twelfth clause of the agreement, which provided for the employment of a joint superintendent of the telegraph line. Whether the existing method of operating the line should be altered in any other respect to keep within the requirements of the late statute in the respect last stated we leave to be determined in an appropriate proceeding brought for that purpose. In this connection we may also add that it is the opinion of this court that the duty enjoined by the second section of the Act of August 7, 1888, with reference to affording equal facilities to all connecting lines of telegraph, without discrimination against any, is a duty which should be enforced in the mode prescribed by the third section of the Act, rather than by a bill in equity. The second section imposed a duty upon the railway company which was in some respects new, and provided a special remedy for its enforcement. Under these circumstances, we think that the remedy thus provided should be regarded as exclusive. But, even if the latter view is erroneous, we still think it manifest that the record does not make out a case which would authorize us to enter any order or decree based on the "equal facilities" provision of the second section of the Act. The proof does not show, with any certainty, that since the passage of the Act any telegraph company has placed itself in a position to demand of the railway company the same facilities which it accords to the Western Union Telegraph Company, and that its demand has been refused. No telegraph company is complaining before us that, having accepted the provisions of title 65 of the Revised Statutes, and having extended its lines to a connection with the stations of the railway company, and having solicited the same facilities which the Western Union Telegraph Company now enjoys, it has been denied such privileges. Until such a case has been presented, both by complaint and by proof, we cannot presume that the railway company intends to disregard its duty, and it surely cannot be expected of us that we will attempt to give an additional sanction to the statute by merely repeating its mandate. In other respects, however, the

4 INTER 8.

case, as presented by the record, is one which entitles the complainant to a certain measure of equitable relief under the provisions of the Act on which the suit is based. The bill shows that the government has a lien upon the railroad and telegraph lines to which the litigation relates, and, as such lienholder, it is undoubtedly entitled to have its rights and equities in and to the telegraph property along the right of way of the Union Pacific Railway Company judicially ascertained, and to have the rights of other persons and corporations therein also ascertained and adjudicated. Incidental to that relief is the right to have all provisions of contracts set aside and annulled that are unlawful, and that in any manner impair the security of the United States, or cloud its title or prejudice its rights. It is the appropriate function of a court of equity to administer such relief, and the Act of August 7, 1888, directs the Attorney General to inaugurate such a proceeding. We are of the opinion, therefore, that it was the duty of the circuit court, under the evidence laid before it, to have treated the suit as a bill filed to obtain the relief which we have generally indicated in the last paragraph, and to have decreed accordingly. In point of fact it went much further than the Act of August 7, 1888, seems to us to have warranted in an equitable proceeding of this nature, and incorporated some provisions in its decree which we feel constrained to disapprove. We shall not stop, at this time, to enumerate all of the provisions of the decree of the circuit court that have thus met with our disapproval. It will suffice to say that the order canceling the contracts of July 1, 1881, and October 1, 1866, was the most important error. The government was in no position to ask that the contract of July 1, 1881, should be annulled *in toto*, merely because some of its provisions, though valid when made, had been rendered invalid by a subsequent statute. It was only entitled to have those provisions declared inoperative and no longer obligatory, so far as they were in conflict with the subsequent enactment. The case must accordingly be reversed, and the cause remanded, with directions to the circuit court to set aside its former decree, and, in lieu thereof, to make and enter a modified decree, consistent with this opinion, the provisions whereof we will now proceed to outline.

The decree to be entered by the circuit court pursuant to the mandate of this court should order, adjudge, and decree:

First. That the agreement named in the bill of complaint, entered into on the 1st day of October, 1866, by and between the Union Pacific Railway Company, Eastern Division, and the Western Union Telegraph Company, was lawfully entered into by the parties thereto, and constituted a valid and binding contract. Second. That said contract of October 1, 1866, continued in full force and effect until the 1st day of July, 1881, when, by agreement of the parties thereto, its provisions were superseded by the provisions of the contract of that date, entered into by and between the Union Pacific Railway Company and the Western Union Telegraph Com-

pany. Third. That the agreements entered into on the 1st day of September, 1869, and on the 14th day of December, 1871, by and between the Atlantic & Pacific Telegraph Company and the Union Pacific Railroad Company were entered into by the Union Pacific Railroad Company unlawfully and beyond its powers, and the said contract, and each of them, are hereby canceled, annulled, and held for naught. Fourth. That the equities arising out of the said contracts of September 1, 1869, and December 14, 1871, were adjusted and settled by all the parties interested therein in the making of the contract of July 1, 1881, by and between the Union Pacific Railway Company and the Western Union Telegraph Company. Fifth. That the contract of July 1, 1881, named in the bill of complaint, entered into by and between the Union Pacific Railway Company and the Western Union Telegraph Company, was lawfully entered into by the Union Pacific Railway Company and the Western Union Telegraph Company, and constituted, when made, a valid and binding contract by and between the parties thereto. Sixth. That the third and fourth paragraphs of the contract of July 1, 1881, in so far as they grant, or were intended to grant, exclusive rights or privileges of any character, are repugnant to the Act of Congress approved August 7, 1888, entitled "An Act Supplementary to the Act of July first, eighteen hundred and sixty-two, Entitled 'An Act to Aid in the Construction of a Railroad and Telegraph Line from the Missouri River to the Pacific Ocean, and to Secure to the Government the Use of the Same for Postal, Military and Other Purposes,' and also of the Act of July second, eighteen hundred and sixty-four, and other acts amendatory of said first named Act:" and said paragraphs of said contract are hereby adjudged and declared to be null and void, and are hereafter to have no force or effect, to the extent, and only to the extent, that they secure or grant to the Western Union Telegraph Company, or were intended to secure to it, any exclusive rights, privileges, or advantages whatsoever. Said third and fourth paragraphs are as follows, to wit:

Seventh. That there is a single line of poles between Council Bluffs and Ogden, on the right of way of the defendant railway company, which poles were erected in accordance with the provisions of the contract of July 1, 1881, at the joint and equal expense of the defendant railway company and the defendant telegraph company, and is the property of said companies jointly; that upon said poles, between Council Bluffs and Ogden, there are two distinct lines of telegraph, the wires of one of which said lines are owned solely by the said railway company, and the wires of the other of which are owned solely by the said telegraph company; that the line of telegraph poles on the Kansas Pacific Railway, from Kansas City to Denver, was originally erected as provided in the contract of October 1, 1866; that said line of poles between Kansas City and Denver, since the 1st day of July, 1881, has been reconstructed under and in accordance with the provisions of said last named contract, and said line of poles thus reconstructed bears two distinct lines of telegraph, one of which is the sole property of the defendant railway company, and the other of which is the sole property of the defendant telegraph company; that there are two distinct lines of telegraph on the line of poles between Denver and Cheyenne, one of which is the sole property of the defendant railway company, and the other of which is the sole property of the defendant telegraph company. Eighth. That all of the foregoing lines of telegraph of the defendants herein are, in accordance with the provisions of the contract of July 1, 1881, worked by batteries furnished by the defendant telegraph company, and operated by instruments the property of the defendant telegraph company. Ninth. It is further ordered, adjudged, and decreed that the defendants hereto are allowed the period of 60 days after the entry of this decree to make such arrangements, adjustments, and changes as are rendered necessary by the annulling of the aforesaid provisions of the contract of July 1, 1881, and to carry out the provisions of this decree.

UNITED STATES CIRCUIT COURT OF APPEALS, NINTH CIRCUIT.

OREGON SHORT LINE & UTAH NORTHERN R. CO., *Appl.*,

v.

NORTHERN PACIFIC R. CO.

(See S. C. 61 Fed. Rep. 158.)

1. A railroad company cannot appropriate the grievance of a traffic or locality under the Interstate Commerce Act, § 3, prohibiting preference by a carrier to persons, firms, or corporations, and to localities and traffic, and complain on account of it.
2. The refusal by a railroad company to transport freight on foreign cars originating east of a certain meridian, when its own cars are not in use but are free to be employed in the transportation desired, or where a transfer of freight will not be injurious to it, is not an unreasonable discrimination against another railroad company.
- 4 INTER S.

or a denial to it of reasonable and proper facilities under the Interstate Commerce Act, although it accepts in such cars freight originating west of such meridian.

3. The refusal of a railroad company to honor tickets or coupons for passage issued by another company over its line does not constitute a discrimination within the Interstate Commerce Act as, in the absence of arrangement between the companies, there is no obligation on the part of either to honor tickets issued by the other.
4. The provision of the Act incorporating the Northern Pacific Railroad Company that it shall

be its duty to permit any other railroad to form running connections with it on fair and equitable terms, does not require it to permit the use of

its road by the cars of other companies, or to honor tickets of such other companies.

Decided April 12, 1894.

A PPEAL by complainant from a decree of the Circuit Court of the United States for the District of Oregon, dismissing a bill filed to enjoin defendant from continuing to make alleged unlawful discrimination against complainant in receiving and forwarding freight tendered by complainant and in refusing to recognize through passenger tickets issued by it. *Affirmed.*

The facts are stated in the opinion.

Argued before McKenna, *Circuit Judge*, and Knowles and Hawley, *District Judges*.

Messrs. W. W. Cotton, John M. Thurston, and Zera Snow for appellant.

Messrs. Dolph, Bellinger, Mallory & Simon for appellee.

McKenna, *Circuit Judge*, delivered the opinion of the court:

As is said by appellant's counsel, "the controversy between the parties in this suit is mainly one of law, and not of fact;" and, succinctly stating the relations of the parties, also said: "The appellee owns and operates a line of railroad extending from St. Paul, Minnesota, to Portland, Oregon, passing through Tacoma and other points in the state of Washington, on Puget sound. The appellant owns and operates a line of railway connecting with the lines of the appellee at Portland, and extending from Portland to Granger, Wyoming, where a connection is made with the lines of the Union Pacific Railway, extending thence to various points on the Missouri river. The appellee and appellant are therefore competing lines in the transportation of traffic from Missouri river points to places upon the Pacific coast. The only rail connection which the lines of the appellant have from Portland to Puget sound is by means of the lines of the appellee." The connection, however, is not direct, but through the lines of the Northern Pacific Terminal Company. The latter, however, are leased to appellee. We shall consider the case as if the connection was direct.

The bill is very long. In substance, it charges appellee with discriminating against traffic, passengers and freight, starting east of a given meridian, and destined for Puget sound points *via* Portland, Or., and also discriminating against localities situate east of a given meridian. There is also a charge that facilities are given to the Southern Pacific Company which are denied to appellant. This charge is not sustained by the evidence, and may be dismissed from consideration. The discrimination against traffic and localities consists in receiving goods at Portland which start west from the meridian in cars other than those of appellee without requiring payment to the owners of the cars of the usual mileage, and without exacting prepayment of freight, while goods which start east of the meridian are denied these facilities; and in receiving through tickets issued by appellant to passengers starting west of the meridian, and refusing such tickets issued to passengers starting east of the merid-

ian; the condition and other circumstances of the freight and passengers being the same. The action, appellant contends, is contrary to the custom and practice of railroads which have the force of law, and infringes section 3 of the Interstate Commerce Act, so called. This section is as follows:

"Sec. 3. That it shall be unlawful for any common carrier subject to the provisions of this Act to make or give any undue or unreasonable preference or advantage to any particular person, company, firm, corporation, or locality, or any particular description of traffic, in any respect whatsoever, or to subject any particular person, company, firm, corporation or locality, or any particular description of traffic to any undue or unreasonable prejudice or disadvantage in any respect whatsoever. Every common carrier subject to the provisions of this Act shall, according to their respective powers, afford all reasonable, proper and equal facilities for the interchange of traffic between their respective lines, and for the receiving, forwarding, and delivering of passengers and property to and from their several lines and those connecting therewith and shall not discriminate in their rates and charges between such connecting lines. But this shall not be construed as requiring any such common carrier to give the use of its tracks or terminal facilities to another carrier engaged in like business."

The first part of this section prohibits preference to persons, firms, or corporations, and to localities and traffics, and prohibits the subjecting of either to prejudice or disadvantage. The evidence shows that there was no preference given any person, firm, or corporation in the sense of this section, and no traffic or locality is complaining, unless the complaint of appellant is such. But we do not think it is competent for a railroad company to appropriate the grievance of a traffic or locality under section 3, and complain on account of it.

In *Memphis & L. R. R. Co. v. Southern Exp. Co.* 117 U. S. 1, 29 L. ed. 791, certain railroad companies made contracts with certain express companies granting them facilities on their trains, refusing contracts and facilities to other express companies. The

Supreme Court sustained the railroad companies, reversing the judgment of the circuit court. The court said:

"The question is not, whether these railroad cars must furnish the general public with reasonable express facilities, but whether they must carry these particular express carriers for the purpose of enabling them to do an express business over the lines."

And again, on page 28, 117 U. S., and page 808, 29 L. ed., the court says:

"If the general public were complaining because the railroad companies refused to carry express matter themselves on their passenger trains, or allow it to be carried by others, different questions would be presented."

And the court further said:

"So long as the public are served to their reasonable satisfaction, it is a matter of no importance who serves them."

This language is applicable to the case at bar. Whether appellant shall unload its cars at Portland as an alternative to paying car mileage, however it may involve expense or inconvenience to appellant, is not necessarily the concern of the freight or its shippers or the locality of its shipment. When it becomes such, a complaint will no doubt be made. None now is made, nor does it appear that either the traffics or localities discriminated against are even competitors. In *Hozier v. Caledonian R. Co.* 1 Ry. & Canal Traffic Cas. 30, of the traffic act, it was said:

"It provides for giving undue preference to parties *pari passu* in the matter, but you must bring them into competition in order to give them an interest to complain."

In *Swindon, M. & A. R. Co. v. Great Western R. Co.* 4 Ry. & Canal Traffic Cas. 349, it is implied that to make undue preference, traffic must go between same places. And in 1 Railway & Canal Traffic Cases, page 32, the same rule is asserted as to passengers. To construe the section so as to authorize a railroad to complain for a traffic or locality would seem to confound the distinctions made by it, and make the second part of it superfluous. The regulation of the roads was undoubtedly in the interest of their customers, but it left them powers and privileges, between themselves, which might affect their customers; indeed, left powers and privileges in them as regards their customers, because all favor and all discrimination is not forbidden, even between them.

This view takes out of consideration the rights of the traffic originating and the rights of localities situate east of a given meridian, and confines the inquiry to the rights and obligations of the railroads between themselves under the second paragraph of the section.

As an aid to the interpretation of this paragraph, a number of cases which arose under the English act are cited by appellant. They are not of much assistance. The English act is different from ours. It is fuller and more precise. There is little or no ambiguity about it. At any rate, our act is different, and the difference has been construed as substantial. *Little Rock & M. R. Co. v. St. Louis, I. M. & S. R. Co.* 2 Inters.

4 INTER 8.

Com. Rep. 763, 41 Fed. Rep. 559, and *Kentucky & I. Bridge Co. v. Louisville & N. E. Co.* 2 Inters. Com. Rep. 351, 2 L. R. A. 289. See, also, the first decisions of the Interstate Commerce Commission. But in *Little Rock & M. R. Co. v. East Tennessee, V. & G. R. Co.* 2 Inters. Com. Rep. 454, the Commission holds that our Act was intended to effect similar results, but omitted the machinery to accomplish them. It would seem like better reasoning to assume that, if congress had intended the same results as the English act, having it and its history and construction before them, it would have adopted its language and machinery, and made the results certain.

We get little light, therefore, from the English act or decisions, and not much from the debates in Congress. There was little or no comment on section 3. Section 4 (the long and short haul provisions) appeared to have engaged almost exclusive attention. Senator Cullom, who had charge of the bill in the senate, said:

"The third section is broader and more general in its terms, and should perhaps have been made the second section, as it contains a general prohibition of every variety of unjust discrimination. The section covers all subjects. The first paragraph prohibits the giving of any undue or unreasonable preference to any particular person or locality, or to any particular description of traffic in any respect whatever. . . . The language adopted in this paragraph is substantially that of the English statute on the subject, which has been repeatedly construed by the English courts, so that its meaning has been practically established. The second part of the section is modeled in part upon the English and in part upon similar statutes in several of the states. Its purpose is to require railroads to furnish connecting roads all reasonable and proper facilities for the interchange of traffic that may be necessary for the convenience of the public, and to prevent one road, or a combination of roads, from 'freezing out' connecting lines by refusing to accept from it, or deliver traffic to it, upon any terms, as has been done." Senator Cullom's Speech Explaining the Bill, section 1, p. 3577, Cong. Rec. 49th Cong., April 15, 1886.

This is not very explicit. The first part of section 3, he says, is adopted from the English statute, and that its meaning has been practically established. So far, so good. But the second part is selected from the English and certain states' statutes, and, besides, very important language is omitted which is in the English statute. And, as *Justice Field* states:

"Whenever an intention has been manifested, in the creation of railway charters, that a connecting company shall have the power to run its cars over the lines of another, or to require one company to haul over its lines the cars of another, such intention has been expressed in unequivocal terms, such as is found in the constitutions or statutes of several of the states respecting railway companies, which is substantially in these terms: 'And they shall receive and

transport each other's passengers, tonnage, and cars, loaded or empty, without delay or discrimination."

Senator Cullom stated the evil which was to be remedied. Railroads had refused to accept or deliver traffic on any terms and thereby froze out connecting lines. This the Act was intended to correct and did correct. But confining it to this, appellant contends, makes no advance on the common law; and that, under the latter, the appellee was bound to carry freight in its own cars, and that, therefore, Congress intended to impose a duty beyond that. This is begging the question somewhat, and does not consider the distinction between rights and remedies; but whether the common law required a railroad company to carry freight delivered to it by another we need not consider. The fact was, as said by Senator Cullom, it was not done, and the Act was deemed necessary to compel it. Whether common law rights were enlarged thereby or only affirmed we need not decide. If we assume the former, as appellant has, we cannot also assume that the independence of the roads between themselves was entirely destroyed. Not all preference is prohibited,—only undue and unreasonable preference; and the facilities which are required to be granted have two limitations: They do not include tracks and terminal facilities, and they must be reasonable and proper. How must the latter be determined? Surely not only of themselves, but in the circumstances, and these must include the proper interests of the road from which the facilities are required. Any other construction would be too abstract, and we concur in the opinion of the learned justice who rendered the judgment of the circuit court "that the refusal to transport freight on foreign cars, where the freight originated east of the ninety-seventh meridian, when its own cars were not in use, but were free to be employed in the transportation desired, or was made where a transfer of freight would not have been injurious to it, can in no respect be deemed an unreasonable discrimination against complainant, or a denial to it of reasonable and proper facilities."

Of course, if appellant's construction of section 8 be correct, and it can compel appellee to receive one car, by the same right it may compel the receipt of many, and what more would be necessary to take the use of tracks? We think nothing. The attachment of the locomotive would only affect the degree of use. The same conclusion was reached after a careful consideration of all the cases by the circuit court of the eight circuit in *Little Rock & M. R. Co. v. St. Louis, I. M. & S. R. Co.* 4 Inters. Com. Rep. 542, 59 Fed. Rep. 408. A construction which permits the use of tracks we are forbidden to entertain.

4 INTER S.

Of the complain of appellant that appellee denies it facilities for passenger traffic in refusing to honor tickets or coupons for passage over appellee's lines north of Portland issued by it, the lower court said:

"It is sufficient to say there is no evidence to support it. The practice of railway companies operating connecting lines to honor tickets or coupons for passage over their respective lines issued by a connecting company, which is very general, is founded entirely upon arrangements between the connecting companies. In the absence of such arrangements, there is no obligation on the part of either company to honor tickets issued by the other. All the witnesses examined on this point concur in their statements in this respect."

We concur in this statement and the conclusion of the court.

Appellant further urges that the facilities which it asks of appellee are required to be given by the fifth section of the Act incorporating the Northern Pacific Railroad Company, which contains the following provision:

"It shall be the duty of the Northern Pacific Railroad Company to permit any other railroad which shall be authorized to be built by the United States or by the legislature of any territory or state in which the same may be situated to form running connections with it on fair and equitable terms."

In answering this contention we can do no better than to adopt the language of *Justice Field*:

"The running connection," he said, "which must be permitted by the defendant is not, as contended by complainant's counsel, a running over its line, but only in connection with it, a provision intended to secure the transportation and exchange of freight between connecting lines, and not the use of each other's roads by the cars of such company. . . . We are of opinion that a running connection of one road with another, within the meaning of the defendant's charter, only includes such arrangements as to the time of arrival and departure of trains, and as to stations, platforms, and other facilities, as will enable companies desiring to connect to do so without detriment or serious inconvenience."

The effect of a custom among railroads to grant the facilities contended for we have not considered, because the existence of such a custom is not established by the evidence. The finding of *Justice Field* on the facts seems to be concurred in by *Judge Deady*. His dissent is based entirely on a different interpretation of section 8 of the Interstate Commerce Act, and of section 5 of the Act incorporating the Northern Pacific Railroad Company. *Judgment is therefore affirmed.*

UNITED STATES CIRCUIT COURT, WESTERN DISTRICT OF MICHIGAN.

INTERSTATE COMMERCE COMMISSION

v.

DETROIT, GRAND HAVEN & MILWAUKEE R. CO.

1. That persons complaining before the Interstate Commerce Commission of the violation by a certain railroad company of the provisions of the Interstate Commerce Act had no real grievance, but were instigated to their prosecution by a rival of the company, will not cause the dismissal of a suit brought by the Commission to enforce an order which it has made in the cause.
2. A carrier's furnishing free cartage between its station and the warehouse of shippers and consignees at one point which is refused at a point nearer the place of shipment but which has been lawfully grouped with the former for a common charge from the place of shipment, is an undue discrimination against the latter, violative of the Interstate Commerce Act, and is not justified by

the facts that the business at the former point is much greater than at the latter, and at the former the stations of rival carriers are much nearer than its station to the business portion of the town, since the advantage of free cartage is more than enough to equalize conditions.

3. The custom of railroads to furnish switch tracks for the use of certain of its customers upon which freight is delivered free of charge, does not justify free delivery by carts to all parts of one city and a refusal of like service for other cities under substantially similar conditions; nor does a prohibition of the delivery by carts require a prohibition of the tracks.

(Severens, District Judge, *dissents*.)

(October 6, 1893.)

PETITION to enforce an order made by the Interstate Commerce Commission requiring defendant to desist from furnishing free cartage at one of the stations upon its line which was denied at other stations similarly situated. *Granted.*

Statement by Taft, C. J.:

This was a bill in equity exhibited by the Interstate Commerce Commission averring that the Detroit, Grand Haven & Milwaukee Railway Company, a common carrier corporation subject to the provisions of the Interstate Commerce law, had been duly impleaded in a controversy before the Interstate Commerce Commission upon the petition of Mary O. Stone and Thomas Carten, residing at the city of Ionia, Michigan, wherein it was made to appear to the satisfaction of the Commission that the said defendant had violated the provisions of the Interstate Commerce law as alleged; that the Commission had formulated an order and notice in relation to the matters charged in the petition based upon findings and determinations of the Commission with respect thereto, which order was still in force but which the defendant refused to obey. Wherefore the Commission prayed for an injunction, mandatory or otherwise, to restrain the defendant, its officers, servants and attorneys, from further continuing in their violations of and disobedience to the order of the Commission.

The facts found by the Commission were as follows:

1. The complainants are copartners doing business under the firm name of Stone & Carten and are engaged in the sale at retail of goods, wares and merchandise in the city of Ionia, county of Ionia and state of Michigan, purchasing said goods, wares and merchandise at Philadelphia, Pa., New York, N. Y., Boston, Mass., and points east of Detroit, Michigan.

4 INTER 8.

2. That the respondent railway company is a corporation existing under and pursuant to the laws of the state of Michigan, and is a common carrier of passengers and property for hire between the city of Detroit and the city of Grand Haven, both of said places and its entire line of railway being in the state of Michigan; but it does not own and control a line of steamboats plying across Lake Michigan, between Grand Haven and Milwaukee, Wisconsin, but there is a line of steamboats engaged in the transportation of persons and property across Lake Michigan, between Grand Haven and Milwaukee, from which the respondent received traffic consigned over its road from Milwaukee, and to which it delivers traffic from its road destined to Milwaukee; that all of said boats are under the direction and control of an independent corporation, organized under the laws of the state of Michigan, by the name of the Grand Haven & Milwaukee Transportation Company; that the management of the business of the last named company is under the management and control of the same officers as those which manage and control the road and business of the respondent.

3. The respondent, for its service, as a common carrier for continuous shipment, under a common arrangement, of property from Detroit to its stations on its line of transportation, established and published a schedule of rates and charges, a tariff of freights which makes on all freights, from Philadelphia, New York and Boston and all other points east of Detroit, consigned over the respondent's road, the same rates and charges for the complainants which

is made and charged for the same class of freights to the merchants doing business at the city of Grand Rapids, a copy of which schedule or tariff is hereto annexed and deemed a part hereof.

4. The shipments of freight from Philadelphia, New York and Boston and points east of Detroit, which are delivered to complainant's road at said city of Detroit and transported by it over its line of railway, pass through the city of Ionia before reaching the city of Grand Rapids; that it is a shorter distance from Detroit to Ionia than from Detroit to Grand Rapids, and over the same line, in the same direction, the shorter being included in the longer distance.

5. That the respondent provides, at its own expense, drays, carts and trucks at the city of Grand Rapids for the service of transporting merchandise and freights generally, as well as merchandise and freight consigned from Philadelphia, New York, Boston and points east of Detroit, between its station at Grand Rapids and the places of business of merchants, traders and other patrons of its road at that place, which service it performs without additional charge to the owner or shipper of property on account thereof; that this service is not furnished to complainants or other merchants, traders and patrons of its road at the city of Ionia; that this service at Grand Rapids has been openly and notoriously rendered for a long period of time, to wit, for twenty-five years and upwards; that its station at the said city of Grand Rapids is within the corporate limits thereof, and is on an average one and a quarter miles from the business sections of said city where the traffic of the places tributary to respondent's road originates and terminates, while respondent's station for receiving and discharging freight and property at the city of Ionia is not to exceed an eighth of a mile from the business center of said city; that at the city of Grand Rapids there are two other railroads, the Michigan Central Railroad and the Grand Rapids, Lansing & Detroit Railroad, both of which are immediately and directly in competition with respondent's road for the business of Grand Rapids; that the stations of both of said roads for receiving and discharging freight and property at Grand Rapids are near the business center of said city, requiring only short haul to and from their stations, on an average about one quarter of a mile; that the respondent did the carting of freight to and from its station at Grand Rapids substantially in the same manner as at present, long prior to the time when either said Michigan Central or Grand Rapids, Lansing & Detroit Railroads were constructed to that place.

6. That the actual cost of carting or draying freight from the respondent's warehouse in the city of Ionia to the several places in said city of Ionia to and from which traffic has to be hauled is two cents per hundred weight; that the cost of carting or draying freight transported over respondent's line to and from the places of business of the merchants, traders and other patrons of its road at Grand Rapids, is two cents per hundred weight.

7. That there is but slight competition en-

countered by the complainants and other persons, firms and corporations engaged in business at the city of Ionia, interested in shipping over respondent's road, with similar business at the city of Grand Rapids.

9. The complainants have not brought any suit for the recovery of money or damages for which the respondent is alleged to be liable under the provisions of the Act to Regulate Commerce, but have elected to adopt this procedure as the sole means of obtaining relief.

10. The city of Grand Rapids has a population of about 70,000. The city of Ionia has a population of about 6000. The freight traffic to and from Grand Rapids by all roads in 1887 amounted to 983,685 tons. The freight traffic to and from Ionia by all roads for the same time amounted to about 55,000 tons.

11. Cartage by railway companies in a similar manner to that at Grand Rapids is conducted by other railway companies at exceptional stations in the state of Michigan, and more or less extensively practiced by companies in other states at exceptional stations.

On this statement of facts, a majority of the Commission, the chairman, *Judge Cooley*, and *Commissioners Morrison* and *Schoonmaker* held that the cartage at Grand Rapids was a violation of the long and short haul clause of the 4th section of the Act to Regulate Commerce, because its result was that the merchants at Grand Rapids obtained transportation of freight from Boston, New York and Philadelphia at two cents a hundred less than the merchants of Ionia, the free cartage at Grand Rapids being in effect a payment in money's worth to the merchants at Grand Rapids of two cents a hundred. *Commissioners Morrison* and *Schoonmaker* also held that the free cartage was unlawful on the further ground that it was in effect a device for receiving less than the established tariff rate from and to that point, that it was a rebate in violation of the 2nd section of the Act.

The answer of the defendant to the bill herein admitted the averment of the findings of fact embodied in the opinion of the Interstate Commerce Commission and averred that it had been the practice of railway companies engaged in interstate commerce to do free cartage as a means of obtaining traffic at exceptional stations on the lines of the railroads where the business was of sufficient magnitude to warrant the carrier in incurring the expense, and that such expense was deemed to be legitimate as a means of securing traffic for the railroad and of affording increased facilities and dispatch for doing its business; that on every railroad in Michigan and in the United States there were tracks constructed by the railway company, at its own expense, at exceptional stations on the line of road, leading from the main track of the road to private business establishments, which were used solely for delivering and receiving freight in the business between such private business establishments and the railway and without any charge being made by the railway company therefor; though there were private business establishments at the same station of the railroad not furnished with these advantages in connection with such traffic; that such practice did not infringe any

provision of the Interstate Commerce law and yet it involved quite as clear an element of discrimination as the cartage system at Grand Rapids; that the practice of freight cartage was originally adopted because it was less expensive than would be a change of its line so as to bring it into nearer proximity to the business center of the city or the construction and operation of spur tracks from the main line of road into the business center where the main line tracks of its competitors, the Michigan Central and the Detroit, Lansing & Northern Railroad companies, were held in said city; that the free cartage had the additional advantage of enabling the carrier to promptly clear the freight buildings of traffic and prevent its burdensome and expensive accumulation and that it secured a method and order in the delivery of its traffic from its buildings; and that it also saved the expense of sending notice to the consignees of the arrival of freight; that the free cartage at Grand Rapids was an absolute condition of the respondent's procuring for its road any considerable part of the freight traffic of the city; that the two cents a hundred pounds paid for cartage at the city of Grand Rapids by respondent, was not paid alone for the cartage but included the services of the cartage agents, acting in behalf of respondent, in soliciting freight traffic for its road and collecting bills for freight charges; that the value of these services aside from the mere matter of carting the freight, was not less than one third the sum which respondent paid.

Wherefore the defendant submitted that in view of all these considerations, the free cartage was not an undue or unreasonable preference or advantage to said city of Grand Rapids as against the city of Ionia, and was not in conflict with the long and short haul clause of the law.

Mr. Ashley Pond with *Messrs. L. G. Palmer, Dist. Atty., and J. B. McMahon* for complainant.

Mr. Otto Kirchner with *Mr. E. W. Meddaugh* for defendant.

Taft, C. J., delivered the following opinion: The first objection made by defendant to granting the relief asked is that the complainants before the Commission, Stone and Carter, had no real grievance but were instigated to their prosecution by a competitor of the defendant, the Michigan Central Railway, which is paying the expenses of the litigation. This objection is not founded on any finding of the Commission but on an admission of counsel for the complainant below, before the Commission, and is referred to in the dissenting opinion of *Mr. Commissioner Bragg*. Were this a mere private action by private litigants the objection, if founded on anything in the record (as this does not seem to be) might have weight, but under the provisions of the Interstate Commerce law we are not permitted to entertain it. The Act by section 13 provides for the lodging by any person of complaints with the Commission, of a common carrier's violations of the law, and expressly enjoins upon the Commission "that no complaint shall at any time be dismissed, because of the absence of direct damage to the complainant."

4 INTER S.

Moreover the same section provides that, "said Commission . . . may institute any inquiry on its own motion in the same manner and to the same effect as though complaint had been made." By section 15 of the Act, the Commission is required, in any case, where investigation has been made by it, if the law has been violated, to notify the common carrier to cease from further violation, and by section 16, in case of the refusal of the common carrier to obey, it becomes the duty of the Commission to apply by petition to a circuit court in equity to enforce its order and restrain the further violation of law by the carrier. It is obvious from these provisions that when the case reaches the circuit court on petition of the Commission, it is the complaint of the Commission which gives the court jurisdiction and that the *bona fides* of the complaint cannot be attacked by impeaching the good faith of those who, in the first instance, induced the Commission to take action.

Although the question was made in the original answer before the Commission, it is not seriously disputed here that the defendant is a common carrier subject to the provisions of the Interstate Commerce law.

The question at issue is whether the practice of free cartage at Grand Rapids is, with reference to the shippers at Ionia, a violation of the following sections of the Interstate Commerce law:

"Sec. 2. That if any common carrier subject to the provisions of this Act shall, directly or indirectly, by any special rate, rebate drawback, or other device, charge, demand, collect or receive from any person or persons a greater or less compensation for any service rendered, or to be rendered, in the transportation of passengers or property, subject to the provisions of this Act, than it charges, demands, collects or receives from any other person or persons for doing for him or them a like and contemporaneous service in the transportation of a like kind of traffic under substantially similar circumstances and conditions, such common carrier shall be deemed guilty of unjust discrimination, which is hereby prohibited and declared to be unlawful."

"Sec. 3. That it shall be unlawful for any common carrier subject to the provisions of this Act to make or give any undue or unreasonable preference or advantage to any particular person, company, firm, corporation or locality, or any particular description of traffic, in any respect whatsoever, or to subject any particular person, company, firm, corporation, or any particular description of traffic, to any undue or unreasonable prejudice or disadvantage in any respect whatsoever."

"Sec. 4. That it shall be unlawful for any common carrier subject to the provisions of this Act to charge or receive any greater compensation in the aggregate for the transportation of passengers or a like kind of property, under substantially similar circumstances and conditions, for a shorter than for a longer distance over the same line, in the same direction, the shorter being included within the longer distance: but this shall not be construed as authorizing any common carrier within the terms of this Act to charge and receive as great compensation for a shorter as for a longer distance."

Provided, however, that, upon application to the Commission appointed under the provisions of this Act, such common carrier may, in special cases, after investigation by the Commission, be authorized to charge less for longer than for shorter distances for the transportation of passengers or property: that the Commission may from time to time prescribe the extent to which designated common carrier may be relieved from the operation of this section of this Act."

It is conceded that the contract of carriage of a railway common carrier as usually understood is the transportation of the goods from the warehouse of the railway at the point of shipment to the railway warehouse at the point of destination. Generally the cartage from the railway warehouse to the storehouse of the consignee is paid by him. If the railway company pays it, the expense of transporting the goods to the place where he can use them is lessened by the cost of cartage. This is generally exactly equivalent to the railway company's reducing the freight by as much as the cartage would cost the consignee. Now it is admitted that this latter would be a violation of the long and short haul clause if the reduction were made at Grand Rapids and not at Ionia. Why should not its exact equivalent, the furnishing of free cartage be also a violation? It is said that it is not, because the transportation to Ionia and that to Grand Rapids are not under substantially similar circumstances and conditions. In accordance with a practice which has been approved by the Interstate Commerce Commission (*Imperial Coal Co. v. Pittsburg & L. E. R. Co.*, 2 Inters. Com. Rep. 436, 2 I. C. C. Rep. 618) Ionia and Grand Rapids are grouped together by the defendant company as stations to which the freight rates from the far east, Boston, New York and Philadelphia, may properly be made the same. This is a conclusive admission by the defendant that so far as a transportation from the east to the warehouses of the company at the two places is concerned, it is under substantially similar circumstances and conditions. The question remains whether the conditions existing with reference to the delivery of goods from the warehouses to the storehouses of the consignees, are such as to warrant a full charge for the same at Ionia, and no charge at all at Grand Rapids. If not, then the free cartage at Grand Rapids is, in fact, a reduction in the cost of transportation to Grand Rapids and illegal. We do not see how this result can be escaped. The reasoning is said to be mathematical, but that is a term not ordinarily used to describe defective reasoning. Any benefit in relation to the shipment of goods, having a definite money value conferred gratis by the shipper upon one shipper which is not conferred upon another when the service to each is admittedly under substantially similar circumstances and conditions, is an undue reduction in the price of carriage to the former and is illegal. If this were not true, then the provision against undue discrimination, of which the long and short haul inhibition is only one instance, would be a dead letter.

It may be admitted that the terminal facilities may be varied at different stations without causing undue discrimination, provided such a

variation is not such a departure from the usual facilities as to make it an obvious reduction in the cost of transportation to the shipper. It is very clear that free cartage is exceptional and that it is a departure from the usual terminal facilities furnished either at large or small cities, and towns. Of course it would not be a discrimination that could be complained of, that one company puts its station at one town nearer the business center than another, and if free cartage could be said to properly make up for the greater distance of defendant's station from the business center of Grand Rapids and in this respect to put Grand Rapids merchants on the same footing as Ionia merchants with their proximity to the station, then it would seem to be unobjectionable because justified by the dissimilar circumstances. But can this be said? We think not. If at Grand Rapids the defendant's station were moved into the business center, the shippers would still have to pay for the cartage. It may be that it would be for a less price but still they have to pay. The equalizing of the conditions between the two places in this respect would be complete by a charge for cartage by the railway company at the lower rate which would be charged for cartage were the station in the city. Free cartage from defendant's station at Grand Rapids confers on the shippers a benefit of a definite money value over and above that usually included in a transportation tariff, equal to the cost of cartage from a station to the center of the city.

What has been said with reference to difference between the distance of the station at Grand Rapids from the business center and that of the station at Ionia, has equal application to the contention of the defendant that the free cartage is justified by the fact that the competitors of the defendant have their stations at Grand Rapids in the business center, and that this places defendant at a disadvantage, which creates a dissimilar condition. Even if competition under such circumstances can produce dissimilarity of conditions, the extent of the discrimination founded thereon must be commensurate with and limited to the dissimilarity. It will fully equalize the conditions if the defendant furnishes cartage for a mile and a quarter at a price equal to that at which cartage for a quarter of a mile could be furnished without loss. To do more is to bid for competition by reducing the cost of transportation and this cannot be done except by proportionately reducing the rates at Ionia also.

But it is said that Grand Rapids is a much larger place than Ionia and therefore a carrier may confer favors on a shipper at the former place. In so far as the greater amount of business enables the railway company to do carting at a cheaper rate at Grand Rapids than at Ionia, by so much may the carrier reduce the cartage cost to the shipper at the former place, because this is a legitimate and actual dissimilarity in conditions between the two places, but cartage at Grand Rapids must cost something and free cartage, therefore, confers on the shipper a benefit which dissimilarity of conditions does not justify.

The chief argument for the defendant is based on the custom among railroads to furnish those of their customers whose store-

houses are convenient to the railway track with switch tracks, so that upon these tracks consignments in carloads are delivered at the door of the consignee. If free cartage is to be prohibited, it is said that the same principle must prevent the use of switch tracks for such a purpose, because this is a benefit to certain customers of a similar character not enjoyed by others. We do not think the cases are parallel. The providing of a switch track depends on two things: First, the proximity of the consignee's storehouse, and second, business of a character to require or permit consignments in carload lots. The first of these conditions, and perhaps the second, entitles the customer to a lawful discrimination in his favor. The favorable location of his storehouse with respect to the track is an advantage which he may rightly improve, and it may be that the wholesale character of his business is another element which may justify a discrimination in his favor over smaller shippers. *Interstate Commerce Com. v. Baltimore & O. R. Co.* 4 Inters. Com. Rep. 92, 145 U. S. 263, 36 L. ed. 699. If a case were presented where a merchant at Ionia with his storehouse convenient to the track of the defendant, had been refused a switch track and delivery thereon of merchandise in carload lots, when such a benefit was conferred on merchants at Grand Rapids not differently situated, a question might then arise similar to that at the bar, but it is not presented by a discrimination between merchants with storehouses far from the railroad track or who receive consignments of small bulk, and those who are near the track and receive carload lots. It would be a legitimate argument against a particular construction of the Interstate Commerce Law, if its logical result were the prohibition of a practice so general as that of private switch tracks, and which has always been considered lawful. But, as we have seen, the prohibition of free cartage does not involve any such result.

In order that a railway may reach many customers, it sometimes builds a belt railroad. This is a mere extension of its track and if the business to be obtained thereby will justify, there is no more objection to it as undue discrimination than there would be to the building of a branch road or the delivery of goods from several warehouses. It is part of the railroad business and the means of delivery is by railroad. Cartage is not usual railroad business, but is something not usually undertaken by them. It is as foreign to ordinary freight business as it would be for the company to do the packing for shippers free of cost.

For the reasons given, the prayer of the petition must be granted and a decree entered accordingly.

Severens, D. J., dissenting:

The finding of facts by the Commission is adopted for the purpose of this opinion, together with some further facts not inconsistent therewith, proven by the testimony or of which judicial notice is taken.

It is a legitimate rule in the construction of language employed in statutes that attention should be given to results which will follow from a proposed interpretation, and if those

results are contrary to the general purpose and object of the Act and are plainly seen to be such as were not intended, it should be rejected, unless the terms employed are too rigid to bear some other interpretation in harmony with the general policy of the law. The object sought to be attained is the guiding light always, and in the construction of this statute, couched as it is in broad and general language, it should be kept constantly in sight. For reasons presently to be stated, it appears to me that the conclusions of the Commission and the order founded thereon are productive of results quite different from those intended.

The general purpose of the Interstate Commerce Act was to prevent the practice of extortion by common carriers in the transportation of freight and passengers between the states by the imposition of unjust and unreasonable rates.

This is well known as matter of history and the courts take judicial notice of it. The law was passed for the protection of the public and not for the benefit or to redress any grievance of common carriers. They were known to be able to take care of themselves. And the closing paragraph of the first section sounds the key-note to the whole Act when it says that "every unjust and unreasonable charge for such service is prohibited and declared to be unlawful."

And this suggests a question somewhat preliminary in its nature, concerning the purpose of the proceeding and the province and duty of the court in dealing with it, which appears to me to deserve consideration.

The Act provides by the 18th section that any person, corporation or association, or any body politic may make complaint to the Commission for any violation by a common carrier of its provisions. Notice is thereupon required to be given by the Commission to the carrier of the charges preferred and it is called upon to satisfy the complaint or give its reason for refusal. If the carrier makes reparation for the injury complained of it is relieved from all liability to the complainant for the particular violation complained of. If this is not done, or if there shall be reasonable ground for investigating the subject of complaint, it is the duty of the Commission to investigate it. The Commission may also institute an inquiry upon its own motion in the same manner and to the same effect as though complaint had been made. In the latter case, it is clearly implied, as well from the language of the Act as from the nature of the proceeding, that any order it may make as the result of its inquiry must be upon notice of the particular violation which is charged against the carrier. However the proceeding may be commenced, the Commission is required by the 14th section, if it makes investigation, to make report of the facts found by it and its conclusions thereon and its recommendation in respect to the reparation which should be made to any injured party if there be such.

By the 15th section, if the Commission finds the charges to have been sustained, it is required to give a copy of its report to the carrier, together with a notice that it desist from the violation charged and make the reparation it has recommended to be made to any injured

party. If the carrier complies with this notice it is thereupon relieved from any further liability or penalty for such particular violation of law.

Then by the 16th section provision is made for an appeal to the courts in case of noncompliance with the notice of its duty enjoined in respect of the matters charged against the carrier by the Commission. If that refusal is in respect to a matter not triable by jury, the Commission or any party interested in the order or requirement it has made may apply to the circuit court in equity upon petition for such order or process, mandatory or otherwise, as shall be necessary and appropriate to compel obedience to the order of the Commission. And if, upon due hearing, the court shall find that the carrier has been guilty of the matter charged and the order or requirement of the Commission was such as the law required in such case, it will enforce obedience accordingly.

It is to be observed that the whole scope of the duty thus imposed upon the court is the trial of the questions of fact and law involved in the inquiry as to whether the respondent was by the particular order of the Commission required to execute a duty enjoined upon common carriers by the statute in the circumstances as they are found by the court to have existed; and if that inquiry results in such a finding, then also in awarding the proper process for compulsion. The court is not authorized to make any general order or decree upon the matters at large as they shall appear before it, but is given power simply to award its process if it judicially approves the order of the Commission. If it does not find it to have been warranted by law, its power and duty are at an end.

In this case the record indicates that the complaint was made by parties residing at Ionia. After setting forth the facts upon which it was based, it summarizes the grounds thereof by alleging that the respondent was by its practice violating the 2d, 3d and 4th sections of the Act and prayed that the respondent should be ordered to discontinue free cartage of freight for the merchants of Grand Rapids, or to render like service to the merchants of Ionia, or for other appropriate relief. The Commission after finding the facts and giving its reasons for its conclusion, held that it followed therefrom that the defendant was guilty of violating the long and short haul clause of the 4th section and that consignees at Ionia were overcharged to the extent indicated. The complaint was sustained on that ground and the Commission declared its purpose to order accordingly, without passing on the other points.

The inhibition of the long and short haul clause is against the charging "any greater compensation in the aggregate for the transportation of passengers or the like kind of property under substantially similar circumstances and conditions for a shorter than for a longer distance," etc.

The offense is made to consist in charging the greater compensation for the short distance and this is what the Commission concluded the respondent had done. It would seem that the due order for the correction of such offending

would be to require the carrier to desist from charging the merchants of Ionia the greater compensation and to fix a rate to correspond with its Grand Rapids rate, or accord some equivalent advantage to them, such as free cartage. Such correction would result in advancing the interests of the public at Ionia and in leaving the public at Grand Rapids in the enjoyment of the facilities which had been afforded them by a practice which the Commission rightly declares was perfectly lawful in itself.

The effect of such an order might be somewhat disadvantageous to the competing railroad there, which is also one of its competitors at Grand Rapids, but it would furnish no lawful ground of complaint to such competitor.

Instead of doing this the Commission made an order which raises the compensation which the public of Grand Rapids must pay for the service they have enjoyed, and the benefit of their loss does not come to any other portion of the general public but falls into the hands of the competing railroads, by crowding their rival out. It seems to me the Commission could not have sufficiently considered the results of their order. If they did, I am at a loss to understand how they could reconcile it with the spirit and policy of the law.

If, as is claimed (and I think it must be conceded, properly) we cannot look back of the proceedings of the Commission to inquire into the motive of the parties who set them in motion, we are yet bound to recognize the obvious consequences and give their consideration due weight in determining whether as matter of law the order we are asked to enforce was such as was warranted by the assumed facts. I cannot but think that the express language of the long and short haul clause, the well known general purpose of the Act, and the argument drawn from results incongruous with that purpose, all concur to repel the approval of the order of the Commission upon the ground assumed by it in its opinion. However, if the facts as they are here found to exist are such as to have warranted the order, probably the conclusions of the Commission as to matters of law are not material.

But I am also of the opinion that there was nothing in the facts which justified the conclusion that any provision of the statute had been violated.

Having in the closing paragraph of the first section indicated the general purpose, the Act proceeds in sections 2, 3, 4, and 5 to lay down certain rules by which that object is to be attained.

By the 2nd section it prohibits all kinds of discrimination in the imposition of charges upon different persons for the like service rendered under similar conditions.

By the 3rd it prohibits all undue preference by the carrier to any person or locality or kind of traffic, or the subjecting of any person or locality to any undue or unreasonable disadvantage, and then proceeds to require the carrier to afford reasonable and equal facilities to connecting lines for the interchange of traffic, without discrimination of rates between such connecting lines.

The 4th section prohibits the charging a greater rate for transportation, under similar

conditions, for a shorter than for a longer distance over the same line in the same direction, the shorter being included within the longer distance.

The 5th prohibits the pooling of freights between competing carriers.

Subsequent sections contain subordinate regulations designed to facilitate the operation of the provisions of the sections above enumerated, especially the 2nd, 3rd and 4th.

What is there in these provisions which justly interpreted renders the respondents' course of business, otherwise lawful, obnoxious to the prohibitory order of the Commission? Surely there is nothing in it which contravenes their general purpose. But it is attempted by argument to show that this course of business is in conflict with some of the provisions which are designed to accomplish that purpose. The argument appears to me to rest upon substantial grounds which have been swept away by the rulings of the Commission itself upon constructions of the law which have been acquiesced in as just and reasonable. When it was held that it was consistent with the spirit of the law for the common carrier to group stations which were seventy-five or one hundred miles apart and charge a common rate to each, the strict construction of the Act was abandoned for what was thought to be a more rational one. And when it was further conceded that, for reasons founded on public necessity or convenience, the carrier might carry freight beyond its terminal station and deliver it to its patrons along spur tracks and belt lines another broad construction was adopted in the genuine spirit of the law. The differing conditions and circumstances in large cities and small villages are rightly held to justify it. The facts in the present case illustrate this. The average distance from the station at Ionia to the merchants there is short, the place being small. The distance at Grand Rapids is five times as great and the business ten times as large. These differing circumstances and conditions are of a local character and do not pertain to the transportation by the carrier. If they are not in terms those mentioned in the statute, they are at least relied upon in construction as elements to be taken into account in determining what is a reasonable discrimination. With these concessions in view it is difficult to be very seriously impressed by the suggestion that one object of the law was to prevent the blighting effect upon smaller towns by the discrimination which had been given to larger ones, if by discrimination is meant the giving the facilities above mentioned. If that was an abuse the law has passed it by. But it was not an abuse. It is absurd to say that a common carrier is bound to supply to every little hamlet the same advantages for the transmission and reception of freight that it does to large cities. The similar circumstances and conditions to which the statute refers are those which are found in the different localities to be served as well as those which pertain to the transportation. Whether the dissimilarity arises from one cause or the other, if it affects the service it is within the language and the reason of the statute.

It is found by the Commission that similar cartage is practiced by other common carriers

at exceptional stations in Michigan and is more or less extensively practiced by companies in other states at exceptional stations. By exceptional, it is presumed to be understood that the conditions are similar to those at Grand Rapids, or otherwise the fact is irrelevant. Thus it happens that at one place where the public necessity or convenience requires it, it is met by the projection of branches and belt lines beyond the terminal station of transportation at that locality and from them delivering freight to their customers, and at another by rendering substantially the same service by cartage, at another by lighterage, a "business in which railroads are not usually employed." The only difference is in the means employed by the carrier to accomplish the same end. But of what real significance is that? It is the service, the actual benefit given, which makes such discrimination as there is, and not the particular instrumentality by which it is effected. It is transportation and that by a common carrier in the one case as much as the other. So far as the public are concerned the particular way in which the thing is done is matter of indifference, and no possible reason is perceived why that may not be left to be determined by the economy of the carrier. To say that it must be done on rails and by steam, instead of on wagons and by horse power, is purely arbitrary. The law is leveled at the carrier as such, and only at the railroad company in its character of a carrier. Conceding it to be permissible to build belt lines and spur tracks to reach many customers and thereby obtain more business, it is yet said that this is so because it is a part of railroad business and the means of delivery is by railroad: That cartage is not usual railroad business; that it is as foreign to ordinary freight business as it would be to do the packing for shippers free of cost. This does not appear to me to state the situation correctly. Packing for the shippers is not only never done, but it is not transportation, or delivery or reception of goods. The cartage of goods, though not usual, is sometimes resorted to as a substitute for delivery on rails, and is generally resorted to when it is the most convenient method in the circumstances. And the suggestion also appears to me to be at fault in assuming that the statute makes any distinction between carrying wholly by rail and partly by rail and partly by other means with any purpose to make the latter when equivalent to the former, unlawful. I cannot think that any language in the Act, or any postulate of reason, can be invoked upon which to say to the common carrier that the transportation which it may fairly do by the usual methods it employs, it shall not do by any method not usually adopted, even though it is a perfectly lawful method for a common carrier, and is more economical for it in the special circumstances and equally convenient to the public. The rate schedules of the carrier, ordinarily and probably almost universally, and the bills of lading issued thereon in terms contemplate the station of the carrier as the locality to which the freight is consigned as the terminus of transportation and the place of delivery. If we are to regard a service beyond that at one locality as *per se* a discrimination against a locality which does

not receive it, it must be upon some principle, and if there be such a principle, it must be equally efficacious to defeat the discrimination, however produced. Calculation is made to show that it costs two cents per hundred to render the delivery service at Grand Rapids. How much it costs carriers to deliver freight by side-tracks does not appear, but it must cost something, even if the track is laid for them, and of that the customer gets the benefit. It can make no difference in the principle how many get that benefit. Whether one or all, it is the same discrimination as to the public at Ionia.

It would be allowable, it is said, for the respondent to extend branches through the city, and accommodate the public by delivery to them on those lines. If the situation were so fortunate that all or the great majority could be thus accommodated, it would not make the practice more objectionable.

It is charged that the schedule rates are violated. What do those rates mean? In strictness, as already pointed out, they mean transportation from and to the stations named. In fact they mean that, together with the terminal facilities which are afforded by the carrier. The contract of transportation is entered into with those in view. These incidental facilities furnished at the locality of the station, in one form or another, are enjoyed by the consignees of a very large proportion of the freight traffic of the country. There is no violation of the schedule of rates in this practice, for the schedule is not in the general business of the public construed in so strict a way as the suggestion implies.

It is said that the defraying the expense of cartage delivery is generally exactly equivalent to the railway company's reducing the freight by as much as the cartage would cost the consignee, and that this latter would be a violation of the long and short haul clause if the reduction were made at Grand Rapids and not at Ionia. This argument proves too much and cannot be sound. It would overturn much wholesome doctrine which is already well settled. By the same reasoning any advantage of any value given by the terminal facilities of the carrier to customers at one place is exactly equivalent to a reduction to the same extent as that value, from the freight charge to that place and is an unlawful discrimination against others in that group. The fault in the argument is, I think, in assuming the false premise that a carrier may not do more at one place than he does at another for the same price—a proposition that is refuted in every-day transactions in the cartage of freight. In this case it is shown that freight is carried by Ionia 34 miles to Grand Rapids and nothing is charged for the cartage for that distance. It costs the carrier something to do this. It would cost the Grand Rapids merchant some money to bring the goods from the place where the Ionia merchant takes his. Is it permissible to say that by the amount of that cost, either to the carrier or the Grand Rapids merchant, the rate common to both places is lessened to the Grand Rapids merchant and the Ionia merchant is discriminated against?

It is also said that because the respondent

has grouped Grand Rapids and Ionia together, it conclusively admits that, so far as transportation from the east to the warehouse of the company at the two places is concerned, it is under substantially similar circumstances and conditions. I do not understand the admission to be as stated. The warehouse at Grand Rapids is not in fact the terminus of transportation which the respondent had in mind when it made the grouping; nor does the fact that places are grouped make it necessary to assume that they shall all have the same accommodations. It might as well be said that, having regard to the long and short haul clause, such grouping is a conclusive admission that the distance from the east to Grand Rapids is not greater than that to Ionia, whereas nobody supposes that to be admitted. So far as there is any admission, it is only that the distances are nearly the same, practically the same in the large view of the subject. It seems to me that we are not to allow our vision to be suddenly and capriciously narrowed, but should continue to see the subject on the same wide field in all its relations.

Tied to this erroneous assumption is another proposition, which standing by itself may be quite true, namely, that any benefit in relation to the shipment of goods, having a definite money value, conferred gratis by the carrier upon one shipper which is not conferred upon another where the service is admittedly under similar conditions, is an undue reduction in the price of carriage to the former, and therefore illegal. But this proposition and the conclusion, as applied to such facts as we have in the present case, depend upon the assumption that there is any money value conferred gratis. If the incidents of delivery at the terminus, whether by the usage there it be by one means or another, are included in the contract and price for carriage, the cost of those incidents cannot be scaled off, and carried back upon the whole price in order to reduce the price of the mere carriage between station houses. Nor do the similar conditions exist if one place is out of all proportion with another, and the station at the small place is located close to the local business, and at the large one it is a long distance off. The exact dissimilarity is not overcome until this disadvantage at the larger place is measurably reduced. It is impossible to make the adjustment nicely. If it be said that free cartage, as it is erroneously called, more than makes up for the inequality of conditions, and that to the extent of the excess it is a gratuity, one answer is that the excess thus afforded is not greater than the deficit or disadvantage which would exist without it. It is the mere oscillation of the pendulum swinging within lawful limits.

Pertinent to this is the suggestion that it would, of course, not be a discrimination that could be complained of that the company puts its station at one town nearer the business center than at another, and if free cartage could be said to properly make up for the longer distance of respondent's station from the business center of Grand Rapids, and in this respect to put the Grand Rapids merchants on the same footing as Ionia merchants with their proximity to the station, then it would

seem to be unobjectionable because justified by the dissimilar circumstances. But, it is asked, can this be said? And the argument in support of a negative answer is that if the defendant's station at Grand Rapids were moved into the business center, the shippers would still have to pay for the cartage. It may be that it would be a less price, but still they would have to pay. The equalizing of the conditions between the two places in this respect would be complete by a charge for cartage by the railway company at the lower rate which would be charged for cartage were the station in the city. The proposition admits that the practice would be unobjectionable, because justified by the dissimilar circumstances, if only the disadvantage were overcome, but the gravamen of the mischief consists, it is urged, in the remedy being overdone. But as the overdoing is not greater than the mischief overcome, and the result is not injurious to the public but beneficial rather, I can see no reason for condemning the practice as a whole.

And even if the argument above quoted were sound, it would not justify the order made by the Commission, which not only forbids the alleged mischief, but the remedy to the public for an acknowledged disadvantage. Upon the theory suggested the real unlawfulness of the practice is in the excess referred to, and the order should have been appropriate to its correction and stopped there, instead of utterly depriving the public of a remedy "justified by the dissimilar circumstances." But as already said the court can make no new order. The order of the Commission stands or falls as made. The theory last mentioned and the argument in its support proceed upon too nice distinctions. Such close balancing is impracticable, and is not attempted in the administration of the statute generally.

In answer to the claim that on account of its greatly larger size and business Grand Rapids is entitled to greater facilities than a small place, it is said that in so far as the greater amount of business enables the railway company to do carting at a cheaper rate at Grand Rapids than at Ionia, by so much may the carrier reduce the cartage cost to the shipper at the former place, because this is a legitimate and actual dissimilarity in conditions between the two places.

The dissimilarity of conditions which is thus admitted to be legitimate ground for different rates of cartage prices at the two places, consists primarily in the greater amount of busi-

ness at Grand Rapids, and consequently in the fact that therefore it can be more cheaply done. But the cartage is parcel only of the whole transportation. It is done to augment the bulk of that business. And no reason is perceived why the discrimination which would justify a larger cartage for the same money would not justify a larger service in the whole transportation, the business being so much larger as to make it an object on ordinary business principles, for the carrier to render that service in order to gain the profits accruing from its greater volume. The public at Grand Rapids are entitled to enjoy the corresponding advantage which results from the aggregation of their business, and if that aggregation justifies their superior accommodation on business principles, there is nothing in the Interstate Commerce Law, fairly interpreted, which prevents their enjoyment of it.

The breeding of artificial distinctions in this law is, in my opinion, very objectionable and very likely to impair its utility to the public, who are parties most likely to suffer on every occasion when losing sight of the main object, the Commission or the courts listen to the ingenious weaving of unsubstantial fabrics among the branches of the statute by interested parties.

In this opinion the result is reached, upon considerations which do not depend upon any supposed right of the respondent to be protected in the privilege of putting itself upon a footing of equality in competition for the business at Grand Rapids. The Commission has, in many instances, recognized such a right and incidentally, at least, sought to protect it. The circuit courts in the fifth and ninth circuits have held that the competition of other roads might produce such dissimilarity in conditions as the statute recognizes in permitting the rendition of greater service for the same compensation. To what extent this may be carried it has not been deemed necessary here to say.

For the reasons given and with great respect to the Commission, I cannot bring myself to the conclusion that their order is right, and I feel bound to withhold my assent from it. My conviction is that it would establish a precedent, the principle of which, carried to its logical conclusion would reach far into existing usages and be extremely injurious to the interests of the public in many localities, without any corresponding advantages to the public anywhere else.

FLORIDA SUPREME COURT.

F. R. OSBORNE, *Plff. in Err.*,

v.

STATE of Florida.

- *1. A state cannot tax or regulate interstate commerce, or make the payment of a tax or the taking out of a license a condition precedent to carrying interstate commerce. A state statute which does so, either expressly or in effect, is offensive to the commerce clause of the Constitution of the United States, and void at least to that extent. The same is true as to foreign commerce.
2. A state statute which imposes a tax, in general terms, on the doing of specified kinds of business, or the pursuit of designated occupations, in the state, and requires that a license shall be taken out before any such business or avocation shall be done or engaged in, should not be construed to apply to any business of the kind that may constitute interstate commerce, but only to business that is domestic or state commerce and to persons engaged or intending to engage in such domestic or state business.
3. Although interstate commerce cannot be taxed or regulated by state legislation, and the commerce clause of the Federal Constitution exempts all such commerce from regulation or taxation by state authority, yet the doing of business that constitutes interstate commerce by a person who is also at the same time engaged in business, of the same kind, that constitutes state or local commerce, cannot be made a bar or exemption of the local or state commerce business from taxation or regulation by state authority.
4. The ninth section of the General Revenue Law of 1886 (chapter 4115, approved June 2, 1886) provides that no person shall engage in or manage the business, profession, or avocation mentioned therein without first taking out a state license as provided therein and paying the occupational tax and license fee prescribed thereby; and it authorizes counties and incorporated cities and towns to impose further taxes. As to express companies its special provisions, substituting figures for words, are as follows: "All express companies doing business in this state shall pay in cities of 15,000 inhabitants or more, a license tax of \$200; in cities of 10,000 to 15,000 inhabitants, \$100; in cities of 5000 to 10,000 inhabitants, \$75; in cities of 3000 to 5000 inhabitants, \$50; in cities of 1000 to 3000 inhabitants, \$25; in towns and villages of less than 1,000 and more than fifty inhabitants, \$10." Any express company violating these provisions, or any person that knowingly acts as

agent for any express company before it has paid the tax payable by such company is guilty of a misdemeanor and punishable as therein provided. *Held,*

(a) The act does not tax or regulate or apply to interstate commerce, as distinguished from state or local commerce carried on by an express company, but applies only to express business that is local or state commerce.

(b) That so long as an express company confines its operations to express business that constitutes interstate or foreign commerce it is exempt from the above legislation, but if it engages in business that is state or local, as distinguished from interstate or foreign commerce, it becomes subject to the statute, notwithstanding it may at the same time engage in interstate or foreign commerce.

(c) The effect of the section, in so far as it imposes license taxes on express companies, is that each company doing any business that constitutes local or state commerce, as contradistinguished from interstate or foreign commerce, shall pay a state license tax and take out a state license when it proposes to do business in any city or town or village having more than fifty inhabitants, the amount of such tax being as above indicated according to the population. When there are in one county several cities or towns or villages belonging to one or more of the stated classes, the company must take out a separate state license for each city, town, or village it may intend to do business in, and pay the tax and the fee for the same. Any county may require each company doing business within its limits to pay for doing business in any city, town, or village in the county and within the provisions of the act, a license tax not exceeding fifty per cent of the amount paid the state for doing business in such city, town, or village. And any incorporated city or town may impose a tax of as much as fifty per cent of the state tax on any company doing business therein.

(d) That the amount of the tax is not shown to be prohibitory or destructive of the business of express companies, even if it be that any judicial action could be based on such a showing.

(e) The act is of uniform operation throughout the state as to all persons standing in the situation made the test of such taxation.

(f) The ascertainment of population involved in the act is not one that the courts are incapable of dealing with successfully.

*Headnotes by RANEY, Ch. J.

(Decided January 16, 1894.)

ERROR to the Circuit Court for Duval County to review a judgment denying plaintiff's application for a writ of habeas corpus to obtain his release from custody, to which he had been committed for acting as agent of an express company without a license. *Affirmed.*

NOTE.—As to the validity of state taxes or licenses which affect interstate commerce, see authorities collected in *Rothermel v. Meyerle* (Pa.) 9 L. R. A. 386, and note; and see also the case next following this one.

4 INTER 8.

As to how far shipments within a state are part of interstate or foreign commerce, see note to *Missouri Pac. R. Co. v. Sherwood* (Tex.) 17 L. R. A. 648.

Statement by **Raney, Ch. J.:**

Section 9 of chapter 4115, Laws approved June 2, 1893, provides that: "No person shall engage in or manage the business, profession, or occupation mentioned in this section, unless a state license shall have been procured from the tax collector, which license shall be issued to each person on receipt of the amount hereinafter provided, together with the county judge's fee of twenty-five cents for each license, and shall be signed by the tax collector and the county judge, and have the county judge's seal upon it. Counties and incorporated cities and towns may impose such further taxes of the same kind upon the same subjects as they may deem proper, when the business, profession, or occupation shall be engaged in within such county, city, or town. The tax imposed by such city, town, or county shall not exceed fifty per cent of the state tax. But such city, town, or county may impose taxes on any business, profession, or occupation not mentioned in this section, when engaged in or managed within such city, town, or county. No license shall be issued for more than one year, and all licenses shall expire on the first day of October of each year, but fractional licenses, except as hereinafter provided, may be issued to expire on that day at a proportionate rate, estimating from the first day of the month in which the license is so issued, and all licenses may be transferred, with the approval of the comptroller, with the business for which they were taken out, when there is a bona fide sale and transfer of the property used and employed in the business as stock in trade; but such transferred license shall not be held good for any longer time, or for any other place, than that for which it was originally issued."

The same section, in various subdivisions, then enumerates divers business occupations and professions that are required to procure licenses, and prescribes the amount of tax that each shall annually pay therefor, until we reach the 12th subdivision of the section, that provides, among other things, that "all express companies doing business in this state, shall pay in cities of 15,000 inhabitants or more, a license tax of \$200; in cities of 10,000 to 15,000 inhabitants, \$100; in cities of 5000 to 10,000 inhabitants, \$75; in cities of 3000 to 5000 inhabitants, \$50; in cities of 1000 to 3000 inhabitants, \$25; in towns and villages of less than 1,000 and more than 50 inhabitants, \$10. Any express company violating this provision, and any person that knowingly acts as agent for any express company before it has paid the above tax, payable by such company, shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be punished by a fine of not less than \$50, or confined in the county jail not less than six months." Besides the criminal penalty above, section 10 of the same act provides that "the payment of all license taxes may be enforced by the seizure and sale of the property by the collector." For an alleged violation of this statute, in knowingly acting as agent at Jacksonville, in Duval county, Florida, for the Southern Express Company, a corporation created under the laws of the state of Georgia, but doing business in Florida, without having paid such license,

4 INTER S.

F. R. Osborne, the plaintiff in error, was arrested upon affidavit and warrant, and required to give bond for his appearance before the criminal court of record for Duval county to answer said charge. Upon his refusal to give such bond he was committed to the common jail of the county, there to await trial. Whereupon he applied to the judge of the circuit court for the writ of habeas corpus to test the legality of his arrest and detention. Upon the hearing on habeas corpus the arrest and detention of the plaintiff in error on the charge alleged against him under this statute was adjudged to be legal, and he was remanded to the custody of the sheriff, and this order he brings here for review by writ of error.

The cause was submitted to the court below upon the following agreed statement of facts: "That the said F. R. Osborne is the agent of the Southern Express Company, and that said company is a corporation created, existing, and being under the laws of the state of Georgia. That said Southern Express Company is doing a business in the state of Florida ordinarily done by express companies in the United States, of carrying goods and freight for hire from points within the state of Florida to points in said state, and also of carrying goods and freights for hire from points within the state of Florida to points without the state of Florida in other states in divers parts of the United States, and in carrying goods and freights for hire from points in other states of the United States to points within the state of Florida, and that it has been engaged in such business for more than twenty years, and was so engaged on the 3d day of October, 1893. That of the business done by the Southern Express Company 95 per cent thereof consists of traffic carrying of goods and freights from the state of Florida into other states and bringing and carrying from other states of the United States to points within the state of Florida, and 5 per cent thereof consists of carrying goods and freights between points wholly within the state of Florida. That F. R. Osborne did knowingly act as the agent of said express company on the 3d day of October, 1893, in the city of Jacksonville, Duval county, Florida, a city having more than 15,000 inhabitants, the said Southern Express Company having then and there failed and refused to pay the license tax as required by article 12, section 9, of an Act entitled 'An Act for the Assessment and Collection of Revenue,' of the Laws of Florida, approved June 2d, 1893. That the Southern Express Company does business in and has agents in more than one town in nearly every county in the state, and that said towns differ in population, and that it has an office and agent and does business in Polk county, Florida, in the following incorporated towns with a population as follows: Bartow, 1500 inhabitants, Ft. Meade, 600 inhabitants, Columbia, 600 inhabitants, Lakeland, 800 inhabitants, and Winter Haven, 200 inhabitants; in Orange county, Apopka, 500 inhabitants, Orlando, 10,000 inhabitants, Sanford, 5000 inhabitants, Umatilla, 3000 inhabitants, Winter Park, 600 inhabitants, and Zellwood, 300 inhabitants; in Alachua county, Campville, 400 inhabitants, Archer, 150 inhabitants, Grove Park, 110 inhabitants, Gaines-

village, 5000 inhabitants, Hawthorne, 300 inhabitants, High Springs, 500 inhabitants, and Island Grove, 200 inhabitants; in Duval county, Jacksonville, with a population of over 15,000, Baldwin, 125 inhabitants."

Mr. John E. Hartridge, for plaintiff in error:

The word "commerce" has been so extended as to scarcely have any boundary. "Commerce is a term of comprehensive import. It includes intercourse for the purposes of trade in any and all forms. The effort to regulate, says the Supreme Court of the United States, embraces all the instruments by which such commerce may be conducted."

Rorer, *Interstate Law*, p. 405.

The Constitution of the United States places commerce between the several states exclusively within the control and regulation of congress.

Id. p. 406.

No state may in any manner fetter or obstruct interstate commerce.

Id. p. 408, and authorities there cited.

To require a license tax before one can act as an agent of an express company is to fetter or obstruct interstate commerce, where that company is engaged in such business.

Until congress exercises its authority upon the subject interstate commerce is free.

Rorer, *Interstate Law*, p. 409; *Leisy v. Hardin*, 135 U. S. 109, 34 L. ed. 132, 3 Inters. Com. Rep. 36.

It cannot be said in any seriousness that the act of the legislature of the state of Florida under discussion is a police regulation, as it does not protect property, health, or the safety of a person.

No matter whether the state law is or is not a police regulation, if it is in conflict with the Constitution of the United States, either as expressed in terms or by its silence, it is not valid.

Patterson v. Kentucky, 97 U. S. 504, 24 L. ed. 1116; *Chy Lung v. Freeman*, 92 U. S. 275, 23 L. ed. 550; *Western U. Teleg. Co. v. Pendleton*, 122 U. S. 347, 30 L. ed. 1187, 1 Inters. Com. Rep. 306; *Re Rahrer*, 140 U. S. 554, 35 L. ed. 574; *Hannibal & St. J. R. Co. v. Husen*, 95 U. S. 465, 24 L. ed. 527; *Minnesota v. Barber*, 136 U. S. 313, 34 L. ed. 455, 3 Inters. Com. Rep. 185.

The following state taxes directly regulating the subjects of commerce have been declared unconstitutional:

A tax on every ton of freight carried by the railroads of the state, as far as it applied to interstate freight.

State Freight Tax Case, 82 U. S. 15 Wall. 232, 21 L. ed. 146.

On all messages of a telegraph company, as far as it applied to messages sent to or received from points in other states.

Western U. Teleg. Co. v. Texas, 101 U. S. 460, 26 L. ed. 1067.

In the form of a license to sell the products of other states.

Ward v. Maryland, 79 U. S. 12 Wall. 418, 20 L. ed. 449; *Welton v. Missouri*, 91 U. S. 275, 23 L. ed. 347; *Webber v. Virginia*, 103 U. S. 344, 26 L. ed. 565.

On all persons soliciting orders, as far as it

applied to those soliciting for persons outside the state.

Asher v. Texas, 128 U. S. 129, 32 L. ed. 868, 2 Inters. Com. Rep. 241.

On all nonresidents who sold liquor.

Walling v. Michigan, 116 U. S. 446, 29 L. ed. 691.

On common carriers for each person carried out of the state.

Crandall v. Nevada, 73 U. S. 6 Wall. 35, 18 L. ed. 745.

On a steamship company for every alien passenger landed at the ports of the state.

New York v. Compagnie Generale Transatlantique, 107 U. S. 59, 27 L. ed. 888.

A tax in the form of a bond from the captains of all vessels to insure that the alien passengers shall not become a charge on the state.

Henderson v. Wickham, 92 U. S. 259, 23 L. ed. 548.

In the form of a license for all drummers, as far as applied to those selling the products of other states.

Robbins v. Shelby County Taxing Dist. 120 U. S. 489, 30 L. ed. 694, 1 Inters. Com. Rep. 45.

Or in the form of a license to sell such products not the product or manufacture of the vendor.

Corson v. Maryland, 120 U. S. 502, 30 L. ed. 699, 1 Inters. Com. Rep. 50.

The following state taxes, regulating indirectly the subjects of commerce, though the means of commercial intercourse, have been declared unconstitutional:

A tax in the form of a license for the officers of all foreign corporations, as far as it falls on those engaged in interstate commerce.

McCall v. California, 136 U. S. 104, 34 L. ed. 892, 3 Inters. Com. Rep. 181.

In the form of a license for all occupations as far as it falls on the business of running tug boats to the Gulf of Mexico.

Moran v. New Orleans, 112 U. S. 69, 28 L. ed. 653.

On the gross receipts of common carriers, as far as applied to the receipts from interstate business.

Fargo v. Stevens, 121 U. S. 230, 30 L. ed. 888, 1 Inters. Com. Rep. 51; *Philadelphia & S. Mail SS. Co. v. Pennsylvania*, 122 U. S. 326, 30 L. ed. 1200, 1 Inters. Com. Rep. 308.

On the gross receipts of a telegraph company, as far as it applied to receipts from messages sent to or received from points outside the state.

Ratterman v. Western U. Teleg. Co. 127 U. S. 411, 32 L. ed. 229, 2 Inters. Com. Rep. 59.

A tax in the form of a license for ferry boats owned in other states, touching at the wharves of the state.

St. Louis v. Wiggins Ferry Co. 78 U. S. 11 Wall. 423, 20 L. ed. 192.

On the capital stock of all companies, so far as it applied to ferry companies chartered in another state whose boats touch at the wharves of the state.

Gloucester Ferry Co. v. Pennsylvania, 114 U. S. 196, 29 L. ed. 158, 1 Inters. Com. Rep. 882.

On all vessels touching at the wharves of the state, as applied to those engaged in interstate business.

Inman SS. Co. v. Tinker, 94 U. S. 288, 24 L. ed. 118.

On all cars used on the roads in the state, not owned by the common carrier resident in the state, as far as it applied to cars engaged in interstate traffic.

Pickard v. Pullman Southern Car Co. 117 U. S. 34, 29 L. ed. 785.

In the form of a license for a telegraph company established by Congress.

Leloup v. Port of Mobile, 127 U. S. 640, 32 L. ed. 811, 2 Inters. Com. Rep. 184.

On the franchise of a railroad which franchise had been granted by Congress.

California v. Central Pac. R. Co. 127 U. S. 1, 32 L. ed. 152, 2 Inters. Com. Rep. 153.

On the tonnage of vessels, though to support quarantine inspection.

Peete v. Morgan, 86 U. S. 19 Wall. 581, 22 L. ed. 201.

A state law is unconstitutional and void which requires a party to take out a license for carrying on interstate commerce, no matter how specious the pretext may be for imposing it.

Norfolk & W. R. Co. v. Pennsylvania, 186 U. S. 114, 118, 84 L. ed. 394, 396, 3 Inters. Com. Rep. 178; *Crutcher v. Kentucky*, 141 U. S. 47, 35 L. ed. 649; *Pembina Consol. Silver Min. & Mill. Co. v. Pennsylvania*, 125 U. S. 181, 31 L. ed. 650, 2 Inters. Com. Rep. 24.

Mr. William B. Lamar, Atty. Gen., for the state.

Raney, Ch. J., delivered the opinion of the court:

In the case of *Osborne v. Mobile*, 83 U. S. 16 Wall. 479, 21 L. ed. 470, decided in 1872, the ordinance then in question provided that every express or railroad company doing a business in the city of Mobile, Alabama, and having a business extending beyond the limits of that state, should pay an annual license of a stated amount, and every such company doing a business within the limits of the state, and every such company doing business within the city, should take out a license, paying therefor other amounts. Osborne was there, as here, the agent of the Southern Express Company, a Georgia corporation, which transacted a general express business within and extending beyond the state of Alabama. The company fell under the first clause of the ordinance, and notwithstanding its terms that clause was held unobjectionable to the commerce clause of the Federal Constitution. The decision is founded expressly on the rule laid down in the case of *State Freight Tax*, 82 U. S. 15 Wall. 252, 21 L. ed. 146, where it was said that it is not everything which affects commerce that amount to a regulation of it within the meaning of the Constitution, and was also admitted that the ultimate effect of the tax on such receipts might be to increase the cost of transportation, but was held that the right to tax the receipts, though derived in part from interstate transportation, was within the general authority of the state to tax persons, property, business, or occupations within their limits. In *Philadelphia & S. Mail S. S. Co. v. Pennsylvania*, 122 U. S. 326, 30 L. ed. 1200, 1 Inters. Com. Rep. 308, the decision in the case of *State Freight Tax*, 4 INTER S.

was considered and questioned, it being held by a unanimous court that a state tax upon the gross receipts of a steamship company incorporated under its laws, such receipts being derived from the transportation of persons and property by sea between different states, and to and from foreign countries was a regulation of interstate and foreign commerce, and in conflict with the exclusive powers of Congress. That the *Osborne Case* has been overruled by that of *Leloup v. Port of Mobile*, 127 U. S. 640, 32 L. ed. 811, 2 Inters. Com. Rep. 134, decided in 1888, cannot be denied, and it is clear that the first clause of the ordinance did in terms and effect impose a tax on that class of express companies which might be engaged in interstate commerce, as a distinct class from the other classes engaged, one in business not extending beyond the state, and the other in that not extending outside of the corporate limits.

In the *Leloup Case*, *supra*, an ordinance, adopted in 1883, imposed an annual license tax of \$225 "on telegraph companies." Leloup was the agent of the Western Union Telegraph Company at Mobile, and the license tax not having been paid, a civil action was brought in the circuit court against Leloup to recover a pecuniary penalty which had been adjudged in another tribunal under the ordinance for its violation, the complaint in the circuit court alleging that the company was a New York corporation, having a place of business at Mobile, and had been engaged there in the business of transmitting telegrams from and to points within Alabama, and between private individuals of that state, as well as between citizens thereof and of other states. The plea alleged, in substance, Leloup's agency and that the company's charter authorized it to construct and operate lines of telegraph in and between the various states of the Union, including Alabama; and further, that on June 5, 1867, the company accepted the restrictions and obligations of the Act of Congress of July 24, 1866, and that in accordance with its charter the Act of Congress and agreements with the railroad companies, it constructed, and was at the time of the alleged breach of the ordinance, maintaining and operating, its lines of telegraph on various specified public railroads leading into Mobile, and through Alabama and several other named states, and into others, and over all the principal railroads, post-roads, and military roads in the United States, said roads being public highways, and the daily mails being regularly carried thereon under authority of law and the direction of the postmaster general; and under and across navigable streams in said states, but without interruption to navigation of the streams, or travel on such military and post-roads. That before and during the year 1883, it had been and still was engaged in the business of sending and receiving telegrams over such lines for the public between its office in Mobile and other places in other states and territories of the United States, and to and from foreign countries, also in sending telegraphic communications between the several departments of the government of the United

States and their officers and agents, giving priority to said official telegraphic communications over all other business, such official communications being sent at rates fixed by the Postmaster General annually since June 5, 1867. To this plea there was a demurrer which was sustained by the circuit court and judgment was given for the plaintiff, and this judgment affirmed by the supreme court of Alabama. The Supreme Court of the United States reversed the judgment, and decided: (1) That the license tax imposed by the ordinance was purely a tax on the privilege of doing the business in which the telegraph company was engaged, the company being also required to pay taxes on its property as other corporations and individuals, and also a tax on its gross receipts within the state; (2) Stating that the question was squarely presented, whether a state, as a condition of doing business within its jurisdiction, may exact a license tax from a telegraph company, a large part of whose business is the transmission of messages from one state to another, and between the United States and foreign countries, and which is invested with the powers and privileges conferred by the Act of Congress of July 24, 1866, and other acts incorporated in title LXV. of the Revised Statutes. Proceeding to answer this question, it held that a state cannot tax a business occupation when it cannot tax the business itself; and that a tax on the occupation of doing a business is a tax on the business. That communication by telegraph is commerce, as well as in the nature of postal service, and if carried on between different states it is commerce among the several states and directly within the power of regulation conferred upon congress, and free from the control of state regulations except such as are strictly of a police character. In reply to the argument that a portion of the company's business was internal to the state and therefore taxable by the state, it is said that such fact does not remove the difficulty; that the tax affects the whole business without discrimination, and that there are sufficient modes in which the internal business, if not already taxed in some other way, may be subjected to taxation without the imposition of a tax which covers the entire operation of the company. The cases of *Pensacola Teleg. Co. v. Western U. Teleg. Co.* 96 U. S. 1, 24 L. ed. 708, and *Western U. Teleg. Co. v. Texas*, 105 U. S. 460, 26 L. ed. 1067, are also referred to approvingly, and the conclusion reached in *Leloup's Case* is declared to be plainly within the principles of the decisions in *Robbins v. Shelby County Taxing Dist.* 120 U. S. 489, 30 L. ed. 695, 1 Inters. Com. Rep. 45, and *Philadelphia & S. Mail SS. Co. v. Pennsylvania*, 122 U. S. 326, 30 L. ed. 1200, 1 Inters. Com. Rep. 308, and the case is held to be parallel with that of *Brown v. Maryland*, 25 U. S. 12 Wheat. 419, 6 L. ed. 678, and the court declares that the fairest and most just construction of the Constitution in all its parts "leads to the conclusion that no state has the right to lay a tax on interstate commerce in any form, whether by way of duties laid on the transpor-

tation of the subjects of that commerce, or on the receipts derived from that transportation, or on the occupation or business of carrying it on, and the reason is that such taxation is a burden on that commerce and amounts to a regulation of it, which belongs solely to Congress."

It will be well to notice here the cases of *Pensacola Teleg. Co. v. Western U. Teleg. Co.*, and of the same company v. *Texas*, referred to *supra*. The former case is one in which it was held that the above Act of Congress in so far as it declares that the erection of telegraph lines shall, as against state interference, be free to all who accept its terms and conditions, and that a telegraph company shall not after accepting them, be excluded by another state from prosecuting its business within her jurisdiction, is a legitimate regulation of commercial intercourse among the states, and appropriate legislation to execute the powers of congress over the postal service; and is not limited in its operation to such military and post-roads as are upon the public domain. This act, it will be found, gives to all telegraph companies organized under the laws of any of the states the right to construct telegraph lines through and over any portion of the public domain of the United States, and over and along any of the military and post-roads of the United States, and over and across the navigable streams and waters of the United States, with certain conditions as to construction; and grants the right to occupy land and use materials; and enacts that telegraphic communications between the several departments of the general government and their officers and agents shall in their transmission over the lines of such companies have priority over all other business, and be sent at rates to be annually fixed by the Postmaster General; and also enacting that before any company shall exercise the powers and privileges conferred thereby it shall file its written acceptance with the Postmaster General of the restrictions and obligations required by this act. And in *Western U. Teleg. Co. v. Texas*, where a Texas statute required every chartered telegraph company doing business in that state to pay a tax of one cent on every full-rate message, and one half cent for every message less than full rate, the state sued to recover the tax for messages of which a large number were sent to places outside of the state and by officers of the general government on public business. There was judgment for the state, no deductions being allowed by the state courts for messages sent out of the state or by government officers on government business. The Supreme Court of the United States, in reversing the judgment, says: "The . . . company having accepted the restrictions and obligations of this provision by congress, occupies in Texas the position of an instrument of foreign and interstate commerce and of a government agent for the transmission of messages on public business. Its property in the state is subject to taxation the same as other property, and it may undoubtedly be taxed in a proper way on account of its occupation and its business. The precise ques-

tion now presented is whether the power to tax its occupation can be exercised by placing a specific tax on each message sent out of the state, or sent by public officers on the business of the United States. . . . As such, so far as it operates on private messages sent out of the state, it is a regulation of foreign and interstate commerce and beyond the power of the state. That is fully established by the cases already cited. As to the government messages, it is a tax by the state on the means employed by the government of the United States to execute its constitutional powers, and therefore void." The conclusion was that the judgment in so far as it included taxes for government messages or those sent out of the state, was erroneous, it being observed that any tax which the state might put on messages sent by private parties, and not by the agents of the general government, from one place to another exclusively within the jurisdiction of the state, will not be repugnant to the Federal Constitution, and that whether the state law of Texas, in its present form, could be used to enforce the collection of such a tax, was a question entirely within the jurisdiction of the courts of the state, and as to which the supreme court had no power to review. Still another case involving the effect of the Act of Congress referred to above and tending also to elucidate the question before us independent of such legislation, is *Western U. Teleg. Co. v. Atty. Gen. of Massachusetts*, 125 U. S. 530, 31 L. ed. 790. The valuation of the entire capital stock of the company was obtained from the company, and from this there were made certain deductions allowable in determining the assessable value of such entire stock, and the value of the property of the company in the state was ascertained upon the basis of the proportion of the length of the lines within the state to the length of its lines throughout the country, and this value was assessed at the uniform rate of \$14.14 on each \$1000 of valuation. The company contended that, in view of the Act of Congress, which it had accepted, no tax could be claimed for that part of its line,—2334.55 out of 2838.05 miles—that was over, under, or across post-roads. The Massachusetts law had a provision to the effect that upon a failure to pay the taxes required to be paid to the treasurer, he might commence an action for the recovery of the same, and further, that all penalties denominated by the act might be collected by informations, and that upon such information the court might issue an injunction restraining the further prosecution of business by the corporation, company, copartnership, or association until all such taxes due, or penalties incurred, should be paid, with interest and costs. The tax was held by the supreme court to be essentially an excise on the capital of the corporation, imposed in an attempt by the commonwealth to ascertain the just amount which any corporation engaged in business within its limits should pay as a contribution to the support of its government on the amount and value of the capital employed by the company therein; or as elsewhere said the tax though nominally upon

4 INTER S.

the shares of the capital stock is in effect a tax upon that organization on account of property owned and used by it in the state, and the proportion of the length of its lines in the state to their entire length throughout the whole country, is made the basis for ascertaining the value of that property. While, says the opinion, the state could not interfere by any specific statute to prevent a corporation from placing its lines along these post-roads, or stop the use of them after they were placed there, nevertheless the company receiving the benefit of the laws of the state for the protection of its property and its rights, is liable to be taxed upon its real and personal property as any other person would be; and that it never could have been intended by Congress in conferring upon a corporation of one state the authority to enter the territory of another and erect its poles and lines therein to establish the proposition that such a company owed no obedience to the laws of the state into which it thus entered, and was under no obligation to pay its fair proportion of the taxes necessary to its support. The tax was held to be valid, but that part of the state legislation which authorized an injunction was decided to be void, the court observing that the effect of the injunction was to utterly suspend the business of the company and defeat its operations within the state; that if Congress had authority to say that the company might construct and operate its telegraph over these lines, the state can have no authority to say it cannot be done; but that in holding this portion of the act to be void, it was not meant to deprive the state of the power to assess and collect the tax.

In *Crutcher v. Kentucky*, 141 U. S. 47, 35 L. ed. 649, a statute of Kentucky made it unlawful for any agent of any express company, not incorporated by the laws of that state, to carry on the business of transportation in that state without first obtaining a license therefor from the auditor, and before the auditor could issue such license to any agent of any company incorporated by any state of the United States, there had to be filed with such officer a copy of the company's charter and a sworn statement showing the assets and liabilities of the company, amount of capital stock, how paid, and of what the assets of the company consist, and, in short, the financial condition of the company, and that it was possessed of \$150,000 either in cash or safe investments inclusive of stock notes; such statement to be renewed annually. A fee of \$5 to be paid by the company or agent was allowed to the auditor for issuing the license, and a like fee for filing copy of charter, and of ten dollars for filing original and annual statements. Crutcher was indicted for doing business as the agent of the United States Express Company, an express company not incorporated by the laws of Kentucky, but trading and doing business as a common carrier by express of goods and other things of value in and through the county of Franklin and state of Kentucky without having any license so to do, either for himself or for such company, and on a plea of not guilty, was found guilty and sentenced

to pay a fine. There was an agreed statement of facts, including in its admissions the agency, the incorporation and absence of license, and the doing of business ordinarily done by express companies in this country, of carrying goods and freight for hire not only between points in the state, but also from points in the state to points out of it, and *vice versa*. The statement also showed the total amount of business done at the Frankfort office in November, 1888, and that not quite one fourth of it was local to the state, and the balance was between places in the state and places outside of it. The court of appeals of Kentucky affirmed the judgment of conviction; but the Supreme Court of the United States reversed it, and in doing so said of the statute that it required from the agent of every express company a license before he can carry on any business for the company in the state, and that this of course embraced interstate business as well as business confined wholly within the state, and was a prohibition against the carrying on of interstate business without a compliance with the state law. The requirement of the statement as to \$150,000 investment is also held to be a regulation of such commerce in its application to corporations or associations engaged in that business and a subject belonging to the jurisdiction of the national, and not the state legislature. "If," says the opinion, "a partnership firm of individuals should undertake to carry on the business of interstate commerce between Kentucky and other states, it would not be within the province of the state legislature to exact conditions on which they should carry on their business, nor to require them to take out a license therefor. To carry on interstate commerce is not a franchise, or a privilege granted by the state; it is a right which every citizen of the United States is entitled to exercise under the Constitution and laws of the United States; and the accession of mere corporate facilities, as a matter of convenience in carrying on their business cannot have the effect of depriving them of such right unless Congress should see fit to interpose some contrary regulation on the subject." In citing *Pickard v. Pullman Southern Car Co.* 117 U. S. 34, 29 L. ed. 785, and other cases, observes the opinion, the court has frequently decided that a state law is unconstitutional and void which requires a party to take out a license for carrying on interstate commerce, no matter how specious the pretext may be for imposing it. Again, the court, addressing itself to the fact that the statement shows some business of a purely domestic character to have been done, says: "This is probably quite as much for the accommodation of the people of that state as for the advantage of the company. But whether or not, it does not obviate the objection that the regulations as to license and capital stock are imposed as conditions on the company's carrying on the business of interstate commerce which was manifestly the principal object of its organization. These regulations are clearly a burden and restriction on that commerce. Whether intended as such or not they operate as such. But taxes or license

fees in good faith imposed exclusively on express business carried on wholly within the state would be open to no such objection." The opinion also distinguishes the case from those of foreign corporations seeking to do a business which does not belong to the regulating power of Congress, as insurance business, and manufacturing, and all other corporations whose business is of a local and domestic nature, as to all of which the state has full power to prescribe the conditions of their doing such business in its limits. *Bank of Augusta v. Earle*, 38 U. S. 13 Pet. 519, 10 L. ed. 274; *Paul v. Virginia*, 75 U. S. 8 Wall. 168, 19 L. ed. 357; *Liverpool & L. L. & F. Ins. Co. v. Oliver*, 77 U. S. 10 Wall. 586, 19 L. ed. 1029; *Cooper Mfg. Co. v. Ferguson*, 118 U. S. 727, 28 L. ed. 1187; *Philadelphia Fire Asso. v. New York*, 119 U. S. 110, 30 L. ed. 342. The act was held null and void as applied to the case of Crutcher.

The case of *Maine v. Grand Trunk R. Co.* 142 U. S. 217, 35 L. ed. 994, 3 Inters. Com. Rep. 807, cited by the attorney general, holds, as the same is summarized in the syllabus, that a statute which requires every corporation, person or association, operating a railroad within the state, to pay an annual tax for the privilege of exercising its franchises therein, to be determined by the amount of its gross transportation receipts, and further provides that when applied to a railroad lying partly within and partly without the state, or to one operated as a part of a line or system extending beyond the state, the tax shall be equal to the proportion of the gross receipts in the state, to be ascertained in the manner provided by the statute, does not conflict with the Constitution of the United States, and the tax thereby imposed upon a foreign corporation operating a line of railway partly within and partly without the state is one within the power of the state to levy. By the terms of the statute passed in 1881 it was provided that "every corporation, person, or association, operating any railroad in this state, shall pay to the state treasurer for the use of the state an annual excise tax for the privilege of exercising its franchise in this state."

The named railway company was a Canadian corporation having its place of business at Montreal. Its railroad in Maine had been constructed by a Maine corporation, whose charter authorized it to construct and operate a railroad from Portland to the boundary of the state; and with the permission of New Hampshire and Vermont it constructed a railroad from that city to a point in Vermont. In 1858 the Maine company leased its rights and privileges to the Canadian company which, since then, had operated the road and used its franchises. The manner of ascertaining the amount of the tax was as follows: The amount of gross transportation receipts for the year ending September 30 preceding the levying of the tax was to be divided by the number of miles of railroad operated, to ascertain the gross receipts per mile, and the tax was to be fixed on a scale of percentage varying according to the average receipts per mile, not to exceed in any event a stated per centum; and when a road lay partly within
